The colonel is careful to quote from the report of these gentlemen as to the denser character of the blue clay they saw where the dams were to be, near La Boca, than they expected to find. They remarked "This material is firmer than we had expected to find, and at the time of our visit, about two days after it had been flooded by spring tides, it could be walked on in most places." They go on to state clearly the plan of construction and the dimensions of the dam, which were to be 80 to 100 feet wide at the top, 80 feet high, and about 640 feet wide at the base, against 135 feet high at Gatun and 1,200 feet base, the material to be dumped from trestles, as at Gatun. Colonel Goethals says, in his letter to the Secretary, of the material overlying the rock, that it was found to be "an unctuous blue clay, without grit, possessing but little supporting power"—this same material, which the two consulting engineers who twice indorsed this dam said was better than they expected to find.

The trestles failed, and the colonel says the "material overlying the rock, 10 to 70 feet deep, moved laterally, carrying the superimposed mass with it, the dumps flattening out until the side slopes were about 1 on 12 or even less. In places the lateral motion continued for two weeks after dumping had stopped. The ground on either side was forced up, forming mounds of mud, the crests of which gradually approached the level of the top of the dump proper." Then the trestle was lowered to 8 feet, but "similar failures followed."

The colonel stated that to build dams there it would be necessary to "remove all the material overlying the rock, and after preparation of the rock surface proceed by building the dams of selected materials." These dams thus constructed, he said, would cost eleven and a half million dollars—works which had been estimated by the minority of the board of engineers to cost four and one-third millions.

He recommended the abandonment of the plan to place the dams and locks at La Boca, the abandonment of the La Boca lake, and the so-much extolled "lake navigation," and the construction of these two locks, one at Miraflores and the other at Pedro Miguel. Colonel Goethal's report occupies two and a half pages of the RECORD, and closes with five lines in which it is casually or incidentally stated that "the location of the locks secures them against the possibility of distant bombardment and affords greater security against gunboat and torpedo-boat attack." How do the conditions at Gatun differ from La Boca? We fail to find a word to satisfactorily assure us that the ultimate result will not be the same.

But in the recent testimony given by Colonel Goethals before a House committee on the Isthmus and before a House committee in this city a few days since, he very strenuously insists, with some iteration, that the La Boca site was abandoned not because these dams could not be built where the minority of the consulting board wanted them, but because if the locks had been placed at La Boca they would be liable to destruction by a hostile fleet, and so he proposed their removal farther inland. Is not this largely an afterthought?

We are told that the dewatering of the old French canal "unbalanced" the pressures there and disturbed the equilibrium, and then the blue clay beneath escaped laterally. But how is this "balance" to be maintained?

The Chagres flow is to pass through the spillway until the dam is finished. By the closing of this opening the flow is arrested and the lake formed. The dam is to be a huge mound of earth 135 feet high and nearly a mile and a half long, the water of the river during construction passing to the ocean over the spillway sill, 10 feet above sea level. When the lake is filled the dam will have against it the pressure due to a head of 85 feet on one side and none on the other. This would seem to the layman as likely to cause an "unbalancing" of pressure as did the removal of 10 feet of water the other day from the old French canal, with the consequent sliding of the blue clay. With water against the face of the earth dam, that face and all the lower part of the mound will be saturated—a condition that can not exist until the lake is full. Will not the saturation of the lower part of the mass, and the presence on the up-stream slope of 85 feet of water, disturb the equilibrium of the structure? Will not earth saturated with water move more readily than when dry? The inner face of the Wachusetts dam slumped off—not only the part covered with water, but all the way to the crest. The opinion has been expressed by competent engineers that had the disturbance of the equilibrium at Wachusetts been deferred until the intended lake level was reached, instead of at half that level, the slump that would then have resulted would have caused a cataclysm in the river below all the way to the ocean, compared to which flood, as respects destruction of life and property, the Johnstown affair would have been trivial.

The water, 10 or 20 feet deep, pressing against the railroad embankment built recently across Great Salt Lake, in Utah, did not prevent the blue clay beneath from escaping laterally and being hoisted up to and above the lake surface. Who can say that this movement at the Lorin Cut-off would have been greater or less had the water been shallower? The water was of equal depth on both sides of the track, and the embankment was only 15 feet above the surface. At Gatun there will be 85 feet of water on one side of the dam and none on the other, while the crest will be 50 feet above the water, and beneath the dam a blanket of blue clay 70 or 80 feet deep, 2,500 feet long, and extending up and down the valley as far as it has been explored, and under there the main drift in the gorges.

Whenever considerable weights have been piled upon this blue clay it has escaped laterally, and the new load has settled. Other slides and settlements are expected by the engineers, they say. Why not?

Colonel Goethals is in favor of reducing the height of the dam to 105 feet, so as to impose a lesser weight on the underlying blue clay and to secure a more uniform loading of it. It is now said it has been decided to reduce the height 20 feet, thus conceding that the dam as designed will not impose a uniform loading; hence the desired equilibrium between the pressure upon the clay, due to the weight of the mound 135 feet high, and the lateral support for this semifluid upon which the mound rests will be lacking. If the resistance to a lateral movement of the slippery clay under a pressure of 7 tons to the square foot (the weight of a prism of earth 1 foot square and 135 feet high) is deficient, then the structure will be in unstable equilibrium, and the clay may be expected to flow out and away, as at La Boca, and the dam to settle—when or how much no man can say. The distrust expressed by the colonel and by the last board of experts as to the supporting power of this clay is evidenced by their proposing to limit the load.

LAKE SEEPAGE.

The question of holding the water of Gatun Lake has been mooted, and this quite independent of the loss of water through or directly under the dam. It has been asserted (of which disproof is lacking) that the material forming the hills and ridges near Gatun and surrounding the valley and underlying its floor are so porous and fissured that the indispensable level of the lake can not be reached, or, if reached, can not be maintained. Colonel Goethals admitted that very little was known as to this matter of porosity of the basin; but he did not believe there was any sufficient cause for apprehension. Major Sibert was more apprehensive than the colonel as to this. There are, however, some facts revealed by the testimony and the last annual report that are not assuring, that do rather tend to justify the fears that the lake level at 85 feet can not be attained and maintained.

East of but near the lock site a test pit 6 feet square, 42 feet deep, its bottom 20 feet below the sea, was excavated and the formation exposed for inspection. It could be and was kept free of water by pumping 38,000 to 40,000 gallons a day. Upon its floor a plate 6 inches square was placed with a load of 18,000 pounds, and this was sustained for some time without settlement, the pit being kept dry by pumping. The material was soft sandstone, so-called; but the water seeping into the pit and flowing to the pump intake washed out the clay that held the grains of sand together, and then the load tipped over.

On Gatun Island was another test pit 20 feet square and 90 feet deep, the bottom at minus 80 feet. Pumping at the rate of 20,000 to 25,000 gallons per day sufficed to free it from water. Its walls were sustained against caving by timbers and steel sheet piling.

West of and near the spillway is another pit, 10 feet square, 80 feet deep, its bottom at minus 33.5 feet. Some stay braces sufficed to prevent caving. All the strata were badly seamed and fissured, and through the seams came large quantities of water, 60,000 to 80,000 gallons a day. Water standing in bore holes made by drills in the vicinity of this pit was lowered when the pit was pumped. A hole 6 inches in diameter and 12 feet long was uncovered in the excavation of the pit, "probably left by the decay of a log of wood," says the engineer.

Major Sibert, referring to this last pit, said it was used to secure information as to the leakage through the rock formation. In the annual report he says that water stood naturally in this pit at 16 feet above sea level. In the testimony it is stated that when a stream from a nearby tank was turned into the pit or well the water rose but 19 feet higher; that is, to 35 feet above the sea. The inflowing water (quantity per minute or hour not stated) failed to raise the water level in the pit higher, since it escaped through the fissured rock that composed the spillway hill. He fails to state, except as above, what were the observed results of this experiment as respects the porosity of the rock and its suitability for forming a lake basin; but these results were evidently disquieting, for he tells the committee:

"As to the water supply of the lake: The question of seepage loss through the hills around it (the lake)—that is a question we can only guess at. * * * We do not know with any great degree of definiteness the character of the rock and the material constituting the rim of the lake."

In this state the question of water supply for the lock canal is left by Major Sibert, while Colonel Goethals, in commenting on this, remarked:

"Major Sibert says, in effect, that the seepage of the lake through the hills is an unknown quantity; and so do I. But from the maintenance of reservoirs in the same character of formation as the sides of the lake, I do not apprehend any difficulties on this score. * * * As an engineer, I am willing to take some risks, desiring to be safe, with due regard to economy. I am willing to risk something, for if we take all safeguards we can not be sure of everything."

Thus the question of lake maintenance is left by the chief engineer.

Making due allowance for loss of water by evaporation (which is inevitable), for power purposes, for loss through lock gates and sluices, and for ordinary seepage at the rate fixed by General Abbott (an authority on this subject, who is a member of the board of engineers indorsing the lock plan), the number of lockages for which the water supply will be adequate, supposing there will be no extraordinary or unexpected seepage from the lake, will be less than was promised by the board of engineers. But if the rock strata around the lake margins and beneath the lake bottom should prove to be as porous as is the same material in the test pit at the spillway, then no man can say if the lake can ever be filled at all. If not filled and maintained through the year, we can have no navigation—no connection between the two oceans at Panama by the lock canal.

OPEN CHANNELS.

No engineer would propose to place a lock in a navigable channel if it could be avoided; for every lock is an obstruction to navigation. They are never used in good practice if they can be dispensed with. Besides, they limit the length and draft and width of the ships that are to use them, which an open channel does not; for such a navigation can be deepened and widened without interfering with traffic, just as has been done at Suez. The existence of locks also introduces an element of risk and danger which is absent with the sea-level canal.

The Suez Canal was opened in 1869, with a bottom width of 72 feet and depth of 26 feet. It now has a minimum bottom width of 118 feet and depth of 32 feet, and is being widened and deepened to 147.6 and 36 feet, respectively. This canal is twice as long as the one at Panama will be, and during the first five days of January of this year there passed safely through it, in an average time of eighteen hours, our great fleet of battle ships; and a few years ago there passed safely the dry dock *Dewey*, 110 feet wide. This last structure could not under any circumstances have been passed through the Panama locks as now planned unless it was taken to pieces and shipped as cargo in sections.

If a plan of construction that will dispense with the need of locks at Panama is practicable, then they ought not to be constructed. Eight out of 13 of the engineers who the President thought three years ago were competent to advise him as to the type of the canal solemnly declared that a sea-level canal at Panama was practicable and preferable in every way to any plan that involved the use of locks.

These eight engineers with reluctance, apparently, admitted the necessity for a tide lock at the Panama end, which might have to be used a part of the time, stating that the time at their command in the consideration of the questions submitted to them did not permit them to make the required tidal observations and studies to determine the question conclusively. But since the report of the board of consulting engi-

neers was submitted a very eminent authority in Europe (one who has never had any official or other relation to the Panama Canal) has studied, purely as a scientific question, all the data that have been accumulated by the Frenchmen and by ourselves. He has stated, as the result of a very careful consideration of all, that the currents in a sea-level canal at Panama would not exceed the currents that are common at Suez—that is to say, 2½ miles per hour. The currents that are now easily and continuously navigated in some of the Great Lake channels attain a velocity of 5 miles per hour and are being navigated every day. The authority referred to above is Dr. C. Lély, formerly minister of waterworks of Holland.

The six locks at Panama, which every ship, large and small, must pass, are a positive hindrance; and it is said they will cost to build over $50,000,000. Their upkeep and operation will also be vastly greater than would be needed in an open channel. If one pair of locks is destroyed or put out of commission, the canal will be disabled and useless for the time being. The explosion of dynamite in a lock could do this; an earthquake might effect it; and the destruction of the gates of an upper lock, causing the lowering of the lake level, might also cause it—a jeopardy to which a sea-level canal would never be exposed.

For a lock canal at Panama or elsewhere, an adequate water supply is required. We do not know if it be possible to secure this on the Isthmus. For a sea-level canal the ocean is the water supply; and transit will be effected by vessels of any desired size without let or hindrance. If its capacity (that is to say, depth and width) should be inadequate, these will be increased as they were at Suez.

Colonel Goethals has just stated that the President has approved his recommendation to make the cut through the Culebra 300 feet wide instead of 200, the width proposed by all the members of the board of engineers, and a width amply sufficient for the transit of the largest vessels that exist or that have been proposed. If this width is necessary, then the locks as proposed are not wide enough and probably not long enough.

The sea-level canal, as proposed, would have been nowhere less than 150 feet wide at the bottom and 40 feet deep as a minimum, against 118 feet now *and* 147.6 feet in the future at Suez, for width; and for depth, 32 feet now and 36 feet proposed at Suez.

The Kaiser Wilhelm Canal, connecting the North Sea with the Baltic, is now being enlarged so as to afford a bottom width of 143⅓ feet, and a depth of 36⅓ feet—this to accommodate the largest vessels existing or proposed under the German flag. Locks at either end of this canal are required so as to shut out the sea water from the interior rich agricultural district of Schleswig, which is so low that the salt water would ruin vast regions. Some of the curves in this canal are more abrupt than any that have been proposed at Panama. The new locks to be constructed for this canal are to be over 147⅔ feet wide.

The great ship canal of Holland, which makes Amsterdam a seaport, has dimensions of channel considerably less than has the enlarged German canal; while the great Manchester waterway, which makes that city a seaport, has a depth of 28 feet and a width of about 120 feet. These are all of the great ship canals that exist; and they accommodate the commerce and the navies of the world. And yet we propose to widen the cut at Culebra so as to give it more than double the width of any existing canal.

For the sea-level plan but one great dam would be required, that at Gamboa, a masonry structure founded upon solid rock throughout, the building of which presents no uncertainties and no possibilities; a plain matter, an everyday affair. Had the sea-level plan been adopted when the lock plan was approved by Congress this dam should now be about completed, the Chagres under complete control, and the remaining work, except at the harbors—one of simple plodding excavation, a class of work that our engineers have shown by their most excellent methods to be one of very rapid digging.

The dirt is going out of the Culebra now at the rate of over 1,000,000 yards a month, at which rate the Culebra excavation for 85-foot level will be finished in three or four years. Were the installation adequate, and a sea-level channel the end in view, there is scarcely a doubt of its being completed before the time when our engineers promise to have these problematical dams completed and the locks ready.

We are embarked in a stupendous folly, it seems to me. The high tides at Panama approach to within 30 miles on either side of the Isthmus, and a ridge separates them which is nowhere more than 150 feet above the sea level—only a little higher than the top of the proposed Gatun dam.

There now remains in Culebra, obstructing a sea-level channel, just about 80,000,000 yards. We took out last year, with a much smaller plant than could have been economically worked, over 11,000,000 yards. At that small rate we can finish the Culebra in about seven years. By a proper increase of the steam shovels we could end the job in four or five years, easily within the period required to build the dams and complete the locks, every one of which is an obstruction to navigation, utterly useless, and each pair costs eight or nine million dollars.

APPENDIX E.

COMMERCIAL CLUB OF BOSTON.

(Lecture of M. Bunau-Varilla on the Panama Canal, February 25, 1909.)

GENTLEMEN: It is for the second time that the Commercial Club of Boston extends to me its gracious hospitality. The first instance was when this country had to choose between Panama and Nicaragua for the establishment of the great maritime highway of nations.

I came to America, in the beginning of 1901, to develop publicly the scientific arguments, which in my opinion demonstrated the impossibility of the Nicaragua solution.

AIM OF THE LECTURE OF 1901.

After the lecture which I gave in this club, Mr. Lucius Tuttle who presided over the meeting, expressed in the following words, the impression it had made upon his mind: "I see that with the Nicaragua project we have opened the switch on the wrong track. It leads to a precipice—we must stop, go back, and take the other track."

This is just what happened. I need not recite the events which seem more to belong to romance than to reality, and which finally led to the defeat of the Nicaragua solution. You certainly remember the splendid fight in the Senate by that great citizen Senator Mark Hanna, whom I had met through my friend Governor Myron T. Herrick, of Cleveland, and whom I had succeeded in making the firmest believer in the Panama solution; then the secession of Panama, to which I contributed with all my power, and after repeatedly warning Colombia, because it was the only way to save the sacred project of uniting the oceans; then the formation of a new republic which entrusted me as minister plenipotentiary, the representation before the United States and all the nations of the world, of its vital interests, which were its recognition as an independent State and the construction of the canal over its predestined territory.

To-morrow there will be five years since I exchanged with the other great citizen and statesman, John Hay, the ratifications of the treaty by which the Panama Canal, like the phœnix of the fable, was to be borne out of its own ashes.

To-day I come again before you as I did eight years ago to tell you, and through you the people of the United States, that the switch has been opened on a wrong track, that it leads to a precipice, that it is time to stop, to go back and to follow the other track.

STABILITY OF THE GATUN DAM AN ESSENTIAL ISSUE.

The essential question at issue is that of the stability of the Gatun dam.

You know in its general lines the project actually under construction. It consists in creating, on both sides of the continental backbone, a great lake by damming near the oceans the valleys of the two rivers which come from the Cordillera. It consists in opening the continental backbone at such a level as the two lakes will freely communicate between each other. It consists finally in establishing, near each of the two dams, flights of locks which will allow ships to rise from the level of one ocean to that of the lakes, say 85 feet, and after crossing the lakes to descend from the level of the lakes down to the level of the other ocean.

Of course each of these two dams is essential. If it breaks and disappears under the pressure of the imprisoned waters the essential element of the canal will also have disappeared. There will be no more possibility of passing a ship than there is to-day.

This conception of such a lake, dam, and lock canal at Panama was inspired by the desire of reproducing artificially at Panama what nature has done at Nicaragua; a big lake suspended above the oceans at a level of 100 feet, more or less, to which ships will have access by means of these steps for ships which are called locks.

It came into the world in 1879 during the international congress called by Mr. de Lesseps, and where the different solutions of the Isthmian Canal clashed.

Mr. Godin de Lepinay was its inventor. Nobody then thought of but one process for excavating the canal, the digging in the dry by steam shovels and trains. Mr. Godin de Lepinay knew very well of the difficulties of the Tropics and he proposed the lake, dam, and lock system, which is actually in course of execution. He founded the justification of his project precisely on the very same arguments which are to-day invoked in its favor against the sea-level plan—that is, against the narrow canal which is freely open on the Atlantic, on account of the practical absence of tides there, and which is closed on the Pacific side by tide locks in order to prevent the tidal variation of level of this ocean to cause currents which would be objectionable in a narrow canal across the rainy Panama isthmus.

Godin de Lepinay fixed 24 meters above the oceans for the level of the lakes, say 79 feet. He proposed the location of Gatun for the dam on the Atlantic, but he at the same time gave warnings of possible danger of its construction.

At the very instant of its birth in the engineering mind in 1879 the Gatun dam was denounced by him who had conceived it as dangerous.

The actual lock, dam, and lake plan adopted by the minority of the consulting board in January, 1906, textually reproduced the proposition of Godin de Lepinay of 1879. The level of the lake was fixed at 85 feet and the Gatun location for the dam was adopted on the Atlantic side, when on the other hand the La Boca location was selected for the dam on the Pacific side.

Had anything happened between 1879 and 1906 which could have been invoked in favor of the stability of a dam at Gatun?

CHARACTER OF THE SUPERFICIAL GROUND OF THE ISTHMUS: SOFT CLAY—SLIPPERY.

Nothing! On the contrary, the intimate knowledge of the formation of the Isthmus, of the character of its soil, which resulted from a battle of more than seven years against nature, during which 72,000,000 cubic yards were excavated in the middle of a constant epidemic of yellow fever, demonstrated that a dam at Gatun would be in the worst condition an engineer could dream of.

The great difficulty we had to contend with was precisely the particularly slippery and treacherous soft clay which was so often found near the superficie. This soft clay is transported in infinitesimal particles by the waters and deposited all along the Isthmus in strata of various depths. Its elements come from the solid core of hard clay and rock and are detached by the atmospherical influences therefrom. It was the most difficult material and the most slippery that could be imagined.

During many months I was in doubt if it was really possible to dig through that mass, as slippery as soap, which formed the superior strata of the Culebra cut.

Nobody will ever know what efforts, what anxiety, it has cost us to pierce and to remove this mass of soft ground and to reach the solid core of the Culebra cut in which the actual workers can establish solid tracks on a firm soil.

The conditions we found on the highest point of the canal cut, at Culebra, are the same at the lowest point, at Gatun, but there the accumulation of this soft and slippery material is below the level of the ocean; it is in the subsoil.

I met it when I opened the canal in that region. The clay, which the buckets of the dredges attacked in the bottom of the canal, was so sticky and plastic that very often it molded itself into the buckets so as to refuse to fall down; the dredges had to be stopped and men placed all along the bucket chain with shovels to empty the buckets.

This is why I looked upon, when it was projected in 1906, and I am now looking with so much concern upon a dam at Gatun.

NO FOUNDATION AT GATUN.

The very first time I heard of a revival of the idea of a dam at Gatun was by a note from Mr. Alfred Noble asking my opinion about constructing a lake, dam and lock canal with dams at Gatun and at La Boca. It was on the eve of my departure for France five years ago after exchanging with Mr. Hay the ratifications of the treaty under which the canal is now constructed, the so-called "Hay-Bunau-Varilla treaty."

I replied offhand to Mr. Noble that there was no probability of finding foundations at either place, but especially at Gatun.

The events have justified this opinion, as soundings have shown that bed rock at Gatun was about 260 feet below sea level, and because they have also revealed that above the bed rock exists an enormous mass of

blue clay which can under no pretense possibly be called legitimately a foundation even for an earth dam.

When the minority of the international consulting board revived in January the old plan (lake, dam, and lock) of Godin de Lepinay, already deemed an inadequate solution in 1879, and adopted the location at Gatun in spite of the warnings of its inventor, the majority of the consulting board protested against such a dangerous experiment.

I protested also in a public letter to President Roosevelt, dated March 5, 1906, against the instability of the huge Gatun dam. As the method of construction adopted was an entirely new one, which I had described to the consulting board at the beginning of its works, and which was registered in its report (page 213), I felt bound to reject all future responsibility and "to expressly disapprove, from a scientific standpoint, the use of that method, very good for a small, low, and temporary dam, highly dangerous for a huge dam of more than 20,000,000 cubic yards in volume in a country frequently shaken by earthquakes."

LA BOCA DAM HAD TO BE ABANDONED.

At the very beginning of the construction of the dam at La Boca by Colonel Goethals, the difficulty of carrying out the plan and the method of construction was such that the location adopted was abandoned for that of Miraflores, some miles higher up the valley.

This necessity of abandoning the La Boca location was reported on December 9, 1907, by the chief engineer of the canal, Colonel Goethals. The change was approved by the President on December 20 and published in the Canal Record in the number of December 25 following.

It was nature which at this moment added its first warning to that of men.

WARNING OF NATURE AT GATUN AFTER THAT OF MEN.

Nature gave a second and recent warning when the construction of the Gatun dam began last year.

The first work undertaken was to construct along the foot of the dam on the lake side an embankment of stone, the part of which will be to sustain the earth which will constitute the body proper of the dam.

The Canal Record of November 11, 1908, stated that this embankment (called also the "rock toe of the dam") was about completed at a height of 60 feet above sea level. But on the 25th of November a cablegram from Colonel Goethals announced that it had given way at the crossing of the old French canal and that it had lost 20 feet of its height of 60 feet on a distance of 200 feet.

I knew the nature of the ground there at the bottom of the old canal, for I had opened it myself, and I expected the first warning of nature would come in that neighborhood. It therefore did not surprise me in the least. I considered it an ominous but providential "Mene, tekel, Upharsin" written by nature on the bottom of the future Gatun dam. I gave my views to the Herald and to the Figaro in Paris and they were published on the 12th of December in New York.

Soon after, as you know, it was made public that the President-elect, Mr. Taft, intended to go to the Isthmus with a body of consulting engineers and that Colonel Goethals had been invited by the Government to make a reply to my statements.

Unfortunately this board of engineers, which was originally to consist of six persons, but which was brought to seven at the last moment, was not composed either of men entirely free from any preconceived ideas or of men in equal number and known as supporting adverse theories. Three members of the board were known as intimately associated with the actual plan, two, MM. Stearns and Randolph, for having proposed and signed it in 1906, another, Mr. Freeman, for having approved it unqualifiedly as a member of the board which went to the Isthmus with Mr. Taft in 1907 and which was formed of himself and of two of the signers of the plan, MM. Noble and Stearns. The opinions of the board of 1909, like that of the board of 1907, are therefore not independent expressions of opinion. The spirit of the minority of the consulting board of 1906 must be considered as having been the predominating influence in 1909. The report of 1909 and that of 1907 are nothing but the two successive echoes of the report of 1906.

LAST REPORT SAYS GATUN DAM TOO STRONG.

As you know, the result of this consultation was entirely favorable to the Gatun dam. It was found to be not only safe, but unnecessarily so, and therefore it was advised to reduce by 20 feet the height of the dam above the level of the lake, which height above the water had been originally fixed at 50 feet above normal level of the lake, in order to form a margin of security against any possible contingency, such as a tidal wave in the lake, due to an earthquake, or a settling of the dam similar to that which happened to the rock toe.

It was formally denied that this modification had been inspired by the desire of diminishing the weight of the dam upon its base of soft clay. The reason advanced was the desire to make a little economy in the structure.

STORY OF THE SPANISH TAILOR.

Gentlemen, if in such a grave matter a jocular reminiscence can be admitted, I may tell you the story of that Spanish tailor who one day saw a very tall customer enter his shop and ask for a cape. He realized that he had none in the store for such a tall man. However, he took the longest cape he had and put it on the shoulders of his client. Before the purchaser had time to examine if the cape fitted him, the tailor jumped to his scissors, and, putting himself in the attitude of cutting the lower part of the cape, he said: "This cape is decidedly too long for you. I am going to cut it a little." "Oh," answered the client, "don't cut it; it is not too long as it is; it is all right so." He bought it and went off with the cape. I hope you will excuse this jocular story, but I can not help remembering it when I speak of that astonishing decision to modify the design of an earth dam on account of the excess of its stability.

This is the first time in my life of engineer that I ever heard of an excess of stability for an earth dam.

However, the question has been settled, the Government has spoken its last word. It has been said to be so final that any further discussion would have to be ascribed to opposition to any canal.

IS IT POSSIBLE TO STAY SILENT?

The New York Tribune, which generally expresses the views of the administration, said in an editorial: "We have no idea that all Americans, or all expert engineers, or all sincere friends of the canal, will be convinced by this report and will be persuaded that the sea-level plan is not the best. But at least it should be possible for reasonable men to credit these expert engineers with professional acumen and prudence and with entire sincerity and to place reliance on the judgment of the administration which is responsible for the great work and which must bear the blame of failure or disaster if any should befall it. It seems to us high time for dissension and doubt to give place to a cordial support of the canal enterprise and to a cheerful confidence in its success."

These are very wise thoughts and I have meditated upon them. They should be listened to and respected if the question was a mere question of more or less perfection, of more or less expenditure, if it was simply one of these questions of philosophy, of economics, of politics, which, once settled, even badly settled, must be dismissed from public discussion at least for the time being.

This is not such a question; it is a question of life or death for this great highway, which has been called "the dream of centuries." If, as I think, it is written in advance that the Gatun dam will give way, can I give it a cordial support and enjoy a cheerful confidence in its success? That is impossible. It is also impossible to stay silent until I have exhausted all means in my power to show why I think so and to demonstrate the exactitude of my suspicions. It seems to me that I would be a treacherous friend of this great country, of its President.

Perhaps my attitude will be misunderstood by President Roosevelt. Perhaps I may lose the friendship and confidence of this great American. I will have lost something to which I attach the highest value, something of which I am very proud.

Nothing will deter me, however, from doing my duty, and, as Colonel Picquart said in the most trying phase of the Dreyfus affair, "I shall not go to the grave with that burden on the heart."

EXPOSÉ OF THE EVIDENCE AGAINST THE GATUN DAM.

I propose to lay bare before you all the direct and circumstantial evidence which proves that the Gatun dam is an unstable structure and that the experts who recommended it have made and are making a terrible mistake. I shall speak openly but without the slightest bitterness against any of these prominent engineers whom I individually respect. If I confront facts with opinions it is simply in order to generate by their friction the spark which will throw light on that obscure question.

TESTIMONIES AGAINST THE GATUN DAM.

As I told you, the first man who thought of erecting a dam at Gatun, Godin de Lepinay, in 1879, was also the first man who doubted its possibility. He never spoke of it later on.

As I have already told you, the dredging of the bottom of the canal brought to light in 1885 this sticky, plastic, soft, slippery blue clay which will underlie the dam to a great depth on more than one-third part of its length.

As I told you, this personal experience, as well as the general and practical knowledge of the formation of the Isthmus, led me to write to Mr. Noble in the first days of March, 1904, that no foundations for a dam would be found at Gatun.

These are disinterested testimonies before there were any talks of erecting a dam at Gatun. They were not influenced, therefore, by any passion generated by the heat of a technical controversy.

In January, 1906, the minority of the consulting board recommended a dam at Gatun and another, or rather a couple of others, on the shores of the Pacific, the principal one being at La Boca, across the mouth of the Rio Grande. The pressure exerted on the ground at the base of the embankment which constitutes the dam was declared in their report to be 6½ tons per square foot at Gatun. The minority report was signed by MM. Alfred Noble, Henry L. Abbot, Frederick P. Stearns, Joseph Ripley, and Isham Randolph.

The majority of the board was formed by Gen. W. Davis, Messrs. William Barclay Parson, William H. Burr, William Henry Hunter (named by the English Government), Ad. Guerard (named by the French Government), Eugene Tincauzer (named by the German Government), J. W. Welcker (named by the Dutch Government), E. Quellennec, chief engineer of the Suez Canal.

The majority said textually on the La Boca and Gatun dams: "The board is therefore of the opinion that the existence of such costly facilities for the world's commerce should not depend upon such reservoirs held by earth embankments resting literally upon mud foundations or those of even sand and gravel. The board is unqualifiedly of opinion that no such vast and doubtful experiments should be indulged in."

The minority in its report defended the earth embankments on the ground that no seepage could occur owing to the nature of the soil of the embankment and that of the subsoil. And in this it was correct, provided both would remain in place. Nothing was said to relieve the mind of the fear that the softness of the foundation might generate movements of parts of the mass infinitely more dangerous than percolation, because they are bound to leave large fissures into which water will immediately penetrate in great quantities.

As soon as the project was adopted I denounced in a public letter the unstability of the huge Gatun dam, as I said already. But not being willing to bring up again the foundation question, which I had opened in 1904 with Mr. Noble and which had been dealt with most completely in the majority report, I further indicated the peril of fissuration by slight earthquakes of the earth dam, which means an immediate washout of the dam. This was not a pure hypothesis. In 1882 all the surface of the earth in Colon, that is, in the immediate neighborhood of Gatun, was fissurated by an earthquake, and the record of this ominous fact is in the Isthmian Canal Commission's report of 1901.

Such were the opinions brought forward by the various parties engaged in the contest and which were: The minority defending the lake, dam, and lock plan, which might be termed "the third-class solution;" the majority defending the narrow sea-level canal with tide locks on the Pacific, which might be called "the second-class solution;" and myself defending what might be called "the first-class solution," the perfectly free, open, wide, deep, passage between the oceans entirely freed from any artificial structures such as locks and dams. This is what I called the "straits of Panama" in order to distinguish it from the narrow tide-locked "sea-level canal."

GENERAL ERROR PERVADING THE MINORITY REPORT.

Now, if the minority was right or wrong in its conclusions the subsequent facts must show. If it was accidentally wrong on one point and right on the generality, this can be condoned. But if a continuous series of facts demonstrate that a general error pervades all its works then the greatest caution is required and just suspicion is cast on its views on a point for which a correct judgment is essential because it commands the whole situation.

This will be what might be called the circumstantial evidence against the Gatun dam after enumerating the independent testimonies anterior to any project of a dam at Gatun.

FIRST ERROR OF THE MINORITY.

The principal argument in favor of adopting the third-class solution, the lake, dam, and lock plan, was its reduced cost. It was set forth at $139,000,000. It is now fixed at $297,000,000 and it is not yet finished. This figure excludes all the items excluded from the original valuation of $139,000,000. If we include them, it reaches $375,000,000.

SECOND ERROR OF THE MINORITY.

In fixing the dimensions of the locks for future increase of ships they decided for their length to adopt 900 feet and for their width 95 feet. In fixing these figures they said it was not necessary to adopt, respectively, 1,000 feet and 100 feet, as the majority did for its tide lock in the sea-level canal, because "no one would expect to provide in any commercial or military construction for needs at the end of the present century." We are at the beginning of 1909. One century has not lapsed since 1906, and, however, the dimensions of 900 by 95 have not only been found already too small, but even those of 100 by 1,000 feet have been found so. The present rectified dimensions adopted are 110 by 1,000 feet. The increase was prompted by the fact that the 26,000-ton war ships now building are 93 2/3 feet wide and by that other fact that the White Star liners now building are 930 feet long, according to press reports. Neither of these could pass the locks which were projected three years ago by the minority.

THIRD ERROR OF THE MINORITY.

This error is also shared by the majority. The question which had really inspired Godin de Lepinay with the idea of a lake, dam, and a lock canal in 1879 was the extreme difficulty and cost of excavation by steam shovels and trains under the conditions created by the terrible rainfalls in the Tropics. His aim was simply to reduce the amount of excavation by raising the level of the passage through the backbone of the Cordillera. But since a new method of excavating the rock was started which absolutely eliminates the difficulties of cost and of time. It consists in dredging the rock under water after having broken it in pieces as large as a man's head. I started this new principle in 1885 on the canal with a new method of mining. Later on the method was developed on the Suez Canal by the substitution of mechanical concussion for dynamite explosion. It is now perfected and gives results which are astonishing as to celerity and economy in the largest public works on earth, such as the Suez Canal and the Manchester Ship Canal.

In 1901 the Isthmian Canal Commission fixed the removal of rock under water at $4.75 a cubic yard.

I showed to the consulting board that it was now demonstrated to be infinitely lower, but they still fixed at $2.50 the probable cost of removing 1 cubic yard of rock under water, when the cost of ordinary dredging was placed at 15 cents.

These two prices show that the preliminary operation of breaking the rock into small elements was fixed at $2.35.

One year and a half later before the Institution of Civil Engineers of London, in June, 1907, special and official reports have shown that the actual cost of that operation had been in reality 20 cents a cubic yard at the Suez Canal and in the harbor of Blyth and 12½ cents in the Manchester Ship Canal.

This third error of the consulting board in fixing a price more than eleven times too great if the Suez Canal is taken as the standard and more than eighteen times too great if the Manchester Ship Canal is taken as the standard has entirely thrown out of consideration the only economical and powerful method by which the canal can be constructed, not only as a narrow canal at sea level, but as a veritable wide and deep strait. It is this deplorable error which has led the United States into the wrong way and enticed them to take the most inferior, the third-class, solution, when the perfect, the first-class, solution could be obtained at a less cost.

FOURTH ERROR OF THE MINORITY.

As we have seen, they recommended the erection of a dam of earth at La Boca on the Pacific. Their sincere but erroneous conviction was such that it had passed into the minds of the engineers in charge of the construction on the Isthmus.

President Roosevelt on his return from the Isthmus wrote in his message of December 17, 1906:

"La Boca dam offers no particular problem, the bottom material being so good that there is a practical certainty not merely as to what can be achieved, but as to the time of achievement."

The Secretary of War, Mr. Taft, visited the Isthmus some months later in the spring of 1907. He was accompanied by two of the engineers who had signed the lake, dam, and lock plan, Messrs. Noble and Stearns, and by a third engineer of considerable reputation, Mr. Freeman, of Rhode Island, who was also invited to add his advice to that of the former members of the minority of the consulting board.

They declared, on their return with Mr. Taft, that everything was all right and that the La Boca dam was a certain success, just as the board which recently came back with Mr. Taft declared that the Gatun dam was perfect. They did not, however, go so far as the recent board was reported to have gone, in saying about the Gatun dam that it was unnecessarily strong and had to be modified for that reason.

The board of 1907, that is, Messrs. Noble, Stearns, and Freeman, reported about the La Boca dam as follows (Canal Record of Wednesday, December 25, 1907):

"The borings showed a so-called mud in the swampy section, having a depth of 8 to 10 feet. This material is firmer than we had expected, and at the time of our visit, about two days after it had been flooded by spring tides, it could be walked on in most places.

"For the dam construction, we do not think it will be necessary to remove the soft material at either of these places (Sosa Corozal and Sosa San Juan). The very softest material will either be displaced or consolidated by the material disposed on it. We do not think the amount displaced beneath the impervious portion of the embankment will be great, and if compressed in place the material will be impervious."

Thus spoke, in 1907, the experts who had signed the plan in 1906, and the new expert, Mr. Freeman, who had joined them for the purpose of verification.

Now, let us look at the facts as described by Colonel Goethals in the report of December, 1907, to the Secretary of War, which was also inserted in the Canal Record of December 25, 1907:

"To construct the dam according to these views, trestles were built along the toes of the Sosa Corozal dam from which to dump material from the Culebra cut. The trestles failed after the dumping of the material from them began and the material overlying the rock moved laterally, carrying the superimposed mass with it, the dumps flattening out until the side slopes were about 1 on 12, or even less.

"In places this lateral motion continued for two weeks after dumping had stopped; the ground on either side of and at some distance from the dump was forced up, forming mounds of mud, the crests of which gradually approached the level of the top of the dump proper. After an equilibrium was established between the dump and the adjacent mounds, the hump or wave would again move out when the track was shifted toward it, accompanied by a sudden vertical settling of the track of 6 to 10 feet where loaded trains were applied. It was thought that if the trestle were lower better results might be obtained, but with the new trestle only 8 feet above the surface of the ground and the piles driven to the rock similar failures followed.

"When the difficulties on the east trestle developed an investigation by boring and test pit was made to determine the character of the material overlying the rock. It was found to be for the greater part an unctuous blue clay, without grit, possessing but little supporting power, instead of the stiff clay as indicated on the existing profile.

"The investigation clearly demonstrated that the construction of a dam which would remain after the lake is filled can be accomplished only by the removal of all the materials overlying the rock. * * * Investigation of the foundations of the Sosa San Juan dam showed that the material is the same; the difficulties to be encountered will be greater because of the river."

Various plans were submitted by Colonel Goethals in view of the impossibility of building, as it was projected, the dam planned by the minority of the consulting board and recommended a second time by a commission formed of two members of that minority and Mr. Freeman.

WHAT CONCLUSIONS RESULT FROM ALL THESE ERRORS?

We have now seen that on four different occasions the opinions expressed by the minority of the consulting board have been controverted by facts.

First. The estimates of the cost of the plan proposed is fixed to-day at more than twice the amount originally fixed,

Second. Vessels, both military and commercial, are now building which could not enter the locks, which three years ago seemed to the board large enough to satisfy all future needs, except those to come at the end of the present century.

Third. The cost of transforming rock into dredgable matter was fixed three years ago at a price which one and a half years later was shown to be eleven times too great in two instances and eighteen times too great in the third one.

Fourth. One of the two great dams to be erected, the one considered to be the most easy of execution and the most certain of stability, was found impossible at the place chosen and by the method recommended.

THESE SUCCESSIVE ERRORS SHOULD CAST A LOGICAL DOUBT ON THE GATUN-DAM PROPOSITION.

These manifest and undeniable errors of judgment on the four essential points examined should induce a very careful revision of the opinions expressed on the fifth essential point on the Gatun dam.

If an error similar to the four others already demonstrated occurs a catastrophe without precedent in history will follow. The result of ten years of arduous work, the result of an expense of $400,000,000 spent by this Government and of $250,000,000 spent by the French share and bond holders of the Old Panama Company will be annihilated in a quarter of an hour without counting the probable destruction of the town of Colon and the possible annihilation of a whole fleet of men-of-war which will be stranded and imprisoned for years if the Gatun dam collapses during its stay in the Gatun Lake.

Cassandra had received from the gods the privilege of seeing in advance the calamities which menaced humanity, but they had refused her the privilege of being listened to.

The part of a Cassandra is a disagreeable one and the victorious "I told you so" is a very poor compensation to the years of suspicion and ill will which must be accepted before.

But I have received, I can assure you, no privilege from any god whatever, and if I say that this catastrophe is bound to come, it is simply the result of the rational method of induction which Bacon gave to the world and through which we have been able to comprehend the mysteries of nature.

THE FACTS DEMONSTRATING THE INSTABILITY OF THE GATUN DAM.

We come now to the facts relating to the Gatun dam proper. They will form, so to say, the direct evidence after the circumstantial evidence resulting from the opinions expressed about the stability of this structure before it was adopted and from the demonstration of the error which pervades all the conceptions of the minority which recommended it.

THE SLIP IN THE ROCK TOE OF THE DAM.

At the beginning of the second week of December last I read in a New York paper of November 26, which had just arrived in Paris, the following cablegram of Colonel Goethals about a slide having occurred in the stone embankment which was to form the retaining wall of the earth of the Gatun dam. It read:

"Reported injury consists of slip in rock pile intended to form south toe of Gatun dam and has no effect on body structure, which is not yet in place. Part of rock pile, about 200 feet in length crossing old French canal, has been slipping northward from time to time and slipped again on Friday, November 20, due to excessive rains lowering crest of pile about 20 feet. Slip of this kind not new, occurring frequently all along the line. Present slip of no consequence and of character to be anticipated in such work."

This reassuring telegram did not reassure me. I knew of what the bottom of the French canal consisted. I did not hesitate to think that the accident was a providential lesson of nature showing in advance what was bound to be the fate of the Gatun dam at the end. I could read, though evidently the writer had not meant it, in the very telegram of Colonel Goethals the real prophecy of what will take place later on: "Slips of this kind to be anticipated in such work."

Yes, indeed, they are, and it is precisely the reason why a dam of earth under this constant menace is so dangerous, so sure to succumb, so sure to annihilate the object of this magnificent enterprise, the ambition of our age.

What would be the result of a similar settling of the dam if it occurred when the dam is built? As you know, the normal levels of the waters are to be 85 feet above the sea level. It is admitted that the level in great floods will rise to 87 feet, and in droughts will be 82 feet.

The crest of the dam was fixed originally at 135 feet, leaving a margin of safety of 48 feet above the maximum level.

After the return of the board of engineers who accompanied the President-elect to the Isthmus it has been announced that they found the dam unnecessarily high and strong and that the crest would be ac-

cordingly lowered 20 feet. This will reduce the proposed margin of safety to 28 feet.

CREST OF DAM BELOW THE LEVEL OF THE LAKE IF IT SHOULD SETTLE AS THE ROCK TOE DID.

Now, if the embankment of stone 60 feet high has lost through the slip of the 20th of November last 20 feet of its height, say one-third, the dam itself, 115 feet high, would lose under similar circumstances 35 feet. It would be reduced to an altitude of 80 feet above the sea, say 7 feet below the maximum level of the water, 5 feet below the normal level, and 2 feet below the minimum level. In a few minutes the dam would have disappeared.

Is the eventuality impossible to conceive? By no means. It is, on the contrary, in the logical order of things if you examine the causes of the slip of the rock embankment.

CAUSE OF THE SLIP OF THE ROCK TOE.

The cause was the softness of the blue clay on which it was seated, its incapacity of supporting a load of any consequence.

The load resulting from the superimposed rock embankment was relatively slight compared to what it will have to stand when the dam will be established.

A rock embankment forms a sort of homogeneous and solidarized mass owing to the friction of one element on another. This insures a relatively equal repartition of the total weight on the base.

As the rock embankment is narrow at the top and wide at the base, the pressure per unit of surface on the natural ground will be about half what it would be if it consisted of a mass having the same base with vertical sides. On the other hand, in a stone embankment about one-half of the mass only is rock; the other half is formed by the hollow spaces between the pieces of rock. On the other side a mass 60 feet high weighs about half what it would if 115 feet high, all other conditions being equal.

PRESSURE OF DAM ON FOUNDATIONS TO BE EIGHT TIMES GREATER THAN THE ONE WHICH CAUSED THE SLIP OF THE ROCK TOE.

For these different reasons the pressure of the central mass of the dam on the ground will be about eight times greater than the pressure exerted by the rock toe and which caused the loss of one-third of its height.

It is therefore by no means inconceivable that under a pressure about eight times greater, the soft clay will slide away from under the dam much more than it did during what may be called the experimental slip of the rock toe.

This logical induction from the slip of the 20th of November is based on the assumption that it resulted from the lack of supporting power of the blue clay. You have a right to demand a demonstration of that assumption because if it is due to another cause the argument is erroneous and misleading.

SLIP WAS FIRST ASCRIBED TO FALSE CAUSES.

After the New York Herald published on the 12th of December the statement I had made on the previous day about the certainty of the impending destruction of the Gatun dam, the answer was given out in the public press, apparently from responsible sources, that the slip was expected and even desired. It was explained that the cause of it was the light silt deposited upon the bottom of the old French canal. If it had been so the rock embankment would have slipped upon the bottom of the canal and not through the bottom into the ground below. This explanation would have acquitted the soft clay of any responsibility in the accident.

To support this hypothesis was the statement inserted on page 11 of the Annual Report of the Isthmian Canal Commission and signed by Colonel Goethals August 25, 1908. Speaking of the soundings through the ground below the Gatun dam it said: "The material encountered is of such nature as to be amply strong for supporting the proposed structure."

COLONEL GOETHALS RECOGNIZES THE FOUNDATION HAS NO STRENGTH.

But Colonel Goethals is an officer and a gentleman and he is not capable of modifying the facts even if they controvert his opinion. In the answer which he was requested to make to me and which was published on the 10th of January last he said:

"The rock of the upstream toe has sunk about 20 feet in height and 200 feet in length where it crosses the canal. In sinking it has squeezed out and pushed up the clay underneath."

This frank and open statement of fact shows that the rock pile has really sunk through the bottom of the canal into the soft clay. It acquits the silt and brings all the responsibility on the lack of supporting power of the clay.

If you remember what I extracted a little while ago from Colonel Goethals's report about the impossibilities described at the La Boca dam, you will see that the description he gives of the accident of the rock toe entirely resembles what he said about the La Boca dam. The two accidents were to be identical because the causes are identical at the two extremities of the canal.

But Colonel Goethals, in his answer to me, acknowledges also the presence of the blue clay and its lack of supporting power, thereby entirely withdrawing his assertion of August 25, 1908, about the strength of the material below the dam. He says:

"The stratum of blue clay which Mr. Bunau-Varilla mentions as a danger at Gatun exists chiefly into deep gorges in the rock which are crossed at about right angles by the axis of the dams, and, where crossed, are about 1,900 feet and 950 feet wide, respectively, at sea level. * * * It is impermeable to water and requires only to be kept in place to form a reliable foundation for an earth dam of suitable cross section."

Colonel Goethals explains how, by extending the foot of the dam, he hopes to counterbalance the tendency of the clay to escape from under the dam.

Now, gentlemen, it is a matter of common sense. Is this any more admissible? Can the meaning of the words be changed? What is a foundation? It is a mass of ground on which a structure is to be erected. What part has it to play? Only one part, that is, to keep the structure in place. Is this not the obvious and explicit condemnation of a given work when the chief engineer declares that the structure must be so devised as to keep the foundations in place? Does this not appear as a reversal of all the elementary notions of gravity and of natural forces? But a castle in the air could be projected on such a principle.

It would be possible and stable if we could keep the air in place by lateral wings of the castle.

No, the air will escape from under the wings as the soft clay will escape from under the body of the Gatun dam and from under its accessories, because it is a fluid matter like the air, though at the extreme limit of fluidity.

You may retard its movements, but they will take place at a given moment and at that moment in the Gatun dam will have lived.

GATUN DAM IS STABLE IN IMAGINARY ENGINEERING ONLY.

If we wish the connection between the oceans to be established we must not, as the majority of the consulting board said three years ago, indulge in dangerous experiments.

But now we have gone further than that, the facts have shown the practical impossibility of the earth dams, and we are driven into the land of imaginary engineering.

The Gatun dam will be destroyed by the subsidence below the level of the water of its crest, which is 374 feet thick at that level. Its huge thickness of one-half mile at the base will not protect it.

But there is another mode of death to which it is exposed, even if the movements of the clay below would not bring its crest below the level of the lake.

You have often seen while walking in the country these walls fissured and cracked. When you see that it is due to the fact that a part of the wall is seated on firm ground while the other is seated on soft ground. They do not settle together and an unavoidable opening ensues.

Now you have seen, by what Colonel Goethals says, that the blue clay existed chiefly in two places, respectively, 1,900 and 950 feet wide. The total length of the dam is 7,700 feet wide. These figures show that at four different places at least there will be a sudden change in the resistance of the subground. At these four places crevices will be opened through the body of the dam through which the water will flow. The opening through an earth dam need not be great to entail the immediate destruction. A fissure of a fraction of an inch suffices, when there is behind that fissure a lake of 170 square miles surface and a head of 85 feet of water, that is to say, a pressure of about 34 pounds to the square inch.

Now, gentlemen, I brought before you the facts which demonstrate that the Gatun dam can not and will not stand. This is the conclusion to which the method of inducing truth from facts, as established by experience, obligatorily leads.

A LOCK CANAL MAY BE SAFELY ESTABLISHED ON THE ISTHMUS, BUT WITHOUT A DAM AT GATUN.

Does what I said mean that a lock canal is impossible of construction on the Isthmus?

Not at all.

The unsafe part of the actual lock plan is the dam at Gatun.

Why was it adopted? you will ask. Here is the answer:

Any lock canal with a summit level must have a provision of water. This provision of water must be formed by damming the Chagres somewhere. There are four points where it can be proposed to dam the Chagres.

One at the lowest possible point of the valley, at Gatun on the canal line.

Another one 9 miles higher up, at Bohio, on the canal line also.

Another one just above the point where the Chagres enters the canal line, at Gamboa.

Another one 10 miles above the point where the Chagres enters the canal line, at Alhajuela.

The higher up you choose the point where the course of the Chagres is to be stopped by a dam and a lake formed behind the dam, the less water you collect in your reservoir, because all the tributaries of the Chagres below the dam will flow to the sea and will not be stored in the lake.

This is the inconvenience of the location of the dams higher in the valley; the higher you go the less water you store.

The advantage on the other side is that the higher you go the higher also you meet the bed rock and the better are your foundations.

At Gatun the bed rock is at 265 feet below sea level.

At Bohio, 9 miles higher up the valley, it is 157 feet below sea level. At Gamboa, 12 miles above Bohio, it is at sea level; that is about 40 feet below the bed of the Chagres. At Alhajuela, 10 miles above Gamboa, the bed rock forms the bed of the river.

These inverse qualities of the various locations explain easily how in the different projects of a lock canal the site of the dam has been changed from one location to the other.

The engineers who do not care for the amount of traffic which a lock canal can serve and who look only for the easiness of construction of a perfect dam will choose the location of Alhajuela. There a masonry dam, the only kind of structure admissible for a high dam, is easy to erect.

It was the project of the New Panama Canal Company, but the easiness of the erection of a dam was in fact outweighed by the difficulty and danger of constructing a connection between the Alhajuela Lake and the summit level which it has to feed.

The Gamboa location is perfect also from the point of view of safety. A masonry dam can be easily erected there with the assurance of complete stability because precise calculations of stability can be made for a masonry dam. On the other hand, the Gamboa dam is in immediate contact with the summit level, and there is no difficulty or danger in establishing the water communication between the lake and the summit level. All the conditions regarding stability are obtained there. But the amount of water received in the reservoir is only two-thirds of what would result from a dam at Bohio, while a dam at Bohio would also collect only two-thirds of the water which would be collected by a dam at Gatun. Therefore the limits of the capacity of traffic would be, in round figures, 26,000,000 tons with a dam at Gamboa, 40,000,000 tons with a dam at Bohio, and 60,000,000 tons with a dam at Gatun.

It would be, therefore, impossible to construct a lock canal with a dam at Gamboa with any idea of perpetuity.

The Isthmian Canal Commission in 1901 was led to select the Bohio location for a dam because there the conditions were sufficiently good to insure the establishment of a good structure, though of a quality much inferior to that resulting from the selection of Gamboa as the location for the dam, and at the same time the mass of traffic which could be served was sufficiently great (40,000,000 tons annually).

However, the Bohio location could not admit the perfect type for a dam, the masonry dam, on account of the depth of bed rock. The commission was forced to admit an inferior type of structure, the earth dam with a masonry core.

But when in 1905 the question of the type of the canal came again to the front, the constant increase in the size of ships obliged the defenders of the perpetual lock type idea to recognize that with a dam at Bohio a lock canal could not be called perpetual on account of the

increase of the consumption of water due to the necessity of increasing the dimensions of locks.

The intense desire of increasing to its utmost limit the storage of water was the only cause of the selection of the Gatun location for the dam. But there only an embankment of earth could be thought of as a dam, and therefore the poorest kind of structure had to be resorted to. Instead of carefully observing the limitations traced by nature, instead of drawing a project inspired by these limitations, the contrary was made. It was nature which they tried to submit to the needs of a preconceived idea, the construction of a perpetual lock canal.

We can see now the results.

Nature can not be forced to fulfill the ambitions of man outside of the limits which science has to recognize and to fix.

When this is tried nature reacts and man is as powerless against its reactions as the Lilliputians were when they tried to chain Gulliver.

The dam at Gatun will certainly succumb under the combined influences of the pressure of the lake and of the lubricating influence of the water on the soft, plastic, slippery clay upon which the huge embankment will be seated. This is the thing which is now demonstrated.

ESCAPE OF THE WATER OF THE LAKE THROUGH THE FISSURES OF THE CLAYISH SANDSTONE OF THE HILLS AT GATUN ANOTHER GREAT DANGER.

But there is another fact which is of greatest moment.

The huge locks will be erected on a kind of rock which is at the very limit between rock and earth. It is a mass of sand agglomerated by a green clay. Though strong enough to stand the pressure of the walls of the locks, in normal conditions, it is an unreliable ground. The insufficient resistance it offered to the shocks of the frequent light earthquakes of the Isthmus have caused the interior compressions which resulted therefrom to open permanent fissurations. This is a very dangerous character, because the clay which unites the particles of sand is very liable to be carried away under a constant stream of water and slight fissures will be soon transformed into great ones.

This danger is sufficiently established to have caused Colonel Goethals to provide for a deep curtain of masonry in front and below the foundations of the locks in order to prevent this underground flow from passing below these foundations and to eat them up gradually.

How much *will the* curtains of masonry in front of the locks and below the level of its foundations keep the water from flowing in the fissurated ground underneath is a matter of pure speculation.

But if this flow is sufficiently established to oblige the engineers to resort to such expedients near the locks, what may be thought of all the surrounding hills which will have to keep the water in place outside of the dam proper? Will they fulfill their part faithfully and prevent the water from escaping through their fissurated mass?

This is not a danger which is actually demonstrated, but the provision of the masonry curtain in the locks demonstrates that the gravest suspicions may be raised against the lateral hills.

They seem to be as little able to keep the water in place as it is demonstrated that the subsoil below the dam is unable to keep the structure in place.

This is another obvious and necessary consequence of the fact that the Gatun location has been chosen not on account of sterling qualities which a dam imperatively requires, but on account of the ambitious desire of giving to a certain type of canal, the lock canal type, a quality which nature prohibits to give it on the Isthmus—perpetuity.

The only solution which may legitimately be called perpetual is the solution which is independent of the size of ships. It therefore must have no locks.

The only solution which may legitimately be called perpetual is the solution which is independent of any storage of water. It therefore must be at sea level.

The only solution which may legitimately be called perpetual is the solution which is independent of any artificial work, because any artificial work such as the most perfect dam, the masonry dam, may be wrecked by an explosion of dynamite, or by a very severe earthquake. It must therefore be free from any artificial dam.

The only solution which meets all the requirements of perpetuity and at the same time those of perfection is the wide, open, free junction between the oceans 600 feet wide at average water level, 45 feet deep at the lowest tides, 500 feet wide at the bottom.

It is the project which I submitted and which I characterized by the name of "Straits of Panama" to the consulting board in 1905. It is this complete solution which Mr. Alfred Noble, the great engineer who has been the commanding figure in the camp of the lock-canal party, declared recently to be the perfect and the ideal solution at the annual banquet of the alumni of the Stevens Institute.

To excavate this huge ditch a lock canal must first be established. This can be done quickly and safely because it will no more be chained with the idea of being perpetual.

If it is done for the excavation only its locks will be small, but it can be used also during the excavation of the straits for the passage of the largest men-of-war. It will suffice to give the locks 575 feet length and 110 feet width to satisfy that requirement. With locks of such dimensions 95 per cent of the merchant ships could also pass during the work of the excavation of the "straits."

But before speaking of the "Straits of Panama" let us clear the ideas about the difference between that type of waterway and the so-called "sea-level canal."

DIFFERENCE BETWEEN THE SO-CALLED SEA-LEVEL CANAL AND THE SO-CALLED STRAITS OF PANAMA.

The words "sea-level canal" describe the canal which Mr. de Lesseps started to build in 1881 and which was at that time thought to be the extreme limit of human possibility, if not beyond.

It was not then what humanity had dreamed of, what Mr. de Lesseps had dreamed of, but it was the next best thing.

What had been the dream of the centuries was the wide open communication between the oceans free from any works of art.

The sea-level canal of Mr. de Lesseps was a narrow canal just sufficient for one ship to pass, 72 feet wide at the bottom, 30 feet deep, open on the Atlantic Ocean but closed on the Pacific Ocean by tide locks. Why? Because though the two oceans have the same average mean level, one, the Atlantic, has no tides at Colon, and the other, the Pacific, had tides 10 feet above and 10 feet below mean level. As the canal is in a very wet country it will have to carry to the sea the water of some rivers, and it was not found possible to admit the combined currents due to the fresh waters and those due to the tides without troubling navigation.

If the only question was that of the currents created by the tides, they could be admitted in a narrow canal, because the conditions would be just what they are at Suez.

In spite of the opinion of the ignorant people about the tidal currents, they will be very small and were calculated by the Académie des Sciences never to exceed 2½ knots in a narrow open canal at Panama.

To remove these tide locks it is necessary to give 500 feet width at the bottom, 600 feet at the average water level, and 45 feet at the lowest stages of the tides.

Such a canal was absolutely beyond the limits of possibility twenty-five years ago because of the enormous excavation it entails, 600,000,000 cubic yards, and because of the impossibility of excavating then otherwise than by steam shovels and trains.

In September, 1905, at the outset of the studies of the International Consulting Board, I developed before this board the methods by which this magnificent scheme may be said to have passed from the land of the imagination to that of the realization.

The consulting board refused to admit the demonstration resulting from the new methods of work and the most recent conquests of engineering. It remained faithful to the old principles of excavation, the excavation by steam shovels and the transportation by trains of the spoils to the dumps. The consulting board refused to admit that engineering had progressed since 1879.

The same causes producing the same results, the conclusions reached in 1906 were exactly those reached in 1879. The majority of the International Consulting Board adopted, like that of the International Congress of 1879, the so-called narrow, tide-locked sea-level canal, and the minority preferred, as in 1879, the Godin de Lepinay lake, dam, and lock plan now in course of execution.

In the respective periods both majority and minority had thought of only one system of excavation, the excavation in the dry.

The International Congress was right in doing so in 1879, but the international board was wrong in doing so in 1906, because in the meanwhile great progress had been made and a new factor entered into the play—the wet system.

WET SYSTEM OF EXCAVATION.

The wet system of excavation by floating dredges and the transportation of the spoils by barges to the dumps is the system which made the Suez Canal possible.

Without it Mr. de Lesseps would have failed. He did not adopt it voluntarily, because his advisers, like the advisers of your Government, actually were against it.

But one day the Khedive of Egypt, who was giving the compulsory labor to the Suez Canal Company, was forced by Lord Palmerston to suspend this practice. Lord Palmerston was a fierce opponent of the Suez Canal, he called it at the tribune of the British Parliament an enterprise of swindlers, and the suppression of the compulsory Egyptian labor was thought by him to be a death blow to the enterprise. It proved in fact what saved it.

Being without other resource, the scientific advisers of Mr. de Lesseps could not oppose seriously Mr. Lavalley, an engineer of genius, then young and little known, who said to Mr. de Lesseps: "Thank God, you have no more labor and at last you are going to be able to dig the canal!" "How?" said Mr. de Lesseps, surprised. "By dredges for excavating and barges for transporting."

Mr. de Lesseps accepted the proposition because his advisers were silenced by the absolute want of labor. Seven years later the canal was thrown open to the world.

What the dredge did for the Suez Canal it would do for the Panama Canal if permitted. In 1879 the dredge of Suez could not dig Panama because it had not been taught to dig rock. I concentrated my mind on that effort and it now does it admirably. The low cost of reducing rock into dredgable matter is shown by the figure I have stated—20 cents at Suez and 12½ cents at Manchester. As to the low cost of dredging, it can be seen at Panama now, where about half the actual excavation is done by dredges at 11 cents, while the other half is done by steam shovels at a cost of 75 cents a cubic yard. (See Canal Record, Jan. 6, 1909.) And this low price is obtained with the very old dredges of the first French works. With dredges of modern construction it would cost 4 cents to excavate a cubic yard with steam, and still less with electric dredges, including transportation and disposal of the spoils.

To think of making the sea-level canal without giving it all its qualities, its entire independence from all artificial structures, such as locks and dams, is a great error.

The objections against the so-called sea-level canal, its high cost, the undetermined period of its construction, the presence of a tide lock on the Pacific and of a steel-concrete dam on the Chagres before it enters the canal, are all perfectly founded. They all apply to the narrow, tide-locked, sea-level canal; they do not apply to the Straits of Panama.

They apply really to the method of construction and to the consequences it has on the type of the canal.

CHANGE OF METHODS MEANS ENORMOUS INCREASE IN CELERITY AND REDUCTION IN COST.

If you change the method of construction, if you attack by dredging, you will establish first a lock canal, but it will have no huge locks, no earth dam at Gatun. The steel-concrete dam will be established at Gamboa as well for the purpose of controlling the Chagres and of feeding the summit level as for that of creating an enormous lake which will receive all the spoils and give by its falls the energy for the works.

The dredges will work on the summit level; widen it to its full extension, then they will dig it and, while they will lower the bottom, water will also be lowered until the lateral levels are reached. The new summit level will be treated in the same way. Thus all the successive levels will be eliminated and the sea level reached.

All these spoils will be brought by barges into the lake formed outside the canal, in the high valley of the Chagres, by the steel-concrete dam erected at Gamboa, above the point where the river enters the canal line.

This system of disposing of the spoils does not only form the easiest and cheapest way of removing them; it will lead to another consequence of capital importance. The spoils thus deposited in the high valley will fill it for several miles, and a new and higher bed will be thus formed for the Chagres.

At the end of the digging the Gamboa dam will have ceased to exist as a dam. It will form the extremity of the upper new valley, but the water will not any more press upon it. The dam will have to play but the insignificant part of a retaining wall and nothing more.

It will have ceased to exist as an essential organ of the canal; an earthquake may destroy it. It will have no effect on the canal.

In this system the minimum will be left to the action of man and the maximum to the action of nature.

IT WILL BE NATURE ITSELF, NO MORE MAN, WHICH WILL OPEN THE STRAITS.

The electricity generated by the falls of the lake will put in action the rock breakers, the floating dredges, the scows. The water in the small barge locks will raise the scows from the level of the summit to that of the lake, and the depths of the lake will absorb the material of the straits. Thus the Chagres once harnessed will offer freely by its waters the way for the excavating and transporting instruments, by its falls the energy to animate everything, and by its upper valley the dump to receive the spoils.

To establish the first lock canal for the excavation of the works four years are necessary, and to dig the straits ten years more would be ample.

If you establish locks large enough to pass the largest men-of-war in existence, including the 26,000-ton war ships just begun, 95 per cent of the commercial vessels will be able to pass alongside the work during the excavation. The cost of dredging the straits will be $100,000,000 and the cost of the first phase, if constructed for temporary transit of ships, with locks 575 feet long and 110 feet wide, would be also $100,000,000.

COST OF OPENING THE STRAITS LOWER THAN THAT OF FINISHING PRESENT CANAL.

The total cost of the ideal solution, of the first-class solution, would be now $200,000,000; that is about what remains to be spent on the lake, dam, and lock solution, on that solution which is not only unstable and condemned to a historical catastrophe, but which, even if carried out with success, if it were possible, would be obsolete before its inauguration, owing to the constantly increasing size of ships, whether commercial or military. And as it would be opened under the first form of lock canal before the lock, dam, and lake solution the tolls collected would make it finally cheaper.

METHOD OF DISCUSSION ADOPTED BY THE OPPONENTS TO THE STRAITS OF PANAMA.

The absolute perfection of the "Straits of Panama" is obvious for any man. It covers so clearly all the requirements which must be fulfilled by an artificial waterway across the Central American Isthmus that its opponents, the sponsors of the perpetual lock canal with an earth dam at Gatun, the sponsors of the third-class solution, as well as the sponsors of the narrow tide-locked sea-level canal with a steel concrete dam at Gamboa, the sponsors of the second-class solution, can not find an argument against it.

Their strategy simply consists in acknowledging its perfection, but in dismissing it without any further discussion by calling it chimerical. They add for sustaining this contention that this project was examined and rejected by the majority and by the minority of the consulting board in 1906.

It is easy to see from the records that this rejection was purely based on the false assumption that the transformation of rock into dredgable ground would cost $2.35 when it has been officially demonstrated since to cost eleven times less in the Suez Canal, and eighteen times less in the Manchester Canal.

The cost at Panama of that transformation would be certainly inferior to the cost at Manchester, not only on account of the saving in expense due to the gratuitous mechanical power given by the falls of the Chagres, but also and principally on account of the extremely soft character of the greater part of the isthmian rocks.

To demonstrate this important fact it is sufficient to quote what can be found on page 93 of the report of the Isthmian Canal Commission of November 16, 1901. This report can not be accused of any bias in favor of Panama, because it recommended the Nicaragua solution.

Speaking of the central mass of the Isthmus, where the greatest quantity of hard material is accumulated, the report says:

"The summit cut is 7.91 miles long from the Obispo gates to the Pedro Miguel locks. * * * There is a little very hard rock at the eastern end of this section and the western 2 miles are in ordinary materials. The remainder consists of a hard indurated clay, with some softer material at the top and some strata and dikes of hard rock. In fixing the price it has been rated as soft rock, but it must be given slopes equivalent to those in earth; * * * probably nine-tenths of the material would naturally be classed as hard clay of stable character."

This description will, better than anything else, give a correct idea of the general character of the isthmian rocks. Except for a few points, there is no hard rock. The bulk of the hard material encountered is a volcanic hard clay very similar to the soft rock met in certain Japanese harbors, where the cost of the transformation into dredgable matter is still much lower than the Manchester Canal figure, where it approximates 2 cents a cubic yard, and therefore is one hundred and seventeen times cheaper than the consulting board determined.

The excavation of the 600,000,000 cubic yards would be chimerical if it were to be made in the dry, as the sponsors of the tide-locked sea-level canal propose to excavate the larger part of their 230,000,000 cubic yards. It would be chimerical in the wet system if the excavation of the rock below water should cost $4.75 a cubic yard, as the Isthmian Canal Commission erroneously believed in 1901. It would be chimerical also in the wet system if it should cost $2.50, as the consulting board erroneously believed in 1906.

It is the most economic and at the same time the most perfect of all the plans if the removal of 1 cubic yard of rock is brought by actual practical methods down to 16 cents on an average.

There are enough official proofs of such a fact to justify an entire reconsideration of this capital question. If unbiased and free-minded engineer officers of the army, having had no anterior connection with the plans under discussion, should be sent to investigate, first, the nature of the rock on the Isthmus, and then to study in France, England, and Japan the actual improved methods of dredging soft and hard material, the cloud would be soon dissipated. The supposed chimera would become a real tangible thing and the United States, the trustees of humanity in the construction of the great international waterway, would give to the world what it wants, what it is possible now and easy to obtain, "the straits of Panama."

SECRET OF THE ISTHMUS.

It is the solution by which the progress of science allows us to-day to fulfill the order sent by Charles V to Hernando Cortez in 1523 from Valladolid to go and search for the "secret of the Isthmus." The "secret of the Isthmus" resides in the rational utilization of the Chagres, the lion in the path of ignorant humanity for several centuries.

I have tried to bring before you only facts and figures. I hope they have been eloquent enough to make you forget the insufficiencies of my English.

APPENDIX F.

AN INFERIOR CANAL AT PANAMA.

(Paper by Gustav H. Schwab, read at the meeting of the American Institute of Mining Engineers at New Haven on February 24, 1909.)

The engineers have debated the question of an interoceanic canal at Panama and the type of waterway to be constructed, but has the American business man been asked for his opinion?

The business man has listened to the arguments and the discussion of the engineers, he has heard the reasons why dams have been moved from one site to another where it is expected that they will be able to fulfill their purpose and to stand when built, and he has been told that it is now the final intention, trusting in the stability of these dams, to build a lock canal to receive the commerce of the world and to conduct it from ocean to ocean for all time to come.

The United States Army Engineers enjoy a high reputation, and deservedly so. If they declare that they can build a dam at Panama on a foundation of clay or any other soft material, to stand for ages, the layman can express no dissenting opinion; but on the question of a lock canal or a sea-level canal I believe that the business man, shipowner, or shipper will have something to say and should state his opinion before the country is irrevocably committed to a definite plan of canal construction, for it is he who is expected to use the canal when built. He should demand that any canal built by the United States at Panama shall be the best, the most efficient type of canal that can be constructed. He knows that the lock canal as proposed in that locality is an inferior type of canal, and that a sea-level canal is the more serviceable and more efficient waterway, offering safe and uninterrupted navigation for the commerce of the nations as long as the oceans exist. This is an indisputable fact, confirmed by the highest authority.

The first consideration for a canal such as the Panama Canal will be is that it shall be entirely free from any obstructions that may be avoidable. Any obstacles that would either delay or endanger the passage of vessels through such a waterway must be removed. Locks would present a constant menace to safe navigation in such a canal.

In justification of the lock canal at Panama frequent reference is made to the Sault Ste. Marie Canal and also to the Manchester Ship Canal in England. On the Sault Ste. Marie Canal within a period of nine years there were three accidents involving injury to lock gates, and on the Manchester Ship Canal during the same period there were at least the same number of accidents to lock gates. In the case of the Sault Ste. Marie Canal there is only one lockage with a lift of 20 feet. As 6 locks are now planned on the Panama Canal, each with a lift of about 30 feet, it seems to the practical man probable that the number of accidents to be expected in such a canal with 6 locks would naturally be multiplied by the number of locks. A further element of danger is presented by the construction of 3 locks in one flight, one lock communicating directly with the other. A steamer approaching the upper lock and passing beyond the control of her commander through a mistaken order or an order wrongly executed in the engine room would pass through the upper gate, and by doing so open up the entire flight of locks to the flood from the lake above, which would not only engulf the steamer but would ruin the locks and their appurtenances, creating a situation that it would, no doubt, take a number of years to set aright, while navigation would be closed.

The traffic on the Sault Ste. Marie Canal consists of regular lines of steamships, the same boats passing through the lock at frequent intervals, and therefore conversant with conditions there. But where flights of locks of the enormous size planned at Panama will be used by the vessels of all nations of various sizes and descriptions, many of them at infrequent intervals, the possibility of accident in connection with these locks becomes to a practical shipping man a very real question.

Mistakes in the transmission of orders from the bridge to the engine room are fortunately not of frequent occurrence, but when they do happen the result is most disastrous. Experience has shown that steamers, when being docked at their piers, have through such mistakes in orders given from the bridge run into heavy piers and quays, cutting into steel, wood, cement, and granite, even when under very little way. The large high-power steamer of the present day weighs many thousands of tons; and when this weight is once put in motion, even at the slightest speed, it will pass through anything that is in its path.

Obstructions to a sea-level canal may be caused by accident to a vessel stranding or sinking in the canal, but such obstruction could not be anything else than temporary and could be removed in a few days. Such obstructions have frequently occurred in the Suez Canal and have been removed either by being blown up or by other means without causing great delay. Compared with such delay of a few days, the disastrous consequences of an accident to the lock gates which would cause the most serious damage to the locks, to the canal below, and would drain the water out of the summit lake, would be of an entirely different character.

The views here stated on the relative merits of a lock and a sea-level canal represent the opinion of masters, mates, and pilots—of those men who are most competent to judge of the obstructive character of a lock canal in the navigation of the present day. The American Association of Masters and Pilots of Steam Vessels are on record as indorsing the sea-level canal rather than the lock canal "owing to the removal of the risk of damage to ship and cargo by the adoption of a sea-level type." The United New York-Sandy Hook Pilots' Association are also recorded as strongly and unhesitatingly advocating a sea-level canal at Panama, as it has been the experience of the Sandy Hook pilots in the hazardous occupation of handling large vessels "that there is always more or less danger of an order, correctly given by the pilot from the bridge, being misunderstood or misinterpreted and incorrectly executed." Such misunderstandings, the pilots state, "are always liable to be costly by causing damage both to pier or wharf in docking and undocking steamers, and also to the vessel being docked in the waters of New York Harbor, where there are no locks to contend with or to be damaged."

The fact that as a supposed protection against the possibility of damage to lock gates, it is now proposed to duplicate each lock gate, proves that the authorities now in charge of the construction of the canal at Panama fully realize the dangers that are involved in the use a flight of locks such as intended at Gatun by the full power steamships of enormous size and weight of the present day.

The interference with the safe operation of a lock canal for continuous and uninterrupted navigation from ocean to ocean by earthquakes is another very serious objection to the proposed lock canal. Omitting any reference to the frequency of earthquakes on the Isthmus in former years, the statement has been made, and I believe has not been refuted, that since 1901 and until 1905 there have been seven tremors and four light shocks of earthquake at Panama, the latter affecting buildings to an appreciable extent. What the consequences would be on locks built on earth dams not founded upon rock can not be fore-

casted, but the chances are certainly such as to raise a doubt as to the advisability of facing an appalling possibility entailing disastrous consequences.

The locks at Panama, originally planned for a width of 95 feet, have now been increased in size to 110 feet with a length of 1,000 feet in order to accommodate expected growth in the size of vessels. Thirty years ago no one in his senses would have dreamed of the present size of ocean steamships such as we see every day in any large harbor of the world. Thirty years ago the largest steamer measured 350 or 375 feet in length with a beam at the most of some 40 feet. To-day we have steamers of 800 feet in length, of 80 feet in beam, and others projected of still larger dimensions. He would be a very rash man who would predict what size the vessel of fifty years hence will have. If the growth in thirty years has doubled, where shall we be in twenty-five or fifty years from now? No one knows and no one can tell.

But this much is absolutely certain, that the dimensions of vessels will increase; that harbors, channels, docks, and piers will be deepened, enlarged, lengthened, and widened to accommodate the inexorable demands of commerce and navigation; and this is as certain as that the sun will rise to-morrow. We may not live to see the dimensions of vessels increase very much beyond the present type, but the canal at Panama will live to see it; and, if circumscribed in its capacity by its locks, it will fifty years hence be a canal largely limited in its usefulness and distanced and outclasesd by its rivals. The Suez Canal will be an active competitor with the Panama Canal for the trade to the East, and with a sea-level canal such as exists at Suez the deepening and widening is simply a question of a few millions of money and of a few years of labor; but a lock canal of the dimensions of that at Panama will be precluded from following suit by the enormous cost of reconstruction of locks on a larger basis, involving the closing of the canal for a number of years. It may be said that this is a matter of the future; but in the construction of a work of such far-reaching and world-wide importance as the waterway at Panama even remote questions that, although they may not affect us, will affect our children, should not be treated lightly.

Considerable weight is attached to the alleged greater speed of operation on a lock canal as compared with a sea-level canal. This, it appears to a practical shipping man, is illusory. Although the present plan involves a large extent of lake navigation, the limits of the channel through such a lake would impose upon passing vessels an obligation to observe a slow rate of speed; so that it hardly appears probable that the lake navigation would offer any advantage over the passage through an unobstructed sea-level canal, especially if the latter is finally transformed to approximate the type of a "strait."

If the lock canal presents grave objections to commercial men, what may not be its effect upon the life of the Nation in a time of war? The defect of a lock canal at a supreme moment in such a war may be fatal. Should it be necessary to send a fleet of battle ships from ocean to ocean at a critical period, what might not be the consequence if a lock gate should be jammed or disabled or destroyed, either by accident or hostile design, during or before the passage of the fleet?

Although the cost of construction of a sea-level canal would no doubt exceed that of a lock canal, the business interests of this country would do well to consider that the annual cost of maintenance and operation of a sea-level canal would necessarily be less.

Since the comparative merits of a sea-level canal and a lock canal were last considered, three years ago, entirely new conditions have arisen. The estimated cost of the completion of a lock canal is now double the sum estimated three years ago; at the same time, the improvements and inventions made in excavation in other parts of the world have shown that progress is very much greater and cost very much less in such excavation than was originally assumed. Both of these considerations would have a most important bearing in the construction of a sea-level canal. Although it may be possible that a sea-level canal will prove more expensive to construct than the lock canal as now planned, the great reduction in the cost of rock removal and the accelerated rate of progress in all excavation work would no doubt considerably shorten the time that was originally assumed necessary for the construction of a sea-level canal. Under these changed conditions the construction of a sea-level canal appears possible from the standpoint of cost and time. The value of such a canal is so great that the question of a hundred million dollars more and of a few years' longer time should not be permitted to stand in the way.

The board of consulting engineers appointed by the President of the United States in 1905 submitted a plan for a lock canal that could be transformed into a sea-level canal without interrupting the traffic upon it, but it favored the immediate construction of a sea-level canal in view of the cost and difficulty of such transformation. To what extent the remarkable reduction in cost of rock excavation elsewhere and the rapid progress attained in such work would modify this opinion is a technical question to be solved by engineers.

The supreme importance of the canal through the Isthmus of Panama to us as a nation in time of peace and in time of war, and the appalling consequences that may result from a wrong decision as to the type of canal to be adopted, render it, in my opinion, imperative upon all who have the best interests of our country at heart to demand a reconsideration of the plan to be chosen before it is too late.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the reports of the committees of conference on the disagreeing votes of the two houses on the amendments of the Senate to the following bills:

H. R. 26394. An act making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 26915. An act making appropriation for the support of the army for the fiscal year ending June 30, 1910; and

H. R. 27054. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes.

The message also announced that the House had passed a joint resolution (H. J. Res. 235) concerning and relating to the treaty between the United States and Russia, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

H. R. 2911. An act for the relief of F. S. Jette & Son, of Savannah, Chatham County, Ga., for damage done to their wharf by the United States dredge *Cumberland;*

H. R. 4521. An act to reorganize and enlist the members of the United States Naval Academy Band;

H. R. 7048. An act for the relief of Henry A. Tolbert;

H. R. 8545. An act for the relief of Jackson Pryor;

H. R. 8558. An act for the relief of R. J. B. Newcombe;

H. R. 8947. An act for the relief of the Herman Andrae Electrical Company of Milwaukee, Wis.;

H. R. 9755. An act for the relief of Charles Lennig & Co.;

H. R. 13928. An act for the relief of P. H. McDonough, of Bardstown, Ky.;

H. R. 14290. An act for the relief of Ellis W. Joy;

H. R. 15755. An act for the relief of J. C. Haggard, of White County, Tenn.;

H. R. 19655. An act providing for an additional judge for the southern district of New York, and for other purposes;

H. R. 21492. An act to authorize the sale of certain public lands;

H. R. 21571. An act for the relief of John T. Freeman;

H. R. 24327. An act to make Corry, Pa., a port of delivery in the district of Erie, Pa., and extending to it the privileges of section 7 of the act of June 10, 1880;

H. R. 24995. An act for the relief of Nathaniel Huntley;

H. R. 25392. An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 26394. An act making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 27049. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27054. An act making appropriations for fortifications and other work of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes;

H. R. 27249. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors;

H. R. 27974. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 28175. An act to amend section 4434 of the Revised Statutes of the United States, and for other purposes;

H. R. 28285. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors; and

H. R. 28305. An act to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State and to detach it from the Fort Worth division of said court.

HOUSE JOINT RESOLUTION REFERRED.

H. J. Res. 235. Joint resolution concerning and relating to the treaty between the United States and Russia, was read twice by its title and referred to the Committee on Foreign Relations.

GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. HALE. I move that the Senate proceed to the consideration of the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes.

Mr. HEYBURN. I suggest to the Senator from Maine that the form be changed. I will yield to the Senator from Maine for the purpose of having the Senate take up and consider the bill, but I desire it shall be with the understanding that we will resume the consideration of the measure now before the Senate when the appropriation bill is disposed of.

Mr. HALE. I know what the Senator desires. It is very natural. Without withdrawing the motion as a substitute for the pending motion, I ask unanimous consent that the unfinished business be temporarily laid aside, and that the Senate proceed to the consideration of the deficiency appropriation bill.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that the unfinished business be temporarily

laid aside, and that the Senate proceed to the consideration of the general deficiency bill. Is there objection?

Mr. HEYBURN. I suggest to the Senator to elaborate that by making it provide that the consideration of unfinished business shall be resumed when the appropriation bill is disposed of.

Mr. HALE. I have no power over that.

Mr. HEYBURN. The Senate has.

Mr. HALE. The Senator has got the unfinished business——

Mr. BEVERIDGE. It is in the hands of the Senate.

Mr. HALE. It is in the hands of the Senate; and to accommodate him instead of enforcing my motion, which would displace his bill, I make the request. I can not tell what the Senate may do afterwards. It will not displace him. He will stand just as he does now.

Mr. GALLINGER. The bill will come up automatically.

Mr. HALE. It is up.

Mr. HEYBURN. I understand the situation, and I am satisfied the Senator from Maine is entirely right. It was more for the purpose of calling the attention of Senators to the fact that I would ask the Senate to resume the consideration of the bill immediately thereafter, because otherwise they might leave the Senate Chamber. I want to give out the information that I will expect the Senate to resume the consideration of the code bill immediately after the disposition of the appropriation bill.

Mr. HALE. That will come up, and then it will be in the hands of the Senate to determine whether it will remain. I only want to get the appropriation bill through.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Maine?

Mr. CLARKE of Arkansas. I object, Mr. President.

Mr. HALE. Then, I move that the Senate proceed to the consideration of the bill.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Maine.

The motion was agreed to.

Mr. CLARKE of Arkansas. Now, it is perfectly understood—it not having been a qualified motion—the motion to proceed to the consideration of the bill displaces the bill which was before the Senate.

Mr. HALE. Undoubtedly.

The VICE-PRESIDENT. That is the effect of the motion.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

Mr. HALE. I ask that the formal reading of the bill be dispensed with, that the bill be read for amendments, the committee amendments to be first considered.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Maine?

Mr. CLARKE of Arkansas. I ask that the bill be read.

The VICE-PRESIDENT. Objection is made to the request.

Mr. CLARKE of Arkansas. I call attention to the second clause of Rule XIV——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Arkansas?

Mr. HALE. There is no doubt the Senator can have the time of the Senate taken by reading the bill. It takes up much time. This is the common request, assented to in the case of the sundry civil bill. The only effect of an objection to my request would be to keep us here and have a night session.

Mr. CLARKE of Arkansas. If I had any assurance that we would not be kept here beyond reasonable hours for the consideration of another bill that may just as well be considered at another time, the Senator from Maine could make no suggestion tending to facilitate the disposition of the bill in his charge which I would not cheerfully aid him in having acceded to.

Mr. HALE. My great object in getting the bill up and passed within the next hour is to avoid a night session.

Mr. CLARKE of Arkansas. With that understanding I withdraw the objection, and I tender my services to the Senator from Maine to aid in the early disposition of the bill.

Mr. BEVERIDGE. There is no agreement about a night session?

Mr. HALE. Oh, no.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Maine? The Chair hears none.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Appropriations was, under the head of "Department of State," on page 2, line 10, before the word "thousand," to strike out "ten" and insert "twenty," so as to make the clause read:

For expenses of the proposed celebration during the first week in July, 1909, to commemorate the three hundredth anniversary of the discovery of Lake Champlain by Samuel de Champlain, $20,000.

The amendment was agreed to.

The next amendment was, on page 2, after line 22, to insert:

For the payment of the annual installments for the calendar years 1908 and 1909, of $250,000 each, under the assignment and transfer made by the Republic of Panama to the Republic of Colombia, in manner and form as contained in the treaty between the Republic of Colombia and the Republic of Panama of January 9, 1909, the recognition of which assignment and acceptance of notice thereof are given by the United States in Article V of the treaty between the United States and the Republic of Colombia concluded January 9, 1909, $500,000.

The amendment was agreed to.

The next amendment was, at the top of page 5, to insert:

Contingent expenses, Treasury Department: Purchase of file holders and cases for the fiscal year 1909, $2,500.

For stationery for the Treasury Department and its several bureaus for the fiscal year 1908, to pay the unpaid account of John P. Nawrath, of New York, contractor, for twine furnished the Treasury Department in January and February, 1908, $556.56.

For stationery for the Treasury Department and its several bureaus, for the fiscal year 1909, $5,000.

For file boxes suitable for the filing of checks, for the Auditors of the Treasury Department, $2,000.

The amendment was agreed to.

The next amendment was, on page 6, after line 21, to insert:

Canceling United States securities and cutting distinctive paper: For purchase of a new canceling machine to be used in the Division of Loans and Currency, office of the Secretary of the Treasury, for the cancellation of bonds and other securities, $750.

The amendment was agreed to.

The next amendment was, on page 8, line 6, before the word "thousand," to strike out "ten" and insert "twenty," so as to read:

Suppressing counterfeiting and other crimes: For expenses incurred under the authority or with the approval of the Secretary of the Treasury in detecting, arresting, and delivering into the custody of the United States marshal having jurisdiction dealers and pretended dealers in counterfeit money, and persons engaged in counterfeiting Treasury notes, bonds, national-bank notes, and other securities of the United States and of foreign governments, as well as the coins of the United States and of foreign governments, and other felonies committed against the laws of the United States relating to the pay and bounty laws, and for no other purpose whatever except in the protection of the person of the President of the United States, $20,000.

The amendment was agreed to.

The next amendment was, on page 11, after line 8, to insert:

Payment to Henry Frederick Wegner, administrator, etc.: The amount appropriated to be paid under the clause reading as follows: "On the schooner Phoenix, James Coward, master, namely: Henry Frederick Wegner, administrator de bonis non of the estate of Albert Seekamp, $4,427.44," in the act entitled "An act for the allowance of certain claims for stores and supplies reported by the Court of Claims under the provisions of the act approved March 3, 1883, and commonly known as the Bowman Act, and for other purposes," approved March 3, 1899, be paid to Henry Frederick Wegner, as administrator of the estate of Albert Seekamp, the amount so appropriated to be paid or distributed by said administrator to the next of kin of the deceased widow of said Albert Seekamp: *Provided*, That the same shall not be paid until the Court of Claims shall certify to the Secretary of the Treasury that said administrator, or his successor in office, represents the next of kin of said widow, and the court which granted the administration shall certify that he has given adequate security for the legal disbursement of the amount herein appropriated.

The amendment was agreed to.

The next amendment was, on page 13, after line 3, to insert:

Relief of George M. Stackhouse: The proper accounting officers, in settling and adjusting the accounts of George M. Stackhouse, paymaster, United States Navy, are hereby directed to credit said George M. Stackhouse with the sum of $1,606, which amount of government funds he intrusted to Clerk F. W. Jepson, of the paymaster's office on U. S. S. Kentucky, on January 3, 1906, for disbursement, and which sum was stolen from safe in paymaster's office by Yeoman Gordon H. Lanier, who absconded.

The amendment was agreed to.

The next amendment was, on page 13, after line 14, to insert:

Payment to C. F. Sugg: To enable the Secretary of the Treasury to carry out the provisions of "An act to pay to C. F. Sugg, of Hales Point, Lauderdale County, Tenn., $79.95, for damages inflicted upon gasoline steamer Clyde by light-house tender Oleander."

The amendment was agreed to.

The next amendment was, on page 13, after line 20, to insert:

Refund of duties on anthracite coal: To enable the Secretary of the Treasury to pay, under the act approved February 1, 1909, authorizing the refund of certain duties on coal importations, the following amounts to the parties named, or so much thereof as may be found due, namely: To the Hazard Wharf Company, of Baltimore, Md., $6,873.61; to the Consolidated Gas, Electric Light and Power Company, of Baltimore, Md., successors of the Consolidated Gas Company, of Baltimore, Md., $7,164.78; to Alfred Winsor & Son, $67; to C. P. Jameson, $681.39; to A. Winsor & Son, $65.66; to Sanderson & Son, $690.77; to C. P. Jameson, $689.43 cents; to A. Winsor & Son, $65.66; to A. Winsor & Son, $66.33; to W. K. Niver Coal Company, $1,885.38; to American Woolen Company, $3,250.17; to entry by A. C. McDormand, Metropolitan Coal Company owner, $2,132.61; to entry by A. C. McDormand, Metropolitan Coal Company owner, $2,688.71; to Metropolitan Coal Company, $3,331.24; to John R. White & Son, $2,571.46; to C. P. Jameson, $40.20; to Murrell & Crocker, $2,901.10; to Murrell & Crocker, $2,784.19 cents; to Metropolitan Coal Company, $3,427.05; to Darrow, Mann Company, $1,932.95; to John Driver, $83.08; to Stoddard, Haserick, Richards & Co., $67; to Boston Elevated Railway Company, $3,382.83; to Boston Elevated Railway Company, $3,151.01; to Boston Elevated Railway Company, $2,908.47; to A. T. Nichols, $152.09; to William C. Atwater & Co. (Inc.), $2,238.39; to W. K. Niver

NORTHWEST MISSOURI STATE
UNIVERSITY LIBRARY
MARYVILLE, MISSOURI 64468

Coal Company, $2,919.86; to William C. Atwater & Co. (Inc.), $2,628.41; to Stoddard, Haserick, Richards & Co., $129.31; to John Driver, $62.31; to Stoddard, Haserick, Richards & Co., $125.96; in all, $61,258.32: *Provided*, That before payment is made to said claimants they shall severally produce satisfactory proof to the Secretary of the Treasury that they were not reimbursed for said tariffs in the sales to the consumer.

The amendment was agreed to.

The next amendment was, under the subhead "Public buildings," on page 16, after line 10, to insert:

Payment to Mount Vernon Avenue Association of Virginia: For payment to the treasurer of the Mount Vernon Avenue Association of Virginia, assignee of the State of Virginia under act of the general assembly of Virginia approved March 5, 1888, $120,000, being the principal sum, without interest, advanced by the State of Virginia to the United States by act of its general assembly December 27, 1790, toward erecting public buildings in the District of Columbia for the use of the Federal Government. Said sum of $120,000 to be in full compensation for all debts, claims, or demands on the part of the State of Virginia or of her assignee aforesaid, arising out of the aforesaid act of the general assembly of date December 27, 1790.

Mr. BURKETT. I should like to ask the Senator in charge of the bill as to this amendment and the next one. How do these Maryland and Virginia claims come in this bill? I recall that the same bills, I think, were before the Committee on Claims two years ago. It seems to me that they are not in a different position than they were then and that they are not entitled to be inserted in this bill.

Mr. HALE. The Senator refers to the item on page 16?

Mr. BURKETT. The items on pages 16 and 17.

Mr. HALE. They are not in the regular place in the bill. They should not be under the head of "Public buildings," but should have appeared at the close of the bill, where I supposed they were. I ask that they be passed over until the bill is completed.

Mr. BURKETT. I will reserve a point of order against these two items.

The VICE-PRESIDENT. The amendments, without objection, will be passed over.

The reading of the bill was resumed.

The next amendment was, at the top of page 18, to insert:

Detroit, Mich., public building, temporary annex: To enable the Secretary of the Treasury to erect a temporary annex on the west side of the federal building in Detroit, Mich., to meet the necessities of the business of the post-office, $7,500, or so much thereof as may be necessary; said temporary annex to take the place of the annex to be removed from the north side of the building during the erection of the permanent addition now under construction.

The amendment was agreed to.

The next amendment was, under the subhead "Independent treasury," on page 18, after line 10, to insert:

For an additional clerk in the office of the assistant treasurer at New Orleans, La., for the fiscal year 1910, $1,200.

The amendment was agreed to.

The next amendment was, under the head of "District of Columbia," on page 24, after line 11, to insert:

For the equipment of certain suburban school buildings in the District of Columbia with stationary chemical fire-extinguishing appliances, $8,400.

The amendment was agreed to.

The next amendment was, on page 29, after line 18, to insert:

Municipal court: The unexpended balance of the appropriation for salaries, justices of the peace, fiscal year 1909, is hereby reappropriated and made available for the payment of the judges of the municipal court of the District of Columbia for the period from February 17, 1909, to June 30, 1909.

The amendment was agreed to.

The next amendment was, on page 31, line 11, before the word "hundred," to strike out "fourteen" and insert "Fourteen;" in the same line, after the word "session," to insert "and a letter of the Commissioners of the District of Columbia, dated March 1, 1909;" and in line 14, before the word "and" where it occurs the first time, to strike out "twelve thousand five hundred" and insert "thirteen thousand," so as to make the clause read:

Judgments: For payment of the judgments, including costs, against the District of Columbia, set forth in House Documents Nos. 1406 and 1451 of this session and letter of the Commissioners of the District of Columbia, dated March 1, 1909, $13,018.80, together with a further sum sufficient to pay the interest, at not exceeding 4 per cent, on said judgments, as provided by law, from the date the same became due until the date of payment.

The amendment was agreed to.

The next amendment was, on page 33, after line 23, to insert:

For printing and stationery, including preparation, publication, and distribution of a compilation of orders and regulations and the necessary blank forms, $2,000.

The amendment was agreed to.

The next amendment was, under the head of "Military establishment," subhead "Pay Department," on page 34, after line 11, to insert:

For subsistence, mileage, and commutation of quarters to officers of the national guard attending service and garrison schools, being for the fiscal year 1909, $6,537.72.

The amendment was agreed to.

The next amendment was, under the subhead "Quartermaster's Department," on page 37, line 12, before the word "thousand," to strike out "three hundred" and insert "seven hundred and ninety-seven," so as to make the clause read:

For the fiscal year 1909, $797,000.

The amendment was agreed to.

The next amendment was, under the subhead "Marine Corps," on page 47, after line 2, to insert:

For installing electric lights and heating system, marine barracks, Sitka, Alaska, $5,000, which sum shall be in addition to the $5,000 appriated for this object in the naval appropriation act approved May 13, 1908, $5,000.

The amendment was agreed to.

The next amendment was, under the head of "Interior Department," on page 48, after line 3, to insert:

That all models of the Patent Office be retained by the Interior Department until provision is made for their care by Congress.

The amendment was agreed to.

The next amendment was, at the top of page 49, to insert:

To pay the Potomac Electric Power Company for furnishing electric current for the Senate Office Building for the months of November, December, and January, and estimated amounts for the months of February, March, April, May, and June, $16,033.72.

The amendment was agreed to.

The next amendment was, under the head of "Department of Agriculture," on page 53, after line 23, to insert:

For fencing the National Bison Range, as provided for by the act of May 23, 1908, Thirty-fifth Statutes, page 267, $3,000.

The amendment was agreed to.

The next amendment was, under the heading "United States courts," on page 57, after line 6, to insert:

Salaries, district judges: For the salaries of the additional district judges for the western district of Pennsylvania, the western district of Washington, and the district of Oregon, at the rate of $6,000 per annum each, for the fiscal years, as follows:
For the fiscal year 1910, $18,000.
For the fiscal year 1909, $6,000.

The amendment was agreed to.

The next amendment was, on page 57, after line 15, to insert:

For the salary of the additional district judge for the southern district of New York, at the rate of $6,000 per annum, for the fiscal years, as follows:
For the fiscal year 1910, $6,000.
For the fiscal year 1909, $2,000.

The amendment was agreed to.

The next amendment was, on page 57, after line 22, to insert:

Salaries, district court, Territory of Hawaii: For the increase in the salary of the existing district judge for the Territory of Hawaii and for the salary of the additional district judge for said Territory, for the fiscal year 1910, $7,000.

The amendment was agreed to.

The next amendment was, on page 58, after line 3, to insert:

Salaries, governor, etc., Territory of Alaska: For the increase in the salaries of the existing district judges and district attorneys in the district of Alaska, $13,500; for the salary of the additional district judge for said district, $7,500; for the salary of the additional district attorney for said district, $5,000; for the salary of the additional United States marshal for said district, $4,000; for the salary of the additional clerk of court for said district, $3,500; for the fiscal year 1910, in all, $33,500.

The amendment was agreed to.

The next amendment was, on page 58, after line 15, to insert:

Salaries, governor, etc., Territory of New Mexico: For the salary of the additional associate judge for the Territory of New Mexico for the fiscal year 1910, $3,000.

The amendment was agreed to.

The next amendment was, on page 60, after line 15, to insert:

COURT OF CLAIMS.

For payment to Lucien B. Howry, for services rendered the Court of Claims during the month of June, 1906, $52.

The amendment was agreed to.

The next amendment was, under the heading "Out of the postal revenues," on page 61, after line 6, to insert:

To pay to the Boston and Maine Railroad, for railway mail service furnished between Fitchburg, Mass., and South Ashburnham, Mass., from July 1, 1897, to June 7, 1908, $2,840.83.

The amendment was agreed to.

The next amendment was, under the heading "The Isthmian Canal," on page 64, after line 17, to insert:

In all, for the Isthmian Canal, $5,458,000.

The amendment was agreed to.

The next amendment was, under the subhead "Senate," on page 65, after line 22, to insert:

For compensation of the officers, clerks, messengers, and others in the service of the Senate, namely:
For five annual clerks to Senators who are not chairmen of committees, at $1,800 each, $2,925.

The amendment was agreed to.

The next amendment was, on page 66, after line 3, to insert:

For 16 pages from March 4 to June 30, 1909, $4,760.

The amendment was agreed to.

The next amendment was, on page 66, after line 6, to insert:

For miscellaneous items, exclusive of labor, $25,000.

The amendment was agreed to.

The next amendment was, on page 66, after line 8, to insert:

For compensation of the officers, clerks, messengers, and others in the service of the Senate, namely:

For 15 annual clerks to Senators who are not chairmen of committees, at $1,800 each, for the fiscal year ending June 30, 1910, $13,500.

The amendment was agreed to.

The next amendment was, on page 66, after line 14, to insert:

The Secretary of the Senate is hereby authorized and directed to pay to Harry A. Shaw, clerk to the Hon. CARROLL S. PAGE, of Vermont, from October 22 to December 6, 1908; John Briar, clerk to the Hon. ALBERT B. CUMMINS, of Iowa, from November 24 to December 7, 1908; and to Cecil C. Wyche, clerk to the Hon. FRANK B. GARY, of South Carolina, from March 6 to 16, 1908, for clerical services rendered, from the appropriation for salaries of officers, clerks, messengers, and others in the service of the Senate for the fiscal year 1909.

The amendment was agreed to.

The next amendment was, on page 67, after line 2, to insert:

For payment to William M. Malloy, for reporting hearings before the Committee on Foreign Relations, Sixtieth Congress, $210.

The amendment was agreed to.

The next amendment was, on page 67, after line 5, to insert:

For police force for Senate Office Building under the Sergeant-at-Arms, namely: For eighteen privates, at $1,050 each, from March 5 to June 30, 1909, inclusive, $6,089.94.

The amendment was agreed to.

The next amendment was, on page 67, after line 10, to insert:

To pay Pitman Pulsifer, for preparing the Navy Year Book for the first and second sessions, Sixtieth Congress, $2,000.

The amendment was agreed to.

The next amendment was, on page 67, after line 13, to insert:

To pay F. H. Wakefield, for extra services in preparing the history of Senate legislation of the Sixtieth Congress, and for carrying out the tracing and notification plan to the Senators during the second session of the Sixtieth Congress, $1,250.

The amendment was agreed to.

The next amendment was, on page 67, after line 18, to insert:

To reimburse the official reporters of the proceedings and debates of the Senate for expenses incurred from March 4, 1908, to March 4, 1909, for clerk hire and other extra clerical services, $4,740.

The amendment was agreed to.

The next amendment was, on page 67, after line 23, to insert:

To pay the Chief Clerk, for preparing a digest of the precedents and decisions on points of order in the parliamentary practice of the Senate, with a full index, as authorized by the resolution of the Senate adopted May 3, 1908, $4,000.

The amendment was agreed to.

The next amendment was, on page 68, after line 3, to insert:

To pay Robert W. Farrar, for indexing and extra services as clerk to the Committee on Pensions, $1,000.

The next amendment was, on page 68, after line 6, to insert:

To pay Dennis M. Kerr, for services as assistant clerk by detail to the Committee on Pensions, $1,000.

The amendment was agreed to.

The next amendment was, on page 68, after line 8, to insert:

To pay C. E. Alden, for services rendered and assistance employed in preparing an index to the compilation of rules and regulations governing the various executive departments, 15 volumes, $1,500.

The amendment was agreed to.

The next amendment was, on page 68, after line 12, to insert:

To pay J. H. Jones, for extra services in the care of the Senate chronometer and for the work in connection therewith, $100 for the second session of the Sixtieth Congress.

The amendment was agreed to.

The next amendment was, on page 68, after line 16, to insert:

To pay for extra services rendered in transferring, rearranging, remarking, cleaning, and refiling the bills, reports, documents, and laws in the Senate document room: To William Grant Lieuallen and William E. Burns, $500 each; in all, $1,000.

The amendment was agreed to.

The next amendment was, on page 68, after line 21, to insert:

To pay William B. Turner, for preparing the index to the final report of the board of lady managers to the St. Louis Exposition, $250.

The amendment was agreed to.

The next amendment was, under the subhead "House of Representatives," on page 69, line 10, after the word "Sergeant-at-Arms," to insert "and the President of the Senate is vested with like authority respecting the Senators from said State," so as to make the clause read:

The Speaker is hereby authorized to issue certificates of salaries to Members of Congress from the State of Oklahoma elected to the Sixtieth Congress, covering that period of time only for which they have not been paid their salaries as Members of the Sixtieth Congress by the Sergeant-at-Arms, and the President of the Senate is vested with like authority respecting the Senators from said State.

The amendment was agreed to.

The next amendment was, on page 71, line 18, before the word "dollars," to strike out "one thousand five hundred per annum, two thousand," and insert "$6 per day, two thousand nine hundred and fifty," so as to make the clause read:

To continue the employment of the stenographer to the Committee on Invalid Pensions, from March 4, 1909, to June 30, 1910, inclusive, at the rate of $6 per day, $2,950, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 71, after line 23, to insert:

Toward the reconstruction of the Chamber of the House of Representatives, to be expended as provided by House joint resolution 265, Sixtieth Congress, second session, $25,000; and authority is hereby given to contract for any part or all of the construction authorized by said joint resolution up to the amount named therein.

The amendment was agreed to.

The next amendment was, on page 73, after line 18, to insert:

For clerk to the Committee on Coinage, Weights, and Measures, from March 4, 1909, to June 30, 1910, inclusive, at the rate of $2,000 per annum, $2,666, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 74, line 23, before the word "hundred," to strike out "five" and insert "eight;" and on page 75, line 1, before the word "thousand," to strike out "eight" and insert "ten," so as to make the clause read:

For assistant clerks to the committees on Agriculture, District of Columbia, Accounts, and Indian Affairs, at the rate of $1,800 per annum each, from March 4, 1909, to June 30, 1910, both inclusive; in all, $10,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 76, after line 19, to insert:

CAPITOL POLICE.

To pay John K. White, a member of the Capitol police force, for extra service rendered as clerk and stenographer to the Capitol police board, $150.

The amendment was agreed to.

The next amendment was, under the subhead "Under the Public Printer," on page 77, after line 18, to insert:

To pay Joseph Dierken, clerk in charge of CONGRESSIONAL RECORD work, for extra services during the Sixtieth Congress, $600.

The amendment was agreed to.

The next amendment was, under the subhead "Public printing and binding," on page 79, after line 11, to insert:

The authority vested in the joint commission to examine into the general subject of the public printing and binding of Congress and the various executive departments, as now existing under authority of an act making appropriations for the sundry civil expenses of the Government, approved June 30, 1906, and an act making appropriations to supply deficiencies, approved March 4, 1907, is hereby continued during the term of the Sixty-first Congress; and the said joint commission shall, as now, consist of the Committee on Printing of the Senate and the Committee on Printing of the House of Representatives; and the Speaker of the House of Representatives shall appoint from the Representatives elected to the Sixty-first Congress a temporary Committee on Printing, consisting of three members, who shall have the same powers and perform the same duties as are imposed by law and the rules of the House of Representatives upon the regularly appointed Committee on Printing for the House of Representatives, until the organization of the Sixty-first Congress and the appointment of a regular Committee on Printing. The sum of $12,000 is hereby appropriated, out of the moneys in the Treasury of the United States not otherwise appropriated, to be immediately available for the purposes described in the aforesaid act, approved March 4, 1907, and disbursed in the manner therein provided.

The amendment was agreed to.

The next amendment was, under the head of "Judgments in Indian depredation claims," on page 81, line 15, after the word "seventeen," to insert "and Senate Document 747;" and in line 18, before the word "dollars," to strike out "seven thousand eight hundred and fifty" and insert "thirty-eight thousand and fifteen," so as to read:

For payment of judgments rendered by the Court of Claims in Indian depredation cases, certified to Congress in House Document No. 1417 and Senate Document 747, at its present session, $38,015.

The amendment was agreed to.

The next amendment was, under the head of "Judgments, Court of Claims," on page 82, line 15, after the word "five," to insert "and Senate Document No. 745," so as to make the clause read:

For the payment of the judgments rendered by the Court of Claims, reported to Congress at its present session in House Document No. 1405 and Senate Document No. 745, namely.

The amendment was agreed to.

The next amendment was, on page 82, after line 16, to insert:

Under the Department of State, $1,362.30.

The amendment was agreed to.

The next amendment was, on page 82, line 21, after the word "Department," to strike out "$19,000.05" and insert "$55,788.88," so as to make the clause read:

Under the War Department, $55,788.88.

The amendment was agreed to.

The next amendment was, on page 82, line 24, after the word "Department," to strike out "$79.44" and insert "$532.34," so as to make the clause read:

Under the Navy Department, $532.34.

The amendment was agreed to.

The next amendment was, on page 83, after line 2, to insert:

Under the Department of Agriculture, $3,979.

The amendment was agreed to.

The next amendment was, on page 83, after line 4, to insert:

Under the Department of Commerce and Labor, $3,107.59.

The amendment was agreed to.

The next amendment was, on page 83, after line 6, to insert:

Under the Department of the Interior, $10,909.65.

The amendment was agreed to.

The next amendment was, on page 83, line 9, after the word "Justice," to strike out "$82.85" and to insert "$348.58;" and in line 11, after the word "all," to strike out "$19,933.73" and insert "$76,799.73," so as to make the clause read:

Under the Department of Justice, $348.58; in all $76,799.73: *Provided*, That none of the judgments herein provided for shall be paid until the right of appeal shall have expired.

The amendment was agreed to.

The next amendment was, on page 96, after line 5, to insert as a new section the following:

SEC. 3. That for the payment of the following claims, certified to be due by the several accounting officers of the Treasury Department under appropriations the balances of which have been exhausted or carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874, and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1906 and prior years, unless otherwise stated, and which have been certified to Congress under section 2 of the act of July 7, 1884, as fully set forth in Senate Document No. 746, reported to Congress at its present session, there is appropriated as follows:

The amendment was agreed to.

The next amendment was, on page 96, after line 18, to insert:

CLAIMS ALLOWED BY THE AUDITOR FOR THE TREASURY DEPARTMENT.

For furniture and repairs of same for public buildings, $2.79.
For refund of stamps used on export manifests, $273.24.
For payment of judgments against internal-revenue officers, $59,410.55.

The amendment was agreed to.

The next amendment was, on page 97, after line 3, to insert:

CLAIMS ALLOWED BY THE AUDITOR FOR THE WAR DEPARTMENT.

For pay, etc., of the army, $3,040.29.
For mileage to officers and contract surgeons, $16.80.
For regular supplies, Quartermaster's Department, $5.15.
For transportation of the army and its supplies, $3,637.34.
For headstones for graves of soldiers, 30 cents.
For National Home for Disabled Volunteer Soldiers, Danville Branch, $6.35.

The amendment was agreed to.

The next amendment was, on page 97, after line 17, to insert:

CLAIMS ALLOWED BY THE AUDITOR FOR THE NAVY DEPARTMENT.

For pay of the navy, $1,855.64.
For pay, Marine Corps, $279.14.
For transportation, Bureau of Navigation, 1908, $1,371.01.
For maintenance of naval auxiliaries, Bureau of Navigation, 1908, $68.15.
For torpedo station, Bureau of Ordnance, $2.08.
For equipment of vessels, Bureau of Equipment, $26.
For freight, Bureau of Supplies and Accounts, $557.93.
For construction and repair, Bureau of Construction and Repair, $448.21.
For steam machinery, Bureau of Steam Engineering, $300.87.
For indemnity for lost property, naval service, act March 2, 1895, $555.29.
For enlistment bounties to seamen, $75.
For extra pay to officers and men who served in the Pacific, $153.

The amendment was agreed to.

The next amendment was, on page 98, after line 21, to insert:

CLAIMS ALLOWED BY THE AUDITOR FOR THE INTERIOR DEPARTMENT.

For stationery, Department of the Interior, 1908, $150.25.
For surveying the public lands, $19,367.46.
For transportation of Indian supplies, $83.52.

The amendment was agreed to.

The next amendment was, on page 99, after line 4, to insert:

CLAIMS ALLOWED BY THE AUDITOR FOR THE STATE AND OTHER DEPARTMENTS.

State Department: For salaries, chargés d'affaires ad interim, 1908, $1,253.48.
For transportation of diplomatic and consular officers, 1908, $942.85.
Department of Agriculture: For general expenses, Weather Bureau, $15.60.
Department of Commerce and Labor: For enforcement of the Chinese exclusion act, $120.
For contingent expenses, Department of Commerce and Labor, 1908, 58 cents.
Department of Justice: For prosecution of Indians in Arizona, act March 4, 1907, $1,310.65.
For support of convicts, District of Columbia, 1908, $1,000.

The amendment was agreed to.

The next amendment was, at the top of page 100, to insert:

CLAIMS ALLOWED BY THE AUDITOR FOR THE POST-OFFICE DEPARTMENT.

For limited indemnity for lost registered mail, $220.15.
For rural free-delivery service, incidental expenses, $23.69.

The amendment was agreed to.

The reading of the bill was concluded.

The VICE-PRESIDENT. All the amendments have been considered except those on pages 16 and 17, which amendments were passed over.

Mr. BURKETT. Against those amendments I raise the point of order that they are claims.

Mr. HALE. Will the Senator let me first complete the committee amendments, so as to perfect the bill?

Mr. BURKETT. Certainly.

Mr. HALE. I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Maine will be stated.

The SECRETARY. It is proposed to strike out all on page 62 from line 1 to line 16, inclusive, and in lieu thereof to insert:

To pay amounts found due by the Auditor for the Post-Office Department and certified in House Document 1406 and Senate Document No. 749, of the present session, as follows:
For clerk hire, third class, fiscal year 1908, $486.14.
For inland mail transportation, star, fiscal year 1907, $1,735.32.
For compensation to postmasters, fiscal year 1908, $104,225.35.
For special-delivery service, fees to messengers, fiscal year 1908, $23,850.59.
For special-delivery service, fees to messengers, fiscal year 1907, 80 cents.

The amendment was agreed to.

Mr. HALE. Now, Mr. President, the only items reserved are the amendments on pages 16 and 17, to which the Senator from Nebraska [Mr. BURKETT] has called attention.

The VICE-PRESIDENT. The Senator from Nebraska raises the point of order that the amendments provide for the payment of private claims.

Mr. BURKETT. I raise the point of order that they are out of order under the rule as being private claims. I can not turn just now to the section of the rules, but I think paragraph 4 of Rule XVI.

The VICE-PRESIDENT. Paragraph 4 of Rule XVI applies. The Chair sustains the point of order.

Mr. DANIEL. Mr. President, these amendments provide for the payment of claims against the General Government for money loaned to the General Government. If this is a private claim——

The VICE-PRESIDENT. Does the Senator from Nebraska withhold his point of order?

Mr. BURKETT. Certainly.

Mr. DANIEL. If this is a private claim, bonds that are to be given to the Panama Canal have no application here and ought not to be in this bill, for this is just as much a public matter as they are. The Government owes the money to the Commonwealth, and that has been recognized by every session of the United States Senate in which the matter has been considered. There is a list of bills passed in the Senate shown in one of the reports, amounting to at least eight, and to my knowledge measures looking to the payment of the claims have passed oftener than that.

It is not only a public claim, but it is a public claim of the highest dignity known to the law of the land, and, if I am not intruding upon the time of the Senate, I will now cite its legal origin.

In the thirteenth volume of Hening's Statutes at Large of the State of Virginia, page 125, will be found an act of the general assembly of Virginia of December 27, 1790, Chapter XV. The act to which I refer is entitled "An act concerning an advance of money to the Government of the United States for public buildings."

I shall ask that the act be printed in the RECORD, for I wish to preserve here a memorial of this matter to which reference can be had.

Without reading the preamble, I cite the concluding portion of the act, as follows:

That $120,000 shall be advanced by this Commonwealth to the General Government, payable in three equal yearly payments, and to be applied toward erecting public buildings at the permanent seat of the Government of the United States, on the bank of Patowmack, and the auditor of public accounts is hereby directed to issue his warrants on the treasurer to the amount of $120,000, payable in manner hereinbefore directed to the order of the President of the United States.

I ask that the entire act be inserted in the RECORD.

The VICE-PRESIDENT. In the absence of objection, it is so ordered.

The act referred to is as follows:

An act concerning an advance of money to the Government of the United States for public buildings. (Passed the 27th of December, 1790.)

Whereas the general assembly of Maryland have acceded to a proposition of the general assembly of this Commonwealth contained in their resolution of the 10th day December, 1789, concerning an advance of money to the General Government, to be applied toward erecting public buildings at the permanent seat of the Government of the United States should the Congress deem it expedient to fix it on the bank of Patowmack; and

Whereas Congress have passed an act for establishing the said seat of government on the Patowmack:

Be it enacted by the general assembly, That $120,000 shall be advanced by this Commonwealth to the General Government, payable in three equal yearly payments, and to be applied toward erecting public buildings at the permanent seat of the Government of the United States on the bank of the Patowmack; and the auditor of public accounts is hereby directed to issue his warrants on the treasurer to the amount of $120,000, payable in manner hereinbefore directed to the order of the President of the United States.

Mr. DANIEL. I now read from the Journal of the house of delegates of the Commonwealth of Virginia, begun and holden in the city of Richmond, in the county of Henrico, on Monday, the 19th day of October, in the year of our Lord 1789:

Resolved, That a copy of the act "For the cession of 10 miles square, or any lesser quantity of territory within this State, to the United States in Congress assembled, for the permanent seat of the General Government," be transmitted to the general assembly of Maryland without delay; and that it be proposed to the said assembly to unite with this legislature in an application to Congress, that in case Congress shall deem it expedient to establish the permanent seat of the Government of the United States on the banks of the Potomac, so as to include the cession of either State, or a part of the cession of both States, this assembly will pass an act for advancing a sum of money not exceeding $120,000 to the use of the General Government, to be applied in such manner as Congress shall direct toward erecting public buildings; the said assembly of Maryland on their part advancing a sum not less than two-fifths of the sum advanced by this State for the like purpose.

Mr. President, I also ask leave that Chapter XXXII of the act of December 3, 1789, be printed in the RECORD, in order that there may be shown the cession of territory to the United States and that the matter covered by the amendment is totally disconnected therefrom, except as a cumulative thing and not as intermixed with the location of the capital at Washington. The cession of territory was the thing which was considered with reference to the location of the capital at Washington and the proposition of the loan of money to the United States in the event that that was done. I refer to a case in this connection in Ninety-seventh United States Reports, in which the term "advance" is defined, and it is historic that when this measure was before the general assembly of Virginia it was moved to strike out the word "grant" and to insert the word "advance." I ask that the act referred to may be printed in the RECORD.

The VICE-PRESIDENT. In the absence of objection, it is so ordered.

The act referred to is as follows:

CHAPTER XXXII.

An act for the cession of 10 miles square, or any lesser quantity of territory within this State, to the United States, in Congress assembled, for the permanent seat of the General Government. (Passed the 3d of December, 1789.)

SECTION 1. Whereas the equal and common benefits resulting from the administration of the General Government will be best diffused, and its operations become more prompt and certain by establishing such a situation for the seat of the said Government as will be most central and convenient to the citizens of the United States at large, having regard as well to population, extent of territory, and a free navigation to the Atlantic Ocean through the Chesapeake Bay, as to the most direct and ready communication with our fellow-citizens in the western frontier; and

Whereas it appears to this assembly that a situation combining all the considerations and advantages before recited may be had on the banks of the river Patowmack, above tide water, in a country rich and fertile in soil, healthy and salubrious in climate, and abounding in all the necessaries and conveniences of life, where in a location of 10 miles square, if the wishes of Congress shall so direct, the States of Pennsylvania, Maryland, and Virginia may participate in such location:

Be it therefore enacted by the general assembly, That a tract of country, not exceeding 10 miles square, or any lesser quantity, to be located within the limits of this State, and in any part thereof as Congress may by law direct, shall be, and the same is hereby, forever ceded and relinquished to the Congress and Government of the United States, in full and absolute right, and exclusive jurisdiction as well of soil as of persons residing or to reside thereon, pursuant to the tenor and effect of the eighth section of the first article of the Constitution of government of the United States.

SEC. 2. *Provided,* That nothing herein contained shall be construed to vest in the United States any right of property in the soil, or to affect the rights of individuals therein, otherwise than the same shall or may be transferred by such individuals to the United States.

SEC. 3. *And provided also,* That the jurisdiction of the laws of this Commonwealth over the persons and property of individuals residing within the limits of the cession aforesaid, shall not cease or determine until Congress, having accepted the said cession, shall by law provide for the government thereof, under their jurisdiction, in manner provided by the article of the Constitution before recited.

Mr. DANIEL. I read now from the journal of the house of delegates——

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Virginia yield to the Senator from Maine?

Mr. DANIEL. I hope the Senator will not interrupt me. I take as little of the time of the Senate as possible.

Mr. HALE. I was going to make a suggestion in the interest of the amendment.

Mr. DANIEL. I thank the Senator.

Mr. HALE. If the Senator from Nebraska [Mr. BURKETT] will withdraw the point of order so that the Senate may vote upon the proposition, it will then go on the bill and be a subject of conference; and in the dispatch of business of course it will help very much, as I know Senators want to get the bill through.

Mr. DANIEL. Mr. President, so far as the Senate of the United States is concerned, I have no complaint to make with the dispatch of business, but I want to put in a memorial of the nature and character of this claim, which is much misunderstood outside of this body more than in it. I am nearly through, and I do not wish to tell just a part of the tale. There is written these words:

A bill "appropriating a further sum of money on account of the Capitol" was read the second time, and ordered to be engrossed and read a third time.

A bill "for granting to the President of the United States the sum of $120,000 for erecting the public buildings on the Potomac River, agreeably to a resolution of the last assembly," was read the second time, and ordered to be engrossed and read a third time.

On the next page, 161, occurs this:

An engrossed bill "for granting to the President of the United States the sum of $120,000 for erecting public buildings on the Potomac River, agreeably to a resolution of the last assembly," was read the third time.

Resolved, That the bill do pass; and that the title be, "An act concerning an advance of money to the Government of the United States for public buildings."

That bill is the one that I have already asked be embodied, for it has the words "advance for the use of the Government of the United States." I need not speak to lawyers about the meaning of this term as construed in the law dictionaries, in the dictionaries of our language, and by the Supreme Court of the United States. It has, in such connection, but one meaning, and that is a loan to supply beforehand in anticipation of collection.

This claim of Virginia has grown old. There are some persons connected with this Government who would prefer old claims. I know the Senator from Maine can have nothing against them, for New England has got more old claims before this body than any other part of the United States.

These spoliation claims seem to be good for all seasons, for all years, and for all generations. Wherever I have thought they were honest claims I have always voted for them, and I deny that any Senator here has either the legal or the moral right to raise his voice against an old claim which grew old as this did in consideration by the State of Virginia of the hard lines that the Government of the United States was going through when it was poor. I have no rule by which I am guided toward my fellow citizens in any deliberate action, but the golden rule, to do to others as I would be done by, and, in this case, as you have been done by by the State of Virginia.

Mr. RAYNER. Mr. President, there is a point of order before the Senate I believe.

The VICE-PRESIDENT. The point of order was made and temporarily withdrawn.

Mr. RAYNER. We are not on the merits of the proposition?

The VICE-PRESIDENT. The Senator from Nebraska interposed the point of order, and withdrew it temporarily in order that the Senator from Virginia [Mr. DANIEL] might address the Senate.

Mr. RAYNER. Has the Senator from Nebraska withdrawn the point of order?

Mr. BURKETT. I withdrew the point of order at the request of the Senator from Virginia, in order that he might discuss it. Yes; it has been temporarily withdrawn.

Mr. RAYNER. Then I ask for a few moments on the point of order.

Mr. President, I understand the point of order is that this is a private claim under paragraph 4 of Rule XVI:

No amendment, the object of which is to provide for a private claim, shall be received to any general appropriation bill.

I think, with great deference to the Chair, that this is a public claim and not a private claim. It is clearly a public claim. If it is a private claim, it comes under the rule. If it is a public claim, it does not come under the rule. The definition of what is "a private claim" and what is "a public claim" is that a private claim is the claim of an individual and a public claim is the claim of a State. This is a claim of the States of Maryland and Virginia.

I want to read the definition of "a private claim." It is to be found in this book, which is one of the best books published on

the subject—Words and Phrases Judicially Defined. The word "private" is thus defined:

Mr. Webster says that, in general, "public" expresses something common to mankind at large, to a nation, state, city, or town—

This is a State—

and is opposed to "private," which denotes that which belongs to an individual, to a family, to a company or corporation.

That was the point raised in the case of Chamberlain *v.* City of Burlington (19 Iowa, 395, 402).

A "private act" is defined in Burrill's Law Dictionary as one which relates to particular classes or particular persons or places. (Allen *v.* Hirsch, 8 Or., 412, 423.)

* * * * * * *

A private bill, act, or law relates only to particular persons or particular classes of men and their private concerns.

If there can be any such thing as a public claim, this is a public claim. You could not define a public claim unless you included within the definition the claim of a State. The United States could not have any private claim. The claim of the State of Maryland and that of the State of Virginia are as much a public claim against the United States as a claim of the United States would be against the States of Maryland and Virginia.

I will not go into the merits of the proposed amendment at all. I think it is a most meritorious provision, and I think the States ought to be repaid this money. It was an advance; it was a loan; it was not a gift. They have been here for over a half a century—since 1845—trying to get it back. But aside from the merits of the case, I feel, with great deference to the Chair, that it is not a private claim, but a public claim held by these States, and therefore does not come within the prohibition of the rule.

The VICE-PRESIDENT. The Senator from Nebraska makes the point of order that the two amendments provide for private claims and are in contravention of paragraph 4 of Rule XVI. The Chair understands that the question is not a new one for the Senate, and that private claims of individuals and claims of States are alike obnoxious to the rule. The State has no higher right, in a parliamentary sense, under the rule, than an individual claimant upon a general appropriation bill. The Chair therefore sustains the point of order.

Mr. PENROSE. I desire to call the attention of the chairman of the committee to an amendment which I, as chairman of the Committee on Post-Offices and Post-Roads, have been requested to offer by the Post-Office Department.

The VICE-PRESIDENT. The Senator from Pennsylvania offers an amendment, which will be stated.

The SECRETARY. On page 61, line 3, after the word "routes," it is proposed to strike out "$500,000" and insert "$1,250,000," so as to read:

For inland transportation by railroad routes, $1,250,000.

Mr. HALE. I understand that is an additional estimate submitted by the department.

Mr. PENROSE. I understand it is the amount of the original estimate, and I ask that it go in for purpose of conference.

The amendment was agreed to.

Mr. McCUMBER. I offer the amendment I send to the desk.

The SECRETARY. On page 18, after line 9, it is proposed to insert:

That of the amount heretofore authorized for the enlargement, extension, remodeling, or improvement of the post-office and custom-house at Ellsworth, Me., so much thereof as may be necessary shall be available for the acquisition of additional land, and provided that the limit of cost heretofore fixed shall not be exceeded in the acquisition of said site, and the enlargement, extension, remodeling, or improvement of said post-office and custom-house.

The amendment was agreed to.

Mr. LONG. I offer the amendment I send to the desk.

The SECRETARY. On page 68, after line 24, it is proposed to insert:

To R. H. Faxon, for recompiling the Biographical Congressional Directory, and bringing the same to date, $2,000: *Provided*, That no part of the same shall be paid until the work is completed and approved by the Secretary of the Senate and the Chief Clerk of the House of Representatives.

Mr. HALE. That is all right.

The amendment was agreed to.

Mr. BURROWS. I offer the amendment I send to the desk.

The SECRETARY. On page 61, after line 12, it is proposed to insert:

To pay the Grand Rapids Railway Company, of Grand Rapids, Mich., for services rendered in collecting and carrying mail in boxes affixed to its cars, from July 1, 1907, to June 30, 1908, $1,084.50.

Mr. HALE. That has been certified to by the department.

Mr. DANIEL. I hope it is not a private claim. I am not going to raise any point of order against it.

The amendment was agreed to.

Mr. LA FOLLETTE. I offer the amendment I send to the desk. I will say it is identical with the bill introduced by the senior Senator from Illinois [Mr. CULLOM] and passed by the Senate.

The SECRETARY. After line 7, on page 34, it is proposed to insert:

That the expenditure of the sum of $50,000 is hereby authorized, to be expended under the direction of the Secretary of War, for the express purpose, and no other, of aiding in the building of a suitable memorial upon the farm, in the State of Kentucky, upon which Abraham Lincoln was born, said memorial being in process of construction February 12, 1909, the centennial of Abraham Lincoln's birth: *Provided, however*, That this authorization of expenditure is made upon the express condition that the Lincoln Farm Association of the State of New York shall first have raised the sum of $150,000, used, or to be used, for the purchase of said farm, building said memorial, caring for the same, and acquiring relics characteristic of the life of the period and locality in which Lincoln was born.

Mr. HALE. I do not object to the amendment. I should have voted for it in committee.

The amendment was agreed to.

Mr. CARTER. I offer the amendment I send to the desk.

The SECRETARY. On page 52, after line 20, it is proposed to insert:

To pay M. F. Mann the amount due him for services rendered as custodian of the Fort Keogh abandoned military reservation, at the rate of $60 per month, from August 10, 1908, to January 22, 1909, inclusive, $324.

The amendment was agreed to.

Mr. McCUMBER. On page 70, after line 5, I move to insert:

To pay the legal representatives of the estate of Samuel Lee, deceased, to wit, Samuel Lee, Anna Lee Andrews, Clarence Lee, Robert Lee, Harry A. Lee, and Phillip Lee, heirs at law, the sum of $10,482.80, the same being in full for any claim for pay and allowances made by reason of the election of said Lee to the Forty-seventh Congress and his services therein.

Mr. CULBERSON. Let the amendment be again read.

The Secretary again read the amendment.

Mr. CULBERSON. I ask from what committee the amendment comes.

Mr. McCUMBER. I can answer. It has been reported out of the Committee on Claims; it has passed the Senate; it has been reported out of the Committee on Claims in the House. It has passed the House in the omnibus claims bill. The two bodies have not agreed to several amendments on the omnibus bill, but both bodies have agreed upon this proposition. It is probable that no final decision upon the matters in conference will be had, so that the omnibus bill is doomed and will not become a law. Hence I have asked to have the item inserted in the pending bill.

Mr. CULBERSON. I ask from what committee does the item come at this session of Congress, if from any?

Mr. HALE. It is subject to the point of order, of course.

Mr. CULBERSON. I have not made a point of order.

Mr. TILLMAN. I make the point of order.

Mr. CULBERSON. I was simply inquiring into the condition and history of the claim.

Mr. HALE. It is a claim.

The VICE-PRESIDENT. What is the point of order?

Mr. TILLMAN. That it is a private claim.

Mr. WARREN. Will the Senator state how old it is?

Mr. McCUMBER. I will, when I get to it. I desire to be heard on the point of order for one moment.

Mr. BEVERIDGE. Will the Senator from North Dakota also state whether this amendment, if adopted, is likely to be followed by others similarly placed?

Mr. McCUMBER. I think not. I can explain it.

Mr. BAILEY. I wonder if the Senator from Maine would not agree just to put it on the omnibus bill?

Mr. HALE. This is a claim selected from the omnibus bill.

Mr. TILLMAN. Why not put on all the rest of them?

Mr. HALE. If this is put on, there will be probably 20 others.

Mr. TILLMAN. I have made the point of order against it.

Mr. HALE. The Senator from North Dakota wishes to discuss the point of order.

Mr. BAILEY. I suggest to the Senator from Maine that he just take the omnibus bill——

Mr. HALE. We will have to, if this is put on.

Mr. BAILEY. And just put it on the appropriation bill.

Mr. McCUMBER. The suggestion is a very kindly one; and inasmuch as the Senator with the rest of us voted for the omnibus bill, I do not see why he should object to putting it on this bill.

Mr. BAILEY. I am willing, of course.

Mr. McCUMBER. I wish now to discuss for a moment the point of order.

Mr. BAILEY. I made my suggestion in good faith. I understand the omnibus bill is suspended between the two Houses,

and my recollection is it passed this body by practically a unanimous vote.

Mr. McCUMBER. That is correct.

Mr. BAILEY. I make the suggestion in good faith. I myself should like to put it on here.

Mr. McCUMBER. I would, too, Mr. President.

Mr. President, an election was had in the State of South Carolina, in the first district, I think—at least in one of the districts—for a Representative to the Forty-seventh Congress. There were two competitors—Mr. Richardson and Samuel Lee. The certificate of election was issued to Mr. Richardson. A contest was instituted by Mr. Lee, who was a colored man. The House by a decisive majority vote decided that Mr. Lee was entitled to the seat in the House. So that body, being the judge of the election of its own Members, decided that Mr. Lee was a Member of the body. The decision, however, was not arrived at until near the close of the session. The Congress was of course of two years' duration.

A little line of filibustering was indulged in, so that it was impossible for Mr. Lee to take the oath of office during the term.

The result was that while the House declared that he was a Member of that body, entitled to the salary and emoluments provided by law, he never received them. It is a simple proposition that under the law of Congress the person elected to fill the position is entitled to the salary. The House declared that Mr. Lee was duly elected to that position.

Mr. President, if the amendment is objectionable at all, I suppose it is objectionable under Rule XVI. Rule XVI provides that:

No amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill or to add a new item of appropriation, unless—

Now this comes clearly within the exception of the rule—

it be made to carry out the provisions of some existing law or treaty stipulation.

Is this to carry out the provisions of any existing law? If it is, then, if I understand the rule, it is proper as an amendment to this appropriation bill. There is an existing law providing for the payment of the salaries of Members of the Senate and Members of the House. That is clearly an existing law. There is not only the general law which provides for the payment of those salaries, but there is in addition a special law which provides for the payment where the person has not been sworn in, and which provides for the payment from the time he was qualified to hold the position until the expiration of his office. The latter law is section 38 of the Revised Statutes of 1878. It is a law of 1873.

This is one of those old claims that were so eloquently referred to by the Senator from Virginia [Mr. DANIEL], and one which, it seems to me, we are morally bound to pay. I have heard no reason in the world why we should not pay this claim. We have paid other claims of like character. Where there has been a contest for a considerable length of time, the person who has been entitled to hold the seat has been paid for the full term and was entitled to draw the salary and the emoluments for the full term. The Government of the United States is honestly indebted in this sum. Probably if he had been a white man he would have been paid long ago. It does not seem to me that the fact he was a colored man should have the least effect in the decision of the Senate as to his title to receive this sum.

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from North Dakota yield to the Senator from Maine?

Mr. McCUMBER. I yield. I have nothing more to say, Mr. President, except that it seems to me the amendment comes clearly within this exception, and whether the objection is made under that subdivision of the rule or whether the objection is made under subdivision 4 of the rule it will come under the same exception, namely, unless it be to carry out the provisions of an existing law. Is this carrying out the provisions of an existing law, the law for the payment of those salaries? If it is not, I concede naturally that it is subject to the point of order. If it is, then I insist that it is not subject to such point of order.

Mr. HALE. Mr. President, the Senator misapprehends the infirmity of this amendment.

Mr. McCUMBER. I discussed the point of order that was raised.

Mr. HALE. It is a pure claim, a private claim, much more of a private claim than those just rejected from Maryland and Virginia. One reason which ought to be apparent to every Senator why it should not be here and goes out as a claim is that some years ago when the Senate was beset by the offering of claims on appropriation bills it, by rule, established a new appropriation bill, the omnibus claims bill, to which all claims were sent in order to avoid the constant question arising under Rule XVI as to the consideration of claims on regular appropriation bills.

Since then parties representing these claims have sent them to the Committee on Claims, and that committee has taken up this claim and a hundred other claims and embodied it and the other claims in what is known as "the omnibus claims bill," which is provided for the very purpose of excluding these claims from general appropriation bills.

If this was not a claim subject to a point of order, it would not have gone upon the omnibus claims bill; but being a claim, it was sent to the Committee on Claims and made a part of the provisions of that bill as passed by the Senate, and is now pending in the other branch. The Senator has taken this claim, no better than a hundred others on the omnibus claims bill, from that bill bodily and brought it in here and presented it upon this appropriation bill.

Mr. President, if a claim of this kind is allowed upon an appropriation bill, we may just as well abandon the omnibus claims bill. It has had its day in court; the Senate has passed upon it; and I urge with the greatest confidence not the point of order suggested by the Senator, but that it is a private claim and has no place here. Its place is on the omnibus claims bill.

Mr. McCUMBER. The Senator has absolutely failed to give any reason against that which I urged. I admit that this is a private claim. There can be no question about that; but the rule does not exclude all private claims. I want to call the attention of the Senator to the fact that the hundreds of claims that were allowed in the claims bill had no provision of law in existence for their payment, and there is where I draw the distinction. This particular claim has a provision for its payment in the general law.

Mr. HALE. Almost everything that is embodied in the omnibus claims bill is based upon some law.

Mr. WARREN. Of course.

Mr. HALE. The Senator on my left, who had charge of that bill for years, says "Of course." Everything in that bill is based upon law.

Mr. McCUMBER. Everything in that bill is not based upon a law which provides for the payment of it and the amount which shall be paid. In fact, very little of it is in that condition.

The Senator says that this is a private claim. Then I call his attention to the rule in reference to private claims. That rule is as follows:

No amendment, the object of which is to provide for a private claim, shall be received to any general appropriation bill, unless—

Now, here comes the exception—

unless it be to carry out the provisions of an existing law.

Now, what is the provision of the existing law?

Mr. WARREN. Mr. President——

Mr. McCUMBER. I will yield in just one moment. The provision of existing law is that Members of Congress shall be paid a salary of a given amount. That is a law, a law that is in existence, a law that has not been repealed. It fixes to a certainty the amount that is to be paid.

Mr. WARREN. The law does not provide that every claimant to a seat in the body shall be paid. Each House controls its own membership.

Mr. McCUMBER. Certainly; and this body declares——

Mr. WARREN. To have life it must have the sanction of the body in which the party served.

Mr. McCUMBER. Certainly, and Mr. Lee did have the sanction of that body by a very decisive vote. The House declared that he was a Member of that body.

Mr. HALE. This man never was a Member of Congress. The law applies only to Members of Congress; and this man never was a Member.

Mr. TILLMAN. He never was sworn in.

Mr. HALE. He never was sworn in. He is a claimant.

Mr. McCUMBER. Payments are being made right along before the Members are sworn in.

Mr. HALE. Not in contested cases.

Mr. McCUMBER. In contested cases payments are made.

Mr. HALE. They are all ruled out.

Mr. McCUMBER. Suppose there is a contested case that lasts for nearly two years, and the Senate or the House finally decides that the Member is entitled to a seat?

Mr. HALE. Then he is sworn in.

Mr. McCUMBER. Then he is sworn in. Has it not been the rule to make payment for the time before he was sworn in?

Mr. HALE. The rule has been that in all cases they come in as claimants and are reported by the House that has the jurisdiction in which the question of membership has been raised. The law does not apply to this man. He was never a Member.

Mr. McCUMBER. The Senator must concede that the law does provide for the payment of a sum before the Congressman is sworn in. The only reason why he was not sworn in was because a little filibuster was started in the last days of Congress, and he could not be sworn in. The obligation to pay his salary, after the House had determined that he was a Member of that body and entitled to it, was fixed by law.

Mr. HALE. I am entirely willing to take the ruling of the Chair. It is getting late.

The VICE-PRESIDENT. Paragraph 4 of Rule XVI provides that—

No amendment, the object of which is to provide for a private claim, shall be received to any general appropriation bill, unless it be to carry out the provisions of an existing law or a treaty stipulation, which shall be cited on the face of the amendment.

There is no such citation upon the proposed amendment. The Chair thinks that the amendment is in contravention of the rule, and therefore sustains the point of order.

Mr. HALE. On page 3, at the end of line 9, I move to insert:

To enable the State Department to investigate the interests of the United States and its citizens in the Republic of Liberia, with the consent of the authorities of said Republic, $20,000.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Maine.

Mr. CULBERSON. Let the amendment be read again.

The Secretary again read the amendment.

The amendment was agreed to.

Mr. FLINT. On page 52, after line 20, I move to insert:

To enable the Secretary of the Interior to rent additional rooms in the building used by the engraving and printing divisions of the Geological Survey, $2,500.

The amendment was agreed to.

Mr. BANKHEAD. I move to add to the bill the following:

To enable the Secretary of War to pay to Rittenhouse Moore the sum of $3,653.05, being the amount stated and claimed by him as set forth in House Document No. 10, Fifty-eighth Congress, second session, for overwidth dredging in the Potomac River below Washington, D. C., and recommended by the Secretary of War, as therein shown.

Mr. HALE. That is undoubtedly a claim. I shall have to make a point of order against it.

The VICE-PRESIDENT. The Senator from Maine makes the point of order that the amendment provides for a private claim. The Chair sustains the point of order.

Mr. BANKHEAD. I hope the Senator from Maine will withdraw the point of order for a moment until I can make a brief statement.

Mr. HALE. Certainly.

The VICE-PRESIDENT. The Senator from Maine withdraws his point of order.

Mr. HALE. I withhold it.

Mr. BANKHEAD. Mr. President, this is a claim which originated about eight years ago under a contract made by the War Department for dredging the Potomac River. The contractor performed the contract according to the terms of the contract. When the work was measured up the Engineering Department stated that there was still due him about $3,000, and the reason why the claim was not paid was because the appropriation made under the law authorizing the work to be done had been exhausted. The Secretary of War, after a very careful examination of this claim, wrote a letter to Congress, which I have here, saying that the claim ought to be paid, and he recommended its payment. The Chief of Engineers said that it ought to be paid and recommended its payment.

Mr. President, I insist that this proposed amendment carrying this appropriation is for the purpose of carrying out the provisions of an existing law. What law? The law of Congress authorizing the work to be done. The contract being made under the law, it becomes a part of the law, and the amount has never been paid.

Mr. President, I never complain, whatever comes to me; but I want to call the attention of the Senate to the fact that there are a number of items in this bill exactly on all fours with the amendment I have offered. A number of them have been added to the bill since it went into the committee, and it was there subject to amendment without objection. There is an item in the bill, on page 61, which is exactly similar to the amendment that I have offered. I have no doubt that the amendment to which I refer found its way into the bill without the knowledge of the Senator from Maine. It must have escaped his attention. I ask the Secretary to read from the desk the amendment on page 61, beginning in line 5.

The VICE-PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

To pay to the Boston and Maine Railroad, for railway mail service furnished between Fitchburg, Mass., and South Ashburnham, Mass., from July 1, 1897, to June 7, 1908, $2,840.83.

Mr. BANKHEAD. I did not make the point of order against that amendment because I believe that it is a just claim and that it ought to be paid.

Mr. LODGE. If the Senator will allow me, it is not a claim; it is an estimate.

Mr. BANKHEAD. This is an estimate, too, from the Secretary of War.

Mr. LODGE. No; not at all; it was estimated for by the Post-Office Department.

Mr. HALE. The other is a recommendation.

Mr. BANKHEAD. This is a recommendation from the War Department.

Mr. LODGE. It is not a claim.

Mr. BANKHEAD. Mine is an estimate from the War Department.

Mr. LODGE. It is to carry out the postal service and is not a claim.

Mr. BANKHEAD. That is the point I am making; and other claims of a similar nature have been admitted on the floor. I made no objection, and I am making none now. They are just claims, and they ought to be paid. I make no objection to this claim.

I respectfully ask the Senator from Maine if he will not consent that this amendment may be submitted to the Senate and considered. If the Senate says it ought not to be paid I will be entirely content.

Mr. HALE. If the Senator will quit I will withdraw the point of order.

The VICE-PRESIDENT. The Senator from Maine withdraws the point of order. The question is on agreeing to the amendment proposed by the Senator from Alabama.

The amendment was agreed to.

Mr. LODGE. I send an amendment to the desk.

The VICE-PRESIDENT. The Senator from Massachusetts proposes an amendment, which will be stated.

The SECRETARY. On page 65, after line 19, insert:

To enable the Secretary of the Senate and Clerk of the House of Representatives to pay the necessary expenses of the inaugural ceremonies of the President of the United States March 4, 1909, in accordance with such programme as may be adopted by the joint committee of the Senate and House of Representatives, appointed under a concurrent resolution of the two Houses, including the pay for clerical and other extra services, and including the pay for extra police three days, at $3 per day, there is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, $4,500, or so much thereof as may be necessary, in addition to the sum appropriated by the joint resolution approved February 9, 1909, the same to be immediately available.

Mr. HALE. In view of all the noise and display and hammering and filling up of the streets with every possible thing which contributes to the discomfort of Members, as this amount is only $4,000——

Mr. BEVERIDGE. It is $4,500.

Mr. HALE. Four thousand five hundred dollars—I accept it with thanks. The wonder is it is not fifteen or twenty thousand dollars. [Laughter.]

The amendment was agreed to.

Mr. LODGE. I present the amendment which I send to the desk, to come in under the head of "State Department."

The VICE-PRESIDENT. The amendment proposed by the Senator from Massachusetts will be stated.

The SECRETARY. On page 47, after line 7, it is proposed to insert:

To enable the Secretary of State to return to such contributors as may file their claims within two years from the passage of this act the money raised to pay the ransom for the release of Miss Ellen M. Stone, an American missionary to Turkey, who was abducted by brigands on September 3, 1901, $66,000: *Provided*, That no claims shall be paid unless supported by evidence that the contribution was made in reliance upon the assurance of the State Department that they would urge Congress to reimburse the contributors.

The VICE-PRESIDENT. The question is on the amendment.

Mr. HALE. Mr. President, was this amendment reported from the Committee on Foreign Relations?

Mr. LODGE. It was.

Mr. CULBERSON. I should like to ask the Senator from Massachusetts if this amendment was reported unanimously from the Committee on Foreign Relations?

Mr. LODGE. It was reported some time ago, and I do not recall any opposition to it from anybody. It was reported at the last session of Congress, I think.

Mr. CULBERSON. Would the Senator explain briefly the merits of the claim, if it has any merits?

Mr. LODGE. Mr. President, the case briefly is this: It was a case which attracted a great deal of public attention at the time. Miss Stone, an American missionary, was in one of the provinces of the Turkish Empire, and was abducted by brigands and held in captivity. She was finally ransomed for the sum of $60,000 which was raised in this country. Of course, our

Government had intervened and presented the case to the Turkish Government and had endeavored to secure her release. The Turkish Government was unable to secure that release. Her life was in danger. Money for her ransom was raised, and the State Department informed the contributors that if she was released in that way, and the money could not be regained from the Turkish Government, they would recommend to Congress its payment.

Mr. GALLINGER. Which they did.

Mr. LODGE. Which they did in a report and estimate. In response to that the Committee on Foreign Relations reported this amendment and sent it to the Committee on Appropriations.

Mr. DOLLIVER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Iowa?

Mr. LODGE. I do; certainly.

Mr. DOLLIVER. I think it also ought to be added that those contributions were not made by rich people, but in large part by the relatives of this woman, who are under great hardship on account of the loss and expense incident to the transaction.

Mr. RAYNER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Maryland?

Mr. LODGE. Certainly, I do.

Mr. RAYNER. I only desire to ask a question. I do not object to this claim; I have a way of not objecting to anything; but what is the difference between this claim and the claim that has just been ruled out of order? The claim presented by the Senator from Massachusetts was reported from the Committee on Foreign Relations, and the claim of Maryland and Virginia was favorably reported by the Committee on Claims, and was ruled out of order because it was a private claim. The Senator's claim is in order as it is a claim of an individual, and our claims are out of order though they are the claims of two States; both of which claims have passed committees of the Senate. That is what I can not understand.

Mr. LODGE. I have not been making any points of order. No point of order has been made against this amendment. I was asked by the Senator from Texas [Mr. CULBERSON] to state the merits of the amendment, and I did so to the best of my ability.

Mr. RAYNER. If some of these private claims are to go in and others are to go out, it seems to me that the point of order——

Mr. LODGE. The Senator from Maryland does not expect me to make a point of order against an amendment which I myself have offered?

Mr. RAYNER. I do not; but I do expect the Senator to help keep away points of order from the claims which we present for the States. I think that you ought to do that. You are under moral obligations to help us in the claims of Maryland and Virginia.

Mr. LODGE. I did not make any point of order against the amendment for the claims of Maryland and Virginia.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Massachusetts.

The amendment was agreed to.

Mr. GALLINGER. In connection with the amendment which has just been adopted, I ask to have printed in the RECORD a message from the President of the United States and a recommendation from Mr. Root, concerning the propriety of the Government returning to the people who rescued this woman the sums of money they contributed.

The VICE-PRESIDENT. Without objection, it will be so ordered.

The message referred to is as follows:

[Senate Document No. 408, Sixtieth Congress, first session.]

Repayment of money for ransom of Miss Ellen M. Stone, missionary in Turkey.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES, TRANSMITTING A LETTER FROM THE SECRETARY OF STATE ON THE SUBJECT OF THE REPAYMENT TO THE CONTRIBUTORS OF THE MONEY RAISED TO PAY THE RANSOM FOR THE RELEASE OF MISS ELLEN M. STONE, AN AMERICAN MISSIONARY TO TURKEY.

To the Senate and House of Representatives:

I transmit herewith for the consideration of the Congress a letter from the Secretary of State on the subject of the repayment to the contributors of the money raised to pay the ransom for the release of Miss Ellen M. Stone, an American missionary to Turkey, who was abducted by brigands on September 3, 1901, while traveling on the highway from Raslog to Djumabala, in the Turkish Empire.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *March 26, 1908.*

DEPARTMENT OF STATE,
Washington, March 24, 1908.

The PRESIDENT:

As will be remembered, Miss Ellen M. Stone, an American missionary to Turkey, was abducted by brigands on September 3, 1901, while traveling on the highway from Raslog to Djumabala, in the Turkish Empire.

Our diplomatic and consular representatives in Turkey, in correspondence with the Department of State shortly after the capture, indicated their belief that the motive therefor was to obain a ransom and stated that they had requested the Turkish officials to abstain from too close pursuit of the brigands, lest the death of the captured might result.

From later correspondence with our representatives it appeared that the brigands had retired to the mountains with the captive, probably over the border into Bulgaria. The exact location of the party during the captivity, however, is not established by any evidence in the possession of the Department of State, nor does it appear clearly of what government the bandits were subjects.

About October 1, 1901, the bandits opened negotiations for a ransom, demanding £25,000, and transmitting a letter from Miss Stone, asking that the sum demanded be paid and that pursuit of the brigands by the Turkish troops be stopped.

Our diplomatic representatives were of the opinion that Miss Stone's release could only be obtained by the payment of the ransom, and the State Department shared this view. Miss Stone's friends, of course, entered into correspondence with the department regarding the payment of the ransom, and were told that it must be raised by private means.

On October 3, 1901, the State Department wrote to the Rev. Judson Smith, of the American Board of Commissioners for Foreign Missions, Boston, Mass., as follows:

"It seems imperative that the amount (of the ransom) should be raised or pledged, so as to be available by your treasurer at Constantinople in season to save Miss Stone. Statutory prohibitions make it impossible for this Government to advance the money or guarantee its payment. If paid by Miss Stone's friends, every effort will be made to obtain reimbursement from whichever government may be found responsible under international law and precedent. In the event of its proving impossible to hold any foreign government responsible for the capture and to secure the repayment of the money, this Government is willing in the last resort to urge upon Congress as strongly as possible to appropriate money to repay the donors."

It is claimed that this assurance given by the department in its letter to Mr. Smith, to the effect that, as a last resort, a recommendation would be made to Congress looking toward the appropriation for a sum sufficient to pay the donors, was largely instrumental in enabling Miss Stone's friends to secure the sum of $66,000, which was raised through public subscription in this country by October 23, 1901, for the purpose of effecting Miss Stone's release.

After negotiations of considerable length the brigands finally consented to accept the amount raised and arrangements were made by United States Minister Leishman for the payment of the money at a point near Bansko, Macedonia, the Turkish authorities consenting to withhold their troops from the vicinity of the place in order that the negotiations might have a successful issue.

The release of the captive was not obtained so soon as expected, but was finally reported by Minister Leishman on February 23, 1902.

After careful consideration of all the facts my predecessor, Mr. Hay, decided on January 19, 1905, that it was not advisable to attempt to hold the Turkish Government responsible for the capture and to secure the repayment of the money. Upon the subsequent application for reconsideration of this decision Mr. Hay again, on April 11, 1905, reaffirmed the judgment which he had originally expressed. Upon a further review of the same subject I have come to the conclusion that it is not advisable to reverse or change the conclusion which Mr. Hay reached.

It would seem, therefore, that the executive department is bound to make good its promise to recommend to Congress that money be appropriated to repay the ransom money, a promise which was probably relied upon by many of those who contributed of their private means to save the life of an American citizen believed to be in the gravest peril.

Accordingly I have the honor to advise that Congress be recommended to appropriate an amount sufficient to repay the contributors.

Respectfully submitted.

ELIHU ROOT.

Mr. LODGE. I have another amendment, which I send to the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Massachusetts will be stated.

Mr. LODGE. This amendment has been passed by the Senate some time ago as a bill. I send it to the desk in the form of a bill.

The SECRETARY. It is proposed to insert the following amendment:

That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $80,083.50, to be paid by the Secretary of War to the properly accredited representatives of the following named four religious orders of the Roman Catholic Church in the Philippine Islands according to the amounts set forth: The Augustinians, $43,822.50; the Dominicans, $16,666; the Recoletos, $12,615; and the Franciscans, $6,980; and that the acceptance by the properly accredited representatives of said respective religious orders of the separate amounts above specified shall be in full satisfaction of all claims for use and occupation of the property of said respective religious orders in said islands, and for damages done thereto by the military forces of the United States prior to the date, to wit, January 24, 1906, of the official report of the "Board on Church Claims," which said board, composed of John A. Hull, lieutenant-colonel, judge-advocate; Alexander O. Brodie, lieutenant-colonel, military secretary; and J. W. Moore, first lieutenant, Second Cavalry, was duly convened, August 1, 1905, at headquarters Philippine Division, in the city of Manila, in said islands, to consider and report upon said claims.

Mr. HALE. The amendment is subject to two points of order. It proposes legislation and it is also purely a claim.

The VICE-PRESIDENT. The Chair sustains the point of order.

Mr. CARTER. On behalf of the senior Senator from Minnesota [Mr. NELSON], who has been called from the Chamber, I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Montana will be stated.

The SECRETARY. On page 68, after line 22, it is proposed to insert:

To enable the Secretary of the Senate to pay for extra services rendered in transferring, rearranging, re-marking, cleaning, and refiling the papers of the Senate to Bayard C. Ryder, $700; Ansel Wold, $400; Reese R. Dutton, $300; George Payne, $50; Christopher Woodlen, $50.

The amendment was agreed to.

Mr. MILTON. I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Florida will be stated.

The SECRETARY. On page 60, after line 15, it is proposed to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys not otherwise appropriated, to C. M. Cox, of Bonifay, Holmes County, Fla., the sum of $316.25 for services rendered as United States commissioner in and for the northern district of Florida.

Mr. HALE. There is no objection to that amendment, Mr. President.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Florida [Mr. MILTON].

The amendment was agreed to.

Mr. MILTON. I offer an additional amendment, which I send to the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Florida will be stated.

The SECRETARY. On page 25, after line 20, it is proposed to insert:

That the interest of the United States in and to the land situated in Dade County, in the State of Florida—to wit, the northwest quarter of the northeast quarter of section 1, township 51, range 41 south and east—is hereby relinquished and released unto John M. Bryan, jr., of Dade County, Fla., and patent issue therefor: *Provided*, The said John M. Bryan, jr., pay $1.25 an acre for the land referred to prior to the issuance of the patent to him.

Mr. MILTON. I will state that this amendment is in the same language as a bill which has passed the Senate and has had the approval of the Committee on Appropriations.

Mr. HALE. I make the point of order on that amendment that it is general legislation.

Mr. MILTON. I hope the Senator will not make the point of order. I repeat that this is a matter which as a bill has passed this body and has had a favorable report in the other House.

Mr. HALE. Of course, it is very proper that it should go through as a bill, but not as an amendment on an appropriation bill.

The VICE-PRESIDENT. The Chair sustains the point of order.

Mr. OWEN. On page 62, after line 22, I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. On page 62, after line 22, it is proposed to insert:

That the Postmaster-General is hereby authorized and directed to pay $523.37 to Carter & Booker for rent due on the post-office at Ardmore, Okla.

Mr. HALE. Is that reported by any committee?

Mr. OWEN. It is reported from the Committee on Post-Offices and Post-Roads.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Oklahoma.

The amendment was agreed to.

Mr. McCUMBER. I offer the amendment which I send to the desk, to be inserted after line 5, on page 70.

Mr. HALE. Does the Senator want to offer the amendment before the bill is reported to the Senate?

Mr. McCUMBER. I understand the bill is in the Senate.

Mr. HALE. That has not been announced.

The bill was reported to the Senate as amended, and the amendments were concurred in.

Mr. McCUMBER. I now offer the amendment.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 70, after line 5, it is proposed to insert:

To pay to the legal representatives of the estate of Samuel Lee, deceased, to wit, Samuel Lee, Anna Lee Andrews, Clarence Lee, Robert Lee, Harry A. Lee, and Phillip Lee, heirs at law, the sum of $10,482.80, the same being in full for any claim for pay and allowances made by reason of the election of said Lee to the Forty-seventh Congress and his services therein, under the provisions of section 38, Revised Statutes of the United States of 1878.

Mr. McCUMBER. I desire to state that I have modified the amendment to conform to the rulings of the Chair, so as to bring it clearly within the exception. I am willing to let this go without any argument and take a vote of the Senate upon the question.

Mr. GALLINGER. Let us vote.

Mr. McCUMBER. It will only take a short time.

Mr. HALE. I hope the Senate will not put this matter on the bill. I am willing to take the vote of the Senate upon it.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from North Dakota. [Putting the question.] By the sound the "noes" have it, and the amendment is rejected.

Mr. McCUMBER. I demand the yeas and nays.

The yeas and nays were ordered.

Mr. DANIEL. I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 16, after line 10, it is proposed to insert:

Payment to Mount Vernon Avenue Association of Virginia: For payment to the treasurer of the Mount Vernon Avenue Association of Virginia, assignee of the State of Virginia under act of the general assembly of Virginia approved March 5, 1888, $120,000, being the principal sum, without interest, advanced by the State of Virginia to the United States by act of its general assembly December 27, 1790, toward erecting public buildings in the District of Columbia for the use of the Federal Government. Said sum of $120,000 to be in full compensation for all debts, claims, or demands on the part of the State of Virginia or of her assignee aforesaid, arising out of the aforesaid act of the general assembly of date December 27, 1790.

Payment to the State of Maryland: For payment to the State of Maryland $72,000, being the principal sum, without interest, advanced by the State of Maryland to the United States under the provisions of a joint resolution passed by the general assembly of the State of Maryland on the 19th day of December, 1790, to be used toward erecting public buildings in the District of Columbia for the use of the Federal Government. Said sum of $72,000 to be in full satisfaction and payment of any and all debts, claims, and demands upon the part of the State of Maryland arising out of the aforesaid resolution.

Mr. DANIEL. If the Senator will permit me——

Mr. HALE. I should be glad to have the bill passed. It is practically completed.

Mr. DANIEL. I wish to make an observation about the amendment.

Mr. HALE. I am at the mercy of the Senator.

Mr. DANIEL. Mr. President, if there were not so many private claims in this bill we would not have any trouble, and as I do not think this is a private claim I must be permitted occasionally to exercise my own discretion.

Mr. CLAY. I suggest to the Senator that no point of order has been made against his amendment, and perhaps the committee will accept it and it will be adopted without opposition.

Mr. DANIEL. If there is no point of order raised against it, I will not consume time.

The VICE-PRESIDENT. There is no point of order raised, as the Chair understands.

Mr. HALE. Let the Senate vote on the amendment.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Virginia.

The amendment was agreed to.

Mr. SMITH of Maryland. I understand that both paragraphs on pages 16 and 17 were accepted, the one in relation to Maryland as well as the one in relation to Virginia.

The VICE-PRESIDENT. They were both adopted together.

Mr. HALE. They were together in life and in their death they will not be divided. [Laughter.]

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

AGRICULTURAL APPROPRIATION BILL.

Mr. WARREN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 58.

That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert the following: "twelve million nine hundred

and ninety-five thousand and thirty-six dollars;" and the Senate agree to the same.

F. E. WARREN,
J. P. DOLLIVER,
H. D. MONEY,
Managers on the part of the Senate.
CHARLES F. SCOTT,
GILBERT N. HAUGEN,
JOHN LAMB,
Managers on the part of the House.

The report was agreed to.

CONDEMNED CANNON, FOREST HILL CEMETERY, SCRANTON, PA.

Mr. WARREN. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 28055) to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa., to report it without amendment. I ask for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed a concurrent resolution (H. C. Res. 76) authorizing the Speaker of the House and the President of the Senate to cancel their signatures to the bill (H. R. 21896) to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes, and that the bill be reenrolled with the correction in section 23, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice-President:

S. 8058. An act authorizing the Attorney-General to appoint as special peace officers such employees of the Alaska school service as may be named by the Secretary of the Interior;

S. 8899. An act granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war and to certain widows and dependent relatives of such soldiers and sailors;

H. R. 8661. An act for the relief of the Richmond Light Infantry Blues, of Virginia;

H. R. 24835. An act authorizing the necessary resurvey of public lands;

H. R. 26916. An act making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1910; and

H. J. Res. 262. Joint resolution extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes.

PROPOSED TIME OF MEETING TO-MOROW.

Mr. HEYBURN obtained the floor.

Mr. HALE. I ask the Senator to yield to me for a moment. I wish to move that when the Senate adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The VICE-PRESIDENT. The Senator from Maine moves that when the Senate adjourn to-day it be to meet at 11 o'clock to-morrow.

Mr. HEYBURN. I will ask the Senator, out of consideration for business that is now before the Senate, to modify the motion or withhold it. It was my intention after the bill that has been under consideration—the code bill—is laid before the Senate, to ask the Senate to take a recess until 10 o'clock to-morrow morning instead of adjourning.

Mr. HALE. I have no objection to that, but I do not think we ought to be asked to remain here this evening to consider the code bill.

Mr. HEYBURN. It is to avoid that that I am making the proposition suggested and if the Senator will kindly withhold the motion until I can get the bill up we shall obviate the necessity of the motion.

Mr. HALE. I will withhold the motion.

JUDGES FOR HAWAII, ALASKA, ETC.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution of the House of Representatives (H. C. Res. 76), which was considered by unanimous consent and agreed to:

Resolved by the House of Representatives (the Senate concurring), That the Speaker of the House and the President of the Senate be authorized to cancel their signatures to H. R. 21896, "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes," and that the bill be reenrolled, with the correction in section 23, line 2, after the word "and," strike out the word "eight" and insert "nine," so that the sentence shall read: "Section 23. That this act shall take effect and be in force on and after the 1st day of July, 1909."

JOINT COMMITTEE ON THE REVISION OF THE LAWS.

Mr. HALE. I move that when the Senate adjourns to-day it be to meet at 10 o'clock tomorrow.

Mr. LODGE. Why is that?

Mr. HALE. Because the Senator says——

Mr. BEVERIDGE. Why not take a recess?

Mr. HALE. We do not want a recess. An adjournment is better than a recess.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Idaho?

Mr. HALE. Does the Senator from Idaho object to that?

Mr. HEYBURN. I want a recess for reasons well known to those in charge of this matter.

Mr. HALE. What are the reasons?

Mr. HEYBURN. It will not inconvenience anybody to take a recess. I want this bill when taken up to have a status which it would not have under an adjournment.

Mr. HALE. The Senator's bill has been displaced by the appropriation bill.

Mr. HEYBURN. It will not remain displaced within a few moments.

Mr. HALE. He can get it up by a vote of the Senate at any time, and a recess or an adjournment does not touch that question.

Mr. BEVERIDGE. What is the objection to a recess?

Mr. FORAKER. The Senator from Idaho can move to take up the bill to-morrow morning.

Mr. HALE. I withdraw the motion and let the Senator move to take up the bill.

Mr. HEYBURN. Preliminary to that, I wish to introduce a joint resolution. I send it to the desk.

The joint resolution (S. R. 140) to create a joint committee to consider the revision and codification of the laws of the United States was read the first time by its title

Mr. HEYBURN. I ask for the present consideration of the joint resolution.

The VICE-PRESIDENT. The Senator from Idaho asks for the present consideration of the joint resolution.

Mr. LODGE. Has it been reported from a committee?

Mr. HEYBURN. No; I will say it is simply the usual joint resolution that continues the status of a joint committee of the two Houses, and were it to lapse there would be no one in charge of the vast amount of work and property in the custody of the committee.

The VICE-PRESIDENT. The Secretary will read the joint resolution for the information of the Senate.

The joint resolution was read the second time at length, as follows:

Senate joint resolution 140.

Resolved, etc., That a special joint committee be appointed, consisting of five Senators, to be appointed by the Vice-President from Members of the Sixty-first Congress, and five Members of the House of Representatives, to be appointed by the Speaker from the Members of the Sixty-first Congress, to examine, consider, and submit to Congress recommendations upon a revision and codification of laws reported by the statutory revision commission heretofore authorized to revise and codify the laws of the United States, including all laws of a general nature, permanent in character, passed since the submission to Congress on December 15, 1906, of the final report of said commission; and that the said joint committee be authorized to sit during the recess of Congress and to employ necessary assistants, to order such printing and binding done as may be required in the transaction of its business, and to incur such expense as may be deemed necessary, all such expense to be paid in equal proportions from the contingent funds of the Senate and House of Representatives.

Mr. HALE. Let the joint resolution go to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. HEYBURN. We have been passing similar resolutions at this period of each session without reference for the reason I have suggested, that the other body is interested in it.

The VICE-PRESIDENT. The resolution is referred as requested.

REVISION OF THE PENAL LAWS.

Mr. HEYBURN. I move that the Senate proceed to the consideration of the conference report on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

The motion was agreed to.

HOUR OF MEETING WEDNESDAY.

Mr. HALE. I move that when the Senate adjourn to-day it be to meet at 10 o'clock to-morrow morning.

The motion was agreed to

EXECUTIVE SESSION.

Mr. KEAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After twelve minutes spent in executive session the doors were reopened, and (at 7 o'clock and 7 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, March 3, 1909, at 10 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate March 2, 1909.

RECEIVER OF PUBLIC MONEYS.

William A. McClure, of North Dakota, to be receiver of public moneys at Dickinson, N. Dak., his term having expired. (Reappointment.)

CONSUL.

A. Donaldson Smith, of North Carolina, to be consul of the United States of class 8 at Mersine, Turkey, to fill an original vacancy.

PROMOTIONS IN THE ARMY.

COAST ARTILLERY CORPS.

First Lieut. Benjamin H. Kerfoot, Coast Artillery Corps, to be captain from February 28, 1909, vice Taylor, resigned.

Second Lieut. Thomas A. Terry, Coast Artillery Corps, to be first lieutenant from February 28, 1909, vice Kerfoot, promoted.

APPOINTMENT TO THE MARINE CORPS.

Harold C. Daniels, a citizen of Massachusetts, to be a second lieutenant in the United States Marine Corps, from the 1st day of March, 1909, to fill a vacancy existing in that grade on that date.

PROMOTIONS IN THE NAVY.

Professors of Mathematics Walter S. Harshman, Frank B. Littell, and Paul J. Dashiell, U. S. Navy, with the rank of lieutenant, to be professors of mathematics in the navy, with the rank of lieutenant-commander, from the 2d day of March, 1909.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 2, 1909.

COLLECTORS OF INTERNAL REVENUE.

Bernhard Bettman to be collector of internal revenue for the first district of Ohio.

Claude I. Parker to be collector of internal revenue for the sixth district of California.

CONSUL-GENERAL.

William W. Handley to be consul-general at Boma.

CONSUL.

Alfred K. Moe to be consul at Bordeaux, France.

PROMOTIONS IN THE ARMY.

COAST ARTILLERY CORPS.

Engineer Guy Brandon Lawrason, Coast Artillery Corps, to be second lieutenant, with rank from February 26, 1909.

First Lieut. Henry H. Scott, Coast Artillery Corps, to be captain.

Second Lieut. Louis L. Pendleton, Coast Artillery Corps, to be first lieutenant.

MEDICAL CORPS.

Lieut. Col. Louis Brechemin, Medical Corps, to be colonel.

Maj. Henry S. T. Harris, Medical Corps, to be lieutenant-colonel.

SIGNAL CORPS.

Capt. Arthur S. Cowan, Eighteenth Infantry, to the Signal Corps.

INFANTRY ARM.

Capt. Henry S. Hathaway, Signal Corps, to the Infantry Arm.

Second Lieut. Donald D. Hay, Twenty-fifth Infantry, to be first lieutenant.

Second Lieut. Philip G. Wrightson, Twentieth Infantry, to be first lieutenant.

Second Lieut. George W. Ewell, Third Infantry, to be first lieutenant.

Second Lieut. Claire R. Bennett, Eighth Infantry, to be first lieutenant.

Second Lieut. Bowers Davis, Sixth Infantry, to be first lieutenant.

CAVALRY ARM.

Maj. Hoel S. Bishop, Fourteenth Cavalry, to be lieutenant-colonel.

Capt. Willian S. Scott, Tenth Cavalry, to be major.

First Lieut. Henry W. Parker, Second Cavalry, to be captain.

PROMOTIONS IN THE NAVY.

Capt. Giles B. Harber to be a rear-admiral.

Capt. Uriah R. Harris to be a rear-admiral.

TO BE CAPTAINS IN THE NAVY.

Templin M. Potts,
Burns T. Walling,
Clifford J. Boush,
James H. Sears,
Abraham E. Culver,
Henry T. Mayo,
Charles C. Rogers,
John T. Newton,
Benjamin Tappan,
Charles F. Pond,
Walter McLean,
Washington I. Chambers,
James C. Gillmore, and
Charles A. Gove.

POSTMASTERS.

CALIFORNIA.

John M. Cheney, at Sonoma, Cal.

FLORIDA.

John B. Leffingwell, at Bradentown, Fla.
James A. Zipperer, at Madison, Fla.

INDIANA.

Ernest M. Sherburne, at Knightstown, Ind.
William L. Walters, at Fort Branch, Ind.

LOUISIANA.

Ernest Morgan, at New Roads, La.

MISSOURI.

A. H. Doermann, at Eldorado Springs, Mo.
B. P. Sigler, at Bethany, Mo.

NEVADA.

Idessa G. Moody, at Mina, Nev.

NEW YORK.

Perrin C. Bailey, at Wilson, N. Y.
Ezra C. Ferris, at Croton on Hudson, N. Y.

NORTH DAKOTA.

John K. Soule, at Cogswell, N. Dak.

OREGON.

Guy E. Tex, at Central Point, Oreg.
William C. Underwood, at Oakland, Oreg.

PENNSYLVANIA.

Levi J. Foust, at Johnstown, Pa.
George Fox, at Altoona, Pa.
Frank J. Over, at Hollidaysburg, Pa.
J. Ira Thomas, at Vintondale, Pa.

SOUTH CAROLINA.

Alfred G. Pinckney, at Williamston, S. C.

TEXAS.

T. W. Fields, at Greenville, Tex.

VIRGINIA.

Warner J. Kenderine, at Radford, Va.
Joseph E. Rangeley, at Stuart, Va.
Richard B. Wilson, at Crewe, Va.

WASHINGTON.

Walter G. Lynn, at Starbuck, Wash.
Rosseter I. Towle, at Newport, Wash.

WISCONSIN.

James E. Harris, at Prairie du Chien, Wis.
Frank O. Perry, at Shawano, Wis.

HOUSE OF REPRESENTATIVES.

TUESDAY, *March 2, 1909.*

[*Continuation of legislative day of Tuesday, February 23, 1909.*]

The recess having expired, the House was called to order at 11 o'clock a. m. by the Speaker.

COLORADO BOUNDARY LINE.

Mr. HAGGOTT. Mr. Speaker, I ask unanimous consent to address the House for four minutes on a matter of a privileged character.

The SPEAKER. The gentleman from Colorado asks unanimous consent that he may address the House for four minutes on a matter of privileged character. Is there objection?

There was no objection.

Mr. HAGGOTT. Mr. Speaker, I was not present on last Saturday when my colleague [Mr. COOK] addressed the House on a question of personal privilege, in which he made several statements that I do not believe he would have made had he been fully informed as to the facts. He took occasion to criticise the President for having vetoed Senate joint resolution 78, first session Sixtieth Congress, which affected the southern boundary line of the State of Colorado, stating that the President was not fully informed when he vetoed this resolution.

Now, the President was fully informed as to the legal and other effects of this resolution, and vetoed it after giving it careful consideration, his veto message to the Senate on December 19 last clearly stating excellent reasons for his action. It is well-established law that Congress can not legislate affecting the fixed boundary lines between States. This resolution attempted to change the established boundary line between the States of Colorado and Oklahoma and the Territory of New Mexico, taking territory from Colorado and giving it to the State of Oklahoma and to the Territory of New Mexico.

My colleague has frequently stated that the resolution, if effective, would not take an appreciable amount of territory or inhabitants from Colorado. I hold in my hand a map prepared by the Interior Department showing the established southern boundary line of that State and the line as it would be had the resolution become effective. The map shows that a strip of territory averaging from one-half mile to 1 mile in width would have been taken from the State as well as several towns and post-offices, at least five. In connection with this statement I desire to submit for publication in the RECORD various letters from citizens of southern Colorado relating to this matter.

My colleague, also, in his speech of last Saturday, reflected upon certain owners of property along the said boundary line, particularly the Rocky Mountain Coal and Iron Company, commonly referred to as the "Colorado Fuel and Iron Company," by stating that said company had been escaping the payment of taxes upon its property; and I submit for publication in the RECORD letters in refutation of this statement.

The SPEAKER. The gentleman from Colorado asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

The letters referred to are as follows:

DEPARTMENT OF THE INTERIOR,
UNITED STATES LAND OFFICE,
Durango, Colo., December 30, 1908.

Hon. WARREN A. HAGGOTT, M. C.,
Second Congressional District of Colorado, Washington, D. C.

MY DEAR SIR: Replying to your telegram, which referred to your letter of the 19th instant, I have to advise you that a strip one-half mile wide taken off the southern boundary of this land district would cut off 41,280 acres of land that is just beginning to be reclaimed and settled up.

At the present time it would affect 34 families, who are located within this strip, and would also affect several Indian allotments and put them into New Mexico. The half-mile strip across La Plata County alone would take 15,360 acres of our territory and place it in New Mexico.

I trust this is the information you desire, and shall be pleased to give you any further information that you may require.

Very truly, yours,

G. H. CHARLTON, *Register.*

DENVER, COLO., *December 30, 1908.*

Hon. W. A. HAGGOTT, *Denver, Colo.*

DEAR SIR: I wish to enter a protest in behalf of our county against the changing of the boundary line between Colorado and New Mexico. It would take from us about three or four hundred people and some valuable property, neither of which we can afford to spare.

Hoping you can prevent this injustice taking place,

I am, yours, respectfully,

A. J. NOSSAMAN, M. D.,
Pagosa Springs, Archuleta County, Colo.

DENVER, COLO., *January 19, 1909.*

Hon. WARREN A. HAGGOTT,
House of Representatives, Washington, D. C.

MY DEAR MR. HAGGOTT: I am in receipt of yours of the 13th instant. A great number of the voters at Edith are taxpayers and vote in Colorado, regardless of the fact that the post-office is called Edith, N. Mex. The way the change occurred was on account of the Carpenter survey, which showed that we were a few hundred feet south of his line, which threw us into New Mexico; without the line being confirmed by Congress the Post-Office Department took the liberty of changing the name of the post-office from Edith, Colo., to Edith, N. Mex. There has never been any change in the voting, and the voters regard the old Darling line when voting and paying taxes. They also filed on their land years ago in the land office and took it up as being in Colorado.

Very truly, yours,

E. M. BIGGS.

CONEJOS, COLO., *December 23, 1908.*

Hon. WARREN A. HAGGOTT, *Denver, Colo.*

DEAR SIR: Replying to yours of the 19th instant in re the Carpenter survey on the Colorado and New Mexico line:

At the date of the government survey of the public lands here in 1876 and 1878 and the admission of Colorado as a State, the south boundary line was established and monuments erected every mile along the entire line. The Carpenter survey commenced at the southwest corner of the State and was run toward the east; from the starting point the line runs north of the old surveyed line, and gradually bears to the north as the survey runs east, and when the new survey reached Conejos County it cut off nearly three-fourths of a mile from that county, and places the town of Los Pinos nearly all in New Mexico, also the southern end of a small settlement called La Florida. This new line will put upwards of 400 citizens now in Conejos County into New Mexico. As the line runs east through Costilla County the amount of land taken is even more, and the towns of Eastdale and Costilla will be almost entirely in New Mexico, and from what I know of those two settlements I think fully 600 inhabitants will be cut off from Colorado. As the line runs east the amount of land taken from Colorado is even more than in this county and I am advised that from Las Animas County a large number of citizens are cut off from Colorado; of this fact, however, I have no personal knowledge, but the statement is made from information and belief.

The contentions made by Senator TELLER and Representative COOK are entirely erroneous, and if they had taken the trouble to ascertain the facts they would not have been misled.

Yours, respectfully,

CHAS. M. SAMPSON.

DECEMBER 22, 1908.

Hon. WARREN A. HAGGOTT,
House of Representatives, Washington, D. C.

MY DEAR MR. HAGGOTT: In connection with the New Mexico-Colorado boundary controversy, which I note may again become active, I wish to call your attention to the Sangre de Christo grant, which I represent, and in which Mr. Moffat, Mr. C. J. Hughes, Judge Lunt, and his son-in-law, Mr. Dodge, the owner of the Gazette, and a syndicate of Boston and New York people are heavily interested.

This grant, covering 520,000 acres, extends over into New Mexico from Colorado. Near the line is situated the town of Manzanares, which does not appear upon the map, but is just above the town of Costilla. The old survey put this town of Manzanares entirely in Colorado, and also a portion of the village of Costilla; also a number of irrigating ditches which irrigated small tracts of land. The water in the Costilla River is owned by the company.

There is also a large ditch, whose priority was adjudicated some twenty years ago in Colorado, which the company owns. The headgate of this ditch is, by the old survey, in Colorado, and by the new survey would be thrown into New Mexico and the Colorado decree vitiated. If you will note the New Mexico statutes for 1905 and 1907, and particularly the act creating state engineer, you will see that the National Reclamation Service has the power to veto any filing or appropriation upon the headwaters of the Rio Grande River, and while we do not think this would give them a hold within a private grant, still, inasmuch as the law might be considered a police regulation, it would at least raise some question. The matter therefore, of maintaining the old line is one of very considerable importance to the interests which I mentioned.

I give you these facts simply to show you that it is not true, as Senator TELLER and Mr. COOK have contended, that no Colorado interests of magnitude are concerned in this survey. The Costilla River, on which our reservoir sites must in part be located, rises in Colorado, flows thence into New Mexico, thence back into Colorado, then again into New Mexico, where it empties into the Rio Grande River. You can see, therefore, the complexity of the situation, and the seriousness of the possible Reclamation Service interference.

These facts make it important for us to hold as much of the land as is possible and every drop of water possible under our own jurisdiction. I have sent a duplicate of this letter to Mr. BONYNGE.

Very truly, yours,

F. E. BROOKS.

DECEMBER 31, 1908.

Hon. GEORGE W. COOK, Hon. ROBERT W. BONYNGE,
Hon. WARREN A. HAGGOTT,
Members of Congress from Colorado.

GENTLEMEN: Repeated press dispatches from Washington have stated that it is being represented to the President and the Attorney-General that the Colorado Fuel and Iron Company has been evading taxes upon that portion of the old Maxwell land grant lying between the thirty-seventh parallel, as surveyed in 1868 by Mr. Darling, and the line lately surveyed by Mr. Carpenter, by claiming to the Colorado assessor that the land was in New Mexico and to the New Mexico assessor that it was in Colorado. This strip of land, comprising about 18 square miles, is a part of the Colorado portion of the Maxwell land grant purchased by the Rocky Mountain Coal and Iron Company from the Maxwell Land Grant Company in 1901, and has since been operated either by the Rocky Mountain Coal and Iron Company or the Colorado Fuel and Iron Company.

At the time of said purchase it was understood by the parties and by the authorities of New Mexico and Colorado that the boundary line between Colorado and New Mexico was as established by the Darling survey in 1868. The Carpenter line, where it crosses the Maxwell land grant, is about one-half mile north of the Darling line.

The Rocky Mountain Coal and Iron Company, since its purchase of the Colorado portion of the Maxwell land grant, has always claimed that the true boundary line between Colorado and New Mexico is as established by the Darling survey, and has each year since 1901 returned to the county assessor of Las Animas County, Colo., every

acre of this strip, comprising about 12,000 acres, as well as the entire 257,000 acres, for taxation, and has paid each year since 1901 the taxes upon said lands without any delinquency whatever, and it has never represented to anyone that said strip of land was in New Mexico.

The assessor of Colfax County, N. Mex., has never claimed to the Colorado Fuel and Iron Company nor the Rocky Mountain Coal and Iron Company that said strip was in New Mexico, nor has he attempted to assess said strip of land as lying in New Mexico since its purchase by the Rocky Mountain Coal and Iron Company.

Will you please communicate these facts to the President and the Attorney-General and any other persons interested.

Yours, truly,

J. F. WELBORN,
President of the Colorado Fuel and Iron Company and the Rocky Mountain Coal and Iron Company.

I, Wesley W. Taylor, county treasurer of the county of Las Animas, in the State of Colorado, do hereby certify that since the year 1901 the Rocky Mountain Coal and Iron Company, a Colorado corporation, has been assessed for and is the owner of that portion of the Maxwell land grant lying in the State of Colorado, comprising about 250,000 acres of land; that every acre of said land grant in Colorado lying north of what is known as the "Darling survey," made in 1868, has been assessed and the taxes thereon paid promptly when due, without any delinquency whatever, by the Rocky Mountain Coal and Iron Company; that the boundary line between Colorado and New Mexico, where it crosses the Maxwell land grant as established by the Darling survey, is about one-half mile south of what is known as the "Carpenter survey;" that the Rocky Mountain Coal and Iron Company since the year 1901, when it became the owner of the same, has paid taxes upon this strip of land, comprising over 11,000 acres, which would be in New Mexico, according to the Carpenter survey.

Dated, December 28, 1908.

W. W. TAYLOR,
County Treasurer, Las Animas County, Colo.

Mr. HAGGOTT. My colleague [Mr. COOK] presented for publication in the RECORD a letter from the Postmaster-General stating that but one post-office, Edith, Archuleta County, had been transferred from Colorado to New Mexico. It is true that but one post-office had been changed on account of the Carpenter survey, but if the resolution had become effective several others would have been changed. However, since the resolution was vetoed, the post-office of Edith has been restored to Colorado, and I submit in confirmation of this statement the following letters from the First Assistant Postmaster-General:

POST-OFFICE DEPARTMENT,
OFFICE OF FIRST ASSISTANT POSTMASTER-GENERAL,
Washington January 30, 1909.

Hon. WARREN A. HAGGOTT,
House of Representatives.

MY DEAR SIR: Your letter of the 27th instant, in which you state that Edith, N. Mex., is actually located in Archuleta County, Colo., has been received.

The postal-route map, and in fact all the records of the department, locate the office in question in Rio Arriba County, N. Mex. However, in view of your statement the matter has been taken up with the Fourth Assistant Postmaster-General (Division of Topography), and should it be found that the office is actually in Colorada, the proper corrections will be made.

Very respectfully,

C. P. GRANDFIELD,
First Assistant Postmaster-General.

POST-OFFICE DEPARTMENT,
OFFICE OF FIRST ASSISTANT POSTMASTER-GENERAL,
Washington, February 6, 1909.

Hon. WARREN A. HAGGOTT,
House of Representatives.

MY DEAR SIR: With further reference to your letter of January 27, I beg to advise you that an order has been made changing the location of the post-office at Edith, Rio Arriba County, N. Mex., into Archuleta County, Colo., in order to correct the records of the department.

Very truly, yours,

C. P. GRANDFIELD,
First Assistant Postmaster-General.

During his term as Congressman, the abuse in which my colleague [Mr. COOK] has indulged against our President is entirely unwarranted and inexcusable, and the people whom he represents in this House most certainly disapprove it. No President has ever occupied a warmer and more fixed place in the hearts of his countrymen than Theodore Roosevelt, and in no State is he more universally loved than in Colorado; and when he retires from the presidency the good will and love of Colorado will follow him.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 28245. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes.

The message also announced that the Senate had passed without amendment the following resolution:

House concurrent resolution 75.

Resolved by the House of Representatives (the Senate concurring), That the President be requested to return to the House of Representatives H. R. 21896, Sixtieth Congress, "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes."

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 6074) entitled "An act to provide for holding sessions of the United States circuit and district courts at Springfield, Mass."

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes on the amendments of the Senate to the bill (H. R. 24835) authorizing the necessary resurvey of public lands.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public-building acts, and for other purposes, disagreed to by the House of Representatives, had argeed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SCOTT, Mr. MCCUMBER, and Mr. CULBERSON as the conferees on the part of the Senate.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SCOTT, Mr. HEMENWAY, and Mr. FOSTER as the conferees on the part of the Senate.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 9351. An act to authorize the Postmaster-General to settle the accounts of Carter and Booker, and for other purposes;

S. 9191. An act to amend an act entitled "An act to divide the judicial district of Nebraska into divisions and to provide for an additional district judge in said district;"

S. 8929. An act withdrawing from entry and sale and granting unto the city of Los Angeles, in the State of California, certain lands therein described;

S. 8324. An act for the relief of E. C. Mansfield;

S. 4434. An act to amend an act entitled "An act to authorize the Secretary of the Navy to loan naval equipment to certain military schools," approved March 3, 1901;

S. 4094. An act to amend paragraph 43 of an act entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes," approved July 1, 1902; and

S. 185. An act granting pensions to volunteer army nurses of the civil war.

The message also announced that the Senate had passed without amendment joint resolutions and bills of the following titles:

H. J. Res. 263. Joint resolution to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications;

H. J. Res. 262. Joint resolution extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes;

H. R. 27926. An act to authorize the Chicago, Lake Shore, and Eastern Railway Company to construct a bridge across the Calumet River, in the State of Indiana;

H. R. 8661. An act for the relief of the Richmond Light Infantry Blues, of Virginia; and

H. R. 1622. An act for the relief of the estate of William J. Cussen.

The message also announced that the Senate had passed with amendment bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 28304. An act granting certain obsolete ordnance for ornamental purposes.

DONATION OF LAND BY WOMAN'S RELIEF CORPS.

Mr. HULL of Iowa. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 6971) authorizing the acceptance by the United States Government from the Woman's Relief Corps, auxiliary to the Grand Army of the Republic, of a proposed gift of Andersonville Prison land, in the State of Georgia.

Mr. MANN. Mr. Speaker, for the present I will object.

ASSAY OFFICE AT LOS ANGELES.

Mr. MCLACHLAN of California. Mr. Speaker, I ask unanimous consent to discharge the Committee of the Whole House on the state of the Union from further consideration of the bill (S. 5727) to establish an assay office at Los Angeles, State of California.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and required to establish an assay office of the United States

at Los Angeles, in the State of California; said assay office to be conducted under the provisions of the act entitled "An act revising and amending the laws relating to the mints and assay offices and the coinage of the United States," approved February 12, 1873; that the officers of the assay office shall be an assayer in charge, at a salary of $2,500 per annum, who shall also perform the duties of melter; assayer, at a salary of $1,800 per annum; chief clerk, at a salary of $1,500 per annum; and the Secretary of the Treasury is hereby authorized to rent a suitable building for the use of said assay office, and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $20,000 for salary of assayer in charge, chief clerk, and wages of workmen, rent, and contingent expenses.

The following committee amendments were read:

Line 1, page 2, strike out the words "chief clerk" and insert "cashier."

Line 2, page 2, after the word "annum," insert the following: "who shall perform the duties of the assayer in charge in his absence."

Line 8, page 2, strike out the words "chief clerk" and insert "assayer and cashier."

Mr. MADDEN. Mr. Speaker, reserving the right to object, I would like to know if this is the establishment of a new office, how much it is going to cost, and the necessity for it.

Mr. McLACHLAN of California. Los Angeles has become a strong center of mining interests. California produces $20,000,000 in gold annually. Since the building of the Salt Lake road it makes Nevada tributary to Los Angeles. Arizona and New Mexico are also tributary to that city.

Mr. MADDEN. How much will it cost?

Mr. MACON. Mr. Speaker, I would like to have order. I want to hear this discussion, for I am very anxious to see whether I am going to give my consent or not.

Mr. McLACHLAN of California. As I was saying, this is a bill to establish an assay office in the city of Los Angeles. The production of gold in California is about $20,000,000 a year. Los Angeles is the center for the mining industries of Nevada since the railroad to Salt Lake was built. Nearly all the mining interests in Arizona and New Mexico center there. Los Angeles is 500 miles south of San Francisco, where there is a mint, and I know of no place in the United States where an assay office of this kind would be of greater advantage than it would in Los Angeles.

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. McLACHLAN of California. Certainly.

Mr. STEPHENS of Texas. How many assay offices are there in the United States at this time?

Mr. McLACHLAN of California. I can not tell you.

Mr. STEPHENS of Texas. Where is this assay office proposed to be located?

Mr. McLACHLAN of California. In Los Angeles.

Mr. STEPHENS of Texas. Is it proposed to assay for the Government or for private individuals?

Mr. McLACHLAN of California. Both.

Mr. STEPHENS of Texas. Mr. Speaker, I will state to the gentleman that a few years ago I endeavored to establish at El Paso, Tex., an office of the same character, and failed; and I want to know whether the policy of the Government has been changed since that time or not; and if so, in what respect has it been changed?

Mr. PAYNE. I would like to know, Mr. Speaker, whether this is another assay office?

Mr. McLACHLAN of California. Yes.

Mr. PAYNE. Then I shall object.

Mr. McLACHLAN of California. Mr. Speaker, then I move to suspend the rules, discharge the Committee of the Whole House from the further consideration of the bill, agree to the amendments, and pass the bill.

Mr. PAYNE. And on that I demand a second.

The SPEAKER. A second is ordered under the rule, and the gentleman from California is entitled to twenty minutes and the gentleman from New York to twenty minutes.

Mr. McLACHLAN of California. Mr. Speaker, I do not know that there is anything further that I can say in behalf of this bill than what I have already stated.

Mr. TAWNEY. I would like to have the gentleman from California state the necessity for it. I was not present when he made his statement. We have more assay offices now than we have any use for. I would like to know the necessity for increasing the number.

Mr. McLACHLAN of California. Mr. Speaker, the necessity for this office, as I said before—and the gentleman from Minnesota [Mr. TAWNEY] was not present at that time—is this: Los Angeles has become a great mining center. There is a large amount of mining territory surrounding that city which is naturally tributary to it. As is well known, this city is 500 miles south of the city of San Francisco. Since the railroad was built from Salt Lake to Los Angeles it makes Nevada directly tributary to Los Angeles, and that territory contains many great mining interests.

Nearly all the mining interests in New Mexico and Arizona are also tributary to this city. The mining interests of Mexico are also tributary to it, because of the railways from Los Angeles connecting with cities in that Republic. I know of no place in the United States where an office of this kind would be more beneficial to the people and to the Government itself than the city of Los Angeles. I sincerely hope the bill may pass.

Mr. STEPHENS of Texas. Can the gentleman inform me whether or not there is an office of this character in either of the Territories of Arizona or New Mexico?

Mr. McLACHLAN of California. There is not.

Mr. STEPHENS of Texas. Then, is not that territory tributary to this city?

Mr. McLACHLAN of California. Yes.

Mr. STEPHENS of Texas. And would not the men who prospect and mine in these Territories and who open and develop the mines and that country generally be greatly benefited by it?

Mr. McLACHLAN of California. It is all tributary to the city of Los Angeles by reason of the number of railroad lines running through that section and connecting with Los Angeles. The Southern Pacific runs to Los Angeles through New Mexico and Arizona, and also the Santa Fe.

Mr. COX of Indiana. Is there an assay office in San Francisco?

Mr. McLACHLAN of California. Yes; the mint is there.

Mr. COX of Indiana. I understand the gentleman's bill proposes to establish an assay office where assaying may be done for both the Government and private individuals.

Mr. McLACHLAN of California. Yes.

Mr. COX of Indiana. What is the total expense to be borne by the Government?

Mr. McLACHLAN of California. There will be some expense each year after the establishment of the office, because the Government has to have its own assayer and other minor officials in charge.

Mr. LIVINGSTON. The expense will be anywhere from forty to sixty thousand dollars.

Mr. COX of Indiana. I want to know whether the expense will be borne by the Government partly and partly by private individuals.

Mr. McLACHLAN of California. Both; but for the most by the Government.

Mr. COX of Indiana. In the judgment of the gentleman, what will be the cost to the Government?

Mr. McLACHLAN of California. It will cost about $20,000 to install this office, and the annual expense thereafter will be between three and four thousand dollars.

Mr. LIVINGSTON. I desire to state, Mr. Speaker, that there will not be a cent of that expense paid by private individuals and not a cent by the State of California.

Mr. McLACHLAN of California. The gentleman may be correct, but it will be conducted as all other assay offices are.

Mr. LIVINGSTON. I know I am correct.

Mr. TAWNEY. Will the gentleman please inform the House what the functions of an assay office are, and the relation of those functions to the Government and to the owners of mines?

Mr. McLACHLAN of California. The duty, as I understand it, of an assay office is to assay all bullion brought to the office, to determine its value and fineness, and so forth.

Mr. COX of Indiana. I would like to ask the gentleman another question. Can he tell us how much it will cost the Government a year?

Mr. McLACHLAN of California. In the neighborhood of three or four thousand dollars.

Mr. PAYNE. Mr. Speaker, I yield to the gentleman from Minnesota as much time as he desires.

Mr. TAWNEY. Mr. Speaker, I desire to call the attention of the House to the fact that this is simply adding another unnecessary and additional expense to the Government of the United States.

Mr. CLARK of Missouri. How much will it cost?

Mr. TAWNEY. There is no telling what it will cost. There is one assayer in charge at a salary of $2,500 a year, who shall also perform the duties of melter; an assayer at a salary of $1,800 a year; a cashier at the salary of $1,500—

Who shall perform the duties of the assayer in charge in his absence; and the Secretary of the Treasury is hereby authorized to rent a suitable building for the use of said assay office, and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $20,000 for salary of assayer in charge, assayer, and cashier, and wages of workmen, rent, and contingent expenses.

That is substantially what we did at the last session of Congress for Utah, and at this session of Congress we were obliged to increase the personnel, although the assay office has just recently begun operations. Now, the object or the prime benefit

of this provision for the assay office is to save the expense to the mine owners who have their assays made, and then the bullion is shipped from the assay office to the mint at the expense of the Government instead of the mine owners shipping their bullion to the mints themselves. That is the only purpose it serves. We have an assay office at St. Louis, we have an assay office at Carson City, Nev., we have an assay office at Salt Lake, Utah, we have one in California, we have one in Seattle, we have one in some place in North Carolina, and we have another one in New Orleans. In all, we have eight and need only about two. We have one in New York which is of value and benefit to the Government, and we have one also in Philadelphia in connection with the mint, but we have all the assay offices we need and more than we have work for them to do to-day. Congress has repeatedly attempted to abolish a great number of these assay offices, but because of the "pull" of the local officials in these assay offices Congress has been unable to accomplish it. It is conceded that many of these assay offices could be abolished without detriment to the public or without detriment to the Government.

Mr. SLAYDEN. What amount of assaying does the office in North Carolina do?

Mr. TAWNEY. If the gentleman will turn to the report of the Director of the Mint, he will find exactly how much is assayed at all these different offices.

Mr. STEPHENS of Texas. Will the gentleman allow me on that point?

Mr. TAWNEY. Yes.

Mr. STEPHENS of Texas. I desire to ask whether or not this creation and running of assay offices by the Government is not on all fours with the creation and maintenance of soil surveys over the United States for the benefit of the farmer; and if so, why should not the miners have the same protection and the same conveniences for finding out the value of their ores as the farmers of the country have to find out the value of their soils for the production of crops?

Mr. TAWNEY. Well, this does not affect miners at all.

Mr. STEPHENS of Texas. It certainly does; it goes directly to their benefit.

Mr. TAWNEY. This is for the benefit of the mine owner. This saves a large part of the cost of the transportation of the bullion from the smelter to the mint.

Mr. STEPHENS of Texas. Will the gentleman permit me to state that the prospectors of this country are usually poor miners and pioneers, who find and open up the mines and then the capitalist develops them afterwards?

Mr. TAWNEY. Not at all; he sells his ore to the smelter.

Mr. STEPHENS of Texas. Certainly.

Mr. TAWNEY. The smelter converts the ore into bullion and transports it to the mint at its own expense. This is merely to save the mine owners a large part of that expense. If the mine is located in the vicinity of a smelter, then it is the mine owner who gets that benefit.

Mr. STEPHENS of Texas. If the gentleman will permit me to state, I will say that the prospector who finds the mine has the same right to have his ore assayed as the owner of soil has to have his farm soils assayed at government expense.

Mr. TAWNEY. Well, but the mine owner does not have his ore assayed at the government expense, but——

Mr. STEPHENS of Texas. I understood so from the gentleman who made the statement——

Mr. TAWNEY. They ship their ore. The gentleman knows as well as other Members of the House that they ship their ore to the smelter. It is the smelter, the people who operate the smelter, who buy his ore and smelt it for him, and then it has to be transported to the mint.

Mr. STEPHENS of Texas. I think that the gentleman is utterly at fault. These assay offices are for the benefit of the prospectors and small mine owners as well as for the men who work the mines, and if these assay offices were established the prospector and miner could have their ores assayed so as to ascertain whether their discoveries are of any value, and they ought to get the benefit of these government assay offices.

Mr. TAWNEY. How ridiculous is that proposition. The benefit of these assay offices——

Mr. STEPHENS of Texas. There are no less than 50,000 poor men prospecting for and working mines in a small way in the mountains of the West.

Mr. TAWNEY. It is not because of the want of assay offices that they do not succeed.

Mr. STEPHENS of Texas. The prospectors and small mine owners are the men who have produced many of the millions of tons of ore that go to your smelters. These men were the pioneers in the mining country, and they will be greatly benefited by the passage of this bill; but they do not seem to have many friends upon this floor, and this is the reason I speak in their behalf. [Applause.]

Mr. TAWNEY. I simply wish to state that this is an absolutely unnecessary expenditure, and when we are facing, as we are to-day, the enormous deficit that we all know exists in our revenues, and in view of the fact that at this session of Congress the appropriations will exceed the appropriations made at any session of Congress in the history of the Government, I can not see any justification for adding to these appropriations an appropriation for unnecessary expenditures.

Mr. McLACHLAN of California. I yield five minutes to the gentleman from California [Mr. SMITH].

Mr. SMITH of California. It is very well known that this Congress is deeply in love with the idea of economy. Until the last few days I thought that word had been lost out of our language. I do not remember to have heard it for some years.

Mr. TAWNEY. Then the gentleman was not attending the last session of the last Congress or the last session of this Congress.

Mr. SMITH of California. I have an impression that the word cropped out a little during the last week of the last session, but it does not seem to come to the surface oftener than about one week in a year.

This is a proposition to assist in the production of original wealth by encouraging the men who take the most hazardous chances in the world in prospecting over the arid regions of the Southwest, where a man's very life is in danger when he goes over those desert hills and mountains in search of gold. Los Angeles has come forward rapidly as the center of the great mining industry, and it is entirely due to the mining interests of the Southwest that all advantages possible be given to the prospectors to determine the value of the ore which they discover and to encourage its development and production. The figures submitted by the chairman of the Appropriation Committee are infinitesimal in proportion to other new enterprises that we have set upon foot. Even within the last twenty-four hours there have been proceedings begun which look to the expenditure of millions of dollars of money, and here we hesitate on a trifle of a few dollars only, which will result in bringing new gold to the currency of the world vastly in excess of any cost there may be.

Mr. GOULDEN. Will the gentleman yield for a question?

Mr. SMITH of California. Certainly.

Mr. GOULDEN. What will probably be the amount of business at this point if this assay office were established? How many people would be benefited by it?

Mr. SMITH of California. I can only say in a general way that it will cover the great mining districts of Arizona, New Mexico, southern Nevada, and southern California, where the greatest gold production in the United States is now coming from, and where the hills are full of prospectors; and they ought to be encouraged by this trifling sum of a few dollars.

Mr. GOULDEN. Will the gentleman permit another question?

Mr. SMITH of California. Certainly.

Mr. GOULDEN. About what number of men are engaged in mining operations and prospecting in the districts to be benefited by the establishment of this assay office, approximately?

Mr. SMITH of California. That would be something of a guess, but it runs into the thousands. There are many thousands of men engaged in this business.

Mr. GOULDEN. What will be the total expense of the establishment of this assay office?

Mr. SMITH of California. The chairman of the committee was giving it a few minutes ago. It is trifling—a matter of a few thousand dollars. I did not catch his figures exactly.

Mr. KNOWLAND. If the gentleman will just yield for a moment, I think I can answer his question. The State of California produces $18,000,000 of gold per annum, and about one-third of that is produced in the districts tributary to Los Angeles.

Mr. GOULDEN. It would be a convenience and benefit to those people?

Mr. TAWNEY. One question, if the gentleman will permit. Is it not a fact that the principal result of the establishment of an assay office is to transfer the cost of transporting the bullion from the smelter to the mint, from the owner of the bullion to the Government of the United States?

Mr. SMITH of California. I do not understand that this has anything to do with the mint.

Mr. TAWNEY. That is exactly what it is.

Mr. SMITH of California. It is an assay office and not a mint.

Mr. TAWNEY. You get your assay and send your bullion to the mint. After the assay the expense of transportation falls

upon the Government. Now the expense of transportation is paid by the owner of the bullion.

Mr. GOULDEN. Will the gentleman permit me to ask him a question? Is it a fact that the prospectors and those engaged in the development of that industry would be benefited by the office?

Mr. TAWNEY. Not in the least.

Mr. MANN. That is a matter of opinion, and not of fact. [Cries of "Vote!"]

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. TAWNEY. Division!

The House divided; and there were—ayes 75, noes 102.

Mr. McLACHLAN of California. I demand the yeas and nays.

The question was taken on ordering the yeas and nays.

The SPEAKER. Eleven have arisen; not a sufficient number; the yeas and nays are refused; the noes have it, and the motion is rejected.

OCEAN MAIL.

Mr. OVERSTREET. Mr. Speaker, I move to suspend the rules and pass Senate bill 28; and pending that, I ask unanimous consent that there may be general debate on the bill for four hours and a half, one-half of the time to be controlled by the gentleman from Tennessee [Mr. MOON] and one-half to be controlled by myself. I would ask the gentleman from Tennessee if that is agreeable?

Mr. MADDEN. Will the gentleman yield to me for a question?

Mr. OVERSTREET. I will.

Mr. MADDEN. I would like to ask whether, on this important measure, there will be opportunity for submitting amendments?

Mr. OVERSTREET. Not a motion to suspend the rules.

Mr. MADDEN. Is there not some way in which it can be considered that there will be, so that Members of the House will have an opportunity to offer amendments?

Mr. OVERSTREET. I will say to the gentleman that this late in the day, if the bill should be amended it could not be corrected in the Senate.

Mr. MADDEN. Is there not some way by which Members of the House who would like to vote to increase the facilities for the development of business with South American territory could have a vote on the South American proposition alone?

Mr. OVERSTREET. I can only answer the gentleman as I did at first. I have consulted with the gentlemen who have had charge of the measure on both sides of the Chamber, and it is agreed that if the bill should be amended at all it would be too late to have an agreement with the Senate, and therefore we may just as well vote on the bill.

Mr. MADDEN. I am very sorry that the gentleman in charge of the bill did not think of that a month ago, so that we could have had a month to think over it.

Mr. OVERSTREET. I yield to the gentleman from Tennessee.

Mr. MOON of Tennessee. Mr. Speaker, we would be very glad on this side if there could be more time for debate; we would be very much pleased to consider the bill on its merits; but we realize the situation, the lateness of the session, and the desire of gentlemen interested to have a vote upon the main question; and therefore, so far as we are concerned, we will be satisfied with four hours and a half debate and that the previous question be considered as ordered on the bill.

The SPEAKER. The gentleman from Indiana asks that there be four and a half hours of general debate——

Mr. MANN. Reserving the right to object——

Mr. OVERSTREET. I yield to the gentleman.

Mr. MANN. What time does the gentleman think we would have a vote?

Mr. OVERSTREET. There would be four hours and a half of debate under this agreement. That will give us a vote by 5 o'clock or sooner.

Mr. MANN. The reason I ask that question is because Senate bills on the Private Calendar may be considered under certain conditions. While I have no interest in a bill——

Mr. OVERSTREET. Mr. Speaker, if I can have order, I will modify my request.

The SPEAKER. The House will be in order.

Mr. OVERSTREET. I modify my request for unanimous consent that debate shall not interfere with conference reports, Senate bills——

Mr. MANN. Well, of course, I would not expect to take up the bill that I referred to—a Senate bill on the Private Calendar—until after the ship subsidy is disposed of; but if it is disposed of at any time, the House could remain in session and dispose of other bills.

Mr. STEENERSON. I want to know if this will interfere with the arrangement for the consideration of Senate bills on the Private Calendar?

Mr. LLOYD. Mr. Speaker, it is impossible to hear.

The SPEAKER. Senate bills on the Private Calendar are in order, but there is other business in order. The Chair can not tell what may be the pleasure of the House; but a motion to suspend the rules would evidently take precedence of other business. Now, then, will the gentleman restate his proposition?

Mr. OVERSTREET. I will restate my request.

The SPEAKER. The gentleman from Indiana asks that pending this motion there shall be four and a half hours for general debate, one-half to be controlled by himself, one-half by the gentleman from Tennessee [Mr. MOON], and that this order for debate shall not interfere with conference reports and Senate bills on the House Calendar——

Mr. BURTON of Ohio. A parliamentary inquiry.

The SPEAKER (continuing). Or conference reports which may intervene without reducing the time for debate. Is there objection?

Mr. MANN. Is this to be confined to the bill?

Mr. OVERSTREET. That is the understanding.

The SPEAKER. The Chair hears no objection. The gentleman from Indiana moves to suspend the rules, discharge the Committee of the Whole House on the state of the Union from the consideration of Senate bill 28, and pass the same. Is a second demanded?

Mr. MOON of Tennessee. I demand a second.

The SPEAKER. Under the rule a second is ordered.

Mr. OVERSTREET. Let the bill be read.

The bill was read, as follows:

A bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

Be it enacted, etc., That the Postmaster-General is hereby authorized to pay for ocean mail service under the act of March 3, 1891, in vessels of the second class on routes to South America, to the Philippines, to Japan, to China, and to Australasia, 4,000 miles or more in length, outward voyage, at a rate per mile not exceeding the rate applicable to vessels of the first class as provided in said act, and in vessels of the third class on said routes, at a rate per mile not exceeding the rate applicable to vessels of the second class, as provided in said act: *Provided*, That if no contract is made under the provisions of this act for a line of ships between a port on the Atlantic coast south of Cape Charles and South American ports, the Postmaster-General shall, provided two or more lines are established from North Atlantic ports, require that one of said lines shall, upon each outward and homeward voyage, touch at at least two ports on the Atlantic coast south of Cape Charles, regard being had in the selection of such ports of call to geographical location and to the volume of the export and import business of the ports so selected: *Provided further*, That the total expenditure for foreign mail service in any one year shall not exceed the estimated revenue therefrom for that year.

RESURVEY OF THE PUBLIC LANDS.

Mr. MONDELL. Mr. Speaker, I call up the conference report on the bill (H. R. 24835) providing for the necessary resurvey of the public lands, and move the adoption of the same. I ask that the statement be read in lieu of the report.

The SPEAKER. The gentleman from Wyoming calls up a conference report on the bill indicated by him, and asks that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24835) authorizing the necessary resurvey of public lands, having met, after full and free conference have agreed to recommend and to recommend to their respective Houses as follows:

That the Senate recede from its amendment in line 12 striking out the word "twenty" and inserting the word "five."

That the House recede from its disagreement to the amendment of the Senate in line 4 striking out the words "in the manner," and inserting "as he may deem wise under the rectangular system;" and agree to the same.

F. W. MONDELL,
A. J. VOLSTEAD,
JOS. T. ROBINSON,
Managers on the part of the House.

REED SMOOT,
FRANK P. FLINT,
J. H. BANKHEAD,
Managers on the part of the Senate.

The statement was read, as follows:

STATEMENT.

The amendment of the Senate in line 4 authorizes the Secretary to execute the resurveys or retracements in such manner as he may deem wise instead of following, in every case, the system of contracts and per diem now provided by law, and the change is believed to be in the interest of economy and the speedy adjustment of disputes and conflicts.

The amendment of the Senate in line 12 reduced the amount of the annual appropriation for surveys and resurveys which might be used for the resurveys and retracements authorized by the act from 20 to 5 per cent. The agreement restores the per cent provided for in the House bill, as it is believed that a smaller amount would not be adequate at all times.

F. W. MONDELL,
A. J. VOLSTEAD,
JOS. T. ROBINSON,
Managers on the part of the House.

Mr. MONDELL. I move the adoption of the conference report.

The conference report was agreed to.

OCEAN MAIL.

The House resumed consideration of the bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

Mr. OVERSTREET. Mr. Speaker, if I may have the attention of the House, I will undertake in a very few minutes, as clearly as I am able, to explain the provisions and effect of this measure.

On March 3, 1891, President Harrison signed what is known as the "ocean mail bill." That bill provided for contracts by the Postmaster-General for vessels which had been constructed with the approval and subject to the inspection of the Secretary of the Navy to carry the mails under such limitations of speed and requirements generally as to the construction of vessels as were set forth in detail in that act. The principle, therefore, of the Government paying subsidies or extra allowances for carrying the mails was established by the Government on March 3, 1891. That principle is not changed in any respect by the terms of the pending bill.

This bill makes three changes, and three only, in the original act. Briefly, the act of 1891 authorized contracts at the discretion of the Postmaster-General with four classes of vessels—first, second, third, and fourth. The first-class vessels were required to be constructed of steel or iron, of a capacity of 8,000 tons; and if they maintained a speed of 20 knots an hour, were permitted to receive $4 a mile per voyage, outgoing.

Vessels of the second class are required to have a tonnage of 5,000 tons, to maintain a speed of 16 knots an hour, and to be constructed of steel or iron, with the approval and subject to the inspection of the Navy Department. They receive a bonus of $2 a mile, outgoing voyage.

Vessels of the third class are required to be constructed under the same limitations as to material and inspection by the Navy Department and to have a tonnage of 2,500 tons and to maintain a speed of 14 knots an hour, and they receive a bonus of $1 a mile outgoing. Vessels of the fourth class are permitted under the same requirements of construction, except that they may be built of steel or wood, and receive 66⅔ cents a mile outgoing voyage and maintain a speed of 12 knots an hour.

This bill proposes no change whatever as to the requirements of construction or inspection by the Navy Department, nor as to speed, except that we are to give the second-class vessels (those now enjoying $2 a mile outgoing voyage) $4 a mile, and vessels of the third class, instead of $1 a mile we grant $2 a mile outgoing. There is no change in the compensation of vessels of either the first or fourth class.

All of the vessels specified in the original act (and there is no change as to this in the pending bill) are, under the terms of the contract, to be subject to the use of the navy in time of war as auxiliary aids to the United States Navy.

Under the terms of this bill there are now five contracts, one from New York to Venezuela, divided into two services. Under this bill the first-class vessels would not be affected, and there is now one contract with first-class vessels. The fourth class will not be affected, and there are now two contracts of the fourth class. There are, therefore, remaining but three of the present contracts that will be affected at all by the pending bill. We have all of these contracts at present in operation on the Atlantic coast side, with the exception of the one from San Francisco to Tahiti. That is the only contract under the ocean mail act of 1891 now in operation on the Pacific coast.

Last spring I predicted that if the bill which was then before the House should fail the Oceanic Steamship Company would be compelled to surrender its contract, as it had become bankrupt. That prophecy has come true. That contract has since been annulled, and there is now but the one contract in operation on the Pacific coast.

Mr. MADDEN. Will the gentleman yield?

Mr. OVERSTREET. Yes.

Mr. MADDEN. This bill reduces the speed from 20 knots to 16 knots and increases the compensation.

Mr. OVERSTREET. It increases the pay of the second class, which now maintains 16 knots, and it can receive the same pay as a vessel maintaining 20 knots.

Mr. MADDEN. The bill also provides that in the future vessels making 14 knots will be paid the same as vessels now making 16 knots.

Mr. OVERSTREET. No. The only change in the rate is in the second and third classes; second-class vessels must make 16 knots and third, 14 knots. These changes will be that the vessel with 16-knot speed will get the same pay as the first class, and those making 14 knots will get the same pay as the second class.

Mr. MADDEN. The gentleman talks about a number of contracts in existence.

Mr. OVERSTREET. Yes.

Mr. MADDEN. And will the gentleman tell us how many vessels there are under contract, where they run from and to, and how much the modification of the contracts in this bill will cost?

Mr. OVERSTREET. If the gentleman will pardon me, I think my analysis will convey the information. It only takes up more time to interrupt me, and I mean no disrespect to the gentleman.

Mr. MADDEN. The gentleman was talking about contracts, and it was so indefinite——

Mr. OVERSTREET. I shall come to that immediately.

Now, Mr. Speaker, I speak at all times with great difficulty, and Members who desire to hear me will have to come nearer, for I shall not speak against all of this confusion.

The SPEAKER. The Chair desires to say that this disorder comes from consultation and conversation. Hereafter the Chair will halt the gentleman who is addressing the House, and we will await order. [Applause.]

Mr. OVERSTREET. Mr. Speaker, I repeat that I shall not raise my voice, and I mean no disrespect, but it is impossible for me, in my physical condition, to speak against so much confusion. Members who desire to hear me will oblige me by coming nearer if the confusion continues.

There are, as I stated a moment ago, five contracts: One with New York under the second-class vessels from Habana to New York, the *Havana*, the *Morro Castle*, the *Saratoga*, the *Esperanza*, the *Merida*, and the *Mexico*, which run from Habana and Vera Cruz. They are all 17 and 18 knot vessels, and are under contract now. The full rate is $1 a mile, outgoing voyage, although they are entitled to $2 a mile. In that particular field so much competition exists that the Postmaster-General has been able to reduce the maximum allowance under the law. The aggregate for the last fiscal year for this particular contract was $201,916.

Another contract with the "Red D" is the *Philadelphia*, the *Caracas*, and the *Maracaibo* and the *Zulia*, from New York to Venezuela, touching at Porto Rico. They are 12-knot vessels, and they operate under the third class. The *Admiral Dewey*, the *Admiral Farragut*, and the *Admiral Schley* and *Admiral Sampson* are 14-knot vessels from Philadelphia and Boston to Jamaica. They receive 66⅔ cents for outgoing voyage.

The first-class vessels operating under the International Mercantile Marine Company are the *St. Louis*, the *St. Paul*, the *New York*, the *Philadelphia*, from New York to Southampton and Cherbourg, all 20-knot vessels, and receive $4 per mile, outgoing voyage.

The total of all these contracts, including the *Tahiti*, on the Pacific coast, aggregates $1,185,149. During the past seventeen years, from the beginning of the first contract under the ocean mail service, in 1871, the Government has paid under these contracts $16,179,127.85, or an average each year of $951,713.99.

During the entire seventeen years of the operation of this law the average has been less than $1,000,000 per year. This bill proposes the change in rates in order to stimulate the mail facilities, to encourage the shipping interests, to improve the trade relations with South America and the Orient, and to afford a valuable auxiliary to the navy in time of war.

It is shown that within seventeen years the Government has not been able to encourage the shipping interests sufficiently to promote competition in the ocean carrying trade. The competition of foreign governments has been so severe that it has

been impossible for the little assistance the American marine has received to stand out against the tremendous pay which the foreign governments have been able to give their own vessels; and therefore we propose, without changing the principle, without any backward step in the policy inaugurated seventeen years ago, to promote the trade of this country, to stimulate the shipping interests in building additional ships, and to encourage the Government in securing auxiliaries for the navy, which we have seen demonstrated to be of such great necessity.

While we have on an average each year paid approximately $1,000,000, the foreign countries with whom our trade is forced to compete average $28,000,000 a year. Great Britain pays to her shipping interests in subsidies between $7,000,000 and $8,000,000 a year. France pays $8,000,000. Governments like Belgium, Sweden, and Norway, and Italy all contribute to the aid of the shipping of their countries, and it all aggregates, as I say, $28,000,000, which is paid in assistance financially to the shipping concerns, as against the paltry $1,000,000 which the United States has to bear. We appropriate annually $1,000,000,000 for the maintenance of this Government, while we give to the trade shipping interests a paltry one-tenth of 1 per cent, as against the tremendous benefits which our competitors receive.

In the second place, in this bill we have a check against possible extravagance, and in aid of economy, to satisfy an opinion which is entitled to respect. We compel the Postmaster-General to expend no greater sum in any one year for this service than the estimated revenue of the foreign mail service for the next fiscal year. While we spend in these bonuses an average of about $1,000,000, we have enjoyed a profit in the ocean mail service, not counting the inland expense of transportation, of over $3,000,000. Last year it was $3,600,000. We propose, therefore, to expend in aid of the revival and resuscitation of the great American merchant marine, which competition has so nearly driven from the seas, the profit of the foreign mail service—in aid of the more expeditious and efficient ocean mail service, and in aid of an auxiliary to the naval establishment and the advancement of American trade.

The third change in this bill is a small change. Ordinarily I would be opposed to it, but at this late hour an amendment to the bill would operate to its defeat. It is a matter of little consequence, and it will not operate to the disadvantage of the general proposition. I refer to the provision in the bill as it came from the Senate to compel the boats to stop at Charleston, S. C., in contract service between New York and South American ports. That, I think, is an inconsequential provision. Ordinarily I would not agree to it, but I do not think it is of such importance as to cause a single Member of this body to vote against the whole provision as carried by the bill. We hope, therefore, Mr. Speaker, that in each of these three principal propositions—the revival of the merchant marine, the increase in the efficiency and expedition in ocean mail, and the aid to the auxiliary force of the navy—this measure may have the support of this House without political prejudice, as it is a business and a commercial proposition. We have just witnessed the return of our magnificent naval fleet from its round-the-world trip. It was accompanied every mile of that wonderfully successful voyage by colliers flying foreign flags. If this measure should prevail, and long enough time be given for the contract service to be developed, it will afford practically 30 additional aids to the naval establishment, which would displace in future the chagrin which the American people were compelled to suffer by seeing their magnificent fleet accompanied by colliers flying foreign flags. I want to emphasize this fact, that if during that great voyage of our fleet, accompanied by colliers, as I have said, flying foreign flags, a single hostile shot had been fired against the fleet, under the laws of nations every one of those colliers would have withdrawn and sailed into their home ports and left that great battle-ship fleet, the pride of this people, stranded in the high seas at the mercy of anyone, because of starvation in fuel alone. If we continue this policy and no additional aid shall be granted by some such measure as this now proposed, we will be still further humiliated, and it will be a tragedy to witness the necessity of this Government sending its munitions of war, its naval supplies, from the Pacific to the Orient in foreign vessels, and most probably in Japanese ships.

Mr. Speaker, it is not my purpose to speak at length. I wish to leave the others more time in which to explain the policy and the effect of this bill. I hope that Members will drive from their minds the prejudice which exists against the measure, and will look on the bill as a business and not a political proposition, and will see the necessity of maintaining the policy for the good of the mail service, the necessity of promoting the policy for the good of trade, and the necessity of developing the policy for the aid of the American navy. [Applause.]

Mr. Speaker, I reserve the balance of my time.

Mr. COCKRAN. Will the gentleman allow me to ask him a question?

Mr. OVERSTREET. Well, I yield for just a question.

Mr. COCKRAN. The gentleman spoke of mail subsidies which Great Britain pays. Under that head of subsidies which Great Britain pays for mail service, I would like to ask how much per pound per mile is the rate of compensation paid there as compared with the rate provided for similar service under this measure?

Mr. OVERSTREET. I can not give that offhand, I am sorry to say.

Mr. PRINCE. I desire to ask the gentleman a question. On page 2 of the bill there is this proviso:

Provided further, That the total expenditure for foreign mail service in any one year shall not exceed the estimated revenue therefrom for that year.

Is there any surplus revenue from foreign mail service paid into the Treasury?

Mr. OVERSTREET. Mr. Speaker, I thought I mentioned that. I am quite sure I mentioned that there was a surplus last year of $3,600,000.

Mr. PRINCE. I did not catch it.

Mr. OVERSTREET. I stated that.

Mr. PRINCE. That is under the present law.

Mr. OVERSTREET. That the surplus of all the foreign mail service.

Mr. PRINCE. What I desire to get at, in plain English, is this: How much difference would there be in the net revenues going to the Government based upon the law as it is now and based upon the law as proposed by you?

Mr. OVERSTREET. I have stated—I remember positively stating—that it was proposed to utilize the surplus in the foreign mail service over and above the expenses of the ocean expense, not including the mail land transportation, in the payment of these bonuses. We are now paying approximately a million dollars, and we would have to pay $3,600,000.

Mr. PRINCE. Does not that add to the deficit in the Post-Office Department?

Mr. OVERSTREET. It goes in, and of course we have a general deficit, but it goes into the Treasury.

Mr. PRINCE. It is in effect a bonus paid out of the Treasury.

Mr. OVERSTREET. Mr. Speaker, I yield forty-five minutes to the gentleman from Indiana [Mr. LANDIS].

[Mr. LANDIS addressed the House. See Appendix.]

CONFERENCE REPORT ON RIVER AND HARBOR APPROPRIATION BILL.

Mr. BURTON of Ohio. Mr. Speaker, I desire to file a conference report.

The SPEAKER. The Clerk will report the title.

The Clerk read as follows:

H. R. 28243. To provide for repairs, maintenance, and preservation of public works on rivers and harbors, and for other purposes.

CONFERENCE REPORT ON AGRICULTURAL APPROPRIATION BILL.

Mr. SCOTT. Mr. Speaker, I desire to file a conference report.

The SPEAKER. The Clerk will report the title.

The Clerk read as follows:

H. R. 27053. Making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Parkinson, one of its clerks, announced that the Senate had agreed to the conference report on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24834) entitled "An act for the protection of the surface rights of entrymen."

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 8058) entitled "An act authorizing the Attorney-General to appoint as special peace officers such employees of the Alaska school service as may be named by the Secretary of the Interior."

AGRICULTURAL APPROPRIATION BILL.

Mr. SCOTT. Mr. Speaker, I call up the conference report on the bill H. R. 27053, the agricultural appropriation bill, and ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from Kansas calls up the conference report and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 27053 having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 18, 20, 31, 40, 41.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 9, 10, 12, 14, 15, 16, 17, 21, 22, 23, 24, 27, 32, 33, 34, 35, 36, 37, 38, 39, 42, 43, 46, 47, 48, 49, 50, 51, 52, 53, 54, 56, 57, 59, 60, 61, and agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "six hundred and twenty-five thousand dollars;" and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "one million two hundred and sixty-three thousand seven hundred and sixty dollars;" and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "one million four hundred and twenty-seven thousand eight hundred and sixty dollars;" and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: Strike out the word "carry," in line 25, page 15, and insert in lieu thereof the words "for carrying;" and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "two hundred and twenty-five thousand dollars;" and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "one million one hundred and eighty thousand seven hundred and ninety-six dollars;" and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "two hundred and sixty-two thousand three hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "ten thousand dollars;" and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "one million seven hundred and nine thousand two hundred and sixty-six dollars;" and the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "one hundred and seventy-three thousand four hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 45: That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "two hundred and six thousand four hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "twelve million nine hundred and eighty-five thousand and thirty-six dollars;" and the Senate agree to the same.

The committee on conference have been unable to agree on the amendment of the Senate numbered 58.

CHAS. F. SCOTT,
JOHN LAMB,
GILBERT N. HAUGEN,
Managers on the part of the House.

F. E. WARREN,
J. P. DOLLIVER,
H. D. MONEY,
Managers on the part of the Senate.

The Clerk read the statement as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910, submit the following detailed statement in explanation of the effect of the action agreed upon and recommended in the conference report, namely:

OFFICE OF THE SECRETARY.

Amendment No. 1, to which the House agrees, restores to the bill the language stricken out upon a point of order on the floor of the House providing for the addition of $500 to the salary of the solicitor.

Amendment No. 2, to which the House agrees, increases the salary of the stenographer and executive clerk to the Secretary of Agriculture from $2,000 to $2,250.

Amendment No. 3, to which the House agrees, restores to the bill the language stricken out upon a point of order on the floor of the House providing for the addition of $500 to the salary of one inspector.

WEATHER BUREAU.

Amendment No. 5, to which the House agrees, restores to the bill the language stricken out upon a point of order on the floor of the House providing for the addition of $1,000 to the salary of the Chief of the Weather Bureau.

BUREAU OF ANIMAL INDUSTRY.

Amendment No. 8 increases by $55,000 the amount allowed by the House for inspection and quarantine work in the eradication of scabies in sheep and cattle, the inspection of southern cattle, the supervision of the transportation of the stock and the inspection of vessels, the execution of the twenty-eight-hour law, the inspection and quarantine of imported animals, establishment and maintenance of quarantine stations, and the inspection work relative to the existence of contagious diseases, and the tuberculin and mallein testing of animals; and the House recedes with an amendment reducing the increase to $25,000.

BUREAU OF PLANT INDUSTRY.

Amendments Nos. 15 and 21 merely readjust the sums allotted in the respective paragraphs without changing the total of the appropriation; and the House concurs.

Amendment No. 25 increases the appropriation for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil from $146,470 to $250,000, of which sum $50,000 shall be immediately available; and the House recedes with an amendment reducing the amount to $225,000.

Amendments Nos. 28 and 29 refer to the purchase and distribution of valuable seeds. The bill as passed the House appropriated $317,960, of which $272,320 was allotted for seeds for congressional distribution and $45,640 for the collection, testing, propagation, and distribution of rare and valuable seeds from foreign countries. The Senate amendments (28 and 29) do not change the total amount appropriated for the purpose named, but divide it as follows:

For congressional seed distribution	$241,320
For collection and distribution, etc., of foreign seeds	45,640
For testing, distribution, etc., of forage crops	31,000

And the House concurs with an amendment allotting the appropriation as follows:

For congressional seed distribution	$262,320
Collection, distribution, etc., of foreign seeds, etc	45,640
Testing, distribution, etc., of forage crops	10,000

BUREAU OF BIOLOGICAL SURVEY.

Amendment No. 35, to which the House agrees, restores to the bill the appropriation for the maintenance of certain reservations for mammals and birds, reappropriates and makes immediately available the unexpended balance of the $40,000 hereto-

fore appropriated for the Montana National Bison Range, and authorizes its expenditure in fencing the land, erecting necessary buildings and sheds, and enlarging the limits of said range to an area not exceeding 20,000 acres.

DIVISION OF PUBLICATIONS.

Amendment No 38 increases the salary of one foreman miscellaneous distribution from $1,400 to $1,500; and the House recedes.

Amendment No. 39 changes "2 forewomen, at $1,200 each," to "1 forewoman, at $1,400; 1 forewoman, $1,200;" and the House recedes.

Amendment No. 40 provides for one additional clerk of class 2; and the Senate recedes.

Amendment No. 41 provides for one additional clerk, at $720; and the Senate recedes.

Amendment No. 42 provides for one additional skilled laborer, at $900; and the House recedes.

Amendment No. 43 provides for one less skilled laborer, at $720; and the House recedes.

OFFICE OF EXPERIMENT STATIONS.

Amendment No. 46, to which the House agrees, increases the salary of the director from $3,500 to $4,000.

OFFICE OF PUBLIC ROADS.

Amendment No. 49, to which the House agrees, restores to the bill language stricken out on a point of order on the floor of the House providing for an increase in the salary of the director from $2,750 to $3,000.

MISCELLANEOUS.

Amendment No. 59 strikes from the bill the following language: "All discoveries in making paper by the Department of Agriculture shall be patented in the name of the Secretary of Agriculture for the use and benefit of the United States and the people thereof;" and the House concurs.

Amendment No. 60, to which the House agrees, restores to the bill the language stricken out upon a point of order on the floor of the House providing as follows: "And hereafter the Secretary of Agriculture is authorized to permit employees of the Department of Agriculture to make assignments of their pay, under such regulations as he may prescribe, during such time as they may be in the employ of said department."

Amendment No. 61 confers upon all duly and lawfully constituted and appointed watchmen of the Department of Agriculture stationed in and upon the buildings and premises thereof the same powers and duties while on duty at the Department of Agriculture or its premises as the Metropolitan police of the District of Columbia; and the House agrees to same.

All amendments not noted in this statement are merely verbal or other minor corrections, necessary changes of totals, and the like, and do not in any way alter the meaning of any of the original language or affect the amounts of the appropriations.

Amendment No. 58, which still remains in disagreement, consists of the language inserted by the Senate as a new paragraph, as follows:

Commission on Country Life: For all necessary expenses to enable the Secretary of Agriculture to digest, compile, and publish the material already gathered by the Commission on Country Life, including the employment of the necessary clerical assistance in the city of Washington and elsewhere, $25,000.

The total appropriation carried by this bill:

As it left the House was	$12,883,826
As amended in the Senate it carried	13,075,716
An increase over the House bill of	191,890
As agreed upon by the conferees, the amount appropriated is	12,985,036
A net increase over the amount carried in the bill when it passed the House of	101,210

NOTE.—This does not include the amount specified in the amendment which remains in disagreement.

CHAS. F. SCOTT,
JOHN LAMB,
GILBERT N. HAUGEN,
Managers on the part of the House.

Mr. SCOTT. Mr. Speaker, I move the adoption of the conference report.

Mr. LEVER rose.

The SPEAKER. Does the gentleman yield?

Mr. SCOTT. I yield.

Mr. LEVER. I would like to ask the chairman of the committee what increase has been allowed by the conferees for the boll-weevil work? I did not catch the amount.

Mr. SCOTT. The amount of the increase is $79,000 over that which was allowed by the House, making the total amount for that purpose $225,000.

Mr. LEVER. As I understand, the only thing left in conference, the only thing left in disagreement, is the country-life commission?

Mr. SCOTT. That is the only amendment in disagreement.

Mr. STEPHENS of Texas. I desire to ask why the amount of $25,000 was changed with reference to the amount of money necessary for the protection of cattle from cattle diseases and from the twenty-eight-hour shipment law?

Mr. SCOTT. The Senate amended that paragraph by adding $50,000, as I now recall the figures, and in conference the amendment was reduced to $25,000.

Mr. STEPHENS of Texas. So it leaves $30,000 increase over what the House had it.

Mr. SCOTT. No; I think it leaves $25,000 increase over what the House had it. The statement gives the correct figures, and I speak only from memory. My recollection is the amount as carried in the conference report is $25,000 more than the same item carried as it passed the House.

Mr. STEPHENS of Texas. I am very glad if that is true, because the cattle industry is one of the greatest industries of the country and needs protection.

Mr. SCOTT. Mr. Speaker, I ask for a vote on the proposition to adopt the report.

The question was taken, and the conference report was agreed to.

Mr. SCOTT. Mr. Speaker, I move to further insist upon the remaining disagreements and agree to a conference.

The SPEAKER. The gentleman from Kansas moves that the House do further insist on its disagreement to the Senate amendment, which the Clerk will report.

The Clerk read as follows:

Amendment No. 58, page 57, after line 9, insert:
"Commission on Country Life: For all necessary expenses to enable the Secretary of Agriculture to digest, compile, and publish the material already gathered by the Commission on Country Life, including the employment of necessary clerical assistance in the city of Washington and elsewhere, $25,000."

Mr. REEDER. Now, Mr. Speaker, I move to recede and concur in this amendment as a substitute to the motion offered by the gentleman from Kansas.

The SPEAKER. The gentleman from Kansas moves that the House recede and concur in the amendment. The gentleman from Kansas [Mr. SCOTT] is entitled to the floor.

Mr. SCOTT. Mr. Speaker, the managers on the part of the House thought they were not warranted in receding and concurring in this amendment for two reasons. In the first place, the matter which it concerns had been given no consideration either by the House Committee on Agriculture or by the House itself. The report of the Commission on Country Life was not made until the appropriation bill, which we have now considered, had been reported and was pending before the House. Obviously it was too late then for any consideration to be given to the subject concerned. So far as your Committee on Agriculture is concerned, we have no knowledge as to the character of the material which this amendment seeks to "digest, compile, and publish," further than that carried in the public print. In a general way it is our information that it consists of replies to several hundred thousand letters which were sent out by the Commission on Country Life and which expressed the opinions of the individual writers concerning the subjects inquired about. It did seem to your managers that before incurring an expense of $25,000 and authorizing in advance the publication of this material some committee of Congress, if not the Congress itself, should have more information as to the character of the material than is now available in order that we might be able to pass an informed judgment as to the probability that it would be of value to the country.

The second reason which governed your managers in refusing to concur in this amendment is found in the amendment of the sundry civil bill which was adopted by the House on February 26. This amendment reads as follows:

That hereafter no part of the public moneys, or of any appropriation heretofore or hereafter made by Congress, shall be used for the payment of compensation or expenses of any commission, council, board, or other similar body, or any members thereof, or for expenses in connection with any work or the results of any work or action of any commission, council, board, or other similar body, unless the creation of the same shall be or shall have been authorized by law; nor shall there be employed by detail, hereafter or heretofore made, or otherwise personal services from any executive department or other government establishment in connection with any such commission, council, board, or other similar body.

This paragraph was inserted in the sundry civil bill by a vote so nearly unanimous that no division was asked for, and your managers therefore regarded it as in effect an instruction to them to agree to no provision which would contravene its provisions. For these reasons it has seemed to your conferees that the amendment should not be agreed to, and we therefore lay it before the House for its consideration.

I now would like to ask my colleague from Kansas how much time he desires?

Mr. REEDER. I really do not know at the present time.

Mr. SCOTT. Five minutes?

Mr. REEDER. I think I will need more than that and I think there are several other Members who will want to speak on this question.

Mr. SCOTT. I yield five minutes to my colleague from Kansas [Mr. REEDER].

Mr. REEDER. Mr. Speaker, in answer to the suggestions made by the chairman of the committee I wish to say one guaranty as to the contents of this report is to be had in the character of the men who have instituted these inquiries and made the report. I cite you to the fact that we have a commission of men who have taken a great deal of pains, traveled all over this country, had a great many hearings, and have spent a great deal of time in collecting the information contained in this report.

We have that excellent and intelligent friend of the farmer in Mr. James Wilson, the Secretary of Agriculture, who desires very much that this report should be compiled and printed in order that he might send this information over this country for the benefit of the farming community. Then I thought when it was being suggested by the chairman that they had not given close attention to the subject, that it might be well to learn whether they had given close attention to the hearings that I have in my hand—the report of the President's Home Commission—before they authorized its being printed. Is the care and study given by the Committee on Agriculture of the report of the Home Commission the reason we have had it printed in the form of a public document? As to the law that was passed a few days ago, I want to say this, that it is clearly the fact, first, it should not be retroactive, and that the House at no time passes any law that it can not afterwards repeal if it so desires. If it is proposed under cover of the amendment which went through on the sundry civil bill to prevent the printing of this report that is to be of value to the farming communities of this country, I believe we ought to set it aside in this case, at least. It is conceded by all that in almost all of our legislation where there is to be a curtailment of expense the farming community, who finally bear the expense, have it deducted from what they should have. For instance, when we came to the Cuban reciprocity, the products relieved from the tariff were the products of the farmer. When we came to the Philippine tariff, the same was true. And now, when we come to the last report to be printed and the information is gathered, a fight is made against the trivial expense of compilation and printing. The information obtained for the benefit of rural life we will make a great mistake if we do not permit it to go forth to the people to be of advantage to the rural communities of the country. I dislike to see the committees of this House when they get an economical streak on strike at the farmers of the country first. We certainly know that there is no man in this country better informed as to what would be of advantage to the agricultural section of the country than the Secretary of Agriculture, and he is anxious to have this report compiled and printed.

It is a trifling sum compared to what we do appropriate for other matters. In many instances it is a great question as to whether they are useful or not. There is no question but this report will bear much good fruit.

People are coming to realize that the very best foundation we can lay for future greatness in this country is in an improved country life; that we should bring country life up to a state where the very best class of people, the most intelligent, will remain on the farm and make farm life what it has been and should continue to be, the foundation of a better government for the future. Hence, I believe we are making a mistake when we come to economize by not publishing what would be of an advantage to the farmers of this country. I cite you again to the fact that Secretary Wilson regards this as one of the things that should be done for the benefit of rural life, and further, that many of the farm bulletins that he has issued are of such a character as to be of great benefit to the farmer. We are sending a great number of them to the country. Much of the matter contained in this report, we are assured, will be of great advantage when sent out in the same way—of farm bulletins. I hope that Members of this House who desire to make the farm more desirable as a place to live will vote with me to concur in this amendment and let this small pittance be used for the benefit of the farmers of this country, as is suggested by the best friend of the farmer in this country, Secretary James Wilson.

I wish to read to you, in the time that I have left, a synopsis of what they treat of in these reports and see if it is such information as ought to be published. We print a great deal of stuff here that is of very little value. This will prove of great value.

The SPEAKER. The time of the gentleman has expired.

Mr. SCOTT. Mr. Speaker, I yield five minutes more to the gentleman from Kansas [Mr. REEDER].

Mr. REEDER. Here is a statement of the purposes of this commission. But, as I have five minutes more, I will first speak to you concerning the men that constitute this commission, in order to show you the character of the men who are to make up this report that Members are trying to suppress without considering it, without knowing what it contains, because they concede they have not examined it, but are condemning it. At the head of this commission we have Mr. L. H. Bailey. He is director of the agricultural experiment station of the State of New York. Next we have Kenton L. Butterfield, president of the Massachusetts Agricultural College. They are two pretty good men, I should say. Then we have Walter H. Page, formerly of North Carolina, now the editor of The World's Work, in New York.

Then we have Gifford Pinchot, our Chief Forester of the United States, whom we all know is the friend of what will build up a better civilization, and there is no one in this House or anywhere else will accuse him of improper motives, although some will insist that, because he will not let people cut all the timber they want, he is overstringent in caring for our forests. Everybody knows that he is a sincere man, who intends to do right. Then we have Hon. C. S. Barrett, the president of the Farmers' Union, an organization of 3,000,000 people. You can scarcely make the farmers believe what he, after careful consideration, calls "useful information" should be suppressed. Then we have W. A. Beard, who is the head of the Sacramento Valley Improvement Association, and chairman of the board of control of the National Irrigation Society, a man of broad and varied intelligence.

So it seems to me the character of these men would warrant us in spending this trivial amount in the interests of the farming communities of this country. Then I desire to show you what they treat of, and they have had 30 different hearings in as many different parts of the country.

Perhaps the chairman of the committee, being from Kansas, does not think it worth while to print this report, because none of the hearings were had in Kansas. Of course, state pride is commendable; but notwithstanding this I think we ought to waive our love for Kansas in the present instance, so as to secure the benefits of the investigations of these great and good men for our people. Here are the many phases of country life which have been looked into:

First, "Disregard of the inherent rights of land workers;" "Speculative holding of lands," probably the greatest detriment to our civilization; "Monopolistic control of streams" are considered. Very important matters. "Wastage and control of forests." There is nothing more important than this to our people, and it is being carefully considered in these hearings. The information secured on this subject should be sent broadcast over this country, especially when we consider the very trifling expense attached. Then there is "The restraint of trade" and "Remedies for the disregard of the inherent rights of the farmer." Then we have "Highways." This is also a very important matter. Then we have "Soil depletion and its effects." The information collected on either one of these topics would pay for all the expense that will be required to spread these reports broadcast through the country.

Then we have "Agricultural labor." Then we have "Statement of the general problem." The question of "Intemperance," our national curse, which happily is passing rapidly into the column of the has-beens, is also taken up, and "Development of local attachments of the farm laborer." "Health in the open country" and "Woman's work on the farm." Then as a third subdivision we have "The general corrective forces that should be set in motion," "Need of agricultural or country life surveys," "Need of a redirected education," "Necessity of working together." We know that there is now a movement going on all over the country to have centralized schools throughout the rural districts that will give an education to the children and youth of farm communities equal to our best seminaries, and avoid the expense and temptations incident to sending children away from home for an education. This one subject alone is worth ten times as much as this report will cost. Then we have "Necessity of working together," "The country church," "Personal ideals and local leadership."

Now, I submit to the gentlemen of the House that it is a very trivial matter to refuse to make appropriation of this small sum for so great a purpose. This report will be of advantage to millions in the country, and this House should sim-

ply respond to the demand and authorize the compilation and the dissemination of the report, even if it is by a commission appointed without direct sanction of law.

Mr. SCOTT. I yield five minutes to the gentleman from Virginia, my colleague on the committee of conference.

Mr. LAMB. Mr. Speaker, your conferees have consistently resisted the adoption of this amendment, for the reason that we believe there is no necessity for it. I believe that this Country Life Commission is just a gratuitous work, and that the objects and purposes at which it aims can be reached and are now being reached by the respective States of this country, and all these measures referred to by the gentleman from Kansas have already been or are now being considered in the respective States. We oppose the centralizing of everything in the Government at Washington, and we are unalterably opposed to the country commission going through the States we represent and dictating how we shall carry on our domestic affairs.

Mr. REEDER. I would like to ask if you will object to well-informed men making suggestions?

Mr. LAMB. We do not need these suggestions.

Mr. REEDER. But there are other parts of the country that think they do.

Mr. LAMB. I do not think they do. I think that the objects, or most of them, have already been reached. And so far as the question of large tracts of land is concerned, I want to say that in the States of the South the farms are growing smaller each year, showing that those lands are being parted with by owners, and that they are being settled upon.

So far as the matter of education is concerned, I tell you this educational spirit is awake in all of the States of this Union, and they will take care of themselves in this matter without suggestions coming from volunteers who go through the States suggesting what is to be done. It is the concentration of authority in a central head at Washington that we resist, and we think there is no necessity for this report being printed, and we are opposed to contributing the money uselessly. We have no money to throw away in this manner.

Mr. REEDER. I want to make one suggestion. It is not concentrating any authority; it is simply making suggestions. I want to say, further, that the suggestions made by the farmers' bulletins of the Agricultural Department in Washington have revolutionized the western country. Further, it would be a great advantage to the South for somebody to make suggestions that would result in covering up those hillsides with something that would prevent the wash of the soil that I noticed last fall when I was down there.

Mr. LAMB. I did not yield for a speech, but a question.

We passed a measure yesterday that, if the Senate approves, will go far in the direction the gentleman suggests. The measures proposed by this commission will not reach the results that these philanthropists and enthusiasts expect.

I hope it will be the pleasure of the House to stand with their conferees on this question.

Mr. SCOTT. I yield five minutes to the gentleman from Iowa [Mr. HEPBURN].

Mr. HEPBURN. Mr. Speaker, there seems to be some confusion on the part of the managers on the part of the House as to the reasons why they have refused to recognize the value of this report.

I understood the chairman to say that one of the reasons why he was opposed to its publication was that he knew nothing about it; that it had only recently been published; that they had had no opportunity for its examination. Now, I understand the gentleman from Virginia to say that having examined it, it appears to be of but little value, and that it will not accomplish the purposes that the friends of the report seem to think ought to be accomplished.

Mr. SCOTT. Will the gentleman permit me to make a statement that will reconcile these apparent contradictions? The chairman of the committee was referring to the mass of material which has been accumulated, but not yet published. The gentleman from Virginia was referring to the brief report of the commission, which has been published, and which I understand merely summarizes the work that has been done.

Mr. HEPBURN. That undoubtedly removes the criticism that I was making.

I submit, Mr. Speaker, that for very many years it has been the contention of many of the economists of this country that an undue proportion of those raised upon the farm when they reached adult age abandoned the farms and went into city occupations, thereby harming the interests of agriculture, thereby harming in a most material sense the greater interests of production in the United States.

For more than twenty years there has been public discussion in the journals, especially in the agricultural journals and many of the more important magazines of the country, as to the best method of remedying this evil, because no doubt it is an evil if it leaves the farm without proper labor and if it takes from the farm its proportion of the new blood that must go into any and every enterprise if it is to hold its own.

Many suggestions have been made. Finally the President of the United States quite recently selected a number of eminent gentlemen, asking them to give their attention to the subject, and report to the country or to him some method that will bring about a removal of this complained-of evil. They have made this report. As I understand, they have devoted a long time to the study of this question. They are men of eminence, men whose opinions upon this subject will be of value to the whole country. They have finally made their report, and now in order that the country may avail itself of the advantages due from such a report, publicity ought to be given, and it has been thought desirable that the Government should make this appropriation in order that the country may have the benefit of this report.

For some reason or other the report does not find favor in the eyes of some of the gentlemen of this House, and they have proposed that it should not be published. I think that it ought to be. I hope that the motion made by the gentleman from Kansas [Mr. REEDER] will prevail, and that this dispute, the only one now existing between the two Houses upon this great proposition, the agricultural appropriation bill, will be settled by concurring in the Senate amendment and giving to the country this valuable matter that has been collected at so much labor on the part of these most eminent gentlemen.

Mr. STEPHENS of Texas. Will the gentleman yield for a question? He is an eminent lawyer, and I would like to get his opinion on whether the President of the United States has a right to appoint this commission.

Mr. HEPBURN. I do not think it makes a particle of difference whether he has the right or not. Here is the information, and the question is whether the country shall be benefited by it, or whether, because of a doubt as to the right of the President to secure the information, we will refuse to avail ourselves of it.

Mr. STEPHENS of Texas. Does the gentleman not think it would be unsafe to adopt this report?

Mr. HEPBURN. I do not think so.

Mr. SCOTT. Mr. Speaker, I now yield five minutes to the gentleman from South Carolina.

Mr. LEVER. Mr. Speaker, this Country Life Commission is another one of the many commissions and referee boards created by executive order. I am against the motion of the gentleman from Kansas [Mr. REEDER], to take from the Treasury of the United States $25,000 to print this report. I am against it for several reasons. The first, and the most important, is that Congress must call a halt some time upon the creation of commissions and boards by executive order. And the only way you can stop it is by withholding the pap bottle from their mouths, and this is a mighty good place and time to begin. [Applause.]

It was my pleasure to see a great many of the questions sent out by this Country Life Commission in the summer of last year. I think I replied to a couple of them myself, for myself and some of my neighbors. I am confident that the printing of the answers given by myself and my friends around me, while the best we could give, could not be of so much value as would justify an expenditure of $25,000 of the people's money.

Another thing, the Agricultural Department has its thousands and thousands of experts to-day working along the lines of giving to the farmers of this country expert advice. Not only that, but the department is sending out each year millions of farmers' bulletins with a view of giving them that information which the gentleman is seeking to give to them in this Country Life Commission report. Why duplicate that work? Why make an additional expenditure? It is complained that we are not giving enough money to the farmers, and I have made that point myself frequently, but I would like to call the attention of the House to the fact that this bill carries the largest appropriation of any agricultural bill ever reported to the House or passed by the House.

We are called upon to spend $25,000 to publish the information of a lot of theorists on the uplift of the country folk. I have an idea that the good, old-fashioned, sensible farmer in my district knows more about the bettering of farm conditions in South Carolina than all the executive-created boards that were ever appointed by the President.

Mr. COCKS of New York. Will the gentleman yield?

Mr. LEVER. I will yield to the gentleman.

Mr. COCKS of New York. Does not the gentleman know that we give money for so-called "theorists" to go down and advise the farmers of South Carolina?

Mr. LEVER. Of course we do; we have plenty of it. I do not think we ought to duplicate the work. There must be a limit to all things. We do not want to give the farmers too much theory. I think that the best work that the Department of Agriculture is doing is its demonstration work. We have been feeding them on printed matter for forty years, and they are a little tired of it. They want substantial demonstrations of the theories worked out in the department.

Mr. COCKS of New York. Does not the gentleman from South Carolina think that this would be just as valuable as the farmers' bulletin?

Mr. LEVER. I was trying to draw a distinction, and was trying to say that we should show them what to do instead of spending money to teach them by printed matter. The farmers care not a great deal for such teachings. They want to see theories worked out into demonstrations.

Mr. COCKS of New York. I quite agree with the gentleman, but does he not think that this is of great value?

Mr. LEVER. The chances are, judging from the reports of commissions and boards which we have had in the past, that it will not be of much value and will not be read to any extent.

Mr. SCOTT. I now yield five minutes to the gentleman from New York [Mr. COCKS].

Mr. COCKS of New York. Mr. Speaker, I hope the gentlemen understand what the proposition is here, that it is to print the report of the Country Life Commission. I hope they realize what was in the President's mind when he appointed this commission. I want the gentlemen to understand what the President had in his mind when he appointed this commission.

Mr. TAWNEY. Will the gentleman from New York permit an interruption?

Mr. COCKS of New York. Yes.

Mr. TAWNEY. I think the gentleman is mistaken in saying that the proposition is to print the report of the commission. The report has been printed. This is for the purpose of defraying the expense and tabulating the result of the investigation.

Mr. COCKS of New York. And distributing it.

Mr. TAWNEY. Yes; but the report of the commission—that is, the conclusions—have already been printed.

Mr. REEDER. I think the gentleman from Minnesota [Mr. TAWNEY] is mistaken, absolutely. I think that the information is not printed. There is a preliminary report here.

Mr. COCKS of New York. That is my understanding.

Mr. TAWNEY. Here is a report with the conclusions of the commission.

Mr. COCKS of New York. This is not the report.

Mr. TAWNEY. Read the amendment.

Mr. LANDIS. I would like to ask the gentleman what is the size of this report?

Mr. TAWNEY. Nobody knows.

Mr. COCKS of New York. Mr. Speaker, whose time is all this coming out of?

The SPEAKER. The Chair does not know.

Mr. COCKS of New York. Very well; if the Chair does not know and it does not come out of my time I have no objection.

The SPEAKER. Is the gentleman from New York entitled to the floor?

Mr. COCKS of New York. That is my understanding.

The SPEAKER. If that is so, then the gentleman from New York will proceed in order unless he yielded.

Mr. COCKS of New York. I could not help myself. I had to yield.

Mr. LANDIS. Mr. Speaker——

The SPEAKER. Does the gentleman from New York yield to the gentleman from Indiana?

Mr. COCKS of New York. Yes; I yield to the gentleman from Indiana.

Mr. LANDIS. I would like to ask the gentleman from New York the size of this report?

Mr. COCKS of New York. I do not know the size of it.

Mr. LANDIS. For the information of the gentleman from New York—I have not been watching this discussion—I would say that there is now pending before the Committee on Printing a bill that has for its object the printing of a synopsis of this report.

This report as presented to the Congress comprises something like 2,000 pages, but the Secretary has made a synopsis of it, which, I think, is brought within the scope of probably 300 pages, and while I do not venture to say what the committee may do, yet I think it is highly probable that we will present to the House within a few hours a bill providing for the printing of this modified report, the epitome of the 2,000 pages.

Mr. COCKS of New York. The gentleman does not mean this Senate document?

Mr. LANDIS. No, I mean a report of the Country Life Commission.

Mr. COCKS of New York. Well, this is supposed to be that. It states that. It says, Report of Country Life Commission, Senate document—is this what the gentleman refers to?

Mr. LANDIS. I do not know. All I know is that there are 2,000 pages in the original report, and we have had it cut down to about 300.

Mr. COCKS of New York. This contains 65 pages, so I suppose this is not the one.

Mr. LANDIS. I would say this certainly must be a duplicate of the other.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. SCOTT. Mr. Speaker, I yield the gentleman two minutes more.

Mr. COCKS of New York. Mr. Speaker, I just want to read one line from the letter of the President to Professor Bailey to give an idea of the object of this whole thing. It says:

> We hope ultimately to double the average yield of wheat and corn per acre, but it is even more important to double the desirability, comfort, and standing of the farmer's life.

Now, then, we publish thousands of bulletins that this Congress does not pass upon at all. The gentleman from Kansas [Mr. SCOTT], the chairman of our committee, says that we have had no chance to pass on this report. That is true. That is also true of other things that we publish and distribute through the Agricultural Department. My object is to get the findings of this commission, and the reason I am so particularly anxious is because I think that the conclusions reached by the gentlemen who compose this commission will be quite as advantageous to our farmers as any of the bulletins by the Agricultural Department. As to the statement of the gentleman from Indiana [Mr. LANDIS], that a synopsis of this report is to be printed in more compact form than that proposed in the Senate amendment, I will be quite willing to accede to that position, but what I do not want is that this House shall go on record as being unwilling to print the result of the labor of these distinguished men, who, while they may be theorists, as the gentleman from South Carolina [Mr. LEVER] characterizes them, are no more theorists than are all of those who are connected with the Agricultural Department and are doing the best they can to further the interests of the agricultural communities. [Applause.]

Mr. SCOTT. Mr. Speaker, I want to take just a minute or two to clear up what seems to be a misapprehension created by the remarks of the gentleman from New York. The amendment inserted in this bill in the Senate, to which we have declined thus far to agree, is:

> For all necessary expenses to digest, compile, and publish the material already gathered by the Commission on Country Life, etc.

It does not refer at all to the report of the commission which the gentleman from Indiana [Mr. LANDIS] has just informed the House is to be published if the House hereafter shall authorize its publication through a bill which the Committee on Printing will report.

Mr. TAWNEY. Where is that material to be deposited—what department?

Mr. SCOTT. With the Department of Agriculture, I suppose.

Mr. LANDIS. What is it we are asked to print that has the 2,000 pages?

Mr. SCOTT. As I understand it, Mr. Speaker, what we are asked here to authorize is the publication of the bulk of the material from which the report to which the gentleman from Indiana refers has been made up and compiled. In my judgment the book of 300 pages, which the gentleman says has been condensed from the report of 2,000 pages, will contain all the meat that there is in this vast amount of material, and certainly all that any farmer is likely to be willing to read. I think it would be just as unreasonable to publish the vast mass of this material, when the report itself is available, as it would be to publish the individual reports that come up from the thousands of farmers and reporters all over the country, from which the estimates of the Statistical Bureau are made up showing the probable crop of cotton or wheat or corn. What the people want is the report. They do not care anything about the material from which it is made.

Mr. LANDIS. And that is what is before the Committee on Printing.

Mr. SCOTT. That is exactly what is before the Committee——

Mr. LANDIS. Before the Committee on Printing?

Mr. SCOTT. I beg the gentleman's pardon; I thought he referred to the Committee on Agriculture. I do not know whether it is pending before the Committee on Printing or not.

Mr. LANDIS. There is something pending before the Committee on Printing that comprises 2,000 pages.

Mr. REEDER. The President's homes commission?

Mr. LANDIS. No; it is this Commission on Country Life.

Mr. SCOTT. I understand from what the gentleman has said that the report pending before his committee is what is made up by this Country Life Commission out of the material which it has gathered.

Mr. LANDIS. You want to print the material?

Mr. SCOTT. Indeed I do not want to print the material. But it is for the House to say whether it shall be printed. It is for the House to say whether it will refuse to concur in the proposition offered by the Senate to publish that material, and the question now before the House is whether that amendment shall be agreed to——

Mr. LANDIS. And the gentleman does not agree to that amendment?

Mr. SCOTT. I do not.

Mr. LANDIS. And I agree with the gentleman.

Mr. REEDER. Mr. Speaker, I would like to have two minutes of time to clear up the water which the chairman of the committee has muddied up.

Mr. SCOTT. I yield two minutes to the gentleman from Kansas [Mr. REEDER].

Mr. REEDER. Mr. Speaker, I think the gentleman is mistaken, and I wish to say the gentleman has in his mind mixed this report with the report of the President's Home Commission, the publication of which has been paid for out of the Treasury. The gentleman from South Carolina seems very badly disturbed about executive orders, and would keep from the farmers valuable information because obtained by executive orders. A very poor theory on which to base legislation. This provision is for the purpose of compiling information that this commission have gathered and on which they have spent a great amount of time. They have had hearings in every part of the United States except Kansas and South Carolina. They have secured an immense amount of information that the Department of Agriculture thinks will be of advantage if it can be published in the way of farmers' bulletins, which will go to the farmer, who will read them and be benefited thereby. The chairman states that this report is all that the people will read.

The information collected pertains to different sections of the country, and the information on different subjects will be published in separate farm bulletins, which can be sent to farmers in the section of the country interested. I do not send bulletins in regard to the cotton-boll weevil to farmers in Kansas, but I do send those which treat of those things which pertain to that section of country. This valuable information will be divided up and will be of vast benefit to the people all over the country, if we are not prevented by those people who are afraid of executive orders from printing this information.

Mr. SCOTT. Mr. Speaker, I yield two minutes to my colleague, the gentleman from Kentucky [Mr. STANLEY].

Mr. STANLEY. Mr. Speaker, I congratulate the country that this marks at least the high tide of commissions. Must we have commissions for everything? If Congress wishes to revise the tariff, it must be done by commission. If we wish to conserve forests, it must be done by commission. If we wish to dredge harbors, it must be done by commission. I think it is about time we authorize a commission to hold an inquest over the Federal Congress to see whether there is any use for its further continuance. [Applause.] Why, sir, now we are to have a country-life commission; we are to have half a dozen high-collared fellows, riding around in automobiles, eating canvasback duck and drinking champagne, to tell the boys out in the country how to consume jowl and greens and hog and hominy, how to make butter, and how to milk cows. [Applause.]

I contend, Mr. Speaker, that we can attend to production and reproduction out in the country without the aid of a city commission. Commission implies authority; commission implies wisdom to advise; and there never was a city commission, there never was a lot of fellows that were willing to live and die here in Washington that knew chicken from turkey, or knew the difference between a kicking cow and a yearling calf. [Laughter.] It is a useless expenditure. It is bringing this thing to a "reductio ad absurdum," and the farmer serenely smiles at the folly. But the expenditure after all comes out of his own pocket, from the sweat of his own brow, and adds to the burden upon his already bowed back. Cease unnecessarily burdening him with taxation and he will not need any commission to tell him how to be happy and prosperous and to raise a large and useful family, an ornament to his country and an example to his distant brothers in the city.

Mr. SCOTT. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, I have examined the message of the President transmitting the report of the Country Life Commission. I have examined it with care, because I am interested in the uplift of those who are compelled to spend their lives on the farms in this country.

On page 26 of the report of the commission there is a list of twelve questions, as follows:

1. Are the farm homes in your neighborhood as good as they should be under existing conditions?
2. Are the schools in your neighborhood training boys and girls satisfactorily for life on the farm?
3. Do the farmers in your neighborhood get the returns they reasonably should from the sale of their products?
4. Do the farmers in your neighborhood receive from the railroads, highroads, trolley lines, etc., the services they reasonably should have?
5. Do the farmers in your neighborhood receive from the United States postal service, rural telephones, etc., the service they reasonably should expect?
6. Are the farmers and their wives in your neighborhood satisfactorily organized to promote their mutual buying and selling interest?
7. Are the renters of farms in your neighborhood making a satisfactory living?
8. Is the supply of farm labor in your neighborhood satisfactory?
9. Are the conditions surrounding hired labor on the farms in your neighborhood satisfactory to the hired man?
10. Have the farmers in your neighborhood satisfactory facilities for doing their business in banking, credit, insurance, etc.?
11. Are the sanitary conditions of farms in your neighborhood satisfactory?
12. Do the farmers and their wives and families in your neighborhood get together for mutual improvement, entertainment, and social intercourse as much as they should?

What, in your judgment, is the most important single thing to be done for the general betterment of country life?

NOTE.—Following each question are the subquestions: (*a*) Why? (*b*) What suggestions have you to make?

These questions were submitted to about 550,000 persons in the United States. Answers were received from about 115,000 persons, and the commission says that these answers were prepared with much care and with every evidence of good faith. The President attaches as an appendix to his message, as an illustration of the value of the information contained in these letters, a summary of the answers given by a farmer from the State in which my distinguished friend, the leader on this side, lives. It has always seemed to me advisable to print all of the information affecting the relations of the people to the Government that might contribute in any way to the general information of the public. But I wish to read some of the questions submitted to this gentleman and the answers made by him, and which are submitted to this House as conclusive evidence that the information is of value.

I understand it is desired to spend $25,000 in collating and printing these letters and their answers. I shall read:

To the question whether the farmers and their wives in his neighborhood are satisfactorily organized, he answers: "Oh, there is a little one-horse grange gang in our locality, and every darned one thinks they aught to be a king." To the question, "Are the renters of farms in your neighborhood making a satisfactory living?" he answers: "No; because they move about so much hunting a better job." To the question, "Is the supply of farm labor in your neighborhood satisfactory?" the answer is: "No; because the people have gone out of the baby business;" and when asked as to the remedy he answers, "Give a pension to every mother who gives birth to seven living boys on American soil." To the question, "Are the conditions surrounding hired labor on the farm in your neighborhood satisfactory to the hired men?" he answers: "Yes; unless he is a drunken cuss," adding that he would like to blow up the stillhouses and root out whisky and beer. To the question, "Are the sanitary conditions on the farms in your neighborhood satisfactory?" he answers: "No; to careless about chicken yards (and the like) and poorly covered Wells, in one Well on neighbor's farm I counted 7 snakes in the Wall of the Well, and they used the watter daily, his wife dead now and he is looking for another." He ends by stating that the most important single thing to be done for the betterment of country life is "good roads;" but in his answers he shows very clearly that most important of all is the individual equation of the man or woman.

Now, on page 38 of the report of the commission itself I find this, under the title of "Highways:"

The demand for good highways is general among the farmers of the entire United States—

That is an important recent discovery evidently—

Education and good roads are the two needs most frequently mentioned in the hearings. Highways that are usable at all times in the year are now imperative, not only for the marketing of produce, but for the elevation of the social and intellectual status of the open country and the improvement of health by insuring better medical and surgical attendance.

I submit that when this commission prepares a report in which it sets forth the conclusions that the eminent gentlemen constituting the commission will draw from the particular letter to which special reference has been made, and to 100,000 others more or less like it, which are now in the Census Office awaiting the authority of Congress to collate and print the information contained therein, that the people and Congress will obtain all the information that can be of any value. Congress should prevent the completion of the preposterous work of printing such letters as outlined in the appendix to which I have referred.

Mr. WALDO. Will the gentleman allow me to ask him a question?

The SPEAKER. The time of the gentleman has expired.

Mr. WALDO. I would like him to give us the names of these eminent gentlemen.

Mr. FITZGERALD. I shall put them in the RECORD. They are as follows:

L. H. Bailey, Henry Wallace, Kenyon L. Butterfield, Walter H. Page, Gifford Pinchot, C. S. Barrett, and W. A. Beard.

Mr. SCOTT. I now yield to the gentleman from Minnesota [Mr. TAWNEY].

Mr. TAWNEY. Mr. Speaker, I hope the motion of the gentleman from Kansas [Mr. REEDER] will not prevail, not alone because the information gathered from such answers as have been received by the so-called "Country Life Commission," as the gentleman from New York has just read from the report of this commission, are of no practical value to the public, but also because this House has already declared by an almost unanimous vote that no appropriation carried in any appropriation bill shall be available for the payment of the expenses of any commission, or any expenses necessary in tabulating and publishing the results of its investigations unless such commission and investigation are authorized by law. [Applause.]

There is no fundamental political objection to commissions, and there exists no desire to minimize their great usefulness when legally created and their duties lawfully defined. But a commission should be an instrumentality merely in the application of law; it should not be empowered, either by law or executive order, to administer its own discretionary practical judgments, as if it were either law or above the law. Jefferson maintained that there should be as little government as possible. He meant that there should be as little government by mere executive choice as possible, for government by mere executive choice and preference is government by individual officials, not government by the people, of the people, for the people. [Applause.] In that case it would be a government subject to the passions and prejudices of him who governs and to all the limitations of time, place, and energy which he who governs is necessarily subject to. [Applause.]

Mr. REEDER. Will the gentleman permit me right there?

Mr. TAWNEY. I decline to yield. The law should define the duties as well as limit the activities of all commissions, and then their investigations would be within legitimate and legal lines. The appointment of these commissions without authority of law means simply government by executive choice and discretion instead of government by law. [Applause.]

The result of the investigation of this so-called "country life commission" is set forth in the report already printed. This report contains the conclusions of the commission, which conclusions have been referred to by the gentleman from New York. The answers made by one gentleman in Missouri to the inquiries propounded by the commission were regarded by the commission of such importance as to induce it to make this person's answers an appendix, together with the comments of the commission thereon. The commission says that these answers, which they mark "Exhibit A," constitute "one of the most illuminating and incidentally one of the most interesting and amusing of the series sent to the commission." This man from the State of Missouri said, in answer to some of the questions, that he had a wife and 11 living children, he and his wife being of the age of 52 years, and that he owned 520 acres without any mortgage hanging over their heads. This is very important and valuable information and would, I assume, in the estimation of the gentleman from Kansas, be of great benefit to the farmers of his State.

It is information of this kind which they have received and now desire an appropriation of $25,000 to collate and tabulate.

Why, Mr. Speaker, this report is on a par with the report of another commission appointed by the President. This report was recently transmitted by him, together with a special message to Congress. This other report is known as the "Report of the President's homes commission." We may get some idea of the value of the information contained in the reports of these numerous commissions which have recently been created without authority of law by referring briefly to the homes commission report.

First, take the subject of meat inspection. The report says:

In judging the quality and wholesomeness of meat, the color, consistency, and odor are valuable points to be observed.

[Laughter.]

Good beef has a bright red color and marbled appearance, due to the presence of fat; it is firm yet elastic to the touch, moderately moist, and has a characteristic beefy odor.

[Laughter.]

Milk is defined in this report as follows:

Milk is an ideal food. The average composition of cow's milk is: Protein, 4.5; fat, 3; sugar, 4.5; salts, 0.75; water, 87.25.

Now here is a definition of skimmed milk. Without this homes commission report and its illuminating definition of skimmed milk the people of this country would not know of the value of this product:

Skimmed milk is the residue after the cream has been removed.

[Great laughter.]

As it contains the other solids, and is quite cheap, it should become a more popular article of food.

[Laughter.]

Now, here is a definition of butter in this valuable report:

Butter is formed by churning the cream of milk.

[Laughter and applause.]

Mr. SHACKLEFORD. Do you not think the farmers ought to know that?

Mr. MANN. Very important, if true.

Mr. TAWNEY. We have, therefore, the conclusions of the so-called "Country Life Commission" printed in a report, which I hold in my hand, which conclusions are based upon information similar to that contained in the homes commission report; and it is the information furnished by the answers which have been obtained from the people that the committee on the part of the Senate desires to have tabulated and printed at an expense of $25,000. In my judgment this would be an absolute waste of public money and there is no justification whatever for such expenditure, even upon the merits of the proposition and entirely independent of the fact that this commission, like all other commissions created without authority of law, has no legal status. There is, therefore, no justification for the expenditure of money for the purpose of tabulating the results of their investigations and the publishing of such results. I am informed that as much as a carload of these answers has been dumped into one of the great departments of the Government for tabulation, and these answers have been received by the Department of Agriculture in penalty envelopes, which one of the assistant postmasters-general, when before the Committee on Appropriations, characterized as being without legal authority. This appropriation is for the purpose of classifying and so arranging these answers as to furnish interesting reading matter on a subject concerning which the commission that obtained the information had no practical knowledge whatever.

Mr. SCOTT. Mr. Speaker, I demand a vote.

Mr. REEDER. Mr. Speaker, a parliamentary inquiry. I just want to inquire if this style of debate is intended to give the affirmative two or three closing speeches? That is the effect of it.

The SPEAKER. The question is on the motion of the gentleman from Kansas that the House do recede from its disagreement to the Senate amendment and concur in the same.

The question being taken, the motion was rejected.

The SPEAKER. The question is on the motion of the gentleman from Kansas [Mr. SCOTT] that the House do further insist on its disagreement to the Senate amendment and agree to the conference requested by the Senate.

The motion was agreed to, and the Speaker appointed as conferees on the part of the House Mr. SCOTT, Mr. HAUGEN, and Mr. LAMB.

RULES OF THE HOUSE.

Mr. HEPBURN. Mr. Speaker, I ask for a reprint of House resolution 551.

The SPEAKER. The gentleman from Iowa asks unanimous consent for the reprint of the following House resolution, of which the Clerk will report the title.

The CLERK. Resolution No. 551, relating to the rules of the House.

The SPEAKER. Is there objection?

There was no objection.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the sundry civil appropriation bill (H. R. 28245) with the Senate amendments and to disagree to all of the Senate amendments and agree to the conference asked for by the Senate.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to take from the Speaker's table the sundry civil appropriation bill and disagree to the Senate amendments and agree to the conference asked by the Senate. Is there objection?

There was no objection; and the Speaker appointed as conferees on the part of the House Mr. TAWNEY, Mr. SMITH of Iowa, and Mr. FITZGERALD.

OCEAN MAIL.

The House resumed consideration of the bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports, and to promote commerce."

Mr. OVERSTREET. Mr. Speaker, I ask unanimous consent that all gentlemen may have general leave to print remarks upon Senate bill 28 for five days.

The SPEAKER. The gentleman from Indiana asks unanimous consent that Members have leave to print upon the pending bill for five days. Is there objection?

Mr. MANN. In reference to this bill?

Mr. OVERSTREET. Confining their remarks to the bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. OVERSTREET. Now, Mr. Speaker, I ask the gentleman from Tennessee [Mr. MOON] to occupy some time.

Mr. MOON of Tennessee. Mr. Speaker, there are a number of gentlemen who desire to be heard briefly on this bill, and in the disposition of the time which the House has accorded to me I shall only take a few moments for myself, to state briefly the reasons why the minority oppose the passage of this bill.

It may not be out of order for me to state as a preliminary suggestion that this bill occupies an anomalous position in this House. It is reported from the committee by a majority vote in the committee, and yet I dare make the assertion that of that whole committee a majority will vote against the bill upon the floor of this House. It may be seen, therefore, that there is not much unity on the part of the committee on this measure.

I heard with much interest my distinguished friend the chairman of the committee [Mr. OVERSTREET] as he failed to present the real issue to this House and placed before the House an elaborate statement which, whether intentionally or otherwise, concealed the real purpose of this legislation.

I heard the gentleman from Indiana [Mr. LANDIS] confess to this House on a previous occasion that he had opposed and voted against this measure; but now he comes to the House and makes his death-bed repentance and confession. Most confessions of that character, however, are made in a delirium—in a dream. I watched him closely to see what he would say upon the very issue involved in this appropriation bill, yet, alas, he failed to touch the point. In a very beautiful speech, he took this House over into Argentina and described its boundaries and its vast area. He took us to the Amazon and to the Mississippi. From there he took us across the waters and showed us the amount of subsidy that the monarchies of Europe were paying to the preferred classes for the carrying of the mails, and offered that as a suggestion to an intelligent House of Americans why the Treasury of the United States should again be plundered in the interest of private corporations.

Let us be not deceived; the issue here is plain. It is a clear one. Under the act of 1891, which was a subsidy act and was the initial step in granting subsidies to corporations, $4 was paid vessels of the first class carrying the mails, $2 to the second class, $1 to the third class, and two-thirds of $1 to the fourth class.

Gentlemen need not discuss the question of 14 knots and 16 knots in carrying the mails, or whether the mail vessels shall touch one seaport or another in being carried to South America. This is all brush. This bill proposes this: It says that vessels of the second class that now receive $2 shall have $4 per mile, the same as vessels of the first class, for every trip of 4,000 miles made across the sea. It also provides for doubling again the subsidies paid to other classes of vessels.

The whole question is brought to this one issue on the facts now in existence, and upon them alone we can debate this proposition. It is shown in the testimony of the Second Assistant Postmaster-General that to-day from the ocean subsidy, subsidies for these foreign mails, that the sum of $6,500,000 is realized; that the cost of the transportation is $2,900,000; that the difference between the cost of the transportation and the earnings of these lines is the sum of $3,600,000. That is the money that they propose to take out of the Treasury and put into the hands of the ship builders and owners of the United States.

Let me read just for a moment from the hearings the testimony of the Second Assistant Postmaster-General in support of the statement I have just made:

> But we find that the United States has another function to perform. That is the function of carrying the mails. We find that we have an income from the carrying of the mails of more than $6,500,000 a year. Now, the United States does not run its post-office for profit. That $6,500,000 a year can be divided into two parts—the $2,900,000 which represents the cost of the service, and the $3,600,000 which represents the profit. If the United States is satisfied not to have a profit in the business of carrying the mails—and nobody ever dreamed of its carrying the mails for that purpose—and is satisfied to have its mails carried by its own citizens instead of by foreigners, it has right there in its postal income, without asking a penny more from the people in the way of postage or in any way whatever, the very money that is necessary with which to accomplish this great public purpose at a minimum of cost.

In other words, if any branch in the postal service of the United States is making a net income which ought to go to the support of the whole Department of the Post-Office it is proposed, that because gentlemen think that department ought not to be making money out of its service, that whatever net proceeds come shall be given away by another measure to the shipowners and shipbuilders. Who dares say on this floor, and if he dare say it, who can support it, that the facilities are not already sufficient? No man will undertake to demonstrate that the service is not rendered wherever essential to be rendered. Shall we pay two prices for carrying the mails, or four prices, simply to have the flag of the Republic float over the vessels that carry the mails? Mail is now carried by the pound to-day, and the advantage is given to American ships double that of the foreigner. The American ship carries it at 80 cents per pound, not on a subsidized line, and the foreigner is carrying the identical mail at 35 cents a pound in a foreign vessel, and is anxious to get all it can carry.

Mr. Speaker, the minority in this House would indeed be glad to see the merchant marine restored in all its pride and splendor to the high seas. But it does not believe that this great Post-Office Department should be made the fraudulent instrument on the part of men who would increase the aggregate of wealth of these rich corporations and take from the people their revenues. If gentlemen believe that the merchant marine ought to be subsidized, let them come out into the open and present to the American people directly and in a manly way the reason why the subsidy should exist. For one, I believe that when taxes are imposed on the people of the United States the right of Congress (although its power may extend beyond) is limited to the lawful and proper use for economic purposes of these taxes for the administration of the Government, and that not one dollar should go into the hands of individuals or private corporations as a subsidy. [Applause.]

The discussion of the matter, in so far as it has advanced—and it has been true of every discussion we have had of the question—resolves itself at last into a question as to whether it is best to establish a merchant marine by subsidy indirectly. No man can support the position that this Post-Office Department should be made the buffer for this purpose. Gentlemen tell us that the act now under consideration is to amend the act of 1891 and that it will be of great interest to the Navy of the United States. Let us see. The act of 1891 provides that when these contracts are given they shall be given to the highest bidder. It does not direct and authorize a separate mandatory payment, as this act does, of so many dollars, doubling the amount hitherto paid. That act provides also that upon every ship there shall be an American boy who shall be taught seamanship. It provides that each of these vessels shall carry a gun from 4 to 6 inch caliber. Let us think a moment and see what sort of an aid that would be to the American navy. Suppose each one of these vessels had four guns of 6-inch caliber. They would be as utterly helpless before the great navies of the world in a naval conflict as a child would be in the hands of a giant. It is just one of those fraudulent, deceptive, contemptible blinds that has been put into a bill to induce men in a spirit of patriotism to vote for an infernal fraud to plunder the National Treasury. [Applause on the Democratic side.] That is all there is to it. Let no man be deceived by it. Why all these sections about the education of American boys, and about the 4 to 6 pounders on these vessels, and all the minute specifications in reference to the construction of the ship? It amounts to nothing. What do we care so long as the ship is safe that carries the mail? What value can it be to any people to have these little "auxiliaries," as they are called? I do not think we ought to even dignify them by such a name.

Mr. HOBSON. Will the gentleman yield?

Mr. MOON of Tennessee. Yes.

Mr. HOBSON. Was the service rendered during the Spanish war by the steamship *St. Louis* and her consorts of substantial value?

Mr. MOON of Tennessee. Really, Mr. Speaker, I do not know. I do not recollect what that service was. All the recollection I have of the Spanish-American war was the presence and heroic service of the distinguished gentleman from Alabama [Mr. HOBSON] when Mr. Roosevelt was alone in Cuba. [Laughter.]

Mr. Speaker, this bill to-day has another suggestion, a suggestion that is covert. It is intended to bring votes. After provision for double compensation it is provided as follows:

That if no contract is made under the provisions of this act for a line of ships between a port on the Atlantic coast south of Cape Charles and South American ports, the Postmaster-General shall, provided two or more lines are established from North Atlantic ports, require that one of said lines shall, upon each outward and homeward voyage, touch at at least two ports on the Atlantic coast south of Cape Charles, regard being had in the selection of such ports of call to geographical location and to the volume of the export and import business of the ports so selected.

Why was that? That was not an original suggestion in this bill. Opposition, however, was made because of the fact that there was no provision for the touching of these vessels upon the southern coast of the Atlantic. It was well suggested in the consideration of this matter that the Senators or Representatives living along the coast who would be induced to vote for this measure because they thought it would yield some benefit to their section would be deeply deceived. The course pursued by the vessels that would take the mail provided in this section, I am told, will be more than 500 miles from any one of the ports where it is hoped they will touch in the extreme south Atlantic or Gulf coast. The ship will make a deflection of over a thousand miles, and yet men are appealed to to vote for this measure because of that local consideration inconsiderate in and of itself.

But, sir, I do not desire to prolong the discussion which others can handle with more effect than myself, but I do make this suggestion in answer to the gentleman from Indiana [Mr. LANDIS], who said that the time was when the merchant marine of the United States was known upon all the seas. Ah, too true is that statement. The time was when that flag was seen in every civilized port of the world. The time came, however, when that great monument to greed and avarice, the protective tariff, which looked to the interests of a few in order that the interests of the many might be destroyed, was called into existence. The time came when the American people in their arrogance thought that they could sell all things and buy nothing. The time came when by her own laws her doors were closed to foreign trade, and by laws of retaliation in trade ports of the outer world were closed to our marines. Let the merchant marine come to the high seas again. Call her back from where she stands in decay beneath the cliffs that border the shore, with her flag furled and all dismantled and sailless. Call her to the high seas again by tearing down your great tariff wall, by making a reasonable adjustment of the tariff of the United States. Give foreign competition and trade, and then you will see the return of the merchant marine, for it was the greatest in the day when the tariff was the lowest and most reasonable in the history of this country.

But if it shall transpire that even that condition shall not restore the merchant marine, it is the part of manly men representing a manly constituency to openly and boldly make the declaration that money must go from the Federal Treasury in support of the merchant marine. Do not surround the question with the false pretense that the mail interests of the United States can be facilitated by such means when that is not the purpose now and never has been in the consideration of this bill. [Applause.]

Mr. Speaker, I now yield fifteen minutes to the gentleman from Wisconsin [Mr. STAFFORD].

MESSAGES FROM THE PRESIDENT OF THE UNITED STATES.

Sundry messages, in writing, from the President of the United States were communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills and joint resolutions of the following titles:

On February 27, 1909:

H. R. 15230. An act to amend an act approved February 28, 1901, entitled "An act relating to the Metropolitan police of the District of Columbia;"

H. R. 25155. An act to amend an act approved July 1, 1902, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes;"

H. R. 26072. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the civil war and to widows and dependent relatives of such soldiers and sailors;

H. R. 27419. An act to repeal the act of June 29, 1906, granting a pension to Jackson Adkins;

H. R. 28104. An act to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908;

H. R. 27363. An act to provide for improving the navigable capacity of the Sabine and Neches rivers, and the canal connecting the Sabine and Neches rivers with the mouth of Taylors Bayou; and

H. J. Res. 257. Joint resolution to authorize the Secretary of State to invite the Governments of France and Great Britain to participate in the proposed tercentenary celebration of the discovery of Lake Champlain by Samuel de Champlain.

On March 1, 1909:

H. R. 20111. An act to amend an act entitled "An act to establish a Code of Law for the District of Columbia," relative to gambling, bucket shops, and bucketing;

H. R. 26305. An act making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1910, and for other purposes; and

H. R. 8734. An act for the relief of Niels P. Larsen.

On March 2, 1909:

H. R. 27068. An act to extend the time for the completion of the Alaska Central Railway, and for other purposes;

H. R. 24149. An act granting to the Montana, Wyoming and Southern Railway Company a right of way across the Fort Keogh Military Reservation, Montana; and

H. J. Res. 231. Joint resolution authorizing the Director of the Census to collect and publish additional statistics.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes.

RIVER AND HARBOR BILL.

Mr. BURTON of Ohio. Mr. Speaker, I desire to call up a conference report and move its adoption. It is a report on the bill H. R. 28243.

The SPEAKER. The gentleman from Ohio calls up the following conference report, the title of which the Clerk will report.

The Clerk read as follows:

The bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes.

Mr. BURTON of Ohio. Mr. Speaker, I ask unanimous consent that the reading of the report be dispensed with, and that the statement be read in lieu thereof.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 6, 7, 12, 13, 14, 15, 16, 19, 21, 25, 26, 45, 52, 58, 69, 73, 82, 83, 84.

That the House recede from its disagreement to the amendments of the Senate numbered 8, 9, 18, 20, 23, 24, 29, 30, 33, 36, 37, 38, 39, 41, 42, 44, 46, 47, 48, 51, 53, 54, 57, 63, 66, 70, 71, 74, 75, 76, 77, 78, 79, and agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Hingham Harbor, Massachusetts: The balance remaining from appropriations heretofore made for this improvement may be diverted and made available for redredging and improving the channel;" and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: At the end of the language proposed to be inserted strike out the period and insert the following: "now or heretofore improved by the United States;" and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: Restore the language proposed to be stricken out and at the end thereof strike out the period and insert a colon and the following words: "*Provided*, That such survey shall in no way delay or inter-

fere with the plans for construction already underway;" and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the language proposed to be inserted insert at the end of section 10 the following: "The Secretary of War is also authorized, in his discretion, to permit any corporation or association of persons in King County, Washington, at their own expense and without cost to the United States Government, to widen, deepen, and straighten the Duwamish River in said King County: *Provided*, That the work so done shall be in accordance with plans approved by the Chief of Engineers of the War Department;" and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: Restore the number of the section, as in the House bill, and in lieu of the language of the section in the House bill insert the following:

SEC. 12. That part of the act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June thirteenth, nineteen hundred and two, in section one, relating to the Michigan-Lake Superior Power Company, is hereby amended by adding the following:

"The right to the flow of water and riparian, water power, and other rights, now or hereafter owned by the United States in the St. Marys River, in Michigan, shall be forever conserved for the benefit of the Government of the United States, primarily for the purposes of navigation and incidentally for the purpose of having the water power developed, either for the direct use of the United States or by lease or other agreement, through the Secretary of War, who is hereby authorized to make such leases or agreements: *Provided*, That a just and reasonable compensation shall be paid for the use of all waters or water power now or hereafter owned in said St. Marys River by the United States, whether utilized in said river or in any lateral canal, said compensation to be fixed by the Secretary of War: *Provided further*, That under no circumstances shall any rights be granted in said river which will interfere with the needs and uses of navigation or which will limit the absolute control of said land and waters when desired for purposes of navigation by the United States, or for a longer period than thirty years, and the Secretary of War, in his discretion, may provide for readjustment of compensation at periods of ten years, nor shall any such rights be granted without just and adequate compensation. It is intended that any excess of water in the St. Marys River at Sault Ste. Marie, over and above the amount now or hereafter required for the uses of navigation, shall be leased for power purposes by the Secretary of War upon such terms and conditions as shall be best calculated, in his judgment, to insure the development thereof. The Secretary of War may, as often as necessary, make such regulations as in his judgment are reasonable and just and best calculated to carry out the purposes of this section."

And the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the word "eight" insert the word "seven;" and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Arkansas River, between Little Rock and Ozark, with a view to improving the navigation by locks and dams or otherwise;" and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In the language proposed to be inserted strike out the words "to protect government property" and the semicolon; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Mosquito Inlet to New Smyrna;" and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: In the language proposed strike out "nine" and insert "six;" and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: At the end of the language proposed strike out the period and insert the following: "from the mouth to Burnt Fort;" and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Clearwater River from its mouth to Kamiah, with a view to a maximum depth of six feet;" and the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Missouri River at the city of Atchison, with a view to retaining said river in its proper channel;" and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: In addition to striking out the language as proposed, strike out also the following language immediately preceding it: "with a view to its improvement for navigation;" and the Senate agree to the same.

Amendment numbered 43: That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "White Lake Harbor, with a view to providing an entrance channel with a depth of twenty feet and a turning basin;" and the Senate agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In lieu of the language proposed, insert the following: "Yellowstone River, from its mouth to Billings, with a view to a four-foot stage of water and the building of a lock at the United States Government dam;" and the Senate agree to the same.

Amendment numbered 50: That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "with a view to dredging the channel and providing a harbor on the east side;" and the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: In lieu of the word "Stantonburg" insert the word "Stantonsburg;" and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Neuse River from Pamlico Sound to New Bern; Trent River up to Quaker Bridge; Pasquotank River up to Elizabeth City, with a view to providing channels to conform with the depth of the authorized waterway to connect the waters of Pamlico Sound with the ocean at Beaufort;" and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: "Strike out the words "on said Swift Creek;" and the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment as follows: Strike out the words "on said Smiths Creek;" and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "North and South Dakota, Montana, and Missouri." The Missouri River from Sioux City, Iowa, to Fort Benton, Mont.; also at or near Lake Contrary, Missouri, with a view to preventing a diversion of the channel; and the Senate agree to the same.

Amendment numbered 62: That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment as follows: After the word "twenty-nine," inserted by the amendment, insert the words "including the last-named lock;" and the Senate agree to the same.

Amendment numbered 64: That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "The North Canadian River, with a view to the diversion of a portion of its waters into the Cimarron River for improving the navigation of the latter river;" and the Senate agree to the same.

Amendment numbered 65: That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment as follows: Strike out from the text of the bill the words "to mouth of the Grand River," immediately preceding the language proposed to be inserted, and in lieu of the language proposed, insert the following: "to Tulsa;" and the Senate agree to the same.

Amendment numbered 67: That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Newport Harbor, with a view to the modification and enlargement of the existing projects as indicated in plans 'B' and 'C' contained in House Document Numbered Four hundred and thirty-eight, Fifty-ninth Congress, second session;" and the Senate agree to the same.

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: In the language proposed, after the word "Pond," insert the words "and the entrance thereto;" and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In the language proposed to be inserted strike out the words "forming the Tennessee River;" and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "including a waterway from the protected waters of Narragansett Bay through the ponds and lagoons lying along the southern coast of Rhode Island to Watch Hill and Fishers Island;" and the Senate agree to the same.

Amendment numbered 81: That the House recede from its disagreement to the amendment of the Senate numbered 81, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Survey for the construction of a continuous inland waterway in the State of California, between suitable points on Humboldt Bay and Eel River, with a view to obtaining a channel of suitable width and a maximum depth of nine feet, or such lesser depths along any section or sections of said waterway as may be found desirable. Such survey shall include an examination of all practicable routes;" and the Senate agree to the same.

THEODORE E. BURTON,
D. S. ALEXANDER,
S. M. SPARKMAN,
Managers on the part of the House.
KNUTE NELSON,
J. H. GALLINGER,
THOMAS S. MARTIN,
Managers on the part of the Senate.

The statement was read, as follows:

STATEMENT.

The House conferees appointed for conference upon Senate amendments to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes, would respectfully state that, as shown in the accompanying report, they have agreed with the conferees acting on behalf of the Senate, and they respectfully recommend that said report be adopted.

There are only three changes of importance:

1. The sum appropriated by the House bill for surveys and examinations is increased from $600,000 to $700,000. There is no other increase of appropriation or authorization in the bill as agreed upon.

2. Of the amendments for surveys, added by the Senate, provisions for approximately thirty remain in the bill.

3. Section 12, relating to the ownership and control by the Government of the water power and other rights in the St. Marys River, Michigan, is redrawn, including, however, the essential provisions in the House bill and the Senate amendments, but, as it is believed, with a somewhat clearer definition of the rights of the United States in the premises.

March 2, 1909.

THEODORE E. BURTON,
D. S. ALEXANDER,
S. M. SPARKMAN,
Conferees on the part of the House.

Mr. BURTON of Ohio. Mr. Speaker, I ask for the adoption of the report.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

OCEAN MAIL.

The House resumed consideration of the bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

Mr. STAFFORD. Mr. Speaker, no one can justify voting for the bill before the House except on the ground that he favors subsidies. It provides for the expenditure of more than $8,000,000 annually, placing the expenditure of this large amount in the discretion of the Postmaster-General. The routes suggested by the Second Assistant Postmaster-General a year ago was for a line from New York to Brazil, with 26 voyages a year, that would cost $598,000; another line from New York to Argentina, with 26 voyages, or once every two weeeks, which would cost $717,000; aggregating for these two lines on the Atlantic coast $1,315,000. On the Pacific coast it was proposed to establish a line with biweekly sailings to Manila, by way of Hawaii, starting from San Francisco, which would cost $900,000; one line from Puget Sound to Japan and to Manila, with 26 sailings in a year, at an aggregate cost of $770,000; another line from San Francisco to Australia, with 18 voyages a year, at an annual cost of $604,000, or an aggregate for the trans-Pacific lines of $2,274,000, or a total, so far as these five lines are concerned, of $3,589,000.

The present service on the Atlantic Ocean for the transshipment of mail every three or four days costs $30,000, and yet it is proposed by this bill to vote for a steamer which leaves New York once every two weeks for Brazil and Argentina, or once a week for either Brazil or Argentine Republic, the enormous sum of $23,000 and $27,577 for each trip, respectively. And you intend to pay under this bill for one voyage from the Pacific coast to Manila the sum of $30,000, and by the other route $34,600, and to Australia the sum of $33,500, these amounts being paid for each individual trip, which to-day costs us on the Pacific coast the aggregate sum of $180,000.

Mr. MANN. In a year.

Mr. STAFFORD. One hundred and eighty thousand dollars for the whole year. No one can contend, so far as the Pacific Ocean service is concerned, that there is not adequate service to-day for the carriage of mail or the transshipment of American freight, but it must be conceded that that transshipment is in foreign bottoms. No one can contend for a moment that this bill, so far as the Pacific Ocean service is concerned, is only for the purpose of seeing the American flag float at the stern of an American-made ship.

On the Atlantic Ocean you propose to spend for one voyage alone on one of these subsidized steamers what it costs the Government for an entire year to carry the mail to South America, and that is $30,000. Why, the number of misstatements which were made by the gentleman from Indiana [Mr. LANDIS] caused me to pale, to suffer, because he would not yield to an interruption when he said that we did not have any adequate freight service to South America to-day; and yet there are to-day 83 dispatches in a year to Brazil alone, and in addition thereto 94 dispatches to Argentina, and the superintendent of foreign mails, in his latest published report, says that this service is regular and reliable.

How else can you defend this proposition if such is the fact, except on the ground of subsidy? Just because England and Germany and other nations are voting large sums of money as subsidies to high-class steamers with high speed is no reason which would justify this Government in following such an extravagant policy, and particularly at this time, when the deficit in the Treasury is confronting and staggering us.

Ah, the gentleman from Alabama [Mr. HOBSON] asked in the question propounded to the gentleman from Tennessee [Mr. MOON] whether the *St. Louis* or the *New York* was of any service in the Spanish-American war. They may have been of service, but I would say to him that this bill does not seek to provide auxiliary cruisers, as the act of 1891 provided, by paying the high value of $4 a mile for first-class steamers, with

the high speed of 20 knots an hour, which might be availed of in times of war.

But this bill provides paying that enormous amount for vessels of the second class of 16 knots speed and of 5,000 tons burden, that could not be of service, and that were not of any service during the Spanish-American war.

We have had this act in force since 1891—seventeen years of trial. Eight routes were first established, and to-day seven of them remain, and on all the lines, including those going to Panama, to Venezuela, and to the Caribbean points, no development at all has occurred. Those boats of the second, third, and fourth classes that were in commisssion under this act were not called upon or availed of by the Government during the Spanish-American war.

Why does the gentleman on this side of the Chamber supporting this measure argue that this act is worthy of extension? The very principle involved in this act after seventeen years of trial shows that it has been found wanting. Who can justify it in the light of the trial of this measure during the past seventeen years, when not one additional line of steamers has been created under the terms of this act? Who can justify adding enormous expenditures, running up into the millions, for the sole benefit of special interests, merely for the sake of seeing the American flag fly upon a few lines of steamers that would be made in American shipyards?

Mr. HOBSON. Will the gentleman yield?

Mr. STAFFORD. I will yield for a question.

Mr. HOBSON. If this does provide for 20-knot ships like the *St. Paul* and *St. Louis*, I ask the gentleman if it would not provide for ships similar to the 49 foreign colliers that have recently taken the coal of the fleet from the Atlantic to the Pacific?

Mr. STAFFORD. Mr. Speaker, the arguments that are being made in behalf of this measure are so far distant from the real issue in the case that gentlemen ought to make apologies for advancing them, and for suggesting on this floor that these vessels are to be used for colliers. Why were they not so used during the Spanish-American war? Why were not the vessels carried under this act called into service during the Spanish-American war? Just because they were unsuited for any naval service. Is there any need for a 14-knot vessel, for which you are going to pay thousands upon thousands of dollars for each trip it makes? Why, if there is need for colliers, let us provide them in the proper way; and we are providing them in the proper place under the navy.

But do not come into this Chamber and try to delude the Members of this body into the belief that this is an aid to our navy, because it is not and never will be used as an aid to our navy. Great Britain is voting millions and millions of dollars to a few fast steamers of high speed that may be called upon in time of war as auxiliary cruisers, but here you are voting the same rate of $4 a mile that the 20-knot steamer of 8,000 tons is receiving to the 16-knot steamer of 5,000 tons. Fleet colliers are provided for in the naval bill, and a contract has recently been let at a cost of $812,000. And yet you are voting that sum of money as a gratuity yearly to some special interest for maintaining but a single line, just because, under the peculiar conditions existing in this country, we can not operate and maintain our shipping—we can not build our ships—on the same economic plane as foreign governments can.

I am not in sympathy with this archaic system of trying to compel the manning of American ships with Americans, when the American people are not inclined by training or disposition to the seafaring life. I recognize the economic fact that some nations incline to the sea; that the Norwegians and Danes and others seek that life, whereas our American people seek the life here at home.

So I say it would be much more profitable for the American people to build these colliers, launch them, and have them ready for use in time of war than to vote this gratuity of millions and millions of dollars, as I have pointed out, to some special interest which does not and which can not maintain itself because of the absence of trade. Why, the gentlemen from the Pacific coast will say, as the gentleman from Indiana [Mr. OVERSTREET] has said, that the instance of the failure of the Oceanic Line of steamers from the Pacific coast to Australia was an instance of the need of this increased amount. I say that shows the futility and the farcical character of this bill, because after a trial of sixteen years, if there had been any trade sufficient to support and justify the subsidy of $300,000 that it received it would have become manifest. Why should you attempt its maintenance by artificial means when there is no traffic to support it? Just merely to pay a bounty which is not called for, because the service to-day is being rendered by other steamers, even though they may be of a slow-going character.

But if there is need of having additional service of fast steamers between Atlantic ports and South American ports, then why grant it to all these subsidized interests, where it is not needed? Why wait until the closing hours of Congress, and then in the last hours bring it up in the committee when there is no opportunity for amendment, under the appeal that if this bill is not enacted into law there will be no legislation whatsoever. For three months those favorable to the subsidy bill had opportunity at any time to present it and ask for its consideration in the Post-Office Committee. But no; they did not give those on this side of the Chamber, who believe in a fair amount being paid for a fast steamship line to South American ports, an opportunity to vote. They wish to crowd it down with this indefensible proposition for the payment of millions and millions of dollars for a service entirely supplementary.

Under the provisions of this bill the Postmaster-General can spend more than $8,000,000 a year because of a clause in the bill which says "the estimated revenue arising from foreign mail service" may be expended, and the report that I have in my hand, which is the last published report of the superintendent of foreign mails, shows that it was $7,863,000 at the close of the fiscal year of 1906. [Loud applause.]

Mr. DAWSON. Will the gentleman yield for a question?

Mr. STAFFORD. With pleasure.

Mr. DAWSON. Do I understand the gentleman from Wisconsin to say that this bill——

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. DAWSON. I would like the gentleman to be given a minute in order to answer a question or two.

Mr. LLOYD. I will yield the gentleman two minutes.

Mr. DAWSON. Do I understand that under the terms of the act of 1891 and under this bill, if it becomes law, they can enter into a contract for ten years?

Mr. STAFFORD. The law of 1891 presupposes a contract for ten years, and under the proposed amendment the Postmaster-General could expend $8,000,000 annually, which is the estimated revenue at the present time for this character of service.

Mr. DAWSON. So, then, this bill might really dispose of $80,000,000 under contracts during the next ten years?

Mr. STAFFORD. Eighty million dollars could be expended by the Postmaster-General in ten years if the revenues from this service continue as at present. As has been brought out by the chairman of the committee, already $16,000,000 have been expended since the act went into effect, or more than $1,200,000 each year.

Now, I claim, my fellow-Republicans, that this measure can not in any sense be supported as a stimulus to the development of the merchant marine. It has been tried for seventeen years, and no increase has taken place. Where can anyone show a development under the terms of that act during those seventeen years?

It is nothing more nor less than voting the people's money to the extent of millions and millions of dollars in the interest of the favored few. For one I am opposed to that policy of conferring benefits on the few at the expense of the many. Subsidy is odious to the American people because of its favoritism, because of the unmeasured and unmerited gratuity to the beneficiaries regardless of the service rendered. This bill is a subsidy measure pure and simple and should be defeated. [Loud applause.]

Mr. MOON of Tennessee. I yield fifteen minutes to the gentleman from Missouri.

Mr. LLOYD. Mr. Speaker, before I begin my remarks, I wish to call attention to the very important speech that was delivered last Saturday evening to the Missouri Society in this city, giving a description of the Sixtieth Congress, delivered by the Hon. J. J. RUSSELL, of this House. I ask leave that I may extend in the RECORD as a part of my remarks this speech of Mr. RUSSELL on the Sixtieth Congress.

The SPEAKER pro tempore [Mr. WASHBURN]. The gentleman from Missouri asks leave to extend his remarks in the manner indicated. Is there objection? [After a pause.] The Chair hears none.

The speech of Mr. RUSSELL is as follows:

SPEECH OF HON. JOSEPH J. RUSSELL.

Mr. President, ladies, and gentlemen, at your February meeting, one year ago, I had the pleasure of addressing the Missouri Society. That was my introductory address; this, I fear, will be my valedictory. The brevity of my official life here reminds me of an old couplet I used to read—

"Since so soon I was done for,
I wonder what I was ever begun for."

Upon my last appearance before your society, I addressed you upon the subject, "The impressions of a new Congressman." In one week from this time I will be eligible to make an address upon the subject, "The impressions of an ex-Congressman." But not wishing to anticipate the doubtful inspiration that my retirement will bring, I shall to-night take as my subject "The Sixtieth Congress."

By constitutional limitation the Sixtieth Congress will die next Thursday at 12 o'clock. I come now not to bury it, but to praise it. I will confine my remarks to the popular branch of the United States Congress, not wishing to invade the dignified precincts of the United States Senate. It is not my purpose to speak of Congress as a body, either to condemn or to praise its work. I am not here to speak as a partisan, but as a man and a citizen, one who is proud of his country and her institutions, proud of the American Congress and the personnel of its membership.

The House of Representatives of the Sixtieth Congress is composed of 391 Members, including the Delegates of Territories and the Resident Commissioners of Porto Rico and the Philippine Islands. Ninety-four of those originally elected to this Congress will not be Members of the next. This I am informed is no greater than the usual biennial change. Of this number 10 have died—Wiley of Alabama, Smith of Illinois, Brick of Indiana, Meyer and Davey of Louisiana, Powers of Maine, Foelker of New York, Granger of Rhode Island, Parker of South Dakota, Dunwell of New York, and Slemp of Virginia. In proportion to numbers the mortality in the Senate has been much greater than in the House, although its membership is not one-fourth as large.

Nine Senators have passed away within the last two years, viz: Alger, Proctor, Pettus, Morgan, Bryan, Latimer, Mallory, Whyte, and Allison. Five Members of the House have been elected to the United States Senate—CURTIS of Kansas, SMITH of Michigan, WILLIAMS of Mississippi, BURTON of Ohio, and JONES of Washington—and it is safe to say that not less than 300 of our present membership have fixed a hopeful eye upon a seat in that higher and more dignified body. Three were nominated for governor of their respective States—Lilley of Connecticut, Kitchin of North Carolina, who were successful in the election, and WATSON of Indiana, who failed of election. Three have resigned—Reyburn of Pennsylvania, resigned to become mayor of Philadelphia; Brumm of the same State, to become circuit judge; and Littlefield of Maine, to resume the practice of the law.

Last, but not least, JAMES SCHOOLCRAFT SHERMAN will become Vice-President of the United States on his retirement from the present House. Of the other 72 who will not be Members of the next House, some were not candidates for reelection, some were defeated in their party primaries, but the majority of them were defeated in the general election. Among the last named, I am sorry to say, your speaker is included, and I will not attempt to disguise the fact that my defeat was a great disappointment to me, as I had persuaded myself to believe that if permitted to remain here for a reasonable time that I could be of service to the people of my district, and to do so was the chief ambition that induced me to seek reelection.

I do not believe that many Members of this or any other Congress have sought the place because of the salary paid, and the man who does so is not only unworthy of the place and the honor, but is not inspired by the ambition and motives most essential to a useful and a distinguished public service.

The disappointment of my defeat has not rendered me pessimistic, nor driven me to denunciation. David Crockett, once a Member of Congress from Tennessee, when defeated for reelection, in an address to his constituents, while smarting under the sting of his defeat, said to them: "You can go to h——l, and I'll go to Texas."

I have entertained no such feelings of resentment, but have, instead, felt grateful to my constituents for what they have done for me in the past and hopeful for what they may do in the future. It is gratifying to me to know that after my service through the first session of the Sixtieth Congress I was renominated by the unanimous vote of my own party, and at the general election the majority against me in my district was 387 less than against William J. Bryan, who was a popular idol of the Democratic party throughout the State of Missouri.

But while accepting my defeat philosophically, I am still not more optimistic than the old farmer who usually looked upon the bright side of everything, even in the hours of misfortune, and declared everything for the best. His boy came to him on one occasion and said, "Pap, you know the old ewe that had two lambs; one of the lambs is dead." The old man said, "Well, my son, that is all for the best, as the old ewe could not sufficiently nourish two lambs, and the one will be larger, fatter, and finer." The next day the boy said, "Pap, that other lamb is dead." The old man said, "Well, son, that is all for the best, as the old ewe will now get fat and will produce more wool and better wool." The next day the boy said, "Pap, the old ewe is dead, too." The old man, with some hesitation, said, "Well, my son, it may be all for the best, but I'll be hanged if I believe it."

It may be that my defeat was "all for the best," but you will no doubt be charitable enough to pardon me for saying that I entertain grave doubts upon that proposition.

I have been able to discover but one real consolation in my defeat, and that, I fear, is rather unsubstantial; I have always heard that it is a rare pupil that can enter the graduating class at the first term.

I will not display such bad taste as to attempt to praise my own record as a Member of this Congress, but feel that it is not inappropriate for me to say that I have tried to do my duty in every way and have at least been faithful in my attendance upon the sessions of the House. I am at this time upon three committees, and have been present at every committee meeting. I have never missed a roll call in the House at either session, as the RECORD will show, and I am advised by some of the officers that this is rarely true of any Member of this or any other Congress.

While my good friend, Hon. Marshal Arnold, was in Congress from the district that I now represent, he visited the city of Sikeston, in his home county, where the people gave him a very hearty reception, and he was introduced to the audience by a young and newly elected mayor of the city, who had prepared a very beautiful tribute to the worth of their distinguished guest, but under the peculiar influence of stage fright he forgot his lines. After stating that many Congressmen neglect their duties in the House by spending their time in quest of amusement or in idleness, he said:

"But look at our own Marsh Arnold; he is always there, just like—just like—just like a knot on a log."

It may be that my presence in the House has somewhat resembled a "knot on a log," still I have always felt that I was at least making an effort toward the faithful performance of my duty when present at the sessions of the House.

The public generally scarcely realize the great amount of business that is done, or of the legislation that is sought to be enacted at every session of the United States Congress, and it will no doubt be a surprise to many to know that in this Congress there has been introduced in the House alone over 28,300 bills and resolutions for the consideration of the different committees and for the action of the House when reported by the committees to which they were referred.

The most interesting and distinguished Member of the House is its Speaker, "Uncle Joe" CANNON. He is a unique character; a man with great mental strength, unsurpassed will power; and yet, when separated from his official duties, he is as kind as a woman and as jovial as a schoolboy. He is personally held in very high esteem by all the Members, but many of us are not in love with the rules by which he governs the House, and among the most pronounced objectors against the present rules are the 29 Republican insurgents. Colonel HEPBURN, one of the most distinguished among them, in a speech on the 17th instant mildly complimented the Speaker of the House in these words:

"If we are to have a benevolent despot, then the benevolent gentleman who is our despot would be my choice."

"Uncle Joe" loves to call us his "boys," and more than once has slapped me upon the shoulder and asked, "What can I do for you, my boy?"

On one occasion when I desired recognition I called to see him for that purpose at his private office. He asked me what I wanted, and I told him that I wanted recognition to call up a bill to authorize the construction of a dam in James River. He affectionately took me by the hand and said, "I am for it, my boy, or any other dam bill that you've got." I have never determined whether the adjective was descriptive or used as a matter of emphasis, but I got the recognition and succeeded in getting the bill passed by unanimous vote; however, my bill met with a serious obstruction, as it was one of the few bills of this Congress that have been vetoed by the President.

Some of my Democratic colleagues have suggested to me that having a bill vetoed by the President is a distinction second only to membership in the "Ananias Club," without suffering the stigma of a presidential insinuation against my veracity.

I made a speech in the House recently in answer to the President's veto message, which I am satisfied if the President has read he now deeply regrets his official action in vetoing my bill, but he has not yet made any apologies to me.

Next to "Uncle Joe," the most distinguished man in the Sixtieth Congress is JAMES S. SHERMAN, who will on next Thursday become Vice-President of the United States. He is known as "Sunny Jim," and his beaming, open face and genial disposition fully justify that euphonious appellation. Notwithstanding his election to the vice-presidency, Mr. SHERMAN has remained a Member of Congress and has attended to his ordinary duties in committees and upon the floor of the House. He now almost daily mixes with the Members as before and takes part in the proceedings and the debates. His seat is in a choice location, and in his absence I frequently occupy the same with his consent, which I presume is as near the presidency as I will ever get.

Mr. SHERMAN is personally very popular among the Members, both Democrats and Republicans, all of whom will wish him well on next Thursday when he leaves his seat in the House to become the presiding officer of the United States Senate.

One of the most distinguished men in this Congress is NICHOLAS LONGWORTH, son-in-law of President Roosevelt. To his credit I am glad to say that his relationship with the Chief Executive of the Nation does not even involuntarily raise him in his own estimation above the social level of his colleagues, but he mingles with the Members in the most unostentatious way. He is affable to all, and courteous even to the youngest and humblest Members. He likes to be called plain "Nick," and is seldom, in private conversation, addressed in any other way.

This address would not be complete without the name of JOHN SHARP WILLIAMS, the minority leader of the first session of this Congress. He is a giant in intellect, a man of great learning, very forceful in speech, and the readiest debater in the House. He will be missed more in the next House than anyone who leaves Congress at the end of this session. He resigned his position as minority leader at the beginning of this session, but his mantle has fallen upon the shoulders of a worthy successor, Hon. CHAMP CLARK, whom you all know. He will not only fill the place acceptably to his party associates in the House, but will do honor to the great State of Missouri, that is so loved by him and by all of the members of this society.

Twenty years ago at this time I was speaker of the Missouri legislature, in the one session that CHAMP CLARK served as a member. Our friendship has ever since been strong and sincere and I have every reason to believe will be as enduring as life. I have often felt that one of the greatest pleasures that could come to me would be to have the honor of serving in Congress under him as its Speaker.

Permit me at this juncture to indulge in a conditional prophesy. If the Democrats should be in the majority in the Sixty-second Congress, CHAMP CLARK will be its Speaker, and if Speaker of that House I hope and believe he will be the next Democratic nominee for President of the United States, and it is not improbable that he may be the nominee even though that Congress may not have a Democratic majority. As this is a nonpolitical society I will not now undertake to announce the result of the next presidential election, but I have no doubt that most of the members of this society, regardless of political affiliations, would be glad to see Missouri's distinguished son nominated and elected to this the highest office in the gift of the American people.

There are many strong and effective speakers on the Republican side of the House, among them Mr. BURTON, Colonel HEPBURN, and Mr. TOWNSEND, but the most finished orator, in my opinion, on that side of the House is my good friend WILLIAM A. RODENBERG. His splendid presence, elegant diction, pleasant voice, and easy delivery all combine to make him a very effective speaker. He deserves, and will no doubt receive, higher honors at the hands of his party, and will probably go to the United States Senate by way of the governorship of the State of Illinois.

On the Democratic side of the House our gifted orators are too numerous to mention. CHAMP CLARK and OLLIE M. JAMES are unquestionably first as popular campaign speakers, but as finished, classical orators, perhaps, BOURKE COCKRAN, MORRIS SHEPPARD, and AUGUSTUS O. STANLEY are entitled to the first places, but JOHN WESLEY GAINES, FINIS GARRETT, Captain HOBSON, and many others are able speakers and ready debaters.

CHAMP CLARK has frequently designated the leaders of the majority party in the House as the "big five," referring to the Speaker, SERENO PAYNE, JOHN DALZELL, JAMES S. SHERMAN, and JAMES A. TAWNEY. With my observation in the Sixtieth Congress I think this list should be enlarged so as to include JAMES R. MANN. In my opinion he has

exercised a more potent influence in the Sixtieth Congress in passing bills that he favored, and in defeating bills that he did not favor, than any Member of the House except the Speaker (whom we all understand under the present rules is practically omnipotent), and I desire to say that I think that in most cases not political Mr. MANN is right, and is a very useful Member of the House in defeating bad legislation. I am very glad to number him among my friends and to acknowledge the many courtesies that he has extended to me during my service.

If I were naming a successor to Speaker CANNON in case the House should hereafter remain Republican, I should unhesitatingly say that JAMES A. TAWNEY or JAMES R. MANN will succeed to that honor, and either of them would grace the position and I believe would carefully guard the interests of the people within the limitations fixed by their party's policies.

While at Chicago last summer attending as a spectator at the Republican national convention I was in the headquarters of "Uncle Joe" CANNON, who was a candidate for the Presidency in that convention. Mr. CHAPMAN, of Illinois, who is himself a strong and useful man in the House, was complimenting Mr. TAWNEY, who was also present, for his wise and economical administration as chairman of the Appropriations Committee at the first session of this Congress, and I added that I thought that Mr. TAWNEY, with the assistance of the Democrats, had saved the people many a dollar, which very much amused Mr. TAWNEY and Speaker CANNON. Of course this remark was made in a jocular way, at the same time not without meaning.

The largest man in the Sixtieth Congress is the Hon. CYRUS A. SULLOWAY from New Hampshire, but OLLIE JAMES, if straightened out once and "fed up" a little, would hold him a close second. Mr. SULLOWAY is 6 feet 7 inches in his stocking feet and weighs about 300 pounds. He is chairman of the Invalid Pensions Committee, and as a Union soldier himself, with a heart as big in proportion to his immense physical frame, and with the tenderest sympathetic feelings for the aged and afflicted of humanity everywhere, and especially among the old soldiers, he has had a splendid chance to carry joy and gladness to the hearts and homes of many of his old, blind, and crippled comrades of the late war and their widows. I have had the honor of serving upon his committee and know how faithful he has been in the discharge of his public duties.

The smallest man in stature in the House is JOHN L. BURNETT of Alabama, who is 5 feet and 2 inches tall. On the night of the adjournment of the last session of this Congress, when the usual confusion and frolic incident to such occasions prevailed, Mr. BURNETT sang for the amusement of the House some comic songs, but friends gathered around him so that none except those near could tell who was singing. In compliance with the demand of the balance of the Members, he was induced to stand on the top of a desk, so that we all might see from what cavity the sweet music emanated.

Mr. BURNETT, although small in stature, wears a 7¼ hat, his head is full of a high order of brains, and he is recognized as one of the most reliable and useful Members of the House.

Among the old and venerable Members of the House, the following prominent men may properly be mentioned:

The oldest in years is Mr. NEHEMIAH DAY SPERRY of Connecticut. He is now almost 82 years of age and has been a Member of Congress for many years. He is held in high esteem by his fellow Members, and when he addresses the House is given perfect attention.

Gen. HENRY HARRISON BINGHAM, of Pennsylvania, a gallant Union soldier of the civil war and hero of the battle of Gettysburg. He is the oldest member of the House in continuous service, and is now known as "the father of the House." He has been elected sixteen times, and at the end of the next Congress will have served thirty-two years.

Gen. JOSEPH WARREN KEIFER, of Ohio, was a general in the late civil war and has had many years' service in Congress, and was Speaker in the Forty-seventh Congress. He is still very active and takes a prominent part in all of the debates upon important questions.

Gen. ISAAC R. SHERWOOD, of Ohio, was also a distinguished Union soldier of the civil war, he having participated in more than thirty battles of that conflict. He was, in 1872, elected to Congress as a Republican, but, with the accumulated wisdom of the passing years, he has changed his political opinions and now occupies a seat on the Democratic side of the House. He is a very able and forceful speaker and a strong champion of the just demands of his old comrades who fought for the preservation of the Union.

Colonel THISTLEWOOD, of Illinois, an old soldier and captain in the Union Army of the civil war. He is now 72 years of age, but is an active and useful Member in Congress. And Gen. GEORGE WASHINGTON GORDON, of Tennessee, who was a distinguished and valiant soldier in the cause of the southern confederacy. He now represents ably and well the Memphis district.

Without any reference to myself, or to any of my worthy colleagues who are so unfortunate as to retire from public life at the end of this session of Congress, I am glad to say that Missouri has been ably and well represented. On the Democratic side there are none who stand higher as faithful and able Representatives than CLARK, DE ARMOND, RUCKER, SHACKLEFORD, LLOYD, HAMLIN, ALEXANDER, and BOOHER. On the Republican side there is no more conscientious a servant of his constituents, nor one more highly respected by his colleagues, than Mr. BARTHOLDT.

It may not be inappropriate to say that the Missouri delegation stands high officially, socially, and morally, and even in the hour of its liveliest agitation we suffered no dread of the President's suggestion of the necessity of secret-service men. Our standing had already been established and well understood, but it was last winter emphasized by one of our number [Mr. HAMLIN] actually having his leg broken at a church. I have understood that some Members from other States have sometimes been "broke," but that it did not happen at the church.

Seriously speaking, I am convinced that the American Congress is, as a rule, composed of a high order of men, mentally and morally. Membership here signifies standing at home, and public service here with its duties and responsibilities tends to beget a genuine regard for the welfare of constituents at home and an anxiety to serve them faithfully and well. Among the many strong, active, and useful Members of the House, are UNDERWOOD of Alabama, SHERLEY of Kentucky, FITZGERALD of New York, HENRY of Texas, LEVER and JOHNSON of South Carolina, HITCHCOCK of Nebraska, and HUMPHREYS of Mississippi, all of whom, if they remain in Congress, will be among the leaders.

Mr. MACON, of Arkansas, bears the distinction of being the chief objector on the Democratic side of the House, and by his vigilance and persistence saves the people millions of dollars at every sesion of Congress, and while it may not tend to ingratiate him in the affections of some of his colleagues, it ought to be appreciated by the people of his district and the country at large.

I esteem it no small honor even to have served for a short term in the American Congress, the greatest legislative body in the civilized world, and one now made famous by reason of the distinguished service there of many of the great men and statesmen who have added service to the pages of our country's history. Among them Webster, Clay, Calhoun, John Q. Adams, Jackson, Lincoln, Jeff Davis, Stephens, Benton, Blair, Hendricks, Blaine, Garfield, McKinley, Bland, Reed, Carlisle, and Bryan.

In conclusion, I desire to say a word to the Missouri Society. This will be my last meeting with you—at least, for the present—and I desire to express to you before I go my sincere thanks for the many courtesies that you have extended to me during my stay here. I shall leave with you my very best wishes for the future years. Since I have been a Member of Congress I have attended every meeting of your society when I was in the city, and have enjoyed them both as a means of entertainment and recreation, but more because it seemed to me that it was an evening of suspension of official duties and responsibilities, and a brief visit to Missouri and Missourians.

I want your society to live and grow in membership. I hope your speakers, declaimers, and singers will continue to glorify our grand old State, and assure you that no words of praise can be extravagant.

If permissible for one who is absent from this, the Capital City, and enjoying the companionship of friends and loved ones in our home State, I desire to continue to pay my annual dues and to remain a permanent member of the Missouri Society so long as we both shall live.

Mr. LANDIS. I will also ask the privilege of extending my remarks in the RECORD.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

Mr. LLOYD. Mr. Speaker, the pending bill has the effect of increasing or doubling the pay that is now given to the ocean steamers in the way of subsidy. This ought to be considered strictly as a business proposition. The Post-Office Department of this Government is a business department and ought to be conducted on business principles. It is proposed here to double the pay that shall be given to certain vessels for carrying the mail. If the proposition was before this Congress to double the compensation that is paid to the railway companies for carrying the mail, there is not a man on the floor that would think for a moment of casting his vote in favor of such a bill; and yet, as a matter of fact, the cost at the present time is about 2.3 cents per pound to carry the mail on a railway train; the average cost is about that sum.

We are paying now for carrying the foreign mails a little over 20 cents per pound on an average. If this bill accomplishes anything, it will have the effect of causing us to pay for carrying the mails to South America about $1,360,000, whereas we now pay less than $100,000 for carrying them. In other words, if this bill accomplishes its purpose so far as South America is concerned, it will cost the Government nearly fifteen times as much to carry the mail between the United States and South America as it is now paying. We, at the present time, pay about $3,000,000 a year for the ocean mail service. There is transported over the seas about 15,000,000 pounds of mail. This bill proposes not to pay per pound, but to pay for distance traveled by the vessel. It does not make any difference whether the vessel shall carry 1 pound, 100 pounds, or 1,000 pounds, the compensation will be the same per mile for carrying the mails.

Mr. COX of Indiana. Would not the vessel be paid even though it did not carry any mail at all?

Mr. LLOYD. Probably so. I do not know how that would be construed. Now, with reference to the mail in the Pacific Ocean, at the present time we are paying a little over $100,000 for carrying that mail. If this bill should become a law and the vessels be placed in service on the Pacific Ocean as it is supposed by the proponents of this bill they will be, then we will pay for carrying the mail on the Pacific Ocean nearly $2,300,000 instead of the $170,000 which we now pay. In other words, both on the Atlantic and the Pacific we will be required to pay, if this bill accomplishes its purpose, fifteen times as much for carrying the mails as we now pay for carrying them.

It will be observed that in carrying the mails between the United States and Europe we have subsidized vessels. It is a strange fact, however, that notwithstanding we have our own vessels which may transport the mails from the United States to Europe, and notwithstanding we pay those steamships for carrying the mails, it is also true that one-half the mail between the United States and Europe is carried in foreign bottoms. Why do we carry the mail in foreign bottoms? Not because our ships do not make 20 knots an hour or 16 knots, as the case may be, but because there are faster vessels in the foreign lines than there is in any American line. Now, that brings us back to the important proposition: What is the duty of the American public? What do the people of this country expect? What does commerce demand? Commerce demands that you shall send the mail on the quickest vessel that will take it to the foreign port, whether it be a foreign vessel or an American vessel. [Applause.] To-day the *Mauretania* and the *Lusitania* are mail ships carrying mail from the United States. Why? Because they are the fastest vessels between the United States and Europe. I am calling your attention to the fact that the senti-

ment back of the proposition that you want to carry the mail under an American flag does not mean anything. What the American wants is to get his mail to Europe as quickly as possible. It is just like the case of the individual. Here is a man going to sail for Europe. Is he going to sail under the American flag? Is it not a desirable thing that every man going to Europe should sail under the American flag?

Mr. WILSON of Pennsylvania. Does the carrying of the American flag mean American ownership?

Mr. LLOYD. No, sir; not necessarily.

Mr. WILSON of Pennsylvania. I thought not.

Mr. LLOYD. Now, I want to call your attention to another thing. It is insisted that we want the American flag at the masthead of the vessel; that we want to carry the mail under our own colors. Certainly we do. We will all agree on that proposition. There is not a man in this presence but is anxious to see the American merchant marine restored.

We are all in favor of carrying the mail beneath the American flag, as well as our freight and our passengers; and yet freight is shipped from the United States in foreign vessels. You travel from this country to another in foreign vessels when you have the opportunity to travel in American vessels. Why? Gentlemen do not stop to consider the question whether a particular boat carries the American flag or the English flag or the German flag; they take the boat which best suits their convenience at the time they want to make the trip.

Now, it is not stated that the effect of this bill will be to build up the American merchant marine. If you will read the debates of 1891 you will ascertain the fact that at that time the law which is now sought to be changed was sought to be enacted because of the fading merchant marine. It was then claimed that if that became a law the merchant marine would be restored to the high seas and you would find the American flag in every port of the world.

To-day we are asked to double the subsidy, and the same argument is made—that if the subsidy is doubled, we will have a line of steamers from New York to South American ports carrying the mail beneath the American flag. There is not one word in the testimony in the hearings before the committee, there is not one authoritative statement that has been given to this body up to this moment that warrants any man in the statement that a single vessel will be built as the result of the passage of this bill.

Now, there is a somewhat mistaken idea with reference to the ownership of the trans-Atlantic line. It is said—and I am not advised on this point—there is more American capital invested in steamship lines than the capital of all the citizens of any other country except one, and that is the citizens of Great Britain. Some of the leading capitalists in the city of New York are said to own one of the great lines running between Europe and the United States, and have a large per cent of the stock of other companies.

What is the situation? Is anything asked to encourage the building up of the mail facilities between the United States and Europe? No. Why? They are not now carried in American bottoms? Why not do that which will cause the mail to be carried to Europe under our flag? You want to carry to South America in American bottoms? Why, it is now carried in foreign bottoms.

I remember when this matter was discussed a year ago, that it was said that there were no steamship lines between the Atlantic ports and South America. This statement was literally true, having reference to American vessels, but there are ten great vessels plying between New York and South American ports. Our mail is now carried in these foreign bottoms. It is now undertaken to build up the merchant marine by creating a subsidy to pay American vessels, and yet that American vessel will not carry the mail unless it carries it swifter than any other vessel that is found in the service, because if England furnishes the vessel, or any other country furnishes one that will carry the mail swifter than our vessels the American merchants will say carry the mail in a foreign bottom because it will be delivered more quickly than in the American bottom.

The SPEAKER. The time of the gentleman from Missouri has expired.

Mr. LLOYD. Mr. Speaker, I wish to incorporate, as a part of my remarks, the statement that is found in the Journal of Commerce, headed "Enemies of the Merchant Marine."

[From New York Journal of Commerce and Commercial Bulletin, February 25, 1909.]

ENEMIES OF THE MERCHANT MARINE.

We should rejoice to see the merchant marine of the United States built up in any legitimate way, and we regard as its worst enemies those who obstruct the legitimate way by persisting in their subsidy schemes, which would take money from the Public Treasury, collected from all the industries and business of the country, to give a profit to shipowners and shipbuilders who are not permitted to make it by their own enterprise. This would be no more legitimate for one industry or business than for another. Not only is it wrong in principle but we are convinced that it would not be successful in practice so long as other conditions were maintained as they are at present. There is neither reason nor justice in hampering and hindering business in a particular line and then taxing other business to help it over the obstacles put in its way, on the plea that it is important to the Nation. First of all, the obstacles should be removed, and then we could judge how far it needed help and whether there were public grounds to justify help from the Government.

One of the most persistent misrepresentations of the subsidists is that the merchant marine of Great Britain and Germany, the two nations that dominate the commerce of the sea, is sustained by subsidies. It is admitted that, on account of the wide extent of the British Empire and the vast navy that it is bound to maintain, the Government of the United Kingdom does contribute to the support of certain lines of mail steamships which have to be fitted at extra expense for auxiliary naval vessels and are liable to be taken by the Government for such service. So far as there might be just ground for a similar policy in this country it would not be objected to. But these mail and naval subventions do not apply to more than about 5 per cent of the British tonnage and in no degree do they account for the success of the commercial marine of the empire. That owes its existence and prosperity to its freedom from trammels which were removed long ago by the abolition of the old navigation laws that sought to confine the British flag to British-built vessels. The only subsidy granted by the German Government is for mail communication to Africa, Australia, and the Orient. Only one line accepts that, and it has not proved profitable either to the shipping or to German trade with that part of the world. The development of the German merchant marine began with freedom to buy ships or have them built where it would cost least and to get the materials for building them free of tax. The merchant marine of both those nations is free from all restrictions that are not necessary to safety and the proper treatment of crews.

While the shipping of these countries has been growing that of the United States has been languishing because it has no such freedom, but is so hampered with restrictions that it can not compete on the ocean, where there is no escape from competition. Nobody is permitted to buy a foreign-built ship or have a ship built in a foreign yard and run it under the American flag and with an American registry; but that does not promote shipbuilding in this country. The drawback of duties on materials that go into building and equipping seagoing vessels is of no avail, because vessels in which the foreign material may be used can only be employed in the foreign trade. If any of them should prove unprofitable there they would be useless and become a dead loss. There are restrictions and requirements as to the employment of crews that make the sailing of vessels under the American flag much more expensive than under foreign flags. There is plenty of American capital invested in shipping that sails under foreign colors and much American enterprise is enlisted in the business, but neither the enterprise nor the capital could win success under the American flag, because the laws of the country will not permit it.

What the American merchant marine needs is freedom and opportunity to measure itself in a fair rivalry, but the public is deafened to any plea for this by the din kept up by the hungry and clamorous subsidists who seek a profit for private interests from the Public Treasury and at the expense of the people at large. They demand that the Government, which makes the business unprofitable, shall pay to shipowners enough to give them a profit in spite of the burdens put upon them and enable them to pass on a profit to American shipbuilders. To be successful this would have to be extravagantly expensive, and a marine sustained in that way would be in a precarious state all the time.

While those who clamor for subsidies are animated by selfish motives, there is no doubt that by plausible arguments and delusive appeals they win the sympathy and support of many who are only misled and whose motives are patriotic and public-spirited. These consider it a matter of national pride to have a prosperous merchant marine and of humiliation to be without it; but they should admit a difference of opinion as to the manner of securing it without accusing the advocates of a different policy of more selfish motives and less patriotism than their own. For those whose interest in shipping is not that of ownership or operation, but of the general promotion of trade and the country's prosperity, have as much to gain from shipping under the American flag as under any other, and would prefer to see it there on terms of reason and justice, and they can not admit the superior virtue and patriotism of those who evade open competition and honorable rivalry and beg the Government not only to shield them from superior capacity, but to pay them their profit out of money earned by others and paid over for public expenditures and not for private gain.

Mr. MOON of Tennessee. Mr. Speaker, I now yield fifteen minutes to the gentleman from Ohio [Mr. BURTON].

Mr. BURTON of Ohio. Mr. Speaker, I very much regret that this bill is brought before the House under existing circumstances. In the first place it is, with one day's exception, the last day of this session. It is impossible at this time to give such consideration to this subject as it deserves. Under the rule under which it is brought in, it is impossible to amend it. In discussing this question we should discuss the reasons for the so-called "decadence" of the merchant marine of the United States. That there has been a great falling off in our shipping engaged in the foreign trade, no one can deny. It is a source of regret to us all.

A hundred years ago the sailing ships of the United States visited the remotest bounds. They not only traded with the West Indies, but with the East Indies and with China. By far the largest share of our carrying trade was in American bottoms, which also supplied transportation facilities between many other countries. Our clipper ships were a source of national pride.

Even at the beginning of the civil war the shipping tonnage of the world might be divided into three practically equal parts. Great Britain had one-third, the United States had one-third, and all the other countries of the earth another third. There

was a falling off, however, even before that time, due to a multitude of causes. The first was the earlier utilization, on a large scale, of steam as a method of propulsion in England and other countries. This is somewhat surprising in view of the fact that the steamboat was first tried in our own waters, in the Hudson.

Next to that was the substitution of iron or steel ships for wooden ships, and the prior adoption of the superior materials across the Atlantic. The unfavorable results of these tendencies were greatly aggravated by the ravages of the Confederate cruisers in the civil war. The decline in our bottoms which are used in foreign trade has been continuing ever since, though the domestic tonnage on the Lakes and the Atlantic, Gulf, and Pacific coasts has not only been well maintained, but in fact much increased, so that, as I recollect, the latest statistics show we are even now the second nation on the globe in the total of our shipping tonnage. In addition to all these causes, however, it must be said that we have by legislation voluntarily abdicated whatever claim we may have to maritime supremacy or, indeed, prominence in foreign trade.

Right here I desire to state, Mr. Speaker, that while I favor restricting boats engaged in domestic or coastwise trade to those of American construction, I do not favor it in traffic with foreign countries, and I do not believe we can ever expect to attain to even a fraction of the prominence of former days without doing away with that regulation. This regulation dates from the very earliest history of the Republic. No ship can carry the American flag and engage in either the foreign or coastwise trade unless it is built in American shipyards—a law which has been abandoned by practically every other country in Europe or in the civilized world. Russia has a protective tariff. So do France and Italy and Germany, but each of these countries allows any one of its citizens to purchase ships wherever he may find them; but by our regulation we are precluded not only from the possibility of having ships constructed abroad, but we are kept from opportunities to buy in times like the present, when the shipping industry is depressed and boats can be purchased at a very cheap price.

Now, what do we desire? It is said that those who oppose this bill are standing in the way of the development of our foreign trade, are standing in the way of the carrying of our mails under the American flag. I should be willing to join in any measure providing for the carrying of the mail to Brazil, to South America, to the Orient, provided the field is thrown open to all those who may bid and to those who could buy their boats anywhere. What are we doing right now? Instead of standing in the way of a measure which promotes the carrying of the mails and American goods in American bottoms, we are standing in the way of a monopoly by the American shipyards. [Applause.] I would not by any means disparage the importance of the shipbuilding industry. Let them have the exclusive right to build boats to ply upon the Lakes. Let them have the exclusive right to build boats to ply between New York and Savannah or New York and Galveston, but if we desire to carry our goods or our mails abroad in boats which have the American flag at the masthead, we must fall into line with every other country and allow the purchase of ships anywhere where they can be obtained.

It is said that a man who favors a protective tariff must favor subvention to our shipping. I deny it, and much of the fallacy, much of the fog and confusion which has attached itself to this question rises from a failure to discriminate between the essential features of the two. Any country can establish a domestic policy of high or low tariff, or of no tariff, if it please. It can say to all the world, "You shall not bring your wares here unless you pay a duty," but when you go out on all the oceans and ship your goods over the world you are brought into competition with the whole world, and the principles which pertain to tariff and to local measures of restriction have no application, because there the fittest and the cheapest is sure to survive.

Now, let me say a word in regard to this measure here. It still has the taint of subsidy about it. It is conceded, as I understand, that we shall be paying, and, indeed, that we are paying now, twice as much for carrying mails in ships built in American shipyards and flying the American flag as we are paying to foreign ships.

Can we afford the difference? This experiment has been tried for seventeen years, and it seems to me it has brought very little result in the way of building up the merchant marine. Now, in 1909, we are asked to annihilate the difference in price between the first-class ship with 20-knot speed and the second-class ship of 16-knot speed and to pay twice the amount to the 16-knot ship which was paid before—that is, to raise the rate from $2 to $4 per mile. That does not look as if there had been very much development of our American marine by this mail bill of 1891; and it is also, if we can judge the future by the past, conclusive proof that we shall not build it up in the future by the adoption of this measure.

I want to call attention here very briefly to some other reasons—and those I have given already are sufficient—why our merchant marine has not developed. We are not like Norway, or England, or Scotland, or Ireland, made up of a population predominantly located near to the water. Ours is not a country which is at the same time surrounded by water and with water at no very great distance away at any point. We are not a people with sailors pursuing that avocation from generation to generation.

Mr. HOBSON. Will the gentleman yield for a question?

Mr. BURTON of Ohio. Yes.

Mr. HOBSON. Is the gentleman aware of the fact that in the United States there are more citizens living within a 15-mile radius of water that is navigable along the coast line and can be reached from tributaries to the coast line—more American citizens within reach of sea or water influence than there are similar citizens, barring the population of Asia, in all the rest of the world combined?

Mr. BURTON of Ohio. I am not so sure of that statement, Mr. Speaker, and even if it were true the gentleman from Alabama must take into account the fact that this is a very great country, and it is the proportion of our citizens who are near to the sea on which we should judge this question. Our people have been giving their attention to other pursuits, the marvelous development of our interior country, the development of mines, the cutting of forests, the building up of great manufactures. The whole bent of the people is toward employment on land with the idea that a seafaring life is unagreeable and marked by hardship and by danger.

These facts have exerted an influence which can hardly be weighed in determining the degree in which our merchant marine has declined. Now, to summarize: You are not going to build up a merchant marine by subsidies. I challenge reference to a single country where subsidy has been successful. The more that is given in that manner the more will be demanded; the more you foster habits of dependence, the more you have dependence [applause] and the more you lack that independence and that initiative which are absolutely essential to success in any great branch of industry. You will not build up a merchant marine by giving these mail subsidies or payments.

The SPEAKER. The time of the gentleman from Ohio has expired.

Mr. MOON of Tennessee. Mr. Speaker, I yield five minutes more to the gentleman from Ohio.

Mr. BURTON of Ohio. Call up the countries in succession and name to us one where there has been a growth of merchant marine, a healthy, permanent growth, under the fostering influence of subsidy. What will be gained in the enlargement of our merchant marine by this bill?

Mr. WEEKS. Mr. Speaker, will the gentleman yield for a question?

Mr. BURTON of Ohio. Yes.

Mr. WEEKS. I would like to ask the gentleman from Ohio if he does not think that Japan would furnish an instance of that kind?

Mr. BURTON of Ohio. Japan is already to an extent, according to reports, abating her policy. She has been discussing the subject and report has been made against subsidies; and another thing—the gentleman knows as well as myself that the growth of Japan has been something marvelous; she has developed along all lines—politically, socially, and economically.

Simply because a country has come to the fore in the world and at the same time has had subsidies, you can not say it is the subsidy which accomplished the results attained. It is to the energy and progressiveness of her people that Japan's place among the nations of the earth is due. [Applause.]

Mr. REEDER. Will the gentleman permit a question?

Mr. BURTON of Ohio. Yes.

Mr. REEDER. Is it not a fact that the difficulty with our merchant marine is the wages we have to pay as compared with the wages paid by other countries?

Mr. BURTON of Ohio. That is one factor.

Mr. REEDER. Is not that the great factor?

Mr. BURTON of Ohio. They are more comfortable, better fed; they have larger wages. I remember once speaking to a foreign seaman who was employed on one of our ships, and he said he received exactly twice as much wages as he did abroad——

Mr. REEDER. And is not that the great thing?

Mr. BURTON of Ohio. That is a very important factor. I wish also to quote from the words of a gentleman who is the owner of large ships on the Pacific coast. He said:

If you relieve us from your navigation laws, if you will allow me to buy ships where I can, if you will leave me alone, I will develop a merchant marine under the American flag without any subsidy or without any special bonus.

[Applause.]

Mr. WILSON of Pennsylvania. Mr. Speaker——

Mr. REEDER. One further question.

Mr. BURTON of Ohio. I will yield to the gentleman from Pennsylvania in just a minute.

Mr. REEDER. Is it not a fact that wages is a much more dominant factor than the cost of the ships in the long run?

Mr. BURTON of Ohio. Figuring on perecentages, it is; but you must bear in mind there is sometimes much greater efficiency in highly paid labor, though right in that connection I want to say the difference in efficiency which would apply in a manufacturing establishment, or at the very edge of the sea in unloading, does not manifest itself in the handling of a boat. You can not very well devise inventions for handling ropes and the numerous forms of labor which must be performed on board ship. I now yield to the gentleman from Pennsylvania.

Mr. WILSON of Pennsylvania. Is it not a fact this bill only provides that a small proportion of the seamen shall be Americans, and that the wages are dependent, not upon the flag that is carried by the ship, but by the port from which the seamen are shipped?

Mr. BURTON of Ohio. The act of 1891, as I recall, provided, not the first year, but later, 50 per cent and——

Mr. WEEKS. Mr. Speaker——

The SPEAKER. Does the gentleman from Ohio yield to the gentleman from Massachusetts?

Mr. WILSON of Pennsylvania. I would like the gentleman to answer my question.

Mr. BURTON of Ohio. Of course that is a feature of our policy which I would not altogether wish to have changed.

Mr. WILSON of Pennsylvania. In regard to the question of wages I had reference to, the rate paid to the seamen is not dependent on the flag that is carried by the ship, but is dependent upon the wages that obtain in the port at which the seamen are shipped.

Mr. BURTON of Ohio. To an extent, that is true, though the fact that is of vital importance here is that the American seamen receive much larger wages than the seamen of other countries.

Mr. WEEKS. Referring once more to Japan, I would like to ask the gentleman from Ohio if he does not know that the subsidies paid this year by Japan are the largest in the history of that country?

Mr. BURTON of Ohio. That may be.

Mr. WEEKS. And further, Mr. Speaker, I would like to ask him if he will not admit that the recent stimulus given to the Japanese and German merchant marine is due very largely to the subsidies that have been paid them?

Mr. BURTON of Ohio. To the German merchant marine?

Mr. WEEKS. Yes.

Mr. BURTON of Ohio. Not by any means. There are two prominent companies over there—the North German Lloyd and the Hamburg-American. One receives a subsidy and the other does not. Judged by the test of dividends, the Hamburg-American, which does not receive a subsidy, is the more prosperous of the two.

Mr. WEEKS. Does not the Hamburg-American receive a subsidy?

Mr. BURTON of Ohio. It receives a reasonable mail payment, not a subsidy. The North German Lloyd does not receive a subsidy in the sense in which the word in commonly used here. Then again, in regard to Japan, the gentleman from Massachusetts [Mr. WEEKS] will admit that under any form of intoxication common to the most familiar walks of life there is a temporary exhilaration. What I say is, that there is no permanent, wholesome growth under a subsidy. [Applause.]

Mr. WEEKS. But exhilaration does not last for years, either from intoxication or anything else.

Mr. WALDO. Does not the gentleman think it is a healthy growth with England?

Mr. BURTON of Ohio. Oh, yes; and that is the one notable country that has built up her merchant marine without subsidies.

Mr. WALDO. They have not any subsidies to-day?

Mr. BURTON of Ohio. They have no subsidies whatever in the sense the term has been used in legislation here. I merely want the gentleman to study the subject for himself, and he will agree with me.

The SPEAKER pro tempore (Mr. WASHBURN in the chair). The time of the gentleman has expired.

Mr. MOON of Tennessee. Mr. Speaker, I yield two minutes more to the gentleman from Ohio [Mr. BURTON].

Mr. BURTON of Ohio. The time is coming when there will be, I have no doubt, a rehabilitation of our merchant marine. When will it be? Not after subsidies, not after extravagant mail payments, but when the tastes and pursuits of our people become still more diversified. When we have exploited every plain and valley for agricultural purposes, and when we have put a factory with a smoking chimney on top of every hill where one can be built, then the thoughts of our people will turn more to the sea. If you did not have these navigation laws, they would tend more in that direction now, for to-day tens of millions of our capital is invested in ships that sail with the flags of England and Germany, and at least some of the owners would be very glad in case those ships owned and controlled by them had an equal chance to have their ship fly the American flag, and that, too, without subsidies. [Loud applause.]

Mr. MOON of Tennessee. Mr. Speaker, I yield fifteen minutes to the gentleman from North Carolina [Mr. SMALL].

[Mr. SMALL addressed the House. See Appendix.]

Mr. MOON of Tennessee. I yield to the gentleman from Georgia.

Mr. ADAMSON. Mr. Speaker, under pretense of expediting foreign mails, this bill is really intended to "rehabilitate" the American merchant marine. It should more properly be styled "bill to impose additional burdens on our people to establish and enrich another privileged class." To restore our merchant marine would be easy if it were really desired that it be done properly and honestly. To "rehabilitate" implies former existence, restoration of which is sought. It is well known that the splendid merchant marine which prior to our civil war whitened every sea with its sails, carrying our commerce and our flag to all countries, returning as argosies to enrich our people with the wealth of all nations, was crippled, destroyed, driven from the ocean by protective tariff, that arch enemy to commerce, the masses of the people, honesty, and good government. If shipping were profitable, our people would invest money in the business. It ceased to be profitable when prohibitory duties prevented our ships from hauling foreign goods into our ports. If they can not bring home foreign goods, there can be no foreign demand for our products, so they could not carry our products abroad. "We can not always sell to people from whom we buy nothing."

They must exchange some of their own products for what they buy from us. Their stock of cash is too limited; they must raise their money, just as our people do, from their products. The greatest evil of protection aside from its immorality, long ago admitted by that great Republican, Theodore Roosevelt, is that it deprives our people of the markets of the world to sell their products. If a few prohibitive duties on leading articles of production in the various foreign countries were reduced to a revenue basis, our 90,000,000 producers could load ships with cargoes easily and profitably exchange for return cargoes, making business satisfactory and gainful to ships and shippers. The reason this is not done is the fear that the profits of a few thousand protected favorites who control the transactions of the other ten millions would either be reduced or rendered a little more troublesome and laborious of realization. Great as was the loss in men and money, the greatest evil of the civil war was the enthronement of greed and the installation of special privilege. While passion and malice clouded reason and blunted the moral sense, a financial oligarchy was established by law at the expense of the people by the destruction of fair and honest banking and financial systems. A manufacturing class was then created and authorized to usurp the taxing functions of the Government, limit the markets of the people, and grow rich by exacting tribute from their fellow-citizens, instead of allowing them to pay fair and just taxes into the Treasury.

It is now proposed to establish another privileged class; but instead of allowing them to thrive by the restoration of fair and honest conditions, their wealth and power must be promoted by taxation—an additional burden on the common people without diminishing the privileges and profits of the classes already intrenched. There should be no objection to appropriating all money necessary to improve mail facilities, foreign and domestic, but indirection is vicious; sham and hypocrisy should have no place in legislation. The pending bill is undoubtedly intended as an entering wedge to the iniquitous ship subsidy. It is an insidious initiation of a scheme hereafter to be claimed as fixing a policy and enlarged into all the enormity and robbery ever hoped for by those who expect to be the beneficiaries. If existing prohibitive duties were reduced to an

honest revenue basis, so as to allow commerce to resume its natural and rightful movement, general prosperity would abound and an overflowing Treasury would enable us to establish and support all the postal facilities we need or want to promote intercourse at home or herald abroad the glad tidings of prosperity and happiness among a hundred million people and our good will for all mankind trading with us in peace and friendship, while we exemplify for universal admiration the success and beneficence of constitutional free government on earth.

Mr. MOON of Tennessee. Mr. Speaker, I yield five minutes to the gentleman from Wisconsin [Mr. KÜSTERMANN].

Mr. KÜSTERMANN. Mr. Speaker, I much regret that a period of but a few minutes is given to me, because there is probably no one on this floor who has made a more thorough study of how to restore the merchant marine of our good country than I have. [Applause.]

The purpose of this bill now before the House is very clear, It is to give to the Pacific Mail Steamship Company $4 a mile instead of $2. They are now carrying the mail for $2 a mile, but they say "We will surrender our charter if you do not give us $4." Why, it is the same thing every time the naval bill is up we hear of the war with Japan; and every time the subsidy bill is up we hear that the Pacific Mail Steamship Company is going to surrender its charter. [Applause.] If you really want a direct line to South America (and no one wants it more than I do), why do you not follow the example of Great Britain, a country that does not give any subsidy, but simply pays for service rendered?

Great Britain advertises for bids to carry mail over certain lines, not alone the lines of the shipowners of her own country, but of every other country, and the company that will carry the mail the cheapest and most quickly gets the contract. If we want to get a direct route to South America, instead of paying $23,000 for every trip a ship makes there, or $600,000 per year for four ships, why, if we can not get any private interests to take care of that route, then let us have our own government ships carry the mail there. We have a number of colliers and transports that are not always kept busy. We have war vessels that could go there, and let the boys drill on the way; but do not give such a subsidy as is provided for in this bill to these special interests. I tell you right here that the people of the country at large are decidedly against favoring special interests, or against what they call "class legislation." [Applause.]

Now, these subsidy people must be very desperate, because the secretary of the Merchant Marine League has made a personal attack on me in a letter that I have in my hand, and copies of which, I understand, have been received by the four hundred or so Members of this House. This subsidized agent of the Merchant Marine League, like all of his kind, has endeavored to befog the real issue by raising the hue and cry that I am of German birth. Of course I am of German birth. Everyone in this House is well aware of that fact. And, moreover, everyone knows that I am an American citizen in every sense of the word and that no one is more loyal to or more watchful of American interests than myself. Notice the painful effort, then, of this man Penton to create the impression that I am representing foreign interests because I am of German birth:

FEBRUARY 27, 1909.

Hon. GUSTAV KÜSTERMANN,
House of Representatives, Washington, D. C.

SIR: The writer has before him your communication of February 24 in reply to our letter of February 22, with reference to the ocean mail bill now before Congress.

We note that you have avoided answering any of the questions asked and likewise have omitted any reference to the direct statements contained in our letter; but, instead, your communication contains a few glittering generalities and a number of personalities, having no bearing whatever upon the subject under discussion.

You do, however, say in your letter, referring to your own bill before Congress, that—

"There appears to be a wonderfully widespread sentiment on the part of the voting population of the United States in favor of the measure and views I espouse, as opposed to the subsidy grabs which you are advocating."

In view of the fact that the measure which we are so warmly urging is along exactly similar lines, and an amendment to that passed by Congress in 1891 and signed by Benjamin Harrison, then President of the United States, we wonder if you would refer to Benjamin Harrison as a "subsidy grabber."

In view of the fact that this bill has been warmly commended by the President of the United States, by the Vice-President, by all the members of the President's Cabinet, especially by Secretary Root, and has been passed unanimously by the United States Senate, we would like to inquire if you regard these gentlemen also in the class designated by you as "subsidy grabbers," and if you would be willing to tell President Roosevelt, Secretary Root, and others who have so warmly advocated it as an absolute necessity that you regard them as being guilty of a crime of that character—and do it to their face.

In a few days the people of these United States are going to honor a distinguished gentleman in the person of William Howard Taft by formally installing him in the office of President; and if you do not know, you should know, that President-elect Taft in his speech of acceptance of this bill now before Congress as follows:

"The only respect in which nothing has been done is in the development of our foreign marine. As long as we uphold the system of protection for our home industries, we must recognize that it is applicable to assist those of our citizens engaged in the foreign shipping business, because there is no feasible means of excluding foreign competition, and that the only method of building up such a business is by direct aid in the form of a mail subsidy.

"I am in favor of the bill considered in the last Congress as a tentative step. The establishment of direct steamship lines between our Atlantic ports and South America would certainly do much to develop a trade that might be made far greater. On the Pacific the whole shipping trade threatens to pass into the control of Japan. Something ought to be done, and the bill which failed was a step in the right direction."

We would like to be advised if, when you meet Mr. Taft after he has formally become President, you would be willing to say to him that you regard him likewise as belonging to that questionable class of people who are faithless to the trust with which they are charged, and that in your judgment he is a "subsidy grabber."

This bill has likewise received, after earnest consideration, the warm approval of a large number of your colleagues, men whose character in Congress and out of Congress are above suspicion. Are we to infer that you regard them as being deserving of the dishonorable term used in your letter and subject to the suspicion which your communication indicates should be directed toward legislation of this character?

Do you mean to say that the Speaker of the House of Representatives, Hon. JOSEPH G. CANNON, has favored this measure because it is a "subsidy grab?" If so, would you dare to tell him?

This ocean mail act has been indorsed, approved, and urged upon your favorable consideration by practically every national association of business men in the United States, including the American Bankers' Association, the National Association of Manufacturers, the National Board of Trade, and a large number of others. Do you mean to say that your wisdom is so far superior to all these organizations combined; that it is a "subsidy grab" they favor, and that the thousands and hundreds of thousands of business men who are hoping Congress will act favorably, in order that they may have direct facilities for carrying their mails, passengers, and commodities to South America and other countries where now we have no direct lines and no business, are all imbued with a dishonorable motive?

Do you mean to say that the gentlemen whose names appear on this letterhead are "subsidy grabbers?" Do you mean to say that the officers of this league are "subsidy grabbers?" Do you dare to imply that in sacrificing their time, their money, and effort in behalf of American commerce, American manufactures, and the American flag, they are all inspired by some mean, contemptible, and despicable self-interest of which every honorable man should be ashamed?

The vice-president of our league in your State of Wisconsin is Mr. W. H. Whiteside, president of the Allis-Chalmers Company, a plant employing from three to five thousand workingmen, and the writer would be willing to wager something that you would never stand and tell him face to face that he is either a "subsidy grabber" or a friend of "subsidy grabbing." The ninth district of Wisconsin would very quickly need another Congressman if you ever attempted it.

Just for your information, I want to say to you that there is no section of the United States where the people are more thoroughly alive upon this subject than in your own State. There is no State in the Union in which there have appeared more frequently favorable editorials than in your own State, and such highly respected papers as the Milwaukee Wisconsin, the Appleton Post, and the Janesville Gazette, and others have frequently published splendid editorials indicating a deep study of this entire subject in a way that ought to convince anyone but a highly prejudiced individual.

It seems to us that for anyone born and educated in Germany, and who commenced his business career in Hamburg, where are located the headquarters of the great European steamship trusts, to come to this country and question the intelligence of its loyal citizens in advocating a measure in behalf of the American flag, shows poor taste, to say the least.

The Küstermann bill, proposed by you, and which is becoming more generally known as the "Hamburg bill," is, of course, very warmly indorsed and supported and urged upon the favorable consideration of Congress by the large and influential lobby representing the foreign shipowners and ship operators who are thronging the lobbies of the Washington hotels and of the Capitol. They and their friends in Congress are doing all they can by offering every sort of specious excuse in opposition to the proposed legislation, which has been so earnestly urged by everybody who knows anything about it, and are trying to clog the wheels of legislation and prevent the Stars and Stripes flying at the mastheads of American steamships.

It has actually come to this, that representatives of the foreign governments, foreign shipowners, ship operators, and shipbuilders have the effrontery, right in the city of Washington, with the aid of those who favor legislation in their interest, to attempt to thwart the will of the great majority of the American people; but the writer wants to advise you that the Stars and Stripes in the future, as in the past, will always win out. Maybe not as soon as it would if not hampered by those who pretend to be its friends, but it will win; and a new day is about to dawn for our flag, as far as its commerce is concerned, in spite of the efforts of those who are working with you in Congress to further the interests of the foreign shipowners and ship operators. American commerce, American manufactures, American agriculture, and American labor are going to, before long, have a square deal.

Yours, very respectfully,

JOHN A. PENTON, *Secretary.*

It must be that the subsidized interests have become thoroughly alarmed over my recent speech to have gone to all this trouble. [Applause.]

Think of the remarkable brain caliber of this subsidized agent of the merchant marine who expects to influence votes by the following paltry argument:

It seems to us that for anyone born and educated in Germany and who commenced his business career in Hamburg, where are located the headquarters of the great European steamship trust, to come to this country and question the intelligence of its loyal citizens in favoring a measure in behalf of the American flag, shows poor taste, to say the least.

Now, Mr. Speaker, I claim to be as good an American as anyone that was born within the borders of this country. [Applause.] I do admire our flag, and that is the reason I took the trouble to study a method to restore our glorious flag to the seas. I know that as soon as my suggestion is carried out and my bill enacted into law, to wit: Allow foreign-built ships for foreign trade to be subject to American registry and permit foreign capital to be invested in our ocean ships, you will restore the American merchant marine of this country.

We allow foreign capital to come in here and build up our railroads, but we say to them: "No; you can not come in here and build up our merchant marine. We will not let you." Why one and not the other?

This is the reason that the flag is not displayed as it should be. In this subsidy bill we are simply paying a large reward for the patriotism of these shipping interests to display our flag, and it is entirely wrong to pay anything for patriotism. [Applause.]

I am in receipt of hundreds of newspaper clippings and letters from all parts of the country commending my stand against these subsidized interests.

Here is a fair illustration of what the people of the Middle West think of subsidies, as contained in the following comment in the Commercial West, of Minneapolis:

There seems a determination on the part of some influential interests in the East to impose upon this country the burden of a ship subsidy. Only recently the House Committee on Merchant Marine announced that in the future the committee would make adverse reports on all bills proposing the issuance of American registry to foreign ships partially reconstructed in shipyards in the United States. There is, apparently, a determination in certain influential quarters not to grant any concession toward permitting foreign-built boats to fly the American flag. If the heavy and senseless handicap of not permitting foreign-built vessels nor vessels with foreign crews to register were removed, the country might soon have a merchant marine, and without the burden of a ship subsidy, which would in reality go to enrich a few wealthy shipyard owners and steamship corporations.

Now, in listening to the distinguished gentleman from Indiana [Mr. LANDIS], who spoke of the possibilities of our trade in South America, I am constrained to ask whether he ever thought of the real cause of the United States not receiving its share of business in those South American republics.

The real trouble is that our merchants and manufacturers do not go after the trade as the manufacturers of European countries do.

No agent from Europe ever goes there to solicit trade without fully understanding the language of the people of those countries, which is Spanish. I am informed that agents for American firms not versed in Spanish expect their customers to learn English so that they may sell them American goods.

Another failing of the American agent, I am told by European agents employed in South America, is that the American agents do not stay long enough to get acquainted with their customers, but are always in a hurry and expect an order on the first day of their arrival.

Still another reason for the failure of the American agent to capture orders is that he expects to have his customers select from the samples he carries with him, while the European agent offers to furnish such styles of merchandise as suit the tastes and demands of those countries, even though he does not carry with him the special design desired.

I maintain that trade does not follow the flag, and it is not at all likely that any more trade could be obtained in South America, even though subsidized ships were ready to transport the goods.

Get the trade first and then there will be no difficulty in finding ships that will eagerly seek that business without the proffer of subsidies.

British and other tramp steamers are ready at all times to take cargoes wherever they find them, irrespective of the nationality of the shipper or of the country to which the goods are to be transported.

In this connection it may be well to state that over 90 per cent of the merchant vessels of Great Britain is composed of tramp steamers, which do not receive 1 cent of subsidies for services rendered from the British Government.

My speech against subsidized merchant marine was delivered in the House on January 26 of this year, and a few days later—to be accurate, February 5—Henry Clews, the world-wide known merchant and banker of New York, in an address to the Merchant Marine Congress, held in the Metropolitan Temple, New York, indorsed almost in their entirety the views I had expressed on this subject in the House.

Mr. Clews said in part:

HOW TO REALLY DEVELOP AN AMERICAN MARINE—HENRY CLEWS SAYS ADOPT METHODS OF SUCCESSFUL RIVALS—THE LOSS OF PRESTIGE DUE TO ECONOMIC CHANGES AND BAD LEGISLATION—BUY SHIPS IN THE BEST MARKETS AND REPEAL NAVIGATION LAWS.

The decline in American shipping became most pronounced after the civil war; not because of the destruction of our ships by confederate cruisers, but because of radical changes in economic conditions. As soon as peace was declared this country started upon an era of tremendous internal development. All our energy was turned in that direction, and American capital flowed freely into railroad enterprises, while many of the men who had previously made fortunes in shipping now turned their attention to the tempting opportunities offered in developing our railroad systems and their natural resources.

Thus it came to pass that both capital and labor found much more profitable employment ashore than afloat; and while we were bending all our energies toward building railroads, Great Britain was equally energetic in building ships. In each case the development was perfectly natural.

To some extent the decline of our merchant marine was accelerated by the passing of the wooden ship and the introduction of iron vessels, for which England at that time had better opportunities and methods of construction than ourselves. Other countries sought to compete with Great Britain—France, Germany, and the United States—but none succeeded.

Subsidies were tried on a liberal scale by each country, but even these expedients failed to check British progress, mainly because she built the best ships at the lowest price, ran them at the lowest cost, and, above all, controlled the commerce with which to fill them. This she did upon a purely business basis; for, mark it, while a few of her best ships did receive liberal postal and admiralty payments, more than 90 per cent of her ships never received a dollar of subsidy, and yet competed successfully with ships, British and foreign, that did receive subsidies in various forms. In certain cases Great Britain paid liberally for frequency of service and extra speed for the purpose of securing quick and regular communication with her distant empire, for political reasons, just as our Government subsidized the Pacific railroads years ago for the purpose of binding the Pacific coast more firmly to the Union. She also paid well for admiralty requirements which often demanded expensive changes in construction.

But in every case the payment was made for services rendered, and not with the deliberate intent of developing her merchant marine, though that, of course, benefited.

The truth is that we in the United States are very seriously handicapped in this matter of competition on the ocean, because the principles of protection can not be made to work at sea, no matter how skillfully or rigidly drawn. Unfortunately, American ships cost more to build and to run than any others in the world. This, gentlemen, is the real reason why our merchant marine is disappearing; this is the crux of the whole question; this is where we must all begin to look for the true remedy.

And now that we know the reason, where should we find the remedy? Certainly not in the expedients of subsidies, which have been tried over and over again without success, and which are in opposition to the will and independent spirit of our people. Wherever tried, they have tended to monopoly and inefficiency. We must secure both our ships and our sailors on the best terms possible. That is the foundation of England's extraordinary success. She buys her ships, her supplies, and her labor in the cheapest market. So must we. If a ship costs $1,000,000 here and $750,000 abroad, we must buy abroad. If Americans don't want to go to sea because they can find a more profitable job ashore, let them do as they prefer and let us employ sailors wherever we can get them. We can never succeed in establishing any merchant marine until we cease depending upon crutches and get down to the sane, sound, and business-like methods which have brought success to our rivals.

Right here there is one point that I should like to impress upon you, because it is one that is generally overlooked in spite of its monstrous injustice. An American can buy anything in this world that he wishes and bring it home, provided he pays the duty, except a ship; that is the only thing on earth that he can not buy and bring under the protection of his flag. What is the consequence of this stupid piece of legislation? Why, there are hundreds of fine vessels owned and operated to-day by Americans which are actually forced to hide under foreign flags. Is this justice? Is this freedom? Is this patriotism? Repeal our stupid navigation laws and the American flag would unquestionably be seen waiving in every port of consequence in the world. What is the use of talking about the nonexistence of a merchant marine when we have already one in existence that would instantly do us credit did we not foolishly force it to hide and sail under false flags, and to depend upon the more hospitable protection of other countries and other navies. In truth we have literally protected our merchant marine to death. We need more than anything else some sane recognition of changed conditions and a sweeping away of the obsolete laws.

"Our present system is false and suicidal. Subsidies might, of course, make a few unprofitable lines profitable at public expense; but that is not the true function of government, and at best would be but a temporary support, liable to be withdrawn at any turn of the political wheel. This is a case where freedom and not protection is the cure, and where American ships should be permitted to come out from their present concealment. Protection has never yet succeeded on the high seas and never will. This is not only history, but sound and good economics.

Mr. MOON of Tennessee. Mr. Speaker, I yield fifteen minutes to the gentleman from New York [Mr. SULZER].

The SPEAKER. The gentleman from New York [Mr. SULZER] is recognized for fifteen minutes.

Mr. SULZER. Mr. Speaker, the proposition under consideration is essentially a ship-subsidy bill—nothing more and nothing less. Call it what you will, the subsidy features can not be disguised. It is a subsidy subterfuge, and the merest kind of a miserable makeshift. If it is enacted into law, it will retard intelligent shipping legislation for a decade at least. I am opposed to the bill, and I trust it will be decisively defeated.

I am now, and always have been, and always expect to be absolutely opposed to ship subsidies of every kind that rob the many for the benefit of the few. Ship subsidies do not build ships; they create ocean-trading monopolies. Ship subsidies will not give workmen employment in American shipyards; the money taken without justification from the Treasury of the people will simply go into the capacious pockets of the beneficiaries of the shipping trust. Every scheme of this kind simply permits respectable corruption and benefits the few at the expense of the many. The principle of ship subsidies is inherently wrong and absolutely indefensible, and no man who under-

stands the question can justify the robbery in the face of the facts. [Loud applause.]

Mr. Speaker, there is no man in this country more anxious and more willing to enact proper legislation to restore the American merchant marine than myself, but I want to do it honestly; I want to do it along constitutional lines; and I want to do it in harmony with that fundamental American principle of equal rights to all and special privileges to none. [Applause.]

For years I have been advocating honest and intelligent legislation to restore our merchant marine, and for years the Republican majority in this House has turned to my appeals a deaf ear. The Republican party is responsible for the present deplorable condition of our merchant marine, and every intelligent student of the subject is aware of the fact.

In 1896 the Republican party wrote in its national platform a plank to restore the American merchant marine by discriminating duties. That meant something, but Mr. Hanna, the then leader of the Republican party, came to Congress and instead of adhering to that plan he introduced a bill for ship subsidies, an outrageous measure which was overwhelmingly defeated. Thereupon I introduced a bill for discriminating duties, and the Republicans refused to allow it to be considered. Such is the consistency of the grand old party.

The Republican party abandoned the plank of 1896 for discriminating duties and did not have the courage to readopt it, or renounce it, in its platform of 1900, and studiously avoided committing its followers to any policy in its platforms of 1904 and 1908. No political party in all the history of our country has ever dared to write in its platform a plank in favor of ship subsidies, and, in my opinion, no party that does not welcome defeat will ever do it.

The Republican leaders in Congress, notwithstanding their party professions to the contrary, have been advocating ever since I have been in the House of Representatives, the restoration of the American merchant marine by ship subsidies, by gratuities that rob all the people in order to foster a special industry. I am opposed to ship subsidies, and this proposition is a ship-subsidy measure pure and simple. It is a little ship subsidy, it is true, and that is the apology its advocates now make for it. It is just a little subsidy, forsooth, but I warn the Members that it is the entering wedge to open the Treasury of the people, and if it is adopted it means in the end a gigantic raid on the country's finances, not for $3,000,000 a year, but for $30,000,000 a year, and for years and years to come.

This proposal before us to-day, if it be successful, is the beginning of a systematic scheme to rob all the people for the benefit of a few, and if it is rushed through under the party lash in the closing hours of Congress, I predict that the people, from one end of the land to the other, will denounce it in unmeasured terms and never rest content until it is repealed.

The American people are unalterably opposed to a ship-subsidy raid on the Treasury. A subsidy is a bounty, a bonus, a gratuity, and it never has succeeded, and it never will succeed, in accomplishing the purpose desired. All history proves it conclusively. Wherever and whenever it has been tried it has failed. In my opinion, if a subsidy bill should pass it would not restore our American merchant marine or aid our shipbuilding industries. It is a waste of time to talk about ship subsidies, and I believe every honest American is opposed to them. We might just as well pass a bill to pay a subsidy to every man who grows a bushel of wheat or a bale of cotton as to pay a subsidy to the man who sails a ship. [Laughter and applause.]

Now, sir, it appears to me that the people who are clamoring the loudest for this ship-subsidy bill are the bounty beggars who will get the subsidies; but, so far as I have been able to find out, I have heard no demand from the honest folk of the country in favor of this iniquitous measure to take money out of the Treasury of the people and pay it over to the American shipping trust.

This is an inopportune time, it seems to me, to ask for ship subsidies, when the Treasury is bankrupted and the people all over the country are demanding a revision of the tariff, especially a reduction of those tax schedules which shelter monopoly and give protection to the trusts that sell their manufactured wares cheaper abroad than they do at home. But it seems that the chief argument of these ship-subsidy schemers, reduced to its last analysis, amounts to about this: As all other monopolies are protected, therefore the shipping monopoly must be protected; as all other trusts are licensed to rob the many for the benefit of the few, therefore the shipping trust must have an opportunity to pilfer the people and get its share of the spoils. The plea, however, seems to come at a very unfortunate time, because the Treasury is empty, and from one end of the land to the other the people are demanding not only the prosecution of the criminal trusts, but a substantial reduction of all protective tariff taxes that aid and shelter monopoly.

The taxpayers of our country, burdened now almost beyond endurance, are opposed to ship subsidies. They are opposed to any gift bill. They say no private business interests should be aided by direct grants from the Treasury. Ship subsidies are subversive of the eternal principles of justice and equality, contrary to the theory of our free institutions, of doubtful expediency, and at war with the spirit of the Constitution. Congress has no power to subsidize any trade or any calling, on land or sea, at the expense of the taxpayers of our country. Any attempt to fasten this odious system of ship subsidies on the legislative policy of the country is unDemocratic, unRepublican, and unAmerican. [Applause.]

Mr. Speaker, I am now, always have been, and always will be a friend of the American merchant marine. I long for the coming of the day when American ships will be on every sea and our flag gloriously floating on the breeze in every port. I am willing to go as far as any man in this country to legislate for the restoration of the American merchant marine to all its former glory and to secure for the American people their just share of the over-seas carrying trade. I know, and every man who has investigated this subject knows, that our loss of deep-sea commerce is due entirely to our own iniquitous legislation and shortsighted policies. If the American Congress would legislate intelligently regarding this subject, we could restore our merchant marine and secure nine-tenths of all our commerce on the high seas, exports and imports, without a ship subsidy or without taking a single dollar from the pockets of the taxpayers. This whole subject is a very simple matter when reduced to an intelligent business proposition. We do not need to take a dollar out of the pockets of the taxpayers, or out of the Treasury of the United States to revive our shipbuilding industries and restore our merchant marine.

All we need to do is to legislate intelligently, repeal the iniquitous laws against our deep-sea shipping now on our statute books, put in their place laws similar to the navigation laws that were enacted by the early statesmen of the country, laws that built up our merchant marine in those historic days, laws that placed our flag on the high seas and gave us nine-tenths of our entire over-seas carrying trade. Why not do this and abandon these futile attempts to enact ship subsidies? If we would only follow in the steps of the fathers, we could speedily restore our ocean carrying trade, revive our shipbuilding industries, give employment in our shipyards to thousands and thousands of men in all parts of the country, bring about an era of prosperity such as we have never known before in our shipping trade and deep-sea commerce, place our flag on ships in every sea, and make the American sailor what he was in the historic days of the Republic—the pride of the people and the arbiter of the ocean highways of the world. [Applause.]

It is a simple matter, and would be done but for the corroding influence of special interests and the tenacious grasp of monopolistic greed.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. GOULDEN. Mr. Speaker, the bill under consideration is simply an effort to carry the protective tariff—the infant-industry proposition—into the shipbuilding business. Two years ago a similar measure was discussed, and finally, after emasculating it so that it was disfigured beyond recognition, it passed the House by a majority of 11. It then went to the Senate and died there, talked to death. This measure is an old one, and has been knocking at the doors of Congress for many years. The decadence of the merchant marine is due directly to the high protective policy of the Republican party. The late repentance of that party, as evidenced by the plank in the national platform adopted in June last at Chicago, the efforts of President-elect Taft and the majority members of the Ways and Means Committee, will, I hope, result in a wise and substantial revision of the tariff. This accomplished, and the trusts and monopolies that have grown fat and impudent through an exorbitant profit way above the normal and fair standard will again seek other channels of investment. So long as these immense profits could be obtained in the highly protected interests, money would not go into the shipbuilding business, hence the merchant marine of the country languished and decreased.

With all this changed and the steel and other great trusts making only normal profits, other industries will grow and prosper. Among these will be found the merchant marine of this country. The claim of caring for the infant industries of the country is now so thoroughly exploded that even the latest of these, the beet-sugar and tin-plate trusts, have ceased to prate about this once popular catchword. Mr. Carnegie laughed all these claims out of court in his interesting testimony before

the Ways and Means Committee in January of this year. The other equally fallacious claim for the existence of the protective tariff—that of good wages to the American laborer—has been exploded so often, especially by the American Federation of Labor, representing more than 2,000,000 workingmen, and the Patrons of Husbandry (the Grangers), with upward of a million and a half of farmers of the country, that it needs no words of mine to convince the people. This measure was for many years before the Committee on Merchant Marine, of which I have had the honor to be a member for six years, and thoroughly thrashed out. Finally, by an extraordinary pressure from high places and tactics by no means creditable, a measure was brought out of the committee by a vote of 9 to 8, and one of the former voting members bitterly opposed it on the floor of the House. Even if a subsidy be granted, it will never be successful, as the moment it is withdrawn the ships thus benefited go out of business. It is simply a scheme to get money from the taxpayers through the United States Treasury.

At best it is and always has been merely of a temporary advantage, a mere expedient, and does not justify the expenditure of the country's money. A reading of the hearings before the Committee on Merchant Marine during the last six years, and in the debates before Congress two years ago, will clearly prove the fallacy of the claims for subsidy for the rebuilding of the merchant marine of any country. Now, what is the remedy aside from the revision of the tariff, so welcome to all parties at this time? In my judgment, it should be, first, a tonnage tax on foreign ships, or, secondly, a reduction of the duties on imported goods brought over in American bottoms. Either of these remedies, properly applied, will do more to place the American flag on ships which carry our trade to the people of the world than a score or more of millions of dollars in the way of a ship subsidy. It would be a distinct step backward to attempt what this bill proposes—to carry the protective principle to the shipbuilding interests of the Republic.

In conclusion, I desire to include as a part of my remarks the very able report of the minority of six Democrats and two Republicans of the Committee on Post-Offices and Post-Roads:

It will be observed that section 3 of the act divides American vessels to which mail contracts may be awarded into four classes. The first shall be "capable of maintaining a speed of 20 knots an hour at sea in ordinary weather," and of a gross tonnage of not less than 8,000 tons. The second class shall be "capable of maintaining a speed of 16 knots an hour," and of a gross tonnage of not less than 5,000 tons. The third class shall be "capable of maintaining a speed of 14 knots an hour," and of a gross tonnage of not less than 2,500 tons. The fourth class shall be "capable of maintaining a speed of 12 knots an hour," and of a gross tonnage of not less than 1,500 tons. Section 5 of the act provides that the rate of compensation to vessels of the first class shall not exceed the sum of $4 a mile, of the second class $2 a mile, of the third class $1 a mile, and of the fourth class two-thirds of $1 a mile, traveled on each outward-bound voyage. The bill under consideration proposes to pay vessels of the second class the same rate applicable to vessels of the first class, and to pay vessels of the third class the same rate applicable to vessels of the second class, such service to be on routes to "South America, to the Philippines, to Japan, to China, and to Australasia, 4,000 miles or more in length, outward voyage."

It will be noted that compensation to vessels of the second and third classes is increased 100 per cent. It is contended by advocates of this bill that the rates of compensation provided in the act of March, 1891, are not sufficiently high to enable the Postmaster-General to make contracts with American vessels for the transportation of ocean mail, particularly to South America and trans-Pacific ports. We do not wish to be understood as opposing the extension of our mail service upon the ocean. On the contrary, we favor such extension as may be commensurate with our commercial needs. However, it is not pretended that this measure is necessary to enable the department to make contracts for carrying the ocean mails to the points named in the bill. If proposals were made subject to unrestricted competition, bids would be submitted and contracts could be made for carrying the mails within the limits of compensation provided in the act of March, 1891. It is admitted by the officials of the Post-Office Department that free competition would result in contracts for carrying mails at a very much cheaper rate than is provided in the bill under consideration.

So it is manifest that the purpose of this bill is not to extend our ocean mail service, but for another object, which will be adverted to a little later. As illustrating this proposition, it appears from the last report of the Second Assistant Postmaster-General, under the subject of foreign mails, that in the transportation of ocean mails in vessels not under contract, but at the pound rate, that steamers of American registry are allowed as compensation the full postage collected on the mails so conveyed, estimated to be 80 cents per pound for letters and post cards and 8 cents per pound for other articles, while steamers of foreign registry are allowed only 35 cents per pound for letters and post cards and 4½ cents per pound for other articles. This compensation is calculated on the basis of the actual net weights of the mail conveyed. It will therefore be seen that in the conveyance of mails by the pound rate foreign vessels receive less than one-half the compensation paid to American vessels, and yet they gladly seek the opportunity of carrying the mails at this reduced rate.

If the primary purpose of this bill is not to provide for the carrying of our ocean mails, then what is the purpose? It is neither more nor less than a poorly concealed attempt to subsidize our merchant marine, and because the subsidy comes out of the revenues of the Post-Office Department, instead of a direct appropriation from the general revenues of the Government, does not in the least conceal the true purpose or minimize the evil of such legislation.

It is also proper to state here, in order to avoid any misunderstanding, that we are mindful of the depleted condition of our merchant marine in the foreign trade; that we recognize the importance of increasing the number of American ships and of training our own citizens as officers and seamen, from the ranks of whom such ships may be officered and manned; and that we are willing to support any proper legislation which shall restore our prestige upon the seas. But we are not willing to vote the public moneys for the support and maintenance of either shipyards or ships, or any other private enterprise, and such a proposition is none the less reprehensible because it is proposed under the guise of carrying the ocean mails. Is the primary purpose of this bill to subsidize American ships? Let us see.

We have shown above that the main purpose was not to carry the mails. We would naturally look to the position maintained by the advocates of this proposed legislation in order to ascertain their main purpose. There were hearings before the subcommittee of the House Committee on the Post-Office and Post-Roads at the last session, at which advocates of the measure appeared and submitted arguments in its favor. We challenge any fair-minded man to read these hearings and then say whether the purpose of its advocates was not to procure the building of American ships and to subsidize these ships when they were put in commission. Among those who appeared before the subcommittee was the then Second Assistant Postmaster-General, Hon. J. T. McCleary. He was formerly a distinguished member of this body, familiar with legislative procedure and with the duties of his position in the Post-Office Department. This distinguished gentleman founded his argument upon two propositions, first, that the Union was formed for the common defense, and, second, that the common defense could only be maintained by the maintenance of a navy, and that auxiliary vessels were necessary for an effective navy. He therefore concluded that this bill would provide such a merchant marine as could in time of need be converted into auxiliary cruisers.

We submit that this is one of the star arguments which were heretofore heard so often in favor of ship subsidies. Similar arguments have been presented in the speeches which have been made on this floor heretofore in support of this bill. It is true there are some who, upon reflection, endeavored to justify this legislation in behalf of our ocean mail service, but it will be found in every instance that they recognize the futility of such a position and invariably in the end resorted to the stock arguments in favor of subsidizing the merchant marine.

It is, therefore, fair to assume that the friends of this bill recognize and know its purpose, and that their position can be taken as indicating the primary and essential object in enacting such legislation.

Who are promoting and pressing this bill? The same men, the same interests, and the same influences which have for more than ten years been pressing direct subsidy legislation before Congress. As early as the Fifty-sixth Congress a subsidy bill was considered before the House Committee on Merchant Marine and Fisheries, which was so apparent a raid upon the Treasury and was such a conspicious discrimination in favor of special interests, that it met with the opposition of even some of the friends of the measure and aroused the indignation of the entire country.

During the years immediately succeeding the press of the country, regardless of political differences, criticised this proposed subsidy legislation and induced its advocates to abandon their former bill. In succeeding Congresses since the Fifty-sixth the advocates of subsidy have from time to time proposed measures which they endeavored to make less and less objectionable, but none of them met with the favor of the majority of this body, because in their respective capacity they knew that such legislation did not find favor with their constituents. Reluctantly abandoning the hope of any legislation which should propose a direct subsidy, the friends of such legislation, with a persistency which was worthy of a better cause, finally conceived this plan of invading the Treasury through the medium of the Post-Office Department. This movement is perhaps the most shameful of all previous attempts. If there is one of the executive departments of the Government which should be conducted as a great business organization, which should be free from all unjust discrimination and which should possess the full confidence of the people of the country, it is the Post-Office Department. Their action is, therefore, the more culpable in that they have sought to use this department as a cover for ship subsidies. The fact, however, that they have so resorted to this expedient is a confession of the weakness and indefensible character of the position which they have heretofore assumed.

The attitude of Members must, of course, be determined by themselves. It is apparent that the majority of this House have not at any previous session been in favor of subsidy legislation, either directly or indirectly. To those who have been opposed to this prostitution of the legitmate functions of the Government to private interests, we submit that there is nothing in this bill which should change their attitude or which will enable them to justify before their constituents a conversion from their former convictions.

Mr. WILSON of Pennsylvania. Mr. Speaker, it is proposed by this bill to pay for carrying our mail in American bottoms four times as much as we can get it carried for under competitive bids, and that proposition is made under the guise of building up a merchant marine that can be available in times of war as auxiliary cruisers. In other words, it is proposed during years intervening between now and any war that may occur that we shall pay three-quarters of the entire cost of carrying our mail to these ports over and above the regular cost of the same, thereby in time paying the entire cost and value of these ships, and in the end having the ships still in possession of the private owners.

Much has been said about the flag floating from the masthead in every port of the world by the proponents of this measure, contending that this measure will result in restoring that condition and will also build up our shipyards, but it must be remembered that even when our flag is floating from the masthead, it does not mean that the ship under it is owned by American citizens. The capital invested may be owned principally by subjects of a foreign country and, under those circumstances, in paying these subsidies we would be taxing our own citizens to pay tribute to foreign capital.

There is nothing in this measure that will assure the building of any ship in American yards aside from those that are necessary for the purposes intended by the bill.

It is asserted that the higher wage rate paid the sailors on American vessels is one of the reasons why our merchant marine has declined. There is a great deal of fallacy in that statement. The rate of wages paid the seamen does not depend upon the flag that is floating from the masthead. The seaman is not paid the higher wage rate because he is employed by a ship floating the American flag. On the contrary, the wage rate is determined by the scale of wages for seamen which obtain at the port where the seaman is employed. A ship from Calcutta or Rio de Janeiro employing sailors in the harbor of New York would have to pay the wage rate that obtains at New York, and a ship from New York or San Francisco employing sailors at Hongkong would only be required to pay the wages which obtain at that port, even though the ships were floating the American flag.

This bill only provides that one-fourth of the seamen employed for the first two years shall be Americans; for the three years next succeeding it provides that one-third shall be Americans, and thereafter one-half; so that the question of wages of seamen has not been an important factor in the decay of our merchant marine.

We have been told by those supporting this measure that Great Britain, Germany, France, Japan, and other countries are subsidizing their merchant marine, and because of this subsidizing American ships can not compete with them. If that is true, if those countries are taxing their subjects in order to carry our passengers and freight at a cheaper rate than we can do it ourselves, why not let them continue to tax themselves for that purpose? It would seem to me to be a good business proposition. [Applause.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. PERKINS, and Mr. TELLER as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28167) entitled "An act to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public building acts, and for other purposes;" and further insists upon its amendment No. 12, disagreed to by the House of Representatives, had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SCOTT, Mr. MCCUMBER, and Mr. CULBERSON as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 21003) fixing the compensation of certain officials in the customs service, and for other purposes.

OCEAN MAIL.

Mr. MOON of Tennessee. Mr. Speaker, I now yield five minutes to the gentleman from Missouri [Mr. CLARK].

Mr. CLARK of Missouri. Mr. Speaker, the gentlemen against this bill on the two sides of the House, in making very short speeches, have set forth arguments that no mortal man can answer, because they are buttressed up by immutable facts. For the benefit of all concerned, I will relate a very short piece of history. Two years ago, almost to a day, on the first roll call we defeated this bill by 1 majority. Then, through a series of unfortunate incidents, we lost it by 6 on the sixth roll call. Then it went over to the Senate, and one of the most brilliant men that ever served in the House or Senate, Senator Carmack, of Tennessee [great applause], won imperishable renown by talking that monstrous bill to death. He served his country with consummate ability, and millions cherish his memory with deep affection.

In the long session of this Congress a subsidy bill was brought in twice. Its proponents thought they would catch us napping, but they never did. On one vote we beat them by 11, and on the other vote we beat them by 9. They generally manage to bring the proposition in here under whip and spur and try to railroad it through with as little discussion as possible. If they would give us time to consider the bill, to debate it, to offer amendments, and then, if they could pass it fairly, nobody would complain of it. We are, however, not only opposed to the bill, but we are also opposed to the method of procedure touching it.

I state further—and I dare any man to deny it—that there has been a large and persistent lobby around here for this bill, operating right on the floor of the House itself. [Applause on the Democratic side.]

That is a disgrace, Mr. Speaker, to the House of Representatives—coaxing men, buttonholing men, cajoling men, threatening men. When the distinguished gentleman from Tennessee [Mr. MOON] denounced this bill as an "infernal fraud," he used language that he was justified in using. He is conservative and level headed. There was revealed a monstrous state of affairs by the statement of my colleague [Mr. LLOYD], when he said that under the operations of this bill it would cost us fifteen times as much to carry the mail to South America as it does now. Nobody contradicted him, because he mathematically demonstrated his assertion to be true.

In 1857 we had the second largest merchant marine in the world. Our flag floated in every harbor. It has been swept from the high seas. I have no time to go into the reasons for it. The gentleman from Ohio [Mr. BURTON] and myself have differed many times about many things, but so far as his statement went to-day I indorse every word of it. I am as anxious to see an American merchant marine as any living man, and I will vote for any proposition that is reasonable to build it up.

The truth is that the principal element in wiping it from the ocean has been this system of barbarous, antiquated, and inadequate navigation laws that we have in this country. Remove them and give the American who has the money the right to buy a ship wherever he pleases. Reform the barbarities of our navigation laws and we will have a merchant marine once more. You may rob the American people as much as you please, but subsidies will never build up a merchant marine. That is not the way to accomplish it. All history proves that proposition. I will remind gentlemen who are in favor of this subsidy that about two or three years ago, I have forgotten exactly when it was, the man who is going to be sworn in as President of the United States day after to-morrow, then Secretary of War, stated in an interview, which amounted to a proclamation, that unless certain people in this country sold ships for the use of the Panama Canal at reasonable rates the Panama Canal Commission would buy the ships in the cheapest markets of the world [applause], and that statement by the President-elect was indorsed by the President who is in the White House to-day.

This ship-subsidy proposition has more lives than a cat. Kill it to-day and it bobs up serenely to-morrow; but we will keep on killing it till it is too dead for resurrection. Let us see what this is. The very first dash out of the box you spend $3,600,000 a year, and every man who has any sense knows that it is but the entering wedge, the beginning of an extraordinary and gigantic raid upon the Treasury [applause]—and that, too, at a time when the deficiency in the revenues already amounts to $13,000,000 a month, is increasing every day, and will increase every day until the tariff bill is passed, by which time it will amount to $25,000,000 a month. I call to the attention of the House again the warning of the gentleman from New York, Mr. PAYNE, chairman of the Committee on Ways and Means and Republican floor leader, the other day that a bond issue is in sight in a time of profound peace. You are simply hurrying that bond issue up by passing this bill. [Applause.]

ADDITIONAL JUDGE, TERRITORY OF HAWAII.

The SPEAKER laid before the House the following message from the President of the United States, which was read:

To the House of Representatives:

In compliance with the resolution of the House of Representatives (the Senate concurring) of the 1st instant, I return herewith House bill No. 21896, entitled "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes."

THEODORE ROOSEVELT.

THE WHITE HOUSE, *March 2, 1909.*

Mr. JENKINS. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the desk and ask to have read in respect to that message.

The Clerk read as follows:

House concurrent resolution 76.

Resolved by the House of Representatives (the Senate concurring), That the Speaker of the House and the President of the Senate be authorized to cancel their signatures to H. R. 21896, "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes," and that the bill be reenrolled, with the correction in section 23, line 2, after the word "and," strike out the word "eight" and insert "nine," so that the sentence shall read: "Section 23. That this act shall take effect and be in force on and after the 1st day of July, 1909."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the concurrent resolution.

The question was taken and the resolution was agreed to.

OCEAN MAIL.

Mr. OVERSTREET. Mr. Speaker, I yield five minutes to the gentleman from Ohio [Mr. GOEBEL].

Mr. GOEBEL. Mr. Speaker, this discussion has taken a wide range. Let us get back to the real questions that are involved in this bill. It is sought by this bill to amend the act of March 3, 1891, which provides for an ocean mail service and the promotion of commerce. There are, therefore, two propositions involved in this measure. First, shall we have an adequate mail service upon the seas, and, second, shall we at the same time aid the commerce of this country. Seventeen long years of experience by the Post-Office Department has demonstrated that the original act is not liberal enough to enable that great department to contract for the carrying of our foreign mails. Time and time again has that department sought to obtain contracts, but failed. Now, then, either repeal the act of 1891 or amend it so that the department may be enabled to carry out the objects and purposes of the act. We seek to amend the act by raising the pay of the second and third class ships to four and two dollars, respectively, and to establish a route to the Philippines, China, Japan, and Australasia. As to other matters contained in the original act, it makes no changes. Under the act the Postmaster-General is authorized to contract, after advertising for three months, for this service. It opens the door for competition. Anyone may come in and bid. He is directed to accept the lowest bid that may be presented, and he can reject any and every bid. He absolutely controls the situation, and can direct what shall be done with reference to carrying out the purposes of the act.

Why, Mr. Speaker, one of the greatest functions of this Government is that it affords ample facilities to the American people in carrying the mails. We control the mails upon the land; why should we not control the mails upon the seas, if that be possible. I say to you that our present ocean mail facility is deplorable; that unless you provide for its relief in the near future, you will have further crippled that important service. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. OVERSTREET. Mr. Speaker, I yield ten minutes to the gentleman from Washington [Mr. HUMPHREY].

Mr. HUMPHREY of Washington. Mr. Speaker, the chairman of the committee, the gentleman from Indiana, said in his speech this morning that the time would soon come upon the Pacific coast when we would be sending our ammunition and supplies to the Philippines on Japanese vessels. I beg to inform the House that we are now not only sending our supplies and ammunition, but our soldiers, to the Philippines under the Japanese flag. Not a single American vessel to-day goes regularly to the Philippines. Now, I want to go upon record as one man from the Pacific coast who does not believe that we are in danger of having war with Japan. [Applause.] Every man upon the Pacific coast recognizes that the coming of the Japanese into this country must be regulated, controlled, and restricted. Japan herself recognizes this fact, and she has told us that she is regulating their coming, and I believe that she is acting in good faith.

I see no reason to anticipate war. We have every reason to believe that peace will continue, but those people who think that Japan would not declare war if given what she considered sufficient provocation or that she is unable to carry on war from a financial standpoint have read the history of that wonderful people to little purpose. While I do not believe that war will come, yet if it should come, then I want my country to be prepared. If war should come upon the Pacific Ocean to-day, with our navy upon the Atlantic, what is our condition? If that war was with Japan she could place a quarter of a million men in the Philippines and 100,000 men in Hawaii before we could embark 10,000 men from any point upon the Pacific Ocean. Japan has to-day upon the Pacific 560 vessels fit for transports. We have 6 American vessels. Japan can carry 200,000 men at one time upon the Pacific Ocean. We can not carry 10,000 men.

Japan has upon her ways to-day more than 50 vessels under construction for the deep-sea trade. There is not one under construction in all this Nation and has not been for the last six years. We could not to-day place 50,000 troops in the Philippines in two years. So that if a contest should come upon the Pacific Ocean we must depend entirely upon our navy. How would our navy now upon the Atlantic reach the Pacific Ocean? When our vessels made that trip around the world, as has been said, they employed foreign ships to carry the coal. If war is declared the foreign ships can not be employed, and if we should have war to-day upon the Pacific Ocean it is doubtful if our magnificent navy, for which we have just appropriated $138,000,000, could in the moment of our distress leave the port in which those vessels are to-day anchored. If you think this is sensational, go talk to the Secretary of the Navy, talk to Admiral Dewey, talk to the naval officers of this country, and see what they will tell you.

This bill, if passed, will give at least 30 American vessels, every one of which will be built under the direction of the navy, every one of which will be at the call of this Nation in time of war.

And now the gentleman from Ohio [Mr. BURTON] has said that we would get a merchant marine if we would change our navigation laws, but he did not tell how he wanted our navigation laws changed. The only difference between our navigation laws and the laws of foreign countries is that our laws compel us to pay higher wages, compel us to furnish better quarters for the seamen, and compel us to give them better food. Do the gentlemen want the wages reduced? Do they want our sailors to have poor food?

Notwithstanding what the gentleman has said, every naval auxiliary upon the ocean to-day was placed there by a mail subsidy. Every merchant marine upon the ocean to-day was placed there by a direct ocean mail subsidy. And it has been my pleasure to speak upon this question from the Atlantic to the Pacific Ocean, and I challenge the statement that has been made upon this floor that the American people are not in favor of doing something to build up our merchant marine.

We are the greatest nation upon earth. We have the greatest commerce and we can pay the greatest subsidies. It certainly is worth as much to this Nation to have our flag upon the ocean as it is worth to other nations to keep it off of the ocean.

And I believe, and I know that throughout the country, wherever I have been, that the majority of the American people are in favor of paying a subsidy, however large it may be, sufficient to give us an auxiliary for our navy and transports for our army. They are willing to pay a subsidy, however large it may be, sufficient to make the American commerce the mightiest in the world, to be carried in American ships constructed in American yards by American labor, paid American wages, and flying the American flag. [Applause.]

Mr. Speaker, I yield back whatever time I have remaining.

Mr. OVERSTREET. Mr. Speaker, how much time has the gentleman occupied?

The SPEAKER. Seven minutes.

Mr. OVERSTREET. I now yield ten minutes to the gentleman from Alabama [Mr. HOBSON].

Mr. HOBSON. Mr. Speaker, this bill makes a reclassification of the act of 1891, giving ships of the second class the benefit of the rate fixed by that act for the first class. The effect of the original law was to create an excellent steamship line with Europe; and in the war with Spain the four ships of that line—the *Harvard*, the *Yale*, the *St. Louis*, and the *St. Paul*—were invaluable auxiliaries to our naval service. If we had had ten instead of four, the New England coast and other coasts of our country would not have been thrown into such a panic, and we would not have gone on a futile expedition to Porto Rico and have searched the West Indies for weeks in vain in order to locate the enemy's fleet. But the act of 1891 did not bring forth ships upon the South Atlantic and upon the Pacific, for the very clear reason that for the long distances of those oceans 20 knots is impracticable and ought not to be required. A 16-knot ship is a first-class ship for that service, and it ought to be entitled to the same benefits that a first-class ship receives in the Atlantic service.

If this measure becomes a law, there are only two existing ships that could get the benefit of it, namely, the two fast 18-knot ships of the Pacific Mail. The other ships of that line, nominally put down at 16 knots, are getting old and could not come up to the requirements. Two ships would not be sufficient to inaugurate a mail service. They would have to build, at least two more and probably three more. The six vessels of the New York-Cuba mail service have too small bunker capacity for the longer service to South America. Therefore no money would be paid out of the Treasury; no money could be paid out of the Treasury unless new ships were built. My investigation goes to show that the ships to fulfill these requirements would cost about a million and a quarter to a million and a half of dollars, according to the ship building market. And my estimates go to show also that each one of those ships would earn a subsidy of about $125,000 to $150,000 a year. Therefore the amount available, about $3,600,000, the excess of revenues over expenses, could give us the benefit of between 25 and 30 new ships, and not a dollar of it would be spent unless we got the ships. [Applause.]

The time has come when we must have such ships. We are competing in the markets of South America, of Australasia, and of Asia with the manufactured articles of the great maritime nations of the earth. They are transporting our merchandise. What corporation would allow its competitors to transport its products to a competitive market? We can never hope, no matter how cheaply we produce in this country, to have a fair chance to win those neutral markets of the world unless we are independent in our transportation. America is fast becoming an exporter of manufactured articles. With our natural resources and the aptitude of our people, we can produce the great world staples cheaper than any other country. With the completion of the Panama Canal and the improvement of our internal waters, the way will be clear for water transportation from our great centers of production to the great neutral markets of the South Atlantic and Pacific. It is high time for us to begin to get control of the lines of transportation. We simply must have the merchant ships under our own flag and out from under the control of our competitors.

I have here a list of the subsidies of our competitors. Every great nation in the world, and many of the smaller nations, have gone definitely into the transportation business on the high seas. I will not enumerate them in detail, but in sum they amount to $36,000,000 a year. Every one of these nations is our competitor, and we are now dependent upon them for the transportation of our merchandise. If we are going to give our own producers and give our own country a fair chance to gain the markets of the world, we must have our flag upon the seas, and our Government alone can meet the competition of these foreign governments. [Applause.] These new merchant ships are not only necessary to our commerce in peace. They are necessary to the efficiency of our navy in war. When war comes upon us we must have them. Auxiliaries in large numbers are becoming so vital for war that the whole trend of the present is for the nations to control them more and more. Ultimately they may own and operate their merchantmen. They are going to have these vessels, no matter what the sacrifice.

The best illustration that can be cited is the recent voyage of our fleet around the world. It was a lamentable fact that we had to hire from foreign countries 49 colliers and pay them over $940,000.

Our fleet is valued at $500,000,000, but without those colliers that fleet could not have gone those long distances. We are the one great Nation where our vital commerce lies along both the great oceans, so that in every mobilization our fleet must pass over long distances. During this period of mobilization we would be found impotent in case war broke out in the Pacific, where the danger is greatest. Therefore we must have auxiliaries. They are more vital to America than to any other nation. We might as well not have the $500,000,000 fleet as not have the auxiliaries necessary for that fleet to move over the ocean to the point where it is needed.

The General Board has worked out what we need in auxiliaries. It estimates that we ought to have 1 great scout cruiser of 20-knots speed for each battle ship. This would require 30. It estimates that we ought to have 5 fast fleet colliers of 15 knots for every squadron, which would now require 20 such vessels; that we ought to have 5 slow colliers for every squadron, making 20. It estimates that we should have 1 hospital ship, 1 tank ship, and 1 supply ship or every squadron, and 1 repair ship and 1 torpedo depot ship for every squadron. It estimates that we need 6 transports for our marines. Counting other vessels, this means that we ought to have 100 more auxiliaries than we have, and that our fleet is crippled until we get them. There is no choice left us, Mr. Speaker. We must get these vessels one way or another. There is now no other way than for the Government to go into the business of ocean transportation. The bill before us is the simplest and most direct and conservative form in which to begin. It simply changes the classification under the law of 1891 until it is equitable for the South Atlantic and Pacific.

The new ships must be built before any of the money is paid, and the total is limited to the revenues derived from the service. I know there are other measures needed, and additional measures will have to be adopted, but this is a good way to begin.

I wish to make an appeal to my colleagues on this side of the Chamber. I believe the true basis to be a good Democrat, like the true basis to be a good Republican, is to be a good American first. [Applause.] Where we see our country's vital interests, its industries, its commerce at stake; where we see its security, perhaps its honor if not its very life involved, we ought not to hesitate because of party lines.

So vitally is our defense involved that not only may the navy be found impotent, but if we were raided from across the ocean we could not get transports for an army and could not strike back. Having no merchant marine makes us helpless, so far as action in the Philippines and lands over the sea. Though we might be able to raise 6,000,000 men, we could not reach the other side. We are left absolutely powerless and helpless because we have no transportation on the high seas.

This ought not to be allowed to continue; Democrats and Republicans alike should recognize the facts. They should not bandy words about platforms. Because somebody cries "Subsidy!" "Subsidy!" should every Democrat run to cover and hide his face from the truth? [Applause.] It is a question not only of business, but of patriotism and of conscience. Let Democrats not be frightened because our platform condemned a subsidy measure defeated long ago. But let us do as George Washington would advise us to were he here—to subordinate partisanship and vote for the good of the country. [Loud applause.]

Mr. OVERSTREET. I would be glad if the gentleman from Tennessee will occupy the remainder of the time allotted to him. It is my intention to close the debate with one speech.

Mr. MOON of Tennessee. Very well, Mr. Chairman. I yield to the gentleman from Minnesota [Mr. STEENERSON] three minutes.

Mr. STEENERSON. Mr. Speaker, as a member of the Committee on the Post-Office and Post-Roads I had occasion to consider this measure carefully. It has been discussed so long, both in the public press and in this House, that I believed it proper that it should be reported, in order that the House itself might pass upon its merits.

I want to say that I approached this question with an open mind, desiring to decide it in favor of the bill if I conscientiously could.

The reasons advanced in favor of this measure are very plausible. They appeal to our patriotism. First, they say that by this means we would expedite the mail, and, besides, we ought to carry the mail under the American flag. Second, they say that we ought to encourage commerce with foreign countries. Third, they say we must provide auxiliary ships for the navy.

The first is a delusion and a snare, because it will not expedite the mails but delay them. Next, it may encourage a little commerce, but it will be at an expense enormously out of proportion to the amount of commerce to be gained.

So far as furnishing auxiliary ships to the navy is concerned, the ships here contemplated are utterly useless, notwithstanding the eloquent plea of the gentleman from Alabama [Mr. HOBSON], who always seeks to throw us into a frenzy for fear of a foreign war. These ships are slow ships. They would be overtaken by the enemy. They could not follow our naval ships. Our battle ships have a speed of 17 to 21 knots an hour. Why, the ships of which the gentleman speaks, that Japan has in the Pacific Ocean, her new ones, have a speed of 25 knots an hour and a cargo capacity of 16,000 tons. If we loaded these ships with coal they would be overtaken and we would be supplying coal to the enemy.

I have consulted naval authorities, and they tell me that these ships would be worse than nothing as auxiliaries to the navy. If we want ships auxiliary to the navy we must have fast ships like the *Lusitania* and the ships that the British Government is encouraging upon the seas. So that all of these reasons utterly fail.

Mr. HOBSON. Will the gentleman yield?

Mr. STEENERSON. If I had the time, I would be glad to yield, but I have no time. I say that after a careful study, with an open mind, desiring to support this bill if I conscientiously could, I came to the conclusion that, for one, I could not vote for the measure, because we do not get anything for our money in proportion to the amount that we give. [Applause.]

In order to understand the present bill, we should bear in mind that the ocean mail act of 1891 authorizes the Postmaster-General to make contracts for carrying the mail in American ships constructed in American shipyards and built in accordance with specifications furnished by the Navy Department, and to pay as compensation for such carriage for the outward voyage at the rate of $4 per mile for vessels of the first class, $2 per mile for vessels of the second class, $1 per mile for vessels of the third class, and 66⅔ cents per mile for vessels of the fourth class. Vessels of the first class must have a capacity of not less than 8,000 tons and be capable of making a speed in ordinary weather of 20 knots an hour, those of the second class a capacity of 5,000 tons and a speed of 16 knots an hour, those of the third class 14 knots, and of the fourth class 12 knots an hour.

This measure abolishes the distinction between vessels of the first and second class and between vessels of the second and third class, and authorizes the payment of $4 per statute mile for 16-knot ships and $2 per statute mile for 14-knot ships. It contemplates two lines from the Atlantic coast to South America and two on the Pacific coast, one to the Orient and one to Australia. The contracts authorized shall be for not less than five years nor more than ten years' duration; and during the first two years of the contract one-fourth of the crew must be American citizens, during the next two years one-third, and during the remaining years at least one-half, and one American boy must be carried as a cadet or apprentice for each 1,000 gross tons register.

To maintain one line from New York to South America would require 4 steamers each, of which it is estimated would cost not to exceed $1,250,000, and they would earn in mail pay alone $600,000 per year. If two lines were established, as required under the first provision of the bill, and sail by way of Charleston, the distance would be increased by about 2,000 miles and the subsidy pay at least $200,000 more, making an expenditure at the lowest calculation of $1,400,000 per year for the South American service.

The Pacific steamship lines, if two were established, with 16 ships, would require at least four times as much as the Atlantic service, making $5,600,000, or $7,000,000 altogether. Certainly this enormous expenditure can not be justified on the theory of expediting the mail for it would delay the mail instead of expediting it. The dispatches of mail from New York to South America at the present time is as frequent as twice a week, whereas if our mail to those countries were sent by these ships exclusively, they would only be dispatched once in two weeks. And the same would be true with the mail across the Pacific Ocean. Can this expenditure be justified on the ground that it will encourage and increase foreign trade? In time it would stimulate to some extent the exports to South America and possibly the Orient, but not to the extent of justifying this expenditure. Would the establishment of these lines of steamships be justified at such an expense on the theory that they would furnish auxiliary ships to the navy? A great deal has been said about auxiliaries to the navy, part of which has evidently been based upon misinformation or misrepresentation.

The gentleman from Indiana [Mr. OVERSTREET] in his opening remarks on this bill stated "that our fleet was accompanied on every mile of its trip around the world by colliers flying foreign flags, and if a single hostile shot had been fired against it, under the laws of nations every one of those colliers would have withdrawn and sailed to their home ports and left our great battleship fleet stranded in the high seas at the mercy of anyone, because of starvation in fuel alone." I made inquiry at the Navy Department and was informed that not a single foreign collier accompanied that fleet on its trip around the world; that all the coal that was used was bought at Atlantic ports in the United States and was shipped to the coaling stations at the different ports of call at Rio Janeiro, in Brazil; Magellan; San-Yokohama; Cavite; Colombo; Port Said; and Gibraltar. In not a single instance did a ship coal at sea, which is a difficult and hazardous experiment which has seldom proved successful. The contracts for the shipment of coal to these different ports were made months before our ships sailed and were let to the lowest bidders.

Under an act of Congress the department must award contracts for the supplies and transportation to American citizens, provided their bids are not excessive. In the application of this law the department has ruled that where bids of American citizens exceed the bids of others by 50 per cent they are excessive, and not in a single instance could a contract be made with an American shipowner to deliver this coal at these ports even at 50 per cent above the contract prices that were actually made.

The coal cost from $2.80 to $3.10 per ton, and from $3 to $5 per ton to deliver, except the coal to the Philippines, which cost $8 to $9 per ton for transportation. Each battle ship, when fully coaled, carries fuel enough to sail 5,000 miles. Now, in case of actual war would anyone propose to carry a fleet of slow colliers to accompany the battle ships on the Pacific Ocean, for instance? Not at all. Due preparation for war would require that large supplies of coal should be stored at all the different coaling stations on the Pacific coast, the Hawaiian Islands, at Guam, and the Philippines. It must be borne in mind that speed in steam navigation is always achieved at the expense of the cargo, and that colliers are not usually built for a speed of to exceed 12 to 14 knots per hour, and they are not intended to accompany the ships, either on cruises or in battle; and if a large fleet of colliers were sent to replenish coaling stations in time of war they would have to be convoyed by a sufficient force of fighting ships. This, I think, fully disposes of the contention that the ships contemplated by this bill would be of value as colliers. Any freight ship can serve as a collier, and we should remember that there are several thousand ships of American register engaged in domestic coastwise traffic capable of being used for this purpose. What kind of ships, then, would be valuable as auxiliaries to the navy in case of war? Fast ships to serve as transports for soldiers—scout ships, hospital ships, and supply ships, capable of being armed with moderate sized guns—ships like the *Lusitania*, capable of a speed of 25 knots or so an hour. Fourteen and sixteen knot ships, if used as auxiliaries to the navy, could easily be overtaken by these fast ships and would fall an easy prey to the enemy.

It should always be remembered that both in mail and naval service speed is the great consideration, and great speed can only be obtained at a high rate of expense. I have reliable information that the cost of navigating a 5,000-ton 16-knot ship with a crew of 70 men at a rate of speed of 14 miles an hour, counting for the coal and for expenses of the crew and the supplies, the operating expense amounts to $1.70 per mile, and at 16 miles an hour $2.10 per mile, so that if these proposed ships, capable of maintaining a speed of 16 knots actually sailed, as they probably would, at a speed of 14 knots, the Government would pay $4 per mile, when all the expense of running the ship amounted to only $3.40. We pay for half the mileage—that is, we pay the outward voyage, so that total expense for running would be $3.40 sailing at a rate of 14 miles and $4.20 sailing at a rate of 16 miles per hour. In other words, in this proposition the Government would pay the whole cost of operation and the owners would take all the receipts.

A great deal has been said about our merchant marine and its decline. I repeat what I said in the last Congress, that a great deal of this talk is based upon misrepresentation of facts. Taken as a whole, our merchant marine has constantly increased, as shown by the last report of the Commissioner of Navigation. The total number of documented merchant ships in the United States at the close of the present fiscal year comprises 25,425 vessels, of 7,365,445 gross tons, is the largest in the history of the United States, and is larger than the tonnage under any other flag except the British, to which the current volume of Lloyd's Register assigns 11,563 vessels, of 18,709,537 tons. Germany has 2,178 vessels, of 4,232,145 tons capacity. One-third of our merchant tonnage is employed on the Great Lakes and the great bulk of the remainder is employed in domestic coastwise transportation.

It is the merchant marine engaged in the foreign trade that has declined, and I am informed that to-day we have only 5 steamships crossing the Atlantic and 6 crossing the Pacific. There was built in the United States last year 1,457 vessels of 614,216 gross tons capacity, the largest tonnage output in the history of American shipyards. For the nearest approach to it, one must turn back to the fiscal year ending June 30, 1855, when the total product was 583,450 gross tons. The total number of seamen shipped, reshipped, and discharged before United States shipping commissioners during the year was 307,299 and was the largest since the establishment of the service. The output of our shipyards during the last ten years was 4,295,451 gross tons, the largest ever known for a similar period in all our history, and is next to that of Great Britain, and more than half of these ships navigate the sea.

Now, everyone who has studied the matter for a moment knows, or ought to know, the reason for this increase in our domestic merchant marine and the decrease in our merchant marine engaged in foreign trade. It is not because, as has sometimes been claimed, that our people are not a seafaring people, or that they do not desire to engage in transportation on the sea, for they do. The reason is that in the coastwise traffic the law gives an American citizen and American ships a monopoly, and in that service American wages are paid and an American standard of living is maintained, so that it costs to build, equip, and run from 50 to 100 per cent more than it does abroad. The ocean is free to the competition of the whole world; consequently cargoes for oversea transportation are carried at a rate so low as to justify only one-half of the wages that are paid here. In addition to this, by reason of our protective tariff it costs from 25 to 50 per cent more to build and equip a ship in the United States than abroad for the simple reason that wages are higher here. We pride ourselves upon the prosperity of our people and the high wages maintained in this country, and justly so, but this is the very reason why we can not compete upon the ocean.

Many remedies have been suggested for this condition, the merits of which it is difficult to judge. Some contend that if we had free ships—that is, if ships could be purchased and brought here and be eligible to American register and carry the

American flag—that then we could compete; but plausible as this may seem, I doubt its efficacy. The disadvantage is not entirely made up of the original cost of the ships, but in the additional cost of running them, and free ships could not give us lower running expenses. Others propose discriminating duties, so that no goods could be imported in foreign bottoms unless they paid a higher duty than those imported in domestic bottoms. The difficulty with this remedy seems to be that it would be in violation of all our treaties with foreign countries, and if these were denounced it would result in retaliation, which would be more injurious than the present condition.

Others believe that the only way is to go down in our pockets and by actual subsidy make up the difference in expense of building and running American ships as compared with foreign ships. It has been pointed out that 90 per cent of all of our imports and exports are carried in foreign ships, and that we pay more than $300,000,000 to foreign carriers per year. According to the estimates of cost above referred to, it would require a subsidy of more than $100,000,000 per year to enable us to maintain a merchant marine in foreign trade sufficient to carry the bulk of our traffic. However much we may desire to see our flag upon the sea and in every port, such a proposition from an economical point of view would seem to be absurd.

I agree that the present condition is humiliating and ought to be remedied, and I believe that it can to some extent be remedied by well-devised subsidies for fast ships upon the Atlantic, where the passenger and mail service requires speed, and slow ships on the Pacific, where the distances are great and where to navigate profitably a ship must carry a large percentage of freight in addition to the mail and passengers. As none of the remedies so far proposed seem to offer a complete solution of the problem I will venture to offer one which it seems to me might be made effectual, and has at least the merits of originality. It is this: Formulate a wage scale somewhat similar to that prevailing for seamen employed in the American coastwise traffic, and similar requirements as to board and quarters, and so forth; then negotiate treaties with all maritime nations willing to do so, to the effect that all ships sailing under their respective flags shall adopt this wage scale and these requirements; and then that a discriminating duty shall be imposed against the cargoes of all ships that do not comply with these provisions. If the United States, Great Britain, Germany, France, and Italy, for instance, made such an agreement and imposed discriminating duties against the ships of all nonconforming countries they would all, sooner or later, be forced to conform. If the wages and living conditions of the employees upon ships were the same under all flags then the only remaining elements of competition would be in the cost of supplying the ship and the talent in managing the business, and in these the Americans ought to be able to compete with the world.

It is clear that unless there shall be restraint of competition by international agreement Asiatic labor will supplant other labor upon nearly all ships engaged in over-sea traffic, for that labor will live on cheaper food and work for lower wages than any other. I hope in the next Congress to offer bills to carry out these suggestions, so far as they can be carried out by legislative action. In the meantime I hope that the subject will receive such consideration on the part of the public as its importance demands.

I am as anxious as anyone to restore our merchant marine to the seas and to restore the American flag to ships engaged in foreign trade, and I am not afraid of the word "subsidy," but I am, however, satisfied that the present scheme is immature, crude, and a blundering attempt to solve the problem and that it would be both expensive and ineffectual.

Let us hope that the ingenuity of the American people will be equal to the task of solving this problem. I am satisfied that the measure before us does not solve it or begin to solve it, and for this reason I am opposed to it. I submit that it ought to be voted down.

I append to my remarks an editorial from the Journal of Commerce and Commercial Bulletin of February 28, 1909. [Applause.]

ENEMIES OF THE MERCHANT MARINE.

We should rejoice to see the merchant marine of the United States built up in any legitimate way, and we regard as its worst enemies those who obstruct the legitimate way by persisting in their subsidy schemes, which would take money from the Public Treasury, collected from all the industries and business of the country, to give a profit to shipowners and shipbuilders who are not permitted to make it by their own enterprise. This would be no more legitimate for one industry or business than for another. Not only is it wrong in principle, but we are convinced that it would not be successful in practice, so long as other conditions were maintained as they are at present. There is neither reason nor justice in hampering and hindering business in a particular line and then taxing other business to help it over the obstacles put in its way, on the plea that it is important to the Nation. First of all, the obstacles should be removed, and then we could judge how far it needed help and whether there were public grounds to justify help from the Government.

One of the most persistent misrepresentations of the subsidists is that the merchant marine of Great Britain and Germany, the two nations that dominate the commerce of the sea, is sustained by subsidies. It is admitted that on account of the wide extent of the British Empire and the vast navy that it is bound to maintain the Government of the United Kingdom does contribute to the support of certain lines of mail steamships which have to be fitted at extra expense for auxiliary naval vessels and are liable to be taken by the Government for such service. So far as there might be just ground for a similar policy in this country, it would not be objected to. But these mail and naval subventions do not apply to more than about 5 per cent of the British tonnage, and in no degree do they account for the success of the commercial marine of the Empire. That owes its existence and prosperity to its freedom from trammels which were removed long ago by the abolition of the old navigation laws that sought to confine the British flag to British-built vessels. The only subsidy granted by the German Government is for mail communication to Africa, Australia, and the Orient. Only one line accepts that, and it has not proved profitable either to the shipping or to German trade with that part of the world. The development of the German merchant marine began with freedom to buy ships or have them built where it would cost least, and to get the materials for building them free of tax. The merchant marine of both those nations is free from all restrictions that are not necessary to safety and the proper treatment of crews.

While the shipping of these countries has been growing, that of the United States has been languishing because it has no such freedom, but is so hampered with restrictions that it can not compete on the ocean, where there is no escape from competition. Nobody is permitted to buy a foreign-built ship or have a ship built in a foreign yard and run it under the American flag and with an American registry; but that does not promote shipbuilding in this country. The drawback of duties on materials that go into building and equipping seagoing vessels is of no avail, because vessels in which the foreign material may be used can only be employed in the foreign trade. If any of them should prove unprofitable there, they would be useless and become a dead loss. There are restrictions and requirements as to the employment of crews that make the sailing of vessels under the American flag much more expensive than under foreign flags. There is plenty of American capital invested in shipping that sails under foreign colors, and much American enterprise is enlisted in the business, but neither the enterprise nor the capital could win success under the American flag, because the laws of the country will not permit it.

What the American merchant marine needs is freedom and opportunity to measure itself in a fair rivalry, but the public is deafened to any plea for this by the din kept up by the hungry and clamorous subsidists who seek a profit for private interests from the Public Treasury and at the expense of the people at large. They demand that the Government, which makes the business unprofitable, shall pay to shipowners enough to give them a profit in spite of the burdens put upon them and enable them to pass on a profit to American shipbuilders. To be successful this would have to be extravagantly expensive, and a marine sustained in that way would be in a precarious state all the time.

While those who clamor for subsidies are animated by selfish motives, there is no doubt that by plausible arguments and delusive appeals they win the sympathy and support of many who are only misled and whose motives are patriotic and public-spirited. These consider it a matter of national pride to have a prosperous merchant marine and of humiliation to be without it; but they should admit a difference of opinion as to the manner of securing it without accusing the advocates of a different policy of more selfish motives and less patriotism than their own. For those whose interest in shipping is not that of ownership or operation, but of the general promotion of trade and the country's prosperity, have as much to gain from shipping under the American flag as under any other, and would prefer to see it there on terms of reason and justice, and they can not admit the superior virtue and patriotism of those who evade open competition and honorable rivalry and beg the Government, not only to shield them from superior capacity, but to pay them their profit out of money earned by others and paid over for public expenditures and not for private gain.

Mr. MOON of Tennessee. I yield one minute to the gentleman from Nebraska [Mr. NORRIS].

Mr. NORRIS. Mr. Speaker, there are some provisions of this bill that I would gladly support. If a few minor amendments were made, I could give my support to the South American proposition, but the balance of the bill I believe to be bad. And inasmuch as the bill comes in here in the last days of the session, under a rule that makes it impossible for us to offer or discuss any amendments, it seems to me that the only proper course to pursue, if we believe, as I do, that there is more evil than good in the bill, is to vote against the entire measure, although there are some things in it that we believe in and would gladly support if we had an opportunity to do so. [Applause.]

Mr. LINDBERGH. I am opposed to compelling the people to pay a ship subsidy for the sole purpose of building up a merchant marine or for any other purpose than to render some well-defined service to the Government, and then only to the extent of necessity. The bill before us has some features that commend it. It is intended that the ships proposed to be subsidized shall serve as an auxiliary to our navy. If the ships to be subsidized were of greater speed, I should think that that might be accomplished.

No doubt, if we are to maintain an effective navy, and that seems to be the national policy, we could save considerable expense by subsidizing the class of ships that could be, in case of necessity, practically converted for naval service. It would save a great deal of expense if a part of the ships that are required to make an effective navy could be kept busy in time of peace in carrying our mail and in doing a general merchant trade. If such a policy were to be inaugurated which would

have that as its prime object, it would not be a burden upon the people, but would result in a saving and at the same time maintain a merchant marine. I do not wish to vote for the bill, for I do not clearly see that it will serve the purpose that I have stated.

Our navy is a heavy burden upon the people and is generally considered a necessary one. If there is a way to reduce this burden with safety to the national welfare, such a way should be carefully considered and worked out, and we should not be afraid of the subject merely because it happens to come up in the form of a ship subsidy. If merchant-marine vessels can be so constructed as to take a proper place in the navy in times of war, it would be an economy to subsidize such ships, as the cost of maintenance would be very much less than under our present system.

Mr. MOON of Tennessee. I yield one-half minute to the gentleman from Virginia [Mr. SAUNDERS].

Mr. SAUNDERS. Mr. Speaker, this bill provides that for ocean-mail service under the act of March 3, 1891, the Postmaster-General may pay for such service in vessels of the second class on routes to South America, the Philippines, Japan, China, and Australasia, 4,000 miles or more in length, outward voyage, at a rate per mile not exceeding the rate applicable to vessels of the first class, as provided in said act, and in vessels of the third class on said routes, at a rate per mile not exceeding the rate applicable to vessels of the second class, as provided in said act.

There is no limit to the number of vessels to which these payments may be made, and no limit on the aggregate amount that may be paid on this account, save the provision that the total expenditure for foreign mail service in any one year, shall not exceed the estimated revenue therefrom for that year.

It is a very indefinite limitation, indeed, which bases the amount to be paid, upon a speculative forecast of possible revenue.

Now, the objection to this scheme is the very obvious one—that it is a direct payment, speciously disguised, from the Federal Treasury in aid of private enterprise.

It is insisted on behalf of this project, which, in one form, or another, regularly appears in this House, that it means the restoration of the American merchant marine.

If this argument was well founded, the pending measure would command the support of many Members, whose present attitude toward the proposition is one of unalterable opposition.

When this proposition in another form was before this Congress at its last session, glowing pictures were presented of the ancient splendor and majesty of our merchant marine, and in the same breath it was insisted that the scheme under consideration, would restore the supremacy of our ships in the carrying trade of the world, on what has been so aptly called, the "great international highway of commerce."

Now, Mr. Speaker, it is perfectly true that the United States has been displaced from the carrying trade of the high seas by other nations, and this process has been in progress for a long time; but this displacement has been, and is now, due to economic causes, which can not be reached by legislation on our part, of the character presented in this bill.

The commercial supremacy of Great Britain, and of the other nations now doing the carrying trade of the world, is not due to subventions in any form, though subventions have been liberally employed for other and special purposes.

The decline in American shipping began after the civil war, for the simple reason that our country immediately entered upon an "era of tremendous internal development."

Many tempting opportunities of profitable investment were presented at that time, of which enterprising spirits, controlling large capital, were not slow to avail themselves.

With the tide of investment, and the energies of labor and capital, turned in the direction of internal enterprise, and domestic development, we proceeded to encircle ourselves with the walls of protection, thus restricting our energies to our country.

Within these tariff walls, by virtue of the supreme authority of our laws, we were able to establish and maintain a domestic policy which excluded foreign competition at home, while it fostered home enterprises and developed infant industries at the cost of the entire country.

But while it was competent for us in this manner to fix by indirection within the United States, the cost of products, and the remuneration of labor, the force of our policies stopped at the oceans' brink. A foreigner, save on our terms, can not compete with us in the domestic market, but in the markets of the world, and in competition for the carrying trade of the nations, he meets us on equal terms, subject to but one law, the inexorable law of universal competition. It is claimed that the passage of this measure will stimulate the construction of American ships in American yards. So far, so good. But these ships must traverse the high seas in search of freight and passengers in competition with the ships of every nation of the world. Can we build, and operate ships more cheaply than our competitors?

Ah, there is the rub. If we can, then we do not need subsidies; if otherwise, then we can not put the Treasury of the United States behind the proposition to make good the difference between the cost of American-built ships and the cost of operating these ships, according to the scale of American wages in comparison with foreign-built ships, and the cost of operating same, according to a cheaper wage scale.

This is the real problem, the crux of the whole matter. The true explanation of the decline of American shipping on the high seas is found in the fact that our competitors build ships, and operate them, more cheaply than we can. Moreover we can not control the commerce of the ocean. We can not impose our laws and policies on the traffic which follows its charted paths.

In competition for this traffic, the law of the survival of the fittest will inevitably apply. Who are the fittest in this struggle? The gentleman from Ohio [Mr. BURTON] answered this question at the last session.

> The fittest are those who have the greatest taste for the sea, the greatest skill in seamanship, and who can build and operate ships most cheaply. In the long run, they will be bound to prevail..

We possess the taste for the sea. We are preeminently endowed with skill in seamen. But in competition for traffic, they on the high seas our competitors outbid us, by offering a service equal to ours for both passengers and freight, at lower rates of transportation.

The subsidized lines of England and other foreign countries may attract the attention of exporters in the countries to which they ply, but they do not on that account carry the freight of those countries. They attract that freight, and carry it, by virtue of cheap rates. More than 90 per cent of British ships, so I am informed, do not receive a dollar of subsidy, yet they compete for the carrying trade of the world with subsidized lines. Her tramp steamers are found in every port where freight and passengers require service.

Now, what will these subsidies do? Will they make up the difference between the cost of American ships and the wages of American sailors, as compared with the prime cost of foreign ships, and the cost of operating and maintaining them in international traffic? If it is claimed that they will, then let some advocate of subsidy present the figures, showing the total amount needed from the Treasury to put the merchant marine of the United States on its feet, and in a condition to compete on the ocean for the business of the world.

This is not a situation that can be met by indirection of appropriation. The appropriations must be directly from the Treasury, in favor of the shipowners intended to be aided.

Moreover, if we seek to build up a universal merchant marine by means of subsidies, then we must establish a system that will be open to every shipowner desiring to trade on the high seas. On the one hand, the shipowner will be required to file a statement showing the cost of his ship, the cost of operating her according to the standard of American wages, and the amount that will be needed to put him in a position to compete with foreign owners offering for the same trade, and operating ships costing less to construct, and less to operate, than ships of the same tonnage, of American make, manned and operated by sailors receiving American wages.

This statement, if approved on inquiry, will determine the amount of subsidy to be paid. This whole matter, stripped of its disguises, is a plain, bald proposition to enable shipowners to do business at a charge upon the Public Treasury so enormous that, once stated, it would stagger the most enthusiastic advocates of this vicious and dangerous scheme.

It is perfectly feasible for this country, by a system of universal subsidies, to put its merchant ships on every sea if it is prepared to pay for the same. But this proposed scheme of subsidy will not do it.

The appropriations contemplated by this bill may serve to aid the shipping trust, or to create certain favored and limited beneficiaries, but they will not build ships, open yards, or furnish even the beginning of a universal merchant marine.

The trouble is not to be reached in this manner. It lies too deep for such homeopathic treatment. It is not enough to take "a few unprofitable lines and make them profitable at public expense." Something more is needed to restore our merchant marine.

There are two ways in which the problem may be solved, and only two. One is the plan already suggested, namely, to appropriate out of the Public Treasury a sum sufficient to en-

able any shipowner desiring to compete for freight, or passengers on the high seas, to so supplement from the Treasury his receipts from freight and passengers as to enable him to meet his competitors, and pay a reasonable dividend on his invested capital. Put the proposition in this way, and this is the way it presents itself in its ultimate form, and no advocate of a subsidy will be found hardy enough to support it. Such a policy will undoubtedly build up a universal American merchant marine, but it will appall the country by the prodigious sum required to accomplish this result. On the other hand, there are certain restrictions on American capital contemplating investment in ships that can be removed by appropriate legislation. American capital ought to be allowed to buy its ships in the markets of the world when those ships are to be used in the commerce of the world. Our home yards can furnish the ships for domestic use, for the simple reason that these vessels come within the protective principle. Not so however with the deap-sea vessels designed for international trade. Since they must be operated under the laws of competition, the same laws should control their purchase.

This is not a matter of protection. This is not a situation that we can meet by restrictive and protective legislation. The authority of our laws and policies does not run on the high seas, save so far as we can compel their recognition by force, and it is a plain proposition that we can not use the guns of our battle ships to compel the world to travel in our vessels, and ship their merchandise in our bottoms, on our terms.

Strip this proposition of its disguise, present it in its real form, and no patriotic citizen can support it. It is a direct appropriation in aid of private enterprise, with no compensating public advantage, and yet gentlemen who would vehemently oppose a bill to pay a subsidy to the men who raise wheat, or corn, or tobacco, or who operate stores, or warehouses, or conduct other forms of private enterprise, lend their ready assent to this proposition, beguiling their judgment and their consciences by the high-sounding and misleading arguments employed so abundantly in its behalf.

Take a vessel which costs $1,000,000 to construct in our yards. What would it cost abroad? Probably not more than $750,000.

Fix the monthy pay roll of the American ship at $6,540 a month, and the pay roll of its foreign competitor would probably be about $2,500 a month.

These figures are typical of the difference in the cost of building and operation between American and foreign built ships.

Now, I ask, How can the owner of an Amercan merchantman meet this competition on the high seas, where he loses the benefit of our protective policies? The advocates of subsidy say: By a direct appropriation from the Treasury in favor of every merchantman that flies the American flag, and is operated by sailors receiving wages according to the American standard.

If this is what we are coming to, we ought to approach it with open eyes. If the measure now before us is the entering wedge, to this result, then we ought to enact it, if at all, with deliberate knowledge of the consequences which its passage is intended to entail.

Unless we are prepared to go forward and make the gigantic appropriations from our Treasury necessary to restore our merchant marine by this policy, then what we are doing to-day is futile and vicious.

Confronted with the condition that confronts us, what should we do to build up our merchant marine? We can not do it by direct subsidies. No nation has ever done it. No nation will ever do it. No nation can afford to do it, by direct subsidies.

The nations who have used subsidies hold their carrying trade, not with subsidized vessels, but with ships that meet all competitors in the matter of service, and of freight and passenger rates. Since we can not shut out competition on the high seas, or meet it by direct subsidies in favor of private enterprise, we must approach the problem in some other way.

No one desires more heartily than myself to see our merchant flag on the high seas.

No one is more ready than myself to support any policy which opens additional avenues of profitable investment to American capital. The futility of the present measure to accomplish the result desired is patent on investigation. Since we can not apply either the protective principle or the plan of subsidies we must search out some other method which, without burden to the American taxpayer, will accomplish the result desired. This plan has been adverted to. The restoration of our merchant marine can be secured by the repeal of certain existing legislation to which it is easy to trace the withdrawal of American capital from the business of operating merchant ships on the high seas.

There is one thing that an American can not buy abroad and bring home, even if he is willing to pay the duty, and that is a ship. What has been the immediate and necessary result of this policy? Has it promoted American shipbuilding? On the contrary, the burden of the present cry is that British, and Norwegian, and Japanese vessels, and the tramp ships of other nations, are doing the carrying trade of the world.

But this policy has accomplished one thing at least. It has driven the Americans who own and operate deep-sea vessels, to hide them under foreign flags.

Will the subsidies proposed by this bill remedy this intolerable condition, which is an immediate result of present economic conditions? Not at all.

What then? Why, repeal our navigation laws, and at once you would see the American flag in every port of the civilized world. The principles of protection can not be applied to the high seas. Why, then, stupidly undertake to apply them, or stolidly continue a policy which, if I may use the phrase, has brought about the nonexistence of the American merchant marine?

We have tried the policy embodied in the navigation laws, and it has proved a failure. We are now asked to venture on the policy of subsidies, which will, indeed, favor certain private shipowners, but will never, save at a cost which once stated would stagger even its most enthusiastic advocates, succeed in restoring, and reestablishing our decadent merchant marine.

Glowing pictures have been drawn of what subsidies will do for American interests, but the imagination, rather than the reason, has furnished these pictures.

The gentlemen who have pointed out the decline of American shipping, have treated it as a fact, but have not sought the secret of this decline. Until a diagnosis is made, the physician cannot prescribe an adequate remedy.

Once ascertain the economic conditions which have driven American ships from the high seas, and it becomes apparent that the secret of the trouble lies too deep to be cured by the subsidies contemplated by this bill. Therefore, this measure—wrong in principle, and inefficient in operation—ought to be defeated.

This bill, Mr. Speaker, is a nostrum, not a cure, for the disorder which afflicts our shipping interests. As such it ought to be defeated, as a like proposition was defeated a year ago in this Congress.

This is the same proposition which confronted us at that time. In the course of the present debate the gentleman from Indiana has admitted that the pending proposition, is practically the same as the one which he opposed in last May.

It has been stated that we have been paying $500,000 a day for the transportation of our merchandise in foreign bottoms. Taking these figures as substantially true, they make an aggregate of about $162,000,000 a year, and this may be taken as the sum which must be appropriated from the Public Treasury in aid of private shipowners, if we seek to restore our merchant marine by the method of subsidies.

With a deficit of over $100,000,000 confronting us, this is a perilous time at which to load a staggering Treasury with additional burdens. [Applause.]

Mr. MOON of Tennessee. I yield to the gentleman from South Carolina [Mr. FINLEY].

Mr. FINLEY. Mr. Speaker, when the act of March 3, 1891, was under consideration, speeches in every respect like those made here to-day by the advocates of this bill were made then. It was claimed that the act of March 3, 1891, would rehabilitate the American merchant marine, that it would restore to the high seas American ships, and so on. That argument was false. The claims that were made for it have failed, and to-day, when the same claims are being made for the bill under consideration, the arguments are false, and the results will also be a failure.

It is claimed that other countries pay subsidies, but, as compared to this country, the subsidies they pay are comparatively small. In discussing House bill 4068, a bill identical with the bill under consideration at the last session of Congress—in the discussion of that bill I stated that—

> The ship-subsidy proposition is nothing more nor less than an effort to apply the protective-tariff theory of the "stand-pat" Republicans to the ocean carrying trade of the United States. * * * But in the ocean carrying trade the American shipowner comes in competition with the foreign shipowner, so that he must compete with the shipowner of England, Belgium, France, Japan, and other nations.

The statement I made then I repeat now. Mr. Speaker, the protective theory can not be applied on the high seas, where competition is open to all. It is a question of competition, and the ship offering the lowest rates will carry the freights. The shipping interest of this country is handicapped by the Dingley tariff law and by the unjust, unreasonable, and out-of-date navigation laws of the United States. The Dingley tariff laws make it impossible for other countries to sell goods to us in

large measure on a reasonable basis, our tariff laws being prohibitive. They do not buy from us because they can not sell to us.

The tariff laws of the United States should be reduced to a revenue basis; then we would sell to and other nations would buy from us. Under the navigation laws of the United States no foreign-built vessel can receive American registry and fly the American flag. It is true that material for constructing a vessel to engage in the foreign trade may be brought in free of duty, but this ship can not engage in any coastwise trade. Our navigation laws should be so amended as to permit American citizens to buy ships wherever they can purchase the cheapest. Under rules and regulations requiring that the officers and a part, if not all, of the seamen be American citizens, give such ships American registry, permit them to fly the American flag, and with the present tariff law reformed to a revenue basis the American merchant marine would grow and prosper, and it would not be long until the commerce of this country would be carried in American ships. The present bill will cost this country annually at least $3,600,000; next year perhaps as much as seven and one-half million dollars. Not a single ship will be built on account of the passage of this bill. As I see it, the only result will be to give to the shipping trust $5,000,000 annually in addition to the amount they now receive. The only reason for the passage of this bill is that the shipping trust want the money. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. COCKRAN. Mr. Speaker, if I understand the various speeches made in favor of this measure, it is advocated on three grounds by gentlemen on the other side of this Chamber and on an additional ground by a gentleman on this side—the gentleman from Alabama [Mr. HOBSON], who has just preceded me.

Its passage appears to be urged, first, for business reasons; next, for reasons of sentiment; again, for political reasons; and, finally, for military reasons.

The gentleman from Alabama it was who sounded war's alarm and, as usual, injected a military feature into the debate. [Laughter.] This military feature being the last contribution to the discussion, let us dispose of it first.

The gentleman from Alabama seems to think this measure should be passed because, according to him, we can not send fleets around the world unless we have constantly at our disposal what he is pleased to term euphoniously "auxiliary ocean-going vessels," which means, in plain language, vessels owned by private individuals and made profitable to the owners not by what they may earn in commerce, but by bounties granted from the Treasury. [Laughter.]

Well, Mr. Speaker, I for one would feel amply justified in opposing this subsidy if its defeat would prevent or even discourage sending our fleets around the world. [Applause.]

We have constructed a great navy by concurrent action of all parties. Votes in favor of appropriations for building new battle ships were contributed from both sides of this Chamber on the ground that our navy was intended to be an engine for defense—one that would never be employed for aggression or reckless adventures. There can be neither profit nor sense in sending it into quarters where, thank God, there is no probability that we will ever be required to make war. The place for our navy is close to our own shores—the shores it has been organized to defend—not in distant seas where we have neither foes to meet, dangers to apprehend, nor interests to protect.

Moreover, even if we accept the theory of our necessities formulated by the gentleman from Alabama himself, it would be impracticable to accept his advice. According to him we are in a desperate condition anyhow. To make our naval establishment adequate he seems to think we must have 500 or 5,000 or 500,000 auxiliary vessels. I am not sure about the exact number, but whatever it may be, I am quite certain it is beyond our capacity to supply, and I am equally certain that even the largest number, if attainable, would not satisfy the appetite of the gentleman from Alabama for armaments or quiet his apprehensions of danger from imaginary foes. [Laughter and applause.] It being absolutely impossible to meet the views of the gentleman from Alabama, we must dismiss the military aspect of this question as a subject of serious discussion and relegate it to the domain of imagination where it may remain an inspiration for the rhetoric of heroism. [Laughter.]

Mr. Speaker, in the brief space at my disposal, I can undertake only a very brief examination of the other three aspects in which its advocates present this question. Let us consider it first as a business proposal. According to the gentleman from Indiana [Mr. OVERSTREET] this is to be considered purely as a business, in no sense as a political, proposition. The gentleman from Indiana is present, and I believe he will concede this to be a correct statement of his position.

The very first essential of discussion, if it is to be at all profitable, is some postulate on which we can all agree. This, I am sure, my friend from Indiana [Mr. OVERSTREET] will concede. I ask him, then, to accept as the postulate of this discussion a simple proposition that anywhere else would be considered self-evident; one that outside this Chamber he would concede without the slightest hesitation, but which here, I suspect, the necessities of his position will force him to pass by in a silence that he will ask us to construe as dissent, for admission even of this self-evident truth would be concession of his entire case. Will the gentleman from Indiana concede that it is better for a community to employ its capital at a profit than at a loss? Or, putting it in a different way, I ask the gentleman from Indiana will he agree, as a fundamental principle of business, that profits are more profitable than losses? [Laughter.] I give way to the gentleman now for an answer.

Mr. OVERSTREET. How much time does the gentleman yield to me to answer his question?

Mr. COCKRAN. Oh, if I must yield the gentleman time enough to answer the question in a manner that would be consistent with his argument, the session of Congress must needs be prolonged, and I have no constitutional authority to do that. [Applause and laughter.]

Mr. OVERSTREET. Does the gentleman want an answer?

Mr. COCKRAN. If the gentleman will tell us whether or not he is willing to concede that proposition as a postulate of discussion, he can make his position clear by a monosyllabic answer—yes or no.

Mr. OVERSTREET. Mr. Speaker, the gentleman's query seems to require qualification, just as his arguments do. [Applause and laughter.]

Mr. COCKRAN. I do not know whether my query requires qualification or not, but I am quite certain the gentleman's statement requires none, for there is nothing in it to qualify on his part or to notice on mine. [Applause and laughter.]

Well, Mr. Speaker, it is quite evident the gentleman from Indiana does not think it feasible to maintain the position he has taken on this measure and at the same time concede the proposition, which I think self-evident, that profits are more profitable than losses. This is a portentous fact, which I commend to the serious attention of gentlemen on the other side of the Chamber who, when this measure was before the House on former occasions, felt constrained by conscience and duty to vote against it. Should any among them be inclined to hesitate now about persisting in opposition, I venture to suggest that before changing their attitude they require the person who may close this debate to state clearly whether he will concede it is better for the commerce of a country that its capital be employed at a profit than at a loss.

What is this proposal now before us? In plain language, it is that a certain business enterprise which its promoters concede can not be conducted so as to earn profits from its own operations, shall nevertheless be made profitable, not by improving the service it renders, but by bestowing on it bounties paid from the Treasury. [Applause.]

The gentleman from Indiana [Mr. OVERSTREET], were I able to concede him the floor for several hours or days or months—and if such a concession were in my power I would gladly make it—will not pretend that without a subsidy this business would be profitable. The question, then, in the last analysis resolves itself into this, Is it desirable, permissible, or justifiable for a government to encourage the investment of capital in losing enterprises? To support this measure is to proclaim and assert the wisdom, the advantage, the desirability of doing business at a loss. To enact it into law is to declare that commercial losses are not merely desirable, but they are so desirable that men should actually be paid from the public funds for engaging in losing enterprises. [Applause.]

Well, let us see where such a policy, if it be adopted, must inevitably lead us.

The gentleman from Indiana [Mr. OVERSTREET] has not felt himself at liberty to admit that profits are more desirable than losses. Will he even concede that a profitable business is as desirable as a losing business? If it be desirable to pay men for engaging in a losing business, one would think it must surely be at least equally desirable to pay men for engaging in a profitable business. If it be justifiable to pay from the Public Treasury men for engaging in the losing business of transporting freight and passengers by sea, why not pay, from the same source, the joiner engaged in the profitable business of making desks, the weaver who makes carpets, the butcher who prepares meats, the miner who draws treasure from the bosom of the earth, the farmer who creates measureless wealth by labor on the fertile fields with which God Almighty has dowered this land? [Applause.] This much at least one might hope that the gentleman from Indiana would concede. But no. Even such a moderate concession would nullify his whole argument—render manifestly absurd the position he has defended with so much vigor. For should we attempt to pay everyone engaged

in production from the public funds the Treasury would soon be emptied, and then we could not pay bounties to anybody. Obviously attempts to subsidize everybody must result in subsidizing nobody. In the very nature of things subsidies can not be universal, but must be partial—restricted to a few members of the population.

My friend from Indiana, I think, will concede that before funds can be paid out of the Treasury funds must first be put into it.

Now, where must these funds come from? They will not descend from heaven like manna in the desert. They will not spring spontaneously from the ground. They, like all things of value, must be produced by human industry. Clearly they can come only from the profits of productive—that is to say, of successful, self-supporting—enterprises. Losing ventures that can live only by receiving bounties from the Public Treasury can contribute nothing to it. In the last analysis, then, this measure is a proposal to make the successful enterprises of the country pay tribute to unsuccessful enterprises. [Applause.] You are asked to penalize efficiency, and therefore to reward and encourage inefficiency in production; to stimulate the qualities that make for failure and decay by burdening for their benefit the qualities that make for success. [Applause.] So much for this measure as a business proposition—the light in which my friend from Indiana has urged this House, with great emphasis, to consider it.

Now, let us consider what may be called the American-flag aspect of this proposal. This feature of the measure is admirably stated by another gentleman from Indiana [Mr. LANDIS]. National pride, he tells us, requires that the American flag shall float in every harbor of the world, while at the same time national interest and national dignity demand that American products and American mails shall be transported by ships flying the Stars and Stripes. I think that is a correct statement of the gentleman's position. If I am in error I hope the gentleman from Indiana will set me right.

My chief difficulty in meeting this argument is that I can not say I understand it. The gentleman from Indiana seems to think that unless American goods are transported in American ships, some grave peril will threaten their safety, and unless American mails are carried in vessels floating the American flag, the letters when they are delivered will be found lacking in some particular or virtue or quality. He would have us believe that when in some foreign country he receives a letter from home, though it might be a tender missive conveying the affectionate regards of those he loves, yet if it has been carried across the sea by a vessel floating a foreign flag, it becomes a source not of satisfaction, but of sorrow; instead of bringing joy to his heart it would bring tears to his eyes and make cankering care furrow his cheeks. [Laughter.]

Mr. Speaker, the apprehensions of the gentleman from Indiana would be intelligible, and therefore capable of serious examination, if he told us precisely just what peril it is that threatens American products on foreign ships, from which they would be free in American vessels, and his emotions would awaken wider sympathy if he informed us just how he could find out which flag it was that floated over a letter that had been carried across the sea and delivered to him in a foreign country. So far as I have been able to discover, the necessities of commerce compel every vessel to treat all goods alike, no matter where they may have been produced. The object of every merchant ship is to secure cargo, and the question which occupies its owner is not the country where goods offered as freight may have been produced, but how much the owner will pay for transporting them. And I have never been able to discover in any letter which I have received while sojourning in a foreign country the slightest element or feature which could have been affected by the nationality of the vessel that had carried it, or by which it would be possible even to determine the flag that had floated over it while in transit.

Now, Mr. Speaker——

Mr. LANDIS. Mr. Speaker, I hope the gentleman will answer——

Mr. COCKRAN. If the necessary time be yielded by the other side I will gladly give way to the gentleman. [A pause.] There is no response, and, since I have but a few minutes at my disposal, I can not surrender the floor even for an instant. If time permitted I would gladly afford the gentleman ample opportunity for the elaboration of his position, if not for the light it would throw on this proposal, at least for the contribution it would afford to the gaieties and pleasures of debate. [Laughter.]

Mr. Speaker, I venture the assertion—and I do not think any sensible person will challenge it—that neither freights nor mails in transit to foreign countries can be affected in the slightest degree by the nationality of the vessel in which they are carried. They are very gravely affected by the rates that may be charged and the time that may be required for transportation, but these depend on the seagoing qualities of the ship that bears them, not on the flag that may float over them.

The sentimental aspect of this measure, which deals with the glory that must be reflected on this Nation if the American flag be found floating from the masthead of American ships, has inspired the gentleman from Indiana to flights of rhetoric so dazzling that ordinary mortals can not follow him. Let us see if a simple statement of this proposition in plain words will bring it within the range of common sense.

It appears to have been found by experience that vessels holding American registers can not be employed profitably in the business of transporting passengers and goods by sea. So far as I know, merchant shipping has not been found profitable in any country. It certainly has not seemed profitable to American capitalists, and therefore they have declined to engage in it.

Now, it is contended by the gentleman from Indiana, and by other gentlemen who agree with him, that this absence from the sea of merchant ships flying the American flag compromises our national dignity so deeply and so seriously that we should pay men to engage in this losing business by granting them bounties from the Treasury in such amounts as will not merely balance but will overbalance the losses incurred in trade and thus enable them to earn substantial profits.

That is to say, the dignity of our country demands that its flag be made to float at public expense not over ships that have won success in trade, but over ships that have proved incapable even of earning their own expenses and which, therefore, as agencies of commerce are inefficient and discredited. Floating over such vesssels, what must our flag typify? Not a success in which we could glory, but a success for which we must blush. Not success of our traders in competing openly and fairly against the shipowners of other countries, but success in controlling, or at least affecting, by doubtful means the legislation of their own country. [Applause.]

Sir, I should rejoice to know that the American flag is a familiar sight in every quarter of the globe. Every American knows it is the most glorious spectacle that can gladden the eye of man. [Applause.] But that flag can remain glorious only while it continues to typify the lofty purposes for which it was first unfurled. [Applause.] It was unfurled to typify resistance by the American people—successful resistance against an attempt to levy tribute on them by the most powerful monarch in the world. [Applause.] Pray God it may never be suffered to fly from any structure or vessel where it must typify tribute imposed by their own consent or at least by their own chosen representatives on degenerate sons of the men who braved death in battle rather than submit to such an imposition by a government even though they had always acknowledged its authority. [Applause.] We love the flag because it has always typified justice. Pray God that flag may never be suffered to float where it must embody perpetration of injustice, or submission to injustice by the American people. [Loud applause.]

Mr. Speaker, the degradation which must inevitably overtake the flag unfurled in unselfish sacrifice to accomplish noble ends, when it is prostituted to facilitate schemes of profit, is strikingly shown by one suggestion made in the course of this debate; I think it was the gentleman from Indiana [Mr. LANDIS] who suggested that our flag floating from ships would be a valuable advertisement for American merchandise. That is to say, the American flag, which has embodied the loftiest ideals of patriotic self-renunciation and civic virtue, must now be utilized as an advertisement of tradesmen's wares—even though we can keep it afloat only by paying money into venal hands that would refuse to unfurl it except for hire. [Applause.]

A pretty conception, this, of the American flag! The flag of our country which has always expressed the patriotic aspirations and purposes of all Americans must be degraded to advertising business ventures, like the sandwich man who walks up and down the streets of our crowded cities, bearing on back and breast advertisements of restaurants, theaters, patent medicines, and different brands of tobacco!

Sir, upon this side of the Chamber there will be few, if any, votes in favor of this proposal to abase so shamefully the flag which for a century has floated in the breeze commemorating the noblest sacrifices ever made for liberty and justice. [Loud applause.]

Mr. Speaker, there remains to be considered one more aspect of this question, and that is the principle of government it asserts. I wonder if gentlemen on either side realize the true character of the proposition embodied in this proposal. If this one business enterprise may be made profitable by taxation, it is inevitable that other enterprises will seek the same sure sources of profit. Bounties, as we have seen, can not be extended to all. They must be restricted to a few. Let this bounty be granted and fierce competitions for similar favors are certain to become a prominent feature of our industrial life. The

competitions of commerce will no longer be directed to securing profits by developing increased skill in industry, but to securing larger profits by corrupting the springs of legislation. [Applause.]

Some gentlemen, I am aware, justify themselves in supporting this bill on the ground that it may well be considered a feature, or rather an evolution, of the protective system. There is much force in that statement. Between a system of bounties paid directly from the Treasury and bounties levied indirectly upon consumers through tariff taxation, the difference is simply that one is disguised behind sonorous or misleading terms, while the other is open and undisguised. And yet, notwithstanding its cynical unblushing candor, this proposal will doubtless be warmly supported and vigorously advocated by the persons or communities who will benefit by it, and they will be able to find plausible reasons for their conduct in former legislation of a protective character.

The city of New York will be the chief beneficiary of this measure if it be enacted into law. Probably seven-eighths of the tribute collected through its operation from American producers will be paid into the coffers of enterprises with headquarters in New York City, where also dwell the vast majority of those who own their stock. Many of these men are my friends. They have been my political supporters. They have shared my views on economic questions. Some of them have even professed to join me in opposing and denouncing the entire protective system. More than one of them has said to me: "We are free traders, like you. We are familiar with your contention and sympathize with it, that left free to improve her natural advantages New York would extend one arm across the sea as vigorously as she extends the other over this continent, and with both hands she would exchange in much ampler measure the products of the two hemispheres, but she is prevented by laws which restrict imports from enjoying the full tide of foreign commerce which her favorable situation at the gateway of the western world and the industrial capacity of her citizens would under fairer conditions soon establish. And since this protective system puts our city under tribute to certain favored manufacturers, why should you vote now to prevent her from recouping to some extent her losses by some such measure as this, which, after all, is but an extension of the protective system that has afflicted us so long and so severely?"

Sir, there is much plausibility in that contention. It lacks but one element of being entirely unanswerable, and that is consistency with justice—that justice which this political system of ours was organized to establish. If because A has been robbed by B it could become permissible for A in turn to rob C when he has a chance, this would be a defensible measure. If the city of New York and other great seaport towns of the country which have long been held under tribute to certain manufacturers would be morally justified in levying tribute now upon the farmers and producers of this country and thus recoup themselves for the original imposition, this measure might be defensible. But that is not the conception of justice which should govern a Christian nation. Above all it is not the standard of justice that should animate the American people. We can not be justified in despoiling innocent third parties because we have ourselves been victims of spoliation. Because the city of New York has been made tributary to certain interests, she would not be justified according to the Christian moral law in levying tribute herself on other interests who were not responsible for the original imposition, but who were themselves victims of it. We can not abandon or modify this fundamental notion of justice without undermining and imperiling the whole political system built upon it. [Applause.]

We have now to consider a proposal which, if it be adopted, will proclaim to the world that in this country a more abundant source of profit than diligence and skill in industry is diligence in planning raids upon the Treasury and skill in securing legislation that will make these raids successful; better than swelling the volume of industrial production, and thus widening the field for employment of honest productive labor is obtaining legislative favors—engaging if need be for that purpose the assistance of these nameless creatures who, as the gentleman from Missouri [Mr. CLARK] has stated, dog the footsteps of Members in the lobbies and even crowd in here on this floor, where they attempt to affect by secret machinations the actions of this body. Proclaim to the world that access to the Public Treasury accomplished through corrupting legislation is a more reliable source of profit than honest industry, and you discredit not merely republican government in its broadest sense, but you discredit Christian civilization itself. [Applause.]

It is alike an essential feature of Christian civilization and a fundamental principle of republican government that where men are left free to govern themselves and dispose of their own labor industry will be most effective, the fruits of industry most abundant, distribution of them most general and most equitable. But by proposing this measure you assert that under free operation of this political and industrial system of ours the fruits of industry are distributed not fairly, but unfairly—so unfairly that to prevent injustice the Government must interfere with the operations of commerce and take from self-supporting industries some of their profits to bestow them on an industry that is incapable of earning sufficient to support itself. [Applause.] Do you not see that by passing such a law you would justify all that the socialist has ever claimed? What has he always contended?

Simply that government can be trusted to distribute the fruits of industry more impartially and evenly than they are distributed under the present economic and political system, and therefore government should be empowered to direct and control all the agencies of production. The difference between the socialist propaganda and the proposal embodied in this measure is that socialism aims to control all industry for the purpose of distributing impartially its entire product among the whole people, while you propose to interfere with industry for the purpose of bestowing some of its fruits on a few people who have not even contributed to swell the volume of production. [Applause.] How can we hope to check the rising tide of socialism if we incorporate into our laws proposals that are worse than socialistic according to the principles of government we ourselves profess to hold? [Applause.] What weight can attach to denunciations of socialism with our lips, while by such acts as this we are proposing that government shall interfere with industry, not in an attempt—however mistaken—to distribute all its fruits impartially among the whole people, but for the deliberate purpose openly avowed of enriching a few favorites from the toil and thrift of the millions whose efficiency in production has made this country the most prosperous in all the world? [Loud applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. OVERSTREET. Mr. Speaker, do I understand that all of the time in opposition has been consumed?

The SPEAKER. It has.

Mr. OVERSTREET. I yield the remainder of my time to the gentleman from New York [Mr. FASSETT].

Mr. FASSETT. Mr. Speaker, the gentleman from New York [Mr. COCKRAN], who preceded me, has undertaken to condition the form of my reply. Waiving the improprieties of his insistence, out of courtesy to him and out of interest in his inquiry itself I shall yield to his importunities.

He asks whether it is ever profitable to invest capital at a loss; in other words, Is it ever profitable to invest capital without a profit? I answer unhesitatingly, "yes." [Applause.] It has frequently proven so; it all depends upon the meaning and interpretation of the word "profit," for that word involves more than the immediate return; it involves a contemplation of ultimate results. There is a scriptural inquiry:

For what shall it profit a man if he gain the whole world and lose his own soul?

[Applause.]

So I say, What shall it profit a nation if it exclusively contemplates sordid considerations of immediate gain, if it yields to the seductions of the law of the jungle—the law of the tooth and the claw—and for immediate profit allows the strong to prey upon the weak through unrestrained competition, under which the weaker must go to the wall?

The gentleman further asks whether it is justifiable to use the taxing power of government to aid a business which otherwise would run at a loss. Again I answer, unhesitatingly and emphatically, "yes."

The gentleman's argument is the old familiar argument of the free trader; it has been heard in every campaign from every free-trade orator; it is the law of the doctrinaire, the theory of laissez faire; it is the doctrine of free and unrestrained competition, a doctrine which Christian nations have repudiated, and particularly a doctrine detested in this country and utterly departed from in all our cities and in all our States and in the Union of all our States, and in this entire Nation we long ago relegated this relic of barbarism to the limbo of outgrown superstitions. [Loud applause.]

We do not believe that the strongest forces and the strongest men should be permitted to assert their powers unrestrained. It is contrary to the whole doctrine and policy of our law; contrary to all the teachings of our experience [applause]; and it is obnoxious to all our recent reform legislation.

The gentleman inquires if it is ever justifiable to use the taxing power of our Government to enable men to engage in an otherwise losing business. Yes; a thousand times, ten thousand times, yes! The answer comes from the experience of every community in our history. The answer comes from every fac-

tory; the answer comes "yes" from every American industry established in every valley and upon every hill in the United States. [Applause.] The answer comes "yes," "yes," from every city securing new factories and new enterprises through the subsidies of its chamber of commerce. The answer comes "yes" from every State and every community that ever appropriated money for a railroad, a canal, or any industry to tide over its initial years of experiment and loss. The answer comes "yes" from every industry and every vocation in the United States. The answer comes "yes" from forest reserves; from arid-land reclamation; from the destruction of the cotton-boll weevil; from the holding in check the advance of yellow fever; it comes from every department of human industry everywhere in the United States; it comes through the experiences of every day in every year; it comes from the common practice in the application and expenditure of almost every appropriation of money made on the floor of Congress.

This beneficent policy, with its splendid protection, has brought us as a Nation to where we have 90,000,000 people—the richest people, the happiest people, the most comfortable people, the most contented people, the most interesting people, the best housed, the best fed, the best informed people, and with the best hope of any people in the world. [Applause.]

It has brought us to the point where, by the intelligent application of the taxing power of the whole people, we have brought all the people to where this Nation is the wonder and the despair of the world; to a point where it means more to have been born under the Stars and Stripes than to have been born under any other flag under the wide sweep of the stars. [Loud applause.]

Mr. Speaker, when Mr. Huxley, the great scientist, was asked to give his conception of a tragedy, he replied that, in his opinion, it consists of "the explosion of a syllogism by a fact." [Laughter.] We have just been enjoying a wealth of syllogisms. The long suit of the gentlemen of the opposition seems to be syllogisms. [Laughter.] But there has been a woeful poverty of facts, accompanied by a willful suppression and denial of facts by the distinguished orators on the other side.

It shall be my endeavor to traverse the field of facts, and a careful consideration of the official facts of record in this matter of the merchant marine can lead to but one conclusion. I shall endeavor to remain as far as possible outside the field of sentiment, for the patriotic sentiments involved in the consideration of this subject seem to give pain to the gentlemen in opposition; but, after all, there is no worthy principle that does not link itself with sentiment; and when sentiment marches hand in hand with facts, thus leading upward and forward, progressively onward, the conjunction is highly significant.

This question of the restoration of our merchant marine can not be viewed from any false, isolated, or selfish standpoint; it must be considered from the broad outlook of the best interests of the masses—of all our people, for all time. It can not be measured by the tiny foot rule of immediate cent for cent profit and loss; such an attempt is stultifying and ineffectual; it must be measured from a view point broad enough to take in not alone individual interests, but national welfare and ultimate destiny.

Mr. Speaker, I am and have been and always expect to be an ardent advocate of an adequate army and an adequate navy, properly equipped for the desperate purposes for which some day their services may be required; but I hope from my soul, and in this I believe I echo the hope of our own people and of the whole world, that all the navies now in existence, that our own navy, the new navy, our glorious array of battle ships, and all the battle ships yet to be constructed, may never be called upon to fire a shotted gun. I trust that all will be reduced to rust or relegated to the scrap heap.

The very best use and the noblest use to which instruments for the destruction of human life can be put is to prevent their use—forbid them that use; avoid occasion for their use. [Applause.] But we must take this world as we find it; not as we would have it. We must consider men not as they ought to be, but as they are. We must face situations as they exist, not as they may be painted to exist by glowing oratory based upon syllogisms or intellectual dreams; and it is the exigency of existing facts that makes this legislation and legislation along these lines not only desirable, but absolutely inevitable if it is our purpose to reestablish the ancient glory of the American merchant marine.

Our navy has just completed its trip around the world—16 large ships of war. It was said that the trip was an imprudent trip, but it is now admitted that the trip was a glorious inspiration; it has given a thrill of pride to every patriotic American; it established a world's record; it put America first in a great and daring undertaking; it has established the fact to the world that we can build as efficient and as excellent fighting machines as any of our rivals; it has established the excellence of our commanding officers in the American Navy; it has established the excellence of the boys in blue and their superiority in ability to perform the duties of their lower, but important positions. [Loud applause.]

The trip constitutes an object lesson to the world and to ourselves; but there are more lessons than those of war. From the time our fleet left our own shores until our fleet returned again the only American flags our navy saw were those carried at their own mastheads. The accompanying colliers, without whose help they could not move beyond the steaming radius of each individual battle ship, carried the flags of our trade rivals. And this because the lowest price at which American bidders could carry coal at a profit was $8 per ton, whereas our foreign rivals carried the coal for us at $5 per ton; and so our battle ships were followed around the world by the commercially triumphant flags of our commercial rivals.

All the long thousands of miles about the coasts of South America our men looked in vain for a single American flag flying from a single American ship.

At Honolulu they may have seen a few; at Yokohama, a few; at Shanghai, a few; and at Hongkong, a few; but from Hongkong until they returned home again they saw no trading ships carrying the Stars and Stripes.

We have some trade with the growing markets of the world, but our goods are carried by our trade rivals. This was not always so. One hundred years ago there was engaged in deep-sea foreign trade under our flag a total of 981,019 tonnage, more than we have to-day; one hundred years ago we carried in American ships 90 per cent of our trade. In 1861, the highest point we ever reached in deep-sea tonnage, the total number of tons was 2,496,894, and we carried 65 per cent of our own trade. To-day, in ships of all kinds—sailing vessels, steam vessels, and vessels of small size up to the largest size—all told, we have a tonnage of 940,068, and we are carrying less than 10 per cent of our trade. There are less than seven first-class steamers on the Atlantic plying between our ports and the ports of Europe; there are no steamers plying between South American ports and our own ports under the American flag, save four on the Red D Line to ports in the Caribbean Sea. There are but six on the Pacific Ocean engaged in the business of this country; we are already almost eliminated from the great struggle of the ocean carrying trade. To be sure, we have a coastwise tonnage, the largest of any coastwise tonnage in the world, amounting to 6,371,862 tons; but this is strictly coastwise and can not be considered as affecting this question, for this trade we protect by laws forbidding foreign vessels to engage in it. The tonnage among our foreign trade rivals is distributed as follows:

British	18,709,527
German	4,202,553
French	1,952,660
Japanese	1,242,699
Norwegian	1,977,978

While the world's total is 40,325,618. All these nations subsidize, and since 1890 British tonnage has doubled, German tonnage has trebled, and Japanese tonnage increased by ten times.

The contests of the future are not to be naval wars, or wars with guns, or contests with arms. They are to be trade wars, conducted upon a war basis. Already the doctrine of our free traders, so far as summed up in the sentence that the strongest and fittest must survive, is in full swing. It is profit that counts in trade wars as well as patriotism; but it has been the universal experience of the world that those nations enjoy commercial supremacy who dominate the trade routes of the world, and there is no exception whether these routes are upon land or water. The great contests of the coming years are to be to secure trade, and to secure new markets for the manufactures of the country. If we are to secure these new markets, if we are to supply the trade of the world, we must be prepared to fight with the strongest in the world, who are competing for the same opportunity. In every contest for trade supremacy, it is true, we are at liberty to select our own weapons, but it must be remembered in this connection that we are not at liberty to select the kind of weapons with which we would like our rivals to fight. This is a privilege they reserve for themselves; and our method of warfare of necessity must shape itself in each instance in accordance with the weapons which our rivals use, and they all use substantial subsidies—subsidies in one form or another—and they all subsidize enough. While they have been gaining on the seas, we have been vanishing. There is only one single American steamer running on the high seas in open competition, unfavored by legislation or governmental assistance, and that is running at a loss, and that boat is the *Dakota*.

What has brought about this decadence? What has produced this deplorable and alarming situation, rendering it inevitable? There must be a cause for conditions so lamentable. The gentlemen opposing us insist that the cause is wrapped up in what they are pleased to call our "outgrown, antiquated, and discredited navigation laws." They roll this phrase like a sweet mor-

sel under their tongues. But what are these laws and what do they provide? In what respects do they differ from the navigation laws of other countries? I answer, chiefly in three respects: First, the navigation laws establish a better standard of food for the American sailors. This is an item of expense. Second, they require better pay for the American sailor than his comrades under other flags receive. This is another item of expense. The third distinction is that our navigation laws require that no vessel shall sail under the American flag not constructed in an American shipyard, which requires American workmen employed at the American scale of wages. This is another and important additional expense.

Mr. SULZER. Do you say you can not buy abroad? The only thing you can not buy abroad and bring to this country is a ship.

Mr. FASSETT. You can buy a ship abroad and bring it to this country, but not under the American flag. But I can not yield to the gentleman; if I had the time I would be glad to talk with him.

The situation is that we ourselves are to-day at the tail end of the race; but if our navigation laws were wiped off the statute books, if we were permitted to buy our ships in every market of the world and to place the ships so purchased in the deep-sea traffic under the American flag, we could not, as matters stand to-day, live in competition against England, Germany, France, and Japan.

If the distinguished orator from New York [Mr. COCKRAN] and the distinguished orator from Ohio [Mr. BURTON] should associate others of like belief with them and form a corporation, and have the ten best ships in the world presented to them in their corporate capacity, with the sole condition that they run and operate those ships for twenty years, they could not afford to acccept the gift. Our handicaps are not those alone created by the conditions of our navigation laws. Our handicaps are many and are serious, every one of them almost enough to eliminate us from further competition; but when combined they exhibit at once the unhappy condition of our marine.

The first handicap is the higher cost of labor, which is from 50 to 100 per cent.

The second handicap is the higher cost of material, from 20 to 25 per cent.

The third handicap is the higher cost of money, from 2½ to 3 per cent per annum.

The fourth handicap is the higher cost of wages and salaries, running from 50 to 100 per cent higher, man for man, in the American than in the foreign trade.

The fifth handicap is the higher cost of fuel, 25 per cent.

The sixth handicap is the higher cost of repairs, 1 per cent per annum.

The seventh handicap is in the fixing of freight rates. When once an American freight rate is fixed, an American vessel can not change those rates under ten days. Any tramp may come in and cut the rate and take away the cargo, and our people are helpless to move a hand to cut the price.

Mr. TOWNSEND. We can not change our rate under thirty days.

Mr. FASSETT. Thirty days! That makes it even worse.

The eighth handicap, and the one handicap which would make it impossible for us to operate our ships, even if the navigation laws were repealed and our ships bought in open market in competition with our rivals, even if all these handicaps could be eliminated, is the character and amount of government aid given directly and indirectly to the owners and builders of every one of our foreign rivals. I have been amazed, I have been astounded that the apparent hatred for our American marine could go to the extent illustrated in this debate—of denying the well-known official facts of history. Gentlemen have denied the existence of subsidies. This denial must be based upon a technical use of words. I care not whether you call it government contract, government aid, government subsidies, government subvention, or bounties or rebates on state railroads, in whatever form or whatever manner the aid is given, it constitutes a subsidy, governmental assistance.

The gentlemen have said that Japan does not subsidize.

I give the figures from Fairplay, London, February 11, 1909:

The following figures show the growth of the subsidies paid by the Japanese Government:

	Regular lines.	Navigation.	Shipbuilding.
	Yen.	*Yen.*	*Yen.*
1896	134,775		
1900	4,205,729	1,288,761	152,908
1905	2,162,820	240,097	618,640
1906	6,196,182	1,492,020	722,500
1907	6,942,569	1,538,004	788,500
1908	7,686,300	3,438,955	1,995,440

Last year the Nippon Yusen Kaisha received about 6,483,707 yen and the Toyo Kisen Kaisha about 1,763,880 yen. It is stated that in 1907, without the subsidy, the Nippon Yusen Kaisha would have lost about 2,500,000 yen, while the Osaka Shosen Kaisha, despite the large amount of subsidies received, only paid 6 per cent for 1907. It is believed that the large amount of tonnage on the stocks indicates that a heavy increase in the subsidies will have to be reckoned on for the next fiscal year.

In replying to these criticisms the directors of the Nippon Yusen Kaisha state that in the event of the Government stopping its bounties the company will have no alternative but to discontinue the regular lines; and as other Japanese companies—such, for instance, as the Osaka Shosen Kaisha—would not be in a position to take up the services, which but for the subsidies could not be kept up with profit, the lines would have to be abandoned to the encroachment of foreign competitors.

The gentleman said that subsidies would give a temporary stimulus. All subsidies give only a temporary stimulus, but they do give a stimulus, and they give it to the precise extent for which made and provided.

It must be manifest that with these handicaps operating as I have shown we can not possibly meet our rivals on an even keel. We can not meet them upon terms of open competition; and knowing that very fact, gentlemen of the opposition invoke the law of the jungle and free-trade platitudes and sophisms of worn-out philosophy to prevent us putting our hands, as they are pleased to say, in the pocket of the Nation for the purpose of helping an industry in the manifest interests of the welfare of the whole people.

But gentlemen are inconsistent in their attitude. The same argument that they apply here, if applied and followed elsewhere, would have prevented nine out of every ten appropriations which have been made on this floor and made, too, with the assistance and approval of the very gentlemen who are opposing so vigorously this appropriation.

The gentleman from Ohio [Mr. BURTON], at whose mere word we appropriated $84,000,000 this year for the rivers and harbors of the country, and who advocates the future appropriation of untold billions of dollars for the improvement of our inland waterways, never advocated the appropriation of one dollar that did not begin its general blessing in universal benefits by blessing some one particular locality somewhere, somehow, first. All appropriations proceed to be generally useful by being specifically applicable. No appropriation has been made on this floor this winter that did not accomplish its general benefits through special conduits. Every law that appropriates money appropriates it for something, some one, somewhere, and under no circumstances, of course, is it justifiable unless the entire object is the universal good, and we have been in all other respects, save this particular respect, generous and broad gauged in our interpretation of the language of the Constitution. We gave $800,000 to Italy the other day, directly for individual good—the money of the people of the United States. Under the American flag and under the impulse of pure benevolence we approached the Treasury without warrant or authority under the Constitution and withdrew this vast sum, and I am glad we did it. It benefited twice. It blessed those who received and those who gave. [Applause.]

The law to reclaim arid lands first helps some one, some individual who owns the arid lands, before the profits from the enterprise can spread themselves abroad to all the land. When we built the great transcontinental railroads we appropriated billions of dollars' worth of public lands and bestowed them upon private corporations. What for? To help the private corporations build the railroads. What for? To open up the West. What for? To make homes for the people. But how were the people to get the homes? Why, we gave them billions of dollars' worth of public lands, the property of all the people, to individuals. What for? In order that the country might be developed. Develop what? Develop enterprises of all kinds; develop population; develop means of turning the raw-material gifts of nature into the finished materials of commerce, sending them east and sending them west and north and to the south to build up facilities for the creation of values and exchange of values, so that we might rise, be enriched, enlightened, have greater opportunities, and so make it possible for this land to be improved and individual benefits to be conferred in the first instance upon single, separate, private enterprises and people. And so we have made this land, as I said before, the envy and the despair of the world, the joy of the present, and the hope of the future.

"But," some one objects, "the railroads were subsidized as a military necessity." Military necessity was the salve applied to sensitive consciences. But this same consideration would apply now, for this subject has two aspects—the commercial and the national-defense aspects—and the Constitution gives us full authority to build and maintain a navy and provide for the national defense. We not only helped the railroads, but in the early days, while the forests still were surrounding us and our battle was against the deep woods, our forefathers adopted the policy of putting their hands into the Public Treasury and ap-

propriating for private enterprises to build what? To build roads—plank roads, turnpikes, canals, stage lines, and railroads. What for? To develop means of transportation. What for? To develop the country.

Again, we appropriate $146,000,000 for pensions to individuals because of wars that have been and to create encouragement for individual enlistment in case of war that may yet unhappily come.

We appropriate liberally for the extermination of the cotton boll weevil, a matter that does not directly interest the North and West and East, but does interest the very gentlemen who persist in their opposition to this measure.

Again, we have entered upon the enterprise of building the Panama Canal, which will cost from three hundred to five hundred million, for no one yet knows what its final cost will be, and when it is completed we shall not have a deep-sea vessel carrying the American flag to pass through the same.

We have spent millions upon millions of dollars under the leadership of the gentleman from Ohio [Mr. BURTON] to improve the rivers and harbors and to make 40 and 50 foot channels, and there is not a single vessel flying the American flag that needs a 40-foot channel.

Again, this very Post-Office Department illustrates in its annual appropriation bill this year the fallacy of the gentleman's proposition. In the post-office bill this year we appropriated public money for private benefits.

Here in the city of Washington the departmental mail, if sent out by the public at regular rates, would cost $20,000,000 annually; private benefit for public advantage. The periodicals carried free in the county of their publication cost $531,560.94 last year; that is a subsidy pure and simple to individual newspaper owners, but a public benefit.

Again, all second-class matter is carried at the actual cost of 8⅝ cents a pound, but it was actually carried for 1 cent per pound, a loss of 7⅝ cents a pound, and the Post-Office Department lost last year $57,000,000 to aid in the distribution of this matter. The very newspapers that denounced merchant marine subsidies took their pro rata share of this $57,000,000.

This appropriation I am not criticising; I am approving it; it is in the line of public policy. These appropriations were not made by men who keep their eyes glued upon the pages of a ledger, but men who take a wide view of things, who see way beyond to-day into the requirements of to-morrow, because they see in the general distribution of things these appropriations work out to the uniform general welfare and benefit of all the country.

In passing, I notice, Mr. Speaker, that it has been claimed that this specific appropriation is obnoxious because the Pacific Mail will benefit thereby. The Pacific Mail can not avail itself of this appropriation, as I am told, under the law, under any circumstances; but if it could, it could not get a dollar without earning a dollar and doing more than a dollar's worth of good for the whole country.

Mr. Speaker, there are two great features to this question—two great lines of thought and consideration. One is that phase which appeals to commercial ambition, to the desire for profit, to the love of expansion, to the ardor for trade conquests. The other feature is that feature which has been so derisively referred to by the gentleman from New York as the patriotic feature—the feature of national defense and national security.

If any objection of an academic character can be attached to the policy of a ship subsidy, there certainly can be no such constitutional objection urged to the maintenance of the navy and providing for the national defense. There are two great American questions. One is, Will it pay? The other is, Is it right? If the first question is decided in the affirmative, we sometimes do not linger to ask the other. But this particular proposition is both right and it will pay.

Even the gentleman from New York [Mr. COCKRAN] can not be so blinded by his syllogisms and the gentleman from Ohio [Mr. BURTON] can not be so self-hypnotized by his own glittering generalities as not to see that a navy organized for defense can only be defensive when it becomes offensive, and that the purpose of maintaining a navy and an army is in order, when the dire necessity comes, to strike the hardest possible blow at the farthest possible distance from home, in the shortest possible time, with safety to itself. They must see that this can not be accomplished without an army and a navy equipped for this particular purpose. We need supplemental auxiliary vessels both for the battle ships and for the army. We need transports, and scouts, and hospital ships, and supply ships, and coal ships.

We have already spent $300,000,000 upon the new navy, and we must continue to spend large sums constantly in order to meet the requirements of this navy already under way. It would require $200,000,000 to build and equip the necessary supplemental ships. This is a serious question. If we are to undertake to build for the Nation's ownership an adequate supply of the right kind of ships and auxiliaries for the complete auxiliary navy, and a complete fleet to move not less than two army divisions at any given moment, the initial cost to the Government would be not less than $200,000,000. But the outlay of $200,000,000 would require an annual fixed charge of 3 per cent for interest, for the Government can borrow at that rate; 5 per cent for maintenance, for iron ships only last twenty years; 6 per cent for insurance; 3½ per cent for repairs; 6 per cent for salaries and labor; 6 per cent for food; and 6 per cent for fuel; or a grand total expenditure of $71,000,000 in the way of fixed charges annually. If this were done, and the American people would meet such an outlay to maintain our national honor, we would have the difficulties and friction contingent upon finding the men and officers and of controlling and disciplining them; and there would be the increased expense for mere operation, for so large a body of ships and men could not be kept in absolute stagnation, unoccupied in times of peace. They would be earning nothing, and all our naval resources would be in first line of defense. They would have to be constantly occupied to keep them in proper condition for immediate response in times of peril.

To build and maintain and man all the extra ships needed to make the navy useful to its best degree, and the army valuable at the most essential point, would thus be the most expensive way possible to meet an end so desirable and so essential. Whereas by a patriotic, intelligent, and far-sighted policy of proper distribution of subsidies, which is pursued by every one of our trade and naval rivals, we could build up, as once before we had, a peerless merchant marine, which would carry our flag into every sea and our ships into every port, and be developing our foreign trade in times of peace and training men and officers for our protection in times of war; and we should accomplish this purpose in a better, more efficient, and in a cheaper way than by any other method.

Gentlemen have accused us of masking our batteries; of making false pretenses. I repudiate the intimation with scorn and indignation; I mask no batteries. I meet the issue with unflinching determination; there is no other way for us to save our merchant marine save by subsidies, and subsidies in amount and in methods which will meet the amount and the methods of our trade rivals, for, as I have said before, we can not select, ourselves, the weapons with which our enemies will fight us; we can choose our own, and they will choose their own. They have chosen subsidies, and we must inevitably go into a war of subsidies. Our trade rivals subsidize to the extent of nearly thirty-six millions a year. It has been said on this floor that Germany does not subsidize. The gentleman is mistaken; she does subsidize, and gives aid in more than one way and gives aid sufficiently; she gives rebates on all freights carried on her state railroads intended for the export trade.

It has been said here that England does not subsidize—she is the chief offender. In rebates and gifts and contracts, in subvention, in government loans, and in direct subsidies, she expends every year more than $8,000,000.

I have here a statement of the different subsidies of our trade rivals:

Great Britain and colonies.

Cunard Steamship Company	$1,060,788

Much has been said in this debate by gentlemen on the opposite side about the *Mauretania* and the *Lusitania*. I thank the gentlemen for the names. These magnificent boats—the finest steamers afloat, the best creation of modern nautical skill and ability—were practically donated to the Cunard Line. Nothing has been spared to make them perfect; nothing has been spared which could render them more swift, more strong, more true, more useful. Nothing has been spared to secure economy of administration, of maintenance, and of operation. These magnificent vessels cost $6,500,000 each. The English Government loaned the money to the Cunard Line—to the company—under terms, and in accordance with agreement, whereby the subsidies paid by the Government meet every payment of interest and principal the moment it becomes due. At the end of twenty years the *Mauretania* and the *Lusitania* will not have cost the Cunard Company one cent. All the Cunard Company has had to do, all the Cunard Company will have to do, is to make a profit over and above the cost of maintenance and operation. Now, where would an American be in undertaking to do anything against the *Mauretania* and the *Lusitania*?

Here is where he would find himself: In the first place, I will take the illustration, even if he should buy the ship in England at the same cost. If the American bought the ship in England, he would pay six and a half million dollars for it. So would the Englishman; but the Englishman would get his money for 2¾ per cent and the American would pay 5 per cent for his money. In this one item is a handicap of $146,250 every year on interest. It would cost the American 1 per cent annually more for the repairs; that is, $65,000. It would cost the American $130,000 more a year for the wages and salaries of the officers and crew. It would cost the American $48,750 more a year for the food for the crew, because under our "inadequate navigation laws" it is made necessary to feed a sailor like a man. [Applause.] At the end of one year before our American owner was on an even keel with the Englishman he must earn $390,000 more than the *Lusitania*, and the same is true of the *Mauretania*.

And this is the case where we have been permitted to buy in the foreign market, under my supposition.

But now let us take the conditions as they actually exist were we compelled to build the *Mauretania* or the *Lusitania* in America. It would cost us to build one of these ships $8,125,000. We would pay 5 per cent for our money, $406,250. The Englishman would get his boat at $6,500,000, at 2¾ per cent interest, or $178,750. It would cost us $248,375, or 3½ per cent, for repairs; the *Lusitania* costs 2½ per cent for repairs, or $162,500. It would cost us 5 per cent for wages. The Englishman would pay 3 per cent for wages. We would pay $406,250; the Englishman would pay $195,000. We would pay 4 per cent for food; the Englishman would pay 3½ per cent for food. We would pay $325,000; the Englishman would pay $211,250. We would pay for insurance 6 per cent; the Englishman would pay the same. For depreciation we would have 5 per cent, the same as the Englishman pays. But we are paying this on $8,125,000, so that our insurance bill is $487,500, against the Englishman's of $390,000, and our depreciation is $406,250, as against the Englishman's $325,000, or an annual handicap on account of difference in cost and charges of $995,875. For twenty years, which is the life of the English contract with the *Lusitania*, the handicap would amount of $19,917,500.

To pay a 5 per cent dividend the American would have to earn $406,250; the Englishman would have to earn $325,000, or an annual increase of earnings on the part of the American amounting to $81,250, which, in twenty years, would amount to $1,625,000; or, in other words, in order to be on an even keel with the English boat the American boat in twenty years would have to earn more than the Englishman $21,542,500. In the meantime the *Lusitania* gets a subsidy of $6,500,000, plus the interest at 2¾ per cent.

This is the kind of competition which we are obliged to meet; it is bitter and it is destructive, for, of two ships of equal capacity, officered and manned with equal intelligence, managed by a crew of equal ability, directed by a company of equal sagacity, that one ship will get the business which can carry the trade the cheapest, and that ship can carry the cheapest which costs the least to build, maintain, and operate.

Mr. WILSON of Pennsylvania. Will the gentleman yield for a question?

Mr. FASSETT. I would rather not yield at all, Mr. Speaker. Gentlemen have claimed that could we open our navigation laws so as to permit the purchase of ships in any market we could meet the competition. I think I have effectually disposed of that proposition. If to get free ships would solve the problem, I would be for free ships at once. It must be remembered that already all materials for building ships and equipping ships are admitted free of duty for ships built for the foreign trade, the only restriction being that they can only enter our coastwise trade for two months in any one year, and only one ship has been built under this law on account of this restriction.

Now, gentlemen, the free-ships proposition is a delusion and a snare.

The next proposition or proposal made by gentlemen in opposition is that we should establish preferential duties, and that goods brought in American ships should be permitted to enter on payment of less duty, and that goods exported in American ships should receive a rebate. The trouble with this proposition is threefold.

First, we have solemn treaties with other nations—with all our trade rivals, some 43 treaties—and in all these treaties we have agreed that there shall be no distinction in the treatment of and charges upon goods brought in American bottoms and goods in foreign bottoms, either coming in or going out; and in order to reduce our difficulties and solve this particular problem along this particular suggestion, we would have first to ignore or renounce these treaties, 43 in number, and then rewrite all of them with all our trade rivals and endure all the bad feeling thus engendered and run the risk of all possible friction thus developed, and even meet the possibility of war if we should attempt this backward movement.

The next objection to this proposed solution is that the world has abandoned that method; it has been tried and failed; it created difficulties in every country where tried, leads to suspicion, jealousies, and charges of corruption, so the differential duties have been abandoned. They are antiquated, impracticable, impossible.

A third objection is that more than half of our imports are already on the free list, and there could be no preferential allowances of duties where no duties exist; and as there are no duties on any exports, there could be no rebates on outgoing tonnage. The suggestion, if not a subterfuge, is a meretricious one.

The next proposed solution of our trouble is the proposal that we shall tear down our tariff walls and enter upon the experiment of free trade. Ah, Mr. Speaker, here we have the real crux of the situation. This is the demand of the free trader, the magazine writers, and of our opponents on the other side; this is the demand of Mr. COCKRAN, the demand of the distinguished leader from Missouri; this is the insistent cry of all men who hate the tariff, and who hate protection and who hate the administration of protective laws and the success of the same. Tear down our tariff walls! That is their cry. Tear down our tariff walls! Tear them down in order that material may be cheaper, that wages may be lowered, that prices may be reduced! Tear down the tariff walls in order that no governmental interference or protection shall turn aside the operation of the laws of supply and demand! Tear down the tariff walls in order that all competition may begin to proceed upon natural lines! Tear down the tariff walls to initiate competition in cheapness—in the cheapness of men, in the cheapness of women, in the cheapness of children, in cheaper homes, and cheaper lives. It means competition under the law of the jungle, from which civilized and Christian nations have been for many years turning away.

Under the protective tariff we have lifted up the Nation to a higher plane of living than is enjoyed by our trade rivals. We have come to enjoy better pay, pleasanter homes, more luxurious surroundings. We are living on a better basis, and it is only by virtue of the law of protection that we are thus enabled to live. We have established this higher and more merciful and blessed condition of things by the persistent efforts and the intelligence and virtue of the Republican majority of this country represented here in Congress. [Applause.] We have established it, and we are going to maintain it. [Applause.] We refuse to subject the American people to the remorseless competition of the crowded nations whose toilers are willing to live on the lowest scale and for the smallest pittance.

This industry of carrying goods upon the high seas is the one American industry that has been slaughtered on the altar of protection. I have no qualms in facing it. I agree with the gentleman from Mississippi for once, and I agree with the gentleman from Missouri for once, that the protective tariff has slaughtered our American merchant deep-sea marine. [Applause.] We propose now by means of this bill to change the situation, to bring it under the ægis of protection, and get down to a square deal and fair play.

Adopt free trade, tear down the tariff walls; and when we shall have reduced to the lowest point paid in the country of our closest competitor the wage scale, when material has been reduced to the point reached in the country of our keenest competition, when the whole plane and scale of living has been cut down to the scale enjoyed by our keenest competition, then we shall be able to build ships as cheaply as our competitors. But even then, Mr. Speaker, we shall have to face the enormous handicap of the subsidies given by other governments. [Applause.]

The gentleman from Ohio said that on the high seas all is free and open; that protection can not extend out into the great, broad reaches of the ocean. I say there is no sea broad enough to shut out human competition; and where competition can go, protection can follow. [Applause.] The seas have not been broad enough nor deep enough to shut out foreign subsidies; to this complexion you must come at last.

You may adopt the policy of buying your ships in open market; you may adopt the policy of differential treaties; you may adopt the policy of free trade; but you will yet have to face the foreign subsidies. They are the Ossa of subsidies piled upon the Pelion of lower cost of labor and materials.

Foreign subsidies amount to nearly thirty-six millions a year. Suppose it cost us fifty millions a year. The national profit enjoyed in the form of national safety and security, in ultimate business prosperity, would be purchased cheaply at $50,000,000 a year. We are paying $210,000,000 a year for transportation and importation of our goods in foreign trade. We receive one-tenth of this, leaving $189,000,000 to our foreign rivals. If we could recover our fair proportion by an expenditure of even fifty millions annually, it would prove a profitable business investment. [Applause.]

Gentlemen have been berated and belittled here because they appealed away from the sordid considerations, and from motives of patriotism and love have endeavored to secure this appropriation. They have been accused of wrapping themselves in the American flag for that purpose. It seems to me, Mr. Speaker, that it is quite as dignified and proper to approach the National Treasury under the protection of the American flag, for the purpose of the national improvement and protection, as it is, under that same flag, to bow down before the altars of the false gods of cheapness and servility and pauper labor, under the miserable plea of an incomprehensible economy. [Continued applause.]

How much time have I remaining, Mr. Speaker?

The SPEAKER. The gentleman has ten minutes remaining.

Mr. FASSETT. Mr. Speaker, it has been assumed that the Republican majority in this Congress invented the idea that the surplus in the Post-Office Department might as well be used to subsidize American packets. I want to say, for the benefit of my friends on the other side, that our chairman will have to divide the honor for that distinction with that distinguished Democrat, Thomas Jefferson.

In Ford's edition of The Writings of Thomas Jefferson, volume 4, page 69, will be found a letter from Thomas Jefferson to Richard Henry Lee on the beginnings of an American navy, in the course of which he says:

> I should be happy to hear that Congress thought of establishing packets of their own between New York and Havre. * * * Could not the surplus of the post-office revenue be applied to this?

Conditions, of course, are widely different, but the very purpose of this bill is to use the surplus postal revenues from our ocean-mail system to build and run American ships that will not only carry our mails, but will also be serviceable as auxiliaries to the national defense.

The gentlemen here say there is no surplus in the Post-Office Department. The general deficit in the Post-Office Department is $16,000,000 this year. There would be an enormous surplus but for the extra cost of delivering second-class mail matter and the continuous extension of the rural free-delivery routes, and every postal route that does not pay is subsidized from some route that does pay, and the ocean route is the route that carries the most profitable mail, and it paid over $8,000,000 last year, and we have as much right, it seems to us, to ask that this surplus be used to subsidize merchant vessels in our trade as the country at large has to apply that surplus to the free-delivery routes or to carry newspapers or magazines for nothing. [Applause.]

Gentlemen object to the term "subsidize." Personally I would never use the synonyms, or any equivocal terms, such as "subvention" or "promotion" or "protection." War is war, and we are engaged in a supremacy war for markets and for trade. We are fighting for permanent, present prosperity and future supremacy. We are fighting with enemies who do not hesitate to employ any and every possible means for victory, and when you recall that our success in this line contemplates not only trade expansion, but national security in times of war, I think we may well call upon you to subsidize; subsidize these other nations off the sea; they have commenced the policy; they are continuing the policy; they are driving us off the sea; they have, indeed, practically driven us off the sea. Now, we must meet the situation as it is and not as it ought to be; we must meet conditions as they arise and not conditions as they are imagined. Japan can not afford to, but she subsidized to the extent of $8,000,000 this year, and next year she will be obliged to use more, but she has succeeded in driving us off the Pacific.

We have only one steam vessel under all the stars that is in actual, unmodified, competition, and that is the *Minnesota*, the sister ship of the *Dakota*, and the *Minnesota* travels at a loss. The Pacific Mail has the advantage of the coastwise laws and of cheaper labor, because that company does not come under the law of 1891, and so it happens that there is only one boat run by a corporation out of pure patriotism at an annual loss, and the Pacific Mail is now, according to Mr. Harriman's recent interview, carrying chiefly cubic feet of air.

South America and the Latin republics are doing a business of two thousand millions of dollars a year. We get of that total amount one-fourth; of that one-fourth we furnish, ourselves, by our own purchases, three-fifths; we have a quarter of their trade. We furnish her 15 per cent of what she buys, but we buy 30 per cent of what she sells.

Gentlemen have said that there are facilities between North and South America, and that is true. But what facilities? Letters can be sent to South America, replies can be had from South America, if you are willing to wait. But our letters go twice across the Atlantic to get once to South America, and so with replies; and a merchant in South America wishing to do business with a man in New York or London can get his letter back from London before his letter reaches the New York merchant. Other matters are sent to and fro with equal inconvenience and uncertainty.

The question for us to face, the question which will not down, is this: Do we want to extend our foreign markets? Is it worth while to seek the markets of the world? Is it worth while to rescue our navy from its present condition and furnish it with an auxiliary fleet? Is it worth while to have a merchant marine on every sea? Is it desirable to have a large reserve, from which sailors as well as ships can be recruited in times of need? These are the questions!

If it is worth while, there is just one way to go about it—and we are concerned with the best way, the only way—we must, in some form or other, pay the price. Now, is the future growth, our future development, and our future security worth the few paltry millions of dollars a year we would have to pay for subsidy until our merchant marine were established?

The trade of South America is increasing at the rate of $100,000,000 a year; a thousand millions in ten years. This interests all of us—the South and the West, the North and the East, the men who raise corn, the men who raise wheat, and those engaged in commerce of various kinds. It is a national question; it is a question for now and for the future. It is not a party question; it is a question of wise, deep, broad business statesmanship.

When England had her war with the Boers—a little war—the price of freight to South America went up because the boats carrying the freight were owned by England and they were called home for use and taken off the sea, and the boats remaining put up their prices. We had no vessels with which to deliver our goods; there was a market for our goods, but we had no boats in which to carry them to the market. What would be said of the business sagacity of John Wanamaker if he permitted

Siegel & Cooper to deliver his goods? That is precisely what we are doing; we are allowing our trade rivals in the newly developed markets of the world to deliver our goods. We are sending no ships whatever to South America south of the Caribbean Sea. We have a few to Europe; but our trade rivals are delivering our goods when they please, and where they please, and how they please, as often as they please, and in the manner they please, and at their own prices.

Absolutely, and in spite of all this, we are growing; in spite of it all our industries are expanding; in spite of it all our prosperity and our wealth are increasing. Every time the sun goes down our wealth has increased by $8,000,000, and this has been true for seven years. The output of our mines is as great as the export trade of the world. The output of our manufacturing enterprises, those enterprises that were established and protected by using the taxing power of the Government to enable private enterprises to make profits which otherwise would have made losses, through a high protective tariff this output exceeds thirteen thousand millions of dollars a year, every dollar of which goes to pay for American homes and American labor and American wages. [Applause.] Our agricultural output, under the overshadowing power of a protective tariff, has increased in equal importance with the output of our mines, and all this wonderful, marvelous growth and development began with the divine courage to think higher than mere immediate temporary profit.

Our interstate commerce exceeds by a thousand millions the export and import trade of all the world, ourselves included. At present we have enough to do at home for our goods. At present, even though the times are slack, the demand is excellent; and two years ago, when the times were not slack, the manufacturer did not have to put his salesmen on the road. Telegraph orders came in faster than they could be filled. Our consuming capacity had not overtaken our capacity to produce at that time; but that is coming, and that is coming soon. It is coming with amazing rapidity.

The South in ten years has increased her manufacturing capacity 680 per cent, and in twelve years her textile industries 1,120 per cent. Pittsburg alone originates more tonnage in iron and steel and manufactures of iron and steel than Germany or England, and when this American giant, this splendid, intrepid American workman, whose ability and creative energies are so frequently extolled in debate by gentlemen of the opposition, becomes fully occupied and grows to his full stature and is turning out the proceeds of the mills, the mines, and the factories faster than we have a capacity to do now, then will arise an appreciation of the importance of this legislation; then will arise a cry for deliverance; then will arise a determination to have foreign markets and seek out new markets, and then we will realize, when it is too late, that our trade rivals, while we have slept, have taken possession of every approach to every market.

Shall we sit here and submit to be tied hand and foot because the distinguished gentlemen in the minority have a misleading conception of immediate profit and of immediate loss upon a cent per cent basis?

It is an unfortunate thing when you are busy with the world to keep your eyes glued on the ledger in the countingroom. Occasionally it is wise to look beyond your own feet across the horizon, and you may occasionally usefully gaze at the stars in the sky and direct your future steps according to their leadings. [Applause.]

Now, let us take our courage in both hands and with convictions equal to our courage, and with that courage and that equal conviction let us solve this problem in the only way in which it can be solved, for there is no other way "just as good." There is no substitution for subsidies. The contest is on; our rivals have entered. They are swinging out upon the broad seas. They have nearly completely subsidized us off the seas. They are shoving us out from foreign markets. We are not getting our share of the increasing commerce of the world. We should encourage the building of our own ships. We must encourage the operation of our own ships. We should encourage the carrying of our own commerce. We must encourage the upbuilding of a great merchant marine for our future protection in times of peril and to secure profit in times of peace, until we reach the point where, without government aid, we can continue to carry our own fair share of all the world's commerce and most of our own and maintain ourselves in our proper place in competition with our rivals. This course is dictated by every consideration of prudence and demanded by every impulse of patriotism. [Long and continued applause.]

The SPEAKER. The time for debate has expired.

Mr. OVERSTREET. In the interest of time, I call for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 172, nays 175, answered "present" 6, not voting 33, as follows:

YEAS—172.

Acheson	Douglas	Hill, Conn.	Mudd
Alexander, N. Y.	Draper	Hobson	Needham

ANSWERED "PRESENT"—6.

Chaney	Haugen	Scott	Sherwood
Cooper, Wis.	Nelson		

NOT VOTING—33.

Ames	Howell, Utah	Lindbergh	Reid
Barclay	Jackson	McMorran	Smith, Mo.
Birdsall	James, Addison D.	Madden	Snapp
Broussard	Kahn	Mouser	Watson
Burleson	Lamar, Mo.	Norris	Weems
Clark, Fla.	Lassiter	Patterson	Weisse
Esch	Leake	Pearre	
Fuller	Legare	Perkins	
Hamill	Lewis	Pratt	

So the motion to suspend the rules and pass the bill was rejected.

The Clerk announced the following pairs:

Until further notice:

Mr. AMES with Mr. CLARK of Florida.

Mr. BIRDSALL with Mr. LAMAR of Missouri.

Mr. FULLER with Mr. LASSITER.
Mr. HOWELL of Utah with Mr. LEGARE.
Mr. ADDISON D. JAMES with Mr. LEWIS.
Mr. LINDBERGH with Mr. PATTERSON.
Mr. MADDEN with Mr. SMITH of Missouri.
Mr. PEARRE with Mr. WEISSE.
Mr. MCMORRAN with Mr. BROUSSARD.
On this vote:
Mr. MOUSER (in favor) with Mr. COOPER of Wisconsin (against).
Mr. WEEMS (in favor) with Mr. HAUGEN (against).
Mr. BARCLAY (in favor) with Mr. NORRIS (against).
Mr. KAHN (in favor) with Mr. NELSON (against).
Mr. WATSON (in favor) with Mr. ESCH (against).
Mr. JACKSON (in favor) with Mr. PERKINS (against).
Mr. SCOTT (in favor) with Mr. BURLESON (against).
Mr. SHERWOOD (in favor) with Mr. REID (against).

Mr. COOPER of Wisconsin. Mr. Speaker, I am recorded as voting "no." I am paired with the gentleman from Ohio [Mr. MOUSER]. I wish to withdraw my vote.

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. COOPER of Wisconsin, and he answered "present," as above recorded.

Mr. SCOTT. Mr. Speaker, I voted "aye." I am paired with the gentleman from Texas [Mr. BURLESON].

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. SCOTT, and he answered "present," as above recorded.

Mr. NELSON. Mr. Speaker, I voted "no." I am paired with the gentleman from California [Mr. KAHN], and I wish to withdraw my vote.

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. NELSON, and he answered "present," as above recorded.

The SPEAKER. The Clerk will call my name.

The Clerk called the name of Mr. CANNON and he voted yea as above recorded.

Mr. CLARK of Missouri. Mr. Speaker, I would like to inquire whether Judge GOLDFOGLE is recorded; he is sick.

The SPEAKER. The gentleman from New York is recorded in the negative.

Mr. CLARK of Missouri. That is the way I want him recorded.

The SPEAKER. Does the gentleman from Missouri know that he is sick and did not vote?

Mr. CLARK of Missouri. No; he was here and voted, and I wanted to ascertain whether he was recorded or not.

The result of the vote was then announced as above recorded. [Great applause.]

Mr. CLARK of Missouri. I move that this bill lie on the table.

Mr. OVERSTREET. Mr. Speaker, I desire to have my name called.

The SPEAKER. But the result has been announced.

Mr. CLARK of Missouri. I rise for the purpose of moving that the bill lie on the table.

The SPEAKER. The bill is back on the calendar.

Mr. CLARK of Missouri. I move to reconsider the vote.

The SPEAKER. There is nothing to reconsider. This was a motion to suspend the rules, and that can not be reconsidered. If the House will be in order and the Speaker can have the floor, the Chair will state that this is a motion to discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill and pass the same under suspension of the rules. Now, the House has by its vote refused to suspend the rules and discharge the Committee of the Whole House on the state of the Union, and the bill remains on the Union Calendar.

Mr. CLARK of Missouri. There was so much confusion that nobody could tell how it was brought up. I accept the statement of the Chair.

The SPEAKER. The Chair is not responsible for the wild demonstration. [Laughter.]

Mr. OVERSTREET. Mr. Speaker, I ask unanimous consent to reconsider the vote.

Mr. MOON of Tennessee. I object.

Mr. OVERSTREET. You can move to lay it on the table. I am trying to aid you gentlemen.

Mr. SHERLEY. You can not do that under a motion to suspend the rules.

The SPEAKER. The gentleman can at any time, if he receives recognition by the Speaker, move to suspend the rules and pass the bill. It is as if the vote had not been taken.

Mr. OVERSTREET. I move to suspend the rules and pass the bill.

Mr. COCKRAN. Oh, Mr. Speaker, I think that decency of procedure would scarcely tolerate such recognition.

FIXING COMPENSATION OF OFFICIALS IN CUSTOMS SERVICE.

Mr. PAYNE. Mr. Speaker, I call up the conference report on the bill (H. R. 21003) fixing compensation of certain officials in the customs service, and for other purposes, and I ask that the statement be read in lieu of the report.

The SPEAKER. The gentleman from New York asks that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 21003) fixing the compensation of certain officials in the customs service, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows: Strike out all of the matter inserted by said Senate amendment and insert in lieu thereof the following:

"That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of laborers in the customs service, as he may think advisable, to a rate not exceeding eight hundred and forty dollars per annum.

"SEC. 2. That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of inspectors of customs, as he may think advisable, not to exceed in any case the rate of six dollars per diem, and in all cases where the maximum compensation is paid no allowance shall be made for meals or other expenses incurred by inspectors when required to work at unusual hours.

"SEC. 3. That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of deputy collectors, assistant appraisers and examiners of merchandise, examiners of tea, and examiners and special examiners of drugs in the customs service, as he may think advisable, not to exceed in any case three thousand five hundred dollars per annum.

"SEC. 4. That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of deputy naval officers and deputy surveyors of customs, as he may think advisable, not to exceed in any case three thousand dollars per annum.

"SEC. 5. That section twenty-seven hundred and forty-six of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows, to wit:

"'SEC. 2746. An additional compensation of twenty-five per centum may be continued, at the discretion of the Secretary of the Treasury, to the appraisers, deputy collectors, deputy surveyors, deputy naval officers, and weighers at the port of San Francisco: *Provided, however*, That the compensation so fixed shall not exceed the maximum amounts fixed by law.'

"SEC. 6. That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of assistant weighers in the customs service as he may think advisable, not to exceed in any case the rate of four dollars per diem.

"SEC. 7. That hereafter the salary of the Treasurer of the United States shall be eight thousand dollars per annum.

"SEC. 8. That all laws and parts of laws inconsistent with this act are hereby repealed."

And the Senate agree to the same.

SERENO E. PAYNE,
JOHN DALZELL,
Managers on the part of the House.
NELSON W. ALDRICH,
EUGENE HALE,
H. M. TELLER,
Managers on the part of the Senate.

The statement was read as follows:

STATEMENT.

The managers on the part of the House in the conference with the Senate on the disagreeing votes of the two Houses on the bill H. R. 21003, fixing the compensation of certain officials in the customs service, and for other purposes, make the following statement of the result of the agreement arrived at in the conference report:

The Senate amended the House bill by striking out all after the enacting clause and inserting two sections, one fixing the maximum compensation of inspectors of customs, and the other

increasing the salary of the Treasurer of the United States to $8,000.

The House receded from the disagreement to the Senate amendment and concurred with an amendment. The amendment restores section 1 of the House bill; it also restores section 2, fixing the maximum salary of inspectors of customs at $6, instead of $5, as provided in the House bill; it also restores sections 3 and 4, striking out in each section a provision authorizing the Secretary of the Treasury to appoint certain officials named in these two sections.

Section 5 of the House bill, amending section 2746 of the Revised Statutes, is restored with two additional amendments to section 2746, one leaving the additional compensation to be paid to these officers at the port of San Francisco at the same maximum limit, to be approved by the Secretary of the Treasury, and with a proviso that their compensation shall not exceed that provided by law for other officers of a similar character.

Section 6 of the House bill is also restored.

Section 2 of the Senate amendment, fixing the salary of the Treasurer of the United States at $8,000, is agreed to as section 7.

SERENO E. PAYNE,
JOHN DALZELL,
Managers on the part of the House.

Mr. PAYNE. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. Speaker, this is a conference report on a bill that was passed by the House at the last session of Congress to fix the compensation of certain officials in the customs service. I have refused to sign the conference report. The Senate struck out all of the items in the bill as passed by the House and wrote a new bill. The conferees have reached an agreement, which, as I say, I did not sign, and for this reason: I do not think that the agreement as reached between the conferees of the House and Senate is unfair, if we intended to pass the bill at all; but this bill is another effort to increase salaries. It is only a year or two ago when we increased the salaries of the customs inspectors in New York from $4 a day to $5 a day. This bill now increases the salaries of all the customs inspectors in the United States to $6 a day, if the Secretary of the Treasury sees proper to allow it, and experience has shown that when you fix a limitation upward the Treasury Department always recognizes that as the salary intended to be fixed by the Government, and raises it to that limit.

There is another change in the bill that was originally inserted by the Senate and agreed to by the House conferees, and that is to increase the salary of the Treasurer from $6,000 a year to $8,000 a year. Now, I do not contend that possibly some of these officials should not at some time have their salaries increased, but I do say that it is unwise now, in the present condition of the Treasury, to provide for a blanket increase as this bill does. It is no time to increase salaries at all. We are facing a deficit in the Treasury of $150,000,000. We do not know whether we can go through next summer without issuing bonds, and for that reason I think these salary bills should be defeated at this time. We should find out what is the condition of the Treasury, and next winter is time enough, or next year, or the year after, when we find that there is money enough in the Treasury to meet the obligations of the Government, to go into a general increase of salaries, but it is not opportune and it is not wise at this time. More than that, the collection of the customs revenues of this country to-day is costing more than to collect the customs revenues in any other country in the world.

I do not say that it is not necessary for us to increase the salaries of some men, but I do say that there are a great many barnacles carried on the rolls of the customs-revenue service that ought to be cut out, and that we ought not to increase the salaries in any of these customs-service ports until we take up a general bill revising the whole customs-revenue service, cut out the places that are not needed, cut out the barnacles from off the ship, and then adjust the salaries to a proper limit, and for that reason I am opposed to the passage of the bill at this time.

Mr. JOHNSON of South Carolina. Will the gentleman permit a question?

Mr. UNDERWOOD. Yes.

Mr. JOHNSON of South Carolina. Was the salary of these customs-service men not increased a year or two ago on the ground that the customs service had grown and that these people were overworked?

Mr. UNDERWOOD. It was only a year or two ago that this very same argument was made, and the House increased these salaries in the larger ports from $4 to $5 per day.

Mr. COCKS of New York. Does the gentleman understand that that was in lieu of any pay for allowances? They were getting more than $4 at that time. They were allowed expenses.

Mr. UNDERWOOD. Yes; and this intends to make another increase.

Mr. COCKS of New York. Yes; but not as much as the gentleman says.

Mr. PAYNE. Mr. Speaker, this is an agreement which will settle a question that has been agitated for some time before the House, and practically on the lines of the bill which was passed by the House by an overwhelming majority at the last session. I do not need to say anything further. The increase as a draft on the Treasury does not amount to a large sum of money by any means, and the increases are made in the discretion of the Secretary of the Treasury in order that he may reward and encourage faithful inspection, and it is his intention so to do. It applies to all parts of the country wherever there is one worthy of the distinction. This agreement is very largely the House bill. The House yielded to one Senate amendment which allowed a limit to be increased from $5 a day to $6 a day. It is not supposed that many inspectors will be increased to that amount. That is all I care to say, and I ask for a vote.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and on a division (demanded by Mr. UNDERWOOD) there were—ayes 165, noes 97.

So the conference report was agreed to.

AGRICULTURAL APPROPRIATION BILL.

Mr. SCOTT. Mr. Speaker, I present a conference report on the agricultural appropriation bill.

The SPEAKER. The gentleman from Kansas presents a report on the agricultural appropriation bill. The Clerk will read the report.

The report was read, as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 58.

Amendment numbered 62: That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert the following: "twelve million nine hundred and ninety-five thousand and thirty-six dollars;" and the Senate agree to the same.

CHAS. F. SCOTT,
GILBERT N. HAUGEN,
JOHN LAMB,
Managers on the part of the House.
F. E. WARREN,
J. P. DOLLIVER,
H. D. MONEY,
Managers on the part of the Senate.

Mr. SCOTT. Mr. Speaker, I move the adoption of the report.

The SPEAKER. It seems that there are two amendments to this conference report.

Mr. SCOTT. One amendment in conference was that relating to the Country Life Commission, which was brought before the House this afternoon; the other is simply to correct the totals of the bill.

The SPEAKER. Without objection, the conference report is agreed to.

There was no objection.

PENSIONS.

Mr. LOUDENSLAGER. Mr. Speaker, I desire to submit a conference report on Senate bill 9278, and ask that the statement be read in lieu of the report.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment to the bill on page 2, lines 7 to 11, inclusive.

That the Senate recede from its disagreement to the amendment of the House on page 3, lines 5 to 8, inclusive, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House on page 3, line 11, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House on page 4, lines 5 to 7, inclusive, and agree to the same.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

HENRY E. BURNHAM,
CHARLES CURTIS,
JAMES P. TALIAFERRO,
Managers on the part of the Senate.

The statement was read as follows:

STATEMENT.

Statement to accompany report of committee of conference on disagreeing vote of the two Houses on S. 9278.

This bill, as it originally passed the Senate, contained provisions granting pensions and increases of pensions to certain soldiers and sailors of wars other than the civil war, and to certain dependent relatives of such soldiers and sailors, and was passed by the House with amendments. These amendments were disagreed to by the Senate and a conference held. After full conference the conferees agreed as follows:

That the House recede from its amendment to the bill on page 2, lines 7 to 11, inclusive.

That the Senate recede from its disagreement to the amendment of the House on page 3, lines 5 to 8, inclusive, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House on page 3, line 11, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House on page 4, lines 5 to 7, inclusive, and agree to the same.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

Mr. LOUDENSLAGER. Mr. Speaker, I move the adoption of the report.

The SPEAKER. Without objection, the conference report is adopted.

There was no objection.

PENSIONS.

Mr. LOUDENSLAGER. Mr. Speaker, I submit another conference report, and I ask that the statement be read in lieu of the report.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 9421), granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment on page 1, lines 6 to 9, inclusive.

That the House recede from its amendment on page 2, lines 1 to 4, inclusive.

That the House recede from its amendment on page 2, line 7.

That the House recede from its amendment on page 2, line 10.

That the Senate recede from its disagreement to the amendment of the House on page 2, line 14, and agree to the same.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

HENRY E. BURNHAM,
CHARLES CURTIS,
JAMES P. TALIAFERRO,
Manager on the part of the Senate.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

Mr. LOUDENSLAGER. Mr. Speaker, I move the adoption of the report.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

PUBLIC BUILDINGS.

Mr. BARTHOLDT. Mr. Speaker, I offer a conference report.

The SPEAKER. The gentleman from Missouri calls up a conference report.

Mr. BARTHOLDT. And I ask that the statement be read in lieu of the report.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public building acts, and for other purposes, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 3, 4, 8, 9, 10, 11, 13, and 14.

That the House recede from its disagreement to the amendments of the House numbered 5 and 7, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment so that said amendment shall read as follows:

"SEC. 3. That of the amount heretofore authorized for the United States government building at Boise, Idaho, so much thereof as may be necessary shall be available for the acquisition of additional land: *Provided*, That the limit of cost heretofore fixed shall not be exceeded."

And the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, so that the same shall read as follows:

"SEC. 7. That the Secretary of the Treasury may, in his discretion, disregard the provision requiring sites to be bounded upon at least two sides by streets in so far as the same shall apply to the village of Penn Yan, N. Y."

And the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: Change "Sec. 14" to "Sec. 13;" and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows: Change "Sec. 15" to "Sec. 14;" and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment so that amendment shall read as follows:

"SEC. 15. That the item contained in section five of the act of Congress entitled 'An act to increase the limit of cost of certain

public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes,' approved May thirtieth, nineteen hundred and eight, for 'United States post-office at Washington, D. C., five hundred thousand dollars,' be, and the same is hereby, amended so as to add to the same the following provision: 'That if any balance remains within said limit after acquiring the site herein authorized, the Secretary of the Treasury be, and he is hereby, authorized to expend so much thereof as may be necessary in the preparation of the plans for said United States post-office building on said site.'"

And the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment so that said amendment shall read as follows:

"SEC. 16. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site for a federal building in the city of Lawton, Okla., and he is authorized to expend for such purpose the proceeds arising from the sale of lots thirty-one and thirty-two of block forty-one of the official plat of the city of Lawton, Okla., as provided for by section thirty-three of the so-called public building act approved May thirtieth, nineteen hundred and eight."

And the Senate agree to the same.

On page 2 of the bill strike out all of section three, being lines 8 to 12, both inclusive.

On page 6 of the bill strike out section thirteen, being lines 3 to 12, both inclusive.

The committee of conference further reports that they have been unable to come to an agreement on Senate amendment numbered 12, same being a provision fixing the limit of cost for the erection of a United States custom-house building at Boston, Massachusetts.

RICHARD BARTHOLDT,
EDWIN C. BURLEIGH,
W. G. BRANTLEY,
Managers on the part of the House.

N. B. SCOTT,
P. J. MCCUMBER,
Managers on the part of the Senate.

The statement was read as follows:

STATEMENT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 28167, having met, after full and free conference have agreed as follows:

The Senate receded from its amendments Nos. 2, 3, 4, 8, 9, 10, 11, 13, and 14, and the House receded from its disagreement to the amendments of the Senate Nos. 5 and 7. The House receded from its disagreement to amendments 1, 6, 15, 16, 17, and 18 with certain amendments thereto.

With the exception of the amendment of the Senate No. 12, a full agreement was reached. This amendment provides for fixing the limit of cost for the erection of an addition to the present United States custom-house building at Boston, Mass., at $1,800,000. The last public-buildings act authorized the acquisition of a site for a new custom-house building at Boston and fixed the limit of cost at $500,000, and the amendment of the Senate proposes to authorize the Secretary of the Treasury to expend the said amount of $500,000 heretofore authorized for an addition to the present building and in addition thereto to fix the ultimate limit of cost of such proposed addition to the custom-house building at Boston at $1,800,000. In other words, an increased authorization of $1,300,000. In view of the fixed policy of the House Committee on Public Buildings and Grounds not to recommend any additonal authorizations at this time—which policy has been strictly adhered to in the preparation of the bill H. R. 28167—the conferees on the part of the House insisted upon the Senate receding from its said amendment No. 12, to increase the limit of cost for the custom-house building at Boston. The conferees on the part of the Senate insisted that the House agree to the said Senate amendment, and your conferees have therefore been unable to come to an agreement on said amendment, and respectfully report such disagreement to the House and ask for further instructions.

RICHARD BARTHOLDT,
EDWIN C. BURLEIGH,
W. G. BRANTLEY,
Managers on the part of the House.

Mr. BARTHOLDT. Mr. Speaker, I move that the conference report be adopted.

The SPEAKER. Without objection, the conference report is agreed to.

There was no objection.

Mr. BARTHOLDT. Mr. Speaker, I move that the House further insist on its disagreement to Senate amendment numbered 12.

The SPEAKER. The gentleman from Missouri moves that the House further insist on its disagreement to Senate amendment numbered 12.

Mr. WEEKS. Mr. Speaker, I move to recede, and concur in Senate amendment numbered 12.

The SPEAKER. The gentleman from Massachusetts moves that the House do recede from its disagreement to Senate amendment numbered 12, and agree to the same.

Mr. BARTHOLDT. I yield three minutes to the gentleman from Massachusetts [Mr. WEEKS].

Mr. WEEKS. Mr. Speaker, there was so much confusion when the amendment was read before that I ask to have it read again not in my own time.

The SPEAKER. Without objection, the amendment will be again reported.

There was no objection.

The amendment was again reported.

Mr. WEEKS. Mr. Speaker, last year after a visit to Boston the Public Buildings Committee reported and Congress passed an act appropriating $500,000 to purchase a site for a new custom-house in Boston. The present custom-house was built sixty-five years ago. The business of the port of Boston sixty-five years ago was about 10 per cent of what it is to-day. We are now collecting between $25,000,000 and $30,000,000 a year. The committee was unanimous in its recommendation that there should be a new custom-house, and the $500,000 was appropriated for a site. It was recommended by the Treasury Department, or suggested, that it would require about $3,000,000 for the site and for the custom-house completed. This year, however, an architect has made a plan which suggests building a tower on the present custom-house, and it is estimated that the cost of erecting this tower will be about $1,800,000, possibly less.

Therefore, instead of buying the new site, the present site will be used, and a tower suitable to carry on the work of the customs service will be erected on the old custom-house site. This will make a saving of about $1,200,000. I think myself it will be a saving of more than that. It will give sufficient space for the post and it will not be necessary to purchase another site. The Senate has passed this amendment that the $500,000 appropriated for the site shall be transferred to the building fund, of which $20,000, or such amount as is required, shall be taken from that for the preparation of plans, and $1,300,000 shall be added to it to make the completed building.

Mr. Speaker, this House has been anxious to find some place, somewhere, to save money. This added appropriation is not to be made immediately available. It will require pretty nearly all of the coming year to prepare the plans for the building. The balance of the $500,000 will then be available to apply on the construction of the building, and the $1,300,000 recommended is simply made available but is not appropriated, and it will not be necessary to appropriate it possibly for two years. Now, if the House really wishes to save money, here is an opportunity where the people of Boston can be satisfied with materially less than the anticipated appropriation, because the Merchants' Association and the Chamber of Commerce have adopted resolutions favoring the tower plan. As they will be satisfied with $1,800,000 instead of an expenditure of practically $3,000,000, I think this Senate amendment ought to be adopted and the bill pass the House as amended by the Senate.

Mr. BARTHOLDT. Mr. Speaker, I yield three minutes to the gentleman from Massachusetts [Mr. KELIHER].

Mr. KELIHER. Mr. Speaker, this proposition is a very simple one. The Committee on Public Buildings and Grounds have reported and Congress voted $500,000 for a site for a new custom-house in Boston. It is impossible to get a site for less than eight hundred thousand or nine hundred thousand dollars. Now, this $500,000 is available, and what we want is this: Instead of coming back next year and asking for enough money to make up three millions or three millions and a half of dollars, the amount necessary for a suitable building, we have devised a plan whereby we can build upon our present custom-house towers, which, with other alterations, will accommodate that work. Consequently, in order that we may start now, in order that we may be immediately relieved from a condition which the committee itself knows to be intolerable, we ask authority to start on a

project that will cost but $1,800,000. It is guaranteeing an absolute saving of $1,200,000 to the United States.

I am in sympathy with the policy of the committee, but I do not believe it should be so rigid as not to allow the Government to save $1,200,000, which even the gentleman himself will have to admit we will save if we are allowed to start now upon this revised plan. Our old custom-house was built in 1845. It was built in the days of ornate architecture. From a utilitarian standpoint it is almost worthless to-day. It is as insanitary as it is unfit for the proper transaction of business. Here we have got everybody in agreement, all interests in Boston in thorough accord, and if we are authorized to start now we will not come knocking at the doors of the Treasury next year asking for what I believe we would get and what I believe the committee believe we deserve and would recommend—$3,500,000. We collect approximately $2,000,000 in receipts at the Boston custom-house every month. Boston is the second largest port of entry in the United States. New York City was given over $7,000,000 for her new custom-house, and we promise, if you will now recede and concur with the Senate amendment, to have a custom-house in Boston which will amply provide for the Government's interests and comport with the dignity of the city, and we will build it for $1,800,000, instead of $3,000,000 that I know the committee would recommend if we waited until next year. [Applause.]

Mr. BARTHOLDT. Mr. Speaker, the only question involved in this matter is whether we shall keep faith with the membership of this House. When we started out at this session we adopted the policy that no new appropriation whatsoever should be made for public buildings or for the purchase of sites. We have adhered to that policy in the preparation of our bill. At least 100 Members of the House were interested in securing additional appropriations at this time.

Mr. PAYNE. I would like to ask the gentleman a question. Do these hundred Members, or any of them, desire to reduce the limit or reduce the extent of the appropriation for the building?

Mr. BARTHOLDT. No, sir.

Mr. PAYNE. This is the only one where they propose to do that?

Mr. BARTHOLDT. The committee turned down all of those requests and yielded in no case to the importunities of Members to grant an authorization or an appropriation. And now at the eleventh hour comes this proposition for Boston, to authorize, in spite of our policy which meant to mete out equal justice to all the Members of this House, an appropriation of $1,300,000 in addition to the $500,000 which has already been authorized——

Mr. SULZER. Will my friend yield for a question?

Mr. BARTHOLDT. In just one minute. I want to say from the standpoint of a practical man there is nothing lost at all, if the gentlemen from Boston content themselves with the $500,000, providing that this amount is made available for the purpose of preparing the plans for the enlargement of their custom-house, and the House proposes that very thing. The gentleman from Massachusetts himself said it will take a year before the plans are ready to be acted upon, so that by the time an additional appropriation is required another Congress will have met, and another public buildings bill, I trust, will have been passed.

Mr. WEEKS. Will the gentleman yield? How will it be possible to make contracts to erect this building unless the $1,300,000 additional is made available for the future appropriation?

Mr. BARTHOLDT. It is not contemplated that any contract should be entered into at this time.

Mr. KELIHER. They are not to be entered into until the plans are completed.

Mr. BARTHOLDT. And only the plans are to be prepared, and so much of the $500,000 as it will cost to prepare the plans is made available by the provision of the House bill for this purpose.

Mr. KELIHER. The gentleman does not dispute that under this new plan at least a million dollars would be saved over the amount orginally figured upon for the project?

Mr. BARTHOLDT. I want to say to the gentleman, in answer to that question, that the Committee on Public Buildings and Grounds heartily favor the plan of enlarging the present building, because it will result in a considerable saving of money to the Government; but we can not now enter upon a policy of appropriation or authorization, because that would be an act of bad faith to at least 100 Members of this House.

Mr. KELIHER. Will the gentleman indicate another project of equal merit among those that he speaks of?

Mr. BARTHOLDT. Yes; there are a great many projects that are very meritorious.

Mr. KELIHER. The gentleman knows our need of a new public building?

Mr. BARTHOLDT. I do.

Mr. KELIHER. And you know that if we can not get this authorization we can not start for another year?

Mr. BARTHOLDT. I have already explained that no time whatever will be lost if we fail to grant the authorization now. I ask for a vote.

Mr. SIMS. Why will it cost more next year to build it on the modification as described by the gentleman than it will this year on the same modification?

Mr. BARTHOLDT. The gentleman is right. It will cost no more then than now. I ask for a vote.

The SPEAKER. The question is on the motion to recede from the disagreement to the Senate amendment and to concur.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. BARTHOLDT. Division!

The House divided; and there were—ayes 155, noes 54.

Mr. BARTHOLDT. Tellers, Mr. Speaker.

The question was taken on ordering tellers.

The SPEAKER. Twenty-four gentlemen have arisen; not a sufficient number; tellers are refused; the ayes have it, and the motion prevails.

ENROLLED BILLS SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolutions of the following titles, when the Speaker signed the same:

H. R. 26916. An act making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes for the fiscal year ending June 30, 1910;

H. R. 8661. An act for the relief of the Richmond Light Infantry Blues, of Virginia.

H. R. 24835. An act authorizing the necessary resurvey of public lands;

H. R. 1622. An act for the relief of the estate of William J. Cussen;

H. R. 26915. An act making appropriation for the support of the army for the fiscal year ending June 30, 1910;

H. R. 27469. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 28047. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the civil war and to widows and dependent relatives of such soldiers and sailors;

H. R. 27926. An act to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River in the State of Indiana;

H. R. 8545. An act for the relief of Jackson Pryor;

H. R. 24995. An act for the relief of Nathaniel Huntley;

H. R. 21571. An act for the relief of John T. Freeman;

H. R. 9755. An act for the relief of Charles Lennig & Co.;

H. R. 21492. An act to authorize the sale of certain public lands;

H. R. 24327. An act to make Corry, Pa., a port of delivery in the district of Erie, Pa., and extending to it the privileges of section 7 of the act of June 10, 1880;

H. R. 4521. An act to reorganize and enlist the members of the United States Naval Academy Band;

H. R. 14290. An act for the relief of Ellis W. Joy;

H. R. 27249. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors;

H. R. 28305. An act to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State and to detach it from the Fort Worth division of said court;

H. R. 28285. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 19655. An act providing for an additional judge for the southern district of New York, and for other purposes;

H. R. 27049. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 26394. An act making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 27054. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the

procurement of heavy ordnance for trial and service, and for other purposes;

H. R. 27974. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 28175. An act to amend section 4434 of the Revised Statutes of the United States, and for other purposes;

H. R. 25392. An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 8947. An act for the relief of the Herman Andrae Electrical Company, of Milwaukee, Wis.

H. R. 15755. An act for the relief of J. C. Haggard, of White County, Tenn.;

H. R. 8558. An act for the relief of R. J. B. Newcombe;

H. R. 2911. An act for the relief of F. S. Jette & Son, of Savannah, Chatham County, Ga., for damage done to their wharf by the U. S. dredge *Cumberland;*

H. R. 13928. An act for the relief of P. H. McDonough, of Bardstown, Ky.;

H. R. 7048. An act for the relief of Henry A. Tolbert;

H. J. Res. 262. Joint resolution extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes; and

H. J. Res. 263. Joint resolution to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 9006. An act to amend an act authorizing the Washington, Spa Springs and Gretta Railroad Company of Maryland to enter the District of Columbia, approved February 18, 1907;

S. 9373. An act to provide for the sale of isolated tracts of public land in Imperial County, Cal.;

S. 6074. An act to provide for holding sessions of the United States circuit and district courts at Springfield, Mass.;

S. 8058. An act authorizing the Attorney-General to appoint as special peace officers such employees of the Alaska school service as may be named by the Secretary of the Interior; and

S. 8899. An act granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war and to certain widows and dependent relatives of such soldiers and sailors.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 9351. An act to authorize the Postmaster-General to settle the accounts of Carter and Booker, and for other purposes—to the Committee on Claims.

S. 9191. An act to amend an act entitled "An act to divide the judicial district of Nebraska into divisions and to provide for an additional district judge in said district"—to the Committee on the Judiciary.

S. 8929. An act withdrawing from entry and sale and granting unto the city of Los Angeles, in the State of California, certain lands therein described—to the Committee on the Public Lands.

S. 8324. An act for the relief of E. C. Mansfield—to the Committee on Claims.

S. 4434. An act to amend an act entitled "An act to authorize the Secretary of the Navy to loan naval equipment to certain military schools," approved March 3, 1901—to the Committee on Naval Affairs.

S. 4094. An act to amend paragraph 43 of an act entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes," approved July 1, 1902—to the Committee on the District of Columbia.

S. 185. An act granting pensions to volunteer army nurses of the civil war—to the Committee on Invalid Pensions.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills and joint resolutions:

H. R. 24327. An act to make Corry, Pa., a port of delivery in the district of Erie, Pa., and extending to it the privileges of section 7 of the act of June 10, 1880;

H. R. 26394. An act making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 27049. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27054. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes;

H. R. 27249. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors;

H. R. 27974. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 8947. An act for the relief of the Herman Andrae Electrical Company, of Milwaukee, Wis.;

H. R. 25392. An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 9755. An act for the relief of Charles Lenning & Co.;

H. R. 13928. An act for the relief of P. H. McDonough, of Bardstown, Ky.;

H. R. 14290. An act for the relief of Ellis W. Joy;

H. R. 15755. An act for the relief of J. C. Haggard, of White County, Tenn.;

H. R. 19655. An act providing for an additional judge for the southern district of New York, and for other purposes;

H. R. 21492. An act to authorize the sale of certain public lands;

H. R. 21571. An act for the relief of John T. Freeman;

H. R. 2911. An act for the relief of F. S. Jette & Son, of Savannah, Chatham County, Ga., for damage done to their wharf by the U. S. dredge *Cumberland;*

H. R. 7048. An act for the relief of Henry A. Tolbert;

H. R. 8545. An act for the relief of Jackson Pryor;

H. R. 24995. An act for the relief of Nathaniel Huntley;

H. R. 28175. An act to amend section 4434 of the Revised Statutes of the United States, and for other purposes;

H. R. 28046. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27061. An act to provide for the appointment of one additional district judge in and for the western district of Washington, and one additional district judge in and for the district of Oregon;

H. R. 28193. An act to authorize the city of Shreveport to construct a bridge across Red River;

H. R. 23717. An act to extend the time for construction and beginning construction of the Alaska Short Line Railroad in Alaska;

H. R. 5728. An act for the relief of James H. De Coster;

H. R. 28285. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 28305. An act to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State and to detach it from the Fort Worth division of said court;

H. R. 4521. An act to reorganize and enlist the members of the United States Naval Academy Band;

H. R. 8558. An act for the relief of R. J. B. Newcombe;

H. R. 1622. An act for the relief of the estate of William J. Cussen;

H. R. 26915. An act making appropriation for the support of the army for the fiscal year ending June 30, 1910;

H. R. 27469. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27926. An act to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River in the State of Indiana;

H. R. 28047. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors;

H. J. Res. 263. Joint resolution to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications; and

H. J. Res. 265. Joint resolution to rearrange and reconstruct the Hall of the House of Representatives, and for other purposes.

SURFACE RIGHTS OF ENTRYMEN.

Mr. MONDELL. Mr. Speaker, I call up the following conference report on the bill (H. R. 24834) for the protection of surface rights of entrymen, and ask unanimous consent that the statement be read in lieu of the report.

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24834) for the protection of the surface rights of entrymen, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 4.

That the House recede from its disagreement to amendment numbered 1, striking out the word "heretofore," on line 3, page 1, and agree to the same.

That the House recede from its disagreement to the amendments of the Senate numbered 2 and 3, and agree to the same with an amendment as follows:

Strike out the semicolon at the end of line 12, page 2, and insert a period. Strike out all of lines 13, 14, 15, and 16, on page 2, and insert the following: "Such locator, selector, or entryman who has heretofore made or shall hereafter make final proof showing good faith and satisfactory compliance with the law under which his land is claimed shall be entitled to a patent without reservation unless at the time of such final proof and entry it shall be shown that the land is chiefly valuable for coal."

And that the Senate agree to the same.

F. W. MONDELL,
A. J. VOLSTEAD,
JOS. T. ROBINSON,
Managers on the part of the House.

C. D. CLARK,
JOS. M. DIXON,
J. H. BANKHEAD,
Managers on the part of the Senate.

The statement was read as follows:

STATEMENT.

The amendment of the Senate No. 4, which the conferees disagreed to, in the opinion of the conferees on the part of the House extended and enlarged the provisions of the bill to an extent which the conferees were not justified in accepting.

Amendment No. 1 of the Senate makes the provisions of the bill applicable to entries heretofore or hereafter made. This was strongly urged by the Interior Department and is believed to be in the interest of uniformity of administration.

Amendments Nos. 2 and 3 of the Senate were agreed to with an amendment striking out the last four lines of the bill which these amendments modified and inserting a provision in harmony with the intent of this portion of the bill as it passed the House and with the Senate amendments, and adding a provision in harmony with one of the provisions of Senate amendment No. 4, the effect of which will be to have the question of the coal or noncoal character of the land heard at the time when the entryman presents his final proof.

F. W. MONDELL,
A. J. VOLSTEAD,
JOS. T. ROBINSON,
Managers on the part of the House.

Mr. MONDELL. I move the adoption of the conference report.

The question was taken, and the motion was agreed to.

CONDEMNED CANNON FOR OHIO NORTHERN UNIVERSITY.

Mr. COLE. Mr. Speaker, I ask unanimous consent for the present consideration of the bill which I send to the Clerk's desk.

The Clerk read as follows:

A bill (H. R. 28411) to grant two cannons to Ohio Northern University, at Ada, Ohio.

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to donate to the Ohio Northern University, at Ada, Ohio, two muzzle-loading cannon, now in possession of said university, to be used by the students of said university in military drill: *Provided*, That no expense shall be incurred by the United States.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time and passed.

BRIDGE ACROSS THE MISSOURI RIVER AT YANKTON, S. DAK.

Mr. SHERMAN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill S. 7640.

The bill was read, as follows:

A bill (S. 7640) to extend the time for the completion of a bridge across the Missouri River at Yankton, S. Dak., by the Yankton, Norfolk and Southern Railway Company.

Be it enacted, etc., That section 6 of an act approved March 9, 1904, authorizing the Yankton, Norfolk and Southern Railway Company to construct a combined railroad, wagon, and foot-passenger bridge across the Missouri River at or near the city of Yankton, S. Dak., as amended by the acts approved January 27, 1905; February 5, 1906; March 2, 1907; and February 25, 1908, be, and is hereby, amended by extending the time for commencing the construction of said bridge to March 9, 1910, and by extending the time for completing said bridge to March 9, 1912.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to a third reading, read the third time, and passed.

COPYRIGHT LAWS.

Mr. CURRIER. Mr. Speaker, I move to suspend the rules, discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill H. R. 28192, agree to the amendments proposed by the committee, and pass the bill.

The SPEAKER. The gentleman from New Hampshire moves to suspend the rules, discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill, agree to the amendments proposed by the committee covering that bill, and pass the bill.

The bill was read, as follows:

A bill (H. R. 28192) to amend and consolidate the acts respecting copyright.

Be it enacted, etc., That any person entitled thereto, upon complying with the provisions of this act, shall have the exclusive right:

(a) To print, reprint, publish, copy, and vend the copyrighted work;

(b) To translate the copyrighted work into other languages or dialects, or make any other version thereof, if it be a literary work; to dramatize it if it be a nondramatic work; to convert it into a novel or other nondramatic work if it be a drama; to arrange or adapt it if it be a musical work; to complete, execute, and finish it if it be a model or design for a work of art;

(c) To deliver or authorize the delivery of the copyrighted work in public for profit if it be a lecture, sermon, address, or similar production;

(d) To perform or represent the copyrighted work publicly if it be a drama or, if it be a dramatic work and not reproduced in copies for sale, to vend any manuscript or any record whatsoever thereof; to make or to procure the making of any transcription or record thereof by or from which, in whole or in part, it may in any manner or by any method be exhibited, performed, represented, produced, or reproduced; and to exhibit, perform, represent, produce, or reproduce it in any manner or by any method whatsoever;

(e) To perform the copyrighted work publicly for profit if it be a musical composition and for the purpose of public performance for profit; and for the purposes set forth in subsection (a) hereof, to make any arrangement or setting of it or of the melody of it in any system of notation or any form of record in which the thought of an author may be recorded and from which it may be read or reproduced: *Provided*, That the provisions of this act, so far as they secure copyright controlling the parts of instruments serving to reproduce mechanically the musical work, shall include only compositions published and copyrighted after this act goes into effect, and shall not include the works of a foreign author or composer unless the foreign state or nation of which such author or composer is a citizen or subject grants, either by treaty, convention, agreement, or law, to citizens of the United States similar rights: *And provided further*, and as a condition of extending the copyright control to such mechanical reproductions, That whenever the owner of a musical copyright has used or permitted or knowingly acquiesced in the use of the copyrighted work upon the parts of instruments serving to reproduce mechanically the musical work, any other person may make similar use of the copyrighted work upon the payment to the copyright proprietor of a royalty of 2 cents on each such part manufactured, to be paid by the manufacturer thereof; and the composer may require, and if so the manufacturer shall furnish, a report under oath on the 20th day of each month on the number of parts of instruments manufactured during the previous month serving to reproduce mechanically said musical work, and royalties shall be due on the parts manufactured during any month upon the 20th of the next succeeding month. The payment of the royalty provided for by this section shall free the articles or devices for which such royalty has been paid from further contribution to the copyright except in case of public performance for profit: *And provided further*, That it shall be the duty of the copyright owner, if he uses the musical composition himself for the manufacture of parts of instruments serving to reproduce mechanically the musical work, or licenses others to do so, to file notice thereof, accompanied by a recording fee, in the copyright office, and any failure to file such notice shall be a complete defense to any suit, action, or proceeding for any infringement of such copyright.

In case of the failure of such manufacturer to pay to the copyright proprietor within thirty days after demand in writing the full sum of royalties due at said rate at the date of such demand the court may award taxable costs to the plaintiff and a reasonable counsel fee, and the court may, in its discretion, enter judgment therein for any sum in addition over the amount found to be due as royalty in accordance with the terms of this act, not exceeding three times such amount.

The reproduction or rendition of a musical composition by or upon coin-operated machines shall not be deemed a public performance for profit unless a fee is charged for admission to the place where such reproduction or rendition occurs.

SEC. 2. That nothing in this act shall be construed to annul or limit the right of the author or proprietor of an unpublished work, at common law or in equity, to prevent the copying, publication, or use of such unpublished work without his consent, and to obtain damages therefor.

SEC. 3. That the copyright provided by this act shall protect all the copyrightable component parts of the work copyrighted, and all matter therein in which copyright is already subsisting, but without extending the duration or scope of such copyright. The copyright upon composite works or periodicals shall give to the proprietor thereof all the

rights in respect thereto which he would have if each part were individually copyrighted under this act.

SEC. 4. That the works for which copyright may be secured under this act shall include all the writings of an author.

SEC. 5. That the application for registration shall specify to which of the following classes the work in which copyright is claimed belongs:

(a) Books, including composite and cyclopedic works, directories, gazetteers, and other compilations;
(b) Periodicals, including newspapers;
(c) Lectures, sermons, addresses, prepared for oral delivery;
(d) Dramatic or dramatico-musical compositions;
(e) Musical compositions;
(f) Maps;
(g) Works of art; models or designs for works of art;
(h) Reproductions of a work of art;
(i) Drawings or plastic works of a scientific or technical character;
(j) Photographs;
(k) Prints and pictorial illustrations:

Provided, nevertheless, That the above specifications shall not be held to limit the subject-matter of copyright as defined in section 4 of this act, nor shall any error in classification invalidate or impair the copyright protection secured under this act.

SEC. 6. That complications or abridgements, adaptations, arrangements, dramatizations, translations or other versions of works in the public domain, or of copyrighted works when produced with the consent of the proprietor of the copyright in such works, or works republished with new matter, shall be regarded as new works subject to copyright under the provisions of this act; but the publication of any such new works shall not affect the force or validity of any subsisting copyright upon the matter employed or any part thereof, or be construed to imply an exclusive right to such use of the original works, or to secure or extend copyright in such original works.

SEC. 7. That no copyright shall subsist in the original text of any work which is in the public domain, or in any publication of the United States Government, or any reprint, in whole or in part, thereof: *Provided, however,* That the publication or republication by the Government, either separately or in a public document, of any material in which copyright is subsisting shall not be taken to cause any abridgement or annulment of the copyright or to authorize any use or appropriation of such copyright material without the consent of the copyright proprietor.

SEC. 8. That the author or proprietor of any work made the subject of copyright by this act, or his executors, administrators, or assigns, shall have copyright for such work under the conditions and for the terms specified in this act: *Provided, however,* That the copyright secured by this act shall extend to the work of an author or proprietor who is a citizen or subject of a foreign state or nation, only:

(a) When an alien author or proprietor shall be domiciled within the United States at the time of the first publication of his work; or

(b) When the foreign state or nation of which such author or proprietor is a citizen or subject grants, either by treaty, convention, agreement, or law, to citizens of the United States the benefit of copyright on substantially the same basis as to its own citizens, or copyright protection substantially equal to the protection secured to such foreign author under this act or bytreaty; or when such foreign state or nation is a party to an international agreement which provides for reciprocity in the granting of copyright, by the terms of which agreement the United States may, at its pleasure, become a party thereto.

The existence of the reciprocal condition aforesaid shall be determined by the President of the United States, by proclamation made from time to time, as the purposes of this act may require.

SEC. 9. That any person entitled thereto by this act may secure copyright for his work by publication thereof with the notice of copyright required by this act; and such notice shall be affixed to each copy thereof published or offered for sale in the United States by authority of the copyright proprietor, except in the case of books seeking ad interim protection under section 21 of this act.

SEC. 10. That such person may obtain registration of his claim to copyright by complying with the provisions of this act, including the deposit of copies, and upon such compliance the register of copyrights shall issue to him the certificate provided for in section 55 of this act.

SEC. 11. That copyright may also be had of the works of an author of which copies are not reproduced for sale, by the deposit, with claim of copyright, of one complete copy of such work if it be a lecture or similar production or a dramatic or musical composition; of a photographic print if the work be a photograph; or of a photograph or other identifying reproduction thereof if it be a work of art or a plastic work or drawing. But the privilege of registration of copyright secured hereunder shall not exempt the copyright proprietor from the deposit of copies under sections 12 and 13 of this act where the work is later reproduced in copies for sale.

SEC. 12. That after copyright has been secured by publication of the work with the notice of copyright as provided in section 9 of this act, there shall be promptly deposited in the copyright office or in the mail addressed to the register of copyrights, Washington, D. C., two complete copies of the best edition thereof then published, which copies, if the work be a book or periodical, shall have been produced in accordance with the manufacturing provisions specified in section 15 of this act; or if such work be a contribution to a periodical, for which contribution special registration is requested, one copy of the issue or issues containing such contribution; or if the work is not reproduced in copies for sale, there shall be deposited the copy, print, photograph, or other identifying reproduction provided by section 11 of this act, such copies or copy, print, photograph, or other reproduction to be accompanied in each case by a claim of copyright. No action or proceeding shall be maintained for infringement of copyright in any work until the provisions of this act with respect to the deposit of copies and registration of such work shall have been complied with.

SEC. 13. That should the copies called for by section 12 of this act not be promptly deposited as herein provided, the register of copyrights may at any time after the publication of the work, upon actual notice, require the proprietor of the copyright to deposit them, and after the said demand shall have been made, in default of the deposit of copies of the work within three months from any part of the United States, except an outlying territorial possession of the United States, or within six months from any outlying territorial possession of the United States, or from any foreign country, the proprietor of the copyright shall be liable to a fine of $100 and to pay to the Library of Congress twice the amount of the retail price of the best edition of the work, and the copyright shall become void.

SEC. 14. That the postmaster to whom are delivered the articles deposited as provided in sections 11 and 12 of this act shall, if requested give a receipt therefor, and shall mail them to their destination without cost to the copyright claimant.

SEC. 15. That of the printed book or periodical specified in section 5, subsections (a) and (b) of this act, except the original text of a book of foreign origin in a language or languages other than English, the text of all copies accorded protection under this act, except as below provided, shall be printed from type set within the limits of the United States, either by hand or by the aid of any kind of typesetting machine or from plates made within the limits of the United States from type set therein, or, if the text be produced by lithographic process or photo-engraving process, then by a process wholly performed within the limits of the United States, and the printing of the text and binding of the said book shall be performed within the limits of the United States; which requirements shall extend also to the illustrations within a book consisting of printed text and illustrations produced by lithographic process, or photo-engraving process, and also to separate lithographs or photo-engravings, except where in either case the subjects represented are located in a foreign country; but they shall not apply to works in raised characters for the use of the blind, or to books of foreign origin in a language or languages other than English, or to books published abroad in the English language seeking ad interim protection under this act.

SEC. 16. That in the case of the book the copies so deposited shall be accompanied by an affidavit, under the official seal of any officer authorized to administer oaths within the United States, duly made by the person claiming copyright or by his duly authorized agent or representative residing in the United States, or by the printer who has printed the book, setting forth that the copies deposited have been printed from type set within the limits of the United States or from plates made within the limits of the United States from type set therein; or, if the text be produced by lithographic process, or photo-engraving process, that such process was wholly performed within the limits of the United States, and that the printing of the text and binding of the said book have also been performed within the limits of the United States. Such affidavit shall state also the place where and the establishment or establishments in which such type was set or plates were made or lithographic process or photo-engraving process or printing and binding were performed and the date of the completion of the printing of the book or the date of publication.

SEC. 17. That any person who, for the purpose of obtaining registration of a claim to copyright, shall knowingly make a false affidavit as to his having complied with the above conditions shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not more than $1,000, and all of his rights and privileges under said copyright shall thereafter be forfeited.

SEC. 18. That the notice of copyright required by section 9 of this act shall consist either of the word "Copyright" or the abbreviation "Copr.," accompanied by the name of the copyright proprietor, and if the work be a printed literary, musical, or dramatic work, the notice shall include also the year in which the copyright was secured by publication. In the case, however, of copies of works specified in subsections (f) to (k), inclusive, of section 5 of this act, the notice may consist of the letter C inclosed within a circle, thus: ©, accompanied by the initials, monogram, mark, or symbol of the copyright proprietor: *Provided,* That on some accessible portion of such copies or of the margin, back, permanent base, or pedestal, or of the substance on which such copies shall be mounted, his name shall appear. But in the case of works in which copyright is subsisting when this act shall go into effect, the notice of copyright may be either in one of the forms prescribed herein or in one of those prescribed by the act of June 18, 1874.

SEC. 19. That the notice of copyright shall be applied, in the case of a book or other printed publication, upon its title-page or the page immediately following, or if a periodical either upon the title-page or upon the first page of text of each separate number or under the title heading, or if a musical work either upon its title-page or the first page of music: *Provided,* That one notice of copyright in each volume or in each number of a newspaper or periodical published shall suffice.

SEC. 20. That where the copyright proprietor has sought to comply with the provisions of this act with respect to notice, the omission by accident or mistake of the prescribed notice from a particular copy or copies shall not invalidate the copyright or prevent recovery for infringement against any person who, after actual notice of the copyright, begins an undertaking to infringe it, but shall prevent the recovery of damages against an innocent infringer who has been misled by the omission of the notice; and in a suit for infringement no permanent injunction shall be had unless the copyright proprietor shall reimburse to the innocent infringer his reasonable outlay innocently incurred if the court, in its discretion, shall so direct.

SEC. 21. That in the case of a book published abroad in the English language before publication in this country, the deposit in the copyright office, not later than thirty days after its publication abroad, of one complete copy of the foreign edition, with a request for the reservation of the copyright and a statement of the name and nationality of the author and of the copyright proprietor and of the date of publication of the said book, shall secure to the author or proprietor an ad interim copyright, which shall have all the force and effect given to copyright by this act, and shall endure until the expiration of thirty days after such deposit in the copyright office.

SEC. 22. That whenever within the period of such ad interim protection an authorized edition of such book shall be published within the United States, in accordance with the manufacturing provisions specified in section 15 of this act, and whenever the provisions of this act as to deposit of copies, registration, filing of affidavit, and the printing of the copyright notice shall have been duly complied with, the copyright shall be extended to endure in such book for the full term elsewhere provided in this act.

SEC. 23. That the copyright secured by this act shall endure for twenty-eight years from the date of first publication, whether the copyrighted work bear the author's true name or is published anonymously or under an assumed name: *Provided,* That in the case of any posthumous work or of any periodical, cyclopedic, or other composite work upon which the copyright was originally secured by the proprietor thereof, or of any work copyrighted by a corporate body (otherwise than as assignee or licensee of the individual author) or by an employer for whom such work is made for hire, the proprietor of such copyright shall be entitled to a renewal and extension of the copyright in such work for the further term of twenty-eight years when application for such renewal and extension shall have been made to the copyright office and duly registered therein within one year prior to the expiration of the original term of copyright: *And provided further,* That in the case of any other copyrighted work, including a contribution by an individual author to a periodical or to a cyclopedic or other composite work when such contribution has been separately registered, the author of such work, if still living, or the widow, widower, or children of the author, if the author be not living, or if such author, widow, widower, or children be not living, then

the author's executors, or in the absence of a will, his next of kin shall be entitled to a renewal and extension of the copyright in such work for a further term of twenty-eight years when application for such renewal and extension shall have been made to the copyright office and duly registered therein within one year prior to the expiration of the original term of copyright: *And provided further*, That in default of the registration of such application for renewal and extension, the copyright in any work shall determine at the expiration of twenty-eight years from first publication.

SEC. 24. That the copyright subsisting in any work at the time when this act goes into effect may, at the expiration of the term provided for under existing law, be renewed and extended by the author of such work, if still living, or the widow, widower, or children of the author, if the author be not living, or if such author, widow, widower, or children be not living, then by the author's executors, or, in the absence of a will, his next of kin, for a further period such that the entire term shall be equal to that secured by this act, including the renewal period: *Provided, however*, That if the work be a composite work upon which copyright was originally secured by the proprietor thereof, then such proprietor shall be entitled to the privilege of renewal and extension granted under this section: *Provided*, That application for such renewal and extension shall be made to the copyright office and duly registered therein within one year prior to the expiration of the existing term.

SEC. 25. That if any person shall infringe the copyright in any work protected under the copyright laws of the United States such person shall be liable:

(a) To an injunction restraining such infringement;

(b) To pay to the copyright proprietor such damages as the copyright proprietor may have suffered due to the infringement, as well as all the profits which the infringer shall have made from such infringement, and in proving profits the plaintiff shall be required to prove sales only and the defendant shall be required to prove every element of cost which he claims, or in lieu of actual damages and profits such damages as to the court shall appear to be just, and in assessing such damages the court may, in its discretion, allow the amounts as hereinafter stated, but in the case of a newspaper reproduction of a copyrighted photograph such damages shall not exceed the sum of $1,000 nor be less than the sum of $50, and such damages shall in no other case exceed the sum of $5,000 nor be less than the sum of $250, and shall not be regarded as a penalty:

First. In the case of a painting, statue, or sculpture, $10 for every infringing copy made or sold by or found in the possession of the infringer or his agents or employees;

Second. In the case of any work enumerated in section 5 of this act, except a painting, statue, or sculpture, $1 for every infringing copy made or sold by or found in the possession of the infringer or his agents or employees;

Third. In the case of a lecture, sermon, or address, $50 for every infringing delivery;

Fourth. In the case of a dramatic or dramatico-musical or a choral or orchestral composition, $100 for the first and $50 for every subsequent infringing performance; in the case of other musical compositions, $10 for every infringing performance;

(c) To deliver up on oath, to be impounded during the pendency of the action, upon such terms and conditions as the court may prescribe, all articles alleged to infringe a copyright;

(d) To deliver up on oath for destruction all the infringing copies or devices, as well as all plates, molds, matrices, or other means for making such infringing copies as the court may order;

(e) Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the parts of musical instruments serving to reproduce mechanically the musical work, then in case of infringement of such copyright by the unauthorized manufacture, use, or sale of interchangeable parts, such as disks, rolls, bands, or cylinders for use in mechanical music-producing machines adapted to reproduce the copyrighted music, no criminal action shall be brought, and in a civil action no injunction shall be granted, but the plaintiff shall be entitled to recover in lieu of profits and damages a royalty as provided in section 1, subsection (e), of this act: *Provided also*, That whenever any person, in the absence of a license agreement, intends to use a copyrighted musical composition upon the parts of instruments serving to reproduce mechanically the musical work, relying upon the compulsory license provision of this act, he shall serve notice of such intention, by registered mail, upon the copyright proprietor at his last address disclosed by the records of the copyright office; and in case of his failure so to do the court may, in its discretion, in addition to sums hereinabove mentioned, award the complainant a further sum, not to exceed three times the amount provided by section 1, subsection (e), by way of damages, and not as a penalty, and also a temporary injunction until the full award is paid.

Rules and regulations for practice and procedure under this section shall be prescribed by the Supreme Court of the United States.

SEC. 26. That any court given jurisdiction under section 34 of this act may proceed in any action, suit, or proceeding instituted for violation of any provision hereof to enter a judgment or decree enforcing the remedies herein provided.

SEC. 27. That the proceedings for an injunction, damages, and profits, and those for the seizure of infringing copies, plates, molds, matrices, etc., aforementioned, may be united in one action.

SEC. 28. That any person who willfully and for profit shall infringe any copyright secured by this act, or who shall knowingly and willfully aid or abet such infringement, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by imprisonment for not exceeding one year or by a fine of not less than $100 nor more than $1,000, or both, in the discretion of the court: *Provided, however*, That nothing in this act shall be so construed as to prevent the performance of religious or secular works, such as oratorios, cantatas, masses, or octavo choruses by public schools, church choirs, or vocal societies, rented, borrowed, or obtained from some public library, public school, church choir, school choir, or vocal society, provided the performance is given for charitable or educational purposes and not for profit.

SEC. 29. That any person who, with fraudulent intent, shall insert or impress any notice of copyright required by this act, or words of the same purport, in or upon any uncopyrighted article, or with fraudulent intent shall remove or alter the copyright notice upon an article duly copyrighted shall be guilty of a misdemeanor, punishable by a fine of not less than $100 and not more than $1,000. Any person who shall knowingly issue or sell any article bearing a notice of United States copyright which has not been copyrighted in this country, or who shall knowingly import any article bearing such notice or words of the same purport which has not been copyrighted in this country, shall be liable to a fine of $100.

SEC. 30. That the importation into the United States of any article bearing a false notice of copyright when there is no existing copyright thereon in the United States, or of any piratical copies of any work copyrighted in the United States, is prohibited.

SEC. 31. That during the existence of the American copyright in any book the importation into the United States of any piratical copies thereof or of any copies thereof (although authorized by the author or proprietor) which have not been produced in accordance with the manufacturing provisions specified in section 15 of this act, or any plates of the same not made from type set within the limits of the United States, or any copies thereof produced by lithographic or photo-engraving process not performed within the limits of the United States, in accordance with the provisions of section 15 of this act, shall be, and is hereby, prohibited: *Provided, however*, That, except as regards piratical copies, such prohibition shall not apply:

(a) To works in raised characters for the use of the blind;

(b) To a foreign newspaper or magazine, although containing matter copyrighted in the United States printed or reprinted by authority of the copyright proprietor, unless such newspaper or magazine contains also copyright matter printed or reprinted without such authorization;

(c) To the authorized edition of a book in a foreign language or languages of which only a translation into English has been copyrighted in this country;

(d) To any book published abroad with the authorization of the author or copyright proprietor when imported under the circumstances stated in one of the four subdivisions following, that is to say:

First. When imported, not more than one copy at one time, for individual use and not for sale; but such privilege of importation shall not extend to a foreign reprint of a book by an American author copyrighted in the United States;

Second. When imported by the authority or for the use of the United States;

Third. When imported, for use and not for sale, not more than one copy of any such book in any one invoice, in good faith, by or for any society or institution incorporated for educational, literary, philosophical, scientific, or religious purposes, or for the encouragement of the fine arts, or for any college, academy, school, or seminary of learning, or for any State, school, college, university, or free public library in the United States;

Fourth. When such books form parts of libraries or collections purchased en bloc for the use of societies, institutions, or libraries designated in the foregoing paragraph, or form parts of the libraries or personal baggage belonging to persons or families arriving from foreign countries and are not intended for sale: *Provided*, That copies imported as above may not lawfully be used in any way to violate the rights of the proprietor of the American copyright or annul or limit the copyright protection secured by this act, and such unlawful use shall be deemed an infringement of copyright.

SEC. 32. That any and all articles prohibited importation by this act which are brought into the United States from any foreign country (except in the mails) shall be seized and forfeited by like proceedings as those provided by law for the seizure and condemnation of property imported into the United States in violation of the customs revenue laws. Such articles when forfeited shall be destroyed in such manner as the Secretary of the Treasury or the court, as the case may be, shall direct: *Provided, however*, That all copies of authorized editions of copyright books imported in the mails or otherwise in violation of the provisions of this act may be exported and returned to the country of export whenever it is shown to the satisfaction of the Secretary of the Treasury, in a written application, that such importation does not involve willful negligence or fraud.

SEC. 33. That the Secretary of the Treasury and the Postmaster-General are hereby empowered and required to make and enforce such joint rules and regulations as shall prevent the importation into the United States in the mails of articles prohibited importation by this act, and may require notice to be given to the Treasury Department or Post-Office Department, as the case may be, by copyright proprietors or injured parties, of the actual or contemplated importation of articles prohibited importation by this act, and which infringe the rights of such copyright proprietors or injured parties.

SEC. 34. That all actions, suits, or proceedings arising under the copyright laws of the United States shall be originally cognizable by the circuit courts of the United States, the district court of any Territory, the supreme court of the District of Columbia, the district courts of Alaska, Hawaii, and Porto Rico, and the courts of first instance of the Philippine Islands.

SEC. 35. That civil actions, suits, or proceedings arising under this act may be instituted in the district of which the defendant or his agent is an inhabitant, or in which he may be found.

SEC. 36. That any such court or judge thereof shall have power, upon bill in equity filed by any party aggrieved, to grant injunctions to prevent and restrain the violation of any right secured by said laws, according to the course and principles of courts of equity, on such terms as said court or judge may deem reasonable. Any injunction that may be granted restraining and enjoining the doing of anything forbidden by this act may be served on the parties against whom such injunction may be granted anywhere in the United States, and shall be operative throughout the United States and be enforceable by proceedings in contempt or otherwise by any other court or judge possessing jurisdiction of the defendants.

SEC. 37. That the clerk of the court, or judge granting the injunction, shall, when required so to do by the court hearing the application to enforce said injunction, transmit without delay to said court a certified copy of all the papers in said cause that are on file in his office.

SEC. 38. That the orders, judgments, or decrees of any court mentioned in section 34 of this act arising under the copyright laws of the United States may be reviewed on appeal or writ of error in the manner and to the extent now provided by law for the review of cases determined in said courts, respectively.

SEC. 39. That no criminal proceeding shall be maintained under the provisions of this act unless the same is commenced within three years after the cause of action arose.

SEC. 40. That in all actions, suits, or proceedings under this act, except when brought by or against the United States or any officer thereof, full costs shall be allowed, and the court may award to the prevailing party a reasonable attorney's fee as part of the costs.

SEC. 41. That the copyright is distinct from the property in the material object copyrighted, and the sale or conveyance, by gift or otherwise, of the material object shall not of itself constitute a transfer of the copyright, nor shall the assignment of the copyright constitute a transfer of the title to the material object; but nothing in this act shall be deemed to forbid, prevent, or restrict the transfer of any

copy of a work copyrighted under this act the possession of which has been lawfully obtained.

SEC. 42. That copyright secured under this or previous acts of the United States may be assigned, granted, or mortgaged by an instrument in writing signed by the proprietor of the copyright, or may be bequeathed by will.

SEC. 43. That every assignment of copyright executed in a foreign country shall be acknowledged by the assignor before a consular officer or secretary of legation of the United States authorized by law to administer oaths or perform notarial acts. The certificate of such acknowledgment under the hand and official seal of such consular officer or secretary of legation shall be prima facie evidence of the execution of the instrument.

SEC. 44. That every assignment of copyright shall be recorded in the copyright office within three calendar months after its execution in the United States or within six calendar months after its execution without the limits of the United States, in default of which it shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice, whose assignment has been duly recorded.

SEC. 45. That the register of copyrights shall, upon payment of the prescribed fee, record such assignment, and shall return it to the sender with a certificate of record attached under seal of the copyright office, and upon the payment of the fee prescribed by this act he shall furnish to any person requesting the same a certified copy thereof under the said seal.

SEC. 46. That when an assignment of the copyright in a specified book or other work has been recorded the assignee may substitute his name for that of the assignor in the statutory notice of copyright prescribed by this act.

SEC. 47. That all records and other things relating to copyrights required by law to be preserved shall be kept and preserved in the copyright office, Library of Congress, District of Columbia, and shall be under the control of the register of copyrights, who shall, under the direction and supervision of the Librarian of Congress, perform all the duties relating to the registration of copyrights.

SEC. 48. That there shall be appointed by the Librarian of Congress a register of copyrights, at a salary of $4,000 per annum, and one assistant register of copyrights, at a salary of $3,000 per annum, who shall have authority during the absence of the register of copyrights to attach the copyright office seal to all papers issued from the said office and to sign such certificates and other papers as may be necessary. There shall also be appointed by the Librarian such subordinate assistants to the register as may from time to time be authorized by law.

SEC. 49. That the register of copyrights shall make daily deposits in some bank in the District of Columbia, designated for this purpose by the Secretary of the Treasury as a national depository, of all moneys received to be applied as copyright fees, and shall make weekly deposits with the Secretary of the Treasury, in such manner as the latter shall direct, of all copyright fees actually applied under the provisions of this act, and annual deposits of sums received which it has not been possible to apply as copyright fees or to return to the remitters, and shall also make monthly reports to the Secretary of the Treasury and to the Librarian of Congress of the applied copyright fees for each calendar month, together with a statement of all remittances received, trust funds on hand, moneys refunded, and unapplied balances.

SEC. 50. That the register of copyrights shall give bond to the United States in the sum of $20,000, in form to be approved by the Solicitor of the Treasury and with sureties satisfactory to the Secretary of the Treasury, for the faithful discharge of his duties.

SEC. 51. That the register of copyrights shall make an annual report to the Librarian of Congress, to be printed in the annual report on the Library of Congress, of all copyright business for the previous fiscal year, including the number and kind of works which have been deposited in the copyright office during the fiscal year, under the provisions of this act.

SEC. 52. That the seal provided under the act of July 8, 1870, and at present used in the copyright office, shall continue to be the seal thereof, and by it all papers issued from the copyright office requiring authentication shall be authenticated.

SEC. 53. That, subject to the approval of the Librarian of Congress, the register of copyrights shall be authorized to make rules and regulations for the registration of claims to copyright as provided by this act.

SEC. 54. That the register of copyrights shall provide and keep such record books in the copyright office as are required to carry out the provisions of this act, and whenever deposit has been made in the copyright office of a copy of any work under the provisions of this act he shall make entry thereof.

SEC. 55. That in the case of each entry the person recorded as the claimant of the copyright shall be entitled to a certificate of registration under seal of the copyright office, to contain his name and address, the title of the work upon which copyright is claimed, the date of the deposit of the copies of such work, and such marks as to class designation and entry number as shall fully identify the entry. In the case of a book the certificate shall also state the receipt of the affidavit as provided by section 16 of this act, and the date of the completion of the printing, or the date of the publication of the book, as stated in the said affidavit. The register of copyrights shall prepare a printed form for the said certificate, to be filled out in each case as above provided for, which certificate, sealed with the seal of the copyright office, shall, upon payment of the prescribed fee, be given to any person making application for the same, and the said certificate shall be admitted in any court as prima facie evidence of the facts stated therein. In addition to such certificate the register of copyrights shall furnish, upon request, without additional fee, a receipt for the copies of the work deposited to complete the registration.

SEC. 56. That the register of copyrights shall fully index all copyright registrations and assignments and shall print at periodic intervals a catalogue of the titles of articles deposited and registered for copyright, together with suitable indexes, and at stated intervals shall print complete and indexed catalogues for each class of copyright entries, and may thereupon, if expedient, destroy the original manuscript catalogue cards containing the titles included in such printed volumes and representing the entries made during such intervals. The current catalogues of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration.

SEC. 57. That the said printed current catalogues as they are issued shall be promptly distributed by the copyright office to the collectors of customs of the United States and to the postmasters of all exchange offices of receipt of foreign mails, in accordance with revised lists of such collectors of customs and postmasters prepared by the Secretary of the Treasury and the Postmaster-General, and they shall also be furnished to all parties desiring them at a price to be determined by the register of copyrights, not exceeding $5 per annum for the complete catalogue of copyright entries and not exceeding $1 per annum for the catalogues issued during the year for any one class of subjects. The consolidated catalogues and indexes shall also be supplied to all persons ordering them at such prices as may be determined to be reasonable, and all subscriptions for the catalogues shall be received by the Superintendent of Public Documents, who shall forward the said publications; and the moneys thus received shall be paid into the Treasury of the United States and accounted for under such laws and Treasury regulations as shall be in force at the time.

SEC. 58. That the record books of the copyright office, together with the indexes to such record books, and all works deposited and retained in the copyright office, shall be open to public inspection; and copies may be taken of the copyright entries actually made in such record books, subject to such safeguards and regulations as shall be prescribed by the register of copyrights and approved by the Librarian of Congress.

SEC. 59. That of the articles deposited in the copyright office under the provisions of the copyright laws of the United States or of this act, the Librarian of Congress shall determine what books and other articles shall be transferred to the permanent collections of the Library of Congress, including the law library, and what other books or articles shall be placed in the reserve collections of the Library of Congress for sale or exchange, or be transferred to other governmental libraries in the District of Columbia for use therein.

SEC. 60. That of any articles undisposed of as above provided, together with all titles and correspondence relating thereto, the Librarian of Congress and the register of copyrights jointly shall, at suitable intervals, determine what of these received during any period of years it is desirable or useful to preserve in the permanent files of the copyright office, and, after due notice as hereinafter provided, may within their discretion cause the remaining articles and other things to be destroyed: *Provided*, That there shall be printed in the Catalogue of Copyright Entries from February to November, inclusive, a statement of the years of receipt of such articles and a notice to permit any author, copyright proprietor, or other lawful claimant to claim and remove before the expiration of the month of December of that year anything found which relates to any of his productions deposited or registered for copyright within the period of years stated, not reserved or disposed of as provided for in this act: *And provided further*, That no manuscript of an unpublished work shall be destroyed during its term of copyright without specific notice to the copyright proprietor of record, permitting him to claim and remove it.

SEC. 61. That the register of copyrights shall receive, and the persons to whom the services designated are rendered shall pay, the following fees: For the registration of any work subject to copyright, deposited under the provisions of this act, $1, which sum is to include a certificate of registration under seal: *Provided*, That in the case of photographs the fee shall be 50 cents where a certificate is not demanded. For every additional certificate of registration made, 50 cents. For recording and certifying any instrument of writing for the assignment of copyright, or any such license specified in section 1, subsection (e), or for any copy of such assignment or license, duly certified, if not over 300 words in length, $1; if more than 300 and less than 1,000 words in length, $2; if more than 1,000 words in length, $1 additional for each 1,000 words or fraction thereof over 300 words. For recording the notice of user or acquiescence specified in section 1, subsection (e), 25 cents for each notice if not over 50 words, and an additional 25 cents for each additional 100 words. For comparing any copy of an assignment with the record of such document in the copyright office and certifying the same under seal, $1. For recording the extension or renewal of copyright provided for in sections 23 and 24 of this act, 50 cents. For recording the transfer of the proprietorship of copyrighted articles, 10 cents for each title of a book or other article, in addition to the fee prescribed for recording the instrument of assignment. For any requested search of copyright office records, indexes, or deposits, 50 cents for each full hour of time consumed in making such search: *Provided*, That only one registration at one fee shall be required in the case of several volumes of the same book deposited at the same time.

SEC. 62. That in the interpretation and construction of this act "the date of publication" shall in the case of a work of which copies are reproduced for sale or distribution be held to be the earliest date when copies of the first authorized edition were placed on sale, sold, or publicly distributed by the proprietor of the copyright or under his authority, and the word "author" shall include an employer in the case of works made for hire.

SEC. 63. That all laws or parts of laws in conflict with the provisions of this act are hereby repealed, but nothing in this act shall affect causes of action for infringement of copyright heretofore committed now pending in courts of the United States, or which may hereafter be instituted; but such causes shall be prosecuted to a conclusion in the manner heretofore provided by law.

SEC. 64. That this act shall go into effect on the 1st day of July, 1909.

The amendments offered by the committee were read, as follows:

Amend subsection (e) of section 1 by striking out the word "composer," in line 12, page 3, and inserting in lieu thereof the words "copyright proprietor."

Amend section 7 by inserting after the words "public domain," in line 20, page 6, the following: "or in any work which was published in this country or any foreign country prior to the going into effect of this act and has not been already copyrighted in the United States."

Amend section 15 by inserting after the words "foreign country," in line 12, page 11, the words "and illustrate a scientific work or reproduce a work of art."

Amend subsection (b) of section 25 by striking out the words "one thousand," in line 23, page 17, and inserting in lieu thereof the words "two hundred."

Amend subsection (e) of section 25 by striking out the words "and in a civil action no injunction shall be granted, but," in lines 11 and 12, page 19, and insert in lieu thereof the following: "but in a civil action an injunction may be granted upon such terms as the court may impose, and."

Also by inserting in line 21, page 19, after the words "copyright office," the words "sending to the copyright office a duplicate of such notice."

AMENDMENTS TO CORRECT TYPOGRAPHICAL ERRORS.

Page 15, line 10, change "bear" to "bears."
Page 18, line 13, change "very" to "every."
Page 20, line 18, change "misdemeaner" to misdemeanor."
Page 21, line 9, change "an article" to "any article."

Mr. GAINES of Tennessee. I demand a second.
Mr. MANN. Is the gentleman opposed to the bill?
Mr. GAINES of Tennessee. I think I am.
The SPEAKER. Under the rules a second is ordered.

SENATE BILLS.

Mr. MANN. Mr. Speaker, pending that, I ask unanimous consent that the special order concerning Senate bills on the Private Calendar may be continued over to-morrow on the same terms.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

RECESS.

Mr. PAYNE. Mr. Speaker, I move that the House do now take a recess until 11.50 o'clock to-morrow morning.

The SPEAKER. The gentleman from New York asks unanimous consent that the House take a recess until 11.50 to-morrow morning. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Accordingly (at 7 o'clock and 8 minutes p. m.) the House was declared in recess.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

A letter from the secretary of the Board of Visitors to West Point, transmitting the report of the board (H. Doc. No. 1495)—to the Committee on Military Affairs and ordered to be printed.

A letter from the Secretary of the Treasury, transmitting a report as to cost of transportation of fractional silver coin (H. Doc. No. 1496)—to the Committee on Appropriations and ordered to be printed.

A letter from the Secretary of War, transmitting a statement of documents distributed by the War Department under the act of January 12, 1895 (H. Doc. No. 1497)—to the Committee on Military Affairs and ordered to be printed.

A letter from the Acting Secretary of Commerce and Labor, transmitting report of Capt. Godfrey L. Carden on the machine-tool trade in Europe (H. Doc. No. 1498)—to the Committee on Interstate and Foreign Commerce and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred as follows:

Mr. SMITH of California, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 8929) withdrawing from entry and sale and granting unto the city of Los Angeles, in the State of California, certain lands therein described, reported the same without amendment, accompanied by a report (No. 2324), which said bill and report were referred to the Committee of the Whole House.

Mr. DAWES, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 28411) granting two cannons to Ohio Northern University, at Ada, Ohio, reported the same without amendment, accompanied by a report (No. 2306), which said bill and report were referred to the Committee of the Whole House.

REPORT OF COMMITTEE ON PRIVATE BILL.

Under clause 2 of Rule XIII,

Mr. SHACKLEFORD, from the Committee on Claims, to which was referred the bill of the House (H. R. 12275) for the relief of the Greenbrier Distilling Company, of Louisville, Ky., reported the same without amendment, accompanied by a report (No. 2300), which said bill and report were referred to the Private Calendar.

ADVERSE REPORT.

Under clause 2 of Rule XIII,

Mr. SMITH of Michigan, from the Committee on the District of Columbia, to which was referred the bill of the House (H. R. 24345) to amend an act entitled "An act to amend an act to authorize the Baltimore and Washington Transit Company, of Maryland, to enter the District of Columbia," approved May 29, 1908, reported the same adversely, accompanied by a report (No. 2299), which said bill and report were laid on the table.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 28423) granting an increase of pension to John Vetor, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. LAMAR of Florida: A bill (H. R. 28427) to amend an act to regulate commerce—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 28428) to amend the act to regulate commerce as amended June 29, 1906, to prevent unreasonable advances in rates of transportation of interstate commerce—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 28429) to amend section 4 of the act to regulate commerce—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 28430) to amend the act to regulate commerce and to regulate and control the consolidation of lines of transportation and the issue of capital stock, bonds, and other securities thereof—to the Committee on the Judiciary.

By Mr. LAMB: Joint resolution (H. J. Res. 267) regulating the expenditure of money appropriated by the Congress of the United States—to the Committee on Appropriations.

By Mr. PAYNE: Concurrent resolution (H. C. Res. 77) providing for the printing of 1,000 copies of notes on tariff revision, prepared under the direction of the clerk of the Committee on Ways and Means, etc.—to the Committee on Printing.

By Mr. GRONNA: Memorial of the legislature of North Dakota, in favor of the enactment of child-labor laws—to the Committee on the Judiciary.

By Mr. MARTIN: Memorial of the legislature of South Dakota, asking Congress to maintain and increase the tariff upon wool—to the Committee on Ways and Means.

By Mr. MARSHALL: Memorial of the legislature of North Dakota, in favor of the enactment of child-labor laws—to the Committee on the Judiciary.

By Mr. KINKAID: Memorial of the legislature of Nebraska, asking for appropriation for a clock to be placed in the United States federal building at Lincoln, Nebr.—to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. CAPRON: A bill (H. R. 28431) granting an increase of pension to Charles H. Robinson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28432) granting an increase of pension to John Cotter—to the Committee on Invalid Pensions.

By Mr. CARTER: A bill (H. R. 28433) granting a pension to Sarah Craig—to the Committee on Pensions.

Also, a bill (H. R. 28434) for the relief of Mrs. Mary J. Welsh Pate—to the Committee on Claims.

By Mr. McHENRY: A bill (H. R. 28435) granting an increase of pension to Daniel Bubb—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ACHESON: Petition of Mrs. A. B. McGrew and other citizens of Pennsylvania, favoring H. R. 18445, for treatment of tuberculosis—to the Committee on Appropriations.

By Mr. ANTHONY: Memorial of the legislature of Kansas, against consolidation of pension agencies—to the Committee on Appropriations.

By Mr. ASHBROOK: Petition of Oak Grove Grange, No. 1558, of Coshocton County, Ohio, favoring parcels-post and postal savings bank legislation (S. 5122 and 6484)—to the Committee on the Post-Office and Post-Roads.

Also, petition of the Warsaw Milling Company, of Warsaw, Ohio, favoring a maximum and minimum duty on flour, the minimum at least 25 per cent below the prevailing duty—to the Committee on Ways and Means.

By Mr. BURLEIGH: Petition of residents of Vassalboro, Me., quarterly meeting of Friends, favoring legislative regulation of interstate commerce in intoxicating liquors—to the Committee on the Judiciary.

By Mr. CALDER: Petition of the American Lithographic Company, against enactment in H. R. 28192 of the exception, viz, "except where in either case the subjects represented are located in a foreign country"—to the Committee on Patents.

Also, petition of Brooklyn Lodge, No. 22, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

Also, petition of the Public Library of the District of Columbia, favoring H. R. 11758 (Takoma Park branch library bill)—to the Committee on the District of Columbia.

Also, petition of William Lloyd Garrison Post, No. 207, against erecting monuments to confederate soldiers in Arlington Cemetery—to the Committee on Military Affairs.

Also, petition of Ernest W. Stratmann, favoring amendment of paragraph 638 of the present tariff act so as to permit hospitals to import surgical instruments free of duty—to the Committee on Ways and Means.

Also, petition of the National Pocahontas Memorial Association, against S. 4453, for a Pocahontas monument at Jamestown—to the Committee on the Library.

Also, petition of the United Confederate Veterans, favoring amendment of the Hepburn law so as to give free transportation to the Grand Army of the Republic and the United Confederate Veterans—to the Committee on Interstate and Foreign Commerce.

Also, petition of S. W. Eccles, president of the Copper River *Railway Company* and the Northwest Railway Company, against H. R. 25553, for relief of the Alaska Pacific Railway and Terminal Company—to the Committee on the Territories.

Also, petition of the superintendent of weights and measures of New York, favoring the Mann bill, relative to marking the net contents of commodities put up in containers—to the Committee on Interstate and Foreign Commerce.

By Mr. CAPRON: Petition of West Kingston (R. I.) Grange, for a national highways commission and federal aid in construction of highways (H. R. 15837)—to the Committee on Agriculture.

Also, paper to accompany bill for relief of Charles H. Robinson and John Cotter—to the Committee on Invalid Pensions.

Also, petition of Westerly Lodge, No. 678, Benevolent and Protective Order of Elks, for legislation creating a reserve in the State of Wyoming for the care of the American elk—to the Committee on the Public Lands.

Also, petition of the Audubon Society of Rhode Island, favoring bill to protect migratory birds—to the Committee on Agriculture.

Also, petition of Cumberland Lodge, No. 1, Amalgamated Association of Iron, Steel, and Tin Workers, of Valley Falls, R. I., favoring present duty on tin plate and repealing drawback provision of the Dingley law on tin plate—to the Committee on Ways and Means.

Also, petitions of the congregation of the Methodist Episcopal Church of Woonsocket; the Society of Friends of East Greenwich; the Woman's Christian Temperance Union of Cranston; the Clark's Mills Woman's Christian Temperance Union; the Woman's Christian Temperance Union of East Greenwich; the congregations of the Rodger Williams Baptist Church, of Providence; the Advent Christian Church of Providence; the Carolina Free Baptist Church, of Charlestown; the First Presbyterian Church of Woonsocket; the Methodist Episcopal Church of East Greenwich; and the First Baptist Church of East Greenwich, all in the State of Rhode Island, favoring bill regulating shipment of liquor into prohibition States—to the Committee on Interstate and Foreign Commerce.

By Mr. CARY: Petition of Federated Trades Council of Milwaukee, protesting against the sentencing of President Gompers and others and against "court-made laws in violation of their constitutional rights"—to the Committee on the Judiciary.

By Mr. COOK of Colorado: Petition of business firms of Colorado, against an increase of duty on kid gloves—to the Committee on Ways and Means.

By Mr. DRISCOLL: Petition of Hudson Brothers and others, of New York State, favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. FRENCH: Petition of citizens of Sandpoint, Potlatch, Culvers Spur, and Coeur d'Alene, all in the State of Idaho, against reduction of the duty on lumber—to the Committee on Ways and Means.

By Mr. FULLER: Petition of the National Child's Labor Commission of New York, favoring the children's bureau bill—to the Committee on Expenditures in the Interior Department.

Also, petition of W. W. Hixon, of Rockford, Ill., favoring increase of duty on foreign postcards and picture cards—to the Committee on Ways and Means.

By Mr. FULTON: Paper to accompany bill for relief of William E. Woodward (previously referred to the Committee on Invalid Pensions)—to the Committee on Pensions.

By Mr. GOULDEN: Petition of the Brotherhood of Locomotive Engineers, favoring H. R. 26400—to the Committee on Military Affairs.

Also, petition of the Consumers' League of New York City, favoring H. R. 24148, for federal bureau for children—to the Committee on Expenditures in the Interior Department.

By Mr. GRONNA: Petition of citizens of Berwick, N. Dak., for removal of the tax on stills—to the Committee on Ways and Means.

Also, petition of the Commercial Club of Harvey, N. Dak., for a national highways commission and federal aid in construction of highways (H. R. 15837)—to the Committee on Agriculture.

By Mr. HINSHAW: Memorial of the legislature of Nebraska, for placing a large clock wih four dials on the federal building in Lincoln—to the Committee on Public Buildings and Grounds.

Also, petition of citizens of Giltner, Nebr., against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. HOWELL of New Jersey: Petition of New Brunswick (N. J.) Lodge, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming (H. R. 21980)—to the Committee on the Public Lands.

Also, petition of the Board of Trade of Long Branch, N. J., favoring purchase of the McCall residence at Long Branch, N. J., for a summer home for the President—to the Committee on Appropriations.

By Mr. HOWELL of Utah: Petition of Ogden Lodge, No. 719, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

By Mr. JONES of Washington: Petition of laborers, skilled and unskilled, of the "Indian Empire," State of Washington, protesting against removal of tariff on lumber—to the Committee on Ways and Means.

By Mr. LAFEAN: Petition of York (Pa.) Lodge, No. 213, Benevolent and Protective Order of Elks, for reservation for the care of the American elk—to the Committee on the Public Lands.

By Mr. LINDSAY: Petition of the American Protective Tariff League, against a permanent nonpartisan tariff commission—to the Committee on Ways and Means.

Also, petition of the Brotherhood of Locomotive Engineers of Albany, N. Y., favoring H. R. 26400—to the Committee on Military Affairs.

By Mr. McMORRAN: Petition of Riley Center (Mich.) Grange, No. 569, favoring H. R. 15837, for the creation of a national highways commission—to the Committee on Agriculture.

By Mr. MOORE of Pennsylvania: Petition of certain residents of Philadelphia, favoring S. 5117 and H. R. 18445, for treatment of tuberculosis—to the Committee on Appropriations.

By Mr. NORRIS: Petition of residents of Campbell, Nebr., against parcels-post and postal savings bank legislation—to the the Committee on the Post-Office and Post-Roads.

Also, petition of the North Platte Water Users' Association, favoring direct appropriations by Congress for irrigation purposes, surveying, engineering, etc.—to the Committee on Irrigation of Arid Lands.

By Mr. PARSONS: Petitions of George Goldstone and other citizens of New York; the New Orleans Board of Trade; the Scotten Avenue Baptist Church, of Detroit, Mich.; the Woman's Club of Maroa; and the Cleveland (Ohio) Council of Women, favoring the children's bureau bill—to the Committee on Expenditures in the Interior Department.

By Mr. PEARRE: Petition of Frederick (Md.) Lodge, No. 684, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

By Mr. PRAY: Petition of citizens of Superior, Mont., against S. 3940 (Johnston Sunday bill)—to the Committee on the District of Columbia.

By Mr. ROBINSON: Petition of Wilmar Union of F. E. and C. U. of America, favoring parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. STANLEY: Petition of the Henderson (Ky.) Commercial Club, favoring a liberal river and harbor bill at the extra session of the Sixty-first Congress—to the Committee on Rivers and Harbors.

By Mr. STURGISS: Petition of E. Ware & Son and B. H. Brosius, of West Virginia, favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. SULZER: Petition of the Brotherhood of Locomotive Engineers of Albany, N. Y., favoring H. R. 26400—to the Committee on Military Affairs.

By Mr. TIRRELL: Petition of R. W. Grubb and others, against parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. WALLACE: Petition of L. P. Fountain and others, of Warren, Ark., against reduction of tariff on lumber—to the Committee on Ways and Means.

Also, petition of John Holman and others, of Crossett, Ark., against reduction of tariff on lumber—to the Committee on Ways and Means.

By Mr. WEBB: Petition of R. F. Smith and others, of Lincoln, N. C., against parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. YOUNG: Petition of W. J. Pierce and others, favoring parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

Also, petition of James V. Callaghan, for a national highways commission and federal aid in construction of highways (H. R. 15837)—to the Committee on Agriculture.

SENATE.

WEDNESDAY, *March 3, 1909.*

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Edward E. Hale.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. KEAN, and by unanimous consent, the further reading was dispensed with.

The VICE-PRESIDENT. The Journal stands approved.

Mr. KEAN. From the Committee to Audit and Control the Contingent Expenses of the Senate, I report a substitute for Senate resolution 309, which was referred to that committee, and I ask for its present consideration.

Mr. CLARKE of Arkansas. I understand that this is a continuation of yesterday's session.

Mr. HEYBURN. No; we adjourned yesterday.

Mr. CLARKE of Arkansas. I was going to say that if agreeable to the Senator from Idaho we will lay over the unfinished business until 11 o'clock to-day.

Mr. HEYBURN. I will have to have some little conference in regard to it and understand the purpose before doing it.

Mr. CLARKE of Arkansas. I want to know from the Senator from Idaho if it is agreeable that the pending business may be postponed until 11 o'clock.

Mr. GALLINGER. I ask that the resolution reported by the Senator from New Jersey [Mr. KEAN] be read.

The VICE-PRESIDENT. The Secretary will read the resolution.

Mr. CLARKE of Arkansas. I make an objection.

The VICE-PRESIDENT. The Senator from Arkansas objects.

Mr. KEAN. I have other reports to present.

Mr. GALLINGER. I have a conference report to submit.

Mr. CLARKE of Arkansas. I suggest the absence of a quorum. If we are going to conduct public business, we may as well have a quorum.

The VICE-PRESIDENT. The Senator from Arkansas suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Beveridge	Dick	Hemenway	Overman
Brandegee	Dixon	Heyburn	Owen
Brown	Flint	Johnston	Page
Burkett	Frazier	Kean	Paynter
Burrows	Frye	Kittredge	Perkins
Clapp	Fulton	La Follette	Richardson
Clark, Wyo.	Gallinger	Long	Scott
Clarke, Ark.	Gamble	McCumber	Smith, Md.
Clay	Gary	Martin	Smoot
Cullom	Gore	Milton	Sutherland
Cummins	Guggenheim	Money	Teller
Daniel	Hansbrough	Nelson	Wetmore

Mr. CLAY. I desire to state in behalf of my colleague [Mr. BACON] that he has been detained at home Monday, yesterday, and to-day on account of sickness, and will probably not be able to be in the Senate during the present session.

The VICE-PRESIDENT. Forty-eight Senators have answered to their names. A quorum is present.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed the bill (S. 8640) to extend the time for the completion of the bridge across the Missouri River at Yankton, S. Dak., by the Yankton, Norfolk and Southern Railway Company.

The message also announced that the House had agreed to the reports of the committees of conference on the amendments of the House to the following bills:

S. 9421. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors; and

S. 9278. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war, and to certain dependent relatives of such soldiers and sailors.

The message further announced that the House had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the following bills:

H. R. 21003. An act fixing the compensation of certain officials in the customs service, and for other purposes;

H. R. 24834. An act for the protection of the surface rights of entrymen; and

H. R. 27053. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

The message also announced that the House had passed a bill (H. R. 28411) to grant two cannon to Ohio Northern University, at Ada, Ohio, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED.

H. R. 28411. An act to grant two cannon to Ohio Northern University, at Ada, Ohio, was read twice by its title and referred to the Committee on Military Affairs.

DR. CHARLES A. L. REED.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of War, stating, by direction of the President, and in response to the resolution of the Senate of the 25th ultimo relative to the nomination of Dr. Charles A. L. Reed, of Cincinnati, as first lieutenant, Army Medical Reserve Corps, that whatever communications may have been made covered by the resolution are confidential in character and not believed to be in the best interest of the service to be made public (S. Doc. No. 754), which was referred to the Committee on Military Affairs and ordered to be printed.

MACHINE TOOL TRADE.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of Commerce and Labor, transmitting, pursuant to law, the report of Capt. Godfrey L. Carden, United States Revenue-Cutter Service, detailed as special agent on the machine tool trade in Germany, France, Switzerland, Italy, and the United Kingdom (H. Doc. No. 1498), which, with the accompanying paper, was referred to the Committee on Commerce and ordered to be printed.

REPORT OF EXCISE BOARD OF THE DISTRICT OF COLUMBIA.

The VICE-PRESIDENT laid before the Senate a communication from the Commissioners of the District of Columbia, transmitting, pursuant to law, a report of the excise board of the District for the fiscal year ended October 31, 1908 (S. Doc. No. 755), which, with the accompanying paper, was referred to the Committee on the District of Columbia and ordered to be printed.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented the petition of Wilkinson Call, ex-Senator of the United States from the State of Florida, which was referred to the Committee on Privileges and Elections and ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C.

To the Senate of the United States, Washington, D. C.:

The petition of Wilkinson Call, a citizen of the State of Florida and of the United States of America, who was for eighteen years continuously a Senator of the United States from the State of Florida, respectfully prays:

That the credentials of D. U. Fletcher, commissioned by Albert Gilchrist, claiming to be governor of the State of Florida, to be a Senator of the United States to fill the term commencing on the 4th of March, 1909, shall be referred to the Committee on Privileges and Elections of the Senate, to inquire and report to the Senate whether or not the said Albert Gilchrist is lawfully governor of the State of Florida, competent to appoint a Senator of the United States; and respectfully avers that the said Gilchrist is not the governor of the State of Florida, lawfully elected and qualified in the manner and under the conditions required by the Constitution of the United States and by the constitution of the State of Florida;

Because there has been no election in the manner and under conditions required by the Constitution of the United States and of the State of Florida; that the alleged election under which the said Albert Gilchrist claims to be governor was made in violation of the express terms of the election laws of the State of Florida and in violation of the conditions prescribed by the laws of the United States, and also the Constitution of the United States and its amendments for such election;

Because under the alleged law of the State, known as a law for a primary election, the power to prescribe the conditions and regulations

for primary election of each party is conferred upon a committee of citizens, who, in the Democratic party, have prescribed the following unconstitutional requirements:

1. Additional qualifications for governor, United States Senator, National Representative, and other public offices not prescribed in the Constitution of the United States or the State of Florida, to wit, the payment of $250 to the said committee, and a pledge to abide by the regulations under which the primaries are held. Thus the rights of the members of the Democratic party in Florida have been abridged for four years, and they are kept from voting for candidates who are duly qualified under the Constitution of the United States and of the State of Florida.

2. Said committee further prescribed that no ballot should be counted except such as were furnished by the said committee, thus further abridging the elector's privileges.

3. Said committee has prescribed a regulation in conflict with the registration law of the State, namely, a change in the time for registration, making it six months earlier than required by law.

4. Said committee has further prescribed that no person shall be voted for who is not of the white race, thus violating Articles XIV and XV of the Constitution of the United States.

5. The regulations further provide that the person chosen for each office shall be the choice of a majority of the whole number of persons voting therefor, whereas the State law provides for an election by plurality.

In addition to the foregoing valid grounds of objection to the right of Albert Gilchrist to the office of governor of the State of Florida are the following:

The said primary election was held under the influence of a corporation in combination with the committee of citizens controlling the so-called "Democratic party," and your petitioner avers that under the violation of the laws of the State of Florida the entire state government (lawfully organized and constituted) has been entirely subverted, and that the State is now governed without authority of the law by this combination, the open and declared purpose and object of which is to subvert the lawful constitution and to put in place thereof a government not organized or known either to the laws of the United States or to the State of Florida.

Your petitioner submits to your honorable body that the evil influence upon the people and the whole body politic by the substitution of the Roman form of consular government, established in Florida by the aforesaid corporation, is shown in the policies adopted and which has culminated in the appointment of D. U. Fletcher by the alleged governor, Albert Gilchrist.

The administration of the said Albert Gilchrist has been distinguished by another marked violation of the laws of the United States and the State of Florida, in the insecurity of life and property, and by the disregard, in some noted instances, of the legal methods and rules of procedure by persons exercising judicial power. For proof of the foregoing all that is needed is an examination of the records in the cases in the alleged courts of Florida.

The present administration has also been distinguished by the revival of the convict-labor trade, namely, the sale of the forced labor of convicts, of both the white and colored races, by the preceding administration by a continuance of the sale, a notable instance being the case of the sale (en masse) by the alleged governor of the aforesaid convict labor to persons belonging to the Democratic primary, and the resale for an alleged advance of $100,000 to persons interested in the phosphate and turpentine camps.

Your petitioner further respectfully submits that if the Senate of the United States be constituted of persons chosen by the means herein described, the way is provided for the overthrow of the Government of the United States, to preserve which so great a sacrifice of human lives and taxable resources has been made.

Your petitioner also submits to your honorable body that this great scheme of our National Government of coordinate power, legislative, executive, and judicial, in which the supreme legislative power has been vested in a Senate and House of Representatives, has conveyed to your honorable body the sole power of determining the qualifications and return of its Members (act 3, art. 2), and that the exercise of its supreme prerogative is the only means which the people of the United States, in this particular, have for the protection of their state government.

Your petitioner further shows that the said election laws of the State of Florida are all of them made under the influence of a primary election and really constitute a treasonable conspiracy against the constitution and form of government established by it and intended to be perpetual; that the pretenses under which this is done are in themselves plainly unreasonable and void; that it is commonly contended by its advocates that treason when committed by a party or combination of men is not unlawful, but may be done with impunity; that the provisions of the primary law which require all persons voting in the primaries to be bound by the resolutions of the party are only party resolutions and therefore are not within the terms of the Constitution; that is to say, the political party may organize a rebellion and revolution or adopt a nullification or secession platform and bind its members to it and yet not be within the provisions of the Constitution.

Your petitioner respectfully shows that elections in Florida to the legislature are made under this primary, and that the members elected are pledged to vote for no one but one subject to the primary law and pledged to violate the Constitution and are permitted to vote for no one but the person who is pledged to vote for none but a white man, and a white man who is subject to the primary law and himself pledged to vote for no one who has not paid his contribution as a candidate to the committee.

Your petitioner further shows that under the provisions of this fraudulent and unconstitutional law more than two-thirds of the people of Florida are disfranchised of their legal rights and prevented and forbidden from voting; that the election in which D. U. Fletcher claims to have been elected by men themselves pledged to a doctrine of nullification and secession; and that the said D. U. Fletcher was an active supporter of the treasonable doctrine of nullification and secession by a primary claiming to speak in the name of the State, in which all the people who were loyal subjects to the United States and supporters of the Constitution were excluded from voting; and that this treason against the United States and against the perpetuation of this Government was promoted, supported, and caused by the Standard Oil Company with its great revenues and by corrupting the voters and people of the State at large.

Your petitioner calls the attention of the Senate to the fact that the vote by which the said D. U. Fletcher claims to have been chosen to the Senate of the United States was, as well as your petitioner remembers, about 40,000, out of a voting population of about 150,000 qualified voters, and only subject to disqualification under the state constitution by an educational test.

Therefore your petitioner respectfully prays for a full and complete evidence of all the facts of the said election and appointment be taken, and prays that said D. U. Fletcher be not seated as a Senator from the State of Florida.

All of which is respectfully submitted.

And the subscriber further submits that he was a candidate for the office of Senator and was prevented from being voted for by the said primary law, and that he would have received a majority of qualified voters under the Constitution of the United States and of the State of Florida if they had been allowed to cast their ballots, as required by the Constitution of the United States.

Your petitioner, the contestant of the said D. U. Fletcher for a seat in the Senate of the United States, respectfully shows as an evidence of the entire subversion under this primary law, if it be called a law, of all legal and proper methods of legislation and of the constitutional rights of the people of the State under the Constitution of the United States and of the State of Florida is shown by the proceedings in the United States court of the southern district of Florida in the case, which will be found verified by the records of said court under a sale of the Jacksonville J. T. & K. W. Railroad Company. The said road, with all of its lands, rights, depots, and appendages, was sold for a gross sum of about $7,000 a mile, and bought by a railroad company operating under the state law, and then bonded for $30,000 a mile, which debt was imposed upon the people of the State making use of said road; and under the said primary not one word was said of this gross outrage upon the people; and in which imposition the said D. U. Fletcher was a prominent advocate and defender, as the contestant is informed and believes, and prays that proper inquiry may be made upon the subject and proof taken of the facts; and it will be disclosed in such evidence that no greater outrage was ever committed than this fraud upon the people of Florida, and that the legislature elected under this primary law is not a lawful body and all of its proceedings are void and of no constitutional right and authority, but are subject to greater well-founded objections than was the open and armed defiance of the Government of the United States in the great civil war between the United States and the Confederate States, which, at least, was a revolution authorized by the then state authorities and suppressed only by armed force, while the present action of the State of Florida involves both secession and nullification and complete subversion of the legal authority of the Constitution of the United States and of the proper organized State of Florida.

WILKINSON CALL,
Ex-United States Senator from Florida.

Mr. SCOTT presented a joint resolution of the legislature of West Virginia, which was ordered to lie on the table and to be printed in the RECORD, as follows:

Senate joint resolution 9, urging the Congress of the United States to establish a national bureau of mines.

Resolved, That the legislature of West Virginia again urges upon the Congress of the United States the prompt establishment of a national bureau of mines.

The frequency of the recurring disasters and the increasing lists of fatal accidents in the best equipped mines of the country, in spite of the extra precautions taken and warnings from the investigations by the Government during the present year, but serve to illustrate the necessity of having the continuous work of a well-organized national bureau of mines, the investigations of which will aid the States and the miners in adopting and carrying measures looking to greater safety.

Resolved, That copies of the resolution be sent to the Senators and Representatives at Washington from West Virginia, and that they are respectfully requested to aid in securing the prompt passage of the pending bill, looking to the establishment of such a bureau.

Mr. LA FOLLETTE presented a joint resolution of the legislature of Wisconsin, which was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

Chapter —, Laws of 1909.

Joint resolution petitioning the Congress of the United States for the enactment of a law creating a volunteer retired list.

Whereas it has been the policy of this country from the beginning to maintain a small Regular Army, and in times of war to rely upon the patriotism of the people to rally as volunteers in defense of the national flag; and

Whereas it is a recognized fact that the civil war—1861 to 1865—forms the most sanguinary chapter in the history of the world; that the Regular Army during that struggle was maintained at about 25,000 men, while the volunteers numbered more than 2,500,000 of officers and enlisted men; and

Whereas it is a recognized fact that the union of these States was preserved, and the national authority maintained by the patriotism, fortitude, and valor of the volunteers, to whom this great united people, now enjoying the inestimable blessings of a preserved Union, owe a debt of gratitude that can never be paid: Therefore

Resolved by the senate (the assembly concurring), That we request the Senators and Representatives of the Sixtieth Congress from the State of Wisconsin to aid in the prompt enactment of a law in effect creating a volunteer retired list upon which may be placed with retired pay, upon application, the surviving volunteer officers of the army, navy, and marines of the United States and enlisted men who served with credit during the civil war, such survivors now constituting a small remnant of that body of gallant men who led the Union forces to final victory.

Resolved further, That in our opinion the precedents of congressional legislation fully justify the enactment of this law, namely: The acts of 1828 and 1832 granting retired pay during life to the surviving officers and enlisted men of the army, navy, and marines of the Revolution; the act of 1901, retiring Charles A. Boutelle, a volunteer officer of the Union Navy with the rank and retired pay of captain of the navy; the acts of 1904, 1906, and 1907, granting increased rank and retired pay to the officers of the Regular Army and Navy, based solely on the ground

that they had "served with credit during the civil war;" and the act of 1905, providing for the retirement of two officers of volunteers, namely, Gens. Joseph R. Hawley and P. J. Osterhaus, with rank and retired pay of brigadier-generals: Therefore it is further

Resolved, That in our opinion the surviving officers of volunteers of the army, navy, and marines and enlisted men who served with credit in the great war for the preservation of the Union are entitled to receive from the National Government honors and emoluments equal to those which had heretofore been bestowed upon those who served in time of war in defense of the country.

JOHN STRANGE,
President of the Senate.

F. E. ANDREWS,
Chief Clerk of the Senate.

L. H. BANCROFT,
Speaker of the Assembly.

C. E. SHAFFER,
Chief Clerk of the Assembly.

Mr. KNOX presented petitions of Local Union No. 2263, of Sligo; Local Union No. 18, of Philipsburg; Local Union No. 199, of Plumville; Local Union No. 830, of Dunlo; Local Union No. 1854, of Rattler; Local Union No. 176, of Winburne; Local Union No. 2342, of Lawsonham; Local Union No. 2098, of Antrim; Local Union No. 2030, of Byrnedale; Local Union No. 2383, of Vintondale; Local Union No. 521, of Sonman; Local Union No. 1857, of Van Ormer; Local Union No. 375, of Madera; Local Union No. 2408, of Sykesville; Local Union No. 1683, of Six Mile Run; Local Union No. 9, of Expedit; Local Union No. 1305, of Rimersburg; Local Union No. 2265, of Rimersburg; Local Union No. 2426, of Hawthorn; Local Union No. 2064, of Frugality; Local Union No. 252, of Mineral Point; Local Union No. 1493, of Gallitzin; Local Union No. 34, of Amesville; Local Union No. 738, of Coal Glen; Local Union No. 2017, of Lloydell; Local Union No. 924, of Carrolltown; Local Union No. 2045, of Force; Local Union No. 1924, of Bitumen; Local Union No. 2296, of Crenshaw; Local Union No. 617, of Barnesboro; Local Union No. 2305, of Boardman; Local Union No. 2601, of Conifer; all of the United Mine Workers of America, in the State of Pennsylvania, praying for the enactment of legislation creating a Bureau of Mines and Mining; which were ordered to lie on the table.

Mr. STEPHENSON presented a joint resolution of the legislature of Wisconsin, which was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

Chapter —, Laws of 1909.

Joint resolution petitioning the Congress of the United States for the enactment of a law creating a volunteer retired list.

Whereas it has been the policy of this country from the beginning to maintain a small Regular Army, and in times of war to rely upon the patriotism of the people to rally as volunteers in defense of the national flag; and

Whereas it is a recognized fact that the civil war—1861 to 1865—forms the most sanguinary chapter in the history of the world; that the Regular Army during that struggle was maintained at about 25,000 men, while the volunteers numbered more than 2,500,000 of officers and enlisted men; and

Whereas it is a recognized fact that the union of these States was preserved and the national authority maintained by the patriotism, fortitude, and valor of the volunteers, to whom this great united people, now enjoying the inestimable blessings of a preserved Union, owe a debt of gratitude that can never be paid: Therefore

Resolved by the senate (the assembly concurring), That we request the Senators and Representatives of the Sixtieth Congress from the State of Wisconsin to aid in the prompt enactment of a law in effect creating a volunteer retired list upon which may be placed with retired pay, upon application, the surviving volunteer officers of the army, navy, and marines of the United States and enlisted men who served with credit during the civil war, such survivors now constituting a small remnant of that body of gallant men who led the Union forces to final victory.

Resolved further, That in our opinion the precedents of congressional legislation fully justify the enactment of this law, namely: The acts of 1828 and 1832, granting retired pay during life to the surviving officers and enlisted men of the army, navy, and marines of the Revolution; the act of 1901, retiring Charles A. Resolved, That in our opinion the surviving officers of vounteers of the army, navy, and marines and enlisted men who served with credit in the great war for the preservation of the Union are entitled to receive from the National Government honors and emoluments equal to those which had heretofore been bestowed upon those who served in time of war in defense of the country.

JOHN STRANGE,
President of the Senate.

F. E. ANDREWS,
Chief Clerk of the Senate.

L. H. BANCROFT,
Speaker of the Assembly.

C. E. SHAFFER,
Chief Clerk of the Assembly.

Mr. STEPHENSON presented a joint resolution of the legislature of Wisconsin, which was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

Joint resolution asking Congress of the United States to enact into law H. R. 39.

Whereas it has come to the knowledge of the legislature of the State of Wisconsin that a measure is pending before the Congress of the United States (H. R. 39) intending to extend the limits of the Shiloh National Military Park, for the purpose of showing, by appropriate markers, the movements of the confederate army in its approach to Shiloh and the movements of the Union Army, under General Halleck, in its advance from Shiloh to Corinth, and for making the said park accessible at all times to those who desire to visit it; and

Whereas this State, as well as the Government of the United States, the States of Illinois, Indiana, Iowa, Minnesota, Pennsylvania, Ohio, Alabama, and Tennessee, have expended large sums of money by erecting monuments therein and otherwise beautifying the same: It is therefore

Resolved, That the legislature of the State of Wisconsin respectfully asks and urges the Congress of the United States to enact at the earliest moment practicable said bill (H. R. 39) into law, so as to enable as many people as possible to visit this beautiful park, made historic by one of the most sanguinary battles fought during the civil war.

Resolved, That a copy of these resolutions be transmitted by the secretary of state to the Senate of the United States and to the House of Representatives of the United States and to each of the Senators and Representatives from this State.

JOHN STRANGE,
President of the Senate.

F. E. ANDREWS,
Chief Clerk of the Senate.

L. H. BANCROFT,
Speaker of the Assembly.

C. E. SHAFFER,
Chief Clerk of the Assembly.

Mr. STEPHENSON presented a petition of the Twentieth Century Club, of Oshkosh, Wis., and a petition of the Consumers' League of Milwaukee, Wis., praying for the passage of the so-called "children's bureau" bill, which were ordered to lie on the table.

He also presented petitions of Local Lodge No. 300, of La Crosse; of Local Lodge No. 641, of Stevens Point; and of Local Lodge No. 962, of Kaukauna, all of the Benevolent and Protective Order of Elks, in the State of Wisconsin, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a petition of the Consumers' League of Milwaukee, Wis., and a petition of the Twentieth Century Club of Oshkosh, Wis., praying for the enactment of legislation providing for a uniform national age standard for child labor, which were referred to the Committee on Education and Labor.

Mr. FRYE presented a petition of Local Lodge No. 188, Benevolent and Protective Order of Elks, of Portland, Me., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

Mr. BURNHAM presented a petition of Local Lodge No. 184, Benevolent and Protective Order of Elks, of Dover, N. H., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

Mr. KEAN presented a memorial of the Lehigh Valley Lodge No. 601, Brotherhood of Locomotive Engineers, of Jersey City, N. J., remonstrating against the enactment of any legislation inimical to the railroad interests of the country, which was referred to the Committee on Interstate Commerce.

He also presented petitions of Local Lodge No. 848, of Mount Holly; of Local Lodge No. 1075, of Rahway; of Local Lodge No. 434, of Bayonne; of Local Lodge No. 74, of Hoboken; of Local Lodge No. 1070, of Lambertville; and of Local Lodge No. 324, of New Brunswick, all of the Benevolent and Protective Order of Elks, in the State of New Jersey, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. NELSON presented a petition of Local Lodge No. 342, Benevolent and Protective Order of Elks, of Crookston, Minn., and a petition of Local Lodge No. 44, Benevolent and Protective Order of Elks, of Minneapolis, Minn., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

MILITARY ACADEMY APPROPRIATION BILL.

Mr. SCOTT. I submit a conference report, and ask for its adoption; and I also ask to have the report printed.

The VICE-PRESIDENT. The Senator from West Virginia submits a conference report, which will be read.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 14, 16, 18, 20, and 26.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 11, 12, 13, 15, 19, 22, 23, 25, 29, and 30, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "one thousand;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "three;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "twenty-six thousand eight hundred and seventy-three;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "one thousand five hundred;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of matter proposed in said amendment insert "For five small electric motors, at one hundred dollars each, five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "twenty-four thousand and thirty-three;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "eight hundred and two thousand nine hundred and eighty-six;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "one thousand five hundred dollars," so that the amendment will read: "For preserving and marking Revolutionary forts, redoubts, and batteries, and other historic sites, situated within the limits of the West Point Military Reservation, one thousand five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment, insert "twenty-eight thousand five hundred and thirty-five;" and the Senate agree to the same.

N. B. SCOTT,
J. A. HEMENWAY,
MURPHY J. FOSTER,
Managers on the part of the Senate.

J. A. T. HULL,
A. B. CAPRON,
WM. SULZER,
Managers on the part of the House.

STATEMENT.

The managers on the part of the Senate at the conference on the disagreeing votes of the two Houses on the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, submit the following written statement in explanation of the effect upon the total appropriation carried by the bill resulting from the action agreed upon and submitted in the accompanying conference report on the amendments of the Senate, namely:

Amount of bill as passed by Senate		$2,541,421.33
Amounts dropped in conference:		
Pay of stenographer and typewriter in adjutant's office	$100.00	
Expenses of Board of Visitors	500.00	
Typesetting machine	3,700.00	
Paper-cutting machine	700.00	
One small electric motor	100.00	
Closets for stock and office furniture	600.00	
Landscape improvement	2,500.00	
Preserving and marking Revolutionary forts, etc	1,700.00	
		9,900.00
Amount of bill as reported by conferees		2,531,521.33

Totals carried under each heading in bill as reported by conferees:	
Permanent establishment (not changed)	331,800.00
Extra pay of officers on detached service (not changed)	29,300.00
Pay of enlisted men (not changed)	188,415.33
Pay of civilians (decreased $100)	77,358.00
Current and ordinary expenses (decreased $5,600)	124,033.00
Miscellaneous items and incidental expenses (not changed)	52,080.00
Buildings and grounds (decreased $4,200)	1,728,535.00
Amount of bill as reported by conferees	2,531,521.33

N. B. SCOTT,
J. A. HEMENWAY,
MURPHY J. FOSTER,
Managers on the part of the Senate.

The VICE-PRESIDENT. The Senator from West Virginia asks for the present consideration of the conference report.

Mr. CLARKE of Arkansas. I object, Mr. President.

The VICE-PRESIDENT. The question is for the Senate to determine. Shall the Senate proceed to the consideration of the conference report?

Mr. CLARKE of Arkansas. On that motion I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE]. In the absence of that Senator, I withhold my vote.

The roll call was concluded.

Mr. CLARK of Wyoming. I announced my pair with the senior Senator from Missouri [Mr. STONE]. I transfer that pair to the senior Senator from New York [Mr. PLATT] and vote "yea."

Mr. CLAY. I wish to announce that my colleague [Mr. BACON] is paired during the remainder of the session with the junior Senator from Nevada [Mr. NIXON].

The result was announced—yeas 47, nays 4, as follows:

YEAS—47.

Beveridge	Cullom	Hansbrough	Money
Borah	Cummins	Hemenway	Nelson
Brandegee	Curtis	Heyburn	Overman
Brown	Daniel	Kean	Owen
Burkett	Dixon	Kittredge	Page
Burnham	Frazier	La Follette	Richardson
Burrows	Frye	Lodge	Scott
Clark, Wyo.	Fulton	Long	Smith, Md.
Clarke, Ark.	Gallinger	McCumber	Smoot
Clay	Gamble	McLaurin	Sutherland
Crane	Gary	Martin	Wetmore
Culberson	Guggenheim	Milton	

NAYS—4.

Clapp	Gore	Johnston	Paynter

NOT VOTING—41.

Aldrich	Dick	McCreary	Stephenson
Ankeny	Dillingham	McEnery	Stone
Bacon	Dolliver	Newlands	Taliaferro
Bailey	du Pont	Nixon	Taylor
Bankhead	Elkins	Penrose	Teller
Bourne	Flint	Perkins	Tillman
Briggs	Foraker	Piles	Warner
Bulkeley	Foster	Platt	Warren
Carter	Hale	Rayner	
Davis	Hopkins	Simmons	
Depew	Knox	Smith, Mich.	

So the motion was agreed to, and the Senate proceeded to the consideration of the conference report.

The VICE-PRESIDENT. The question is on agreeing to the report.

Mr. CLARKE of Arkansas. Mr. President, the report is presented in what is probably the usual form. For instance, it says that the Senate recedes from amendment No. 25 and that the House recedes from amendment No. 26. The conferees may understand perfectly well what that means, but it is of the essence of legislation that those whose concurrence is necessary to make it law should know what they are doing.

I ask that the items disposed of in conference be indicated in connection with the numbers by which they are identified in the arrangement perfected by the conference committee, so that we may know what the Senate has a right, I think, to know, what the Senate is called upon to agree to.

I want an intelligent understanding of the report, not with any view of resisting it, because I am satisfied the conferees have displayed their usual conscientious sense of what is right. I have no reason to believe that they have departed from it on this occasion, but I think we ought to know what we are doing. I do not know what amendment No. 25 is. The Senate does not number its amendments. That is an arrangement perfected after the bill leaves this Chamber, and we should know what we are called upon to ratify when the report is presented here.

I have always believed that this is an unfair method of making a report, but my judgment is based on an experience so limited that I do not feel at liberty to attempt to make my view upon the matter the general rule. However, I make no question of the fact that there comes a time when we ought to know what we are doing. An amendment may relate to a matter of salary; it may relate to a matter of some disputed question of appropriation to which there may be objection here.

In order that we may vote intelligently upon the adoption of the report, as we ought to know what we are voting upon, I ask that the Secretary identify each amendment.

The VICE-PRESIDENT. The Secretary will state the amendment.

The SECRETARY. First, that the Senate recede from amendment numbered 14:

Page 19, after line 10, insert: "For one typesetting machine, $3,700."

Second, that the Senate recede from amendment numbered 16:

Page 19, after line 10, insert: "For one paper-cutting machine, $700."

The Senate also recedes from amendment numbered 18:

Page 19, after line 10, insert: "For closets for stock, and office furniture, $600."

The Senate also recedes from amendment numbered 20:

Page 25, line 5, after "all," insert: "For expenses of the Board of Visitors and."

The Senate also recedes from amendment numbered 26:

Page 30, after line 2, insert:
For beginning the development of the general plan for landscape improvements of the West Point Military Reservation, designed under contract by authority of the Secretary of War, $2,500.

Mr. SCOTT. I think the Senator will notice now that we used great economy. In all the amendments the Senate conferees receded from there was a saving of money to the Government. I hope now he will allow the conference report to come to a vote.

Mr. CLARKE of Arkansas. I have no objection, because it has received the indorsement of the conferees of the Senate and House. I only wanted to know what we are doing.

The VICE-PRESIDENT. The question is on agreeing to the report.

The report was agreed to.

BUILDING ASSOCIATIONS IN THE DISTRICT OF COLUMBIA.

Mr. GALLINGER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 6055) to amend section six hundred and ninety-one of subchapter seven, building associations, of the Code of Law for the District of Columbia, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House numbered 1, and agree to the same with an amendment as follows:

Strike out the words "one hundred" in line 4 of said amendment and insert in lieu thereof the words "two hundred and fifty," and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered two, and agree to the same with amendments as follows: Page 3, line 5, strike out all after the word "act" down to and including the word "act" in line 7, with amendments as follows: On page 3 of the bill, in lines 4 and 5, strike out the words "except corporations organized under and availing themselves of the privileges of this act;" and in line 10, after the word "act," insert the following: "*Provided*, That building associations heretofore organized and in actual operation before the passage of this act need not be incorporated;" and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered three, and agree to the same with amendments as follows: Strike out the words "the District of Columbia or," in line 3 of said amendment, and insert in the same line, after the word "Territory," the words "except the District of Columbia;" and also strike out the word "twenty," in line 11 of said amendment, and insert the word "ten;" and the House agree to the same.

J. H. GALLINGER,
W. P. DILLINGHAM,
THOMAS S. MARTIN,
Managers on the part of the Senate.

S. W. SMITH,
J. HAMPTON MOORE,
J. DAVIS BRODHEAD,
Managers on the part of the House.

The report was agreed to.

ESTIMATES AND APPROPRIATIONS.

Mr. HEMENWAY. Mr. President, in my four years' service in this body I have not occupied much of the time of the Senate in debate. I think, however, that at this time I owe it to Congress to make a brief statement as to appropriations for the last seven years. I would have prepared the statement covering a longer period had my time not been so completely taken up in performing the many duties assigned to me.

The press of the country, in view of the alarming deficit which the Treasury reports show from day to day and month to month, is filled with editorials criticising Congress for its extravagance, and, with no defense made by Congress, the people of the United States are led to believe that Congress alone is responsible for the large appropriation and expenditure of money.

I show by the statement which follows that Congress in the last seven years reduced the estimates sent to us by the Executive over $274,000,000.

Mr. CLARKE of Arkansas. Will the Senator read it? I should like to hear it.

Mr. HEMENWAY. It is a short statement. I will read it.

Estimates for expenses of the Government submitted to Congress by the Executive, including supplemental and deficiency estimates, and appropriations made thereunder for the fiscal years 1903–1910.

Year.	Estimates.	Appropriations.	Reduction of estimates.
1903 [a]	$826,478,318.47	$800,624,496.55	$25,853,821.92
1904	765,456,776.30	753,058,506.02	12,398,270.28
1905	830,974,206.79	781,172,375.18	49,801,831.61
1906	835,260,367.21	820,184,634.96	15,075,732.25
1907 [b]	907,144,696.87	879,589,185.16	27,555,511.71
1908	943,190,643.68	920,798,143.80	22,392,499.88
1909	1,079,449,288.96	1,008,397,543.56	71,051,745.40
1910 [c]	1,100,000,000.00	1,050,000,000.00	50,000,000.00
	7,287,954,298.28	7,013,824,885.23	274,129,413.05

[a] Includes $50,130,000 in estimates and appropriations for purchase and to begin construction of the Panama Canal.
[b] Includes $26,348,281.40 submitted in special document for the Panama Canal.
[c] Estimated.

I invite the attention of the country to this table, which is an accurate statement as to estimates received by Congress and appropriations made. It shows the facts, and although the estimates were not reduced to the extent many of us wanted, Congress has not added to its popularity with the people by the reductions it did make, for on the whole the people have been with the Executive in urging that all recommendations of the Executive be carried out.

I do not make this statement in a spirit of criticism, but to put before the country the facts. If Congress had not stood against the pressure brought by both executive departments and by citizens, in place of having to-day a cash balance in the Treasury, which I admit is rapidly melting away, we would have been compelled to issue bonds to pay running expenses.

I hope the people of the United States will turn from the sensational headlines long enough to read this statement of facts, and when additional taxes are levied, which the people

will have to pay, they can understand that Congress is not wholly at fault. The Member of Congress, whether in Senate or House, who serves upon the committee having in charge an appropriation bill and performs the unpleasant duty of saying "no" to the demands of the executive department of the Government, does not have a pleasant duty to perform. He is not complimented in the headlines of the newspapers. He secures the ill will of the executive department and often of his colleagues by having to stand against their requests.

REVISION OF THE PENAL LAWS.

Mr. HEYBURN. Mr. President, I move that the Senate proceed to the consideration of the conference report on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

Mr. CLARKE of Arkansas. I make the point of order that there is no quorum present.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Cummins	Hemenway	Paynter
Beveridge	Daniel	Heyburn	Perkins
Borah	Dick	Kean	Richardson
Brandegee	Dillingham	Kittredge	Scott
Briggs	Dixon	McCreary	Simmons
Brown	Frazier	McCumber	Smith, Md.
Burkett	Frye	Martin	Smoot
Carter	Fulton	Milton	Sutherland
Clapp	Gallinger	Money	Teller
Clark, Wyo.	Gamble	Nelson	Tillman
Clarke, Ark.	Gary	Nixon	Wetmore
Culberson	Gore	Owen	
Cullom	Hansbrough	Page	

The VICE-PRESIDENT. Fifty Senators have answered to their names. A quorum of the Senate is present.

The question recurs on the motion of the Senator from Idaho [Mr. HEYBURN].

Mr. CLARKE of Arkansas. Mr. President, I rise to a point of order—that the motion is not in order at this time under the second subdivision of Rule VII. I understand that our meeting this morning was the result of an adjournment instead of a recess; and in connection with that point, I call the Chair's attention to this language of the rule:

2. Until the morning business shall have been concluded, and so announced from the chair, or until the hour of 1 o'clock has arrived, no motion to proceed to the consideration of any bill, resolution, report of a committee—

I take it that a conference report is a report of a committee in the sense of this rule—

or other subject upon the calendar shall be entertained by the presiding officer unless by unanimous consent.

The VICE-PRESIDENT. The Chair thinks the point of order is not well taken and that the rule cited by the Senator from Arkansas does not apply to the consideration of a conference report. Nothing is in order but a vote upon the motion of the Senator from Idaho.

Mr. CLARKE of Arkansas. I call for the yeas and nays on the motion.

The VICE-PRESIDENT. The Senator from Arkansas demands the yeas and nays.

The yeas and nays were not ordered.

The VICE-PRESIDENT. The question recurs on the motion of the Senator from Idaho, that the Senate resume the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

The motion was agreed to.

The VICE-PRESIDENT. The Secretary will resume the reading of the conference report.

Mr. CLARKE of Arkansas. I ask unanimous consent to dispense with the further reading of the report.

The VICE-PRESIDENT. The Senator from Arkansas asks unanimous consent that the further reading of the report be dispensed with. Is there objection?

Mr. CLAPP. Mr. President, if we should do that now as to the remainder of this report, it would leave the Senate in the same dense ignorance as to its contents in which we found ourselves yesterday when the Senator from Arkansas was so anxious to have the report read.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Arkansas [Mr. CLARKE]?

Mr. ALDRICH. Mr. President, I hope that the reading will be dispensed with, and I shall be very glad to have the Senator from Arkansas [Mr. CLARKE] express to the Senate his reasons for his opposition to this measure.

The VICE-PRESIDENT. Without objection, the further reading of the conference report will be dispensed with.

Mr. HEYBURN. I ask for the adoption of the report of the committee of conference.

The VICE-PRESIDENT. The question is on agreeing to the conference report submitted by the Senator from Idaho [Mr. HEYBURN].

Mr. MONEY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Arkansas yield to the Senator from Mississippi?

Mr. CLARKE of Arkansas. I yield to the Senator from Mississippi.

Mr. MONEY. Mr. President, I object very much to the reenactment of section 24 of this bill, which I will ask the Secretary to read. It is the section which prohibits any officer to carry troops or marines to any voting place, except to repel armed enemies or to keep the peace.

The VICE-PRESIDENT. The Secretary will read section 24 at the request of the Senator from Mississippi.

The Secretary read as follows:

SEC. 24. Every officer of the army or navy, or other person in the civil, military, or naval service of the United States who orders, brings, keeps, or has under his authority or control any troops or armed men at any place where a general or special election is held in any State, unless such force be necessary to repel armed enemies of the United States or to keep the peace at the polls, shall be fined not more than $5,000 and imprisoned not more than five years.

Mr. MONEY. Mr. President, I can not believe that the Senate of the United States in the year 1909 intends to repeat anew the legislation of thirty-odd years ago. This act was passed in 1872 during the reconstruction period, when the North, represented by the Congress of the United States, was passing legislation, much of which was afterwards declared unconstitutional by the Supreme Court of the United States, much of which was extremely oppressive and unjust, much of which disregarded the civil rights of the country, because the military influence was then paramount, much of which legislation was especially humiliating and injurious to the southern section, which, although peace had spread its wings over a battle-ravaged section, marked by lonely chimneys and many graves, when such legislation was not only unwise and unconstitutional, but extremely vindictive in its character and punitive in every respect to a people who had surrendered their arms, and which expressed not the wisdom nor the patriotism of the country, but simply the resentment and the desire to punish those who had been traitors, as was said, to the Constitution and the Union. It is painful to any reader of our history to go over the legislation of that unfortunate period. It was as disgraceful to the North as it was humiliating and hurtful to the South.

In spite of everything, the South, by its natural resources and the independence and unconquerable will of its people, by their sustained purpose and all those qualities which have adorned the highest type of manhood anywhere in the world in all the annals of human history—in spite of it all, the southern people rose at last and asserted themselves, regained their own government, and are back to-day in the house of their fathers.

While there may have been some excuse then for men who had gone through the trials of four years of bloody struggle, there is no excuse to-day for politicians, who have seats in this body, to endeavor, for any purpose whatever, to revive this archaic legislation, which was a disgrace at the time at which it was passed, and which would cast a blot upon the fair fame of this Congress if it should be repeated to-day.

Now, it may be said——

Mr. BEVERIDGE. May I ask the Senator a question?

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Indiana?

Mr. MONEY. Certainly, I yield to the Senator.

Mr. BEVERIDGE. Are the sections of the conference report to which the Senator now refers already on the statute book?

Mr. MONEY. I am very glad the Senator asked me that question. The Senator is very much like Falstaff. [Laughter.]

Mr. BEVERIDGE. Not in every particular.

Mr. MONEY. Oh, no; in only one. Falstaff said he was not only a witty man, but he was the cause of wit in others. The Senator from Indiana is not only very intelligent and vivid in his mental processes, but he awakens the intellectual processes of other people.

Mr. BEVERIDGE. Thank you.

Mr. MONEY. And I am very much obliged to him for a new start.

Well, Mr. President, this provision is in the statute book, and it will be in the statute book whether this bill fails or not. So nothing will be lost in this particular respect if the bill should fail of passage.

Mr. BEVERIDGE. I want to ask another question, with the Senator's permission.

Mr. MONEY. Certainly; the Senator may ask as many questions as he pleases.

Mr. BEVERIDGE. I will ask the Senator one more question.

Mr. MONEY. Do not cut yourself off. I will extend your time. [Laughter.]

Mr. BEVERIDGE. I ask the question—and I am much obliged to the Senator—then, if the bill should be enacted, it does no more than what is already on the statute book; it enacts no new laws upon this particular subject; and, if the Senator from Mississippi succeeds in defeating it, he has still accomplished nothing, because it is still on the statute book.

Mr. MONEY. Mr. President, it is quite evident that everything depends on the point of view. It is said that no two people in the world see the same rainbow, because from each of several points of view the sun reflected upon the falling drops of water reflects different prisms of light and color.

I have been endeavoring to say ever since I took the floor—and I thought I had the attention of the honorable Senator from Indiana, but evidently he was not paying attention to me at all——

Mr. BEVERIDGE. Yes; I listened carefully.

Mr. MONEY. Then, you did not understand me; and it is not very often that so acute an intelligence as that of the Senator from Indiana needs a statement twice repeated; but I will go over it again, although I want to get on.

The point in this matter is not particularly whether the law stays in or goes out, but that this Congress, at this late day, after the passions and the tumults and the noise and the shouting of captains and the dust have settled and passed away, in a moment of calm reflection, with a reunited country, with the restoration of good feeling, when every section of this country—my State as well as others—is pouring its contingent into the capital to witness the inauguration of a man elected by the Republican party, and a Northern man, to the Presidency of the United States, with the utmost good feeling for him and the kindest wishes for his successful administration, the Congress here wants to reenact legislation born of a vindictive desire to punish somehow or other the so-called "traitors" of the South. That is the objection. It matters not whether this bill passes or fails, this legislation remains upon the statute books. But what is the good unless it is to endeavor to hammer into us what I believe is unconstitutional legislation?

I want to say, Mr. President, that, so far as I am acquainted, there is not on the face of this planet a solitary free people who permit troops to be at the polls at all. If I am wrong, I am willing and would be glad to be corrected.

I know that in Great Britain, from which we take our laws, our customs, our speech, and our thought, and of whose blood we are proud—to-day the greatest administrative and executive nation that ever flourished in all the annals of time—so well do they preserve their liberties that King Edward to-day is the greatest sovereign that ever existed. His dominion spreads over one-fifth of the land surface of the globe. His subjects number 410,000,000. He has more Mohammedans in his Kingdom than there are in all the balance of the earth. He has almost all of the Brahmins there are in the world. He has Buddhists by the hundreds of thousands and millions; he has Christian people everywhere; and Africans with a hundred unknown fetishes and gods; and he manages, with the little military base of a few islands between the German Ocean and the Atlantic Ocean, to keep them all in subjection, not by force of arms, but by the justice of the laws and the equity of their administration. They will not permit a soldier to be at the polls under any pretext whatever—not to resist armed enemies of Great Britain; not to keep the peace at the polls; not under any consideration. On the contrary, Mr. President, even when the polling is taking place in a garrison town of Great Britain, the garrison must march out and remain 2 miles from the polls for two days while the election is going on, for fear that the military power may somehow assert itself as paramount to the civil authority. Great Britain believes that by the processes of her courts, by her constabulary, by the sense of obedience to her just and wise laws, she can preserve peace at the polls without the intervention of the bayonet.

Here in this great Republic, whose proud boast it is that it is of, for, and by the people, where we are going on the assumption—sometimes quite a violent one, it is true, but still upon the assumption—that we are capable of governing ourselves without soldiers, that the ballot is the mighty instrument that speaks the freeman's will, and that its representatives here and in the other House are simply to voice what the people themselves, the sources of all authority, shall declare to be the law, we can secure our liberties by a declaration at the polls, protected only by the courts of the country executing the laws passed in pursuance of the Constitution.

Mr. President, I have a vivid recollection of having once gone to the polls in my little village in Mississippi to vote, and I found a soldier on each side of the ballot box with bayonets crossed. I turned and went away; I did not vote; and I want to say that it was the only day in the history of that town that they had any election riot, and that was because the soldiers were at the polls. In 1876, when it seemed that the possibility of the administration of this Republic was hanging in the balance, that wise, magnanimous man and great captain, General Grant, would not send troops to South Carolina, Louisiana, and Florida, when the Republicans there begged him to send them. He said: "We have had too much of this thing of soldiers at the polls. Let the people themselves manage their own affairs.

Mr. TILLMAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from South Carolina?

Mr. MONEY. Certainly.

Mr. TILLMAN. To what election does the Senator allude?

Mr. MONEY. I allude to the election of 1876.

Mr. TILLMAN. The Senator is entirely mistaken, so far as South Carolina is concerned, because we had a brigade of troops sent to South Carolina in 1876. There were at the precincts in my county a thousand troops. One regiment was sent to Edgefield. I will tell you about it after a while.

Mr. MONEY. Tell it right now, because I want to hear it.

Mr. TILLMAN. It would take too long. I want you to go on. You are making a logical, forceful, and eloquent speech; but I am going to tell all about the negroes of this country after a little while.

Mr. MONEY. I am always glad to be interrupted by the Senator from South Carolina. It is true that his manners have not that "repose" which marks the caste of Vere de Vere.

Mr. FORAKER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Ohio?

Mr. MONEY. Certainly.

Mr. FORAKER. I just came into the Chamber in time to hear the statement of the Senator that General Grant, while President of the United States, declined to send troops to many of the Southern States to enforce the rights of citizens at the ballot box.

Mr. MONEY. No; I did not say any such thing. I beg the Senator's pardon.

Mr. FORAKER. Was not that the Senator's statement?

Mr. MONEY. No; I did not say that.

Mr. FORAKER. That is as I understood it.

Mr. MONEY. The Senator is entirely mistaken.

Mr. FORAKER. And if I am correct in my understanding, in defense of the memory and public record of General Grant, I want to say that the Senator is mistaken.

Mr. MONEY. No; I am not mistaken, because I did not say what the Senator thinks I did.

Mr. FORAKER. I said "if I correctly understood the Senator." What was it he said, if he will be kind enough to inform me?

Mr. MONEY. There is no trouble about repeating it. I said, when General Grant was asked to send troops down there he declined to do it. I did not say to prevent people being deprived of their right to vote, but to prevent people having the right to vote. They were white people. The troops were to be sent down to see that nobody but negroes should vote. That it what they wanted with them, and I said he refused to send them.

I am corrected by my friend from South Carolina [Mr. TILLMAN] as to his State. I am always glad to be interrupted by the Senator from South Carolina, because he generally knows what he is doing, and he is always in earnest.

He is a little bit explosive, but he is always in dead earnest and means what he says. I did not know, however, that I was mistaken as to that. I know that the demand was made in Mississippi, and it was declined; and I understood the same demand was made from Florida and Louisiana and declined; but I am willing to be corrected on that or anything else. I want to say further that I do not want anybody here to suppose that I have declined to be interrupted or corrected. I have no desire in the world to keep on repeating my mistakes. I want to correct them. I now want to say further that I am not only willing to be corrected as to the facts, but if there is any fault in my argument I would like also to be corrected as to

that. I will consider it as a personal favor to me, for if I am mistaken, I want to know better.

If I am right, thy grace impart,
Still in the right to stay;
If I am wrong, oh teach my heart
To find that better way.

That is part of "The Universal Prayer" of Alexander Pope, which is the best summing up of the creed of a Christian in the world.

Mr. President, the elections are held by the several States of this Union; they are held under their laws; and while it is true that in the election of Representatives Congress has a right to alter or amend, and so forth, still the elections are held under state laws. That has been well established by the decision in the case of Seybold, I believe it was, in Maryland, by the Georgia case, and by I do not know how many others. There is no doubt about that; and elections are held now by the States under the state laws. They are no longer held by marshals of the United States nor by officials appointed by any executive officer of the United States; they are held by the States themselves; and, according to the Constitution, troops can not be introduced into a State unless at the demand of the legislature, or of the governor if the legislature is not in session. That is well acknowledged; it has been thrashed out many times by the Supreme Court of the United States; and it ought never to have been questioned for a single *moment*, because the reasoning is so clear from the mere reading of the text that it is unnecessary, it seems to me, ever to dispute the matter or carry it to any court.

If there should be a disturbance at the polls, the State is quite sufficient to put it down. It has its constabulary, its executive officers, and all the machinery of the courts. The processes of the courts are uninterrupted everywhere, and the man who makes any trouble at the polls will be punished as he deserves and as the law directs. I do not suppose there is a Senator here who doubts to-day, whatever might have been the case in 1872, that every sovereign State in this Union is quite able to carry out her own laws and protect her own ballot boxes. Even if the Congress of the United States should change its laws so as to provide for holding these elections by their own marshals, their own judges, and their own registrars of election, would they have any use for soldiers at the polls? Is not the civil authority quite sufficient for a civil action, for a civil process, for a performance by a citizen of a civic function? Are the people incapable, in other words, of governing themselves? Are we to have a militarism implanted upon this broad and solid foundation of popular liberty that has been laid in the bone, cemented by the blood of our ancestors, and consecrated by the tears and prayers of the noblest women God ever made in the world? Have we become so degenerate that in times of profound peace, with the passions of controversy, it was hoped, laid forever, this old legislation is to be repeated to remind us that there is still somewhere in the Senate of the United States and in the House of Representatives a feeling that makes it necessary to have soldiers interfere with the elections?

Now, of course there has been, can be, and there is going to be a great deal said about the frauds practiced at the ballot box. I heard a speech delivered here by a distinguished Senator concerning an election in Mississippi, and I had the satisfaction of answering him and showing that there was not a single correct statement from the beginning to the finishing of it. It dealt with instrumentalities unknown to our law which he imagined to be there. He seemed to have got information from the newspapers, and they seemed to know nothing about it, any more than he did.

Mr. President, there always will be frauds wherever there is a poll of the people's vote. There will be frauds everywhere in the legislatures of this world, I care not how honorable they may be. There will be frauds in executive places. There were frauds in one of the greatest monarchies of this world that caused one of the most bloody and disastrous wars that that country ever experienced in the history of its existence. The frauds go on just like all the various social sins go on—reprehensible, condemned by everybody, yet as ineradicable as any one of the vices that are in the blood of humanity. You can not go too far back to escape the history of the ballot-box frauds, and you can not by your ken penetrate the future far enough to imagine the condition of a country where there will not be any more cheating at the ballot box.

I recollect now, as others will also, that in one of the magnificent and grand trilogies of Æschylus, the greatest dramatic poet that ever yet has existed—I believe it was in the Eumenides, the last one of that great trilogy involving the fate of Agamemnon, Orestes, Clytemnestra, and Electra. Orestes, you recollect, was the son of Agamemnon, the leader of the Greek forces against Troy.

As I recollect that great tragedy—it has been a good while since I read it—Agamemnon, the King of Argos, at the siege of Troy, returned after ten years to his home. He found his queen, Clytemnestra, on the throne with a paramour. The day he got home she murdered him in the bath. Her son, Orestes, fled the country. He wandered up and down through Asia Minor and Greece, discontented with himself and his fate, and suffering everything but quiet. One of Longfellow's most beautiful poems begins:

Peace, peace, Orestes-like, I breathe the prayer.

At last he went to the oracle of Apollo at Delphi, and the Pythian priestess told him he would have no peace until he slew the slayer of his father. Obeying the command of the gods, he returned and slew his mother.

The Furies, whose duty it was to bring men to punishment for their crimes, prosecuted him for matricide. Pallas, the goddess of wisdom, intended to judge the case. The Erinyes objected, because the goddess had never had a mother. The old tradition is that Jupiter felt a pain in his head, and Vulcan, the blacksmith, cut open his head with a sharp ax and Pallas sprang forth full-armed. Pallas admitted that the plea was good to her jurisdiction, that she had a father but no mother, and could not feel as others felt the guilt of a matricide. A jury from Athens, a great jury of many hundred people, the wisest people, was assembled to hear and judge the cause. The Elder of the Furies prosecuted the case. She dwelt upon the horrors of the crime of matricide, of the unfailing fertility of the mother's heart to sacrifice itself and herself, her whole life of self-abnegation, the tenderness, the solicitude, the suffering for the sake of the boy who at last turned his hand and slew her, and the chorus put in its declaration against such a crime. Apollo defended the case, as I recollect, and said: "This culprit came to my oracle and was commanded to do what he did, and that is sufficient. But in addition he has offered propitiatory sacrifices to me, and he is acquitted of all guilt, because he followed the oracle of my shrine." After all that the votes were put in an urn, after the manner of the Greek people. They put pieces of paper in a great urn, and when they were about to be counted out, Apollo said: "Guard carefully the ballots as they fall from the urn lest there be a fraud in the count."

This shows that ballot-box stuffing was indulged in a long time ago. Æschylus wrote four hundred and fifty years before the Christian era, and the scene of this transaction was a thousand years before the day of Æschylus, even if we have any correct history of that time. Homer, who gave the history of the Trojan war and the deeds of Agamemnon, wrote eleven hundred and fifty years before that. So you see, Senators, we have had frauds coming on down as far as we have any record of a vote, and we are going to have them extended to the furthest future until our planet disappears from the solar and astral system.

I recollect a very distinguished man, the presiding officer of this body, known everywhere for the affluence of his eloquence and his knowledge, his brilliant rhetoric and keen wit, who said here once that purity in politics was an "iridescent dream." I do not subscribe to that, but if you expect to have an absolutely pure ballot, it will be after the millennium has come and the men of this country saints or angels—the elect.

Mr. FORAKER. If I may, I inquire whether the Senator was about to conclude.

Mr. MONEY. No; not by any means.

Mr. FORAKER. Then I should like to ask the Senator a question.

Mr. MONEY. As many as you please. I always like to indulge my friend the Senator from Ohio.

Mr. FORAKER. It is a question I should like to have answered by somebody who can speak, by somebody as a representative, as the Senator is, of the South and of southern men, especially of his political affiliations. The question I should like to have him answer, if he can do it readily, for I do not want to divert him from his argument——

Mr. MONEY. It is no diversion at all.

Mr. FORAKER. The question is, What is the solution of the race problem that the people of the South want, if the Senator can state it? I speak with reference to the political rights of the colored men of the South.

Mr. MONEY. Of course I always listen with great respect to any question from my distinguished friend the Senator from Ohio, and I will diverge from my line of argument to answer his question briefly. But it was not at all in point, for I am speaking now of the law passed in 1872, stationing troops at

the polls to preserve the peace. It has not occurred to a single man in the last thirty years that such a thing could or should be done. But I will answer him if he desires.

Mr. FORAKER. If the Senator will indulge me for a moment, I do not know what particular question the Senator was discussing. I came in the Chamber a few moments ago, when the Senator was in the midst of his argument, and I have not learned what caused him to take the floor. But I have been listening with great pleasure to the Senator, as I always do.

Mr. MONEY. I thank you for the compliment.

Mr. FORAKER. It may be that the law the Senator mentions is not necessary any longer. It may be it never was necessary. But that is not what concerns us. We frequently discuss here what is not really before the Senate. Therefore I apologize to the Senator for causing a diversion. I should like some man to tell us what is the solution of this problem that the South would like to work out; and the importance of that—I will be frank about it—is in the fact that I saw it stated in the newspapers a few days ago that a very distinguished Republican had announced that he had come to the conclusion—I am not trying to quote his exact language—that the people of the South understood this question better than the people of the North, and because of that fact it was the duty of the North to stand aside and let the people of the South work out a solution of it.

I should like to know, before I commit myself as a Republican to that proposition, what is the solution the people of the South want to work out; and if that causes the Senator to digress, I beg his pardon, and I will ask the question at another time. But if at any time before he takes his seat he can answer it, I shall be obliged to him.

Mr. MONEY. It is entirely unnecessary for the Senator from Ohio ever to apologize for interrupting me.

Mr. FORAKER. Thank you.

Mr. MONEY. In the first place, the good feeling between us is so great that I never consider any interruption from him as anything but a personal favor to myself for having attracted his attention.

Mr. FORAKER. If the Senator will allow me, I have no feeling whatever about this matter.

Mr. MONEY. I understand that. I know very well the Senator is considering the whole race question from a purely academic point of view.

Mr. FORAKER. I should be glad to have the Senator's view on that question. I have no feeling about it, and the question is not asked in any controversial sense.

Mr. MONEY. I am perfectly willing to give my views. I was not about to do so, but I will if the Senator desires it.

Mr. FORAKER. I will take the liberty of reminding the Senator again as to the political status of the colored race.

Mr. MONEY. I understand. As to the utterances of the distinguished gentleman—I suppose the Senator refers to the President-elect, Mr. Taft, from some speeches made by him lately—I was disposed to treat the utterances of the President-elect with very kindly consideration.

Mr. FORAKER. I want to say, since mention has been made, that I did not do that. I have not any question that President-elect Taft desires to do what is right and just——

Mr. MONEY. I think so.

Mr. FORAKER (continuing). For the whole country and all the people in the country; but he has announced, if the newspapers have correctly reported him, a very important proposition, and it is one about which, now that it has been thus announced, I for one should like to be informed.

Mr. MONEY. I hope the distinguished Senator from Ohio will not judge our new President by anything he may see in the newspapers about him.

Mr. FORAKER. I do not. I said I saw it in the newspapers. I do not know whether it is true.

Mr. MONEY. We see so many things in the newspapers which torture our credulity that we can not take every one except cum grano salis.

Mr. FORAKER. That statement appeared in the newspapers, and it has not been contradicted.

Mr. MONEY. It has not been. It is "nuts" for newspaper men to get into a controversy with a public man. For instance, I saw the other day, in a Philadelphia newspaper, one whole page covered by a lurid cartoon headed "The dangers that confront President Roosevelt in Africa." The picture below represented two white men with beards, with helmets on, and guns in their hands, and a naked negro was between them and the tiger—a royal Bengal tiger, about 25 feet long, judging by the height of the men, with his tawny skin and symmetrical stripes, crouched in the rushes. That shows how accurate the newspapers are.

I would think the President has fallen into the newspaper error, if I can believe the newspapers—which I do not. The President of the United States said he was going to Africa to shoot lions and tigers, and he said in his note to the Smithsonian Institution that they would miss a rare chance if they did not get up an expedition to take him there and to get the spoils of his bow and spear, because, he said, he was a "faunal naturalist." That is the way he has labeled himself. If Ithuriel's spear would touch the label, the truth would appear a faunal humbug, because there never was a tiger in Africa and there never will be until some one catches one and puts him in a cage and carries him there. The tiger is strictly an Asiatic beast, although the bones of the tiger, as naturalists say, have been found in America and Europe. But he is purely an Asiatic beast, and is almost exclusively confined to the region south and west of the Hindu Kush range of mountains. But, of course, the newspaper man does not know anything about that. He only takes what he saw in another newspaper about what the President said, and I have no idea the President has said anything of that sort. He knows very well, if he is a "faunal naturalist," that there is no such thing as a tiger in the whole of Africa. If you want to talk about the negro, the other part of Africa——

Mr. FORAKER. We will assume that newspaper statements are not always correct. We have had experience to that effect. I should like to know, then, without regard to the statement to which I refer, what the Senator thinks.

I understand there is objection to this proposed legislation; that the Senator does not want the negro to be allowed to sit on a jury. I understand that he does not want any of the legislation that is found in the chapter under consideration, on the statute books now, to be reenacted. There is no proposition to add new legislation. But the Senator, before he will accede to the adoption of this penal code, wants all that stricken out because of its bearing upon the negro. Now, without regard to those particular and specified objections, I want to know in a general way, simply and briefly, what the solution is.

Mr. MONEY. I will not follow an illustrious example and say that the Senator from Ohio would deliberately and maliciously misrepresent me, because he would not. I have not said that all the provisions should be stricken out. I have addressed myself only to the twenty-fourth section, about troops at the polls. That is the only section about which I have been concerning myself.

Mr. FORAKER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Ohio?

Mr. MONEY. Certainly; just as much time as the Senator wants, and as many questions as he desires to propound.

Mr. FORAKER. I did not mean to include the Senator's objection to anything to which he had not objected.

Mr. MONEY. Not at all.

Mr. FORAKER. He objected to all of it. Some one here told me that his objections ran to the whole chapter. I will withdraw what I said in that connection——

Mr. MONEY. I do not want you to.

Mr. FORAKER (continuing). And just ask the Senator to answer the one question—What is it you want?

Mr. MONEY. I object to the Senator withdrawing anything. Whatever he says is well said and to the point, and, while he misunderstood me, yet we all misunderstand each other at some time. We hear of a man being absorbed by one idea, and intellectually dead to any other idea, and sometimes we wonder, when a man gets one idea, how awfully lonesome it must be by itself; and we sometimes wonder how, when some men get an idea at all in the head, it can live in the inhospitable desolation of scorched sand, sun-blistered rocks, and the wind-swept waste of that barren mentality. I do not mean so to classify my friend, because I know he is one of the strongest men in this body and he understands how I appreciate him.

He wants to know how I feel about the negro. I am not one of those people who affect indifference to great questions, nor have I any particular modesty about stating my position. I want to deal frankly with the Senator. I desire to say this, then, which I think will sum up what I think about it: In the first place, I want to say that I do not agree with President-elect Taft that this is a southern question, or a sectional question, or a political question—about the negro. It is as purely a national question as any that can possibly come up out of the pregnant womb of time. There can be to-day no greater question that can agitate the minds of the liberty-loving people of this country than this question. He mistakes when he thinks it is a southern question. I understand he also thought the southern people were dealing with it in the States, and they knew better what to do in their respective States than anybody outside of those States; and in that conclusion I hold that the President-elect is absolutely correct. I do not believe there is a citizen of any State in this Union who can speak so well for

the interests of any State as the inhabitants of that State can speak for themselves, and to deny this is to strike at the very root of self-government. To deny this is to destroy the central idea of this Republic, that self-government is best for all men.

We boast of our Anglo-Saxon blood. It is mixed, of course, with currents from a thousand streams, but it all comes from that central source in the high plateaus of central Asia, east of the Caspian Sea and north of the Hindu Kush Mountains. Waves of emigration came successively, one after the other, penetrating northern Europe, driving out the Turanians and leaving there the Fins, the Laps, the Samoyedes, and so forth, but in great part supplanting them. There came on wave after wave—the Teutons, the Goths, the Vandals, the Celts, the Cimbri, the Gauls, the Franks; and then the Greeks, pausing a while in the mountains of Phrygia, sent forth swarms of semimythical Pelasgians. We have blood of them all, and I believe it is the best composite of any in the world. It has been in the forefront of the civilization of this world. It has been the great inventor, the great legislator, the great administrative people of the world.

Now, of course, there are virtues in all the races of men. The Turanian had his particular specialty. He was a brave man, successful in mining and making tools of metal before our forefathers knew it. I say our forefathers—dating away back yonder.

We here in the United States came from the tribe which first went over and drove the inhabitants from Great Britain, and then spread over Ireland, Scotland, and Wales, and left in Wales and Scotland and Ireland almost untouched the primitive first people. But their blood is mixed with those from all along the southern shore of the Baltic, the Scandinavian blood, the Northmen who conquered Normandy and made it for hundreds of years the seat of refinement, education, and chivalry, that gave to the world the best people that ever lived on top of the globe. From those Teutons we got the idea of local self-government—that every community has a right to arrange its own affairs, untouched by any central government whatever, but getting together for great purposes of national import; for instance, for war. They elected their civil ruler, but when war was on hand they elected their war chief, and nobody said them nay. The characteristics of those people were their personal love of liberty, their high spirit of adventure, their willingness to take all responsibility, their ability to rise to the demand of every occasion, and one of the grandest features of it all was their profound respect and love for women.

No polygamy ever existed there. Their women were much respected and reverenced and were treated almost like goddesses. No important move was ever made in peace or war without first taking counsel with their wives. We have inherited that sentiment to the extent that no other modern people enjoy, in my opinion, and along with all these good qualities that came from all these races we are here, it is true, the composite of many streams, but all from the original fountain flowing out from the original Aryan home in Asia during the last five thousand years of history and for untold centuries beyond. But to-day we are here with their attributes still obtaining, with their high purpose still unfaltering, with their capacity for self-government, with their control of their individuality, and with their demand upon every government of which they have been a citizen that their individual rights shall be respected. And when such men as Sam Adams, of Massachusetts, who may be called the father of American independence; such men as Patrick Henry, of Virginia, the great orator of the Revolution; such men as Richard Henry Lee, of Virginia, objected to the provisions of the Constitution as framed by the convention, it was because, to use the language of Jefferson, it suffered the vital lack of a bill of rights, and the personal liberty of the citizen had not been guaranteed by that instrument. Hence followed the first ten amendments recommended by nearly every one of the thirteen States and adopted at the first meeting of Congress.

Mr. President, as I believe I remarked the other day, there is to-day going on among civilized peoples a most remarkable movement in two directions. According to my opinion, from what I can learn, in the first place, in every monarchy in the world within the pale of Christianity and outside of it, in the Turkish Empire, in the Persian Kingdom, and elsewhere, the people are demanding more rights and are getting them. The young Turks imposed a parliament upon the Sultan. The revolution forced a constitution from the Shah.

Every day we have been gaining in all the nations of the world great accessions to popular rights, and yet in this Republic and in the others that are copies of this the people have steadily been losing their rights to a usurping executive or legislative body. It has been a steady trend, almost without a break, begun through the exigencies in this country of a civil war, which taxed all the resources and energies of a great people, when it seemed necessary to yield popular right that the Executive might be unhampered in waging a war to preserve the territorial integrity of this Union. So what was only tolerated at first, became a matter of course until the old proverb "Give an inch and they will take an ell" was followed so rapidly that to-day we are about to end an administration in which the progress has been so rapid that it makes a man dizzy to notice it. We have commissions appointed, not by authority of law, but in defiance of law. We have letters from the Executive demanding that the expense of the publication of their reports, and so forth, shall be made without regard to the will of Congress or the wish of the people who pay the taxes for these burdens imposed without any authority of law. We have had all sorts of things that I will not name in the Senate, because they are hardly worthy of mention. But they are important, even though they are trivial, as showing the trend of things; and so this double movement is going on throughout the world: In monarchies—subjected people—they are claiming and gaining enlarged liberty every day, and a free people are losing it every day. This is not unnatural.

We live to-day in the most artificial form of government in the world. The natural form of human government is a pyramid, resting upon its broad base and going up to the apex, the sovereign. That is the strongest body known—the pyramid. But here we are all on the same level of equality and right, and we are to-day struggling with the common proverb "Eternal vigilance is the price of liberty," to maintain the heritage bequeathed to us by our sires. Are we to be successful? I doubt it, because no people on God's earth have ever yet achieved that success for any great length of time. Our one hundred and twenty-five years is but a span in the life of a great nation. While the Greeks and the Romans were a thousand times more devoted to liberty than we ever will be, we made sacrifices, we thought, and we fought for two or three years, not for liberty, but for representation in Parliament, for the representation that should accompany taxation. It was a representation that should accompany taxation as a first due to the taxpayer. We did not dream of liberty. You will find in the documents published by that Congress where, while the war was flagrant, an humble petition was made from the Provincial Congress to George III, signing themselves "Your Majesty's most humble, most obedient, and most respectful servants." In a few indomitable minds alone there burned the sacred love of liberty that would compromise at nothing except absolute national independence, and that fire permeated the mass and grew at last into the Declaration of Independence, written by a young man of Virginia 33 years old.

As I said, the Greek and the Roman loved his country better than we. It was the pride and glory of a citizen of any of the Greek republics or of Rome to die for his country. "To die for one's country is sweet and decorous," was an old Latin proverb. A man lost position and status because he failed in something he owed the republic. We would never have had that matchless history of the Peloponnesian war if Thucydides had been successful as an Athenian general in preventing the ravages of the island allies of Athens by Brasidas, the Lacedæmonian general, but because of lack of success the great military commander of the Greeks was banished. Aristides was banished, who was also surnamed "The Just." Æschylus, the great tragic poet, was banished; yet when he died abroad, a solitary exile, he wrote his own epitaph and, unmindful of the glories of his pen, of the undying laurels that clustered around his brow as a poet, he said in that epitaph: "Here lies Æschylus, who fought with the long-haired Medes at Marathon." His glory was, in that dying moment, that he had drawn his sword and fought for his country.

Yet those people lost their liberties. They were ruled by tyrants, and they did all they could to resist them, but it has seemed to be the inevitable fate of men who want to govern themselves that they can not long succeed.

I was pained to hear not long ago a most distinguished gentleman, soon to become an ornament to this body, declare in his speech of acceptance before his legislature that he was of the strict Hamiltonian school, and I was rejoiced when another one, who will take the place of our esteemed friend from Ohio [Mr. FORAKER], declared to his legislature that "the great object of your legislature to-day is to preserve the rights of your State. Mine as a Senator of the United States is to see that they are preserved."

Now, what did Hamilton seek? His plan was submitted, as you all know, to the convention that we should have a government as closely copied after that of Great Britain as possible, omitting the word "king." Rome did the same thing. The people would not hear of rex, because it reminded them

of Tarquinius Superbus and all the horrors of the early kings of Rome; but that wonderful man Octavius, called Augustus, at the age of 18 returned from school and formed a coalition that defeated the first triumvirate and then defeated his colleagues and became the master of Rome. He could not receive the title of rex, but he was thirteen times named consul and repeatedly imperator. So those people lost their liberties. "Eternal vigilance is the price of liberty," and its penalty is the loss of liberty.

I am laying a foundation for my answer to the question by this exceedingly brief and cursory retrospect of ancient history. No people on earth have ever been able to establish popular liberty. I have shown what it was under the most artificial form of government in the world—the most difficult to maintain—and consequently our form of government has not been imitated by nations who have any sort of capacity for achieving success, not because the theory was not good, but because the theory of government was too good. In other words, it is impracticable, just as that distinguished Chinese statesman and ambassador, Wu, in a celebrated letter written four years ago, stated why he was a heathen. He said:

There is no objection to Christianity as a theory, but as something practical it is entirely out of the question. We tried such a system in China five or six thousand years ago, but we had to get a philosophy that the people could live up to. No people ever obey the precepts of the Christian religion; the whole system is a failure. Theoretically it is all right, but practically it is a failure.

So it has proven heretofore with the government of the people by themselves.

Mr. TILLMAN. Will the Senator pardon me?

Mr. MONEY. Certainly.

Mr. TILLMAN. I do not know whether others are as deeply interested in this discussion as I am, but I know there is not a quorum in the Chamber, and I think we ought to have more Senators here to hear our learned friend, because he knows more about this question, perhaps, than any other man in the Senate or in the country.

Mr. MONEY. I hope the Senator will not call Senators in. All are here who want to hear me.

Mr. TILLMAN. We will bring the balance in for a time, anyway.

Mr. MONEY. I do not want any man to hear me who does not want to hear me. The most repugnant thing to a speaker is a reluctant audience. It is like—

A twice-told tale
Vexing the dull ear of a drowsy man.

I do not want an audience who do not want to hear me.

Mr. TILLMAN. A great many do not know that the Senator is speaking.

Mr. MONEY. I do not flatter myself that anybody wants to hear me now, but I want to answer the Senator from Ohio, if I have time.

Mr. TILLMAN. All Senators on both sides want to hear that. I do. I make the point that there is no quorum present.

Mr. HEYBURN. Mr. President, I make the point of order against the request of the Senator from South Carolina.

The VICE-PRESIDENT. The Secretary will call the roll.

Mr. HEYBURN. I should like to state my point of order. There has been no business transacted since the last call of the Senate.

Mr. MONEY. The Senator is mistaken if he thinks that my speech is not business.

The VICE-PRESIDENT. The Senator from Idaho is technically correct, but under the circumstances the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Curtis	Hemenway	Page
Bankhead	Dick,	Heyburn	Paynter
Beveridge	Dillingham	Kean	Perkins
Borah	Dixon	Kittredge	Piles
Brandegee	Dolliver	Knox	Richardson
Brown	Elkins	La Follette	Scott
Bulkeley	Flint	Lodge	Simmons
Burkett	Foraker	Long	Smith, Md.
Burnham	Foster	McCreary	Smoot
Carter	Frazier	McCumber	Stephenson
Clapp	Frye	McEnery	Stone
Clark, Wyo.	Fulton	McLaurin	Sutherland
Clarke, Ark.	Gallinger	Martin	Taliaferro
Clay	Gamble	Milton	Tillman
Crane	Gore	Money	Warner
Culberson	Guggenheim	Nelson	Warren
Cullom	Hale	Nixon	Wetmore
Cummins	Hansbrough	Owen	

The VICE-PRESIDENT. Seventy-one Senators have answered to their names. A quorum of the Senate is present. The Senator from Mississippi will proceed.

Mr. OWEN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Oklahoma?

Mr. MONEY. Certainly.

CARE OF DEPENDENT CHILDREN.

Mr. OWEN. I ask permission to present a little resolution providing for the printing of 5,000 copies of the report of the children's conference, if there is no objection.

Mr. KEAN. Let us hear it read.

The VICE-PRESIDENT. The Secretary will read the resolution.

The Secretary read the resolution, as follows:

Ordered, That there be printed 5,000 copies of the report of the conference on the care of dependent children (S. Doc. No. 721, 60th Cong., 2d sess.), of which 1,000 shall be for the use of the Senate and 4,000, of which number 500 shall be bound in cloth, shall be for the use of the conference.

Mr. KEAN. Is there an estimate accompanying the resolution? Should it not go to the Committee on Printing?

The VICE-PRESIDENT. Will the printing cost less than $500?

Mr. OWEN. The estimate shows that the cost will be less than $500.

The resolution was considered by unanimous consent and agreed to.

CONGRESSIONAL DIRECTORY.

Mr. KEAN. Will the Senator from Mississippi yield to me to make a report from the Committee to Audit and Control the Contingent Expenses of the Senate?

Mr. MONEY. Certainly.

Mr. KEAN. I am directed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred Senate resolution No. 308, submitted by the Senator from Florida [Mr. MILTON] on the 27th ultimo, to report it without amendment. Let the resolution be read.

The resolution was read, as follows:

Resolved, That the Committee on Printing be, and hereby is, authorized to have prepared and published an edition of the Congressional Directory for the use of Congress at its forthcoming extra session, copies of which shall be laid on the desks of Members within one week from the assembling thereof. And the Secretary of the Senate is directed to pay from the contingent fund for compiling, editing, and indexing the said edition the compensation usually allowed.

Mr. MILTON. I ask for the immediate consideration of the resolution.

The resolution was considered by unanimous consent and agreed to.

REVISION AND CODIFICATION OF LAWS.

Mr. KEAN. I am also directed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the joint resolution (S. R. 140) to create a joint committee to consider the revision and codification of the laws of the United States, to report it without amendment. I will ask the Senator from Idaho to make some explanation of the joint resolution.

Mr. HEYBURN. Mr. President, the joint resolution is similar to one that has been passed by both Houses at the end of each Congress ordering that the work authorized some years ago might be continued.

The work consists of the revision of the statutes of the United States, and I would say that the committee has proceeded with the work until perhaps three-fourths of it is now ready for consideration. I had an estimate from those engaged upon it which, I think, justifies me in saying that it can be finished by fall—along in September or October. It will depend somewhat on the amount of new business given to the committee by this Congress. The laws of this Congress will, of course, be written into the work when it comes in. It should all be ready to be reported at the next Congress. There will be written into the codification really all the law. The bill under consideration composes only a small part of this great work, and if the resolution is not passed and the committee continued, of course it would be a great loss to the Government. The work would necessarily have to be abandoned.

Mr. KEAN. I ask that the joint resolution be put on its passage.

The VICE-PRESIDENT. The Senator from New Jersey asks for the present consideration of the joint resolution.

Mr. CULBERSON. With the meager information I have, I object to its present consideration.

The VICE-PRESIDENT. Objection is made to the present consideration of the joint resolution, and it goes to the calendar.

Mr. KEAN subsequently said: The Senator from Texas [Mr. CULBERSON] objected to the joint resolution for continuing the commission on the revision of the laws. He withdraws his objection, I understand, and I ask for its present consideration.

Mr. CULBERSON. In order that I might inquire as to the status of the commission, which at one time was in existence to codify the laws, I objected to the consideration of the resolu-

tion. Understanding now that the commission is no longer in existence and that the committee of the two Houses are proceeding to the work formerly done by the commission, I withdraw the objection.

Mr. GORE. Mr. President, I desire to object.

The VICE-PRESIDENT. The Senator from Oklahoma objects to the present consideration of the joint resolution. It will go to the calendar.

EMPLOYMENT OF STENOGRAPHER.

Mr. KEAN, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported the following resolution, which was considered by unanimous consent and agreed to.

Senate resolution 322.

Resolved, That the stenographic services employed by the Committee on Printing upon matters referred to said committee be paid from the contingent fund of the Senate.

Mr. BURNHAM. Mr. President, I desire to present two conference reports.

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from New Hampshire to present a conference report?

Mr. MONEY. I yield for the presentation of a conference report.

PENSIONS AND INCREASE OF PENSIONS.

Mr. BURNHAM submitted the following report:

The committee on conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment to the bill on page 2, lines 7 to 11, inclusive.

That the Senate recede from its disagreement to the amendment of the House on page 3, lines 5 to 8, inclusive, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House on page 3, line 11, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House on page 4, lines 5 to 7, inclusive, and agree to the same.

HENRY E. BURNHAM,
CHARLES CURTIS,
JAMES P. TALIAFERRO,
Managers on the part of the Senate.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

The report was agreed to.

PENSIONS AND INCREASE OF PENSIONS.

Mr BURNHAM submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment on page 1, lines 6 to 9, inclusive.

That the House recede from its amendment on page 2, lines 1 to 4, inclusive.

That the House recede from its amendment on page 2, line 7.

That the House recede from its amendment on page 2, line 10.

That the Senate recede from its disagreement to the amendment of the House on page 2, line 14, and agree to the same.

HENRY E. BURNHAM,
CHARLES CURTIS,
JAMES P. TALIAFERRO,
Managers on the part of the Senate.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

The report was agreed to.

REFERENCE OF CLAIMS.

Mr. FULTON, from the Committee on Claims, reported the following resolution (S. Res. 320), which was considered by unanimous consent and agreed to:

Resolved, That the claims of John M. Jamieson (S. 105); John Whittington (S. 168); Thomas McCallister (S. 173); Henry R. Bryan (S. 267); Mary N. Bryan (S. 268); estate of James A. Suydam, deceased (S. 270); Orrin R. Smith (S. 454); I. J. Humphreys (S. 488); W. W. Wright (S. 743); estate of Edward N. Peyton, deceased (S. 744); estate of M. W. Garrison, deceased (S. 745); estate of Abraham Cassell, deceased (S. 746); heirs of Jacob Hufty, deceased (S. 812); heirs of George W. Hockensmith, deceased (S. 813); estate of Patrick Dooling, deceased (S. 1056); the State of California for arms, ordnance and ordnance stores, quartermaster's supplies, medical property, signal property, and other stores, supplies, and property belonging to said State and furnished by the United States and lost or destroyed in the city of San Francisco, State of California, in the earthquake of April 18, 1906, and the fire subsequent thereto (S. 1180); estate of Cyprian T. Jenkins, deceased (S. 1398); Joseph H. Fesperman (S. 1763); heirs and estate of Pierre C. Richard, deceased (S. 1960); Lucy A. Monroe (S. 1987); James W. Person and Isabella N. Person (S. 2025); William J. Briggs (S. 2074); Margaret Emma Brown, Kate D. Jarnagin, John Jacob Hubbard, and Georgia B. Teague, heirs of Mary J. Hubbard, deceased (S. 2117); Frances A. Lacy, heir of William B. Lacy, deceased (S. 2170); estate of James M. Hinton, deceased (S. 2318); W. C. Morgan (S. 2320); heirs of William Haynes Kilby, deceased (S. 2332); estate of Peter H. Knight (S. 2339); W. J. Winsett (S. 2367); Sally B. Sands, Charlie M. Sands, B. F. Sands, and A. T. Sands, heirs of Bird Sands, deceased (S. 2369); heirs of Harriet G. Woods, deceased (S. 2378); Mrs. Mercy C. Harvey (S. 2680); G. R. West (S. 2381); estate of Richard M. Harrison, deceased (S. 2776); estate of James L. Miller (S. 2831); Monroe Stevens (S. 2842); heirs and estate of George E. House, deceased (S. 2962); William S. Shaw (S. 2973); Bath Iron Works and others (S. 2983); William P. Watson, executor of Samuel Watson, deceased (S. 3183); Mahala C. Carter (S. 3506); Henry Snider (S. 3572); Alexander P. Hart, heir of Joseph Hart, deceased (S. 3575); estate of David Blackman, deceased (S. 3576); William Hodgson (S. 3793); Thomas L. How, heir of James J. and Isaac S. How, deceased (S. 4004); estate of David C. Hamill, deceased (S. 4038); estates of W. M. Purcell and Martha Purcell, deceased (S. 4040); estate of Zeno T. Harris, deceased (S. 4044); estate of John W. McKissock, deceased (S. 4162); heirs of Bethel A. Smith, deceased (S. 4254); heirs of Peter Johnson (S. 4318); heirs of Joseph Medina, deceased (S. 4343); trustees of the Methodist Episcopal Church of Middletown, Md. (S. 4372); Mrs. E. W. Williams (S. 4411); legal representatives of Sarah Henson (S. 4467); estate of William H. Fuqua (S. 4468); estate of James T. Gaines, deceased (S. 4501).

Heirs of Josiah White, deceased (S. 4636); Mary C. Turner, Frank C. Turner, Mattie C. Turner, Clifton Turner, and Katie Turner (S. 4769); legal representatives of Samuel A. Craddock (S. 5156); Old School Presbyterian Church of Helena, Phillips County, Ark. (S. 5168); Sarah A. Sutton (S. 5211); John T. Brickwood, Edward Gaynor, Theodore Gebler, Lee W. Mix, Arthur L. Peck, Thomas D. Casanega, Joseph de Lusignan, and Joseph H. Berger (S. 5228); heirs of Abner J. Leavenworth, deceased (S. 5243); estate of R. M. McClelland, deceased (S. 5353); James T. Dowdy (S. 5376); estate of Robert Pruitt, deceased (S. 5377); heirs and estate of J. R. B. Eldridge, deceased (S. 5381); John J. Curran in his own right and as sole heir of Murty Curran, deceased (S. 5575); estate of Elijah Lumpkin, deceased (S. 5638); estate of Robert Kirkley, deceased (S. 5835); estate of George Patten, deceased (S. 5841); Augusta W. Seely (S. 6172); E. W. and A. Cross (S. 6299); Edward McDevitt (S. 6695); heirs or estate of William Civiels, deceased (S. 6728); estate of Hardy H. Waters, deceased (S. 6881); Capt. Edward Cahalan and the heirs of Milton C. Espey, Edmund P. Wilcox, and Hampton L. Lee, deceased (S. 6904); Benjamin F. Harris (S. 6968); Charles A. Davidson and Charles M. Campbell (S. 6982); estate of John W. Anderson, deceased (S. 7085); William F. Gilluly for actual expenses incurred by him as a United States commissioner of the northern district of the Indian Territory while absent from his official headquarters on official business (S. 7213); trustees of Timber Ridge Presbyterian Church (S. 7477); heirs of Augustus and Christine Rich, deceased (S. 7545); Martha J. Sibley (S. 7708); Mrs. Mary Tullis (S. 7709); legal representatives of Burgess Hammond, deceased (S. 7753); estate of Hampton Hudgens, deceased (S. 7825); trustees of the University Street Primitive Baptist Church, of Nashville, Tenn. (S. 7826); estate of William P. Campbell, deceased (S. 7886); heirs of William W. Davis, deceased (S. 7887); heirs of Simon Rockwell, deceased (S. 7888); Lillie L. Penrod (S. 7891); estate of George W. Strallman, deceased (S. 7893); heirs of Nash L. Cox, deceased (S. 7902); heirs of James C. Conner, deceased (S. 8037); Third Presbyterian Church of Memphis, Tenn. (S. 8038); Abner Souder (S. 8041); heirs of G. W. Christenberry, deceased (S. 8044); estate of R. S. Simonton (S. 8074); Andrew J. Baker (S. 8117); Martin H. Avey (S. 8120); trustees of the Presbyterian Church of Stanford, Ky. (S. 8130); board of education of Versailles, Ky. (S. 8131); Laurel County, State of Kentucky (S. 8134); Scott County, State of Kentucky (S. 8135); Livingston County, State of Kentucky (S. 8136); Joseph Flewheart (S. 8161); William P. Trimble, surviving executor of Isaac R. Trimble, deceased (S. 8162); trustees of the First Presbyterian Church of Warrensburg, Mo. (S. 8168); Barry County, State of Missouri (S. 8169); Johnson County, State of Missouri (S. 8170); Newton County, State of Missouri (S. 8171).

Estate of Willis Allman, deceased (S. 8172); estate of Jesse Page, deceased (S. 8173); Andrew P. Shaw (S. 8182); Mrs. V. R. Davenport (S. 8221); heirs of Elizabeth Brinkley, deceased (S. 8236); heirs or estates of R. H. Groomes, James Cavert, and Obediah Hurt, late of the firm of Groomes, Cavert & Co., and others (S. 8237); heirs or estates of John Derryberry and Kiziah Derryberry, deceased, and others (S. 8239); heirs of W. W. Lemmon and Elizabeth Chinn Lemmon, deceased (S. 8240); heirs or estates of Joseph Leftwich and of Eliza Leftwich, deceased, and others (S. 8270); heirs or estate of Henry Doyle, deceased, and others (S. 8271); Sanger & Moody (S. 8278); trustees of the Morris Methodist Episcopal Church South, of New Kent County, Va. (S. 8296); heirs of James Y. Brame, deceased (S. 8423); estates of Samuel Brockman, P. H. Porter, and Frederick Klooz, deceased (S. 8463); estate of George H. Stovall (S. 8512); estate of William Duncan, deceased (S. 8513); Christian J. White, living, and the estates of James H. White and Elizabeth White, both deceased (S. 8514); James City Methodist Chapel, of James City County, Va. (S. 8538); W. F. Parker (S. 8546); Wentworth Street Lutheran Church, of Charles-

ton, S. C. (S. 8549); Christian Church of Stanford, Ky. (S. 8557); heirs of Joshua Hill, deceased (S. 8615); B. C. Thompson, of Lyons, Toombs County, Ga., for moving obstructions from Oconee River and making it navigable (S. 8624); Providence Methodist Episcopal Church, of Sussex County, Va. (S. 8626); curators of Central College, of Fayette, Mo. (S. 8671); heirs or estate of Mrs. Ellen Morrissey and James Morrissey, deceased, and others (S. 8701); Gen. John R. McGinness (S. 8702); John H. Hickey (S. 8749); A. O. Hall (S. 8750); John R. Adams (S. 8751); wardens and vestry of St. Peter's Episcopal Church, Rome, Ga. (S. 8798); heirs of Aaron W. Da Costa (S. 8813); heirs and legal representatives of John B. Hays (S. 8815); heirs or legal representatives of Frederick Wyand, deceased (S. 8816); trustees and consistory of Mount Vernon Reformed Church, of Keedysville, Md. (S. 8817); heirs and legal representatives of Michael J. Brown (S. 8818); M. G. Jetton, J. P. Jetton, D. M. Jetton, B. H. Jetton, and M. G. Williams, heirs at law of Mitchell Jetton, deceased (S. 8836); Davis W. Hatch (S. 8840); Abbie P. Anderson and the heirs or estate of William A. Watkins, deceased (S. 8843); heirs or estate of Cornelius C. Cunningham, deceased, and others (S. 8844); heirs or estate of George W. McCabe, deceased, and others (S. 8845); legal representatives of William C. Blalock, deceased (S. 8871); Hannah J. Jones, executrix of Emanuel Jones, deceased, a British subject (S. 8951); heirs of Mrs. Elizabeth Hynes, deceased (S. 8952); heirs of Eldred Nunnally, deceased (S. 8954); Joseph E. Adams and others (S. 8967); estate of Joseph Kulage, deceased (S. 8983); heirs of W. D. McDowall, deceased (S. 9066); estate of Samuel L. Gilbert, deceased (S. 9072); estate of Andrew Reece (S. 9073).

J. W. Murry, sr. (S. 9074); estate of James L. Romine, deceased (S. 9075); heirs of H. O. Kilpatrick, deceased (S. 9076); heirs of Leonard Daniel, deceased (S. 9078); Belson Wiley Owens (S. 9079); heirs of Joseph L. Bernard and Anna Holmes Bernard (S. 9090); estate of Patrick Dooling, deceased (S. 9091); Hibernia Bank and Trust Company of New Orleans, La., successor to the Union Bank of Louisiana (S. 9092); James B. Clift, administrator of the estate of John Clift, of Stafford County, Va. (S. 9098); estate of Samuel Fitz, deceased (S. 9099); heirs at law of James B. Hill (S. 9114); Nathan Van Beil and others (S. 9117); heirs of Frederick S. Poole, deceased (S. 9125); John W. Twiggs and others (S. 9129); heirs of the estate of John Hogan (S. 9152); Cornelius Ruffin and others (S. 9159); heirs of Richard Littell (S. 9169); Mrs. S. P. Prowell, administratrix of the estate of Dr. John H. Jones, deceased (S. 9186); Rear-Admiral John J. Read, U. S. Navy, retired (S. 9210); owners of the schooner T. P. Leined or their legal representatives (S. 9211); Adolph M. Cohen (S. 9212); Mary Bethoon Hanserd (S. 9230); Seaboard & Roanoke Railroad Company (S. 9234); John W. Alves (S. 9236); Elleanor Gibson Whitney (S. 9237); John H. Brown and certain other naval officers and their heirs or legal representatives (S. 9254); heirs of Daniel W. Brown, deceased (S. 9287); heirs of Tirzah P. Brown, deceased (S. 9288); Christian Church of California, Ky. (S. 9290); estate of F. F. Lucas, deceased (S. 9320); estate of James O. Harrison, deceased (S. 9322); heirs or estate of John E. Stevenson, deceased, and others (S. 9330); heirs or estate of Peter Baker and others (S. 9331); estate of John W. White, deceased (S. 9332); Mrs. Bathsheba Gordon (S. 9333); heirs or estate of Gideon Robinson, deceased, and Margaret Robinson, deceased, and others (S. 9340); heirs or estate of Jackson Higginbotham, deceased, and others (S. 9341); Methodist Episcopal Church of Friars Point, Miss. (S. 9367); Grafton Christian Church of Grafton, Va. (S. 9389); Presbyterian Church at Greenville, Miss. (S. 9394); trustees of the Mouth of Greenbriar Baptist Church of West Virginia (S. 9397); heirs or legal representatives of Stephen M. Holt (S. 9407); John C. Stoutenborough, of Richmond, Ala. (S. 9426); heirs of Charles H. Wright, deceased (S. 9429); estate of John McQuiddy, deceased (S. 9431); E. D. Miller, estate of G. Colhoun, S. B. Crow, James Tate, and others (S. 9446); Orlando B. Willcox and certain other army officers and their heirs or legal representatives (S. 9448); trustees of White Oak Church, of Dinwiddie County, Va. (S. 9451); heirs of A. Cohn (S. 9453); Mrs. A. C. Lester and others (S. 9457); James M. Beattie (S. 9463); Charles Hector Larocque or his heirs or representatives, and others (S. 9467); heirs or estate of Eliza E. Spencer, deceased, and others (S. 9468); heirs or estate of John Owings, deceased, and others (S. 9469).

Heirs of John Allison, deceased (S. 9470); heirs or estate of A. Underwood and others (S. 9476); Mrs. Mary E. Pillow and others (S. 9477); estate of Samuel P. Caughman, deceased (S. 9480); John O. Adams and others (S. 9481); heirs of John W. Norwood, deceased (S. 9482); heirs of Erdman Bodenshatz, deceased (S. 9483); Cumberland Presbyterian Church of Shiloh, Alcorn County, Miss. (S. 9493); Mary M. Kennedy, Esther A. Pierce, Alfred Jemison, King Pierce, John H. Pierce, C. S. York, Dwight Jemison, and others (S. 9494); James McGeary and others (S. 9500); Cyrus H. Abbott and others (S. 9501); estate of Caleb Maratta, deceased (S. 9506); lawful heirs of George Henry Guerard (S. 9521); certain government contractors (S. 9523); certain American citizens (S. 9524); Francis Beach and certain other army officers and their heirs or legal representatives (S. 9529); Grace Evangelical Lutheran Church of Winchester, Va. (S. 9530); Presbyterian Church at Greenville, Miss. (S. 9535); Shelby Lodge, No. 162, Ancient Free and Accepted Masons, Bristol, Va. (S. 9536); Joseph Roberts and certain other army officers and their heirs and legal representatives (S. 9537); city of Newport, Ky. (S. 8558); McCracken County, Ky. (S. 8132); county of Jessamine, Ky. (S. 8133); heirs of Augustus H. Johnson, sr. (S. 5828); Prairie County, in the State of Arkansas (S. 9393); heirs of John Nutt, deceased (S. 4018); the estate of David B. Tennant, deceased (S. 1038); George C. Wedderburn (S. 7002); heirs and widow of Edward S. Brown (S. 1039); estate of John P. Kelly, deceased (S. 9388); heirs of William A. Elmore, deceased (S. 8295); estate of W. H. Harrison, deceased (S. 2020); legal representatives of S. A. Buckner (S. 2017); heirs of John H. Rixey, deceased (S. 2006); Benjamin M. Yancey (S. 2009); Virgil A. Fitzgerald (S. 3697); William J. Lewis (S. 3698); estate of William Shreve, deceased (S. 2011); Napoleon B. Watkins (S. 2013); estate of W. H. Stringfellow, deceased (S. 1994); estate of Horace L. Kent, deceased (S. 9088); estate of William L. Hollis, deceased (S. 9089); estate of Peter McEnery, deceased (S. 9233); estate of John B. Ege, deceased (S. 2015); estate of John W. Stone, deceased (S. 3719); heirs of Dr. Robert H. Power, deceased (S. 9390); heirs of the estate of James L. Miller, deceased, and others (S. 9528); Edward De Leon (S. 7870); heirs of John Allison (S. 7488); heirs of Ira G. Wood (S. 1826); heirs of Thomas W. White (S. 6643); heirs and estate of William B. Ott (S. 3704); heirs of John Starke, deceased (S. 9534); estate of Calvin Read (S. 1397); Thomas R. Webb (S. 1400); now pending in the Senate, together with all accompanying papers, be, and the same are hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887, and commonly known as the Tucker Act. And the said court shall proceed with the same in accordance with the provisions of such act and report to the Senate in accordance therewith.

HARBOR IMPROVEMENTS.

Mr. GORE. Mr. President, I wish to submit a resolution.

The VICE-PRESIDENT. Does the Senator from Mississippi yield the floor for that purpose?

Mr. MONEY. Yes, sir; for that purpose.

Mr. GORE. I submit a resolution, and ask for its present consideration.

The Secretary read the resolution (S. Res. 321), as follows:

Resolved, That the National Waterways Commission is instructed to investigate and report to Congress the number and names of all the harbors which have received government aid, the present and proposed depth and frontage of such harbors, and the ownership of the wharfage fronting thereupon, whether public, corporate, or individual, giving the names of each owner and the amount in each case.

Mr. ALDRICH. Let the resolution go over.

The VICE-PRESIDENT. The resolution will be printed and lie on the table.

ALEXANDER HAMILTON MEMORIAL.

Mr. WETMORE. Will the Senator from Mississippi yield to me?

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Rhode Island?

Mr. MONEY. Certainly; I yield with pleasure.

Mr. WETMORE. I am directed by the Committee on the Library, to whom was referred the joint resolution (H. J. Res. 225) authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton memorial in Washington, D. C., to report it favorably without amendment, and I ask unanimous consent for its immediate consideration.

Mr. GORE. Mr. President, I object.

The VICE-PRESIDENT. Objection being made, the joint resolution will go to the calendar.

Mr. GORE subsequently said: I desire to withdraw my objection to the joint resolution reported by the Senator from Rhode Island [Mr. WETMORE].

The VICE-PRESIDENT. The joint resolution will be read for the information of the Senate.

The Secretary read the joint resolution, and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to create a commission, to be composed of the chairman of the Committee on the Library of the Senate, the chairman of the Committee on the Library of the House of Representatives, the Secretary of the Treasury, and the president and secretary of the Alexander Hamilton National Memorial Association, to select a site upon the property belonging to the United States in the city of Washington, other than the Capitol and Library grounds, for the erection of the Alexander Hamilton memorial to be presented by the Alexander Hamilton National Memorial Association to the people of the United States.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. OWEN. Would it be in order to be heard with regard to the Hamilton memorial joint resolution?

The VICE-PRESIDENT. It has already been passed by the Senate, and a motion to reconsider would have to be made.

NAVAJO RESERVATION INVESTIGATION.

Mr. CLAPP. I present a copy of the correspondence and testimony taken by Col. H. L. Scott during the investigation of charges preferred by Rev. H. R. Antes regarding the trouble on the Navajo Reservation two years ago. I move that the correspondence be printed as a document (S. Doc. No. 757).

The motion was agreed to.

BILLS INTRODUCED.

Mr. RICHARDSON introduced a bill (S. 9538) to correct the military record of George Baker, which was read twice by its title and referred to the Committee on Military Affairs.

Mr. CLAY (for Mr. BACON) introduced a bill (S. 9539) for the relief of the estate of James Hart, deceased, which was read twice by its title and, with the accompanying paper, referred to the Committee on Claims.

Mr. HANSBROUGH introduced a bill (S. 9540) providing for the establishment of the Central National Bank of the United States, and for other purposes, which was read twice by its title and referred to the Committee on Finance.

Mr. DANIEL introduced a bill (S. 9541) for the relief of James F. Carr, which was read twice by its title and referred to the Committee on Claims.

HORSE SHOE BEND BATTLEFIELD COMMISSION.

Mr. BANKHEAD. I present a memorial of the Horse Shoe Bend Battlefield Commission, created by the State of Alabama, relative to the establishment of a military park on the Horse Shoe Bend battlefield, the battle having taken place March 27, 1814, between the Americans and Creek Indians. I move that the memorial be printed as a document (S. Doc. No. 756).

The motion was agreed to.

WITHDRAWAL OF PAPERS—JAMES CASSIDY.

On motion of Mr. TELLER, it was

Ordered, That James Cassidy be permitted to withdraw from the files of the Senate the papers filed with Senate bill No. 1315, Fifty-seventh Congress, first session, for the relief of James Cassidy, no adverse report having been made thereon.

SECRET PROCEEDINGS AND DEBATES OF THE FEDERAL CONVENTION.

On motion of Mr. BAILEY, it was

Ordered, That there be printed and bound for the Senate 1,500 copies of Senate Document No. 728, Sixtieth Congress, second session, Secret Proceeding and Debates of the Federal Convention.

TENNESSEE COAL AND IRON COMPANY.

Mr. OVERMAN. I move that the views of individual members of the Committee on the Judiciary, submitted by Mr. CULBERSON on yesterday, in relation to the resolution concerning the absorption of the Tennessee Coal and Iron Company by the United States Steel Corporation, be printed as a document (S. Rept. No. 1110, part 2).

The motion was agreed to.

ENLARGED HOMESTEADS.

On motion of Mr. DIXON, it was

Ordered, That 5,000 copies of public act No. 245 (S. 6155), to provide for an enlarged homestead, be printed.

REVISION OF THE PENAL LAWS.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

Mr. MONEY. Mr. President, I do not know exactly where I left off, but it does not make any difference. I will say that philologists have discovered the roots of words in the original families of the human race; and, when carried down in the ramifications of the family and pursued through generations, they derive from those words facts that are extremely valuable. The very word "Aryan," with which the ethnologist denoted those people who are to-day considered the white people, means noble, superior, honorable. The present name of Persia is Iranistan, Iran being the same as Aryan—noble, superior, honorable, and istan meaning land; for instance, Afghanistan, land of Afghan; Baluchistan, the country of the Baluches; Turkestan, the land of the Turks; Hindustan, the land of the Hindus.

Mr. President, a little time ago note the dominant characteristic of that race from which we are proud to claim our descent. They did not in the first eras of the world's history take the leading part which they do now. We came on the stage of action as a dominating and governing and colonizing people after the Hamitic races had perfected a civilization which is so remarkable in its architectural remains especially, and in its literature and customs, that they have been to-day the wonder of mankind. They were supplanted by the Semitic races, who carried their civilization to a great pitch of glory, who built the most enormous cities and established empires that were as wide as the continents of Asia and Africa. They, too, went their way. The Aryan, still existing as a primitive people, in all their successive families and branches have always stubbornly maintained their independence, their individualism, their character for enterprise, and their willingness to take responsibilities.

After a while letters and architecture and some of the forms of more civilized government established themselves, and they became the great ruling race of the world. There is nothing in the history of the past that will for an instant tolerate the idea of losing the proud hegemony of all the races.

Mr. President, I have noted the struggle those people made in that the highest form of civilization with which we are acquainted in ancient history—the Greek. The Greeks were not only physically the most beautiful people who ever lived, but by far the most acute and subtly intellectual. They have furnished to the world the greatest epic poem that was ever written, the greatest tragedy, the highest principles of human philosophy, the greatest specimens of oratory that were ever uttered, and the wittiest comedies that ever have been written. They have given us forms of government and examples of individual devotion to the state; they have given us the greatest examples of self-abnegation and public spirit.

Mr. President, the struggle of those people to maintain their liberties, considering their extreme advancement, especially in the golden age, the age of Pericles, the classic age of the Greeks, is one that fills the inquiring mind of the student with melancholy. Here was a nation of people as proud of their history and personally of themselves as has ever been known. They had achieved progress in sculpture, in painting, in architecture, in poetry, in philosophy, in eloquence and oratory, and in rhetoric, which, as some English critic once said, was not only the admiration, but the despair of succeeding peoples. They made every effort that men could make to keep in their grip the loosening bands of their political freedom. Their orators thundered their eloquence in the agora, their philosophers taught in the sacred grove of the academy. Socrates gave his disciples those profound lessons that reach to the immortality of the soul and the first vital principles of human action and human life, the copy of other philosophers since his day. It was the criticism of another Englishman that his great disciple, Plato, had set the pace for succeeding philosophers and that modern philosophers were original exactly in proportion as they stole from Plato. They had the great tragic poets, Æschylus, Sophocles, and Euripides, who lashed the faults and foibles and weaknesses of their time; and Aristophanes, who was said to have been the wittiest man in the wittiest age of the wittiest people who ever lived, wrote his immortal comedies, every one of them to chastise public vice, to call the people, the Athenians, in a spirit of profoundest patriotism to assert their manhood and do their duty to their country, to maintain the tottering fabric of their freedom, to restore the ancient glory of Athenian freedom, to prevent what we call to-day "the permeation of the commercial spirit." It was called "the commercial spirit" even then, and it sapped the foundation of Athenian liberty. There was a law of Athens that no poet could produce his play more than once, but because this great writer had so effectively worked for the Athenian public, they waived the rule in his case. Æschylus was granted not only that privilege, but they granted the privilege to his children and to his grandchildren, so that they could continue to reproduce his immortal tragedies.

Their rulers, if they could be said to have any, continually admonished the people of the blessings that "brighten as they take their flight." They were told over and over again in all the thunders of Demosthenes's eloquence and of his great rival, Æschines, who was punished because he failed in the great oratorical contest concerning the crown, that they were about to lose their liberties, but the people went on, unconscious of the catastrophe which was hastening to meet them. So it is with all other free people of this world. The Lacedæmonians, for instance, of Sparta, who were probably the hardiest race of free people that ever lived and more devoted to liberty than any other, belonged to the Dorian branch of the Greek family. When they came down from the mountains of Macedonia and invaded Bacotia, driving the Thebans from their city, and came on across to the Isthmus of Corinth and invaded the Peloponnesus, and what was Lacedæmonia or Laconia, there they found people of their own blood, Greek, as they were, not, perhaps, true Hellenese, but belonging to the same great branch of the Aryan family, a people more civilized than themselves, cultivating the ground. These hardy hunters and warriors made their homes at Sparta. They never built a wall around their city. It was the only city in all antiquity that had no wall. When an ambassador asked them why Sparta alone of all the cities had no wall, the king or ruler responded, "The breasts of the Spartans are the walls of Sparta." They were a military garrison in the midst of a people of their blood, but not exactly of the same kin. They kept them in subjugation, but they were free farmers.

They tilled the fields and they had a right to all they made. They marched with their helots to the field of battle. Every Lacedæmonian had seven helots to attend him in the campaign. They carried his armor; they procured and cooked his food; they combed his long hair, of which every Spartan warrior was proud. In their battles they used their weapons with as much effect as their masters; in fact, it is related by a historian that in one great battle with an enemy who had been subjugated, but who twice had put them on the verge of destruction, the helots, who were with them as their slaves, had been so gallant in the battle that they were declared worthy of some public memorial. Nine thousand of them were marched in the streets of Athens and were publicly crowned with flowers. They were lauded by orators, who extolled their valor, and then were told to disperse. When they got away from the town, they were set upon and massacred to the last man. Why? The Spartans said, "These people outnumber us; they are too brave a people for us to hold longer in subjugation, but the instinct of

self-preservation demands that we shall commit an atrocious act to preserve ourselves." It was the sailor pushing the other from the plank in mid-ocean to save his own life. It comes to us down the dim mist of the ages as an act that ought to be a blot forever on the fair fame of the Spartans, but to their minds it was the preservation of the Spartan race.

Their women, Mr. President, were so wise that no Spartan warrior ever thought of taking any action without consulting with his wife; and we are told that when Cleomenes received the Persian ambassador, the ambassador laid before him first the request that everybody should leave the chamber, and they were ordered out. The ambassador said, "Send away the child," referring to Gorgo, the 9-year-old daughter of Cleomenes. The King responded, "She is only 9 years old; let her play." The ambassador began his speech—a very seductive speech. It tempted the Spartan King with splendors he had never dreamed of—magnificent presents and honors from him whom the Greeks were pleased to call "the great King." After a while the girl stopped from her play and said to her father, "Get up, father, and leave the room or this stranger will corrupt thee;" and the king told the ambassador to leave the hall. The daughter was afterwards the wife of Leonidas, who fell at Thermopylæ, and sister-in-law of Pausanias, who won the greatest battle the Greeks ever fought—the battle of Platæa, where the Lacedæmonians, Athenians, and a few Legæans destroyed 300,000 Persians under Mardonius, and their Theban and other allies.

The influence of the Spartan women over the Spartan men is illustrated by the answer of this same Gorgo to one who said to her: "Sparta is the only country in the world where the women rule the men." She replied: "And the Spartan women are the only ones who give birth to men," meaning, as was true, that they were the most masculine of men.

The Greek laws were an outgrowth of that system of military discipline which made the Spartans invincible in war until Epaminondas, the greatest of the Greek generals, overcame the Spartans at Leuctra.

The Athenians had helots, but they were of the same blood as themselves, though not the same people. Generally they kept them in subjection. There is no intimation in any book that any of them were permitted to enjoy the freedom of the master race and to share the responsibility of government. In fact, it was a law at Athens that no Athenian could marry a woman of foreign birth. Their greatest ruler, Pericles, lived with Aspasia, a native of Asia Minor of Greek blood. She bore him a family of children and was celebrated as the most beautiful woman of her time, and she was so intellectual that it is said she wrote the greatest oration Pericles ever delivered, his speech in honor of the dead at Samos. In his old age he brought his son before the asssembly and with tears begged that he might be admitted to Athenian citizenship.

Mr. FORAKER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Ohio?

Mr. MONEY. Certainly.

Mr. FORAKER. I am called to go from the Chamber for a short time——

Mr. MONEY. I will let you off.

Mr. FORAKER. I wanted to ask the Senator how soon he would reach the place where he wants——

Mr. MONEY. Tell me how long you will be gone. I will try to go on until you get back. [Laughter.]

Mr. FORAKER. I thought I would stay.

Mr. MONEY. No; I would rather you would go, and I will hold up until you get back.

Mr. FORAKER. I should like to ask the Senator to give me an answer to the question——

Mr. MONEY. Can not the Senator see that I am coming right up to that now. I am now laying the predicate for my answer. I do not believe the Senator has heard a word that I have said.

Mr. FORAKER. I have heard everything except for the last three or four minutes, when I was engaged in conversation with my successor, who just came into the Chamber; but with that exception I have heard everything the Senator has spoken and have been very greatly interested in what he has said, although I had hoped that he would get the predicate laid and reach the question.

Mr. MONEY. I am afraid, Mr. President, I have not been very lucid in my remarks.

Mr. FORAKER. Oh, yes.

Mr. MONEY. The Senator could not have understood what I was saying.

Mr. FORAKER. I did understand that it was the predicate, but I did not know how much predicate there might be. [Laughter.]

Mr. MONEY. There will be enough for you to go out and come back. [Laughter.]

Mr. President, I was saying that the Greeks were a people of tremendous individualism, of the highest development, probably, known in history, with the most devoted love of country, and inspired with public spirit more largely than any people whom I know anything about, except, perhaps, the Hollanders in their contest for liberty with the Spaniards, and the Boers in South Africa, and one or two others. I know no greater example than theirs of devotion to liberty, not only individual liberty, but the liberty of the people to control their own government.

When there is a lack of capacity, we must seek the cause, and it is found in that cause which originates in the saying that "Eternal vigilance is the price of liberty." Eternal vigilance is not the price of slavery. The subject of a king can sleep out his days and wake up a subject, having lost nothing and gained nothing, but the free man can not sleep any more than the sentinel upon his post. If he does, he invites the inroads of enemies upon his constitution, as the sentinel who sleeps invites the enemy into his camp.

These people refused to share their power with people of their own color and of their own blood. Why? From any dislike to them? Not at all; but from the instinct of self-preservation, for love of their institutions, for inherent dread in their minds that these helots were unable to conceive and maintain proper institutions as they conceived and maintained them.

There is not in the history of the world an instance where a dominant people have ever shared the powers of self-government with an inferior race. The very word "caste" is a Hindoo word, and has a meaning where it originated very much stronger than that we give it. In Hindoo "caste" prevents absolutely the association of one class with another class; they can not eat at the same table; they can not drink from the same vessel; they can not live in the same house; they must be separated everywhere, and marriage between members of different castes is simply disgraceful and prohibited. What does "caste" mean? In the Hindoo language it means color. That is what "caste" means—color—and that is all it meant originally.

As you all understand, that vast peninsula, with some three hundred and odd million people, or about 280,000,000, under British rule to-day, has in it an enormous heterogeneous mass of people of every family. There are a great many languages and over 80 dialects spoken in that peninsula. You will find to-day the remains of some Turanian races that first came down upon that country and subdued the original inhabitants. They are found in the Dekkan and through the Punjab, which, as you know, means "five rivers." They are still working there, and they are just the same now as they ever were. Then there are the remains of another darker colored people. There are some Turanians up in the mountain country, who have blue eyes and lighter complexions than those farther down, where the Aryan family, or what is called the "Hindoo-European," came from—the main source of the human family in central Asia. They went down through the passes of the Hindu Kush, ravaging and subduing one nation after another, penetrating to the utmost point of the peninsula.

They are still there, retaining their language, retaining their peculiar Aryan features, although some of them are very dark on account of climatic conditions; yet they never mix. They are still preserving their purity of blood. This condition has caused an infinite division of principalities in India, agglomerated now and then under some great chief; for instance, all of northern India, in the Great Mogul Empire established by Timur, the great Tartar chief, commonly called "Tamerlane," extending from the Jumna to the Indus and south as far as Delhi.

The word "caste" means color. It meant an absolute separation because of the instinct of self-preservation, and there is no record anywhere where a race has been improved by the admixture of another, an inferior race. There has been a tremendous improvement by the admixture of blood from the same family, but coming through different currents. There is no doubt but that the Greeks, descending from a civilization of enlightenment and culture, but becoming a little bit effeminate, were enormously improved by the infusion of the Goths and the Gauls. You recollect Brennus went down there three hundred years before Christ with 150,000 Gauls and swept over that country. It is true that the Gauls attacked the temple at Delphi and 150,000 disappeared forever, but they came in successive waves. They went all over Thrace and Macedonia, and they got into what is now Rumelia and Bulgaria, crossed over the Hellespont, and established themselves in Asia Minor. That was before the time of our Savior, and Galicia was

named from the Gauls, who had taken possession of it. The infusion of the strong blood of these hardy, vigorous, simple men was a tremendous impetus to the Greek stock, which had begun to decay.

The same thing happened in Italy. The Etruscans first, as you all know, came to the upper part of the Italian peninsula. They left those tremendous remains that we call Cyclopean. They were a branch of the same family as the Greeks.

The Roman stock—and the Romans were another branch of the same family—was greatly improved in the third, fourth, and fifth centuries by the fresh infusion of Gallic and Gothic blood; and when the alliance was made between the Roman Emperor and the Gothic King Alaric there was another absorption by intermixture of two bloods from a common stock, resulting in an improvement. But whenever there has been an instance in history where any superior race has admitted the infusion of the blood of a weaker or much inferior race, there has been general deterioration by that amalgamation. In other words, miscegenation is not a fault; it is a crime against nature.

There is not to-day in all the history of the world any country where a superior people have admitted to partnership in self-government a confessedly inferior people without most disastrous results. In the great empire of Edward VII there is the new confederation of Australia. They have a prohibitory tax of $500 a head upon any man not of white color and blood, even if he is a British subject. They make their laws and govern themselves. I suppose the King of England, in privy council, could repeal the law. I do not know whether that is true or not, I do not know how the British constitution is changed; but I recall that in provincial times in this country, when Virginia put a prohibitory tax of $350 upon the head of every slave brought into her dominions and South Carolina a tax of $275, that George II, I think it was, vetoed it, because he and his courtiers all had stock in a slave-trading company and slave-trading ships. That is the reason why Virginia and South Caroline were flooded with negroes. They tried to stop it, but could not do it. To-day Australia will not permit one of their fellow-subjects of Great Britain not of the white race to come into their dominions unless he pays a head tax of $500, which is simply intended to be and is prohibitory. It makes no difference whether he is a Jap, a Chinaman, a Hindoo, or of the hundred other varieties from South Africa—Kaffirs, etc.—or the Maoris from New Zealand. They need labor, for Australia is a wonderful continent of about 3,000,000 square miles.

It is absolutely a virgin country and is capable of enormous production. They want labor. No labor in the world is as high priced as that in New Zealand and in Australia. In no country is there a greater output per man. They want all the labor they can get, but they deny themselves this inferior race of labor because they know the danger of the presence in their midst of an inferior race. They will after a while claim one privilege and then another until exact social and political equality will be finally demanded.

Shall we despise the lessons of all the world? Are we to consider that we are the only wise people in existence? It is said that history is philosophy teaching by example; and we are wise men. Shall we fail to take these lessons?

We have undertaken a task which, as I have said, is the most difficult ever undertaken. We have people here, and will soon have more, who believe the Hamiltonian idea was right; that we ought to copy as closely after Great Britain as possible. The Great Britain of the time of Alexander Hamilton was not at all the Great Britain of 1909. The people then had few liberties. Their organized charities did not amount to a row of pins. The common, plain people were in a condition so deplorable that it took a tremendous fight to get free breadstuffs into the country. Now the country is improving all the time from the Great Britain of Alexander Hamilton's day.

A part of his plan was that the President should hold office for life; that Senators should be appointed by the President for life; and that the governors of the States should be appointed by the President for life. In other words, Alexander Hamilton was for a strong monarchy without the name of a king. He did not want the name of king, because the name of king would be extremely repugnant to men who had just poured out their heart's blood as the greatest libation that ever can be offered upon the altar of liberty. They would not listen with patience to such a suggestion.

These are the principles that we have been told lately are to be revived. They are the principles that actuate gentlemen who sit here with us on questions involving the whole country. Alexander Hamilton declared that it would be impossible for the common people to govern themselves. He said, if your government is to stand it must be a government of the better class. I quote his exact language, "it must be a government of the better class." His great antagonist and friend, Thomas Jefferson, said, on the other hand, we must trust the people with power; and if that power is abused, give them more power. In other words, this is a government by the people for their own sake, and they have established it for their own sake.

We have been told that the Declaration of Independence says that "all men are created equal." He is a very shallow thinker, or does not think at all, who imagines for a moment that that was meant to include anybody except the white people of the world. The author of that declaration owned, down at Shadwell, on the South Anna River, in Albemarle County, Va., a great number of slaves. Did he mean to say that those slaves were born free and equal with him, that those slaves, that were found everywhere from Maine down to Florida, were born free and equal with the men who had fought and obtained their liberty? He did not mean anything of the kind. They did not mean that in New England. James Otis, the great Massachusetts orator of the Revolution, made an impassioned speech to the Massachusetts general assembly, I believe it was, for the emancipation of their slaves. What was the result? They hooted at him. John Adams, the first President after George Washington, the man who Thomas Jefferson said was the great Demosthenes of debate in the Provincial Congress, who has given to his country a succession of most illustrious men in his descendants, said that he "shuddered with horror" at such utterances, and he did not know what the result would be if they were continued.

You know that Providence, the home town of the distinguished Senator from Rhode Island [Mr. ALDRICH], was the center of the slave trade. A little town of some 7,000 inhabitants was the center of the industry. How did they get it? They sent out slave ships to the slave coasts and bought negroes that had been sold half a dozen times by Krus on that coast, and they would ship them to Barbados, to Jamaica, and elsewhere, and bring home molasses, which was brought to Newport and converted into rum and the rum carried back and bought by the same negroes; and so it went around.

I recollect also the great jealousy which the people of Rhode Island showed at the presence of those negroes. I recollect seeing in a newspaper that antedates the Revolution that to teach a slave to read or write was prohibited for the reason that if he could sign a passport it would take him across the ferries, and he might gain his freedom. I also recollect another thing, Senators, that the papers of that date show, and that is that the crime of rape was extremely frequent on the part of those slaves, and they were regarded with great horror on that account. At last, when New England rose to the point of emancipating them, it was not because of any humanitarian principles, but the slaves of New England were emancipated for economic reasons, and for none other whatever.

Mr. FORAKER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Ohio?

Mr. MONEY. Certainly.

Mr. FORAKER. I desire to ask the Senator another question, if I do not interrupt him.

Mr. MONEY. Not at all.

Mr. FORAKER. I understood him to say that the expression in the Declaration of Independence that "all men are created free and equal" does not apply and was not intended to apply to colored men.

Mr. MONEY. The Senator understands me correctly.

Mr. FORAKER. And he cited as an argument in support of that contention the fact that the author of the Declaration of Independence was a slaveholder——

Mr. MONEY. Yes.

Mr. FORAKER (continuing). And could not, therefore, in writing that Declaration have had reference to slaves. The Senator does not contend that the negroes were not included in the designation "men." The Senator does not go that far, does he?

Mr. MONEY. Oh, yes; I do.

Mr. FORAKER. That is what I want to know.

Mr. MONEY. And I believe every man who signed the Declaration of Independence was also a slaveholder. I do not know an exception.

Mr. FORAKER. Assuming that they were, I wish to know whether the Senator rests it alone on the fact that the authors of the Declaration of Independence were slave owners, or whether he rests it upon the fact that colored persons were not men.

Mr. MONEY. I said it was impossible for slave owners to say in a document like the Declaration of Independence that all men are born free and equal and mean their slaves. The question over which they were fighting was the equality by birth

in freedom of themselves with their British fellow-subjects. I desire to say, also, that I do not believe there was a member of the convention who was not a slave owner. I know that that great polemic, Jonathan Edwards, probably the greatest ever produced in this country, had negroes of his own, which he left in his will; and that great Methodist revivalist and evangelist, George Whitefield, said he would like to own two or three slaves to attend to his comfort in his old age. But they also said that a man who did not believe in witchcraft was an unbeliever and did not believe in the Bible.

Mr. FORAKER. We are all familiar with those historical facts, but I want to know whether the Senator contends that the negroes were not men?

Mr. MONEY. Oh, no.

Mr. FORAKER. No; of course not. They were men. Inasmuch as in the organic law of the country by amendment we have made the negroes free, does he still contend that the Declaration of Independence is not intended for their benefit as well as for the benefit of white men?

Mr. GORE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Oklahoma?

Mr. MONEY. Let me answer that. I want to be frank with the Senator from Ohio. I have said what the Declaration of Independence intended. The declaration never contemplated the amendment you speak of.

Mr. GORE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Oklahoma?

Mr. MONEY. Certainly.

Mr. GORE. I desire to send something to the desk to be read as throwing collateral light on this matter.

The VICE-PRESIDENT. The Secretary will read as requested, in the absence of objection.

The SECRETARY. Bates's Annotated Ohio Statutes, constitution of the State of Ohio, page 3719:

ARTICLE V. ELECTIVE FRANCHISE.

SECTION 1. Who may vote: Every white male citizen of the United States of the age of 21 years, who shall have been a resident of the State one year next preceding the election, and of the county, township, or ward in which he resides such time as may be provided by law, shall have the qualifications of an elector, and be entitled to vote at all elections.

Mr. FORAKER. Will the Senator from Mississippi yield to me for a moment until I remark that the word "white" does still stand in the constitution of the State of Ohio, as the Senator has called it to our attention, but it stands there because the Democrats were in the ascendency at the time when we undertook to strike it out.

Mr. MONEY. I reply, very well——

Mr. FORAKER. And I imagine there was no further effort made to strike it out, because by the amendment to the National Constitution it was stricken out of every constitution in the whole United States. It was stricken out of the constitution of the State of Mississippi and kept out of the constitution of Oklahoma, as well as stricken out of the constitution of Ohio.

Mr. MONEY. I recollect distinctly that when the vote was taken to strike it out, in 1867, it was beaten by 257,000 votes in the State of Ohio. I do not care whether they were Democrats or not. It was the State of Ohio, and it was the people of Ohio who voted. I referred to the fact in 1894 in repealing these odious election laws. It is nothing in the world to have it in the constitution, because it was in the constitution of Kansas that no confederate soldier could vote. Yet a confederate soldier of distinction sat here as a Senator and in the other House. It became a mere relic. It was not expunged. The Senator from Ohio knows—great lawyer that he is—that to-day the British people do not repeal formally their old laws. They are printed even after they are dead and obsolete as the laws of the Medes and the Persians.

Mr. GORE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Oklahoma?

Mr. MONEY. Certainly.

Mr. GORE. The Senator has stated what I intended to say in response to the Senator from Ohio.

Mr. MONEY. Excuse me; I did not know you were up.

Mr. GORE. When there was pending a constitutional amendment to repeal or annul this section in the Ohio constitution, it was voted down by an overwhelming majority at the polls, and the legislature of Ohio revoked its ratification of the fourteenth amendment. When the fifteenth amendment was first considered by the legislature, it was rejected, and subsequently reconsidered.

Mr. FORAKER. When the legislature of Ohio revoked its ratification previously given to the fourteenth amendment, the legislature was Democratic, and it was a Democratic legislature that revoked it.

Mr. BAILEY. I would expect a Democratic legislature to be that wise.

Mr. FORAKER. I wish, with the indulgence of the Senator from Mississippi, simply to remind him that I asked him a while ago a question which, as I understand, he has not yet answered.

Mr. MONEY. I am getting to it.

Mr. FORAKER. I was apprehensive that the Senator had forgotten it.

Mr. MONEY. I hope the Senator will quiet his apprehension.

Mr. FORAKER. I will do that.

Mr. MONEY. I hope he will rid his mind now of any impression that I am going to run away from any issue or dodge any question. I am going to meet it.

Mr. FORAKER. I am not asking it in a frivolous way or to interrupt the Senator.

Mr. MONEY. I did not mean that.

Mr. FORAKER. But I want the benefit of the Senator's answer.

Mr. MONEY. I am going to give it to the Senator directly; but I can not give it to him wrong end first.

Mr. FORAKER. So the Senator is going to do it; that is all.

Mr. MONEY. I feel I am making a failure if the Senator from Ohio can not connect what I said with the answer to his question. I have been trying to prove here for some time that every people that ever lived have been afraid to have inferior people in partnership with them in the government of themselves. That is what I have been trying to show.

Mr. FORAKER. So that, if the teachings of history amount to anything, they are that an inferior race should not participate at all in the government of a country.

Mr. MONEY. That is exactly what history does teach.

Mr. FORAKER. And the Senator stands for the teachings of history?

Mr. MONEY. I have not got to that yet. You anticipate.

Mr. FORAKER. Will not the Senator answer now?

Mr. MONEY. I will answer when I get to the right place. But the Senator will not undertake to cut me off in the middle of the argument.

Mr. FORAKER. No.

Mr. MONEY. I have been stating the major and minor premises. Now I have got to argue the conclusion.

It is impossible to answer in the Senator's way, because I think it would be an extremely unsatisfactory thing to his mind. It is very important that we understand the reasons for the answer before we get the answer, and I am proceeding to give reasons, and abundant ones. They are as plentiful as blackberries in July. It is no trouble to give reasons for the ground I take.

I think it is understood and conceded that the most difficult task in the world for any people is to govern themselves, and that it requires an exceedingly high type of manhood to do that. We must recollect that there are about 90,000,000 people in this great Republic, or will be, according to the next census, and of that number over one-ninth are colored, and not only an inferior race, but at the very end of the human scale. One is at the top, the other at the bottom. These distinctions do not rest simply upon color, because the people who come of Indo-Germanic ancestry are almost as black as the Zulus. They are very dark brown at least. The term "Indo-Germanic" does not designate a people or a place. It means a language; that is all. We designate the people who have the same common Sanskrit root for words, like "father" and "mother," "cook" and "fire." When we find people scattered all over the world with a language founded upon root words, as they are called by the philologists, we have reason to believe they all come from the same source.

I wish to say another thing to the Senator from Ohio. There is a great deal said about skin government, and legislating against the negro because he is black, and so on. The race differences have been assigned by ethnologists upon different principles. Cuvier and Agassiz were great anatomists, and they founded their division of the human family upon the anatomy of the human frame. They saw a tremendous difference in the physiology and especially in the anatomy of the human frame. For instance, the Mongolian is very broad between the parietal walls of the skull; very short from the forehead to the cerebellum; a very broad face; a round skull. The negro is exceedingly thin between the parietal walls, and so is the Aryan, but the Aryan is exceedingly high in his head. The white man has his head above his face; the negro has his head behind his face.

These, among others, are the reasons by which Cuvier and Agassiz, and I believe Fignier and a good many other writers, have classified the human race.

I desire to say further that Agassiz was so contemptuous of the linguistic division—that is, upon language—that he wrote a preface to a great book, Knott and Gliddon's Types of Mankind, and in that preface he ridiculed exceedingly any attempt to build up the human family and associate them by a common stock of words in the original, what we call "root or primitive words," such as I mentioned a while ago. He made great fun of it. He is well answered by Charles Loring Brace and by a good many others, and Blumenbach, who was for one hundred and thirty years a leading authority on the divisions of the human family.

We have Prichard and Latham and Tyler. But taking them altogether, whether you classify the human race to-day, the families of to-day, into great races, the primitive, original races, either by tongue or by anatomy or objectively—that is, by color—it comes at last to the same grand divisions almost entirely.

Now and then there seems to be a blend, as was contended by Huxley, who probably made the most scientific division of the human family of all the writers upon anthropology. He asserted that the dark complexion of the people upon the southern coast of Europe, along the Mediterranean, was caused by admixture at some time or other with the Australians, which is simply a geographical and physical impossibility in that remote age, when transportation facilities were not known and when two great seas intervened. He called them the "melanochroic" race. We have no authority for that, and I can not see any application, and I reject, so far as I am concerned, any proposition of that sort. I think climatic conditions may have produced the changes.

There is a great diversity of opinion upon this subject, as upon almost every other. But there are different groups of all the families of the world. Of course there is a tremendous blend, generally from the same original families, but sometimes from those who have been subjugated; and in some instances the subjugated people have left their impress upon their conquerors. They have adopted their language and, in some instances, their religion. Of course it was impossible for the Saracen race, a dark race, to overrun Spain for eight hundred years without leaving their impress. So with the Andalusians and the Catalonians, all of whom were very dark people. When we get to the real Spaniard, the descendant of the Goth, found in Castile and Galicia and New Leon and parts of Spain, we find people who are fair skinned, blue eyed, light haired. They are all Spaniards.

Mr. BAILEY. If it suits the convenience of the Senator from Mississippi at this moment, I will ask him to yield to me while I make a motion, of which I gave notice yesterday afternoon.

Mr. MONEY. I yield for that purpose.

Mr. HEYBURN. I think it would require more than the consent of the Senator having the floor, because it really postpones the consideration of the pending measure.

Mr. BAILEY. It would not require more than that to enable me to make a motion to take up the resolution.

Mr. HEYBURN. No. I did not know how far the intention of the Senator from Texas went.

Mr. BAILEY. I am simply going to move now that the Senate proceed to the consideration of the resolution.

Mr. HEYBURN. I hope that will not prevail.

Mr. ALDRICH. I hope the Senator from Idaho will allow the matter to be disposed of.

Mr. HEYBURN. It sets aside this business.

Mr. ALDRICH. Of course, but you can take it up again when that matter is disposed of. It will be disposed of very promptly. I hope the Senator——

Mr. BAILEY. I will say to the Senator from Idaho that unless there is very much more extended debate on this matter than I now expect it will not delay the proceedings of the Senate very greatly.

The PRESIDING OFFICER (Mr. HOPKINS in the chair). The Senator from Texas moves the consideration of a resolution, which will be stated.

Mr. HEYBURN. I would ask the Senator a question, if I may be indulged. I desire to know before yielding the extent to which the resolution is to be debated. I understand the resolution is with regard to the power of the Senate to require a report from the head of a department. Am I correct?

Mr. BAILEY. A reading of the resolution would probably answer the Senator's question; and inasmuch as under the motion it must be reported to the Senate, if that is not sufficient I will answer the question further.

Mr. HEYBURN subsequently said: I move that Senate bill 2982 and the conference report now pending be referred back to the conferees and that the Senator from Arkansas [Mr. CLARKE] be substituted for the Senator from Mississippi [Mr. MCLAURIN]. This substitution is made at the request of the Senator from Mississippi [Mr. MCLAURIN], on account of his ill health, as there may be a protracted session of the committee.

The VICE-PRESIDENT. The Senator from Idaho moves that the conference report upon the criminal code be recommitted to the committee having it in charge and that the senior Senator from Arkansas [Mr. CLARKE] be substituted as one of the conferees on the part of the Senate in place of the Senator from Mississippi [Mr. MCLAURIN]. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28105) granting additional authority to the Secretary of the Treasury to carry out certain provisions of public-building acts, and for other purposes, and recedes from its disagreement to the amendment of the Senate No. 12, and agrees to the same.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. TAWNEY, Mr. VREELAND, and Mr. BRUNDIGE managers at the conference on the part of the House.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

S. 7640. An act to extend the time for the completion of a bridge across the Missouri River at Yankton, S. Dak., by the Yankton, Norfolk and Southern Railway Company;

H. R. 21896. An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes;

H. R. 28055. An act to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa.;

H. R. 28243. An act to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes; and

H. R. 24834. An act for the protection of the surface rights of entrymen.

GENERAL DEFICIENCY APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HALE. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed Mr. HALE, Mr. GALLINGER, and Mr. TELLER conferees on the part of the Senate.

RELATIONS BETWEEN CONGRESS AND THE EXECUTIVE DEPARTMENTS.

Mr. BAILEY. I move that the Senate proceed to the consideration of the resolution.

The PRESIDING OFFICER (Mr. HOPKINS in the chair). The resolution will be read for the information of the Senate.

The Secretary read Senate resolution 317, submitted by Mr. BAILEY on the 1st instant, as follows:

Resolved, That the response which the Secretary of the Treasury made under date of April 13, 1908, to a resolution of the Senate adopted February 18, 1908, shall be returned to him by the Secretary of the Senate, with the statement that the Senate of the United States declines to receive any communication from the head of any department which denies, either expressly or by implication, its right to demand all papers and information in the possession of any department and relating to matters within its jurisdiction or control.

Resolved further, That the Secretary of the Senate be instructed to examine the files of the Senate for the Sixtieth Congress, and whenever

he finds a similar communication from the head of any department stating that such communication was made by the direction of the President, or an equivalent expression, he shall return the same to the head of the department making it, with the statement specified in the foregoing resolution.

Mr. ALDRICH. It should be stated, perhaps, as a part of the parliamentary condition that there is a motion pending, made by myself, to refer the resolution to the Committee on the Judiciary.

The PRESIDING OFFICER. The motion pending is that the resolution be referred to the Committee on the Judiciary.

Mr. CUMMINS. Mr. President——

Mr. ALDRICH. That is not in order.

Mr. CUMMINS. I desire to offer a substitute for the resolution proposed by the Senator from Texas.

Mr. ALDRICH. The question first comes on taking up the resolution.

The PRESIDING OFFICER. The substitute will not be in order until the Senate disposes of the question whether it will proceed to the consideration of the resolution.

Mr. BAILEY. I hope the Senator from Rhode Island will withhold his motion to refer until the Senator from Iowa can offer his amendment.

Mr. ALDRICH. Undoubtedly. But the first question is on taking up the resolution.

Mr. BAILEY. Yes.

Mr. ALDRICH. It is not yet before the Senate.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas that the Senate proceed to the consideration of the resolution proposed by himself.

The motion was agreed to, and the Senate proceeded to consider the resolution.

Mr. BAILEY. Before the Senator from Iowa offers his substitute I simply wish to call the attention of the Senate to a matter that has been called to my attention within the last half hour, and I think the Senate will then perceive that after all this is a matter of more practical importance than we thought the day before yesterday, when I proposed the resolution.

On the 28th day of May, 1908, the Senator from Wisconsin [Mr. LA FOLLETTE] introduced a resolution, which I will ask the Secretary to read.

The Secretary read as follows:

Senate resolution 205, by Mr. LA FOLLETTE, May 28, 1908.

Resolved, That the Secretary of the Department of Commerce and Labor be, and he is hereby, directed to institute an investigation into all the telegraph and telephone companies engaged in the conduct of an interstate business as to the methods used in handling the public's business, the wages paid telegraphers, telephone operators, and other employees of such companies, and the working conditions of the employees thereof, together with a statement of the receipts and expenditures of such companies for a period of five years.

And he is further directed to report the result of such investigation to the Senate on the first Monday in December, 1908.

Mr. BAILEY. Instead of reporting the result, as that resolution directed him to do, on the first Monday in December, 1908, the response did not reach the Senate until the 16th day of February, 1909. I have here the CONGRESSIONAL RECORD for Tuesday, February 16, and I find this paragraph:

The Vice-President laid before the Senate a communication from the Secretary of Commerce and Labor, transmitting, by direction of the President and in response to a resolution of May 28, 1908, a report showing the results of an investigation made by the Bureau of Labor into the Western Union and Postal Telegraph companies (S. Doc. No. 725), which, on motion of Mr. KEAN, was, with the accompanying paper, referred to the Committee on Interstate Commerce and ordered to be printed.

Mr. President, not only did the head of this department refuse to obey the command of the Senate, but when he sent his response he did so only by direction of the President. If the heads of departments can take their own time in which to make a response, and if they are permitted by the Senate to declare that they answer not in obedience to our resolution but under the direction of the President, we ought to be frank and say as much to the country. This matter does not concern me more deeply than it concerns every other Senator on this floor, and I shall feel that I have fully discharged my duty to the Senate and to the country when I have called attention to this practice and when I have insisted that the Senate shall take cognizance of it. If it suits the Senate to pass it in silence; if it suits the Senate to refer it to a committee in which it may be buried—the Senator from Rhode Island shakes his head; but he did not note exactly what I said. I did not say it would be buried. I said it may be buried. The Senator from Rhode Island will not dissent from that, because so many of them have been buried in this committee graveyard that I am a little chary about sending a matter of this kind there.

I will take occasion to say, however, that if there is a committee to which it could be properly referred, and if there is a committee which would be disposed to promptly report it, I think the Senator from Rhode Island has selected that committee in his motion. My opinion is, and I bear cheerful witness to it, that the great lawyers who constitute the Senate Committee on the Judiciary will not be apt to approve a proceeding like that to which I have just called the attention of the Senate.

But, Mr. President, it often happens that we pass a matter of this kind, academic in the estimation of some, both practical and academic in the estimation of others like myself; but, at any rate, we pass it, the Senate forgets it, the committee become absorbed with other questions, and they leave it without attention.

I want to take occasion now and here, Mr. President, to say that I fear this all the more because I do not believe that this kind of executive insolence will be practiced toward the Senate under the new administration. I am not disposed to compliment the next administration in advance. I am not disposed to bow to those who are coming into power, although in this particular instance I am not disposed to bow to those who are going out of power. But I am sure, if the distinguished Senator who is to be the head of the incoming Cabinet can have his way about this matter (and I think he will have his way or the President will lose a Cabinet officer), there will be no repetition of this affront.

Mr. President, I think there is a misapprehension as to the origin of this practice. Many Senators think it came about by the direction of the President, and I confess I thought so until I began the examination. One morning I happened to pick up a response which came to us after that famous presidential message in which he said that the Cabinet officers were under the direction of the Constitution, the law, and himself, and under no other direction whatever, and I supposed that this response simply followed the presidential declaration.

But I went a little further back, and I found that responses had been made in this peculiar form before the President sent that message, and my opinion now is that instead of the President putting the Cabinet up to sending that sort of a message to the Senate, the Cabinet put the President up to sending the kind of a message that he did, and it all grew out of that resolution or that rule the Senate adopted which forbade these heads of departments to send communications directly to the Senate.

Senators will recall that sometime ago when the heads of departments thought we ought to pass any law which we did not pass they drafted a law to suit their will and their judgment and sent it here with a recommendation that it should pass. After a time the attention of some Senators was called to it. The impropriety of such a procedure was so manifest that the Senate adopted a rule, without a dissenting vote, declaring that hereafter the heads of these departments should communicate with the Senate only through the President, except where the law commanded them to report or where the Senate itself directed them to report. Immediately upon the adoption of that rule these offended dignitaries began to send responses here in this form. The minute we would not allow them to send bills here for our consideration and under their recommendation they began to dispute our right to direct them to send any paper or information here we wanted. Within a very short time after the adoption of that rule of the Senate the heads of the departments entered upon this indefensible policy of denying by implication our right to demand papers or information in their possession.

Mr. President, I have said to the Senate, and I have said privately to Senators, that it was not my purpose to discuss this matter. I think if there is any division of opinion about it it is worth a longer discussion than is possible in the Senate at this time. But I want to keep my word when I said that I would read from both the views of the minority and the report of the majority in the famous case that occurred during Cleveland's administration. There are not many Senators here now who were here then, but the Senator from Rhode Island [Mr. ALDRICH] is one of them. The Senators from Maine were here. The Senator from Colorado [Mr. TELLER], whose long service is to soon terminate, and though he has been here many years, his retirement even now comes too soon for the dignity of the Senate and for the good of the country. The Senator from Illinois [Mr. CULLOM] is still with us. The five Senators I see before me who are here now and were here then, all declared the doctrine for which I am contending now. The Senator from Mississippi [Mr. MCLAURIN] tells me that the Senator from Virginia [Mr. DANIEL] was also then a Member of the body which he still honors by his presence. If I could increase the number, if I could multiply it by three, there would still not be a single exception to the rule which I am about to state. Every Senator in this body then affirmed the doctrine which I am pleading with the Senate now to make its rule.

Mr. DOLLIVER. I wish to inquire of the Senator from Texas whether an opposite view was held by any Senator?

Mr. BAILEY. Not so far as I am advised. I think that every Senator here then maintained the doctrine for which I contend to-day. There was a report of the Committee on the Judiciary, and the views of the minority were filed; and there was a difference, but that difference did not go to the question which I am now discussing.

I will recall the facts in that case. President Cleveland removed a district attorney in the State of Alabama and nominated his successor.

There was no question about the character or the ability of the nominee, but the majority denied the President's right to remove his predecessor, and they adopted a resolution calling not only for the papers which related to the appointment but also to the removal. The President of the United States at that time claimed that those papers were his own; that they were in effect private papers which the Senate had no right to inspect. Except we adopt the view that Congress has no power to limit the President's right of removal, Mr. Cleveland was wrong in his contention. I express no opinion now upon that question, because it is not necessary that I should do so. Whether Mr. Cleveland was right or wrong in asserting his unrestricted right of removal is not in dispute here. The question here is whether the Senate has the right and the power to command the head of a department to furnish it with papers or information in the possession of that department. On this question both the majority and the minority took the pains to speak. The majority declared:

> The important question, then, is whether it is within the constitutional competence of either House of Congress to have access to the official papers and documents in the various public offices of the United States created by laws enacted by themselves. It may be fully admitted that except in respect of the Department of the Treasury there is no statute which commands the head of any department to transmit to either House of Congress on its demand any information whatever concerning the administration of his department, but the committee believes it to be clear that from the very nature of the powers intrusted by the Constitution to the two Houses of Congress it is a necessary incident that either House must have at all times the right to know all that officially exists or takes place in any of the departments of the Government.

The minority of the committee were no less explicit in the declaration of their views, and here is what they say. While sustaining the right of the President in that particular case, they desired to leave no question in the minds of anybody about the relation which Congress bears to these departments, and they expressed their opinion in these clear and unmistakable words:

> The minority admit, once for all, that any and every public document, paper, or record on the files of any department, or in the possession of the President, relating to any subject whatever, over which either House of Congress has any grant of power, jurisdiction, or control under the Constitution, is subject to the call or inspection of either House for use in the exercise of its constitutional powers and jurisdiction.

In the views of the minority and in the majority report there is much more to the same effect, but in both cases what follows simply reenforces that which I have read.

Mr. FORAKER. Will the Senator read the names of the members of the Judiciary Committee at that time, as they are signed to those respective reports?

Mr. BAILEY. The majority report is signed by George F. Edmunds, John J. Ingalls, S. J. R. McMillan, George F. Hoar, James F. Wilson, and William M. Evarts.

Is not the authority of those names sufficient for you to decide this matter without the long delay involved in the plan of referring it to a committee? Is there a Senator on the other side who doubts, after their long and conscientious investigation of the question, the conclusion arrived at by those great lawyers? True enough, it was a partisan question, but equally true it is that partisans like those are never willing to serve a party advantage by misstating the law. Those men had a conscience for their profession, and they would not have misstated the law to have embarrassed an opponent or to have accommodated an ally.

Mr. DOLLIVER. Mr. President——

Mr. BAILEY. Let me finish this statement. A great lawyer sometimes does wrest the law to serve a partisan purpose, but he always deos it by doing violence to the facts and never to the law. Now, I will yield to the Senator.

Mr. DOLLIVER. I notice that the majority cite the fact that the law charges the Secretary of the Treasury with the duty of making certain reports. Do they go into the question of what laws are applicable to the other departments?

Mr. BAILEY. I will say to the Senator from Iowa that they say it "may be fully admitted that except in respect of the Department of the Treasury there is no statute which commands the head of any department." Then they proceed to say that it was not deemed necessary to make a law on the subject.

Mr. DOLLIVER. Now I wish to make just one more suggestion.

Mr. BAILEY. Certainly.

Mr. DOLLIVER. It does not appear to me that the remedy for this violation of the Constitution and the laws, if there is such a violation, is at all adequate to the offense. I would like to inquire of the Senator what remedy of a real character the Senator has against such a transaction as he complains of? It looks as if we could take no action against these offending executive officers, and it does look as if, in case the President directs them to do a thing, they are under a very strong obligation to do it if they desire to still pursue the business of their office. What I desire to protect, as far as I can, is the dignity of the Senate, but I hate to give my consent to doing it by merely making mouths at a retiring President of the United States.

Mr. RAYNER. Mr. President——

Mr. BAILEY. If the Senator from Maryland will permit me just a moment, I will be glad to yield to him. I want to say to the Senator from Iowa that immediately following that part of the majority report which I read there comes this language:

> So perfectly was this proposition understood before and at the time of the formation of the Constitution that the Continental Congress, before the adoption of the present Constitution, in establishing a department of foreign affairs, and providing for a principal officer thereof, thought it fit to enact that all books, records, and other papers in that office should be open to the inspection of any *Member* of Congress—

And they italicized the word "Member"—

> provided that no copy should be taken of matters of secret nature, without special leave of Congress. It was not thought necessary to enact that the Congress itself should be entitled to the production and inspection of such papers, for that right was supposed to exist in the very nature of things, and when under the Constitution the department came to be created, although the provision that each individual Member of Congress should have access to the papers was omitted (evidently for reasons that can now be quite well understood), it was not thought necessary that an affirmative provision should be inserted, giving to the Houses of Congress the right to know the contents of the public papers and records in the public offices of the country whose laws and whose offices they were to assist in creating.

Now, Mr. President, I yield to the Senator from Maryland that he may make the observation which he desires.

Mr. RAYNER. Mr. President, the Senator from Texas yields to me for a few moments. I want to say to the Senator from Iowa [Mr. DOLLIVER] that he will find an answer to his question in the case of Chapman in One hundred and sixty-sixth United States, page 672. Without going into any extended discussion now, I want to say to the Senator from Iowa that if any head of a department declines to answer any question or produce any document within the jurisdiction of the Senate, the Senate has a right to attach him for contempt.

Without going into any extended discussion about it, after a very thorough examination, I am absolutely satisfied that if the head of any department declines to answer a summons or to produce documents in the possession of the department over which the Senate has jurisdiction and control, we could attach him for a contempt of the proceedings of the Houses. That case goes on to say that the fact of his failure to answer can be certified to the grand jury of this District; that it does not put him twice in jeopardy; and does not prevent either the Senate or the House of Representatives from exercising its power in the premises.

While the Senator from Texas has permitted me to interrupt him, if the Senate will just give me its attention for about five minutes, I want to give the Senate just a few lines upon what I consider one of the most serious and important propositions that has ever, perhaps, been brought before the Senate of the United States, and that is the resolution the Senator from Texas has offered. I just want to give you a few lines from the opinion of Attorney-General Miller, in 1890, upon this subject. He said:

> The President has, under the Constitution and laws, certain duties to perform, among them being to take care that the laws be faithfully executed; that is, that the other executive and administrative officers of the Government faithfully perform their duties, and he has no more power to add to, or subtract from, the duties imposed upon subordinate executive and administrative officers by the law than those officers have to add to or subtract from his duties. (19 Ops. Atty. Gen., 686.)

Now, listen for a moment to the opinion of Chief Justice Marshall, in the celebrated case of Marbury *v.* Madison, and see if the Senate wants anything more upon the proposition the Senator from Texas has advanced. This is in relation to the Secretary of State. Chief Justice Marshall said:

> It is the duty of the Secretary of State to conform to the law, and in this he is an officer of the United States, bound to obey the laws. He acts in this respect, as has been very properly stated at the bar, under the authority of law and not by the instructions of the President.

Now, let me add to that another case.

I want to submit to the Senator from Rhode Island [Mr. ALDRICH], if he will listen to this extract from an opinion in the case, whether he wants this resolution sent to a committee or whether he is not satisfied now to leave the question to the Senate. I quote from the opinion of Mr. Justice Thompson in

another celebrated case, the case of Kendall *v.* The United States, in Twelfth Peters, 524. Let us listen to this language for a moment:

It was urged at the bar that the Postmaster-General was alone subject to the control and direction of the President—

The very question that we are now discussing—

with respect to the execution of the duty imposed upon him by this law; and this right of the President is claimed as growing out of the obligation imposed upon him by the Constitution to take care that the laws be faithfully executed. This is a doctrine that can not receive the sanction of this court. It would be vesting in the President a dispensing power, which has no countenance for its support in any part of the Constitution, and is asserting a principle which if carried out in its results to all cases falling within it, would be clothing the President with a power entirely to control the legislation of Congress and paralyze the administration of justice.

Mr. President, the 4th of March is rapidly approaching, thank Providence. [Laughter.] I am sometimes apprehensive that the sun will not set to-night and that to-morrow will not come. We shall have a President, I am sure, who will obey the requirements of the law, who will not evade the obligations of the Constitution, and who, I think, knows by heart the limitations of executive power.

In view of these opinions, let me read, just before I conclude, a few words from the President of the United States to show how utterly in conflict he is with adjudicated authorities of the highest tribunals of this land. Here is what the President says about his duties and of his supervision of the departments:

I have thus given to the Senate all the information in the possession of the executive department which appears to me to be material or relevant on the subject of the resolution. I feel bound, however, to add that I have instructed the Attorney-General not to respond to that portion of the resolution which calls for a statement of his reasons for nonaction. I have done so because I do not conceive it to be within the authority of the Senate to give directions of this character to the head of an executive department or demand from him reasons for his action.

Now listen:

Heads of the executive departments are subject to the Constitution—

I am glad somebody is subject to the Constitution—

and to the laws passed by Congress in pursuance of the Constitution, and to the directions of the President of the United States, but to no other direction whatever.

I deny, in the presence of this assemblage, that the executive departments of the United States are subject to the direction of the President of the United States. The President of the United States, under the Constitution, has the right to demand their opinions in writing; he has the right to see that the laws of the country are faithfully executed; but he has no right whatever to direct the executive departments when Congress calls on those departments for any matter that comes either within the jurisdiction of Congress or within the jurisdiction of either body. Any other proposition would subvert the Government under which we live. The executive departments are bound and subordinate to Congress that created them, and not subordinate to the President, who did not create them. The President is an executive officer of this Government, confined and restrained by the enumerated powers of the Constitution. The officers of the executive departments, as they are called in the Constitution, are created by Congress, and they are subject to the laws of Congress; and the President has no right to interfere with them in the performance of their duty to any greater extent than to see that the laws of the country are faithfully executed.

This is a new doctrine; it is an absolutely revolutionary doctrine that when the Senate calls upon an executive department for papers that are in the possession of the executive department the head of the department can go to the President of the United States and decline to submit to the jurisdiction of this body unless the President gives them permission to obey the orders of this body or the laws of Congress. Where did any proposition of this sort ever originate? I could have read a half dozen other decisions, but time does not permit me. The unbroken current of precedents, however, from almost every Attorney-General of the United States except the present Attorney-General, who goes out to-day and who will not come back to-morrow, is perhaps the exception to the rule, because every man of them, except himself, has said over and over again, whenever the question was raised, that the executive departments created by law are responsible to the power that created them. Let me give now just one word more.

Mr. DOLLIVER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maryland yield to the Senator from Iowa?

Mr. RAYNER. I do.

Mr. DOLLIVER. I call the Senator's attention to the fact that we are asking here not that these departments shall yield to the law or to Congress, but to one branch of Congress.

Mr. RAYNER. That question has long since been settled; and when the Senator from Texas [Mr. BAILEY] reads the minority report in the case cited by the Senator from Georgia [Mr. BACON] some weeks ago in one of the most powerful arguments that were ever delivered before this body, he will find the proposition absolutely settled that either the House of Representatives or the Senate has the right to call upon the departments for any matter that comes within the jurisdiction of either body.

Mr. DOLLIVER. Do I understand the Senator to say that that is settled by any decision of the court? The case of Chapman appears to have been the case of the contumacy of a witness before a Senate committee.

Mr. RAYNER. The Senator from Iowa is getting from one question to another. He is talking now about the remedy, and the question which the Senator addressed to me was as to the power. Our power to call for documents is one thing—whether we have the right; whether there is a remedy to enforce it is another. The case the Senator cites is in reference to a remedy. I want to say to the Senator from Iowa—because, at the suggestion of the Senator from Georgia, I have given a great deal of time to the investigation of this question; and I repeat now what I said to him before—that if there is a head of a department who is summoned by a committee of the Senate and who has in his possession a document or a paper over which we have jurisdiction and control, and he declines to produce that document, he can be brought before the bar of this body and proceeded against under an attachment for contempt, in view and in accordance with the decision that I have given to the Senator from Iowa.

The only question in the case the Senator cited was whether the fact that we have a statute which authorizes us to certify such a case to the criminal court of the District of Columbia would debar us from proceeding against him for contempt, but the court held that the proceedings were different; that he could be punished in both ways; that one proceeding could not be pleaded as against the other; and that he was not put twice in jeopardy within the meaning of the Constitution for the same offense.

Mr. President, just one word more. Here is what Attorney-General Crittenden said in 1851:

As a general proposition, it appears to me most judicious for the President, as well as more consistent with the form and spirit of our institutions, to forbear from interference with the functions of subordinate public officers—

The President has not taken his advice—

and to leave them to the discharge of their proper duties under all their legal responsibilities, and subject also to removal from office for neglect or abuse of their official trust. (5 Ops. Atty. Gen., 587.)

Then, in 1874 Attorney-General Cushing said:

When the laws define what is to be done by a given head of department, and how he is to do it, there the President's discretion stops. (6 Ops. Atty. Gen., 341.)

Mr. CLAPP. Mr. President, may I interrupt the Senator for a question?

The VICE-PRESIDENT. Does the Senator from Maryland yield to the Senator from Minnesota?

Mr. RAYNER. I do.

Mr. CLAPP. Mr. President, it strikes me that those who may hear this discussion and those who read this discussion will be misled as to the purpose of the Senate. In the busy work of the session it is impossible for a Senator to be here all the time. I may myself labor under a misapprehension, but I want to ask the Senator from Maryland if there has been an instance where this Senate has asked for information either of the President or of any department that they have refused to furnish the information asked for?

Mr. RAYNER. I think there is. I think the information has been declined in the case of the Tennessee Coal and Iron Company most decidedly. That is what I just read.

Mr. CLAPP. Has there been any other instance?

Mr. RAYNER. I do not know. One instance is as good as a hundred instances.

Mr. CLAPP. Not necessarily. We might differ as to that particular instance.

Mr. BAILEY. Mr. President, the Senator from Minnesota [Mr. CLAPP] perfectly understands, however, that what we are complaining about now is the recent practice of the heads of departments in saying they respond to our resolutions "under the direction of the President."

Mr. CLAPP. The Senator from Texas has supplied what I wanted to go into the RECORD and to the audience—for I observe a very large audience here, probably from all over the country—that this controversy to-day is not upon a case where the evidence or the information has been refused, but upon the form in which it has been submitted.

Mr. BAILEY. There has been a refusal; but I was not dealing with that, Mr. President, and I purposely avoided it for the reason that after the expiration of the present presidential

term I have no expectation that there will ever be another refusal, or, at least, I hope there will not be. To avoid giving any possible partisan coloring to the debate, I deliberately omitted dealing with that phase of the question, and simply confined it to the case where a department, in responding to a resolution of the Senate, had taken the pains to tell the Senate that they responded, not because we had a right to command them, but "under the direction of the President."

Mr. CLAPP. I simply want that to clearly appear in the RECORD.

Mr. BAILEY. I understand the Senator's point.

Mr. HOPKINS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maryland yield to the Senator from Illinois?

Mr. RAYNER. I do.

Mr. HOPKINS. Mr. President, the Senator from Maryland [Mr. RAYNER], as I understand him, made the statement that the President had declined, or the Attorney-General had declined, to give any papers or proper information concerning the Tennessee Iron and Coal case.

My understanding is entirely different from that. As I now remember, the letter of the President gave full information upon that subject. The only point of differences between the Chief Executive and the Senate was as to whether the motive for nonaction upon the part of the Attorney-General could be called for, and in the debate that was had here several weeks ago, my remembrance is that the consensus of opinion among Senators was that the motive for nonaction could not be called for.

Mr. RAYNER. Mr. President, there was no inquiry for a motive; there was an inquiry for a reason—for the Attorney-General to give his reasons. They are two entirely different things.

Mr. HOPKINS. All the facts relating to that case were fully set forth in the letter of the President. There was nothing that the Attorney-General could give that was not furnished in the letter of the President.

Mr. RAYNER. The resolution was addressed to the Attorney-General. The resolution reads:

Resolved, That the Attorney-General be, and he is hereby, directed to inform the Senate—

1. Whether legal proceedings under the act of July 2, 1890, have been instituted by him or by his authority against the United States Steel Corporation on account of the absorption by it in the year 1907 of the Tennessee Coal and Iron Company, and if no such proceedings have been instituted state the reason for such nonaction—

Not motives, but to state reasons for such nonaction—

2. Whether an opinion was rendered by him or under his authority as to the legality of such absorption, and if so, attach a copy if in writing, and if verbal, state the substance of it.

Mr. HOPKINS. Mr. President——

Mr. RAYNER. Let me finish now, because the question deserves an answer. The Attorney-General never responded, but the President answered by saying:

After sending this letter I was advised orally by the Attorney-General that, in his opinion, no sufficient ground existed for legal proceedings against the steel corporation, and that the situation had been in no way changed by its acquisition of the Tennessee Coal and Iron Company.

I have thus given to the Senate all the information in the possession of the executive departments which appears to me to be material or relevant on the subject of the resolution. I feel bound, however, to add that I have instructed the Attorney-General not to respond to that portion of the resolution which calls for a statement of his reasons for nonaction.

Mr. HOPKINS. Now, if the Senator will allow me at that point——

Mr. RAYNER. Will the Senator let me finish?

Mr. HOPKINS. Does the Senator decline to be interrupted?

Mr. RAYNER. Oh, no; I do not. I want the Senator to interrupt me, but just let me finish the sentence. I have no objection to being interrupted.

As I understand—I am not quite certain about this, and if I am wrong any member of the Judiciary Committee can correct me—but, as I understand, the President declined, and the Secretary of Commerce and Labor declined, to furnish to the Judiciary Committee, when they first called upon the department, papers that were absolutely necessary for a proper investigation of this case. If I am wrong in my recollection, any member of the Judiciary Committee can correct me.

I am satisfied that the papers were called for, and whether they have since been produced or not, I know that the Secretary of Commerce and Labor, or one of his subordinates, is said to have taken a trunkful of those papers and carried them to the executive department.

Mr. HOPKINS. Mr. President——

Mr. RAYNER. One moment—and when we called on the Secretary of Commerce and Labor for those papers we were told that they had been taken up to the President of the United States, and that we could not get them.

Mr. HOPKINS. Mr. President——

Mr. RAYNER. I think that answers the Senator's question, if I am right.

The VICE-PRESIDENT. Does the Senator from Maryland yield to the Senator from Illinois?

Mr. RAYNER. Yes.

Mr. HOPKINS. The point at issue between the Senator from Maryland and myself is as to the letter of the President covering the information that was called for by the Senate from the Attorney-General. The Attorney-General communicated that resolution to the President of the United States; the President set forth in detail all the testimony that had been taken upon that subject and fully advised the Senate upon the subject. The only issue, as I now remember, was as to whether the Senate had a right to call for the reasons or motives of the Attorney-General for nonaction.

The Senator from Maryland has not cited, and can not cite, a precedent that will warrant the Senate in calling for a motive or a season. The decisions the Senator has read from the courts have no relation to the subject, and there is no precedent that would warrant the Senate in calling for the reason or the motive of an executive officer for nonaction.

We have a right to ask any of the departments for papers or other information touching subjects of that kind. I undertake to say that the present administration has never failed to comply with the request of the Senate or the House upon a subjust of that character.

Mr. BAILEY. Mr. President, I have no objection to yielding to Senators, except I do not want the only matter I am concerned about obscured by this discussion as to the recent conduct of the President.

Mr. HOPKINS. I appreciate, Mr. President, the position of the Senator from Texas, and I understand his contention is entirely different from that of the Senator from Maryland, but the speech of the Senator from Maryland was——

Mr. BAILEY. The difference is, Mr. President, that whether the President of the United States ordered those papers sent to him for the purpose of withholding them from Congress is a question of fact about which I am not advised; and I am not willing to say it is true, because I do not know it is true; and I am not willing to say that it is not true, because I have heard that it is true. I simply do not want this matter of principle, as I understand, to become confused and obscured by a controversy over a question of fact.

Mr. HOPKINS. Mr. President, I have no desire to confuse or mislead the Senate upon the proposition raised by the Senator from Texas, but when the Senator from Maryland digresses from the real issue that is presented by the Senator from Texas and makes the statement that he does, I think in justice to the Senate, as well as to the President of the United States, some Senator should make a statement giving the true position of the President of the United States upon this subject. I have here the letter that the President sent to the Senate of the United States, and this is the language that he used upon that point. He first said:

I have thus given to the Senate all the information in the possession of the executive department.

Mr. BAILEY. Mr. President, I am not willing to have this debate diverted from the proper channels to a controversy over the attitude of the President.

Mr. HOPKINS. I will say, Mr. President, to the Senator from Texas that I have only a few lines to read, and I think, in justice to us all, that I should be permitted to present them, so that they will go in the RECORD as an antidote to what the Senator from Maryland has said.

Mr. BAILEY. The trouble is that all the Senator is saying, following what the Senator from Maryland is saying, goes into the RECORD between what I intended to say; and if anybody happens to read the CONGRESSIONAL RECORD he will find it difficult to understand this controversy when new matter and irrelevant matter is introduced.

Mr. HOPKINS. If the Senator from Texas will have the Senator from Maryland withdraw his remarks, then I shall have nothing further to say.

Mr. BAILEY. I will tell you what I will do——

Mr. RAYNER. What remarks does the Senator from Illinois want me to withdraw?

Mr. BAILEY. I rather think, Mr. President, that the Senator from Maryland is well equipped to take care of himself, and I am not trying to protect him from the Senator from Illinois, because he needs no protection from anybody at any time. I am simply trying to protect my resolution from an irrelevant discussion.

Mr. HOPKINS. Will the Senator——

Mr. BAILEY. I admire the Senator's opinion about the President's conduct, but the President soon retires, and I do not want to disturb him on his African hunt by the echoes out of the Senate Chamber in the closing hours of his administration. [Laughter.]

Mr. HOPKINS. The fact that he is very soon to retire——

Mr. BAILEY. I am willing that he should go out in peace, provided he goes not to return. [Laughter.]

Mr. HOPKINS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maryland yield further to the Senator from Illinois?

Mr. RAYNER. If the Senator from Illinois will tell me what he is talking about I will yield to him. [Laughter.]

Mr. HOPKINS. Mr. President, I can not do that, and there is no Senator in the Chamber who could do that for the Senator from Maryland.

Mr. RAYNER. Or for anyone else, I am afraid.

Mr. HOPKINS. Under the circumstances——

Mr. RAYNER. I decline to yield further.

The VICE-PRESIDENT. The Senator from Maryland declines to yield further.

Mr. RAYNER. The question that I was addressing myself to was the resolution of the Senator from Texas, and I merely cited this instance. If I am wrong about that episode, I suppose I can be corrected. Suppose I am entirely wrong about it; suppose there never had been an effort upon the part of the President to direct the department, that would not alter the question. The question here is whether or not the departments, in answer to the Senate, have a right to say that they send information by "direction of the President." That is the language of the resolution:

Resolved further, That the Secretary of the Senate be instructed to examine the files of the Senate for the Sixtieth Congress—

If he examines the files and does not find any such documents, it does not alter the proposition of law that is involved in this resolution—

and whenever he finds a similar communication from the head of any department stating that such communication was made by the direction of the President—

If he does not find any of them, I suppose the Senator from Illinois will be gratified, and if he does find them, he shall return them, because the departments are not justified in sending any communications to the Senate of the United States stating that such communication was made by the direction of the President. I give you an instance——

Mr. HOPKINS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maryland yield to the Senator from Illinois.

Mr. RAYNER. Yes; I will yield for a question.

Mr. HOPKINS. The Senator from Maryland and other Senators are not alone in maintaining the dignity of the Senate. The position that I took is that in the discussion of that question we should not be diverted to other questions and misrepresent the position of the President of the United States.

Mr. RAYNER. Mr. President, I stand upon the answer in this case. I want nothing further. I am not misrepresenting the President's position. I am taking his own statements here. There is no misrepresentation. He stated it himself, and in reference to this transaction he goes on to say:

As to the transaction in question, I was personally cognizant of and responsible for its every detail.

Now I have said about all that is necessary for me to say. I want to repeat, however, in the strongest way that I can, that no department has the right to send any communication to the Senate stating that such communication was made by the direction of the President, or use any equivalent expression thereto. If there has been no such communication, then the Secretary of the Senate will not return it.

I want to conclude by saying that I think this is one of the most important questions that has ever come before the Senate. I think that the departments are responsible to us. I know my ideas take a little broader scope than the resolution; but I say the departments are responsible to us, and when the President denies them the right to send us communications on subjects within our control and under our jurisdiction, the denial of such a right strikes at the very root of our institutions. It invests the President with dictatorial power, it makes the heads of the departments paramount to the body that created them. It blocks the pathway of legislation by enabling officers of the Government to suppress all information upon which legislation can be based, and to tell me that the President, who is simply vested with enumerated executive functions and nothing more, and that his advisers and subordinates, deriving their powers partly from this body, can defiantly challenge the process of the Senate upon a subject within its jurisdiction is a proposition that I utterly repudiate, and that could not possibly prevail among any people pretending to be liberated or under any form of government professing to be free.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 28304) granting certain obsolete ordnance for ornamental purposes.

The message also announced that the House had passed the following bills:

S. 671. An act to construct a road along the south bank of the Anacostia River;

S. 8187. An act to change the name of the Washington Hospital for Foundlings; and

S. 8520. An act requiring reports of the Hospital for Foundlings to be made to the Commissioners of the District of Columbia.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

H. R. 21003. An act fixing the compensation of certain officials in the customs service, and for other purposes;

H. R. 27053. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910; and

H. R. 28167. An act to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public building acts, and for other purposes.

RELATIONS BETWEEN CONGRESS AND THE EXECUTIVE DEPARTMENTS.

The Senate resumed consideration of the resolution submitted by Mr. BAILEY on the 1st instant.

Mr. BAILEY. Mr. President, before I finish complying with the request of the Senator from Ohio [Mr. FORAKER] to read the names of those who were on the Judiciary Committee when this report was made, I want to respond a moment to the very pertinent inquiry made by the Senator from Iowa [Mr. DOLLIVER] as to whether there was a distinction between the power of Congress over the departments and the power of a single House of Congress. I call the Senator's particular attention to the fact that that very question was considered by the Judiciary Committee, and the right they have affirmed was not the right of Congress to command them, but the right of either House. Mr. President, for the benefit of the Senator from Iowa and other Senators who have not taken the trouble to read this report, I want to read another paragraph:

It is believed that there is no instance of civilized governments having bodies representative of the people or of states in which the right and the power of those representative bodies to obtain in one form or another complete information as to every paper and transaction in any of the executive departments thereof does not exist—

Now, mark this—

even though such papers might relate to what is ordinarily an executive function, if that function impinged upon any duty or function of the representative bodies.

A qualification of this general right may under our Constitution exist in case of calls by the House of Representatives for papers relating to treaties, etc., under consideration and not yet disposed of by the President and Senate.

Returning, I read, as the Senator from Ohio requested me to do, the names of those who signed the views of the minority. The first is the Hon. James L. Pugh, next is the Hon. Richard Coke, next the Hon. George G. Vest, and the fourth and last name signed to it is that of Hon. Howell E. Jackson, who was transferred from this Chamber to a seat on the circuit bench from which he was appointed to a place on the Supreme Bench of the United States; and that, too, as I am reminded by the distinguished Senator from Mississippi [Mr. MONEY], by a Republican President. He was a man of such eminent virtue and talent that a Republican President of the United States, who had served with him, I believe, in the Senate, called him to the highest judicial tribunal of the world. Those were the men who, after a long and patient and conscientious consideration of the question, all united in saying that the Senate has the right and power to demand these papers and this information, and that no head of an executive department has the right to deny us.

Mr. President, that is not all. Not only do these two reports concur in affirming my doctrine, but President Cleveland himself did not go to the extent of denying it. This pamphlet contains not only the majority report and the minority views, but it contains the message of Mr. Cleveland. But before I pass to Mr. Cleveland's message I want to say, that until I examined these names, I had supposed that Senator George, of Mississippi,

participated as a member of the Judiciary Committee in the discussion and decision of this question. I find, by referring to the Congressional Directory, that he was a member of the Judiciary Committee in the Forty-ninth Congress. I do not find, however, that he signed either report. I am free to say, without intending any invidious distinction, that I would attach more value to the opinion of Senator George than to the opinion of any man whose name is signed either to the majority or the minority report.

Mr. MONEY. I will say to the Senator that I perhaps had more confidential relations with the distinguished Senator from Mississippi than any other Member, and I know that he did concur in their opinion.

Mr. BAILEY. I am glad to have that statement made here, and to have it printed in the RECORD, because I am sure that greater praise than I have given or greater praise than I could give to Senator George would still fall short of his merit. He was one of the greatest lawyers of the century in which he lived, and though I do not find his name signed to this report, it is sufficient that the Senator from Mississippi says he concurred in it, and the Senator from Mississippi is supported in his recollection by the fact that Senator George did participate in the debate and did affirm this doctrine.

Now, passing to the message of Mr. Cleveland, we find this:

> While it is by no means conceded that the Senate has the right in any case to review the act of the Executive in removing or suspending a public officer upon official documents or otherwise, it is considered that documents and papers of that nature should, because they are official, be freely transmitted to the Senate upon its demand, trusting the use of the same for proper and legitimate purposes to the good faith of that body.

The President himself denied the Senate's right to have the papers in that particular case because, he said, they were private papers. Here is his statement:

> Against the transmission of such papers and documents I have interposed my advice and direction. This has not been done, as is suggested in the committee's report, upon the assumption on my part that the Attorney-General or any other head of a department "is the servant of the President, and is to give or withhold copies of documents in his office according to the will of the Executive and not otherwise," but because I regard the papers and documents withheld and addressed to me or intended for my use and action purely unofficial and private, not infrequently confidential, and having reference to the performance of a duty exclusively mine.

Thus the President says he withheld those papers, not because he had a right to withhold public papers, not because he had the power to direct the head of a department to withhold papers and information relating to our matters, but he withheld them because he regarded them as private, confidential, and not as official papers, and relating to a function exclusively his own. Thus in that great controversy, the greatest of its kind in the annals of Congress, we have the majority, the minority, and the President, whose conduct had been called into question, all concurring in the doctrine that the Senate has the right to demand; and having the right to demand it, it has the power to enforce its demand for those papers and documents within the possession of the heads of departments and relating to matters over which we have jurisdiction and control.

If any Senator here is conscientiously averse to deciding this question now, it is permissible and proper for him to vote for its postponement by referring the resolution to a committee. But it passes my comprehension that in the face of the unanimous judgment of the great Senators and great lawyers who were charged in that Congress, as it is now proposed to charge the Judiciary Committee of the Senate, with the consideration of this question we should now hesitate or disagree.

Mr. President, it would become the dignity of the Senate, it would vindicate its privileges and establish its power, if every Senator here and now would permit this resolution either to be voted on as it stands or permit the substitute which the Senator from Iowa intends to propose to be voted on and adopted as he has prepared it. I am not insistent on sending these messages back to the heads of departments. If you are delicate about wounding their feelings, I will join you in an effort to save yourselves that unpleasant work. If you are for party reasons unwilling to appear to affront your party associates in the executive departments, I am ready to eliminate that from the resolution, and I am ready to agree, and I will be content to agree, to a naked declaration that the Senate has the right and power to demand these papers, and that no head of a department has the right or power to refuse a compliance with our demand.

Are you willing to do that? All I want is a settlement of this question of the Senate's privilege. You are entitled to that. You are the majority. No resolution can go to the head of a department without you so will it, and with your majority the dignity and the privilege and the power of the Senate are under your control, and upon you must rest the responsibility. I have done my duty.

Mr. CLAPP. Will the Senator yield for a question?

Mr. BAILEY. Certainly.

Mr. CLAPP. Without any legislation defining the form, without any legislation calculated to afford a remedy, would a resolution passed by this body settle the question any further than the mere declaration of this body of its privileges and prerogatives? In other words, would it not leave us just where the report in the case referred to left the Senate at the time the report was made? Instead of offering to join us in a resolution, why not offer to join in formulating legislation that will be effective if within the power of Congress to enact it?

Mr. BAILEY. My own opinion is that no legislation is necessary. I would very cheerfully join in any that is; and if the Senator from Minnesota shall deem it necessary to enact a statute to punish the head of a department for refusing to comply with a resolution sent him by the Senate, I will cheerfully support it. But I had not supposed that it was either necessary or desirable to go that far.

For more than a hundred years this question was never raised. For a hundred years a line of unbroken precedents establishes the right of the Senate to demand information and the duty of the departments to supply it. The one exception was that out of which this report arose, and as the Senator will perceive that the refusal in that case was not based upon the denial of our right to call for papers or information relating to matters within our jurisdiction, but was distinctly put upon the ground that the papers in that case were private and confidential and related entirely to a function exclusively executive.

Mr. HOPKINS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Texas yield to the Senator from Illinois?

Mr. BAILEY. Certainly.

Mr. HOPKINS. I desire to ask the Senator from Texas if the Senate has ever in its history defined by rule or resolution the form in which a response should come from the executive departments?

Mr. BAILEY. It has not, because it was never deemed necessary to do so, as no head of a department ever before defied a Senate resolution. No head of a department ever before intimated that the Senate did not have the power to demand this information.

Mr. HOPKINS. Does this defy the Senate? Is it not simply a form of expression indulged in, and is not all that it is necessary on the part of the Senate to indicate that that form of response to a resolution of the Senate is not in accordance with the views of the Senate, and will not that be complied with by the departments hereafter?

Mr. BAILEY. I refer that question to the Senator from Minnesota. The Senator from Minnesota objects to my resolution because it has no teeth in it; the Senator from Illinois objects to it because it is a little too strong. Now, between these two extremes I have tried to find a middle course. I have tried to find a course that sufficiently vindicates the privileges of the Senate without giving any just cause of offense to the head of a department. I think I have found it. But if my proposal is not deemed proper, I will vote for a resolution, if the Senator from Illinois will offer it, declaring that this is not a proper form, and that hereafter the Senate will not receive a response couched in this language.

Mr. HOPKINS. Would not a resolution of that kind be much better than the one presented by the Senator from Texas, which proposes that all these communications shall be returned?

Mr. BAILEY. That is a small matter, or at least a comparatively small matter. I am not wrangling about it.

Mr. CUMMINS rose.

Mr. BAILEY. I shall be glad to have the Senator from Iowa offer his substitute and make such observations as he deems proper.

Mr. CUMMINS. Inasmuch as the discussion is drifting toward the form of the resolution which ought to be adopted, I beg to offer a substitute, and I ask that it be read to the Senate.

The VICE-PRESIDENT. The Senator from Iowa proposes a substitute, which will be read.

The Secretary read as follows:

> Whereas it appears from various communications received by the Senate from certain heads of departments that such heads of departments use language which may imply that they respond only under the direction of the President; and
>
> Whereas it is of the highest importance that there be no misunderstanding respecting the attitude of the Senate upon the subject: Be it therefore
>
> *Resolved*, That the Senate hereby declares its well-established and continuously exercised right to direct heads of departments to furnish to the Senate papers, documents, and information in all proper cases, and that such heads of departments are bound to furnish the same without the interference or intervention of any other authority whatsoever.

Mr. BAILEY. I suggest to the Senator from Iowa that the expression "in all proper cases" might leave room for a differ-

ence. If he will strike out those words and say, "in all cases over which the Senate has jurisdiction and control." It will obviate that trouble and make plain what the Senate intends. If a majority here are willing to do that I will accept that, with the change which I suggest to the Senator, in lieu of the resolution which I have offered.

Mr. BEVERIDGE. I call the attention of the Senator from Iowa to the fact that the suggestion of the Senator from Texas would, if it was adopted, be a violation of our form in which for a hundred years we have couched all requests for information to the executive department, to wit, "If in the opinion of the President it be not incompatible with the public interests." Why not say "proper cases?"

Mr. BAILEY. This does not touch the President. This is directed to the heads of departments.

Mr. BEVERIDGE. I do not concede, so far as one person is concerned, the right of the legislative department to demand from the executive department——

Mr. CUMMINS. I do not accept the suggestion of the Senator from Texas with regard to the change in the resolution I have offered. I believe the words "in all proper cases" designates sufficiently those cases in which the Senate has the right to call upon the departments for documents, papers, and information. I have no desire to discuss the principle involved. As I view it, there can hardly be a difference of opinion upon it, and I heartily agree with every proposition announced by the Senator from Texas upon this subject. I do not, however, think that his resolution is quite so appropriate and pertinent to the particular matter, as it now appears to the Senate, as the resolution which I have offered, and therefore I have suggested it.

Mr. FORAKER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Ohio?

Mr. CUMMINS. With pleasure.

Mr. FORAKER. I am pleased with the form of resolution offered as a substitute by the Senator from Iowa, but if he leaves in the resolution the words "in all proper cases" there will be difficulty about the interpretation of it, perhaps.

I will say what perhaps may be information to Senators, although it is based upon their action, that on the 25th ultimo a resolution was offered in the Senate and adopted by the Senate, directing the Secretary of War to send to the Senate all papers on file in the War Department relating to the appointment of Dr. Charles A. L. Reed, a citizen of Ohio, to an official position in the Army Medical Reserve Corps. From day to day I have been looking to see the answer to it, but none has come. My colleague, I should say, I being absent that day, introduced the resolution by my request.

Doctor Reed is a citizen of my State and a fellow-townsman. I saw it stated in the newspapers that certain communications had been placed on file of such a character that I felt there ought to be definite advice about it. I had a definite purpose and a perfectly legitimate purpose. No answer has yet come.

I learned last night in an informal way and in a confidential way that the Secretary of War does not intend to pay any attention to the resolution; that he intends to ignore it because he has been so directed by the President. I can scarcely believe that such can be the case, for resolutions of that character from the beginning of the Government have been passed by the Senate and passed by the House, and I do not know of an instance where an answer has been refused.

In the report cited by the Senator from Texas in his argument this morning, a number of cases very similar in character are cited by that very able committee in support of the conclusions reached, that the Senate had absolute control over the heads of departments and over all papers on file in those departments with respect to which the Senate had any duty to perform.

If we say only in "all proper cases," who is to determine what is a proper case? It may be the Senate would be as free to determine it as if we employed the language suggested by the Senator from Texas, but it seems to me the language suggested by the Senator from Texas has a clearer and more definite meaning, because it has been practically adjudicated by the practice of the Senate and by the rulings of the courts.

I hope the Senator from Iowa will accept that as a modification of his resolution, which I think is a very good resolution in form, and I think it is necessary we should pass that or something else. I am glad the Senator from Texas is willing to accept it as a substitute.

Mr. CUMMINS. Mr. President, I do not at this moment perceive any essential difference between the words I have used in the resolution and those suggested by the Senator from Texas. The idea that is intended to be conveyed must be plain to every Senator. We can not at this time determine whether any particular resolution adopted and calling for information is within the jurisdiction or control of the Senate. That must be determined at the time. I can conceive of a great many instances in which the Senate might call upon the head of a department for information and in which the department might rightfully and lawfully refuse to give that information. It is impossible to determine that in advance.

It may be that after a moment's reflection I shall be willing to accept the substitution of the words "jurisdiction and control" for the words "in all proper cases." I do not, however, perceive just now any additional strength that would be given to the resolution by those words. The question before the Senate is not with regard to the propriety of any particular resolution. It is whether the head of a department answers by the direction of the President or whether he answers under the command of the Senate. This is the question which is suggested in either of the resolutions, and it is to that point, and that alone, that my substitute was directed.

Mr. BAILEY. I believe, upon reading and comparing the two resolutions, the Senator's substitute is in some respects preferable to my original resolution, because it avoids anything like an unnecessary conflict or affront; and if the Senator will simply avoid the indefinite suggestion, "in all proper cases," and define the cases, as he easily can in a few words, as cases within our jurisdiction and control, I not only will cheerfully accept the substitute, but I believe I would prefer it.

I hope the Senator will see his way clear to define the cases, instead of leaving it a matter of difference between the heads of departments and the Senate hereafter as to what is a proper case.

I ask the Senator this, with a view of bringing our minds to the same point: The Senator from Iowa considers any matter within the jurisdiction and control of the Senate as a proper case, does he not?

Mr. CUMMINS. I do.

Mr. BAILEY. I think there can be no room for difference about that. A department might say that the resolution said only "in all proper cases," and it might say that the particular case before it was not a proper case. If you eliminate that expression and say "in every case within the jurisdiction and control of the Senate," then you remove all ground for difference on that question. I speak for myself, and am authorized to speak for no one else, but I think that with that change the Senator could reasonably expect to have the full vote on this side of the Senate for his resolution.

Mr. CUMMINS. Mr. President, I have been thinking hard in the last moment or two with respect to the scope and effect of the suggestion made by the Senator from Texas, and I believe I will accept it and allow those words to be substituted for the ones I have used. I am inclined to think, however, that they are rather a limitation than an extension of the substitute.

The VICE-PRESIDENT. The Senator from Iowa can modify his resolution. It is within his control.

Mr. ALDRICH. Of course, I have no control over the wishes of the Senator from Texas, but I think he will agree with me that this is not a matter to be discussed and decided upon between two Senators in a private conference on the subject. My motion to refer will apply also to all amendments which are suggested. I make the suggestion only for the purpose of saving the time of the Senate.

Mr. CUMMINS. I have amended the substitute in accordance with the discussion upon the floor.

The VICE-PRESIDENT. The Senator from Iowa modifies his proposed substitute. It will be read as modified.

The Secretary read as follows:

Whereas it appears from various communications received by the Senate from certain heads of departments that such heads of departments use language which may imply that they respond only under the direction of the President; and

Whereas it is of the highest importance that there be no misunderstanding respecting the attitude of the Senate upon the subject: Be it therefore

Resolved, That the Senate hereby declares its well-established and continuously exercised right to direct heads of departments to furnish to the Senate papers, documents, and information in all cases within its jurisdiction and control; and that such heads of departments are bound to furnish the same without the interference or intervention of any other authority whatsoever.

Mr. CUMMINS. Mr. President, the only reason that has prompted me to suggest this substitute is to avoid what I believe to be an unnecessary rebuke in the resolution offered by the Senator from Texas. I thoroughly agree with him respecting the principle involved, and I agree with him with respect to the danger of allowing the practice to become settled without a declaration upon the part of the Senate as to its rights.

Mr. DOLLIVER. Mr. President, I am one of those who would like a little time for the further consideration of the questions involved in both these resolutions. I do not agree

with the Senator from Maryland [Mr. RAYNER] that this is one of the greatest questions we have ever had, or that its decision goes in any important sense to the foundation of our institutions. Nevertheless, I do not deny the importance of getting the question settled, although I confess that I do not anticipate any permanent settlement of it. The question is as old as controversies between the Executive and the legislative department of the Government.

I am not prepared to dispute the wisdom and the conformity to law and usage of the propositions which have been so ably submitted by the Senator from Texas, but my recollection of the history of the controversies between the President and the Senate is that they raised this and kindred questions from the time of Andrew Jackson down to our own day. I do not see how it is possible here to effect a final settlement of them. On the contrary, I think their real settlement lies not in the passage of resolutions in either House of Congress, but in the observance by both Houses of Congress of the constitutional relations that exist between the coordinate departments of the Government.

I have asked, and I have been able to find nobody willing to vouchsafe the information, What department of the Government do these executive departments belong to? They are described by law as executive departments. They certainly do not belong to the legislative or the judicial branches of the Government of the United States.

It will be a very interesting matter to determine what jurisdiction the legislative department of this Government has over the executive. It has been the custom from the foundation of our Government to ask for information from the executive department, oftentimes, I regret to say, when nobody felt particularly the need of it. It has been a favorite method of introducing subjects for debate in the Senate, and I imagine that the calendar of the Senate would reveal scores, if not more, of these resolutions intended, not to elicit information but solely for the purpose of focusing attention for purposes of debate.

Now, I have a notion on the subject, but I may be wrong about it. I have become so accustomed to obediently bow to the opinion of those who, living among us, are recognized as great lawyers and of those who, being dead, have left the reputation of great jurists behind them, that I venture to differ even in minor particulars with them only with very great reluctance. Yet it seems to me that these reports which have been read here, made by the Judiciary Committee of the Senate in 1886, fall very far from fixing a dogma of constitutional and legal interpretation as respects this matter.

I read not very long ago a very learned opinion by a former Attorney-General of the United States, Caleb Cushing, a great lawyer, who discussed the identical question in relation to the department of the Attorney-General. I believe that that great Attorney-General gave substantially the opinion expressed by the Senate Judiciary Committee in 1886, and yet I am not sure that he went to the bottom of this question.

I have a very strong belief that neither the House nor the Senate have any right to ask the Department of State to reveal the state of diplomatic negotiations which that department is conducting. I have a very strong conviction that neither House of Congress has a right to interrupt the Secretary of War with a request for information as to the movement of armies or the Secretary of the Navy with respect to the movement of ships.

Mr. RAYNER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Maryland?

Mr. DOLLIVER. Certainly.

Mr. RAYNER. I should like to ask the Senator from Iowa, in speaking of revealing the negotiations of the State Department, does not that come under an entirely different power of the Constitution, and in speaking of the Secretary of War, not strictly as a civil officer, but speaking of him in time of war, does not that come under the duty of the President as Commander in Chief?

Mr. DOLLIVER. That is exactly what I am intimating.

Mr. RAYNER. When the President is exercising civil duties he is not Commander in Chief, and when he is not negotiating treaties with the assistance of the Secretary of State, then it does not come under any power of Congress.

Mr. DOLLIVER. The Senator may possibly be right about that. Let me give the Senator another illustration.

Mr. RAYNER. Let me ask one other question. Is there any doubt at all in the Senator's mind that these are executive departments?

Mr. DOLLIVER. No.

Mr. RAYNER. The Constitution says they are executive departments.

Mr. DOLLIVER. That is what I am trying to claim. What I want to know is, where Congress gets authority either out of the Constitution or the laws of the United States to order an executive department about like a servant.

Mr. RAYNER. Each House of Congress has the power to order any one that has any information or documents or papers coming within its jurisdiction and control. The junior Senator from Iowa [Mr. CUMMINS] has put that proposition very plainly. In the case of Kilbourn, and in one case after another——

Mr. DOLLIVER. Those were cases of private citizens refusing to appear and give testimony before committees of the Senate.

Mr. RAYNER. There is another point I should like the Senator to think of—that nowhere in the Constitution and no place in any statute of the United States except one that I have found, and there it crept in unintentionally, are there Cabinet officers or ministers. There is no such thing as a Cabinet officer of the United States. You may call them Cabinet officers, but they are not Cabinet officers.

Mr. DOLLIVER. Before the Senator takes his seat, as I am a learner and desire to get accurate information, I should like to know what statute of the United States there is to determine the rights of the Senate as respects, for example, the Department of Commerce and Labor.

Mr. RAYNER. What statute that determines the powers of the Senate?

Mr. DOLLIVER. What statute would the Senate rely upon, or what provision of the Constitution would it rely upon, if it proposed to enforce the right to interrogate the Department of Commerce and Labor and to require information to be sent here?

Mr. RAYNER. The statute under which the Department of Commerce and Labor was created and organized.

Mr. DOLLIVER. That statute gives the Senate no jurisdiction of that sort.

Mr. RAYNER. But the Supreme Court in Chapman's case and in Kilbourn's case——

Mr. DOLLIVER. But Chapman and Kilbourn were private citizens.

Mr. RAYNER. That is not the proposition. The proposition is that each body has control and jurisdiction over any witness or papers relative to the subject-matter that is inquired into.

Mr. DOLLIVER. There are statutes of the United States for that now, but they are not applicable to this case.

Mr. RAYNER. If the Senator from Iowa will read the decision in the Chapman case, he will find that it covers this whole question.

Mr. DOLLIVER. I took occasion to read it.

Mr. CULBERSON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Texas?

Mr. DOLLIVER. Certainly.

Mr. CULBERSON. I think I can cite the Senator from Iowa to the statute so far as the Department of Commerce and Labor is concerned, if he will permit me. The last paragraph of section 8 of the act creating that department, referring to the Secretary of Commerce and Labor, provides that—

> He shall also from time to time make such special investigations and reports as he may be required to do by the President or by either House of Congress, or which he himself may deem necessary and urgent.

Mr. DOLLIVER. Mr. President, that is what I am trying to get at. That shows that Congress itself has fixed the duty of this department to respond to requests for information.

Now, I want to go a step farther. I hold—and I heard it demonstrated on this floor not very long ago by the distinguished Senator from Pennsylvania [Mr. KNOX]—now about to take up the office of Secretary of State—that it is not only improper, but ridiculous, for Congress to assume the right to interrogate the Attorney-General as to legal proceedings which he has instituted or is about to institute. Yet there are no reservations in this resolution itself as to so plain a matter as that.

While I have been sitting here listening to these arguments and very much interested in them, it has seemed to me—I may be wrong about it—that the object of the resolution offered by the Senator from Texas was not more to vindicate the dignity of the Senate of the United States than it was to frame a criticism and a rebuke to the President of the United States.

Mr. MONEY. Will the Senator permit me to interrupt him?

Mr. DOLLIVER. Certainly.

Mr. MONEY. I do not see the Senator from Texas here, but I am quite sure that he will deny the imputation which the Senator from Iowa makes.

Mr. DOLLIVER. Mr. President——

Mr. MONEY. I am quite sure that he did not intend anything of that sort. He has explained here with explicit force and clearness that his intention was to vindicate the power and dignity of the Senate over officers of their creation and in the con-

duct of proper business. He has stated that so fully that I hope the Senator from Iowa will not insist upon placing the Senator from Texas in that attitude before the public, but will leave his remark out of the RECORD. If the Senator from Texas were here to defend himself, I would not have risen to interrupt the Senator.

Mr. DOLLIVER. Yet the Senator from Texas gave a rather abrupt expression of thankfulness as to the retirement of the President, which would seem in a dim way to connect the question which he was debating with the circumstances of to-morrow. But, lest I should do the Senator from Texas an injustice, I will not go astray when I say that the calm, judicial temperament of the Senator from Maryland, for which we always have such respect in the Senate Chamber, was obviously colored by his enthusiasm about the events about to occur at the east portico of the Capitol.

Mr. RAYNER. Mr. President, I merely rise to say that I have no calm, judicial temperament. [Laughter.]

Mr. DOLLIVER. I supposed that the Senator had the sense of humor at any rate. In fact, the Senator's argument and citation of cases were so obviously incidental to the attitude of his mind toward the retiring President that so far as I am concerned, at least, the clearness of his legal conclusions was substantially clouded by the temper and spirit of his observations.

I maintain that it is just such an attitude as that growing up in the Congress of the United States that has raised this question which goes to the foundations of our institutions. I hope we may never have another Congress of the United States when the floor of the Senate and the floor of the House shall be used as arenas for the purpose of reproaching and disparaging the motives of any coordinate department of the Government of the United States.

But if we are to go on in the spirit which has characterized the proceedings of the last few months of the present Congress, I hope the time will never come when we will have a man at the head of the executive department so wanting in vigor and virility and in self-respect as to fail to reply in kind to insinuations and disparagements of his motives emanating from either House of the Congress of the United States. [Applause in the galleries.] I do not stand here——

The VICE-PRESIDENT. The Senator from Iowa will suspend. The Chair informs the occupants of the galleries that applause is forbidden by the rule of the Senate. The Senator from Iowa will proceed.

Mr. DOLLIVER. I am not here for the purpose of defending——

Mr. BAILEY. Mr. President, will the Senator from Iowa yield?

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Texas?

Mr. DOLLIVER. Certainly.

Mr. BAILEY. I was called from the Chamber a moment ago to answer some of my constituents. I understand that in my absence the Senator from Iowa imputes to me a desire to reflect on the President in presenting this resolution. Have I been rightly informed?

Mr. DOLLIVER. I do not desire to make that imputation. I was saying that I was impressed by the fact that the debate indicated such glee and enthusiasm over the immediate departure of the present President as to indicate that the attitude of mind was not one entirely sympathetic.

Mr. BAILEY. Of course I would not be candid if I pretended an amiable frame of mind toward the President, for it is not my frame of mind, but knowing that, I carefully and deliberately abstained from any expression with respect to the present Executive when it was provoked by interruption, and in offering the resolution I carefully avoided raising any issues with him; and I stated on the floor that I did it in view of the fact that his term so early expired.

Mr. DOLLIVER. That is all true, and I would not desire to put the Senator in the attitude of introducing this question for the purpose of disparaging the President, although I confess that in at least one sentence which the Senator uttered with his usual eloquence and skill I did detect a pleased exultation arising from the fact that to-morrow ends the administration of Theodore Roosevelt.

My friend from Texas read at great length from a report of the Judiciary Committee in 1886. I was disappointed that he concealed from the Senate, or, at least, failed to give the Senate, the information that while that report was filed in February, several weeks before the expiration of Congress, it was never made the basis of any action by the Senate of the United States. How does the Senator explain that, if this is so important a question that it affects the prestige and dignity of the Senate?

Mr. BAILEY. Does the Senator want a reply?

Mr. DOLLIVER. I should like to have it.

Mr. BAILEY. There was nothing to be settled, because there was absolutely no division of opinion between the majority and the minority upon the fact as the President of the United States stated it.

Mr. DOLLIVER. My recollection is that there was a resolution offered by the committee as the result of its deliberations.

Mr. BAILEY. That is true; but when the President of the Unitd States sent his message, which he did immediately after the report of the committee was announced, he distinctly declared that he did not challenge the right of the Senate to have the papers, documents, or information which they desired, and that his only ground in refusing to send the papers which the Senate had asked for was that they were private papers and not official.

Mr. DOLLIVER. Mr. President, I do not regard it as a part of my duty, and I certainly would not desire to occupy the time of the Senate at this time, in defending the administration of the last seven years. But I do feel that these closing hours of the administration ought not to be disturbed by criticisms which are not at all timely nor practical; which serve rather to spoil the grace of a great national festival.

I do not believe the Senate of the United States can add anything to its prestige or to its dignity by following in this ineffective way the retiring figure of the President of the United States.

Mr. RAYNER. I should like to ask the Senator a question.

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Maryland?

Mr. DOLLIVER. Certainly.

Mr. RAYNER. What disposition does the Senator from Iowa make of the report which comes into the Senate to-day charging the President of the United States with violating the laws of the United States?

Mr. DOLLIVER. I do not understand to what the Senator refers.

Mr. RAYNER. The case of the Tennessee Coal and Iron Company.

Mr. DOLLIVER. Mr. President, no such report has been submitted. On the contrary, I saw in the newspapers——

Mr. RAYNER. I have the report.

Mr. DOLLIVER. That the Committee on the Judiciary agreed that each member might state his own opinion.

Mr. RAYNER. I have the report in my hand, and it is practically the report of the committee.

Mr. DOLLIVER. By whom is the report signed?

Mr. RAYNER. The report is signed by Mr. KITTREDGE——

Mr. FULTON. Mr. President, will the Senator allow me?

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Oregon?

Mr. DOLLIVER. Certainly.

Mr. RAYNER. I yield to the Senator.

Mr. FULTON. As a member of the Judiciary Committee—as, of course, is the Senator from Maryland—I think it is proper to say that the committee made no report further than to say that the members were unable to agree to any recommendation in the premises, and the chairman was instructed by the committee to so report, reserving to individual members of the committee the right to file an expression of their individual views. Any expression that is filed is simply the views of individuals, and does not come as a committee report.

Mr. RAYNER. Mr. President, one moment.

Mr. HOPKINS. Mr. President, if the Senator will allow me——

Mr. RAYNER. I have the floor. I want to answer about the Judiciary Committee.

Mr. HOPKINS. Just a moment. I have the report that has been presented. It does not purport to be from the committee at all. It reads:

Mr. CULBERSON (for himself and Messrs. KITTREDGE, OVERMAN, and RAYNER), from the Committee on the Judiciary, submitted the following views.

So it is the report of individuals and not of the committee.

Mr. RAYNER. If the Senator will read the whole of it and not read half of it, he will have a little more information on the subject.

Mr. HOPKINS. Mr. President, I resent the insinuation on the part of the Senator——

Mr. RAYNER. I decline to yield.

The VICE-PRESIDENT. The Senator from Maryland declines to yield.

Mr. RAYNER. I decline to yield to an interruption from the Senator, who could not possibly know anything about this matter.

Mr. HOPKINS. Mr. President——

The VICE-PRESIDENT. The Senator from Maryland declines to yield.

Mr. RAYNER. I want the Senator from Iowa to permit me to state to him that this report ends in this way:

It follows from what has been said that we think the resolution should be answered that, in the judgment of the committee, the President was not authorized to permit the absorption of the Tennessee Company by the Steel Corporation.

That report is signed by Mr. KITTREDGE, Mr. OVERMAN, Mr. CULBERSON, and myself. Then there is another report by Mr. BACON, which virtually coincides with our report. Then there is a report by Mr. NELSON. Then there are the views of Mr. FORAKER, and the views of Senator FORAKER are as follows:

Entertaining this view, I am of the opinion that the question directed to this committee by the Senate, "whether the President was authorized to permit the absorption of the Tennessee Coal and Iron Company by the United States Steel Corporation," should be answered in the negative.

Mr. CLARK of Wyoming. Mr. President——

Mr. RAYNER. One moment. I only want to finish the sentence. Then we have the statement of the President that as to the transaction in question he was personally cognizant of and responsible for its every detail.

Mr. CLARK of Wyoming. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Wyoming?

Mr. DOLLIVER. Certainly.

Mr. CLARK of Wyoming. So far as I know, there is but one report from the Committee on the Judiciary upon the subject-matter which in the last three minutes has been made the subject of discussion, and that is the report that was agreed to and made by the chairman of the committee, at the command of the committee, that the committee was unable to agree upon a report and reported the resolution back to the Senate without recommendation.

Mr. RAYNER. That is correct.

Mr. CLARK of Wyoming. Any other report purporting to come from that committee is not a report from the committee, but a registration of the individual views of some individual members of the committee.

Mr. RAYNER. Constituting, Mr. President, a majority of the committee.

Mr. CLARK of Wyoming. It is not proper for me to go into what occurred in the committee, but upon no single phase of it did the majority of the committee meet with their minds.

Mr. RAYNER. But they met upon the main proposition that the President of the United States had violated the law.

Mr. DOLLIVER. That is exactly what the chairman of the committee said they did not do.

Mr. HOPKINS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Illinois?

Mr. DOLLIVER. Certainly.

Mr. HOPKINS. In response to the Senator from Maryland [Mr. RAYNER], I desire to call the attention of the Senate and of the country to the fact that the Judiciary Committee is composed of 13 members and that the part of the report which the Senator from Maryland has been reading is the report made by only 4 members of that committee, of which he was one; and it states what I undertook to show to the Senate before, that it is not the report of the committee, but of individual members, and the Senator from Texas [Mr. CULBERSON], who prepared the report, as appears from the paper here, expressly states that he makes it from the Judiciary Committee, giving his views, together with those of Messrs. KITTREDGE, OVERMAN, and RAYNER. So, when the Senator from Maryland undertakes to predicate any statement of his upon this report here, it is not the report of the committee, but of an individual member of the committee.

Mr. DOLLIVER. Mr. President, I do not intend to speak of the administration of the President, now nearly at an end. It is among the longest in time in the history of our Government. It has had to deal with a larger variety of questions than any administration in recent times, at least. It has had to deal with a new and strange kind of questions. It may have succeeded or it may have failed; it may have succeeded in part and it may have failed in part; but whatever its record, it will not be judged by words spoken in the Senate. It will be written in the history of the United States.

One thing may be said in this Chamber without usurping the function of the historian. The President of the United States has not only achieved great results, but I believe he has taken away from his enemies, if he has such, the right to impeach his motives or to disparage that integrity which, after all, constitutes the chief assets of the statesman and the popular leader. He has been in contact with the most difficult questions that have arisen in the modern organization of society, some of them so new and so strange that neither House of Congress has appeared to have the time even to comprehend what was in the President's heart and in the President's mind.

For the last two weeks we have had the atmosphere of both Chambers disturbed by petulant controversies about the reports of commissions made here in presidential messages, and Congress has been so wrapped up and preoccupied with its own matters that it has dismissed with discreditable indifference the far-reaching researches which the President has made in the last months of his administration, throwing useful light on hard and pressing questions that the next generation of Americans will regard as the most important within the jurisdiction of our laws.

We are here vindicating our right to ask information from executive departments, and for two weeks both Houses of Congress have been filled with the suggestion that the President of the United States has no right to seek expert advice upon duties which are put upon him under our institutions in his relation to the Congress of the United States. I am glad that that cheap exhibition of petulance and irritation is nearly at an end.

I rejoice in the success this administration has had in the mighty work which it has undertaken. I appreciate as much as any man the kindly remarks made by the Senator from Maryland [Mr. RAYNER] about that great American statesman who will to-morrow take the oath of our highest office, but I doubt very much whether he will appreciate compliments directed to him for the purpose of disparaging that man whose counselor he has been all these years and who has stood by his side as a faithful friend and helper in all the great emergencies of his administration. When his administration begins, I do not think the American people will forget that Theodore Roosevelt seemed prejudiced in favor of his nomination and leaned strongly in favor of his election and that the President-elect himself is pledged before the American people to carry out in good faith, in the fear of God, the great policies which have made the last seven years of the administration of our Government famous and memorable in the moral and political progress of the United States. [Applause in the galleries.]

The VICE-PRESIDENT. The Chair will again inform the occupants of the galleries that applause is contrary to the rule of the Senate. The Chair trusts that it will not be necessary to again admonish the occupants of the galleries of that fact.

INTERNATIONAL CONGRESS OF APPLIED CHEMISTRY.

Mr. CULLOM. I ask unanimous consent that I may at this time make a report from the Committee on Foreign Relations.

The VICE-PRESIDENT. In the absence of objection, permission to do so will be granted. The Chair hears none.

Mr. CULLOM. I am directed by the Committee on Foreign Relations, to whom was referred the joint resolution (H. J. Res. 261) authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America, in the year 1912, to report it without amendment. I ask unanimous consent for its present consideration.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Illinois?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution. It authorizes the President of the United States to invite the International Congress of Applied Chemistry, about to assemble in the city of London, to hold its eighth meeting in the United States in the year 1912; but no appropriation shall be asked or granted for any expense connected with said congress.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CONDEMNED CANNON TO OHIO NORTHERN UNIVERSITY.

Mr. WARREN. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 28411) to grant two cannon to Ohio Northern University, at Ada, Ohio, to report it without amendment. I ask unanimous consent for its present consideration.

The VICE-PRESIDENT. Is there objection?

Mr. BAILEY. Of course I do not want to object, but I should like to dispose of the matter which we have under consideration.

Mr. WARREN. The bill will only take a moment. It is only six lines.

Mr. BAILEY. I will not object.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Indiana yield to the Senator from Idaho?

Mr. BEVERIDGE. Yes; I yield.

REVISION OF THE PENAL LAWS.

Mr. HEYBURN. Mr. President, I present the report of the conference committee on Senate bill 2982.

The VICE-PRESIDENT. The report will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 2982, being a bill to codify, revise, and amend the penal laws of the United States, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate agree to the House amendment with amendments to sections 7, 19, 20, 37, 51, 95, 125, 126, 140, 187, 200, 226, 227, 243, 253, 254, 255, 256, 257, 262, 263, 276, 295, 300, 321, 322, 323, and 349.

That the House agree to the amendments proposed by the Senate conferees as follows:

Section 7: On page 4, in line 21, after the words "United States," insert the words "or in any place subject to the jurisdiction thereof."

Section 19: On page 12, line 13, substitute a semicolon for the period, and add the following: "and shall, moreover, be thereafter ineligible to any office or place of honor, profit, or trust created by the Constitution or laws of the United States."

Section 20: On page 12 strike out section 20.

Section 23: On page 14 strike out section 23, as follows:

"SEC. 23. No citizen possessing all other qualifications which are or may be prescribed by law shall be disqualified for service as grand or petit juror in any court of the United States, or of any State, on account of race, color, or previous condition of servitude; and any officer or other person charged with any duty in the selection or summoning of jurors who shall exclude or fail to summon any citizen for the cause aforesaid shall be fined not more than five thousand dollars."

Section 24: Page 14, in line 16, strike out the words "or to keep the peace at the polls."

Section 37: On page 22, in line 11, substitute a comma for the semicolon, strike out the remainder of the section, and in lieu thereof insert the following: "shall be fined not more than five thousand dollars or imprisoned not more than five years, or both. And whoever shall knowingly purchase or receive in pledge for any obligation or indebtedness from any soldier, officer, sailor, or other person called into or employed in the military or naval service, any arms, equipments, ammunition, clothes, military stores, or other public property, whether furnished to the soldier, sailor, officer, or other person under a clothing allowance or otherwise, such soldier, sailor, officer, or other person not having the lawful right to pledge or sell the same, shall be fined not more than five hundred dollars and imprisoned not more than two years."

Section 51: On page 28, at the end of the section, add the following: "And nothing in this section shall interfere with or take away any right or privilege under any existing law of the United States to cut or remove timber from any public lands."

Section 95: On page 48, at the end of line 21, add the words "prima facie."

Section 105: On page 53, in line 1, after the word "or," strike out the word "be."

Section 125: On page 63, in lines 3 to 7, amend the proviso so as to read as follows: "*Provided*, That no person shall be deemed guilty of a violation of any such rule unless prior to such alleged violation he shall have had actual knowledge thereof."

Section 126: On page 63, in line 13, strike out the word "and" and insert in lieu thereof the word "or;" and in line 14 substitute a comma for the period at the end of the section and add the words "or both."

Section 140: On page 70 strike out section 140.

Section 142: On page 71, in line 1, strike out the word "now" before the word "provided."

Section 187: On page 98, in line 17, after the word "vessel," insert the words "to the current business of the carrier."

Section 194: On page 100, in line 18, strike out the word "or," before the word "embezzling."

Section 200: On page 104, in line 14, substitute a semicolon for the comma, strike out the remainder of the section, and in lieu thereof insert the following: "and if in effecting or attempting to effect such robbery he shall wound the person having custody of such mail, or put his life in jeopardy by the use of a dangerous weapon, or for a subsequent offense, shall be imprisoned twenty-five years."

Section 226: On page 123, in line 6, before the word "submit," insert the word "knowingly."

Section 227: On page 123, in line 22, before the word "misstate," insert the word "or;" and in line 23, before the word "conceal," insert "for the purpose aforesaid shall knowingly and willfully."

Sections 241, 242, 243: On pages 132 and 133 strike out the word "That" at the beginning of each section and begin the first word of each section with a capital letter.

Section 243: On page 133, in line 13, after the word "shall," insert the word "knowingly."

Section 248: On page 136, in line 19, substitute for the words "and every" the words "or any."

Section 253: On page 140, in lines 9 and 10, strike out the words "being a citizen or other person resident."

Section 254: On page 140, in line 17, strike out the word "American;" and in line 18 substitute for the words "jurisdictional limits" the word "jurisdiction."

Section 255: On page 141, in line 1, strike out the word "American."

Section 256: On page 141 strike out section 256.

Section 257: On page 141, in line 12, strike out the words "State, Territory, or District," and in lieu thereof insert the words "place subject to the jurisdiction;" in line 13 strike out the words "a foreign country, state, or" and in lieu thereof insert the words "any other;" in lines 14 and 15 strike out the words "State, Territory, or District," and in lieu thereof insert the words "place subject to the jurisdiction."

Section 262: On page 143, in lines 13 and 14, strike out the words "jurisdictional limits" and in lieu thereof insert the word "jurisdiction."

Section 263: On page 143, in line 21, before the word "directly," insert the words "or under the jurisdiction thereof."

Section 270: On page 146, in line 11, strike out the word "other" before the word "foreign."

Section 276: On page 150, in line 8, strike out all after the period, and also all of lines 9 and 10.

Section 279: On page 151, in line 20, strike out the word "be" before the word "fined."

Section 295: On page 158 transpose the language of line 10 so that it will read "United States, beats, wounds, or without justifiable cause, im-."

Section 300: On page 161, in line 3, strike out the word "and," at the end of the line, and in lieu thereof insert the word "or."

Section 321: On page 169, in line 15, strike out the words "in any Territory."

Section 322: On page 169, in line 19, strike out the words "in any Territory."

Section 323: On page 169, in line 23, strike out the words "in any Territory."

On page 183 strike out all of lines 21, 22, and 23, reading as follows: "Section 4 of an act to protect all citizens in their civil and legal rights, approved March 1, 1875."

On page 196 strike out all of lines 13 to 20, both inclusive, reading as follows: "No citizen possessing all other qualifications which are or may be prescribed by law shall be disqualified for service as grand or petit juror in any court of the United States, or of any State, on account of race, color, or previous condition of servitude; and any officer or other person charged with any duty in the selection or summoning of jurors who shall exclude or fail to summon any citizen for the cause aforesaid shall be fined not more than five thousand dollars."

Section 349: On page 198, in line 1, strike out the word "from" and in lieu thereof insert the word "on;" in line 2 strike out the word "July" and in lieu thereof insert the word "January;" also in line 2 strike out the word "nine" and in lieu thereof insert the word "ten."

W. B. HEYBURN,
GEORGE SUTHERLAND,
JAMES P. CLARKE,
Managers on the part of the Senate.

R. O. MOON,
HERBERT PARSONS,
SWAGAR SHERLEY,
Managers on the part of the House.

Mr. RAYNER and Mr. FORAKER addressed the Chair.

Mr. BEVERIDGE. I yield to the Senator from Maryland now. I will yield to the Senator from Ohio in a moment.

Mr. FORAKER. I understood that the conference report was before the Senate.

Mr. BEVERIDGE. I thought it was disposed of.

Mr. FORAKER. No; it has not been disposed of.

The VICE-PRESIDENT. The question is on agreeing to the report.

Mr. FORAKER. Before we agree upon the report, I want to understand what that agreement is. What does it do, and what is the effect of it as to the jury law that is now in force?

Mr. HEYBURN. It allows the existing law to stand. The repealing clause that was in the bill as it came back to the Senate has been stricken out; the provision that was reported as a part of the code has been stricken out; and the repealing clause of existing law has been stricken out; and that leaves the law to stand as it is to-day.

Mr. FORAKER. So the law will be unaffected?

Mr. HEYBURN. It will be unaffected by it.

Mr. FORAKER. I merely wanted to understand the fact.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

Mr. HEYBURN. I ask consent that the Secretary be authorized to renumber the sections consecutively; to strike out the headnotes at the beginning of each chapter to sections which have been omitted, and to renumber the headnotes to correspond to the numbers given the sections; to correct the references in one section to other sections; to correct typographical errors; and to correct punctuation as indicated by the committee of conference.

The VICE-PRESIDENT. Without objection, it is so ordered.

Mr. HEYBURN. I desire to state that the purpose of the substitution of the Senator from Arkansas [Mr. CLARKE] for the Senator from Mississippi [Mr. MCLAURIN] on the conference committee was because of the indisposition of the Senator from Mississippi and his inability to be present at the conference.

Mr. SUTHERLAND. Will the Senator from Indiana permit me for a moment?

Mr. BEVERIDGE. Yes.

Mr. SUTHERLAND. Mr. President, in order that there may be no misunderstanding as to the effect of the conference report, there are only two changes made in the conference report just submitted from that originally submitted, the first one being to strike out section 23, which has been read, and also to strike out the provisions in the bill repealing existing law. That leaves existing law on that subject to stand as it is.

The second is to strike out, in section 24, line 15, the words "or to keep the peace at the polls." The committee were of the opinion that the law is inoperative, and that no good purpose is served in keeping those words in existing law. Those are the only changes which have been made.

Mr. FORAKER. There is one inquiry I should like to make before the Senator from Utah takes his seat. What becomes of the penal code? Is it adopted?

Mr. SUTHERLAND. It will be adopted as soon as the House adopts the conference report.

Mr. FORAKER. Yes. The Senate has adopted it with all the clauses that have been added?

Mr. SUTHERLAND. All of the clauses, except section 23, which is not embraced in the penal code and remains upon the statute book.

JOINT COMMITTEE ON REVISION OF THE LAWS.

Mr. HEYBURN. I desire to call up now for consideration, in view of the action just taken by the Senate, Senate joint resolution 140, so as to provide the machinery for the continuation of the work. It will take but a moment.

Mr. BEVERIDGE. Let the joint resolution be read.

The VICE-PRESIDENT. The Senator from Idaho asks unanimous consent for the present consideration of a joint resolution, which will be stated by title.

The SECRETARY. A joint resolution (S. R. 140) to create a joint committee to consider the revision and codification of the laws of the United States.

The VICE-PRESIDENT. Is there objection to the present consideration of the joint resolution which has heretofore been read?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

RELATIONS BETWEEN CONGRESS AND THE EXECUTIVE DEPARTMENTS.

The Senate resumed the consideration of the resolution (S. Res. 317) submitted by Mr. BAILEY on the 1st instant.

Mr. RAYNER. What is the status of the resolution of the Senator from Texas [Mr. BAILEY]?

The VICE-PRESIDENT. The pending question is upon the motion of the Senator from Rhode Island [Mr. ALDRICH] to refer the resolution to the Committee on the Judiciary.

Mr. TILLMAN. Mr. President, I understood that the agreement yesterday was that the resolution of the Senator from Texas should be voted on to-day. It has been discussed for two hours. The Senator from Iowa [Mr. CUMMINS] has offered a substitute, and it does look as if we might dispose of it one way or another.

Mr. RAYNER. The Senator from Texas has accepted the substitute.

Mr. TILLMAN. If we want the resolution referred to the Committee on the Judiciary, we had better do that, because we do not want to leave it hanging in the air. The Senator from Texas has accepted the substitute of the Senator from Iowa.

Mr. ALDRICH. My motion to refer the resolution is pending.

Mr. CULBERSON. I ask for the regular order on the measure now pending before the Senate, the resolution offered by my colleague [Mr. BAILEY].

The VICE-PRESIDENT. The Senator from Texas demands the regular order, which is the question upon the motion of the Senator from Rhode Island [Mr. ALDRICH].

Mr. HEYBURN. I have the floor upon that motion.

The VICE-PRESIDENT. The Senator from Idaho is entitled to speak upon the question.

Mr. HEYBURN. Mr. President, I desire to call attention to the fact that the statutes creating the executive departments define their relation in very exact and comprehensive terms. There are three of the departments to which certain language is applied entirely different from the language applied to the other departments of the Government, and I think perhaps some Senators may have lost sight of that fact. The State Department, the War Department, and the Department of the Navy were created at the beginning of the Government. Congress, in creating those departments, expressly provided that they should be under the direct control of the President. That provision applies to no other executive department; so there is a distinct difference in the status of these departments.

The act of 1789 defined the relation of the Department of War, as it is termed in the Statutes, to Congress and to the President. Section 216 of the Revised Statutes, which is taken from the act of the 7th of August, 1789, provides:

> SEC. 216. The Secretary of War shall perform such duties as shall from time to time be enjoined on or intrusted to him by the President relative to military commissions, the military forces, the warlike stores of the United States, or to other matters respecting military affairs; and he shall conduct the business of the department in such manner as the President shall direct.

That provision is common also to the Navy and it is common to the Department of State, and to those three departments only. Each of the other departments is placed, in terms, under the direction and control of Congress. We can not lose sight of that fact and of the condition of the law in determining the measure of their right or of the propriety of the action of the President.

Mr. WARREN. Then, I take it, the Senator sees the wisdom of having a matter of that kind go to the proper committee, to be put in proper form.

Mr. HEYBURN. I shall certainly vote to send it to the committee. I wanted to call attention to this condition of the statutes, because, unless it was done in my absence, it has not been referred to. I have no intention to make any extended remarks, except to direct the attention of the Senate to the fact that, outside of those three departments, they are placed under the control of Congress itself.

Mr. BEVERIDGE obtained the floor.

Mr. LA FOLLETTE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Indiana yield to the Senator from Wisconsin?

Mr. BEVERIDGE. Certainly.

Mr. LA FOLLETTE. Will the Senator yield to me for a brief statement?

Mr. BEVERIDGE. Certainly.

Mr. LA FOLLETTE. Mr. President, the Senator from Texas in his opening remarks earlier in the day referred to the tardiness of the report made by the Department of Commerce and Labor in response to a resolution which I introduced at the first session of the present Congress. That resolution was introduced on the 28th day of May, but a few days before the

adjournment. It covered a subject of great importance and required investigation in a very large field. It is but just to the department that I should say that at the beginning of this session, indeed upon the first day of the session, the department informed me that it had been impossible to complete the investigation within the time set by the resolution, and asked if I would be insistent, so far as I was myself concerned, upon a partial report being made in conformity with the terms of the resolution upon the first day of the session. I very greatly preferred, Mr. President, that the investigation should be completed as a matter of course, and said that I had no doubt the Senate and every Member of it would very greatly prefer that the investigation should be finished before any report should be made. A report was made, as stated by the Senator from Texas, on the 16th of February. It is a voluminous report and is still in the hands of the printer. It is thorough and, I think, will be a valuable contribution upon the subject-matter covered by the resolution. It is but just, Mr. President, that I should say so much in response to the criticism of the Department of Commerce and Labor by the Senator from Texas.

Mr. BEVERIDGE. Mr. President, I have never agreed to a theory referring to the Judiciary Committee any question of law which the Senate itself is supposed to be competent to resolve. Heretofore I have made objection to such course; and on a great question—because I agree with the Senator from Maryland [Mr. RAYNER] that it is a great question which has been raised—I should not vote to refer such a resolution to the Committee on the Judiciary if there were an abundance of time for the Senate to discuss and investigate it. But it is patent to every one of us that that is not the case. Only a few hours remain until the present session of this body must come to an end; and even the Senator from Maryland, learned lawyer that he is, having cited numerous decisions, as he has, and having made a thorough study of this question for the last twenty-four or forty-eight hours, must himself see that other Senators have not had and can not have time or opportunity to give to this large business the attention and the study it deserves.

It must appear at the very first glance that there is great confusion upon this question, and the difference of opinion becomes more pronounced the longer the question is debated. For example, Mr. President, I will ask the Senator from Maryand if it is not his doctrine, and that of all the rest of us, that all the powers that Congress has and all the powers the President has are bestowed by the Constitution?

Mr. RAYNER. I will answer that question. That is unqestionably my doctrine. Is that the doctrine of the Senator from Indiana?

Mr. BEVERIDGE. It is the doctrine of the "Senator from Indiana," with this difference——

Mr. RAYNER. Oh, there is a difference, is there?

Mr. BEVERIDGE. Yes; and I was glad to hear the Senator this afternoon in his argument driven to the doctrine, which I adhere to, which is that all powers of this and every other department of the Government come from the Constitution, as they are therein expressed or as they may therefrom be properly implied.

Now, Mr. President, I ask the Senator from Maryland, I ask any Senator, to point out in the Constitution, which specifically enumerates the powers of Congress one by one, any power to make these demands? I thought I knew that no such power was there. I have recently read it over, and found that no such power is there.

Mr. RAYNER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Indiana yield to the Senator from Maryland?

Mr. BEVERIDGE. Certainly.

Mr. RAYNER. Does not the Constitution authorize Congress to create the departments?

Mr. BEVERIDGE. The Constitution itself practically creates the departments. I will read the provision in a moment. It leaves it for Congress itself to pass a law saying, from time to time, what departments there shall be.

Mr. FORAKER. I want to answer the Senator from Indiana. I understood him to say a minute ago that he had searched in the Constitution to find authority for Congress to call upon the heads of departments for information. Did I correctly understand him?

Mr. BEVERIDGE. Yes. Will the Senator point it out?

Mr. FORAKER. There is no such express provision in the Constitution.

Mr. BEVERIDGE. No; there is not.

Mr. FORAKER. But I call his attention to what he may have overlooked, and what is stated in this report, what was said by the Judiciary Committee when it was composed of such Republican Members as George F. Edmunds, John J. Ingalls, S. J. R. McMillan, George F. Hoar, James F. Wilson, and William M. Evarts.

Mr. BEVERIDGE. I have heard those names read twice.

Mr. FORAKER. I have read them, then, a third time.

Mr. BEVERIDGE. Yes.

Mr. FORAKER. And they say, on page 8, the following, if the Senator will allow me to read it.

Mr. BEVERIDGE. I will be very glad to have the Senator read it. I have read it myself. I shall have something to say——

Mr. FORAKER. If the Senator has read it——

Mr. BEVERIDGE. I wish the Senator would read it, so that we will have it again.

Mr. FORAKER. They say:

> The Constitution of the United States was adopted in the light of the well-known history that even ministers of the English Crown were bound to lay before Parliament all papers when demanded, on pain of the instant dismissal of such ministers on refusal, through the rapid and effectual instrumentality of a vote of a want of confidence. And the Continental Congress had for more than ten years itself governed the country and had control of all papers and records, not by reason of anything expressed in the Articles of the Confederation, but by reason of the intrinsic nature of free government.

Then, without stopping to read it all, at the conclusion of the paragraph and as the result of the consideration of these provisions, they say:

> There was no need to express such a power—
>
> In the Constitution—
>
> for it was necessarily an inherent incident to the exercise of the powers granted.

I beg the Senator's pardon if I have unnecessarily interrupted him. He was making the statement as though there was no authority, and I never heard anybody contend there was any express authority in the Constitution.

Mr. RAYNER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Indiana yield to the Senator from Maryland?

Mr. BEVERIDGE. Certainly.

Mr. RAYNER. Has the Senator's attention been called—I have no doubt it has—to the last few words of subsection 18 of section 7 of the first article of the Constitution. I will read just the last line.

Mr. BEVERIDGE. Certainly.

Mr. RAYNER (reading)—

> The Congress shall have power * * * to make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Mr. BEVERIDGE. I have read that, and I have read it within a few moments, but does that say that Congress shall have power to demand any information it sees fit from the head of any department it sees fit on any subject it sees fit, or anything like it?

Mr. RAYNER. Certainly not, Mr. President.

Mr. BEVERIDGE. Now let me make my argument for a moment. It does not; nor can it be found anywhere in the Constitution, although in enumerating the powers of Congress the Constitution is specific and minute. More implied powers are left to the President in the Constitution than implied powers are left to Congres, because the powers of Congress are specifically enumerated.

So we come down to the foundation of this power as an implied inference from the powers that are expressed. But the exact question we are discussing is whether or not the demand should be made through the President and whether or not the President transcends his prerogatives when he directs the heads of departments to send to Congress the information that Congress demands. Now, that is the precise question.

Mr. President, we have heard a great deal of late of executive invasion, but does it not occur to Senators that this is something in the nature of legislative invasion? The Constitution says—it is not necessary for me to read it—that all executive power shall be vested in a President of the United States. The executive departments are a part of the great executive department.

Mr. RAYNER. Will the Senator allow me?

Mr. BEVERIDGE. In a moment. The Constitution specifically says that the President shall appoint the heads of those departments, and specifically says that the President may demand from them opinions in writing. Upon the theory of the Senator from Ohio, why was not that left out? If it had not been put in, according to the theory of the Senator from Ohio, it would have been the inherent power of the President to demand the opinions of his Cabinet members in writing anyhow, would it not? But the framers of the Constitution saw fit specifically to give him the power to demand such an opinion. Why

did it not specifically give Congress the right to demand information?

Now I will hear the Senator from Maryland.

Mr. RAYNER. Does the Senator from Indiana contend that section 1 of Article II, when it says "the executive power shall be vested in a President of the United States of America," means unlimited executive power, or is he not governed by the enumerated articles?

Mr. BEVERIDGE. Of course he is governed by the enumerated articles and necessary implications therefrom. But that section and the sections which refer to the executive branches make all one great executive department, just as the House of Representatives and the Senate are the legislative department, and make the President the head of the executive department.

Mr. President, to whom, then, should the demands of Congress be addressed—to the heads of the various departments or the President, who is the head of all of them? Senators have not found anything except implied power in Congress to do this thing at all; and yet it is proposed to rebuke the President, whom the Constitution makes the head of all the executive departments, because he has directed the head of a department to respond to Congress, instead of having the head of department himself respond.

If this is not an assault upon the independence of the executive department greater than has been charged in the last year as having been made by the Executive upon the legislative department, then words fail in their cunning. It is too grave a question to vote upon immediately without further discussion.

We have heard a great deal within the last year about the Government being divided into three great independent, coordinate, and equal departments. Does any Senator deny that? Within its sphere the executive department is the equal of the legislative department. Will the Senator from Maryland or any other Senator contend that the President has the power to demand information of the Secretary of the Senate, for instance, as to the business of the Senate, as to affairs in his office; or from the executive clerk of the Senate; or from the Sergeant-at-Arms of the Senate upon the pretense that he needed this information, which is a part of our archives and files here, for his executive action? Certainly not.

We can demand anything of the executive department only upon the theory that it is to aid us in legislation, and we recognize that fact by always framing our resolutions directed to the President so as to read "if compatible with the public interest." But you do not put that in a resolution addressed to the head of a department. The truth about it is, Mr. President, it seems to me, upon the brief investigation that I have been able to give to this matter—and I think it will continue as I study it further—that the President has announced the same principle in this case that Washington announced when he declined to furnish the House of Representatives with information from the State Department, upon the ground, as he put it, that the House of Representatives had nothing whatever to do with making treaties. But, upon the Senator's theory, that would not have been valid, because the House of Representatives might have said, "We are about to pass a law which is affected by a treaty pending, and it is necessary, therefore, for our legislative action that we have this information." Washington declined to give such information or to permit the department to give such information.

We have a present example of the same thing. We have the treaty now pending between this country and Canada, involving some very serious questions of dispute. The Senate, perhaps, might ask the President for information from the State Department, but we also have some legislation that is affected by that treaty upon which the House must also pass. Would the House, therefore, have the right to demand of that department information in its possession concerning that subject? That subject was brought up when Washington was President, and he absolutely denied the right under the Constitution and declined to furnish the information.

The only statute that exists directing a department of the Government to furnish such information as this is the statute with respect to the Treasury. Every lawyer is familiar with the rule that where one thing is expressed it excludes the other. If Senators thought that that was so important a matter, why was it not put in the form of law?

We thus see, first of all, that there is the gravest possible question of power involved in this matter. I state for the third time that the three Senators who have spoken upon the other side of this proposition have not assumed that any power existed in us to demand any information from the executive departments except merely the custom of legislative bodies and the power supposed to be inherent in them. It is not in the Constitution, I say for the third time, although the Constitution specifically and minutely enumerates the powers that Congress does have.

But assuming that there was no dispute about this question; assuming that all the precedents that do exist did not exist, beginning in Washington's day; assuming that the whole question was de novo, so far as precedents were concerned, upon the other side, and that there was no question as to our power to demand information from the executive department, to whom should the demand go? Should it not go to the President?

Is it possible that the Congress should not direct its demand for information to the supreme head of the executive departments? All of those departments act in unison. It is to the efficiency of the Government that they act in unison. Shall Congress in a mood of petulance or anything else go over the head of the President, to whom it should respectfully prefer its request, and go to one of his Cabinet members? What is the objection to having the President direct his various Cabinet officers as to furnishing the information demanded by Congress? That question has not even been touched upon in this debate.

So we see it is not only a question of power, but it is also a question of propriety. It occurs to me that a President would be seriously lacking in self-respect who did not resent passing over his head to one of his Cabinet officers. It is a question of propriety as well as power. The Senator from Maryland or any other Senator can not possibly disagree with that.

Mr. RAYNER. Where does the Senator get the term "Cabinet officers?"

Mr. BEVERIDGE. I get it from the current phrase. I am perfectly well aware that they are not so termed in the Constitution. They are Secretaries. But we can not call them all Secretaries, because there is the Attorney-General and there is the Postmaster-General. It has become so much a matter of custom to call them members of the Cabinet that we actually incorporated the term into the statute.

Mr. RAYNER. Just one statute of the United States; that is all.

Mr. BEVERIDGE. What would the Senator call them?

Mr. RAYNER. I would call them what the Constitution calls them, "the principal officers of the executive departments."

Mr. BEVERIDGE. "Principal officers of the executive departments" is too long a phrase for the twentieth century, and besides, that is not used in the Constitution.

Mr. RAYNER. The Constitution itself is perhaps too long for the Senator from Indiana.

Mr. BEVERIDGE. That is a very polite remark.

Mr. RAYNER. Does the Senator think that when we are making an inquiry of the Postmaster-General, or the Secretary of War, or the Secretary of State, or the Attorney-General we ought in every instance to direct it to the President of the United States?

Mr. BEVERIDGE. I think that all inquiries addressed to the executive departments should be directed to the President of the United States, or that the President of the United States ought to have the power, as a matter of propriety, if nothing else, to say, "I direct so-and-so to send it."

Mr. RAYNER. Have we ever done that?

Mr. BEVERIDGE. I think from the discussion we have heard it must be clear to all, first, as the Senator from Maryland says, that this is a great question; second, that nobody, not even the two learned Senators, have had an opportunity to study it for more than twenty-four hours, and that therefore we ought not to be asked to vote upon it at this session of Congress.

It is upon these grounds and these grounds alone that I shall vote to refer the resolution to the Judiciary Committee. If a week or two weeks remained of the session, when every precedent existing could be looked up, when the whole subject could be thoroughly studied, then I should vote to keep it in the Senate itself, which is supposed to be competent to pass upon the question; but that is not the case. We adjourn at 12 o'clock noon to-morrow, and the demand is now made that a resolution involving questions of serious dispute, both as to power and as to propriety, as to precedents, and as to the history of the case shall be voted on now rather than to have it referred to the Judiciary Committee and to the next session, when the matter may be thoroughly discussed and an opinion rendered by the Senate as registered by the vote of every Senator.

The Senator from Iowa said one thing that I also had observed, not only in this debate, but in several debates in both Houses of Congress within the last month or two, when we are approaching the time when that great man and leader of the people, Theodore Roosevelt, is about to go out of office and of power. I did not hear assaults so generally made a year ago

as I have heard them made a month ago or a week ago; and they are made with increasing frequency as the days and now the hours grow fewer before his departure from his high place and his mighty power.

Mr. CLAPP. Yes, "power;" that is the word.

Mr. BEVERIDGE. Well, Mr. President, it reminds me of a fact of history with which all school children in America are familiar, and that is that this Republic has never had one single great President who was not violently assailed and wrongfully accused. It started out with Washington, and so desperate became the attacks upon him that the Father of his Country actually uttered these words: "I would to God I were in my grave." I am not sure but the legislature of one or two of the States passed resolutions of censure of him at the conclusion of his second great and historic administration, and congratulating the country that his "reign," as they called it, was at an end.

The same was true of Andrew Jackson. I was reading only the other day—I think it was in Rhodes's remarkably scholarly History of the United States—that when a message of that great leader of the Democratic party was laid before the legislature of South Carolina it was met with hoots, jeers, and laughter. Men now living remember well the base and scandalous things that were said of Abraham Lincoln. No shining mark ever escaped the darts. It is a part of great achievement—it is an incident of a great career—that it compels attack.

That has been true in the case of Theodore Roosevelt. Yet, Mr. President, who knows the names of the men who assailed Washington? They knew their names in that day, but their brief memories are now forgotten. Who knows to-day, even in South Carolina, the names of the men who scoffed at Andrew Jackson? What has become of the memories of the traducers of Abraham Lincoln?

It is true that there is nothing new under the sun, and as history repeated itself in the case of Washington, and of Jackson, and of Lincoln, so it will repeat itself in the case of Theodore Roosevelt. When history shall have been fully written, and time has receded so that we may have the perspective of events, it will be found that the words of those who assailed his historic administration will have vanished as a meteor from the heavens of human chronicle, while his deeds stand a cluster of eternal and enduring stars.

Mr. President, during this administration, I say without fear of successful contradiction, more great constructive laws have been passed, more great reforms have been advanced, than in any two administrations of our history, save only that which followed the adoption of the Constitution and that of the war period. Why is it that he has held the unparalleled affections of the American people for so many years? It is because he has gathered into his breast the wishes, the hopes, and the aspirations of the American people, just as the great Presidents I have named did before him. We in this Chamber, and other men elsewhere, can attack the President here and there, but the great ninety millions do not hear those complaints; they do not see those attacks, and if they did, they would condemn them.

I doubt not attacks as virulent as those made on Washington and Jefferson and Jackson and Lincoln will be made at a like time in his career on that splendid man, William H. Taft, the worthy successor of Theodore Roosevelt; for, though with different methods, he, too, will do vast deeds, and therefore he, too, will arouse vast animosities as well as win great victories. And his statesmanship will be along the lines which President Roosevelt has pursued, which neither of them created, but which grew out of the necessities of the American people. And I predict now that President Taft's inaugural to-morrow will be the first step in the verification of this prophecy.

Say what you will of the character of this man, of his conduct, no one can question the fact that he has achieved greatly; that he has wrought mightily; and that he has wrought for the permanent welfare of all the people, regardless of creed or color or party. At this time, when a few hours will see him stripped of power to punish or reward, I will no longer sit silent and suffer these accumulated assaults, and especially when I remember that many of them would not have been made even one short year ago.

Mr. BAILEY. Mr. President, I simply want to say that, while it is true that the world does not remember the names of those who vilified Washington and Jackson, it is equally true that it has forgotten some of the gentlemen who delivered fulsome eulogies upon them.

Mr. ALDRICH. Mr. President, the discussion which has taken place to-day, and the wide divergence of opinions which have been expressed, confirm my judgment as to the wisdom of referring this measure to the Committee on the Judiciary. I myself have no question as to the rights of the Senate, and I am not only willing, but I believe it is desirable, that we should make an unequivocal declaration with reference to those rights at an early date.

But this matter of the relation between the Senate and the executive departments is so important and so delicate that this action should be taken after deliberation. Every word which the Senate uses should be carefully weighed. I should not have made the motion to refer the resolution to the Judiciary Committee if I were not certain that that committee would give the subject early and careful consideration and report to the Senate some resolution for the action of the Senate that would meet, I believe, the almost unanimous approval of the Senate.

Mr. BAILEY. Will the Senator from Rhode Island permit me a question?

Mr. ALDRICH. Certainly.

Mr. BAILEY. I assume from what the Senator says about a report that he agrees in the main with the contention that the heads of the various departments are subject to the command of the Senate with respect to the information they possess.

Mr. ALDRICH. That is undoubtedly true with reference to the Treasury Department, and probably with most of the others, but I think that proposition should have the careful attention of a committee.

Mr. BAILEY. Mr. President, if I were perfectly certain that it would be reported back and that the Senate would be given the opportunity to decide it, I should not be so insistent. The Senator from Rhode Island does not recognize more than I do the propriety and even the necessity of considering these things carefully, but I am not one of those who want to be so careful that I never do anything at all.

Mr. ALDRICH. If I were not absolutely confident that the Committee on the Judiciary would report upon this matter at an early day I should not make the motion to refer it to that committee.

Mr. BAILEY. I merely want to say to the Senator that that encourages me not to believe, but to know, that something will be done. Of course if we adopt the substitute of the Senator from Iowa something will be done speedily, and if that fails, then we shall have a report from the Committee on the Judiciary. I would a good deal rather hear a statement from the chairman of the Judiciary Committee, although I do not question the authority of the Senator from Rhode Island to speak for that side.

Mr. ALDRICH. The chairman of the committee is present.

Mr. CLARK of Wyoming. Pardon me; I was otherwise engaged.

Mr. ALDRICH. I stated that if this matter was referred to the Judiciary Committee I had no question but that the committee would take it up at an early day for consideration.

Mr. CLARK of Wyoming. I think the Senator may be fully convinced that the Committee on the Judiciary will do its full duty in the premises.

Mr. CUMMINS. Mr. President, I wish to make an inquiry of the Senator from Texas. Has he accepted the substitute I offered in that sense, which withdraws his own resolution from the consideration of the Senate?

Mr. BAILEY. If under the rule I am permitted to do so, and I think I am, I shall withdraw it and very cheerfully vote for the resolution of the Senator from Iowa.

Mr. CUMMINS. Under the assurance of the Senator from Rhode Island, I may be permitted to say that I have no objection whatsoever to a reference to the Judiciary Committee.

Mr. BAILEY. But the Senator from Iowa still desires a vote on it now. If he does not, I am not willing to let it take that course.

Mr. ALDRICH. I suppose the Senator from Texas will submit to a vote of the Senate upon it.

Mr. BAILEY. Undoubtedly I will have that to do, and I will have to abide by the result of it; but what I meant to say is, if the Senator from Iowa is going to withdraw his substitute, then I shall, of course, insist upon my original resolution.

Mr. CUMMINS. I do not withdraw my substitute.

Mr. BAILEY. Then that is understood.

Mr. CUMMINS. But I suggest that, as far as I am concerned, I am willing that it shall be referred to the Committee on the Judiciary, to be dealt with hereafter when the report shall be made. I recognize the difficulty of voting upon the proposition just at this moment. There are some Senators who feel that they have not given the subject that study and attention which it deserves.

Mr. CULLOM rose.

Mr. ALDRICH. I hope the Senator from Illinois will allow a vote to be taken.

NORTHWEST MISSOURI STATE
UNIVERSITY LIBRARY
MARYVILLE, MISSOURI 64468

Mr. CULLOM. I am entirely willing that a vote shall be taken.

Mr. NELSON. It is not my purpose, Mr. President, to enter into a debate on this subject. I simply desire to state that, in a general way, I concur in the views expressed by the Senator from Rhode Island.

This is a debatable question, and yet it is a question of vast importance relating to the integrity of proceedings here. Some of the arguments advanced on the floor in respect to this proposition meet with my approval; others do not. Even as to the substitute offered by the Senator from Iowa, I can conceive that an exception ought to be made in respect to diplomatic affairs in the State Department and in respect to purely military affairs in the War Department and purely naval affairs in the Navy Department; but as to other matters, the Senate ought to carefully consider them, and whatever action is to be taken ought to be such action as would meet with the approval of all the Members of this body without regard to any partisan question.

I trust the motion of the Senator from Rhode Island will prevail, and that this matter will be referred to the Judiciary Committee. As a member of that committee I desire to say that I shall do my best to study this question and solve it for the best interests of the country and the integrity of the proceedings of the Senate.

Mr. BAILEY. I will ask the Senator from Rhode Island one other question to see if we can reach a basis of accommodation. Will the Senator from Rhode Island agree to couple with his motion to refer an instruction to the Judiciary Committee to report within sixty days after the next session of Congress convenes?

Mr. ALDRICH. I do not think that is necessary or desirable. We have not been in the habit of instructing the great committees of this body, and I should be very sorry to see that precedent established, especially in view of the statement of two leading members of the committee. I am sure the Senator from Texas upon reflection will not urge that course.

Mr. BAILEY. I do urge it without the slightest hesitation. It is generally believed that it is a matter of grave importance. The Senator from Rhode Island says it is so grave that it must be referred to a committee, that it can not be decided in the open Senate at this time. I submit that it is no reflection on the committee to think that it is of a character and of an importance that requires an early decision.

The Senator from Rhode Island will of course take cognizance of the fact that the next session of Congress will be for a single work; that before the tariff bill comes to the Senate from the House neither the Senate nor its committees will have any work to do; and that after the tariff bill reaches this body from the House the Senate and the Judiciary Committee will have nothing to do until the Senator from Rhode Island and his Republican associates on the Finance Committee have worked over the House tariff bill. That means that for sixty days after we convene on the 15th of March the Senate could well apply itself to the settlement of this question. I only want it settled. I want to see it settled right, but if it can not be settled right I want it settled.

Mr. CLARK of Wyoming. Mr. President, I wish to state to the Senator from Texas that I feel no sensitiveness at all about instructions to the committee. I think the Senator is well enough acquainted with the present personnel of that committee to know that they will enter upon this work as upon other work and prosecute it with all due diligence. I will call the attention of the Senator, however, to the fact that the committee, as at present constituted, loses four of its members within the next twenty-four hours. When that membership will be settled, of course I am unable to state and of course——

Mr. BAILEY. The Senator would not like to state it in the presence of the insurgents, if he knew.

Mr. CLARK of Wyoming. I would state if I could. Of course the Senator would not care to have an opinion from that committee unless the committee was represented by a full membership. Therefore I hope the Senator will not insist upon his sixty days' limit.

Mr. BAILEY. Mr. President, I call for the yeas and nays on the motion of the Senator from Rhode Island to refer.

The VICE-PRESIDENT. Upon the motion of the Senator from Rhode Island to refer the resolution to the Committee on the Judiciary, the yeas and nays are demanded.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLAY (when Mr. BACON's name was called). My colleague [Mr. BACON] is paired with the junior Senator from Nevada [Mr. NIXON]. If my colleague were present, he would vote "nay."

Mr. PAYNTER (when his name was called). I announce my pair with the junior Senator from Missouri [Mr. WARNER]. If he were present, I would vote "nay."

The roll call having been concluded, the result was announced—yeas 52, nays 25, as follows:

YEAS—52.

Aldrich	Clark, Wyo.	Gallinger	McCumber
Beveridge	Crane	Gamble	Nelson
Borah	Cullom	Guggenheim	Page
Bourne	Cummins	Hansbrough	Penrose
Brandegee	Curtis	Hemenway	Perkins
Briggs	Dick	Heyburn	Piles
Brown	Dillingham	Hopkins	Richardson
Bulkeley	Dixon	Kean	Scott
Burkett	du Pont	Kittredge	Smoot
Burnham	Elkins	Knox	Stephenson
Burrows	Flint	La Follette	Sutherland
Carter	Frye	Lodge	Warren
Clapp	Fulton	Long	Wetmore

NAYS—25.

Bailey	Frazier	Money	Taliaferro
Bankhead	Gary	Overman	Taylor
Clarke, Ark.	Gore	Owen	Teller
Clay	Johnston	Rayner	Tillman
Culberson	McCreary	Simmons	
Daniel	McLaurin	Smith, Md.	
Foster	Martin	Stone	

NOT VOTING—15.

Ankeny	Dolliver	Milton	Platt
Bacon	Foraker	Newlands	Smith, Mich.
Davis	Hale	Nixon	Warner
Depew	McEnery	Paynter	

So the resolution was referred to the Committee on the Judiciary.

Mr. BAILEY. I observe that the Senate is still Republican, Mr. President.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed the following bills and joint resolution:

S. 1163. An act to correct the naval record of Peter H. Brodie, alias Patrick Torbett;

S. 1752. An act to reimburse Garrett R. Bradley, late postmaster at Tonopah, Nev., for money expended for clerical assistance;

S. 2489. An act for the relief of Harry G. Rupp;

S. 2544. An act for the relief of William Martinson;

S. 3164. An act to correct the military record of Paul Sinock;

S. 3452. An act for the relief of Joseph Schrembs;

S. 3810. An act for the relief of Howard B. Carpenter;

S. 4035. An act to provide for the payment of certain claims against the District of Columbia, in accordance with the act of Congress approved January 26, 1897, and as amended July 19, 1897;

S. 4103. An act authorizing the Secretary of the Interior to ascertain the amount due O bah baum, and pay the same out of the fund known as "For the relief and civilization of the Chippewa Indians;"

S. 4426. An act for the relief of Thomas C. Clark;

S. 5349. An act for the relief of Madison County, Ky.;

S. 5510. An act for the relief of the owners of the tug *Juno;*

S. 5905. An act for the relief of the executors of the estate of Harold Brown, deceased;

S. 6373. An act waiving the statute of limitations as to the claim of the Nestler Brewing Company, and authorizing the Commissioner of Internal Revenue to adjudicate the same;

S. 6852. An act for the relief of Walter F. Rogers, executor of the estate of Sarah Edwards, late owner of lot No. 116, square No. 628, Washington, D. C., with regard to assessment and payment of damages on account of changes of grade due to construction of the Union Station, District of Columbia;

S. 7782. An act for the relief of James H. Owen;

S. 7859. An act for the relief of Parsey O. Burrough;

S. 7861. An act for the relief of B. D. Crocker;

S. 8379. An act for the relief of the owners of the British steamship *Maroa;*

S. 8429. An act to refund certain tonnage taxes and light dues levied on the steamship *Montara*, without register;

S. 8518. An act empowering the juvenile court of the District of Columbia to issue execution on forfeited recognizances;

S. 8555. An act to relinquish the interest of the United States in and to certain land in Dade County, Fla., to John M. Bryan, jr.;

S. 8588. An act to amend an act entitled "An act for the relief of Dewitt Eastman," approved January 8, 1900;

S. 8822. An act providing for the relinquishment by the United States of certain lands to the county of Kootenai, in the State of Idaho;

S. 8839. An act for the removal of restrictions from the third selection or allotment of lands selected by William J. Scott, a minor member of the Osage tribe of Indians, and for other purposes;

S. 9402. An act for the relief of John H. Layne; and

S. R. 105. Joint resolution for the purpose of more fully carrying into effect the convention concluded at Brussels on March 15, 1886, in reference to the exchange of official journals, etc.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 6055) to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia.

The message also announced that the House had passed a bill (H. R. 28192) to amend and consolidate the acts respecting copyright, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

S. 8187. An act to change the name of the Washington Hospital for Foundlings;

S. 8520. An act requiring reports of the Hospital for Foundlings to be made to the Commissioners of the District of Columbia;

S. 9278. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors; and

S. 9421. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors.

PROTECTION OF AMERICAN CITIZENS IN RUSSIA.

Mr. CULLOM. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Illinois?

Mr. MONEY. I want to understand the parliamentary situation. I am entitled to the floor, as I understand.

The VICE-PRESIDENT. The Chair is of the opinion that the Senator from Mississippi is entitled to the floor. Does he yield to the Senator from Illinois?

Mr. CULLOM. If the Senator will be kind enough to yield to me, I desire to report a joint resolution from the Committee on Foreign Relations, and to ask for its immediate consideration.

Mr. MONEY. I yield to the Senator.

Mr. CULLOM. I am directed by the Committee on Foreign Relations, to whom was referred the joint resolution (H. J. Res. 235) concerning and relating to the treaty between the United States and Russia, to report it without amendment. I ask unanimous consent for its present consideration.

The VICE-PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution. It requests the President of the United States to renew negotiations with the Government of Russia to secure, by treaty or otherwise, uniformity of treatment and protection to American citizens holding passports duly issued by the authorities of the United States, in order that all American citizens shall have equal freedom of travel and sojourn in such country without regard to race, creed, or religious faith, including a provision that the honoring or viséing of passports when duly issued and held by citizens of the United States shall not be withheld because or on account of the race, creed, or religious faith of their holders.

Mr. OWEN. I offer the amendment which I send to the desk.

Mr. CULLOM. I hope this may be disposed of before we take up another matter.

Mr. LODGE. The joint resolution has not yet been disposed of, I think.

The VICE-PRESIDENT. The Senator from Oklahoma rose for the recognition of the Chair, and the Chair recognized him, not knowing what the purpose of the Senator was.

Mr. OWEN. I propose to offer an amendment to the pending joint resolution.

The VICE-PRESIDENT. The Senator from Oklahoma proposes an amendment to the joint resolution, which will be stated.

The SECRETARY. At the end of the joint resolution it is proposed to add:

An act authorizing the people of New Mexico and Arizona to hold constitutional conventions, and for other purposes.

Mr. CULLOM. That is not pertinent to this joint resolution. It has no relation whatever to it.

Mr. KEAN (to Mr. CULLOM). Move to lay the amendment on the table.

The VICE-PRESIDENT. The amendment proposed by the Senator from Oklahoma [Mr. OWEN] to the joint resolution will be stated.

The SECRETARY. At the end of the joint resolution it is proposed to add the following:

An act authorizing the people of New Mexico and Arizona to hold constitutional conventions, and for other purposes.

The people of New Mexico and Arizona are hereby authorized to hold constitutional conventions and to frame and adopt constitutions, republican in form, and not repugnant to the Constitution of the United States and the principles of the Declaration of Independence, and to submit the same as the constitution of New Mexico and the constitution of Arizona to Congress at its next regular session.

The governor, chief justice, and secretary of each of said Territories, and two representative citizens in each, to be designated by the governor thereof, shall constitute an election board, of which board at least two shall be recognized members of the minority party. Said election boards shall immediately lay off and apportion 75 districts in each Territory, from which 75 delegates to the constitutional convention shall be elected, one to each district, and shall provide for holding such election by regulations in harmony with the laws of said Territories; and such election boards shall constitute canvassing boards to canvass the election returns of the Territory wherein they were appointed.

The constitutional conventions shall severally provide by ordinance for the election of officers for a full state government in each Territory, two Representatives in Congress for New Mexico, and one Representative in Congress for Arizona, and submit to the people of said States the constitution so framed by the same ordinance for their ratification or rejection.

The sum of $75,000 is hereby appropriated to meet the expenses incident to the exercise of the authority herein above conferred for the Territory of New Mexico, and $75,000 for the Territory of Arizona; such moneys to be expended under the direction of the Secretary of the Interior for the purposes herein set forth.

Mr. CULLOM. Mr. President, I move to lay the amendment on the table. It has no reference to the pending joint resolution.

Mr. OWEN. Mr. President, on that motion I ask for a yea-and-nay vote.

Mr. LODGE. I rise to a question of order.

The VICE-PRESIDENT. The Senator from Massachusetts will state his point of order.

Mr. LODGE. I make the point of order that that amendment is not in order. It contains an appropriation, as I heard it read, and has never been reported by any standing committee.

The VICE-PRESIDENT. The Chair will submit the question to the Senate, Is the amendment in order?

Mr. OWEN. On that I call for the yeas and nays.

Mr. CULLOM. I move to lay the amendment on the table.

The VICE-PRESIDENT. The Senator from Illinois moves to lay the amendment on the table.

Mr. OWEN. I call for the yeas and nays on that motion.

Mr. CULBERSON. I rise to a parliamentary inquiry.

The VICE-PRESIDENT. The Senator from Texas will state his parliamentary inquiry.

Mr. CULBERSON. It is this: The Senator from Massachusetts made the point of order that this amendment is not germane, and the Chair announced his decision to submit that question to the Senate.

Mr. LODGE. I did not make the point of order that it was not germane. I made a wholly different point of order; but I now withdraw it.

Mr. CULBERSON. Very well.

Mr. BEVERIDGE. Then the question is on the motion to lay on the table.

Mr. CULBERSON. Before the Senator from Massachusetts withdrew the point of order I was about to suggest that the proper matter to submit to the Senate was that suggested by the Chair, and not the motion of the Senator from Illinois.

The VICE-PRESIDENT. The Senator from Massachusetts has withdrawn his point of order. The question recurs on the motion of the Senator from Illinois.

Mr. CULLOM. I insist on the motion.

The VICE-PRESIDENT. The question recurs on the motion of the Senator from Illinois to lay the amendment proposed by the Senator from Oklahoma on the table. Upon that question the Senator from Oklahoma demands the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. PAYNTER (when his name was called). I am paired with the junior Senator from Missouri [Mr. WARNER], and therefore withhold my vote.

The roll call was concluded.

Mr. McENERY (after having voted in the negative). I voted inadvertently. I am paired with the junior Senator from New York [Mr. DEPEW], and therefore withdraw my vote.

The result was announced—yeas 47, nays 25, as follows:

YEAS—47.

Aldrich	Clark, Wyo.	Gallinger	Page
Beveridge	Crane	Gamble	Penrose
Bourne	Cullom	Guggenheim	Perkins
Brandegee	Cummins	Hansbrough	Piles
Briggs	Curtis	Heyburn	Richardson
Brown	Dick	Hopkins	Scott
Bulkeley	Dillingham	Kean	Smoot
Burkett	Dixon	Kittredge	Stephenson
Burnham	du Pont	Knox	Sutherland
Burrows	Flint	Lodge	Warren
Carter	Frye	Long	Wetmore
Clapp	Fulton	Nelson	

NAYS—25.

Bailey	Foster	Martin	Taliaferro
Bankhead	Frazier	Money	Taylor
Borah	Gary	Overman	Teller
Clay	Gore	Owen	Tillman
Culberson	Johnston	Simmons	
Daniel	McCreary	Smith, Md.	
Foraker	McLaurin	Stone	

NOT VOTING—20.

Ankeny	Dolliver	McCumber	Paynter
Bacon	Elkins	McEnery	Platt
Clarke, Ark.	Hale	Milton	Rayner
Davis	Hemenway	Newlands	Smith, Mich.
Depew	La Follette	Nixon	Warner

So Mr. OWEN'S amendment was laid upon the table.

Mr. GORE. I inquire if it is too late to object to the consideration of the joint resolution?

The VICE-PRESIDENT. The joint resolution is before the Senate, as in Committee of the Whole, by unanimous consent, and it is too late to object to its consideration.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The preamble was rejected.

AGRICULTURAL COLLEGES.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from New Hampshire?

Mr. CLAPP. The Senator from Mississippi agreed to yield to me.

Mr. MONEY. I yielded to the Senator from Minnesota, although I am very anxious to proceed.

The VICE-PRESIDENT. The Senator from Mississippi is entitled to the floor. Does he yield to the Senator from New Hampshire?

Mr. GALLINGER. I will not ask the Senator to yield; but I have been trying to get recognition all day.

The VICE-PRESIDENT. The Chair will recognize the Senator from New Hampshire.

Mr. CLAPP. The Senator from Mississippi has the floor, and I assume that if he will yield——

Mr. MONEY. I yield to the Senator.

The VICE-PRESIDENT. The Senator has no right to yield. He must get his right to the floor from the Chair.

Mr. MONEY. Mr. President, I have the floor. If the Chair will allow me, I will say that I have the floor in my own right. It was accorded to me by the Chair. I was about to proceed in order when I was asked to yield to the Senator from Illinois [Mr. CULLOM], which I cheerfully did; and then the Senator from Oklahoma [Mr. OWEN] offered an amendment, which was considered by the Senate and disposed of.

The VICE-PRESIDENT. That is correct.

Mr. MONEY. I can not be removed from the floor, as I understand parliamentary law, because I had the courtesy to yield to another Senator.

The VICE-PRESIDENT. That is perfectly correct. The Chair asked the Senator if he would yield to the Senator from New Hampshire [Mr. GALLINGER], and the Chair understood the Senator from Mississippi to say that he had yielded to the Senator from Minnesota [Mr. CLAPP]. The Chair had not recognized the Senator from Minnesota and had recognized the Senator from New Hampshire. Does the Senator from Mississippi yield to the Senator from New Hampshire?

Mr. MONEY. I yield to the Senator from Minnesota, to whom I was under honorable engagement. I will be very glad afterwards to yield to the Senator from New Hampshire, although I want to go on.

Mr. CLAPP. If I can, I will gladly yield to the Senator from New Hampshire.

Mr. GALLINGER. No.

The VICE-PRESIDENT. The Chair will state that the Senator from New Hampshire has been desirous for some time of obtaining the floor, and the Chair would ask the Senator from Mississippi if he will not yield to the Senator from New Hampshire?

Mr. GALLINGER. I will say to the Senator from Mississippi——

Mr. MONEY. I will gladly yield to the Senator. I know he has in charge a meritorious measure.

Mr. GALLINGER. I ask unanimous consent for the present consideration of the bill (S. 8819) to amend an act entitled "An act to establish agricultural stations in connection with the colleges established in the several States under the provisions of an act approved July 2, 1862, and the acts supplementary thereto."

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Agriculture and Forestry with amendments.

The first amendment was to strike out section 1, as follows:

That the act of Congress entitled "An act to establish agricultural experiment stations in connection with colleges established in the several States under the provisions of an act approved July 2, 1862, and all acts supplementary thereto," be, and are hereby, amended by including in the terms and benefits of said act the District of Columbia with the States and Territories, the intent being to make available for the District of Columbia the annual appropriations for the endowment, support, and maintenance of institutions giving instruction in agriculture, the mechanic arts, and the other subjects specified in the act of Congress approved July 2, 1862, and an act approved March 2, 1887, and an act approved August 30, 1890, and an act approved March 16, 1906, and an act approved June 30, 1906, and an act approved March 4, 1907, together with other acts heretofore passed providing for such annual appropriations for such colleges.

And in lieu thereof to insert:

That the act of Congress entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, be, and are hereby, amended so as to include in the terms and benefits of said act and supplementary acts the District of Columbia with the States and Territories, the intent being to make available for the District of Columbia the annual appropriations for the endowment, support, and maintenance of institutions giving instruction in agriculture, the mechanic arts, and the other subjects specified in the said act of Congress approved July 2, 1862, and a supplementary act approved August 30, 1890, and a supplementary act approved March 4, 1907, together with other acts heretofore passed providing for annual appropriations for such colleges.

The amendment was agreed to.

The next amendment was, in section 2, line 8, after the word "Congress," to strike out "provided" and insert "*Provided*, That;" and in line 10, after the word "agriculture," to insert "and," so as to make the section read:

SEC. 2. That the George Washington University, in the District of Columbia, is hereby designated to receive the appropriations under said acts of Congress: *Provided*, That it shall carry on courses of instruction in agriculture and the mechanic arts, and in the other subjects required of the state institutions receiving said appropriations.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend an act entitled 'An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts,' approved July 2, 1862, and the acts supplementary thereto, so as to extend the benefits thereof to the District of Columbia."

ORDER FOR RECESS.

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Maine?

Mr. MONEY. I have yielded to the Senator from Minnesota [Mr. CLAPP]. I promised to do so two or three times.

Mr. HALE. Will the Senator yield to me for a statement as to the order of public business of the Senate—to make a suggestion?

Mr. CLAPP. That is all right.

Mr. MONEY. Certainly, I yield to the Senator for that purpose.

Mr. HALE. The conferees upon the two remaining appropriation bills—the sundry civil bill and the general deficiency appropriation bill—will not be able to make a report upon either before 8 o'clock or half past 8 this evening. My purpose is not to interfere with any business that the Senate is actually doing, but to state conditions, so that the Senator may understand that, so far as the conference reports upon the appropriation bills are concerned, there will be no interference or delay if the Senate shall take a recess until 8 o'clock or half past 8 o'clock. Undoubtedly the Senate will be obliged, before these reports can come in, pass back and forth between the Houses, and be acted upon, to remain in session for several hours later, but I

should hope that these reports can be put into condition at some time to-night, perhaps not later than 11 or 12 o'clock, and that we may be able then to take a recess until 9 or 10 o'clock in the morning.

I can not predict that with confidence, but I can say nothing will be delayed with the conference reports if the Senate shall take a recess from now or a half hour from now until 8 or half past 8, giving to Senators an opportunity to refresh themselves. We shall have to stay here, undoubtedly, until 11 or 12 o'clock after we come back.

Mr. MONEY. Will the Senator from Maine consent to make the recess from 6 to 8? That will be two hours.

Mr. ALDRICH. Before that is done I wish to make a suggestion.

Mr. MONEY. I promised to yield——

Mr. ALDRICH. I suggest that as soon as we dispose of the business which is now in sight, the matter coming from the House of Representatives, we take a recess until 8 o'clock or half past 8——

Mr. BEVERIDGE. Half past 8.

Mr. ALDRICH. With the understanding that no business except conference reports shall be considered at that session.

Mr. KEAN. It is necessary to have an executive session.

Mr. WARREN. That is right.

Mr. ALDRICH. That will be disposed of first. No other business except executive business and the consideration of conference reports to be done at the session this evening.

Mr. HALE. I will ask unanimous consent that at 6 o'clock——

Mr. ALDRICH. Half past 6.

Mr. HALE. At half past 6 the Senate shall take a recess until half past 8.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that at half past 6 the Senate take a recess until half past 8.

Mr. McCUMBER. I wish the Senator would modify the request so as to read that when we shall take a recess it shall be until whatever time may be fixed; that we shall reconvene again at a certain hour.

Mr. HALE. I did that.

Mr. McCUMBER. You fixed the time for the recess, but we want an executive session before that, and we do not know how long the executive session may take, nor do we know how long it will take to get through with the present business before the Senate goes into executive session.

Mr. ALDRICH. I think the suggestion of the Senator is a wise one, to make an agreement that when we take a recess it shall be to meet at half past 8, and at that session no business shall be in order except House bills coming over from the House, conference reports, and executive business.

Mr. BEVERIDGE. Coming over to-night from the House.

Mr. WARREN. There may be something from the Committee on Pensions of the Senate.

Mr. ALDRICH. That can be attended to to-morrow.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that when the Senate takes a recess it shall be to meet at half past 8 o'clock this evening.

Mr. HALE. Half past 8 o'clock.

Mr. ALDRICH. This evening.

The VICE-PRESIDENT. And nothing to be considered at the evening session except conference reports, House bills coming over, and executive business. Is there objection?

Mr. KEAN. There are House bills on the calendar.

Mr. GORE. There is one resolution I want to call up before I agree to the proposed unanimous-consent agreement.

The VICE-PRESIDENT. Consent is not given.

Mr. HALE. I move that at 6 o'clock the Senate take a recess until half past 8.

The VICE-PRESIDENT. The Senator from Maine moves that at 6 o'clock the Senate take a recess until half past 8.

Mr. ALDRICH. Make it 6.30.

Mr. CLAY. Why fix 6 o'clock? Why not take a recess at an earlier hour. ["No!" "No!"] I thought there was no business before the Senate, or practically none, except conference reports.

Mr. GALLINGER. Question!

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Maine.

Mr. CULBERSON. Will the Senator attach to that the suggestion of unanimous consent that nothing shall be done at the night session except——

Mr. HALE. That can not be done. That will have to be taken care of. The Senator from Oklahoma has blocked that. I can not embody that in the motion.

Mr. CULBERSON. I understand it can not be incorporated in the motion.

Mr. GORE. I withdraw my objection.

The VICE-PRESIDENT. The Senator from Oklahoma withdraws his objection. Is there objection to the request made by the Senator from Maine?

Mr. FULTON. An inquiry; that is all. There was a resolution passed this morning referring certain claims to the Court of Claims, and through an oversight several were omitted. I wish to make a motion to reconsider, in order that it may be corrected.

Mr. ALDRICH. That can be done to-morrow morning.

Mr. FULTON. Simply so that it can be done.

Mr. ALDRICH. My aim is to suit the convenience of Senators.

Mr. HALE. I make my proposition. If it is not agreed to, I will make a motion.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that when the Senate takes a recess it shall be until half past 8 o'clock this evening, and that at that session no business shall be transacted except in connection with bills coming from the House——

Mr. BEVERIDGE. To-night.

The VICE-PRESIDENT (continuing). Or conference reports, or executive business. Is there objection?

Mr. DICK. Does that include House bills on the calendar?

Mr. ALDRICH. No.

Mr. TELLER. No.

The VICE-PRESIDENT. It does not include House bills on the calendar.

Mr. DICK. I object.

The VICE-PRESIDENT. Objection is made.

Mr. HALE. I move that at half-past 6 o'clock the Senate take a recess until half-past 8 o'clock.

The motion was agreed to.

LEGISLATIVE, ETC., APPROPRIATION BILL.

Mr. WARREN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 46, 62, 63, 64, 65, 66, 67, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 209, and 210.

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered sixty, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered sixty-one, and agree to the same with an amendment as follows: Strike out the matter inserted by said amendment of the House, omit the matter inserted by said amendment of the Senate, and insert the following: "and after the third of March, nineteen hundred and nine, the compensation of the President of the United States shall be seventy-five thousand dollars per annum; a sufficient sum to pay the increase in the compensation of the President herein authorized from March fourth to June thirtieth, nineteen hundred and nine, inclusive, is hereby appropriated."

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "two hundred and fifty-five thousand eight hundred dollars;" and the Senate agree to the same.

F. E. WARREN,
J. A. HEMENWAY,
H. M. TELLER,
Managers on the part of the Senate.

HENRY H. BINGHAM,
F. H. GILLETT,
L. F. LIVINGSTON,
Managers on the part of the House.

Mr. CULBERSON. I will ask the Senator from Wyoming, in charge of the bill, if the effect of the bill will be to fix the compensation of the President at $75,000 per annum without the $25,000 for traveling expenses?

Mr. WARREN. There is nothing whatever in the bill now that alludes to his allowance for traveling. It makes his compensation $75,000.

Mr. CULBERSON. I understand; probably not in this bill. Is there not a provision in the sundry civil bill for $25,000 for traveling expenses?

Mr. WARREN. The Senator in charge of the bill stated yesterday to the Senate he would recede from that amendment in case we settled upon $75,000 for the President.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

NATIONAL WATERWAYS COMMISSION.

Mr. FRYE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Maine?

Mr. MONEY. I do.

Mr. FRYE. The Vice-President has indicated to me a wish that I should be appointed as a member of the commission provided for in the river and harbor bill. I appreciate the compliment of the wish very highly, but if I were appointed I should promptly decline the service.

COPYRIGHT ACTS.

Mr. MONEY. I have consented to yield to the Senator from Minnesota [Mr. CLAPP].

The VICE-PRESIDENT laid before the Senate the bill (H. R. 28192) to amend and consolidate the acts respecting copyrights, which was read twice by its title.

Mr. SMOOT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Minnesota yield to the Senator from Utah?

Mr. CLAPP. I do.

Mr. SMOOT. I move that the bill which has just been read be substituted on the calendar for the bill (S. 9440) to amend and consolidate the acts respecting copyright, and I ask for its immediate consideration.

The VICE-PRESIDENT. The Senator from Utah asks that the House bill be substituted for the bill now on the calendar.

Mr. SMOOT. And I ask unanimous consent for the present consideration of the House bill.

Mr. CULBERSON. Is this the unanimous report of a committee?

Mr. SMOOT. It is a unanimous report.

Mr. CULBERSON. I ask the Senator from Utah if the bill which he asks unanimous consent to have considered now is approved by the committee unanimously, and what committee it comes from.

Mr. SMOOT. From the Committee on Patents. It did have and has the unanimous report of the Committee on Patents of the Senate, and also has the unanimous report of the Committee on Patents of the House. It has just passed the House unanimously and come over to the Senate, and that is the reason I ask for its immediate consideration.

Mr. CULBERSON. It is identical with the bill approved by the Senate committee?

Mr. SMOOT. It is identical with the bill approved by the Senate committee with the exception of one or two minor amendments that do not affect it at all.

Mr. CULBERSON. Are those minor amendments satisfactory to all of the committee of the Senate?

Mr. SMOOT. I understand they are. I should like to state to the Senator from Texas——

Mr. CULBERSON. Unless the Senator can be a little more specific about those amendments I shall have to object to the consideration of the bill at present.

Mr. KITTREDGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from South Dakota?

Mr. SMOOT. I do.

Mr. KITTREDGE. I hope the Senator from Texas will not object to the present consideration of the bill. This subject has been before the Patent Committee for four or five years, and the committee has expended a great amount of time and has worked hard in order to secure an agreement. The committee is in full accord upon the bill, and we hope that it will secure the approval of this body.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Utah that the House bill be substituted for the Senate bill on the calendar? The Chair hears none. Is there objection to the request of the Senator from Utah for the present consideration of the bill?

Mr. CULBERSON. I object, at present.

The VICE-PRESIDENT. Objection is made to the present consideration of the bill.

SENIOR SENATOR FROM WISCONSIN.

Mr. CLAPP. Mr. President, on the 18th day of February, during a somewhat animated discussion, the senior Senator from Pennsylvania [Mr. PENROSE] made reference to the senior Senator from Wisconsin [Mr. LA FOLLETTE], and at the same time involved to a certain extent the members of the Senate Committee on Indian Affairs in the statement which was made. It has occurred to me and some other members of the committee that if this statement was not met by a counter statement it would leave an impression that would be an act of injustice to the Senator from Wisconsin.

I want to say, sir; that the Senator from Wisconsin has not solicited this statement. I do not know he anticipates that it will be made or that he will approve what is placed in the statement at this time. More than that, I can say that this statement is not inspired by any reciprocal sense of personal or political obligation. So far as I know, the Senator from Wisconsin has never been particularly friendly to me politically. On the other hand, it has come to me in a general way that at times his attitude has been quite the reverse. As to this I do not know. While I believe that when a man must fight he should fight cheerfully and bring to the struggle every resource with which he is endowed, at the same time I hold that life is too short to waste one moment of it cherishing hostilities or searching for facts upon which to found and to perpetuate a spirit of resentment. Whatever his attitude may have been in the past, whatever it may be toward me in the future, neither adds to nor detracts from the duty that devolves upon me as chairman of that committee in relation to this subject.

Mr. President, it is true that during the last session of Congress the Senator from Wisconsin was not in as constant attendance on the meetings of that committee as I thought he ought to be, and it is equally true, sir, that I made complaint of the want of attendance and the want of attention to the details and the routine work of the committee. But I learned afterwards, as we often do when we complain or find fault, that there are two sides to almost every question—that during much of the period covered by the last session of Congress the Senator was confined to his home by illness.

But the service of a Senator to his committee, like the service of a Senator to the Senate as a whole, can not be measured by the record of his attendance upon the meetings of one body or the meetings of the other body. The work of the Committee on Indian Affairs does not involve any glory. We are dealing with the fortunes of a vanishing race; and without intending any humor, for it is pathetic rather than humorous, the phrase might be turned, and we might say we are dealing with the vanishing fortunes of a race, a race that has suffered from the cupidity and the greed of the white man, presenting a problem that involves upon the one hand the retention of the property of the Indian, with the thought that if he is given control of that property he may squander it, and upon the other hand the absolute certainty that if we retain that property and dole it out to him in pittances, he will remain a child as long as that policy is pursued. In the solution of that question great vigilance and judgment are essential, and even then the best judgment and the most vigilant care will not always save us from mistakes.

It is due to the Senator from Wisconsin to say here, and to place it in the RECORD, that on the broad question of the rights of those people, in the vigilance which he has exercised, in the judgment which he has brought to bear upon it, he has rendered service to the Indian beyond all calculation.

Not only that, but in his own State he has had the courage to initiate a policy different from that which has been pursued, a policy which I sometimes fear will not prove successful because of its expense. If it fails, he will still have had the courage to initiate it. If it succeeds it will not only be of great value to the Indians of his own State, but to the Indians of other States.

To-day the Department of the Interior, the Committee on Indian Affairs, and those who have any interest in this subject are watching with deep interest the policy which he has initiated in his own State, realizing, as I said, that if it fails he still had the courage to initiate it. If it succeeds it not only means a great deal to the Indians and to the citizens of those States, but it means the happy solution of one of the most vexed phases of the Indian problem.

Mr. President, on behalf of my colleagues on the committee and on my own it has seemed an act of simple justice that this statement should be placed in the RECORD of this body.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

The message also announced that the House had passed a bill (H. R. 23973) for the relief of pensioners of the Metropolitan police fund; in which it requested the concurrence of the Senate.

The message further announced that the House had agreed to the concurrent resolution of the Senate to provide for the printing of 15,000 additional copies of Senate Document No. 547, Sixtieth Congress, second session.

The message also announced that the House had agreed to the concurrent resolution of the Senate providing for the printing of 3,000 additional copies of the Annual Report of the Isthmian Canal Commission, 1908.

The message also announced that the House had passed a concurrent resolution authorizing the Secretary of the Senate to renumber the sections consecutively, to strike out the headnotes at the beginning of each chapter to sections which have been omitted, and to renumber the headnotes to correspond to the numbers given the sections, to correct typographical errors, and to correct punctuation as indicated by the committee of conference on the penal-code bill.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

H. R. 28059. An act making appropriations for the Military Academy for the fiscal year ending June 30, 1910, and for other purposes; and

H. R. 28411. An act to grant two cannon to Northern Ohio University, at Ada, Ohio.

HOUSE BILL REFERRED.

H. R. 23973. An act for the relief of pensioners of the Metropolitan police fund was read twice by its title and referred to the Committee on the District of Columbia.

EXECUTIVE SESSION.

Mr. CARTER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After forty-five minutes current resolution authorizing the Secretary of the Senate to spent in executive session the doors were reopened.

ORDER OF BUSINESS.

Mr. ALDRICH. I ask unanimous consent that for thirty minutes the Senate proceed to the consideration of unobjected House bills on the calendar.

The VICE-PRESIDENT. The Senator from Rhode Island asks unanimous consent that the Senate proceed for thirty minutes to the consideration of unobjected House bills on the Calendar. Is there objection?

Mr. FULTON. I desire to ask the Senator if he will not include reports of House bills?

Mr. ALDRICH. I will.

The VICE-PRESIDENT. Including reports of House bills.

Mr. McCUMBER. Will the Senator yield to me to present a report?

Mr. GORE. I should like to ask if the Senator from Rhode Island will not modify his request so as to include unobjected Senate resolutions?

Mr. ALDRICH. There is no reason in trying to pass a Senate joint resolution at this time.

Mr. PENROSE. It can not be reached in the House.

Mr. GORE. I do not understand the Senator.

Mr. ALDRICH. It would be absolutely impossible to pass it in the House.

Mr. CARTER. There are only a few minutes remaining.

Mr. GORE. Then I object.

Mr. KEAN. I hope the Senator from Rhode Island will not object to the request of the Senator from Oklahoma. The Senator from Oklahoma has a resolution which he introduced the other day——

The VICE-PRESIDENT. The Senator from Oklahoma objects.

EXPLOSION NEAR FRANKFORD ARSENAL.

Mr. PENROSE. I ask unanimous consent to call up the bill (H. R. 12512) for the relief of persons who sustained damage by explosion near Frankford Arsenal, Philadelphia.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LEGAL REPRESENTATIVES OF SEWELL COULSON, DECEASED.

Mr. HEMENWAY. I am directed by the Committee on Claims, to whom was referred the bill (H. R. 1072) for the relief of the legal representatives of Sewell Coulson, deceased, to report it favorably, and I submit a report (S. Rept. No. 1113) thereon. I ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to the legal representatives of Sewell Coulson, deceased, late of Sullivan, Ind., $3,950 for professional services rendered as an attorney at law.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BALTIMORE AND POTOMAC RAILROAD.

Mr. CARTER. I ask unanimous consent for the present consideration of the bill (H. R. 23468) to amend sections 11 and 12 of an act entitled "An act to provide for eliminating certain grade crossings on the line of the Baltimore and Potomac Railway Company in the city of Washington, D. C., and requiring said company to depress and elevate its tracks and to enable it to relocate parts of its railroad therein, and for other purposes," approved February 12, 1901.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the District of Columbia with amendments, which were, on page 2, line 18, after the word "their," to strike out "dimensions" and insert "height;" in line 19, before the word "use," to insert "habitually;" and in line 25, after the word "thereof," to insert the following proviso:

And provided further, That the parties operating the draws of the bridges aforesaid shall install and maintain suitable tide gauges at the draws, so that the pilot of any tugboat may see whether his pilot house will go under the draw.

Mr. CARTER. I ask that the amendments be disagreed to.

The amendments were rejected.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JOHN W. WOOD.

Mr. FLINT. I ask unanimous consent for the immediate consideration of the bill (H. R. 15603) for the relief of John W. Wood.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that John W. Wood, postmaster at Pasadena, Cal., be released from all liability on account of stamps to the amount of $13,000, stolen from his office.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JAMES W. SEARS.

Mr. BURROWS. I ask unanimous consent for the Senate to consider at this time the bill (H. R. 21029) for the relief of James W. Sears.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to James W. Sears, now residing at Albion, in the State of Michigan, $3,000 in full for the payment of the canal boat *P. G. Dennison*, owned by Sears, which was destroyed by fire.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SUITS AFFECTING INDIAN ALLOTMENTS IN OKLAHOMA.

Mr. GORE. I desire to ask for the present consideration of Senate resolution 316.

Mr. ALDRICH. Let it be read for information.

The Secretary read the resolution submitted by Mr. GORE on the 1st instant, as follows:

Resolved, That the Attorney-General is directed to inform the Senate:

First. As to the number of suits to cancel conveyances of Indian allotments that have been brought in the eastern judicial district of Oklahoma since May 27, 1908.

Second. The number of such suits involving allotments, if any, from which the restrictions had been removed, either by the Secretary of the Interior or by act of Congress.

Third. The number of such suits which have been tried upon their merits, and whether judgments were rendered in favor of the plaintiff or the defendant.

Fourth. The number of such suits which have been settled otherwise than by trial, either by compromise, dismissal, or in any other way.

Fifth. The number and names of the special attorneys or special agents who have assisted in the bringing of these suits, together with the date of their employment and the amount of compensation which they have been paid.

Sixth. How many of the suits above referred to, both where the land was restricted and where it was unrestricted, were brought upon the request of the allottee, and how many were brought without such request.

The resolution was considered by unanimous consent and agreed to.

JAMES A. PAULK.

Mr. FULTON. I am directed by the Committee on Claims, to whom was referred the bill (H. R. 4168) to carry out the

findings of the Court of Claims in the case of James A. Paulk, to report it favorably, and I submit a report (S. Rept. No. 1112) thereon. I call the attention of the Senator from Alabama to the bill.

Mr. JOHNSTON. I ask unanimous consent that the bill may now be passed.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay $3,390 to James A. Paulk, of Bullock County, Ala., being the amount found due him by the Court of Claims on January 29, 1906.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF PETER M'ENERY, DECEASED.

Mr. DANIEL. I ask consent of the Senate to have considered the bill (H. R. 16096) for the relief of the estate of Peter McEnery, deceased.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to the estate of Peter McEnery, deceased, late of Petersburg, Va., $97.80, for rent of storehouses used by the military authorities of the United States.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MERRITT-CHAPMAN WRECKING COMPANY.

Mr. McCUMBER. I ask consent for the immediate consideration of the bill (S. 6934) for the relief of the Merritt & Chapman Derrick and Wrecking Company.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to the Merritt & Chapman Derrick and Wrecking Company $1,800, in full for damages to its tug *I. J. Merritt*, injured by collision with the U. S. transport *Mississippi*.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF SAMUEL J. ROGERS, DECEASED.

Mr. KEAN. I ask unanimous consent for the present consideration of the bill (H. R. 12712) for the relief of the estate of Samuel J. Rogers, deceased.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to redeem, in favor of the estate of Samuel J. Rogers, United States 4 per cent registered bond, funded loan of 1907, No. 27101, for $500, inscribed in name of Samuel J. Rogers, and alleged to have been lost.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CERTAIN OFFICERS OF THE SIGNAL CORPS.

Mr. KEAN. I ask unanimous consent for the present consideration of the bill (H. R. 2950) for the relief of certain officers of the United States Signal Corps.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that the expenses of operating and keeping in repair the northwestern section of the United States military telegraph lines (from Bismarck to Fort Ellis and connections), constructed under act of Congress approved June 20, 1878, which, between the 20th day of June, 1878, and the 30th day of June, 1883, may have been paid out of moneys received from dispatches sent over said section, be authorized and allowed.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RECLAMATION OF ARID LANDS.

Mr. KEAN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the Senate resolution 324 submitted yesterday by Mr. CARTER, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Irrigation be, and it is hereby, authorized and directed, by subcommittee or otherwise, to visit, during the recess of the Senate, such reclamation works of the United States Reclamation Service as in the committee's judgment should be examined, in order to ascertain existing conditions therewith connected and secure information deemed useful in the consideration of future proposed legislation affecting the reclamation of arid lands. And the committee is further authorized to send for persons and papers, to administer oaths, to employ a stenographer, and to have such printing done as the committee may require; the expenses incurred to be paid out of the contingent fund of the Senate upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

J. BLAIR SHOENFELT.

Mr. OWEN. I ask for the present consideration of the bill (S. 7910) for the relief of J. Blair Shoenfelt, former United States Indian agent, Union Agency, Okla.

Mr. SMOOT. I understood that we were to consider only House bills.

The VICE-PRESIDENT. The Senate is not now operating under a unanimous-consent agreement.

Mr. ALDRICH. I think the bill had better go over.

The VICE-PRESIDENT. The bill will lie over, under the objection of the Senator from Rhode Island.

JOHN D. M'LAIN.

Mr. HEMENWAY. I ask for the present consideration of the bill (H. R. 3622) for the relief of John D. McLain.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay John D. McLain, of Johnson County, Ind., $100, being for one horse taken by or furnished to the military authorities of the United States for their use during the war for the suppression of the rebellion.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REVISION OF THE PENAL LAWS.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution from the House of Representatives, which was read:

House concurrent resolution 78.

Resolved by the House of Representatives (the Senate concurring), That the Secretary of the Senate be authorized to renumber the sections of Senate bill 2982 consecutively; to strike out the headnotes at the beginning of each chapter in sections which have been omitted; to renumber the headnotes to correspond with the numbers of given sections; to correct the references in one section to other sections; to correct typographical errors; to correct punctuation as indicated by the committee of conference.

Mr. HEYBURN. I ask for the adoption of the resolution.

The resolution was concurred in.

LELA L. ELLIS.

Mr. KITTREDGE. For the junior Senator from Tennessee [Mr. TAYLOR], I ask unanimous consent for the present consideration of the bill (H. R. 1549) granting a pension to Lela L. Ellis.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to place on the pension roll the name of Lela L. Ellis, widow of Luke T. Ellis, late of Company C, First Regiment Tennessee Infantry, war with Spain, and pay her a pension at the rate of $12 per month.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

AMENDMENT OF COPYRIGHT ACTS.

Mr. SMOOT. I ask unanimous consent for the present consideration of the bill (H. R. 28192) to amend and consolidate the acts respecting copyright. The bill has come over from the House, and is a substitute for Senate bill 9440 on the calendar.

Mr. OVERMAN. Has the Senator from Texas [Mr. CULBERSON] withdrawn his objection to the bill?

Mr. SMOOT. I am authorized to state that the Senator from Texas has withdrawn his objection to the bill.

Mr. DANIEL. I should like to have a brief explanation of the bill. There have been recently some controverted questions about copyright discussed. I should like to know the theory and principle of the bill. It is quite a lengthy measure.

Mr. ALDRICH. I suggest that the bill be read for the information of the Senate.

The VICE-PRESIDENT. The Secretary will read the bill.

The Secretary proceeded to read the bill.

Mr. OVERMAN. I wish to ask the Senator if he knows whether the bill gives the right to the courts to allow attorneys' fees to the complainant?

Mr. SMOOT. I do not so understand it.

Mr. OVERMAN. That is what I gathered from the reading. It permits the court to allow attorneys' fees to the complainant.

Mr. SMOOT. In what section?

Mr. OVERMAN. Let it be read again.

The VICE-PRESIDENT. The Secretary will again read the section.

The Secretary read as follows:

In case of the failure of such manufacturer to pay to the copyright proprietor within thirty days after demand in writing the full sum of royalties due at said rate at the date of such demand the court may award taxable costs to the plaintiff and a reasonable counsel fee, and the court may, in its discretion, enter judgment therein for any sum in addition over the amount found to be due as royalty in accordance with the terms of this act, not exceeding three times such amount.

Mr. OVERMAN. I do not like that provision. I do not think the court ought to have the right to allow attorneys' fees in any case.

Mr. SMOOT. This is in a case where the manufacturer is to report on the 20th of every month the amount of royalty that was due the composer. In case he does not report, certain

damages, three times the amount, are allowed and a reasonable attorneys' fee.

Mr. OVERMAN. That is all right except the attorneys' fees. It is all right to allow the royalty, but I do not think any attorneys' fees ought to be allowed.

Mr. SMOOT. It is done to protect the composer. Many times they are very poor people and unable to secure the services of an attorney. The object is to prevent any manufacturer from using the composer's composition on these mechanical devices without compensation to them. The object is to protect them in every way possible.

Mr. OVERMAN. I want to protect them, but I do not think they ought to have a right to go into court and have attorneys' fees allowed. Let them pay their own fees. Why should not a man going into court pay his attorney's fees.

Mr. ALDRICH. I suggest that the bill is being read and discussion is not in order at this time.

The VICE-PRESIDENT. That is correct.

Mr. OVERMAN. I merely want to understand it.

Mr. ALDRICH. I understand the object the Senator from North Carolina has in view. I think the general principle is right.

Mr. OVERMAN. You would have every little lawyer in the country trying to get attorney's fees. That is what I object to.

The VICE-PRESIDENT. The Secretary will proceed with the reading of the bill. That is in order.

The Secretary resumed and concluded the reading of the bill.

Mr. DANIEL. Mr. President, I am opposed to the present consideration of this bill. The art of music is the most democratic art in the world. I might say in some sense it is a pure republican art. It has given more for the benefit of the whole people than any other blessing we receive. It may be that it ought to be harnessed up. It may be that it ought to have a protective tariff before it can reach a poor man's ears. But we have not a national song, North, South, East, or West, or anywhere else, that is paying any duty on itself to-day.

I am opposed to bottling music and selling the right to hear it to the people who have to pay for it. It is bad enough to have to pay for it at all. If you could put some good music free in everybody's home, you would do a great blessing to all mankind.

I am not capable at this time of night to argue it as the gentlemen who have been studying it, as they tell me, for five years. It took them five years to get their minds all together. We are now just about to adjourn. Every one of us has been going night and day. There is hardly a man in this body, unless some extraordinary man like the distinguished Senator who is eyeing me so closely, who can now digest this bill; and if he could digest it, he would a great deal rather be engaged in digesting something else. We can not get hold of this bill in this time. It is 36 pages long. Fees and taxes and attorneys' fees are jumbled up with music.

So, Mr. President, I shall object to the consideration of this bill to-night, if an objection will reach it.

Mr. SMOOT. May I ask the Senator if he will not allow the bill to go over until 8.30 this evening?

Mr. DANIEL. I will allow it to go over altogether.

Mr. SMOOT. I should like to have it go over until 8.30, and then if he raises an objection——

Mr. ALDRICH. I suggest that we then give half an hour to the discussion of it and take a vote on it at 9 o'clock.

The VICE-PRESIDENT. Does the Senator from Rhode Island put that in the shape of a request for unanimous consent?

Mr. ALDRICH. Yes; I ask unanimous consent that we shall take the vote on it at 9 o'clock.

The VICE-PRESIDENT. The Senator asks unanimous consent that the pending bill be taken up for consideration at half past 8 and that it be voted upon at 9 o'clock.

Mr. DANIEL. Mr. President, I call for a quorum.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Rhode Island?

Mr. DANIEL. I call for a quorum.

Mr. ALDRICH. In one minute we are to take a recess.

Mr. OVERMAN. I am going to object to the request now.

The VICE-PRESIDENT. The hour of half past 6 having arrived, the Senate will stand in recess until half past 8.

The Senate thereupon (at 6.30 p. m.) took a recess until 8.30 p. m.

EVENING SESSION.

The Senate reassembled at 8 o'clock and 30 minutes p. m.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 24864. An act to provide for the distribution of the CONGRESSIONAL RECORD, and public bills, documents, etc., to the governor-general of the Philippine Islands, at Manila, P. I.; and

H. R. 25980. An act for the relief of Sarah J. Fowler.

The message also announced that the House had passed the joint resolution (S. R. 119) authorizing the Secretary of War to award gold medals to Orville Wright and Wilbur Wright, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed concurrent resolution (No. 69) providing for the printing and binding of 2,000 copies of the hearings, including index, of the Select Committee of the House to Investigate Pulp Wood, Pulp, and Paper, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a concurrent resolution (No. 77) providing for the printing and binding of 1,300 copies of Notes on Tariff Revision, prepared under the direction of the clerk of the Committee on Ways and Means, etc., in which it requested the concurrence of the Senate.

The message further announced that the House had passed the bill (S. 3952) to restore to the active list of the United States Marine Corps the name of Robert Morgan Gilson with an amendment, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 28304) granting certain obsolete ordnance for ornamental purposes, and it was thereupon signed by the Vice-President.

HOUSE BILLS REFERRED.

H. R. 24864. An act to provide for the distribution of the CONGRESSIONAL RECORD and public bills, documents, etc., to the governor-general of the Philippine Islands, at Manila, P. I., was read twice by its title and referred to the Committee on the Philippines.

H. R. 25980. An act for the relief of Sarah J. Fowler was read twice by its title and referred to the Committee on the District of Columbia.

AMENDMENT OF COPYRIGHT ACTS.

Mr. SMOOT. Mr. President, I move that the Senate proceed to the consideration of the bill (H. R. 28192) to amend and consolidate the acts respecting copyrights.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Utah.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill.

The VICE-PRESIDENT. The bill has already been read. If no amendment is proposed, it will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 5, 7, 8, 9, 14, 15, 18, 19, 20, 26, 27, 28, 30, 41, 69, 75, and 76.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 6, 10, 11, 12, 13, 16, 17, 21, 22, 24, 25, 29, 31, 32, 33, 36, 37, 38, 39, 40, 42, 43, 44, 45, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 70, 71, 72, 73, 79, 81, 82, 83, 84, 85, 86, 87, 88, 90, 91, 92, 93, 94, and 95, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: On page 23 of the bill, in line 11, after the word "fifty-one," insert the words "and fourteen hundred and sixty-nine;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In line 3 of said amendment, after the word "Survey," insert the words "during the fiscal year nineteen hundred and ten;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In line 5 of said amendment strike out

the words ", the said sum of three thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows: In line 4 of said amendment insert in the blank the number "seven hundred and forty-nine;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "nine thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment as follows: After the word "Representatives," in lines 11 and 12 of said amendment, strike out all that follows down to and including the word "Printing," in line 21, and in line 21 of said amendment strike out the word "twelve" and insert in lieu thereof the word "ten;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment as follows: After the word "document" in said amendment insert the words "numbered seven hundred and forty-seven;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: After the word "numbered" in said amendment insert the words "seven hundred and forty-five;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 89, and agree to the same with an amendment as follows: In line 12 of said amendment, after the word "numbered," insert the words "seven hundred and forty-six;" and the Senate agree to the same.

EUGENE HALE,
J. H. GALLINGER,
H. M. TELLER,
Managers on the part of the Senate.

J. A. TAWNEY,
EDWARD B. VREELAND,
S. BRUNDIDGE, Jr.,
Managers on the part of the House.

The report was agreed to.

CROW RESERVATION IN MONTANA.

Mr. KEAN. I move that the resolution submitted by the Senator from Minnesota [Mr. CLAPP] on the 25th ultimo, relating to an investigation of the affairs of the Crow Reservation in the State of Montana, and referred to the Committee to Audit and Control the Contingent Expenses of the Senate, be reconsidered and that the resolution be postponed indefinitely.

The motion was agreed to.

Mr. KEAN submitted the following resolution, which was considered by unanimous consent and agreed to:

Resolved, That Senate resolution No. 298, Sixtieth Congress, second session, passed March 1, 1909, giving authority to the Committee on Indian Affairs to investigate the affairs of the Crow Reservation in the State of Montana, be reconsidered and postponed indefinitely.

PULP WOOD, ETC.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution from the House of Representatives, which was referred to the Committee on Printing:

House concurrent resolution 69.

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound 2,000 copies of the hearings, including index, of the select committee of the House to investigate as to pulp wood, pulp, and paper, of which 1,500 copies shall be for the use of the House, including 300 copies to be distributed under the direction of the members of said committee elected to the Sixty-first Congress, and 500 copies for the use of the Senate.

Mr. MILTON subsequently, from the Committee on Printing, to whom was referred the foregoing concurrent resolution, reported favorably thereon, and it was considered by unanimous consent and agreed to.

GOLD MEDALS TO ORVILLE WRIGHT AND WILBUR WRIGHT.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the joint resolution (S. R. 119) authorizing the Secretary of War to award gold medals to Orville Wright and Wilbur Wright, which was, on page 1, line 12, after "money," insert "not to exceed $300."

Mr. KEAN. In behalf of the Senator from Ohio [Mr. FORAKER] I move that the Senate concur in the House amendment.

The motion was agreed to.

NOTES ON TARIFF REVISION.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution (H. C. Res. 77) from the House of Representatives, which was referred to the Committee on Printing:

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound 1,300 copies of "Notes on Tariff Revision," prepared under the direction of the clerk of the Committee on Ways and Means, 1,000 copies for the use of the House and 300 copies for the use of the Senate; that there be printed and bound 1,300 copies of "Imports and Duties," 1894 to 1907, prepared under the direction of the Committee on Ways and Means, 1,000 copies for the use of the House and 300 copies for the use of the Senate; that there be printed and bound 2,500 copies of "Tariff Hearings" before the Committee on Ways and Means of the House of Representatives since the 10th day of November last, 1,700 copies for the use of the House and 800 copies for the use of the Senate.

Mr. MILTON subsequently, from the Committee on Printing, to whom was referred the foregoing concurrent resolution, reported favorably thereon, and it was considered by unanimous consent and agreed to.

PENSIONERS METROPOLITAN POLICE FUND.

Mr. SCOTT. I move that Senate bill 6105 be recalled from the House of Representatives, and I ask unanimous consent for the present consideration of the bill (H. R. 23973) for the relief of pensioners of the Metropolitan police fund, which I report from the Committee on the District of Columbia without amendment.

The VICE-PRESIDENT. The bill just reported will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay the amount withheld from pensioners of the police fund on account of deficiencies in said fund during the period from June 1, 1894, to May 31, 1896, and the Commissioners of the District of Columbia are authorized and directed to adjust and settle all claims for said deficiencies in the payment of allowances made by them to pensioners of said police fund. In case of death of any beneficiary under the provisions of this bill the amount due such beneficiary shall be paid to the legal representative thereof.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The VICE-PRESIDENT. The Chair suggests to the Senator from West Virginia that it is not necessary to recall the Senate bill from the House.

Mr. SCOTT. I presume it will die with the session.

APPALACHIAN AND WHITE MOUNTAIN FOREST RESERVE.

Mr. BRANDEGEE. I ask that the amendment of the House of Representatives to the bill (S. 4825) for acquiring national forests in the Southern Appalachian Mountains and White Mountains be laid before the Senate.

The VICE-PRESIDENT. The amendment of the House of Representatives will be read.

The SECRETARY. It is proposed to strike out all after the enacting clause and to insert:

That the consent of the Congress of the United States is hereby given to each of the several States of the Union to enter into any agreement or compact, not in conflict with any law of the United States, with any other State or States for the purpose of conserving the forests and the water supply of the States entering into such agreement or compact.

SEC. 2. That the sum of $100,000 is hereby appropriated and made available until expended, out of any moneys in the National Treasury not otherwise appropriated, to enable the Secretary of Agriculture to cooperate with any State or group of States, when requested to do so, in the protection from fire of the forested watersheds of navigable streams, and the Secretary of Agriculture is hereby authorized, and on such conditions as he deems wise, to stipulate and agree with any State or group of States to cooperate in the organization and maintenance of a system of fire protection on any private or state forest lands within such State or States and situated upon the watershed of a navigable river: *Provided*, That no such stipulation or agreement shall be made with any State which has not provided by law for a system of forest-fire protection: *Provided further*, That in no case shall the amount expended in any State exceed in any fiscal year the amount appropriated by that State for the same purpose during the same fiscal year.

SEC. 3. That the Secretary of Agriculture, for the further protection of the watersheds of said navigable streams, may, in his discretion, and he is hereby authorized, on such conditions as he deems wise, to stipulate and agree to administer and protect for a definite term of years any private forest lands situated upon any such watershed whereon lands may be permanently reserved, held, and administered as national forest lands; but such stipulation or agreement shall provide that the owner of such private lands shall cut and remove the timber thereon only under such rules and regulations, to be expressed in the stipulation or agreement, as will provide for the protection of the forest in the aid of navigation: *Provided*, That in no case shall the United States be liable for any damage resulting from fire or any other cause.

SEC. 4. That from the receipts accruing from the sale or disposal of any products or the use of lands or resources from public lands, now or hereafter to be set aside as national forests, that have been or may hereafter be turned into the Treasury of the United States and which are not otherwise appropriated, there is hereby appropriated for the

fiscal year ending June 30, 1909, the sum of $1,000,000, and for each fiscal year thereafter a sum not to exceed $2,000,000 for use in the examination, survey, and acquirement of lands located on the headwaters of navigable streams or those which are being or which may be developed for navigable purposes: *Provided*, That the provisions of this section shall expire by limitation on the 30th day of June, 1919.

SEC. 5. That a commission, to be known as the National Forest Reservation Commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, and one Member of the Senate, to be selected by the President of the Senate, and one Member of the House of Representatives, to be selected by the Speaker, is hereby created and authorized to consider and pass upon such lands as may be recommended for purchase as provided in section 6 of this act, and to fix the price or prices at which such lands may be purchased, and no purchases shall be made of any lands until such lands have been duly approved for purchase by said commission: *Provided*, That the members of the commission herein created shall serve as such only during their incumbency in their respective official positions; and any vacancy on the commission shall be filled in the manner as the original appointment.

SEC. 6. That the commission hereby appointed shall, through its president, annually report to Congress, not later than the first Monday in December, the operations and expenditures of the commission, in detail, during the preceding fiscal year.

SEC. 7. That the Secretary of Agriculture is hereby authorized and directed to examine, locate, and recommend for purchase such lands as in his judgment may be necessary to the regulation of the flow of navigable streams, and to report to the National Forest Reservation Commission the results of such examinations: *Provided*, That before any lands are purchased by the National Forest Reservation Commission said lands shall be examined by the Geological Survey and a report made to the Secretary of Agriculture, showing that the control of such lands will promote or protect the navigation of streams on whose watersheds they lie.

SEC. 8. That the Secretary of Agriculture is hereby authorized to purchase, in the name of the United States, such lands as have been approved for purchase by the National Forest Reservation Commission at the price or prices fixed by said commission: *Provided*, That no deed or other instrument of conveyance shall be accepted or approved by the Secretary of Agriculture under this act until the legislature of the State in which the land lies shall have consented to the acquisition of such land by the United States for the purpose of preserving the navigability of navigable streams.

SEC. 9. That the Secretary of Agriculture may do all things necessary to secure the safe title in the United States to the lands to be acquired under this act; but no payment shall be made for any such lands until the title shall be satisfactory to the Attorney-General and shall be vested in the United States.

SEC. 10. That such acquisition may in any case be conditioned upon the exception and reservation to the owner, from whom title passes to the United States, of the minerals and of the merchantable timber, or either or any part of them, within or upon such lands at the date of the conveyance; but in every case such exception and reservation, and the time within which such timber shall be removed, and the rules and regulations under which the cutting and removal of such timber and the mining and removal of such minerals shall be done shall be expressed in the written instrument of conveyance, and thereafter the mining, cutting, and removal of the minerals and timber so excepted and reserved shall be done only under and in obedience to the rules and regulations so expressed.

SEC. 11. That whereas small areas of land chiefly valuable for agriculture may of necessity or by inadvertence be included in tracts acquired under this act, the Secretary of Agriculture may, in his discretion, and he is hereby authorized, upon application or otherwise, to examine and ascertain the location and extent of such areas as in his opinion may be occupied for agricultural purposes without injury to the forests or to stream flow and which are not needed for public purposes, and may list and describe the same by metes and bounds, or otherwise, and offer them for sale as homesteads at their true value, to be fixed by him, to actual settlers, in tracts not exceeding 80 acres in area, under such joint rules and regulations as the Secretary of Agriculture and the Secretary of the Interior may prescribe; and in case of such sale the jurisdiction over the lands sold shall, ipso facto, revert to the State in which the lands sold lie. And no right, title, interest, or claim in or to any lands acquired under this act, or the waters thereon, or the products, resources, or use thereof after such lands shall have been so acquired, shall be initiated or perfected, except as in this section provided.

SEC. 12. That, subject to the provisions of the last preceding section, the lands acquired under this act shall be permanently reserved, held, and administered as national forest lands under the provisions of section 24 of the act approved March 3, 1891 (vol. 26, Stat. L., p. 1103), and acts supplemental to and amendatory thereof. And the Secretary of Agriculture may from time to time divide the lands acquired under this act into such specific national forests and so designate the same as he may deem best for administrative purposes.

SEC. 13. That the jurisdiction, both civil and criminal, over persons upon the lands acquired under this act shall not be affected or changed by their permanent reservation and administration as national forest lands, except so far as the punishment of offenses against the United States is concerned, the intent and meaning of this section being that the State wherein such land is situated shall not, by reason of such reservation and administration, lose its jurisdiction nor the inhabitants thereof their rights and privileges as citizens or be absolved from their duties as citizens of the State.

SEC. 14. That 25 per cent of all moneys received during any fiscal year from each national forest into which the lands acquired under this act may from time to time be divided shall be paid, at the end of such year, by the Secretary of the Treasury to the State in which such national forest is situated, to be expended as the state legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which such national forest is situated: *Provided*, That when any national forest is in more than one State or county the distributive share to each from the proceeds of such forest shall be proportional to its area therein: *Provided further*, That there shall not be paid to any State for any county an amount equal to more than 40 per cent of the total income of such county from all other sources.

SEC. 15. That a sum sufficient to pay the necessary expenses of the commission and its members, not to exceed an annual expenditure of $25,000, is hereby appropriated, out of any money in the Treasury not otherwise appropriated. Said appropriation shall be immediately available and shall be paid out on the audit and order of the president of the said commission, which audit and order shall be conclusive and binding upon all departments as to the correctness of the accounts of said commission.

And to amend the title so as to read: "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers."

Mr. BRANDEGEE. I move that the Senate concur in the amendment of the House of Representatives.

Mr. TELLER. Mr. President, this is an amendment of the House to a Senate bill. It is not an amendment, although, perhaps, it can be termed so, because anything is an amendment which is different from the bill. It is a new bill that has just been presented to the Senate for the first time. It is a bill that has not been examined by any committee. It is a bill that, I think, has more vicious provisions in it than any bill I recall in many years.

Mr. President, I do not believe anyone expects this bill to pass, and if there is any business that anyone thinks ought to be done, it ought to be done pretty soon, because otherwise I suppose it will not be done at all.

I have very fixed ideas, Mr. President, about this business. I believe that I can in the course of a few hours demonstrate that this is not a constitutional measure, and I shall proceed to do that if there is a determination to press the bill to-night.

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from California?

Mr. TELLER. I will hear from the Senator from California.

Mr. FLINT. I should just like to say that I have not had an opportunity to examine the bill, but from a casual examination of it I am quite certain that it will take at least two hours to say what I desire to say on the subject. I think it ought to be fully discussed at this time if we are to pass it.

Mr. DIXON. Mr. President, I should like to inquire what is the legislative status of the bill. Has the bill, as passed by the House as a substitute for the original Senate bill, been referred to the Senate Committee on Agriculture and Forestry?

Mr. BRANDEGEE. Mr. President, replying to the Senator from Montana, I will state the situation as I understand it.

At the last session of Congress the Senate passed a bill for acquiring national parks in the Southern Appalachian and White Mountains. The House at this session struck out all after the enacting clause of the Senate bill and substituted this House amendment. The Senator from Colorado is correct in stating that it is a complete, new bill, and it does proceed upon different lines from the bill passed by the Senate at the last session.

The Senate bill came back to the Senate from the House day before yesterday, late in the evening. I asked that the Senate disagree to the House amendment and request a committee of conference. The Senator from Colorado objected and the Senator from Idaho objected, and when I insisted upon my motion the Senator from Colorado made the point of no quorum and then moved that the Senate adjourn, and the Senate did adjourn.

I understand that the question now is upon concurring in the House amendment, which is a new bill and has not been considered by any Senate committee, because the Senate failed to appoint any committee of conference.

Mr. DIXON. There have been no Senate conferees appointed?

Mr. BRANDEGEE. No Senate conferees have been appointed, and, of course, the House amendment to the Senate bill necessarily has not been referred to any Senate committee.

Mr. DIXON. I want to say to the Senator in charge of this bill that, while generally I have been favorable to the creation of an Appalachian national forest, I see in this bill as it comes back from the House a proposition to take the proceeds of the grazing fees and timber sales on the forests in the Far West to acquire a national forest in the Appalachian Mountains.

With section 4 in the bill, supplementing what my friend, the Senator from California, said, I want to say to the Senator from Connecticut that I think it would take me two or three hours to present what I believe to be the enormity of the offense contained in that section.

Mr. TELLER. Mr. President, I hope I have not lost the floor by the intervention of Senators.

The VICE-PRESIDENT. The Senator from Colorado is entitled to the floor.

Mr. TELLER. The House substitute for the bill has been read. I ask that the original bill may be read.

The VICE-PRESIDENT. Without objection, the Secretary will read, as requested.

The Secretary proceeded to read the bill (S. 4825) for acquiring national forests in the Southern Appalachian Mountains and White Mountains, but was interrupted by—

Mr. BRANDEGEE. I should like to inquire of the Senator from Colorado whether he thinks it is essential to the proper consideration of the House amendment that the whole bill of the Senate as originally passed at the last session should be read?

Mr. TELLER. Mr. President, I would say that I think the bill as passed by the Senate was a pretty bad bill, but it was an angel of light compared with this one. I think I might just as well be frank with the Senator from Connecticut. This bill has never been considered by the Senate at all, and I do not recall that we have ever in our experience here taken up and considered a bill from the other House that claimed to be an amendment, but which was an absolutely new bill. The rule has been to send such bills to the proper committees to have them considered and reported to us. This is not an amendment; it is the substitution of a bill proceeding upon entirely different lines, involving questions not involved at all in the first bill—questions of constitutional law that have been discussed in this Senate and in the other House for a very long time. I shall feel obliged to discuss it at full length, even if it should take me all night. I want to say to the Senator from Connecticut, frankly, that I do not believe that he can pass his bill; and I will be frank enough to say that I do not intend, if I can prevent it, that the bill shall pass.

I think the bill is vicious. I think it is a departure from the custom of the Senate, and one that we can not afford to make. If the Senator wishes to press it, I am willing to go on with the discussion of the bill. I do not believe it could be passed even on a vote; but I do not propose, Mr. President, to let it come to a vote until I get through discussing it.

Mr. CLARK of Wyoming. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Wyoming?

Mr. TELLER. I do.

Mr. CLARK of Wyoming. Mr. President, with the consent of the Senator from Colorado [Mr. TELLER], I simply want to emphasize what that Senator has already stated as to the character of this bill and the possibility of its passage. It is not only a departure from the Senate bill, which, as the Senator from Colorado said, is bad enough, but it is a departure from any constitutional exercise of authority by the Government.

Mr. TELLER. Or ever attempted.

Mr. CLARK of Wyoming. Or ever attempted to exercise with regard to such matters. There are Senators upon the floor who have examined this bill as it came from the other House who are thoroughly satisfied, not only as to its impropriety and the damage of the legislation itself, but also as to its unconstitutionality. I assure the Senator from Connecticut that the bill will probably lead to such extended discussion that the clock would have to be turned back many hours before the bill could be passed at this session of the Senate.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Idaho?

Mr. TELLER. I do.

Mr. HEYBURN. Mr. President, I am in thorough accord with the suggestion of the Senator from Colorado [Mr. TELLER] and that of the Senator from Wyoming [Mr. CLARK]. I will go further and say that, in my judgment, if this bill is to receive consideration and be acted upon, it would be necessary to turn the clock back about two weeks for the final adjournment. [Laughter.] That is my opinion.

We have been the victims of this class of legislation so long that patience has ceased to be a virtue. A more vicious proposition of legislation—and I say it without intending to reflect upon any Senator who has been connected with it—was never devised or presented to a legislative body. That the Government of the United States should take possession of an empire on the Pacific coast and sell it for the purpose of investing the funds in farms and private lands in the Atlantic States seems to me to be in itself so far outside of any province or purpose of Government that it is not worthy of more consideration than would be required to postpone it indefinitely.

Mr. BRANDEGEE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Connecticut?

Mr. TELLER. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, I regret exceedingly that this bill did not arrive in this body at an earlier period. I think there is no more important subject before the people today than the conservation of our natural resources, and especially the conservation of our forests. I am ready at all times and in every place to contribute whatever of knowledge or ability I may possess upon that subject to the consummation of the policies of the Government.

Mr. President, I am obliged to the Senator from Colorado for his frank statement of his purpose. It seemed to me that when he asked to have the bill as passed by the Senate at the last session read in full at this time and in this connection, it was not so much for the purpose of furnishing information to the Senate upon the question at issue as for the purpose—I trust I say it without offending the sensibilities of the Senator—of consuming time and preventing a vote upon the passage of the bill. It was for that reason that I interrupted the reading of the bill and asked the Senator what was his purpose. I am obliged to him for his frankness in replying.

I have no desire to consume the time of the Senate upon this, its last session this evening, in attempting simply to prevent the consideration of other business. It is very evident, in view of what several Senators who have expressed their opposition to this bill have said, that no vote is going to be allowed to be taken upon the bill at this session, and in view of that fact——

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Montana?

Mr. TELLER. Certainly, Mr. President.

Mr. CARTER. Mr. President, the bill which passed the Senate is radically different from that which is returned to the Senate as a substitute. There would be most protracted debate, not only upon the conflicting views of the two Houses, but likewise upon the general policy involved.

There is much to be said upon the question of the conservation of our natural resources as a general subject, and upon that, I assume, all Senators would be agreed as to the object to be attained, but divided as to the means of attaining the object.

The proposition presented by the bill offered as a substitute by the House of Representatives will, according to a statement made by a prominent Member of the other House, involve an expenditure of $300,000,000 as a primary investment in the purchase of forest lands.

Mr. TELLER. I think more than that.

Mr. CARTER. Or possibly more.

Mr. BRANDEGEE. Mr. President——

Mr. CARTER. It is not conceivable that the Senate, in the few remaining hours of this session, will consent to make a departure involving $300,000,000 in an investment in forest lands, with an interminable and unending expenditure for maintenance thereafter.

I think the Senator from Connecticut may as well here and now take it for granted that no action in this body will be permitted which will result in the appropriation of $300,000,000 now, for that is what it means. While the amount of the first investment is only about $2,000,000, the ultimate investment will be one hundred and fifty times that sum. Then there will be fixed to the Government a continuous and unending expenditure for maintenance. If the Government intends to buy all of the unoccupied lands in all the States for the purpose of tree culture and the propagation of forest life, and to assess the people of the United States for the maintenance of the forests as they are, and the propagation of them as the Forestry Bureau may determine, then, Mr. President, that departure should be made after the most deliberate and careful consideration by both branches of Congress.

Mr. FLINT. I simply want to ask the Senator a question. The Senator made the statement that the people of the Nation would pay for the purchase of this land. According to my reading of the bill it would be limited to the people residing in the Western States. According to the bill $20,000,000 are appropriated, the proceeds to come entirely from the Western States, and not from the people of the Nation as a whole.

Mr. CARTER. Mr. President, the proceeds of the public lands or from the forest trees growing on the public lands is the common heritage of the Nation; and while the States in which the lands are located have certain definite rights, the proceeds from the public lands from the sale of the public timber should go into the Public Treasury. But, Mr. President, the purchase of land with public money, whether received from taxes levied through the internal revenue or at the customhouses or by the sale of public property, is practically all one and the same thing.

This bill proposes a departure which will involve ultimately an investment, according to the statement of the leader of the majority of the House of Representatives in that body, of $300,000,000. I doubt if the Senate can reasonably be expected,

at the hour of 9.15 p. m. on the 3d day of March, within a few hours of the close of the session of Congress, to embark upon the discussion of a policy so far-reaching and so expensive. I think the Senator from Connecticut may as well at once lay this subject aside for consideration at some future session of Congress.

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Idaho?

Mr. TELLER. I yield to the Senator from Idaho.

Mr. BORAH. Mr. President, I have taken very little part at any time in the discussion of the forest reserves, although, perhaps, the State which I in part represent is as deeply interested in that question as any State represented upon this floor. I have taken but little part in the discussion largely for the reason that there were those who were better able to take care of the matter. But this bill presents a feature which would compel me to exhaust all the means at command, both intellectually and physically, before it could be made a law.

The Senator from Michigan [Mr. SMITH] in discussing the forestry question a few days ago estimated that by some process it was determined that they could exist for eight hundred years. I asked him at the time if he expected that we would consent to having one-third of the State of Idaho remain in forest reserves for eight hundred years. I wondered at the time just how they were going to build up a system by which that could be carried on, as it has been claimed from the beginning that the forest reserves were to be reduced from time to time as settlers desired the lands for agricultural purposes where they were subject to that use.

But, Mr. President, if this bill should be fitted into the present forestry policy, we would see at once how the estate in the West would be made to feed the estate in the East; and there will be no desire upon the part of those in charge of the Forestry Service to permit a settler to reduce the area of a reserve, although it may be agricultural land, because the reserves to be created in the East will be fed from the money which is received from the sales in the forest reserves of the West.

It has been said here, Mr. President, although it has been disputed, that there are no agricultural lands in the forest reserves of the West. We would be much more patient in Idaho and in other parts of the West if that statement were true. So far as I am individually concerned, if the forest reserves were created as they should be, I would be entirely in favor of preserving them in that form; but I say here again, as it has been said upon the floor of the Senate so often, that there are thousands and thousands of acres of the best agricultural land in our State now included in forest reserves. The great question which confronts us in the West is, how we are going to get inside of the forest reserves for the purpose of settlement; because, whatever may be said and whatever interpretation may be put upon the rules and laws here in the Senate, when you come to try to enforce that interpretation in a practical way, the settler will turn away from the forest reserve. No man is going to undertake to make a home or to build up a home under such conditions that his work must be subject at last to the approbation or the ipse dixit of an individual.

Fitting into the present law, the law which is now proposed, it will always be to their interest and behind their action there will always be the great motive to keep the forest reserves of the West perpetually intact and to hold every foot of land that is in them to-day to feed the great estate of the East.

While I do not propose to discuss this question at this time, I want to say in all earnestness, and not for the purpose of delay, that I should not myself consent, without a very thorough discussion, to the bill passing now or at any other time while I am a Member of the Senate.

Mr. TELLER. Mr. President, I think, after the statements made by the Senators who are interested in this subject, that it ought to be pretty apparent to the Senator from Connecticut, who proposes to take up and dispose of this matter, that that can not be successfully accomplished at the present session. I want to assure him that I will spend, if necessary, the last hours of my public service in seeing that the bill does not pass.

If there is anything of filibustering in that, I shall be proud of it, Mr. President, because I think this is the most vicious bill that ever was presented to the Senate—an absolute violation of every constitutional provision that has been recognized in the past. In order that there may not be any further waste of time, I move the indefinite postponement of the bill.

Mr. CARTER (to Mr. TELLER). Move its reference to a committee.

Mr. TELLER. Very well; I will change the motion, and move that the bill be referred to the Committee on Public Lands.

The VICE-PRESIDENT. The Senator from Colorado moves that the bill be referred to the Committee on Public Lands.

Mr. BRANDEGEE. Mr. President, I will suggest to the Senator from Colorado and to the Chair, that the Committee on Forest Reservations would be the proper committee to have the bill referred to, if the Senate is not willing to consider the bill further at this time.

Mr. TELLER. I do not care to what committee it goes.

Mr. BRANDEGEE. I will ask the Senator from Colorado to reserve his motion for a moment.

Mr. TELLER. I will do so.

Mr. BRANDEGEE. I simply wish to say, Mr. President, referring to the remarks of the Senator from Montana [Mr. CARTER] as to the judgment of some prominent Member of the other body that this project involves an expenditure of $300,000,000, that without having the pleasure of a knowledge of the name of the prominent gentleman, I desire to call the attention of the Senate to section 4 of this bill, which provides that $2,000,000 a year for ten years shall be appropriated, and thereupon the section and its effect shall expire by limitation. That limits the expense under the bill to $20,000,000.

As to the position taken by the junior Senator from Idaho [Mr. BORAH], that the application, for the purposes proposed in the bill, of money received from the operations of the forest reserves of the West and the public lands of this Government is a diversion from their legitimate purpose, and that it is wrong to his portion of the country to have such money spent in other parts of the country where additional forests are needed, I would say that, to my mind, it is a very proper use of those funds. If the Government from the rental of its forests upon its own public lands has a surplus and needs forests in other parts of the country, it should be allowed to buy them where they are needed with the funds of the Government in its National Treasury—money which belongs to all the people of this country, and not exclusively to the people of the West.

In view of the opposition that has developed to this measure—and that fact must be evident to everybody, from the statements of Senators as to their intention to debate it—I shall not oppose the motion of the Senator from Colorado to refer the matter to the Committee on Forest Reservations and the Protection of Game.

Mr. LODGE. Mr. President, I desire to say a word. Of course, it is perfectly obvious, after the statements that have been made here, that there is no possibility of passing this bill before Congress adjourns. But I want to say this much: The Senate passed a bill making an appropriation for the purchase of forests in the Appalachian region, as it is called, including the White Mountain region of New England. I think that bill met with general support in the Senate. It appropriated a sum of money to purchase the territory needed.

This bill is on a very different plan, as I understand, and I only want Senators who are opposed to this bill to realize that it is a matter of intense interest and importance to New England that the rivers, which are turning more wheels than any other rivers in the country, are in danger of extinction, and all we are anxious for is to have some protection for those rivers.

I see the impossibility of doing anything now; but I hope Senators from the great forest States will realize that we have no desire whatever to take any unfair advantage in any direction, but that we should like their aid in preserving our forests, as we have always tried to give them aid in redeeming their arid lands. I shall make no opposition, of course, to the proposed reference.

Mr. TELLER. Mr. President, I do not care to occasion further delay by debate, but I want simply to say that, so far as I am concerned, I am quite willing to debate it if the bill is to be pressed.

Mr. CARTER. Has the Senator from Colorado amended his motion so as to change the reference from the Committee on Public Lands to the Committee on Forest Reservations and the Protection of Game?

Mr. TELLER. I have. I said I had no objection to that reference.

The VICE-PRESIDENT. The Senator from Colorado moves that the bill be referred to the Committee on Forest Reservations and the Protection of Game. Is there objection? The Chair hears none, and it is so ordered.

ROBERT MORGAN GILSON.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 3952) to restore to the active list of the United States Marine Corps the name of Robert Morgan Gilson, which were, on page 1, line 6, after the words "Corps," where it occurs the second time, to insert "to take rank next after Capt. Logan Feland."

Mr. DICK. I move that the Senate agree to the amendments of the House of Representatives to the bill.

The motion was agreed to.

DISTRIBUTION OF DOCUMENTS IN THE PHILIPPINES.

Mr. LODGE. From the Committee on the Philippines I report the bill (H. R. 24864) to provide for the distribution of the CONGRESSIONAL RECORD and public bills, documents, etc., to the governor-general of the Philippine Islands, at Manila, P. I., and I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SARAH J. FOWLER.

Mr. GALLINGER. I am directed by the Committee on the District of Columbia, to whom was referred the bill (H. R. 25980) for the relief of Sarah J. Fowler, to report it favorably without amendment. I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It authorizes the Commissioners of the District of Columbia to place the name of Sarah J. Fowler, widow of the late John H. Fowler, on the pension roll of the police department of the District at the rate of $50 per month.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BUREAU OF MINES.

Mr. DICK. I move that the Senate proceed to the consideration of the bill (H. R. 20883) to establish in the Department of the Interior a bureau of mines.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill?

Mr. TELLER. I do not suppose an objection would count for much, but I would object if it could.

The VICE-PRESIDENT. The question is on the motion of the Senator from Ohio that the Senate proceed to the consideration of the bill named by him. [Putting the question.] By the sound, the "noes" seem to have it.

Mr. SCOTT. That bill is of too great importance to my State to be ruthlessly put aside. I ask that the question be again put.

The VICE-PRESIDENT. The Chair will again put the question. The question is on the motion to proceed to the consideration of the bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 20883) to establish in the Department of the Interior a bureau of mines, which was reported from the Committee on Mines and Mining with amendments.

The first amendment of the Committee on Mines and Mining was, in section 2, page 2, line 4, after the word "ores," to insert "and other mineral substances;" in line 6, after the word "accidents," to strike out "the values of mineral products and markets for the same;" in line 8, before the word "pertinent," to strike out "of other matters" and insert "other technologic investigations and inquiries," so as to make the section read:

SEC. 2. That it shall be the province and duty of said bureau and its commissioner, under the direction of the Secretary of said department, to foster, promote, and develop the mining industries of the United States; to make diligent investigation of the methods of mining, the safety of miners, the possible improvement of conditions under which mining operations are carried on, the treatment of ores and other mineral substances, the use of explosives and electricity, the prevention of accidents and other technologic investigations and inquiries pertinent to said industries, and from time to time make such public reports of the work, investigations, and information obtained as the Secretary of said department may direct, with the recommendations of such bureau.

Mr. CLAY. From what committee does the bill come?

The VICE-PRESIDENT. From the Committee on Mines and Mining.

Mr. CLAY. Does not the Interior Department deal with mining at this time?

Mr. DICK. This bureau is to be created under that department.

Mr. CLAY. Mr. President, it strikes me we are getting to be a government of bureaus and commissions. I notice——

Mr. CLAPP. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Minnesota?

Mr. CLAY. Certainly.

Mr. CLAPP. I take exception to the tense. We have become a government of bureaus and commissions.

Mr. CLAY. That is true.

Mr. President, one commission created by Congress during the last two years will spend $550,000 when the work is completed. When this Congress convened a statement was made by the leaders in both Houses that our revenues were falling short to the extent of from ten to fifteen million dollars per month. We knew that there had been a deficit during the last year of $114,000,000. Notwithstanding that fact, on almost every appropriation bill that has come before us we have endeavored to provide a commission to transact the business of this country. I do not hesitate to say we are creating commissions and giving good places to others to do work that Congress ought itself to perform.

Mr. President, just a word. I thought our army and our naval appropriations had grown larger than any other appropriations, but I find that I am mistaken. I was observing the statement in the Statistical Abstract a while ago. For instance, we will take the sundry civil expenses of the Government. In the year 1900, nine years ago, that bill carried only $39,381,237.86. That bill this year carries $139,000,000, an increase in the period of nine years of $100,000,000 per year. We are becoming, we have become, the most expensive government in the world.

I notice again that the per capita expenses of our Government in 1898 for our navy were 40 cents per annum; the expenses in 1910, $1.72. Our army expenses in 1898 were 32 cents per capita; in 1910, $1.30 per capita. The sundry civil expenses of the Government in the year 1900, nine years ago, were 52 cents per capita; $1.70 per capita this year. I stand here and say that, notwithstanding the fact that the leaders on both sides of the House have said that a deficit stares us in the face and a bond issue must come in the next twelve months, this Congress has spent more money by between thirty and forty million dollars than the last Congress expended. It is impossible to give the exact figures, because many of the appropriation bills are in conference.

Mr. President, we have had a surplus for the last three or four or five or six or seven years, and experience has demonstrated that a surplus is a dangerous thing. When three or four hundred million dollars are lying in the Treasury Congress becomes reckless, absolutely reckless, in expending public money. The time is coming when there will be a bond issue, and the American people will call Congress to account for the reckless way in which we have expended the public money.

Mr. President, I want to call your attention to another fact. I have been a Member of the Senate for twelve years. There has not been during that period of time an investigation of the expenditures of a single department of the Government with a view of reducing expenditures. I lay down the proposition that Congress ought to remain in session some specified time, four or five months, purely for the purpose of examining the appropriations and seeing what expenditures can be decreased, with a view and purpose of administering this Government more economically.

The Secretary of the Treasury says:

There have been, under many administrations—

Not under one—

There have been, under many administrations, excessive expenditures, due to one cause or another. The time may come when a session of the Congress will be given over largely to the consideration of ways and means to reduce the operating expenses of the Government, and if it does come, and patriotic and discriminating judgment is brought to bear on the problem, we shall see a saving of many millions of dollars with no sacrifice of efficiency of administration. Few domestic reforms would do so much to set the people an example of good business and economical government.

The Secretary of the Treasury tells Congress three times in his annual report that many administrations have been reckless in the expenditure of public money, and that Congress ought to convene and devise ways and means for reducing the expenses of our Government.

At this late hour, it strikes me we ought not to attempt to pass a bill that creates a new department, with a head drawing a salary of $6,000 a year, and many other employees, who will probably increase into thousands and maybe to a hundred thousand.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. CLAY. Certainly.

Mr. GALLINGER. The Senator, I suppose, in reading the bill, has noticed that there are to be such clerks, agents, experts, and other employees as may be necessary.

Mr. CLAY. The Senator is correct.

Mr. GALLINGER. There is no restriction upon it.

Mr. CLAY. No restriction whatever. You take the Agricultural Department, and your appropriations in nine years have

grown from three million to thirteen million dollars. I am not attributing the fault to any particular Senator or any particular party, but I maintain that if a business man or any corporation in carrying on a large business was as reckless and inconsiderate of expenditures as we have been, failure would always follow in carrying on such business.

Mr. WARREN. Will the Senator from Georgia allow me a question?

Mr. CLAY. With pleasure.

Mr. WARREN. A few moments ago, if I heard the Senator correctly, I think he stated that we had expended $30,000,000 in this Congress more than in the Congress before.

Mr. CLAY. I did not.

Mr. WARREN. What did the Senator say?

Mr. CLAY. I am now having a statement made up by the clerk of the Committee on Appropriations, with a view to finding out exactly how much more we have spent this year than last year. I said I would not be surprised to hear that we had spent thirty or forty million dollars more than we did in the last Congress.

Mr. WARREN. You do not mean the last session? You mean the last Congress.

Mr. CLAY. Yes; last session.

Mr. WARREN. If the Senator will allow me, does he think $30,000,000 increase in two years' growth of this country is extravagant? Does he think with the growth we have had that $30,000,000 more expenditures in that time is extravagant? It is only a little over 1 per cent per annum, while the wealth of the country has increased many, many times as fast as that.

Mr. CLAY. We spent a hundred million dollars last Congress more than we ought to have spent.

Mr. WARREN. Comparatively speaking, is $30,000,000 increase per year, on over a billion dollars per year of expenditure, anywhere near the percentage that the growth of the country would naturally call for?

Mr. CLAY. We ought not to have reached a billion dollars, especially at this early day.

The American people ten years ago complained bitterly of Congress for spending $500,000,000 a year. If I remember correctly, in 1898—in fact, I have the figures before me—we spent only $23,129,344.30 for the army, and the army bill this year carries, if I am correctly informed, about $102,000,000.

Mr. WARREN. There was a time when we had practically no army, and I remember a time when we did not spend half as much as we spend now, and we then ran behind, nevertheless, and had to bond this Nation to pay even the ordinary running expenses; and it was not the Republican party that was running the Nation then.

Mr. CLAY. I do not wish to discuss party politics. I am dealing in facts. I am referring to the fact that the appropriations ought to be scanned closely and that not a single dollar ought to be appropriated unless needed for the purposes of carrying on the public business.

Mr. WARREN. I agree with the Senator there; but I ask him to reflect. I want his opinion. Does he think an increase in two years of $30,000,000, where we are appropriating over a billion dollars per year, is a large percentage of increase? I want to know if a proper increase of expenses in this connection would not amount to many times $30,000,000, unless we are cutting down the proportion of our expenses as compared with our present actual receipts?

Mr. CLAY. In the way we are going, and the way we have traveled, probably the increased expenses this year are in keeping with the way we have traveled each year for the last seven or eight years, but I want to call the Senator's attention to the fact—and I am amazed when I read it—that your sundry civil bill nine years ago carried only $39,000,000, when that bill, during this session of Congress, will carry nearly $139,000,000.

Mr. WARREN. Will the Senator permit me another interruption there? The Senator should state that the present bill is largely made up of Panama Canal expenditures and expenditures for improvements on rivers and harbors under continuing contracts, a system that commenced only a few years ago. Instead of carrying large amounts in the river and harbor bill, the amounts of the limit and the contract are carried in that bill now, and then year after year the appropriation of money to foot the expenses is carried in the sundry civil bill.

I agree with the Senator that it is appalling when we contemplate the size of the sundry civil bill, until we analyze it; and when we analyze and see what the expenses are for—several million dollars for continuing constructions of public buildings which had been authorized in other bills; millions more to continue our river and harbor improvements; again millions more to construct the great canal, the largest work ever undertaken in the world by any nation, and acknowledged to be such—then that bill does not seem so very large.

Mr. CLAY. This is not the first year an item for the Panama Canal has been inserted in the sundry civil bill. If I remember correctly, we are not appropriating more than thirty or forty million dollars for the Panama Canal this year. I think I am correct. We have been appropriating in the sundry civil bill for several years items for the Panama Canal; but I want to call the Senator's attention to the fact that during this year we passed no river and harbor bill.

Mr. WARREN. But a large proportion of the present bill is made up——

Mr. CLAY. I understand.

Mr. WARREN (continuing). Of items made necessary because of projects contracted for heretofore.

Mr. CLAY. The Senator is clearly mistaken if he thinks I do not understand that.

Mr. WARREN. I know the Senator understands it; but I want the Senate and the country to know it, and I want the RECORD to show it.

Mr. CLAY. The RECORD can show it, and I have no objection to the RECORD showing it; but I want to say this to the Senator: We had $300,000,000 of surplus two years ago, and the Senator will concede that in less than a year every single dollar of that surplus will be wiped out. We have not spent our surplus to construct the canal; we are selling bonds to build the canal.

Mr. WARREN. No; I will not admit that, but I will admit if it should go on at the rate that it is going on now the Senator would probably be right. But this country knows, and the Senator must know, that on the eve of a readjustment of our tariff every importer and merchant expecting to import is waiting before making his purchases to see if he can not get some advantage under the revised tariff, and therefore our income upon imports are almost nil, and will be so until the tariff bill is at least reported from the House, and probably so to a great extent until it shall have passed. About the bonds: For Panama Canal, we had spent prior to January 1, 1909, $171,000,000, and had only bonded for $80,000,000, thus leaving over $90,000,000 which we have taken from the revenues for Panama Canal.

Mr. CLAY. It is improbable that our revenues this year, as we expect to revise the tariff this year, will be anywhere in the neighborhood of as much as they have been heretofore. The Treasury Department, I am sure, does not expect the revenues to be equal to our appropriations. They estimate $143,000,000 more expenditures than receipts.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Oregon?

Mr. CLAY. Certainly.

Mr. FULTON. The Senator from Georgia is a candid man, a frank man, and I do not mean to criticise him; but I do mean to say it is easy for us to talk about the increase of expenditures and the extravagance of Congress. But I submit to the Senator——

Mr. CLAY. I will yield for a question, but not for a speech.

Mr. FULTON. I submit to the Senator it would be better to point out particular items that could be stricken from appropriation bills.

Mr. CLAY. It has been done on the floor time and again.

Mr. FULTON. I know there is a great divergence of opinion as to whether or not the navy should be increased. That is a question of policy. But wherein, in what particular, does this extravagance consist, in the Senator's opinion?

Mr. CLAY. I will point out an item to the Senator right now.

Mr. FULTON. Let us see it.

Mr. CLAY. The bill which we have before us for our consideration.

Mr. FULTON. Oh, yes; but the Senator was talking about what the Congress has done.

Mr. SCOTT. Mr. President——

The VICE-PRESIDENT Does the Senator from Georgia yield to the Senator from West Virginia?

Mr. CLAY. With pleasure.

Mr. SCOTT. The Senator has spoken of the bill before us. He talks in common with a man who told his wife they must economize, and he was going to commence on her. I am very sorry that the Senator from Georgia is practicing, or trying to practice, economy on the poor miner and his widow—people who are blown up in the mines; killed by the hundreds. He stands here preaching economy against a bill to protect those poor people. I am surprised, Mr. President, as broad minded as I thought the Senator from Georgia was, that he should take the position he does on this bill. Why not spend some money to

protect the lives of the poor miners, who spend the greater portion of their lives underground, and economize in some other direction?

Mr. President, this bill should be passed; in the name of its humanity it should be passed, regardless of what it costs.

Mr. CLAY. All this bill does is to create a new bureau, provide for a head, and give that head the power to select just such employees as he may wish to select. The Interior Department to-day has the power to investigate the mines of this country, and we appropriated at the last session of Congress $270,000 to send experts for the purpose of making these investigations. The great trouble with us is we have one department working on a certain line, securing certain information, and then you create a new department to do exactly the same work.

Mr. President, the Senator from Oregon talks about items. I stood here in my place as a member of the Committee on Appropriations and I saw placed on an appropriation bill $460,000 of private claims simply by amendments being offered on the floor of the Senate, when five-sixths of them had been rejected by the Committee on Appropriations. Mr. President, those items came from both sides of this Chamber.

Mr. FULTON. To what bill does the Senator refer?

Mr. CLAY. An appropriation bill. I have forgotten the particular appropriation bill. I took the items as they were offered. Appropriation bills were intended to carry out existing law, and one of the reasons why our appropriations have increased is that we have reached the point where we not only insert items to carry out existing law, but we put on hundreds of items that do not refer to existing law, but are claims which ought to be referred to the Committee on Claims and passed upon there and sent to the Senate for its action.

So I believe it to be the duty of the Senate to strike from every one of these bills all items except items which carry out existing law, unless there is some emergency demanding an appropriation.

Mr. WARREN. Will the Senator allow me to ask him a question?

Mr. CLAY. Certainly.

Mr. WARREN. I agree with the Senator that claims ought not to go on appropriation bills, but I ask him whether the money of this Government should not be used to pay just claims against it?

Mr. CLAY. Every just claim that the Government owes ought to be paid.

Mr. WARREN. Just so.

Mr. CLAY. But let me call the Senator's attention to another fact—and I am talking just as I feel about it. We have 80,000,000 people in the United States. The real wealth producers of this country are our farmers, our miners, and our stock raisers. The farmers and the stock raisers and the miners produce the real wealth of this country.

Mr. WARREN. They do.

Mr. CLAY. That is correct. The Senator does not deny it.

Mr. WARREN. They do.

Mr. CLAY. I call attention to the fact that we are spending for the navy $137,000,000 a year. We have gone far enough.

Mr. WARREN. The Senator understands that a large portion of that is for new construction, and not for the annual expense of running the navy.

Mr. CLAY. I understand that thoroughly. I know that we provided for two of the largest battle ships in the world at this session of Congress.

Mr. CLAPP. Now we have to dig some harbors to enable them to get in.

Mr. CLAY. I will yield to the Senator from Minnesota.

Mr. WARREN. Mr. President——

Mr. CLAY. Let me get through with this sentence. We know that those who are engaged in peaceful pursuits, those who are cultivating our fields, working our mines, producing live stock, are likely to have more burdens placed upon them than they can bear.

Take your army, $102,000,000; take the navy, $137,000,000 or $138,000,000, I believe it is. Now take the pensions, $160,000,000. Have we not arrived at that point in the history of Congress when we must cease to add any other items to our navy except to maintain it and keep it as it is?

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Wyoming?

Mr. CLAY. Yes.

Mr. WARREN. I do not wish to interrupt the flow of the Senator's remarks, except that I do not want him to get too far away from the farmers and the stock raisers of this country; to forget the conditions of to-day, under these great expenditures, and their condition at an earlier date, when our total expenses were very much less.

I remember, and so does the Senator, a few years ago—in the early nineties—our appropriations were a half and some of them less than a quarter of what they are now; and yet the very farmers and the stock raisers of whom the Senator speaks were, as a class, eaten up with the interest on their mortgages. This was true of almost all the farmers in the country, where now they are as prosperous a set of people as there is in the world. They have a smaller percentage of mortgages on their property than any other class of business. They are not only contented and happy and prosperous, but proverbially so, notwithstanding and despite these great expenses.

I remember when the post-office appropriation bill was less than $50,000,000, and now it is over $230,000,000. A large portion of this larger sum is for taking to those same farmers their letters and mail matter and the publications of to-day and depositing them at their very gates and doors, as if they lived in the city; letters and newspapers that conduce to their pleasure and happiness, and in turn to promote their industry and enterprise, and to the productions of this country, because the productions of the farmer and the productions of the miner add just that much to the wealth of the country.

Mr. CLAY. That is the most remarkable argument I have ever heard in the Senate.

Mr. WARREN. I am exceedingly glad that it is remarkable, and it is true, nevertheless.

Mr. CLAY. Now, what is the argument? The Senator suggests to the Senate and country that ten years ago our appropriations were small, that only a small amount was appropriated for the army, only a small amount for the navy, and then the country was depressed. The Senator says that now the appropriations have grown to $1,000,000,000, and by reason of these increased expenditures the farmers and mechanics and miners are growing rich. If that be true, would it not be well to increase our expenditures to $5,000,000,000 instead of one billion? Is it possible exorbitant taxation is a blessing?

Mr. WARREN. Yes; to ten times that if this country grows fast enough and large enough. Let me say this——

Mr. CLAY. I am not through.

Mr. WARREN. The Senator misstates me. I did not——

Mr. CLAY. I want to complete my remarks.

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Wyoming?

Mr. WARREN. Before the Senator gets away from that point I want to say that I did not say it was the cause, but I said in spite of that they were happier and richer.

Mr. CLAY. The Senator laid down the proposition that large expenditures——

The VICE-PRESIDENT. The Senator from Georgia will suspend. The Chair must call the attention of Senators to the fact that they must address the Chair before taking the floor. The Chair will insist upon this rule. The Senator from Georgia will proceed.

Mr. CLAY. Mr. President, this is a new doctrine to me, that the Government of the United States must double, and treble, and quadruple its expenditures in order to give prosperity to the American miner, the American planter, and the American stock raiser; that you must take the stock raiser and double his taxes, and double the miner's taxes, and double all the expenditures of the Government in order to bring about prosperity to this country.

Mr. President, if the doctrine be true that you must create commissions, and new bureaus, and double your expenditures, to help the farmer, and the mechanic, and the stock raiser, it is the most peculiar position I have ever heard taken anywhere.

Mr. WARREN. May I ask, does not the Senator from Georgia know that the farmers and the stock raisers are more prosperous now, and more happy now, than they were in the early nineties, according to the Senator's statement?

Mr. CLAY. There have been several years of prosperity. We have had magnificent crops; we have had splendid wheat crops and corn crops and cotton crops. We have had good seasons, and the people have prospered in spite of the extravagance of Congress.

Mr. WARREN. May I ask another question?

Mr. CLAY. In one moment. Let me get through. The seasons have been good, and in spite of Congress and its extravagance, the country has prospered.

Mr. WARREN. That is what I said.

Mr. CLAY. Then you and I have agreed.

Mr. WARREN. When the farmer has a mortgage on all he owns, a small tax is a burden. When that farmer has received

the large returns, which the Senator describes, from his crops, and becomes wealthy, the number of dollars that would have been a burden once becomes as nothing. The percentage of taxation is smaller now than it was then.

Mr. CLAY. I doubt if in the history of this country we have had a harder year financially than the year 1908, and I predict that the year 1909 will be equally as hard, from a financial standpoint.

Mr. WARREN. We were speaking of farmers and stock growers. I should like to have the Senator state, if he will, whether he considers that the year 1908 was a harder year than usual for the farmers and stock raisers.

Mr. CLAY. I believe that the year 1908 in my State was the hardest year financially we have had in fifteen or twenty years.

Mr. WARREN. I sympathize with the Senator as to his State, but I think he will admit that that is not true of the United States as a whole.

Mr. CLAY. Last year was a remarkable year. But, Mr. President, I did not rise for the purpose of discussing those questions. I wanted Congress to call a halt in our expenditures. I do not believe the bill of the Senator from Ohio ought to pass. We ought not to create any more commissions or more new departments at this time. In my judgment, we have ample departments needed to do the business of the country. We have the Interior Department and the Department of Commerce and Labor. It has been only a few years since the Department of Commerce and Labor was created.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Oregon?

Mr. CLAY. Certainly.

Mr. FULTON. If the Senator will yield to me for a moment, I ask him to permit me to call up a resolution for the purpose of adding some additional southern claims. I wish to ask unanimous consent at this time to call up the resolution known as the "omnibus claims resolution," referring certain matters to the Court of Claims, in order that I may move to reconsider the vote by which it was adopted.

Mr. CLAY. If they are honest claims and just claims against the Government, I will be glad to see them paid.

Mr. FULTON. They are southern claims.

Mr. CLAY. The fact that they come from the South is no reason why they ought to be paid, unless they are just.

Mr. FULTON. They would not come from the South, of course, unless they were just.

I believe that when claims from the South and every other State in the Union come to Congress they ought to be carefully investigated, and we ought to be sure that they are right. We ought not to ask their payment unless they are a just charge against the Government. That is the reason why I propose to send them to the Court of Claims. It is to ascertain whether or not they are just claims.

Mr. CLAY. I beg pardon of the Senate. I did not intend to address the Senate for more than five or six minutes when I began. I simply wanted to call attention to the fact how year by year our expenditures had grown——

Mr. FULTON. Will the Senator yield to me?

Mr. CLAY. I am going to yield the floor in a minute. Year by year we have been increasing our expenditures, and I am sure I heard the acting chairman of the Committee on Appropriations on this floor say that our expenditures have grown very rapidly and that there is a dangerous condition confronting Congress in regard to our finances. I have heard him make that statement time and again, and I do not believe that any Senator will dispute it.

Mr. TELLER obtained the floor.

Mr. FULTON. Will the Senator from Colorado yield to me?

Mr. TELLER. I will yield to the Senator from Oregon.

REFERENCE OF CLAIMS TO COURT OF CLAIMS.

Mr. FULTON. I move that the vote by which the omnibus claims resolution (S. Res. 320), referring claims to the Court of Claims, was adopted be reconsidered.

Mr. STONE. For what reason does the Senator wish to reconsider the resolution?

Mr. FULTON. Simply because some claims that should have gone in were by mistake omitted. I wish to offer an amendment in order that they may be included.

The VICE-PRESIDENT. The Senator from Oregon moves to reconsider the vote by which the resolution was agreed to.

The motion was agreed to.

Mr. FULTON. I offer the following amendment to the resolution.

The VICE-PRESIDENT. The amendment will be read.

The SECRETARY. Immediately preceding the concluding paragraph of the resolution it is proposed to insert the following:

Heirs of Solomon Dowden (S. 8293); the estate of William Y. Dulin, deceased (S. 2169); the heirs of Thomas Miller, deceased (S. 9428); James F. Carr (S. 9541); the estates of Thomas A. Elliott and Adaline Elliott, deceased (S. 9516); the estate of John H. Birdsong (S. 9176); heirs of legal representatives of the estate of James T. McKissack (S. 5676 and 5677); the estate of B. F. Larkin, deceased (S. 4766).

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The resolution as amended was agreed to.

BUREAU OF MINES.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 20883) to establish in the Department of the Interior a bureau of mines.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Montana?

Mr. TELLER. I do.

Mr. CARTER. Mr. President, I rise for the purpose of asking some questions with reference to this bill, which I hope the Senator in charge will be prepared to answer.

The first section of the bill is inconsequential, except as a draft upon the Treasury. It provides that an officer shall be appointed at a salary of $6,000 per year, and that certain other officers, indefinite in number, to be known as "clerks, agents, experts, and employees," shall be appointed at compensation unnamed. I desire, first, to inquire of the Senator in charge of the bill the probable expense to be incurred in pursuance of the authority given in section 1, the number of clerks, agents, experts, and employees being undetermined.

The second section of the bill provides that it shall be the duty of the bureau, presided over by the $6,000 chief, and the unknown number of agents, experts, and employees "to foster, promote, and develop the mining industries of the United States." I desire to inquire how the chief of the bureau and his agents, experts, and employees are expected to foster, promote, and develop the mining industries of the United States? Are they to do this by engaging in the work of sinking shafts, running levels, building works, and reducing ores; and if so, where, and on whose property?

The latter part of the second section contains certain specific directions with reference to investigations. This chief, the agents, the experts, and the employees are to ascertain something with reference to the safety of miners and the possible improvement of the condition of miners. That is the sum and substance of the first two sections of the bill.

The third section provides that the bureau shall be provided with offices, and the offices shall be provided with furniture, clerks, stenographers, and typewriters to the extent that may be necessary.

The fourth section provides that an existing line of work attended to at present by the Geological Survey shall be transferred to this bureau.

The bill consists, as I see it, of four sections. The first merely provides employment for a chief at $6,000 per year and for an indefinite number of employees. The second section provides that these persons thus employed shall foster, promote, and develop the mining industries of the United States, but does not specify how. The third section, as I have said, provides merely for office rooms, furniture, stenographers, and typewriters and, finally, the transfer of some work that is now being done in another bureau.

I desire the Senator in charge of the bill to explain to the Senate where this mining promotion is to occur. How are the mines of the United States to be developed by this corps of clerks?

And that leads me to request the Senator to further explain what right the United States Government has to enter into any State of this Union through its agents, clerks, stenographers, and employees to engage in mining.

The Federal Government has certain well-defined general jurisdiction over the District of Columbia. This District, less than 10 miles square, is within the exclusive jurisdiction of Congress. We make the laws; we provide for the administration of government. There is no other legislative power than the Federal Government for this District.

As to the Territories, we likewise have final and absolute legislative jurisdiction. The Territories consist of Arizona, New Mexico, and Alaska on the mainland. We have the Territory of Hawaii and a certain specified jurisdiction over Porto Rico. Our jurisdiction in the Philippine Islands is a qualified jurisdiction.

We may prescribe rules and regulations for the promotion of the mining industry in the District or in the Territories of

Arizona, New Mexico, Alaska, or the Hawaiian Islands, and possibly in Porto Rico, but we can not invade the Philippine Islands with an unrestrained hand.

I inquire of the Senator what right the Government of the United States has to enter the State of Ohio, the State of Pennsylvania, the State of Montana, or Colorado to engage in mining, mine inspection, or mine promotion? We have in the respective States certain laws relating to the inspection of mines. Does the Senator propose to have federal inspectors enter our States side by side with the state mine inspectors? The federal inspectors of mines might prescribe one rule with reference to the safety of mines, whereas the state law might prescribe another rule with reference to safety. What rule would prevail? How could the operator of a mine in the State of Ohio determine when he was within the law if the federal law provides one rule of action and the state law another rule of action with reference to the timbering and ventilation and mining appliances in a coal mine? How could the mining operator in the State of Montana, working a gold mine or a copper mine, determine when he was within his right and complying with the law should the law of the United States provide that an inspector appointed by the President or by the bureau of mines should insist upon a rule fixed by Congress, whereas the state law provided for another rule of action entirely?

I think it is due the Senate that the Senator in charge of this bill should clearly and distinctly state to us the right, as he understands it, under our system of government, for a federal officer to enter a State to prescribe the method of conducting a mining operation in that State.

If we have general and complete jurisdiction of the Territories let us legislate for the Territories if the territorial legislators have failed in their duty.

We have now on the statute books—and I think some twenty years ago it was my privilege to aid in placing upon the statute books of the United States—a law providing for the inspection of coal mines in the Territories. We may now provide, I think, for the inspection of quartz mines, in general mining operations, but I can not conceive how we can provide mine inspectors of the Federal Government to enter the respective States for the purpose of prescribing the method of mining or the conduct of those engaged in mining. If safety is not the purpose of the bill, then in that behalf the bill has no purpose at all as to the States. If mining promotion is the purpose of the bill, if the fostering of mining is its purpose, then it is due the Senate that the Senator in charge of the bill should explain how these clerks and stenographers and typewriters are going to foster and promote mining in the United States.

Mr. TELLER. Mr. President, the Senator from West Virginia [Mr. SCOTT] makes an appeal with reference to this bill that it is in the interest of humanity. I appreciate the fact that there have been a great many disasters in the coal mines of the country, and if this were addressed simply to the examination of coal mines there might be some excuse for it. But the bill is broad enough to take in all the mines of the country—mines of precious metals and of coal also.

We have been making appropriations for several years for the examination of the coal mines of the country where the disasters occurred, and we have left that to a certain bureau of the Interior Department. I have not heard any complaint but what they were doing that work in a proper manner, and I know of no reason why we should now establish another bureau, and at a great expense, as would certainly be the case.

Mr. President, this bureau will not only investigate and attempt to develop the coal mines of the country, but it will attempt to develop the silver and gold mines of the country.

In the first place, there is not any need of this new bureau. We have a bureau that is doing this work. It is only a part of the work that the bureau does. Congress is making every year in every proper appropriation bill some provision for the examination of these mines. I think I will suspend for a few minutes.

Mr. CLAPP. If the Senator will grant me permission, I should like to talk for a few minutes, and I think I can talk in spite of the noise.

Mr. TELLER. The Senator is a good deal younger than I am, and he has a better voice. I will yield to him for the time being, keeping the floor.

Mr. CLAPP. Mr. President, I want to say that while the appeal of the Senator from West Virginia is an appeal to sympathy and to our sense of humanity, I do not think that it has any place in the discussion of the pending bill.

Last year we voted two hundred and odd thousand dollars to investigate the cause of accidents in mining; and while I stood here at this session and protested against the wild delirium of extravagance that has seized the country and seized Congress, I would vote millions, if necessary, if it would effectuate a reform in the management of mines, where the miners have to toil under the ground that they may supply fuel for those who are above ground.

I do not propose to have that suggestion made here as a suggestion that will deter me at least from voting against the bill.

If the investigation which was made under that appropriation has revealed any condition where federal legislation can remedy the condition of the miner, then in turn I am ready to support that kind of legislation.

But, Mr. President, the bill is simply designed to establish another bureau for the government of this country and the government of Congress. Sooner or later Congress has got to take the stand that Congress will determine first and for all time in a session what the appropriations shall be.

I was opposed to the resolution of the Senator from Texas [Mr. BAILEY] this afternoon, because, with all due deference to the Senator from Texas, it seemed to me that that resolution was a mere sputter in the clouds; that there was nothing practical in it. But there is one practical way of dealing with the departments of the Government, and that is, instead of allowing the departments to say how much money we shall appropriate, regardless of the condition of the Treasury, regardless of the prospect of revenues, to let Congress inaugurate the reform and say how much money shall be appropriated.

Mr. President, I listened to a statement this morning of the comparison between the estimates and appropriations, as though that justified Congress in its extravagance. The Secretaries will bring in their estimates, and then because we appropriate less than the estimates, forsooth, we are practicing economy. That is no evidence of economy whatever.

Nor is it any evidence of economy to say that in the Fifty-ninth Congress we appropriated a billion dollars, and that $20,000,000 now is no serious addition. The evil lay in appropriating a billion dollars in the Fifty-ninth Congress.

Mr. President, I want to say that, while the country will applaud this extravagance, while the galleries may applaud extravagance, when we reach the point—I say this to my party associates—where we shall have to impose a tax upon the tea and the coffee of the people, the very people who have applauded and who have driven Congress to this extravagance, will be the first to turn upon and hold accountable the party which has permitted this extravagance. We can not excuse this extravagance on the ground that the country demands it. We can not excuse it upon any ground except our own failure to meet this responsibility. The responsibility rests upon us as a Congress.

Mr. President, there is no use of saying that next year or the year after we shall begin to economize. The time to begin to economize is now. We can not undo what has been done, but we can at least produce a remedy to the extent of stopping now any extravagant appropriations from passing even in these late hours of the session.

As I said before, I am ready to vote millions in response to a suggestion from the Senator from West Virginia [Mr. SCOTT] if it will protect the poor miners, the men who have to toil amid danger and in the darkness of the earth; but when it comes to creating a bureau here, with the head of that bureau having a salary of $6,000 a year, and not a suggestion that can be drawn from this bill that this proposed bureau can protect a single miner, I submit the argument for its establishment is farfetched.

Mr. TELLER. Mr. President, if you will take this bill and study it, you will see that it does not attempt to do anything except what is being done by an existing bureau, a bureau that has been in operation for many years. There has been, I know, considerable interest in this matter in the country, not in the mining section, but outside of it. Perhaps there is, however, considerable interest in the coal-mining region.

The Senator from Minnesota [Mr. CLAPP] states what is a fact, that nobody will deny, that while we have spent several hundred thousands of dollars in investigating the causes of loss of life in coal mines, we have as yet got from nobody who has examined the question anything that is of any value in saving lives. Recently there was a great disaster in a coal mine in the State of Pennsylvania. There perhaps never had been in the history of the world a coal mine operated with so much care, with so much attention, and so much interest in the welfare of the operatives as in that mine; not only for their safety in the mine, but for their safety out of the mine.

Large sums of money had been expended for that purpose, yet in a moment there came a disaster which was overwhelming. There was a large loss of life. I do not suppose that anybody has yet been able to find out exactly how that occurred without the cause being discovered in time to prevent the disaster. From what I can learn, it was caused by an explosion of gas.

The mine had never had any gas in it, and that is the case in many mines in this country. The mine was well ventilated, and everything had been done that could have been done if it had been a gas mine; but it blew up. Disasters in coal mining are inevitable and can not be prevented. They may be in a large degree, perhaps, mitigated, but they can never be wholly prevented.

My objection to this bill is twofold: First, that it will be a great waste of money, an expenditure without return, and that it will be an absolute interference with the mining operations of this country, particularly with the mining of precious metals.

There is no considerable difficulty in mining for gold or silver or copper in this country, and very little difficulty in mining for iron and coal. The mining industry is the one that has most difficulties to contend with. I represent here a State in part which is engaged in the production of the precious metals. We have been mining there since 1859 and we have, as have some adjoining States engaged in the same business, the most experienced and capable mining men of the world. There is not in any section of the world men engaged in that industry who know any more about it than the miners of Colorado, Montana, Idaho, California, and Utah. We do not need the fostering hand of the Government. We do not need any man to come from Washington out there to tell us how to develop our mines or, in the words of the bill, how to "promote and develop the mining industries of the United States, to make diligent investigation of the method of mining, the safety of miners," and so forth. Everybody who has lived in a mining country knows how to do that. If they did not know, my experience is that they could not get any relief from a bureau established here in Washington.

Mr. NEWLANDS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Nevada?

Mr. TELLER. I do.

Mr. NEWLANDS. I wish to inquire of the Senator from Colorado why it is that the western communities in all their meetings regarding the mines have demanded either a bureau of mines or a department of mines? I have received a great many communications from officers of such conventions, and the sentiment would seem to be almost unanimus.

Mr. TELLER. I will venture to say that the Senator has never received a single call either from a practical miner or from an operator of mines; never. He has received such communications from some gentlemen who use their spare time to attend conventions, where they go to tell us how to mine or how to do something else. That is the class of men, and that is the only class, from whom the Senator ever received such communications. I have had some communications myself. I have had them from professional men——

Mr. NEWLANDS. I beg to differ with the Senator in that particular. I have in mind now urgent letters, which I have received repeatedly during the past four or five years, from a mining man who has mined extensively in almost all of the Western States and also in Alaska. His letters would seem to indicate that he represents the sentiment of others who are similarly engaged. I am also in receipt of numerous letters and resolutions from the West on this subject; and I have never yet, to my knowledge, received any communication in opposition to the organization of a bureau of mines.

I am prepared to admit, with the Senator, that the operation of such a bureau would be comparatively limited; that it would be largely confined possibly to matters of education, as is the Agricultural Department, and, possibly, as is the Bureau of Manufactures. Of course, we all realize that the Constitution does not give jurisdiction over manufactures or agriculture as such, and yet we have organized a Bureau of Manufactures and a Department of Agriculture.

I will be very brief. I simply wish to point my statement——

Mr. TELLER. There is plenty of time.

Mr. NEWLANDS. I do not wish to unduly interrupt the Senator. I wish simply to point my statement by saying that I have received hundreds and hundreds of communications upon this subject, and I have never yet received from a single western man any protest against the organization of a bureau of mines.

Mr. ALDRICH. Mr. President, it is impossible for us on this side of the Chamber to hear the Senator from Nevada. Is he advocating the appointment of another commission? Do I understand him to be doing that?

Mr. NEWLANDS. I am not advocating anything. I am making an inquiry of the Senator from Colorado [Mr. TELLER]. I ask him how he can account for this western sentiment——

Mr. TELLER. Which I deny.

Mr. NEWLANDS. Which seems to be expressed by meetings of miners and associations of miners and by numerous communications from western men urging the creation of a bureau of mines.

So far as a commission is concerned, I may say to the Senator from Rhode Island that I believe always in the organization of experts in every government work, and that it is immaterial whether we call such an organization a bureau or a committee or a commission. I am for the substantial thing. I do not think by the brand, as a great many men do, and I do not invent phrases that are intended simply to arouse popular prejudice. I am aware that the phrase "government by commission" has been invented for the purpose of creating prejudice against great and beneficial movements; but as I do not think by the brand, as a great many people do, and look only to the substance of a thing and not the form or the name which it assumes, I simply say that I am, in every government construction work, in favor of the employment of the highest talent, whether it be in engineering or in art or in construction; and that when I propose that the Government shall utilize the highest talent in the way of advice, I suggest that it is immaterial whether the organization called into being shall be called a "commission," a "bureau," or a "committee."

Mr. ALDRICH. Will the Senator permit me to make a suggestion?

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from Rhode Island?

Mr. NEWLANDS. I do.

Mr. ALDRICH. If the Senator will permit me to make a suggestion, I will say that from the speeches I have been hearing in the last two or three hours I think we are inaugurating an era of economy; and I would suggest, if the Senator be willing, that we put on this mining bureau as an incident to the waterways commission, which I understand has already been more or less established. Would there be any objection on the part of the Senator to that?

Mr. NEWLANDS. I will state to the Senator from Rhode Island that I will accept a bureau of mines in whatever form it comes. If it comes as an amendment to the waterways commission bill, I should feel that the Senate and the Congress had simply accomplished a doubly beneficial purpose.

I believe in expert talent. I believe in its employment in every branch of the Government. I do not assume that I, as a Senator, know everything; I do not assume that the Senate knows everything; I do not assume that the Congress of the United States knows everything. I believe that there are certain lines of specialized effort and that it is a wise thing upon the part of Congress in its legislation to call upon men who have become distinguished in specialized effort to give us their aid in the practical work of the construction of the country.

I do not stand for phrases. I am willing to accept a good thing under any name. If the Senator from Rhode Island will invent some other name than that of "commission," or some other name than that of "a board," I will be glad to accept it, if he only gives me the substance hoped for.

Mr. ALDRICH. Perhaps I was not so clear as I should have been in my suggestion to the Senator from Nevada. I thought that if the waterways commission were willing to undertake this work—it requires no legislation, as I understand, to give these various commissions any power—perhaps they would save us the trouble of establishing this bureau.

Mr. BAILEY. I suggest that the President might appoint one. He does so without any authority whenever he chooses; and the Senator from Nevada and the Senator from Rhode Island can have it fixed up in that way, and Congress will, no doubt, pay the expense.

Mr. NEWLANDS. Mr. President, regarding the suggestion of the Senator from Texas, I have to say that there are two kinds of commissions.

Mr. TELLER. Not more than two?

Mr. NEWLANDS. One is a commission which the President calls into being simply for the purpose of aiding him in the power conferred upon him by the Constitution of making recommendations to Congress. Such a commission has no draft whatever upon the Treasury; it has no sanction of law; but it has the right to advise the President of the United States; and I stand by the President in every action he has taken where he has sought to advise with the experts of the country in any line of specialized effort, with a view to enlightening him so that he could make the proper recommendations to Congress. I think it would be well if Congress itself would take a lesson from the President in this direction.

There is another kind of commission, and that is a commission organized under the law—the only kind of a commission

that can be paid from the Federal Treasury, and then only to the extent authorized by law. Such a commission should be composed of experts and utilized by Congress to aid it in its great work. I do not feel that in providing for the appointment of such commissions Congress is abdicating its functions. On the contrary, I insist that it is discharging its functions with the highest intelligence.

Mr. TELLER. Of these interruptions I do not complain. I am one of those who believe in the freedom of speech. I think it one of the greatest glories of this body that every Senator can speak when he wants to on any subject and can not be called to account for it anywhere outside of this body; which is very fortunate, I think, for some of us sometimes. [Laughter.] The Senator from Nevada [Mr. NEWLANDS] speaks of meetings of miners. I think I know as much about the mining camps as any man in the country, because I lived for fifteen years in a mining camp, and during the remainder of nearly fifty years I have spent in Colorado I have lived in the vicinity of them.

Mr. BAILEY. But, Mr. President, if the Senator from Colorado will permit me——

Mr. TELLER. I will.

Mr. BAILEY. While the Senator may have a longer knowledge, he has not such recent knowledge, because the Senator from Nevada has evidently just come from a mining camp. [Laughter.]

Mr. TELLER. Mr. President, I certainly do not know of any miners who want this bill, but I do know of a good many miners who do not want it. While I am not a miner myself, I have some knowledge of mining and the character of work it requires. I have seen a good many mines in my day, and I know there is nothing the Government can do to promote and develop the mines except by some statute. You may do it in that way, but you can not do it by any bureau.

We have the forest reserves. The forest-reserve people have taken in practically all of the mining lands in the State of Colorado. I state here what I know to be a fact when I say that there are thousands and tens of thousands of acres of lands in Colorado which are mining lands from which the miners have been excluded. They have practically driven out the prospector in that section of the country. We have had experience enough of regulations from Washington concerning our mines and our lands, and we do not want any more. We are quite ready to have the Government take away the class of assistance which they have been furnishing us. If there was a necessity for a bill of this kind or if there was a necessity for a mining bureau, it might be different.

This bill is so carelessly drafted that I do not see how any Senator with proper respect to the finances of the country can vote for it. This bill gives the Secretary of the Interior absolute authority to put in the field just as many people as he wants or as his judgment dictates. The bureau of mines may consist of 100 or 500 men, if he so desires. That is not the way the Senate is in the habit of legislating. If you would provide that he might to a limited extent send out inspectors or experts, or whatever you may call them, there would be some reason, perhaps, why that should be done; that is, in respect to the coal mines, but not in respect to other mines.

I do not give any heed to the people who generally get up these new schemes, and especially when they get up a scheme that has no limit to it and that may be dangerous to the interests I have in mind in the mining regions of this country.

The whole bill is carelessly and heedlessly drafted. The third section provides:

SEC. 3. That the Secretary of the Interior shall provide the said bureau with furnished offices within the city of Washington, with such books, records, stationery, and appliances, and such assistants, clerks, stenographers, typewriters, and other employees as may be necessary for the proper discharge of the duties imposed by this act upon such bureau, fixing the compensation of such clerks and employees within appropriations made for that purpose.

There is authority enough in this bill for the Secretary of the Interior to hire a corps of engineers and send them out into the country. There is enough authority for him to hire laborers, and he might send them out on a prospecting tour, such as a miner goes out on, to hunt the precious metals. I do not know that you would ever get a Secretary that would do such a thing, but, judging by what some Secretaries have done in the past, I do not want to trust them with that authority. I do not believe it is good legislation.

I deny that there is any demand among the miners of this country for this kind of legislation. There may be some people who are disturbed by the great catastrophes that happen in coal mines. Then, why not confine it to coal mines?

We have a law in my State—and I think it would be sustained anywhere in the world—that no man can go into a coal mine without the permission of the owner of the mine. We have in one part of the State mines that are somewhat affected by gas, and no man is allowed to go in to work in such mines without a safety lamp, and no man is allowed to go in unless the superintendent of the mine examines his lamp, so as to see that it is in such condition that he should go in.

That is a proper regulation. Recently there were some government employees connected with the Forestry Service who concluded they wanted to go in one of those mines. The superintendent said to them, "This is the law; you must clothe yourself properly; you must have a safety lamp; you must have my permission; and I will send with you a guide." They said, "We are officers of the United States. We do not have to obey any of these laws. They do not touch us." They did not, I believe, arrest the superintendent, but they threatened him with arrest, and they somewhat disturbed his peace of mind for a day or two upon the theory that they could have him arrested for not allowing them in the mine.

We are told by those who have taken possession of the forests that when a miner makes a claim upon the public land he must satisfy them that he has a paying mine, or else he can not stay on the land. There is not one mine out of a thousand that is a paying mine until a great deal of money has been spent on it. I know of thousands of mines in the State and thousands of cases where patents have been issued where the owner had to spend $500 on his mine, and they were not in pay, but it was hoped to get them in pay. They fixed up their title when they had spent $500 on it.

Recently in one of the mining camps of the State there was a great big mining company composed entirely of local people, and there was not a lordly baron among them. They had been putting in their hard earnings, and they had developed to a very large extent three or four mines.

Those people had spent a large amount of money on the mine. For poor men they had spent what you might call a fortune. They thought they had developed property that was valuable. They applied for a patent under the statutes of the United States. All they had to do was to get a surveyor, make the survey, prove they had a vein in place. They did not have to prove it was paying or that it ever had paid. Then they would make their application to the Land Office and advertise it for a certain number of days, so that any adverse claimant might come in, and when that was done, pay for the land at the rate of $5 an acre, and ultimately get a patent. These people advertised for their patent. Nobody appeared to object, but suddenly there appeared one day a man saying he represented the Government of the United States; that he was a government agent, and wanted to examine the mine. So they allowed him to examine the mine. As I say, they had spent thousands and thousands of dollars on this mine—many times more than the law required. He went in and came out and said he would make his report to Washington, and they would know what he had concluded.

A man I know very well, and whom I have known for many years, I think as reliable a man as any other in the community, wrote me about the transaction. He said this man was a stranger to him, and he inquired if he was an expert or not. He did not profess to be an expert, but said he was an officer of the Government, sent there to determine whether or not they ought to have their patent. He said, whether correctly or not I do not know, that this man had recently, before he was sent there, been a sheep herder down in New Mexico. At all events, he tied up the patent. He said for some reason they were not entitled to the patent. Thereupon they were given notice by the Government—the Forest Bureau, not the department, which is not yet established, although it arrogates to itself the same authority as the department—that they must prove that they had a proper vein, and a paying vein, and all that, and they were compelled to do what they had already done before the register and receiver as the law required—go down to the county seat, and there before a commissioner, or somebody, give the evidence as to what they had done. That evidence would be sent down here, and my experience has been that when it gets down here it stays here indefinitely, and, as a rule, it takes several years to get a patent.

In another case which came to my notice a gentleman whom I knew very well, who had been a leading mining man, had put a mill on a piece of ground, had expended at least $20,000 on the mine—so he informed me, and I have no doubt it is true—and when he applied for a patent they notified him he would have to answer, before he could get the patent, a list of questions. I should think there must have been 20 of them at least. There was not a single question that the law required him to answer—not one. He wrote to me and said:

Shall I answer these questions?

I said to him:

If you are in haste to get a patent you had better, because they will tie you up indefinitely if you do not.

He wrote back that he was in no haste about it; that he was in possession of the property; that it was paid for; and that he would decline to answer. And so he did not answer. Therefore he is held up, although there is no law at all for doing that.

With that experience we do not want any more bureaus; we do not want any more interference from Washington. We do not need anybody to tell us how to develop that country in its mining interest.

A few years ago the State of Colorado, then with a great deal less population than it has to-day, was producing at least $35,000,000 worth of silver at the then market price. Now the product would be worth considerably less, of course. When silver fell our people turned their attention to mining gold more attentively than they had before. We mine now about seven millions of silver a year, which mainly comes as a by-product of gold mining. We are producing in Colorado not less than $25,000,000 to $28,000,000 of gold a year. Under those circumstances do you suppose anybody can give us any information how to develop that country? We do not need any assistance from the General Government.

The bureau is to reduce ores, under this bill. I suppose they will have to build a mill, and I suppose it will be just as it was in another matter. We provided for the testing of material—trying some men, and some other things. We made an appropriation, I think, of $100,000 last year for it. The next thing we knew about it was—and we did not find that out very soon, either—the administration of affairs charged with this examination had started and made a contract for a testing machine, for which they are to pay $32,000, I believe, and which I am told will, when paid for, cost at least $40,000. Give them an inch and they will take an ell.

If you say "You may inquire how our mines are worked," they will say, "We know more about mining than you do, and we will tell you how to mine. This is not a good mine. You can not make a profit. You must abandon the mine." We do not want anything of that kind in Colorado. We do not intend to have it if we can help it, notwithstanding the Senator from Nevada.

There are some people in Colorado who want this done. A scientific man, heading a scientific school in Colorado, came to me not long since and said he wanted a bureau of mines. I said, "I am opposed to it." I said, "Why do you want it?" He said, "The Government will spend some money out there in that matter, and I want it as an adjunct to the school." The State of Colorado has maintained for years a mining school—a mining school that I venture to say here has never been equaled on the face of the earth. It is the best in the world, absolutely. We have had experienced men at the head of it. It is the best, because every opportunity has been at the door of the school—gold mining, silver mining, copper mining, lead mining, coal mining—and it only takes a few hours for the professor to take his corps of students and land them in a mining camp where they can see all manner of reduction and all kinds of mines.

There is not a mining interest anywhere in the world that has not been represented in that section of the State of Colorado. There are not under the sun anywhere miners of greater skill than can be found in those Western States.

Mr. President, it is that interest which I in part represent here, and for that reason I object to the bill. I object to it on the score of economy. I object to it also because instead of being a help to the mining industry of the country it will be an absolute hindrance.

Mr. STONE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Missouri?

Mr. TELLER. Certainly.

Mr. STONE. Mr. President, with a view to temporarily relieving and aiding as far as may be possible my distinguished friend the Senator from Colorado [Mr. TELLER] in the interesting debate he has been conducting, I will say a word or two.

I am always glad——

Mr. KEAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Missouri yield to the Senator from New Jersey?

Mr. STONE. For a question.

Mr. KEAN. It is just for a question.

Mr. STONE. Not for a speech.

Mr. KEAN. Is the Senator going to entertain us with the same speech that he delivered about the 30th of May, 1908?

Mr. STONE. I really think that speech would bear repeating.

Mr. KEAN. It never was finished.

Mr. STONE. I am very glad the Senator from New Jersey remembers it.

Mr. KEAN. I have quite a vivid remembrance of that occasion, and as I know the Senator did not quite complete that speech, I suppose he will do it to-night.

Mr. STONE. No; I have serious matters in mind pertinent to the question immediately before the Senate.

Mr. President, I was about to say I would be glad to contribute anything in my poor power to the promotion of any cause in which the Senator from Colorado is interested because of my high and affectionate esteem for him, for no man in this great body has a longer, more distinguished, or signally useful service than that which stands to his credit. If he were not present, I would like to elaborate that thought.

Mr. HALE entered the Chamber and took his seat.

Mr. STONE. I see the Senator from Maine is present, and I am going to yield in a moment——

Mr. HALE. I thank the Senator.

Mr. STONE (continuing). If he will indulge me just for a moment or two; not long.

I am not opposed, of course, to laws designed for the protection of the lives of men engaged in the actual work of mining. No one is. It seems to me, however, that that is a business which could be well left to the States, and better done by the States than by the General Government. I had intended to say something more upon that subject, but the Senator from Maine will be getting impatient soon.

I desire to say this before I sit down, however: There is a tendency toward extravagant and wasteful expenditure of the public revenue in the conduct of the government—municipal, state, and national.

I had occasion to say this before the legislature of my State, or substantially this, some time ago, and was criticised for it. I had the honor once to serve my State in the office of Governor for a term which ended in 1897, a little more than a decade ago. The expenditures incident to the administration of the public affairs of that Commonwealth have practically doubled and a little more in that period. I think, though I do not speak from official data, but I am sure I am within the limit of approximate accuracy when I say, that the expenditures of the cities in my State have doubled in that time, and the expenditures of the National Government we know have doubled in that period.

Mr. President, it seems now to be the thought of men to find ways and means of raising revenue that larger expenditures may be made, rather than to find out how we can administer good government at less expense to the people.

Mr. HALE rose.

Mr. STONE. The Senator from Maine is anxious to get his matter up. It is late, and I yield.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes.

The message also announced that the House had passed the bill (S. 3526) to amend section 876 of the Revised Statutes.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolutions, and they were thereupon signed by the Vice-President:

S. 2982. An act to codify, revise, and amend the penal laws of the United States;

H. R. 21029. An act for relief of James W. Sears;

H. J. Res. 225. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton memorial, in Washington, D. C.; and

H. J. Res. 261. Joint resolution authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America in the year 1912.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for

other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 20, 24, 28, 29, 32, 33, 41, 42, 44, 58, 60, 70, 71, 74, 75, 79, 81, 96, 113, 114, 116, 118, 119, 121, 122, and 127.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 21, 22, 23, 30, 31, 35, 36, 37, 39, 45, 47, 48, 49, 52, 54, 55, 56, 57, 59, 61, 62, 63, 64, 65, 66, 69, 72, 73, 76, 77, 78, 80, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 97, 98, 99, 100, 101, 105, 106, 107, 108, 109, 110, 112, 115, 117, 120, 124, 125, 126, 128, and 129, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "two hundred and fifty thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Point Judith breakwater lights, Rhode Island: For establishing lights and fog signals on the breakwaters of the national harbor of refuge, Point Judith, Rhode Island, twelve thousand dollars."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: Add at the end of said amendment the words "to be immediately available;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: Add at the end of said amendment the words "to be immediately available;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "sixty thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "one hundred and fifty thousand dollars;" and after the word "dollars," at the end of the said amendment, insert the following: ", and the said commission shall complete their entire work and make their final report, and the commission shall cease on the first day of March, nineteen hundred and ten;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended as follows: On page 100 of the bill, in line 5, strike out the word "fifty" and insert in lieu thereof the word "twenty-five;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment as follows: Add at the end of said amendment the words "to be immediately available;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows: In line 4 of said amendment, after the word "services," insert the words "for the Senate Office Building;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment as follows: On page 106 of the bill, in line 3, strike out the words "to indict" and insert in lieu thereof the words: "or other juries to indict and try;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In line 3 of said amendment, strike out the word "seventy-five" and insert in lieu thereof the word "sixty;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 53, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "two hundred and twenty-five thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: Strike out all after the word "Treasury" in line 8 of said amendment; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one million four hundred and seven thousand three hundred and ninety dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment as follows: On page 166 of the bill, in line 8, strike out the words "forty-two thousand six" and insert in lieu thereof the words "forty-seven thousand one;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 103, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "five hundred dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 104, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$402,200;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 111, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$4,328,750;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 123, and agree to the same with an amendment as follows: In line 6 of said amendment, after the word "the," insert the words "Congress and the;" and on page 200 of the bill, in line 25, strike out the words "forty-one thousand two hundred and thirty-two" and insert in lieu thereof the words "forty-eight thousand and thirty;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 130, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended as follows: On page 215 of the bill, in line 20, after the word "shall," insert the words "transmit the estimates to Congress as heretofore required by law and," and change the number of the section to 7; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 131, and agree to the same with an amendment as follows: In lieu of the number proposed insert "eight;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 132, and agree to the same with an amendment as follows: In lieu of the number proposed insert "nine;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 133, and agree to the same with an amendment as follows: After the word "is," at the end of line 13 of said amendment, insert the words "specifically and in express terms" and change the number of the section to 10; and the Senate agree to the same.

EUGENE HALE,
GEORGE C. PERKINS,
H. M. TELLER,
Managers on the part of the Senate.

J. A. TAWNEY,
WALTER I. SMITH,
JOHN J. FITZGERALD,
Managers on the part of the House.

The report was agreed to.

REPORT OF A COMMITTEE.

Mr. McCUMBER, from the Committee on Pensions, to whom was referred the bill (S. 6666) for the relief of the estate of Antonio Sousa, deceased, reported it with an amendment and submitted a report (No. 1114) thereon.

RECESS.

Mr. HALE. I move that the Senate take a recess until half past 9 o'clock in the morning.

The motion was agreed to; and (at 11 o'clock and 20 minutes p. m. Wednesday, March 3, 1909) the Senate took a recess until 9.30 o'clock a. m. Thursday, March 4, 1909.

REJECTION.

Executive nomination rejected by the Senate March 3, 1909.

Joshua E. Wilson to be postmaster at Florence, S. C.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 3, 1909.

CONSUL.

A. Donaldson Smith to be consul at Mersine, Turkey.

RECEIVER OF PUBLIC MONEYS.

William A. McClure to be receiver of public moneys at Dickinson, N. Dak.

PROMOTIONS IN THE ARMY.

COAST ARTILLERY CORPS.

First Lieut. Benjamin H. Kerfoot to be captain.
Second Lieut. Thomas A. Terry to be first lieutenant.

PROMOTIONS IN THE NAVY.

Professors of Mathematics Walter S. Harshman, Frank B. Littell, and Paul J. Dashiell to be professors of mathematics, with the rank of lieutenant-commander.

APPOINTMENT IN THE NAVY.

Harold C. Daniels to be a second lieutenant in the Marine Corps.

POSTMASTERS.

ARKANSAS.

Lyman S. Roach, at Texarkana, Ark.

GEORGIA.

Sarah J. Anthony, at Shellman, Ga.
John S. King, at Rochelle, Ga.

INDIANA.

John C. Jenkins, at Fortville, Ind.
John H. Kimble, at Brookville, Ind.

NEW MEXICO.

William Reily, at Carrizozo, N. Mex.

TENNESSEE.

William E. Byers, at Tracy City, Tenn.
James H. Christian, at Smithville, Tenn.
Susanah E. Farley, at Whiteville, Tenn.
William L. Green, at Spring Hill, Tenn.
John Redd, at Bolivar, Tenn.
Joel F. Ruffin, at Cedar Hill, Tenn.

TEXAS.

J. F. Bain, at Humble, Tex.

WISCONSIN.

W. H. Schallert, at Johnson Creek, Wis.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *March 3, 1909.*

[*Continuation of legislative day of Tuesday, February 23, 1909.*]

The recess having expired, the House (at 11 o'clock and 50 minutes a. m.) resumed its session, and was called to order by the Speaker.

COPYRIGHT.

The SPEAKER. The pending question is the motion made by the gentleman from New Hampshire [Mr. CURRIER] to suspend the rules and agree to the amendments which were read, and pass as amended the bill (H. R. 28192) to amend and consolidate the acts respecting copyright, which bill was read last evening. The Clerk will report the title of the bill.

The Clerk read the title of the bill.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to bills of the following titles:

H. R. 28059. An act making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes; and

H. R. 27053. An act entitled "An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to bills of the following titles:

S. 8899. An act entitled "An act granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war, and to certain widows and dependent relatives of such soldiers and sailors; and

S. 6055. An act to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia.

The message also announced that the Senate had passed, without amendment, bill of the following title:

H. R. 28055. An act to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa.

The message also announced that the Senate had passed, with amendments, bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 28376. An act entitled "An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes."

The message also announced that the Senate had passed without amendment House concurrent resolution 76, as follows:

House concurrent resolution 76.

Resolved by the House of Representatives (the Senate concurring), That the Speaker of the House and the President of the Senate be authorized to cancel their signatures to H. R. 21896, "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes," and that the bill be reenrolled, with the correction in section 23, line 2, after the word "and," strike out the word "eight" and insert "nine," so that the sentence shall read: "Section 23. That this act shall take effect and be in force on and after the 1st day of July, 1909."

GOVERNMENT FOR HAWAII.

The SPEAKER announced the cancellation of his signature to H. R. 21896, "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes," in accordance with House concurrent resolution 76.

MILITARY ACADEMY APPROPRIATION BILL.

Mr. HULL of Iowa. Mr. Speaker, will the gentleman from New Hampshire [Mr. CURRIER] yield to allow me to present a conference report? It will take probably twenty minutes to pass it.

Mr. CURRIER. Mr. Speaker, understanding that it will not take more than about twenty minutes to pass the bill and desiring to have a full House when the copyright matter comes up, I will yield to the gentleman.

Mr. HULL of Iowa. Mr. Speaker, I submit a conference report on the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, and ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from Iowa presents a conference report on the Military Academy appropriation bill and asks unanimous consent to read the statement in lieu of the report. If there be no objection, it will be so ordered.

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 14, 16, 18, 20, and 26.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 11, 12, 13, 15, 19, 22, 23, 25, 29, and 30, and agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "one thousand;" and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "three;" and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of

amount proposed in said amendment insert "twenty-six thousand eight hundred and seventy-three;" and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "one thousand five hundred;" and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of matter proposed in said amendment insert "for five small electric motors, at one hundred dollars each, five hundred dollars;" and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "twenty-four thousand and thirty-three;" and the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "eight hundred and two thousand nine hundred and eighty-six;" and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "one thousand five hundred dollars," so that the amendment will read: "For preserving and marking Revolutionary forts, redoubts, and batteries, and other historic sites, situated within the limits of the West Point Military Reservation, one thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of amount proposed in said amendment insert "twenty-eight thousand five hundred and thirty-five;" and the Senate agree to the same.

J. A. T. HULL,
A. B. CAPRON,
WM. SULZER,
Managers on the part of the House.

N. B. SCOTT,
J. A. HEMENWAY,
MURPHY J. FOSTER,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

Statement of the conferees on the part of the House on the act making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910:

Amendment No. 1 simply changes one word; and the House recedes.

Amendments Nos. 2, 3, and 4 relate to the six sergeants authorized by the bill as it passed the House. The Senate amendments do not increase the number of sergeants, but designate one as stable sergeant and the other five simply as sergeants; and the House recedes.

Amendments Nos. 5 and 6 simply change the sections of the bill retaining the language as adopted by the House; and the House recedes.

Amendment No. 7 relates to the pay of a stenographer and typewriter in the adjutant's office; and the House recedes and agrees to the same with an amendment fixing the pay at $1,000 a year.

Amendments Nos. 8 and 9 only relate to the totals.

Amendment No. 10 provides for the paying of expenses of the members of the Board of Visitors. The House recedes and agrees to the amendment by fixing the amount $1,500 in place of $2,000.

Amendment No. 11 is intended to authorize the Board of Visitors to attend the graduation at the academy in addition to their present duties; and the House recedes.

Amendments Nos. 12 and 13 are verbal; and the House recedes.

Amendment No. 14 relates to the purchase of a typesetting machine; and the Senate recedes.

Amendment No. 15 provides for a cylinder press; and the House recedes.

Amendment No. 16 provides for a paper-cutting machine; and the Senate recedes.

Amendment No. 17 provides for electric motors; and the House recedes and agrees to the same with an amendment providing for 5 electric motors in place of 6.

Amendment No. 18 is for closets for stock and office furniture; and the Senate recedes.

Amendment No. 19 is verbal; and the House recedes.

Amendment No. 20 is the insertion of new words in the total; and the Senate recedes.

Amendment No. 21 is simply the total for current and ordinary expenses; and the House recedes.

Amendments Nos. 22 and 23 are verbal corrections; and the House recedes.

Amendment No. 24 is simply the total for the Military Academy; and the House recedes and agrees to same with an amendment.

Amendment No. 25 is an increased appropriation for repairs to ordnance laboratory and other buildings; and the House recedes.

Amendment No. 26 is for the development of a plan of landscape improvements; and the Senate recedes.

Amendment No. 27 is for preserving and marking the Revolutionary forts, etc.; and the House recedes from its disagreement and agrees to the same with an amendment reducing the amount appropriated from $3,200 to $1,500.

Amendment No. 28 is a total; and the House recedes and agrees to the same with an amendment.

Amendment No. 29 is authorizing the Secretary of War to permit Mr. Demetrio Castillo, jr., of Cuba, to receive instruction at the Military Academy; and the House recedes.

Amendment No. 30 authorizes the appointment by the President of J. Randolph Peyton, late a cadet at the Military Academy at West Point, to a position as second lieutenant in the army; and the House recedes.

J. A. T. HULL,
A. B. CAPRON,
WM. SULZER,
Conferees on the part of the House.

Mr. HULL of Iowa. Mr. Speaker, I simply call the attention of the House to the fact that in the conference the following items were dropped:

Pay of stenographer and typewriter in the adjutant's office, $900 a year, was dropped by the Senate; expenses of the Board of Visitors, reduced $500; typesetting machine, $3,700.

Mr. SLAYDEN. How much is that item increased over the House appropriation?

Mr. HULL of Iowa. You mean for the clerk? I think about $100 a year.

Mr. SLAYDEN. No; the expenses of the Board of Visitors.

Mr. HULL of Iowa. The item is now $1,500, instead of $1,000 as we passed it in the House, and instead of $2,000 as passed by the Senate. The total amount dropped out of the Senate amendment is $9,900.

Mr. SLAYDEN. Before the gentleman leaves that amendment (No. 11) about the expenses of the Board of Visitors, I want to call the attention of the House to what has been done in that matter.

Mr. HULL of Iowa. How much time does the gentleman want?

Mr. SLAYDEN. About three or four minutes.

Mr. HULL of Iowa. I yield to the gentleman four minutes.

Mr. SLAYDEN. Mr. Speaker, last year the House of Representatives, on the recommendation of the Committee on Military Affairs, after giving the subject consideration for three or four months, amended the statute governing the Board of Visitors to the Military Academy. By that amendment there was substituted for the old junketing board, which was composed of citizens from all over the country and of Members from the House and Senate, a very efficient subcommittee from each of the two committees of Congress charged with the duty of framing the bill for the support of the Military Academy. The amendment also provided that they should go at a season of the year when the academy was at work, and not when it was on parade. Now, in obedience to that law a joint committee did go to West Point in January, conferred with the authorities of the academy, got such information as was essential for the intelligent formation of the Military Academy bill, and returned. The total expenses of that Board of Visitors in January to the Military Academy were less than $400; I think about $360. When we came to the making of the bill, the committee, over my protest, made the appropriation for the next visit $1,000, which I stated then, and now believe, to be two and one-half times as much as it should

have been. The Senate increased that amount by another thousand dollars. It appears that the conference committee have reduced that by $500, so that as the report has been brought into this House it authorizes the expenditure of $1,500, when experience within the last ninety days has shown that less than $400 is all that is required.

Now, Mr. Speaker, the purpose of the amendment of the statute suggested by the Senate is to provide a junketing entertainment in the way of an unnecessary visit to the Military Academy. I regret to say that after having given it some thought I can see no other reason for the amendment than that the month of June is a desirable season to visit the Military Academy, and that there are a great many entertainments there at that period.

The academy bill has been made and will soon be passed. This second visit is wholly unnecessary. I fail to see how it can be justified. I think, sir, that this conference committee on the part of the House should have resisted that amendment as wholly unnecessary—as an inexcusable waste of public money. It is a yielding to the recommendation of the superintendent of the academy, who, as has been suggested to me, submitted a report—by the way, without authority in law—and had the report printed—by what authority I do not know—in which he recommended that there should be a return to the old system of a miscellaneous board taken from all over the country, and composed of distinguished visitors rather than mere working Members of Congress.

Now, Mr. Chairman, for fear that I may not get another opportunity, I want to say a few words in reference to the second amendment that this conference committee reports. I think it is the last amendment on the bill. That proposition is to put a young man on the retired list of the army who, while a student at the academy, had the misfortune to lose his leg. I feel exceedingly sorry for him. The committee considered it, and unanimously reported that there ought not to be any such legislation.

The young man was not an officer in the army; he was a student at the Military Academy enjoying the bounty of his Government. He was within three months of graduation. He had received an excellent education and was perfectly equipped, so far as scholastic training goes, to make his way in the world.

A short time before graduating he had the misfortune to fall ill and to lose his leg. I want to say that if any student at that academy hereafter gets the measles, and as a result loses his eyesight, or if a student catches cold and tuberculosis ensues, under the precedent established by this legislation, which I assume will be enacted, those young men can be put on the retired list of the army.

Mr. Speaker, I move that the House conferees be instructed to further insist upon the rejection of the amendments of the Senate.

Mr. HULL of Iowa. Mr. Speaker, the amendment the gentleman from Texas addressed himself to is in regard to the Board of Visitors. That board has the same power on the first visit as it had in the last Congress. The law is not changed in this respect. The only change under the law is practically an authorization for them to return to West Point a second time. I know that it is the general feeling that the June visit is more of a junket than a business proposition, but in almost all institutions and graduations there are distinguished visitors. I was not in favor of the June meeting, but I can see little harm, and the academy is unanimously for it, and the Senate insisted on it. It is hardly large enough to quibble over.

Mr. ANTHONY. Will the gentleman yield for a question?

Mr. HULL of Iowa. Certainly.

Mr. ANTHONY. The gentleman says that he can see but little harm in the visit. Can he see any practical good?

Mr. HULL of Iowa. A great many believe that there is a great deal of good in it. For myself I have no particular feeling on the subject. I have been there repeatedly at the June meetings, and the gratification that the students have, and the men there, seems to me to be of more benefit than Congress receives.

Mr. SMITH of Michigan. I would like to ask the gentleman from Iowa, if this conference report is adopted, how many cadets will be allotted to each Member of Congress?

Mr. HULL of Iowa. That was beaten in the Senate and is not in conference. Now, as to the second amendment the gentleman speaks of, there was a cadet who served in the academy about three and a half years, and who, on a practice march, had trouble come to him from a diseased knee. The doctors at the academy treated him for rheumatism. His father took him home and had other eminent physicians called in, and they decided that it had been neglected so long that it was imperative to remove the leg. The academy authorities and the Secretary of War reported that this injury was received in line of duty. Frankly, I doubt that very much. But it is true that on their report that it was injured in line of duty, if the young man had known of his rights, he could have applied for examination, and, standing high in his class as he did, he would undoubtedly have passed the required educational qualifications and, under the law, would have been entitled to a commission as a second lieutenant, and then been retired.

I do not believe that such a case is likely to happen again. There has none happened like it within a hundred or more years, and while I do not like this way of legislating, yet we have got to recognize the rights of another body under their rules of proceeding, and when we do, we have got to meet their propositions.

I think I am not violating a confidence to say that every member of the House Military Committee believes this young man should have some relief, and it is before us now on the proposition to give him his second lieutenancy, which he fairly earned by his standing in his classes, which he would have received had it not been for this accident, which compels him to go with the loss of a leg, nearly up to the hip joint; and we could not, as conferees, stand out and hold up this Congress on a matter of that character. I hope the conference report will be adopted.

Mr. GAINES of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. HULL of Iowa. Yes.

Mr. GAINES of Tennessee. We have not heard anything the gentleman has said, and I would like to know where this young man was when he was injured.

Mr. HULL of Iowa. He was on a practice march with the other cadets.

Mr. GAINES of Tennessee. And the gentleman says they had to cut his leg off?

Mr. HULL of Iowa. I do not know whether it was an accident or the development of some disease he had, but this is true, that all the military authorities report him as injured in line of duty; and if injured in line of duty and he had passed his examination at the final examination, he would have been commissioned and retired.

Mr. GAINES of Tennessee. What was he doing when he was injured?

Mr. HULL of Iowa. He was on duty, in the line of duty; obeying the orders of his officers.

Mr. GAINES of Tennessee. Is it the fact that he was injured?

Mr. HULL of Iowa. I do not know. That is what they reported; but I do know this: Immediately a disease of the knee-joint developed, that the army surgeon at West Point treated him for rheumatism, when that was not what was the matter with him at all, and the injury ran on until it resulted in the loss of his leg. In my judgment, whether it was an injury or not, it was at least malpractice by an army officer.

Mr. GAINES of Tennessee. Are there any precedents for this?

Mr. CAPRON. No.

Mr. HULL of Iowa. If we adopt this conference report, he gets his commission and retirement.

I yield five minutes to the gentleman from New York [Mr. SULZER].

Mr. SULZER. Mr. Speaker, the conferees on the part of the House have had a full and fair conference regarding all matters in dispute between the two Houses on the Military Academy appropriation bill. In my opinion, having been one of the conferees, I believe that this conference report is just and fair and a substantial victory for the House; and I trust the motion of the gentleman from Texas [Mr. SLAYDEN] will not be adopted, but that the conference report will be accepted by the House. It will be a serious mistake to send this bill back to conference.

Now, just a few words in regard to the provision in this bill to place Cadet J. Randolph Peyton on the retired list of the army. This young man was a cadet at the academy. He was serving his last year. He stood near the head of his class. He is a bright, smart, earnest young man, and would have graduated with honors except for the injury he received in the line of duty. The Secretary of War certifies to this fact and favors this legislation. His leg had to be amputated by reason of this accident, and he did not report to the academy to pass his final examination. Had he reported, no doubt he would have passed, and passing the examination successfully, he would have been, of course, placed on the retired list of the army.

This provision simply corrects a mistake—a technical error of judgment—and retires this young man who lost his leg in the service of his country and places him on the retired list as a second lieutenant. I believe that this relief should be granted. It is only fair and just. I do not believe that any Member of this House who understands all the facts in the case should seriously object to placing the name of this young man Peyton on the retired list of the army as a second lieutenant. It ought to be done as a matter of right. This is all I care to say at present, and, I repeat, I trust the conference report as presented by the conferees will be unanimously adopted.

Mr. HULL of Iowa. Mr. Speaker, I yield two minutes to the gentleman from Kansas [Mr. ANTHONY].

Mr. ANTHONY. Mr. Speaker, this report should go back to conference. I can not see one single logical reason for an additional junket to West Point. After the subcommittee from the Military Committees of the House and Senate made its trip there this winter it came back with a fund of information which enabled us for the first time to intelligently report a Military Academy bill to the House. Now, all they want of this second junket to West Point is to afford an excursion for a lot of political and military "has beens." It was recommended by the superintendent of academy, it is true; but he recommended it in a way that was an insult to the membership of this body, and I want to say that in all decency his recommendation should be disapproved of. For the first time in the history of this body, because of the adoption of the visiting-committee plan, as recommended by the gentleman from Texas [Mr. SLAYDEN], the present Board of Visitors was able to bring to the committee a comprehensive report from the Military Academy, and I believe that we should now stand by a system which has worked well. I hope that the motion of the gentleman from Texas will prevail.

Mr. HULL of Iowa. Mr. Speaker, I yield two minutes to the gentleman from Indiana [Mr. HOLLIDAY].

Mr. HOLLIDAY. Mr. Speaker, I shall vote for the approval of this conference report and hope the House will adopt it. I desire to say, as emphatically as I can, that I am not at all satisfied with the amendments. We have made some progress along the proper lines. While we have not been able to entirely eliminate the junket, as the gentleman from Kansas [Mr. ANTHONY] has so properly designated it, we have reduced the appropriation, and I think by patience and perseverance in the course of time we will be able to eliminate all the expenses and unnecessary features connected with this institution.

I want to say one word about this placing a boy upon the retired list. This young man is entitled to the sympathy of every man in this House, but I want to call attention to the fact that there are hundreds of schoolboys all over the United States who have been injured in the last year who would like to go upon the retired list and be taken care of by the Government of the United States during the rest of their lives. This young man was not a soldier or a sailor. He had never borne arms for his country. He was simply acquiring an education at the expense of the Government and something got the matter with him and the Senate decided to place him upon the retired list. I think that the report should go through. This item is not of large enough importance to hold it up, but we want the public to know and we want the people to know that if any man wants to get on the retired list all he has got to do is to get a little "pull" at the other end of the Capitol.

We want to so awaken public opinion that this thing of putting men, who have never been soldiers or sailors, upon the retired list some time in some way in the remote future will be stopped.

Mr. PAYNE. May I ask the gentleman a question?

Mr. HOLLIDAY. Yes.

Mr. PAYNE. Why did not you strike out these two provisions? Both of them are new legislation by the Senate, and if the House stands out they are bound to strike out those provisions.

Mr. HOLLIDAY. I am opposed to them; I think we ought to strike them out, but I was not on the conference committee.

Mr. PAYNE. Why did not the conferees strike it out?

Mr. HOLLIDAY. I say to the gentleman that I was not on the conference committee.

The SPEAKER. The time of the gentleman has expired.

Mr. HULL of Iowa. Mr. Speaker, I yield one minute additional to the gentleman from Texas [Mr. SLAYDEN].

Mr. SLAYDEN. Mr. Speaker, the suggestion of the gentleman from New York [Mr. PAYNE] is wise and pertinent. If the House makes a stand on this and rejects the report, in my judgment both of these items will be stricken out; certainly that which puts upon the retired list of the Army of the United States a young man who had enjoyed unusual benefits from the Government, which proposes to retire him under three-quarters pay of a lieutenant of the army, should go out. This precedent is dangerous. As I said a moment ago, if any young man becomes physically incapacitated from any illness whatever while at the Military Academy, if this precedent be established, he will have that as a basis to operate on, and he can be taken from the school and put upon the retired list of the army and live in comfort for the balance of his life without having rendered to the Government one hour's service.

Now, that is exactly the case in this instance. This young man has received a fine education. He has been supported, clothed, fed, and educated at public expense. He has never been for a single minute in the service of the Government of the United States, and now it is proposed to pension him at the rate of three-quarters of the pay of a lieutenant of the army. I hope the report will be voted down.

Mr. HULL of Iowa. Mr. Speaker, I yield two minutes to the gentleman from Florida [Mr. SPARKMAN].

Mr. SPARKMAN. Mr. Speaker, of course I can not state everything connected with this matter in two minutes, but I can give the House an idea of its provision by a brief statement of some of its leading features. I agree fully with the remarks made by the gentleman from New York [Mr. SULZER], who has stated briefly the facts.

It is true that when Mr. Peyton entered the academy at West Point he was in good health and remained so until within a few weeks of the time when he would have graduated but for an injury or trouble which subsequently made it necessary to amputate his limb. It is further a fact that immediately after a forced march, commonly known as a "practice march," he was found to be diseased to such an extent as to immediately incapacitate him for further service or studies in the academy. This disease was diagnosed by the surgeons there as acute articular rheumatism of the left knee, and was treated accordingly, but he did not recover, and a short time thereafter was permitted to go to his home in Florida, where eminent surgeons at once diagnosed his trouble as that of tuberculosis of the knee, which diagnosis was afterwards confirmed by other eminent physicians, one of whom, I think, was in New York. It is further stated that the disease might have been cured if it had been taken in time, but it had progressed so far by the time he reached Florida that it became necessary to amputate his limb, which was done between the knee and the hip. It was thought by some of the physicians attending him that if he had been properly treated in the beginning he might have been cured and hence the amputation rendered unnecessary.

I contend, then, that inasmuch as the disease which resulted in the loss of his limb had its inception in the line of duty, and inasmuch as he would have graduated but for this within a very few weeks, that he should be treated as if he had been regularly graduated and had become an officer; and that is the purpose of the provision inserted in this bill and now under consideration. If adopted, it will place him on the retired list with the grade into which he would have graduated.

It has been said that there are no precedents for this action; but that is a mistake, as Congress has already at different times passed several bills of a similar nature. Of course these came from the Naval Committee; but Congress passed them, nevertheless, and there is no reason why this young man should not be treated as others similarly situated have been treated.

Since the precedents have been established—which are not numerous, and in the nature of things can not be numerous—there is no earthly reason why this young man should not be treated as others have been treated. It has been said that he has a good education, given him by the Government, and that that ought to suffice. But I ask if there is a man here who, for the sake of obtaining such an education, would be willing to suffer the loss Mr. Peyton has suffered? No amount of education can compensate for the loss he has sustained, nor will the relief we are seeking to give repay him.

The SPEAKER. The time of the gentleman has expired.

Mr. HULL of Iowa. Mr. Speaker, on the amendment relating to the Board of Visitors we preserve all the benefits that have come to us from the amendment adopted last year by the House on the suggestion of the gentleman from Texas [Mr. SLAYDEN]. There is no change in that feature of the law. The Board of Visitors are to go there at a time when they can see the necessities of the institution and report to each House of Congress before the preparation of the Military Academy bill, and that this year has been of great benefit to us. There was no surrender on that proposition. It is simply the addition of an additional trip. It was thought by some Members of the House, and I think all the Members I have talked with except one or two on the Board of Visitors this year, that a visit by the same committee representing the House and Senate at the graduation exercises at the academy would be of great benefit to the academy at least. It is a small matter and costs

but a small sum, and if these Members of the Board of Visitors want to go back in June, for one I am willing that they should.

Now, the second amendment does present a more serious proposition. It is a proposition to place a cadet upon the retired list, and if there ever was a case that would justify such action, this case is one of them.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. HULL of Iowa. In just a minute. This House has by a direct vote done this very same thing for one or two cadets in the navy that were on a practice cruise and injured, not commissioned, not in the navy, but by a vote practically without opposition in the House and in the Senate passed a bill placing the cadets upon the active list and retiring them on account of the injuries.

The department reports that this boy was injured while on a practice march. The worst feature of it was that the army surgeon treated him for rheumatism and allowed the disease to eat into the bone until the bone became so diseased that he lost his leg. It was malpractice, if nothing else. The Secretary of War reports that he was injured in line of duty. The superintendent of the academy and all the authorities there report that he was injured in line of duty, and if he had known his rights when his leg was removed, and as soon as he had recovered sufficiently to travel had gone back to the academy and taken the examination in his studies, under the law, if he had passed that examination, he would have been entitled to commission and immediate retirement. But he did not know his rights. His father did not know them.

Mr. MADDEN. Will the gentleman yield?

Mr. HULL of Iowa. Yes.

Mr. MADDEN. Does not the gentleman think he is doing an injustice to the young man by placing him on the pension roll? Does he not think that the fact that the placing of this young man on the pension roll will be a premium on indolence, and take away from him all of the incentive to use the intelligence he possesses for the purpose of developing himself for future manhood and for giving him that place in life that he ought to have?

Mr. HULL of Iowa. Mr. Speaker, as the young man is perfectly willing to take that chance, I am willing for him to have it, and I now move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the Chair announced that he was in doubt.

The House divided; and there were—ayes 170, noes 60.

So the conference report was agreed to.

COPYRIGHT LAWS.

The House resumed consideration of the bill (H. R. 28192) to amend and consolidate the acts respecting copyright.

The SPEAKER. The gentleman from New Hampshire [Mr. CURRIER] is entitled to twenty minutes and the gentleman from Tennessee [Mr. GAINES] to twenty minutes.

Mr. CURRIER. Mr. Speaker, as a general proposition, I agree that important bills ought not to pass this House without ample opportunity for discussion and amendment. But it sometimes happens that the advantages to be gained by immediate action are so great that the House is willing to waive the right to long debate and to amendment in order that action may be secured. It is not unusual that bills of great consequence are passed in this House under suspension of the rules. More than one great appropriation bill has been passed under suspension at this very session. In the last session one of the most important bills in recent years, the currency bill, was passed under a rule which provided that only one single amendment could be offered, and that was an amendment that no Member wanted.

I moved last night to suspend the rules, because if this action can not be taken now this bill dies at noon to-morrow. Certainly nothing can be lost in making the one effort that can be made to pass the bill. I knowing, after long investigation, how serious the conditions are to-day, how imperative is the demand for immediate relief, feel that I should not discharge my duty properly did I not make every possible effort to secure action on this bill at this session.

Mr. HARRISON. What protection have you given the owners of mechanical devices?

Mr. CURRIER. I will come to that in one moment.

Mr. GAINES of Tennessee. The House ought to know just what this bill is. It is a very important bill, with 64 sections. I know nothing about it myself, and I want to know something about it, and I hope the gentleman will be listened to in explaining the bill.

Mr. CURRIER. Let me say that for three years the House committee and the Senate committee have been investigating this matter. There are many technical and troublesome questions involved. For a long time it seemed that it would be impossible to get an agreement in either committee. To-day both committees are unanimously for the bill as we have it now. It does seem, with the reorganization of committees soon coming, so that we will be compelled again to go over this matter unless action is taken now, that this bill ought to pass under suspension of the rules if any bill is to be so passed.

Mr. STEPHENS of Texas. I desire to inquire, Does it make any provision for the owners of these musical instruments?

Mr. CURRIER. It does.

Mr. COCKRAN. I hope we may have order. It is a very important bill, and I would like to have it explained.

The SPEAKER. The Chair has hope, but not much faith.

Mr. CURRIER. Let me say——

The SPEAKER. The Chair has frequently seen the House agonized over a hundred dollars of expenditure. Here is a bill that effect every household in the country. Business will not proceed until the House is in order and keeps in order.

Mr. CURRIER. Let me say to the gentleman that there is no legislation in this country on the subject of the mechanical reproduction of music. The courts have invariably held—the Supreme Court held last winter in the case of White-Smith Publishing Company *v.* Apollo Company—that under the law as it now stands any reproducer by mechanical means of music may appropriate the copyrighted music of any composer without compensation. The composers of this country have received not one dollar for the use of their music by reproducing devices, of which millions and millions have been sold. I doubt if there is a Member of this House who has not received letters from his constituents begging him for some legislation on this question. It is very difficult to solve that question, gentlemen, for this reason: While we desired to give to the composer some compensation for such use of his music, we felt that there was great danger that unless that proposition was safeguarded a great musical trust would be formed. The preliminary steps in the formation of such a trust had already been taken. We have solved it in this way, and we have solved it, we believe, so as to be fairly satisfactory to both interests. First, we allow the composer to prohibit the reproduction of his music by mechanical means; but if the composer reproduces his music by mechanical means, or if he permits anybody else to reproduce it by mechanical means, then everyone who desires may reproduce it upon payment to the composer of 2 cents on each mechanical reproducing device.

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. CURRIER. Certainly.

Mr. COOPER of Wisconsin. Does the gentleman look upon that which the composer disposes of for 2 cents as a property right of the composer?

Mr. CURRIER. It becomes a property right when Congress creates that property right. It is not a property right now by law.

Mr. COOPER of Wisconsin. Well, is it not an invention of the composer?

Mr. CURRIER. Let me say to the gentleman from Wisconsin, there is no property right in writings. The courts have held again and again that the composer or the inventor has no natural rights in his writings or discoveries, but such rights as he has are purely statutory rights.

Mr. COOPER of Wisconsin. One more question and that is all. Does the gentleman know of any other national statute which requires any man who invents anything or composes anything to dispose of it at a price fixed by Congress under the law?

Mr. CURRIER. Let me say that I do not. Let me say also that it is the only possible way to solve this question with fairness to the composer and to the public alike, and we have the power to do it.

Mr. HARRISON. I understand from the gentleman that this bill gives the composer a property right.

Mr. CURRIER. It does.

Mr. HARRISON. What penalty does it provide for infringement, other than the levying of 2 cents a copy?

Mr. CURRIER. It provides for injunction proceedings, and the court may award treble the amount found by the jury and grant an injunction to restrain further interference.

Mr. HARRISON. Those are only civil remedies. There is no criminal punishment, is there?

Mr. CURRIER. We have given no criminal remedy for this kind of an infringement.

Mr. UNDERWOOD. How long does this right last to the composer?

Mr. CURRIER. That goes into the question of term; and will the gentleman wait a moment until I dispose of this first matter?

Mr. UNDERWOOD. Certainly.

Mr. HUGHES of New Jersey. As I understand, under the terms of this bill—and this constitutes my chief objection to it—the most popular composer in the country can not get more under that section than the merest tyro.

Mr. CURRIER. Oh, the gentleman is absolutely mistaken. That works automatically. The merest tyro may compose something, and they would only be able to sell two or three hundred copies of the reproducing device. In the case of a popular piece of music they would sell from one to two million copies. Take a popular song, and they should sell 2,000,000 copies, 2,000,000 of these reproducing devices, which would give to the composer, at 2 cents each, $40,000.

Mr. HUGHES of New Jersey. Still it is true that the price is the same to each.

Mr. CURRIER. The committee, after a long investigation, felt that was the only way it could be done. And let me say that it amounts to about 5 per cent probably on the selling price, covering the whole field.

Mr. GRIGGS. Do I understand the gentleman to say that both sides have agreed to this proposition?

Mr. CURRIER. It is absolutely unanimous.

Mr. GAINES of Tennessee. I see on page 8 you say that some great music monopoly is going to attempt to take charge of something.

Mr. CURRIER. Oh, if I had the time—that is all stated in the report.

Mr. GAINES of Tennessee. Is there anything in this bill that prevents that monopoly?

Mr. CURRIER. Absolutely.

Mr. GAINES of Tennessee. What?

Mr. CURRIER. The provision that any person may reproduce without any authority upon the payment of the royalty.

Mr. SULZER. It treats everybody alike.

Mr. CURRIER. May I state, in answer to the question which was asked sometime ago about this matter of controlling property rights, the first great copyright case decided in this country was the Wheaton case, and in deciding that case the Supreme Court say this about copyrights:

> No one can deny that when the legislature are about to vest an exclusive right in an author or inventor, they have the power to prescribe the conditions on which such right shall be enjoyed, and that no one can avail himself of such right who does not substantially comply with the requisitions of the law.

While we can not legislate out of existence any existing right, for that would impair the obligation of a contract, we are not legislating regarding existing rights; we are creating new rights, and we may attach to those new property rights any restrictions that we please. [Applause.]

I reserve the balance of my time.

Mr. BARTHOLDT. Do I understand the gentleman to say that there is a complete agreement between the composers on one side and those who want to reproduce music mechanically on the other?

Mr. CURRIER. I think practically so. I can not speak for all the people of the country. There was a complete agreement in the committee.

Mr. GAINES of Tennessee. If there is anyone on this side or anyone in the Chamber who is opposed to this bill I will yield him some time.

Mr. COOPER of Wisconsin. I should like to say a word.

Mr. GAINES of Tennessee. I yield to the gentleman two minutes.

Mr. COOPER of Wisconsin. I shall vote against this bill, if for no other reason, because no legislation so important and so long and so earnestly contested ought to be passed by the House of Representatives at this late hour in the session. Nor do I believe, as a matter of principle, that we ought to say to a man, like the former resident of my district—now dead—who composed the Sweet By and By, that he shall not be allowed to dispose of what his genius has created on any terms that may please him. We would not have it but for his genius. God gave him the genius, and if he wants to dispose of a composition to this or that maker of phonographs, he ought to have the right to do so upon his own terms, instead of being compelled by a law of Congress to receive as compensation only 2 cents on each disk or record.

Mr. HINSHAW. Will the gentleman yield?

Mr. COOPER of Wisconsin. Yes.

Mr. HINSHAW. At the present time he has no security whatever.

Mr. COOPER of Wisconsin. Well, that is all wrong.

Mr. HINSHAW. This will provide for him an adequate remedy and compensation for the use of his composition.

Mr. COOPER of Wisconsin. But it fixes the price by law. Does any farmer want the law to fix the price that he shall receive for a bushel of wheat? Does the man who invents a sewing machine want the law to declare the price at which he shall dispose of it? Shall the law say to an inventor that if he dispose of county rights it must be at a price fixed in the letter of the law?

Mr. STEPHENS of Texas. Is it not better for the composer to get something rather than nothing?

The SPEAKER. The time of the gentleman from Wisconsin has expired.

Mr. GAINES of Tennessee. I will yield the gentleman two minutes more, as he seems to be opposed to the bill.

Mr. COOPER of Wisconsin. I am opposed to it. I know that the composer gets nothing now. The original provision of the Constitution and the copyright laws enacted in accordance with it never contemplated an invention like the phonograph which, in large measure, deprives the composer of his right to make money through the sale of printed copies. But because he has not heretofore had a remedy for this wrong, we would not now be justified in declaring by law that he shall have as compensation a royalty of only 2 cents a record.

Mr. REEDER. This bill protects composers in the products of their ingenuity; but does not the gentleman think it would be better to curtail it a little in order to prevent the creation of a monopoly?

Mr. COOPER of Wisconsin. You are not obliged to sing a song nor to buy a phonograph. Create a monopoly of a work of musical genius!

Mr. REEDER. That is all the purpose of this regulation—to prevent monopoly.

Mr. COOPER of Wisconsin. A composer ought to have the right to dispose of the products of his brain on his own terms.

Mr. REEDER. The sole purpose of this regulation is to prevent monopoly.

Mr. BARTHOLDT. Under the present conditions he receives nothing at all.

Mr. COOPER of Wisconsin. I know that, and it is because the Constitution was created and the copyright law passed before the invention of the phonograph. That is the reason why he now receives nothing at all. It is the phonograph which is depriving him of what he would have received if it had not been invented. We are attempting now to pass a law that will help him some, but at the same time we propose to have Congress fix his royalties by statute.

Mr. BARTHOLDT. If the composer is satisfied, why should not the gentleman be satisfied? I asked the gentleman from New Hampshire in charge of the bill, and he said that there was an agreement between the reproducers and the music composers.

Mr. COOPER of Wisconsin. Does the gentleman wish to establish the precedent of having Congress fix the price? Shall we say to Mark Twain or to any other author that by law Congress has fixed the compensation, the royalties, that he shall receive? It is the principle to which I object.

The SPEAKER. The time of the gentleman has expired.

Mr. GAINES of Tennessee. Mr. Speaker, unless there is some other Members who desire to speak against the bill, I yield seven minutes to the gentleman from New York [Mr. SULZER].

The SPEAKER. The gentleman from New York is recognized for seven minutes.

Mr. SULZER. Mr. Speaker, this bill codifies and reforms the copyright laws of the United States—a consummation earnestly desired by the people most vitally interested. Take it all in all, I believe this comprehensive proposition is one of the most important measures that have been presented to the Federal Legislature in a quarter of a century. For more than three years the Committee on Patents of the two Houses of Congress have been laboring incessantly—in season and out of season—to formulate and codify a new copyright law that will be abreast of the times and do substantial justice to all interests concerned—to labor and to capital; to the authors and the dramatists and the composers; to the publishers and the bookbinders; to the typesetters and the lithographers; to the schools and the churches and the colleges; to the importers and the manufacturers; and last, but not least, to those whose brain and whose genius produce the stories and the dramas and the songs of America. [Applause.]

This copyright bill is the favorable culmination of this long struggle of years for justice to all concerned. I stand for that principle, and as a member of the Committee on Patents I refused to consent to the report of the bill until I honestly believed substantial justice had been done to those most vitally

affected; and I think I can consistently say the measure under consideration, in its present form, meets with the approval of every interest most seriously to be considered. [Applause.]

Mr. GAINES of Tennessee. What about the monopoly?

Mr. SULZER. Mr. Speaker, my friend from Tennessee asks what about the monopoly? I am glad the gentleman makes this inquiry. I stand here and declare that this bill effectually destroys the mechanical device monopoly. There is a monopoly to-day composed of these mechanical device manufacturers. For years these manufacturers of records and disks and perforated rolls, reproducing the songs and the works of the composers and the authors of America, have been making them regardless of the authors' consent, and without paying a nickel of royalty for the privilege. That is unjust. That is the injustice I denounced. This bill changes all that. This bill recognizes the property right of the author or the composer in his work and in his creation—something never granted by Congress heretofore—compels the manufacturer to pay a royalty for the right to manufacture these devices, and gives all manufacturers equal rights by complying with the law. This is a giant stride along the highway of honesty and a long step in advance along the road of progress. No favoritism is shown and no monopoly can be created. All manufacturers by paying a royalty fixed by this bill to the author or composer will have the same rights and the same privileges. So even-handed justice is done to all concerned and there can be no monopoly. All things considered I think the composers' rights in this bill are amply safeguarded.

I am most friendly disposed to the authors and composers of America. I am the man that made the stand for their rights. I fought their battle in the committee for three years, and I have won their fight. I would give them greater rights if I could, but the provision in this bill to protect their interests is the best I was able to secure for them, and they are, so I am informed, entirely satisfied with the bill as amended and now before the House. Of course many of the vital questions in dispute have been compromised. To secure a favorable report and immediate action in this Congress, this had to be done. All legislation is more or less of a compromise, and this is especially so in a measure of so complicated a character and affecting so many interests, directly and indirectly, as the bill under consideration. It is conceded by all who have given the present copyright laws the most superficial investigation that they are wholly inadequate to meet the requirements of modern civilization. Great progress has been made since the existing copyright laws were enacted years ago, and the courts have frequently declared that these ancient copyright laws are imperfect in definition, confusing in phraseology, and inconsistent in construction. They fail to give the protection essentially demanded by modern conditions, are difficult of interpretation, and impossible of intelligent administration. Attempts to improve them by amendments have proved futile, and have only made them more incomprehensible and unsatisfactory. This bill marks progress. It is a great step in advance. No legislative body in the world has yet taken such a forward movement along the line of protecting the rights of composers and authors as the measure under consideration.

This copyright compilation is a monumental work—the result of much care and labor—and, so far as I am concerned, a labor of love, because I have, from the very beginning, labored for justice to every interest affected along equitable and economical and utilitarian lines, ever bearing in mind the true welfare of the people.

So I think I can justly say this bill is in the interest of all the people. It is a fair and a just measure. It may not be absolutely perfect. It would not be the work of finite man if it were destitute of some defect. But if there be defects in it, they can speedily be remedied when the bill becomes a law and all its provisions more carefully studied and scrutinized. I want to see it pass the Congress to-day. I know that it will be a grave mistake if this House votes down this bill after the struggle we have had to get a favorable and a unanimous report. Do not now defeat it. If you do defeat this measure, it will delay copyright legislation for years, and the people of the country, when they realize it, will be sadly and grievously disappointed. In my judgment we never can get a fairer and a better and a more equitable bill than the measure now presented. Its defeat will be a mistake and most discouraging to every friend of intelligent copyright legislation. I appeal to the Members of this House to stand by the unanimous report of its Committee on Patents and pass this bill and help make it a law ere we adjourn. I appeal to my friends——

The SPEAKER. The gentleman's time has expired.

Mr. CURRIER. Mr. Speaker, I yield three minutes more to the gentleman.

Mr. SULZER. Mr. Speaker, let me again urge the importance of enacting this bill into law at this time. I appeal to my friends and urge them to vote for this bill. Delay is dangerous. Now is the opportune time for the friends of honest and just and up-to-date copyright legislation to stand together. I shall be crestfallen if this momentous measure is defeated in the house of its friends. If we pass the bill through the House now, it will go to the Senate to-day. The Senate Committee on Patents has reported favorably an identical bill, and will substitute immediately the House bill for the Senate bill and forthwith send it to the President, and it will become a law before we adjourn. [Applause.] I can say this with the utmost confidence. I am advised the Senate will pass this bill if we do. Again I say in behalf of all concerned let us rise to the occasion and pass the bill.

I have received innumerable letters and telegrams from authors, from composers, from manufacturers, from labor organizations—from all concerned, in fact—urging me to do everything in my power to pass this bill and make it a law before we adjourn. The exigency of the time demands the immediate enactment of this legislation. If we do not pass the bill to-day, I predict that the next Congress will never be able to appoint patent committees that will be able to agree again on a bill so fair and so just and so satisfactory to every interest concerned as the pending measure. This bill does justice to all interests concerned, and, as my time is exhausted, I want to reiterate that I hope every Member of this House who favors an honest, a just, an adequate, an equitable, an up-to-date, an intelligent, and a comprehensive code of copyright laws will cast his vote for this bill and aid to place it on the statute books of our country. [Applause.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes, disagreed to by the House of Representatives; had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon; and had appointed Mr. HALE, Mr. GALLINGER, and Mr. TELLER as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment joint resolution of the following title:

H. J. Res. 225. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton memorial in Washington, D. C.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 9278) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors."

The message also announced that the Senate had passed the following order:

Ordered, That Mr. CLARKE of Arkansas be substituted for Mr. MCLAURIN as a member of committee of conference on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 28376, the general deficiency appropriation bill, disagree to the Senate amendments, and ask for a conference.

Mr. UNDERWOOD. Mr. Speaker, I would like to ask the gentleman a question, and that is whether there are any legislative amendments put on this bill by the Senate?

Mr. TAWNEY. No legislative amendments that I know of. I will say to the gentleman from Alabama that there are some amendments, but amendments that involve merely appropriations, as far as I know.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to take from the Speaker's table the general deficiency appropriation bill, disagree to the Senate amendments, and ask for a conference. Is there objection?

There was no objection.

The SPEAKER announced the following conferees on the part of the House: Mr. TAWNEY, Mr. VREELAND, and Mr. BRUNDIDGE.

COPYRIGHT LAWS.

The House resumed consideration of the bill (H. R. 28192) to amend and consolidate the acts respecting copyright.

Mr. CURRIER. Mr. Speaker, I yield five minutes to the gentleman from Massachusetts [Mr. WASHBURN].

Mr. WASHBURN. Mr. Speaker, this bill now before the House is the result of over three years of careful study and investigation. It comes into this House unanimously reported by the Committee on Patents, and it has been reported in the Senate unanimously by the Senate Committee on Patents.

Mr. GAINES of Tennessee. Does the gentleman mean by that that every member of the Patent Committee of the House favored this bill?

Mr. WASHBURN. That is what I mean.

Mr. GAINES of Tennessee. And not simply a majority?

Mr. WASHBURN. Every member of the committee favored the bill. The principal subject of difficulty in this whole discussion, Mr. Speaker, has been over what is known as the "canned-music" provision. Under the law as it now stands, the productions of composers can be reproduced upon mechanical instruments without any possibility of compensation to the composers. Originally those interested in this legislation were divided into two parties, one of whom thought that the composer should have no protection and the other of whom thought that the composer should have the absolute control over his productions. The provision in the bill upon this point recognizes the absolute right in the composer to control his production, and that if he himself reproduces it, or if under his authority it is reproduced upon mechanical instruments, then all makers of mechanical instruments shall have the same right upon the same terms, which are fixed in the law. I am well within the facts in saying that this provision as it now stands gives substantial satisfaction to the composers, who are eagerly pressing for some legislation, and also to the makers of mechanical instruments, who have heretofore been opposed to any legislation.

I doubt if any act ever submitted to this House has had more careful, expert attention than this, or is more satisfactory than this to all of the parties in interest. I now yield to the gentleman from Tennessee.

Mr. GARRETT. Why is it that this bill, having the unanimous report of the committee, a bill in which there seems to be no politics, was not brought in before the closing hours of this session, so that we might have known something about it?

Mr. WASHBURN. The reason is, Mr. Speaker, that the subcommittee of the Committee on Patents was not able to report to the full committee so that this bill could go on the calendar at an earlier day than that on which it was reported, February 22.

Mr. EDWARDS of Georgia. Will the gentleman yield for a question? I wish to ask the gentleman how, in his opinion, will this bill affect the price of music commonly known as "church music?"

Mr. WASHBURN. Church music is excluded; it will not be affected at all; or any performance given for charitable or educational purposes and not for profit.

Mr. HARRISON. Has the gentleman heard the argument advanced by the gentleman from Wisconsin a few moments ago, that this takes away a property right? Will the gentleman not state that this creates a property right where none now exists?

Mr. WASHBURN. The statute which we are now attempting to enact creates a right which has never existed before, and in creating it Congress has the right to impose such conditions upon its enjoyment as it sees fit.

Mr. HARRISON. And in creating the 2-cent rate, does not Congress mean to impose a penalty as well as to give a royalty?

Mr. WASHBURN. The penalty is imposed by the triple royalty provided for in the bill.

Mr. HARRISON. I am trying to answer the objection advanced, that it fixes the price of men's brains. Will not the gentleman concede that instead of doing that it really imposes a penalty as well as gives a royalty?

Mr. WASHBURN. That is substantially so.

Mr. GARRETT. It revises the entire copyright law of the country?

Mr. WASHBURN. It is a codification of the whole copyright law, and it has been carefully considered by experts on all sides of the question and is substantially satisfactory to them as it stands. I now yield back the balance of my time.

Mr. GARRETT. Satisfactory to everybody?

Mr. WASHBURN. Yes; substantially.

Mr. GAINES of Tennessee. Mr. Speaker, I now yield three minutes to the gentleman from Pennsylvania [Mr. WILSON].

Mr. WILSON of Pennsylvania. Mr. Speaker, the bill under consideration is a proposed codification of the present laws relating to copyrights, together with some changes and amendments that have become necessary as a result of changed conditions by the introduction of mechanical devices. As the law stands to-day the author or composer whose products are used by the manufacturers of mechanical devices receive no compensation whatever for the reproduction of their works. By the proposition contained in this bill the author or composer is given an exclusive right in his or her production, unless in the exercise of the exclusive right the person owning the copyright proposes or undertakes to produce it by a mechanical devise or permits some one else to produce it by that process, and when that is permitted by the author or composer, then a new property right is created and qualified under this bill.

That new property right is created by law. As a matter of fact there is no property right existing in any production, in any invention, in any discovery, except the right that is prescribed by law under the provisions of the Constitution. It is proposed by this law, then, to create a new property right concerning the reproduction of compositions, mechanical or otherwise, by mechanical devices, and when so reproduced, if this bill is enacted into law, either by the author himself or by some one else by his permission, then anyone who desires to manufacture these mechanical devices has the right to proceed to manufacture them under this law by paying the royalty of 2 cents per roll or 2 cents per record to the composer; and in addition to that there is a penalty clause attached to it. The penalty is three times the amount that is provided as a royaly, or, in other words, the penalty of 6 cents per record or roll is provided as a penalty. And in the event of there being any question that the manufacturer of the roll or the record is insolvent or likely to be insolvent, and thereby unable to pay the royalty, the right of injunction is permitted to restrain him from continuing to reproduce. I favor the passage of the bill. [Applause.]

Mr. GAINES of Tennessee. I now yield three minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, the measure before us is one of very great importance. It is true that it comes with the unanimous report of a very distinguished committee. It is also true that many measures come into the House with a unanimous report of a distinguished committee. But is that a reason why the House should not consider the measure? No one pretends that the House this morning is able to give consideration to this bill, which is 60 or 70 pages long, and which, as the Speaker just remarked, affects the home life of every home in America. There has been a controversy going on for years relating to the subject-matter of this bill. If the committee has now concluded its work, if the committee has now prepared a unanimous report, there will be time enough in the next Congress to consider it. We would not take the judgment of the Committee on the Revision of the Laws in regard to a codification of the penal code. Why should we take the judgment of the Committee on Patents in regard, not merely to a codification, but in regard to a new law, and under a controverted proposition concerning the copyright and trade-mark laws?

Mr. Speaker, a vote "no" at this time is not a vote against the principles of this bill, but is a vote against the expediency of passing a great bill without knowledge and without consideration. Gentlemen here may be willing to go on the principle of trading for a pig in a poke, but I prefer to know something concerning the measures before I vote for them. All wisdom will not expire with this Congress, and all time for consideration will not end to-morrow noon. We have Congresses to come, and we can legislate in the future. [Applause.]

Mr. GAINES of Tennessee. Mr. Speaker, I yield two minutes to the gentleman from Pennsylvania [Mr. OLMSTED].

Mr. OLMSTED. Mr. Speaker, my friend from Wisconsin [Mr. COOPER], who opposes this bill, takes pride in a constituent who composed that beautiful hymn tune called "In the sweet bye and bye." Now, if my friend from Wisconsin, with his beautiful voice, should warble that beautiful tune into a phonograph, and somebody should therefrom produce a disk and sell that disk by thousands all over the country, the constituent of the gentleman from Wisconsin would not, under existing law, receive a cent. That is considered a great injustice. Under this law, if passed, that song could not be sung into a phonograph and disks produced therefrom except by the consent of the composer. If he consents, he receives what he does not now get, namely, 2 cents per disk. It is greatly in the interest of the constituent of the gentleman from Wisconsin. I am surprised that my friend should want such a complete monopoly as he suggests in such a production. Upon his theory enacted into law, as I understand it, a mother, having purchased it in the form of sheet music, could not teach that song to her child,

and he, in turn, sing it to others, except by the permission of the composer, although he himself had produced it and sold it in the form of sheet music. This bill does not go as far as that, but gives to the composer a right he never had before, a source of revenue and profit he never had before; and yet I understand from the chairman of the Committee on Patents that the disk producers are generally willing to concede it. I think we are just as prepared to vote on it now as we would be six years hence. A vote "no" postpones a settlement of this controversy. A vote in the affirmative closes it and settles it now and, I trust, for the sweet by and by. [Applause.]

Mr. GAINES of Tennessee. I now yield two minutes to the gentleman from Indiana [Mr. CHANEY].

Mr. CHANEY. Mr. Speaker, I am promised two minutes from my colleague from Tennessee [Mr. GAINES] and one minute from my colleague from New Hampshire [Mr. CURRIER], the chairman of the committee, making three minutes in all. I only wish that I might have a half hour in which to explain this measure, for we have spent much time and study of the propositions embraced in the bill. For three years the Committee on Patents of the House and the Committee on Patents of the Senate have been studying this copyright question, have had numerous hearings, and heard many arguments. We find our copyright laws are mere pieces of patchwork, unphilosophical and unsystematic, and without any real arrangement by which a copyright may be secured to the people who ought to be entitled to a copyright under the existing civilization. We have endeavored to keep in mind two things in the study of this question.

You will find on page 7 of the report that we have taken into consideration how much the proposed legislation will stimulate the producer and so benefit the public; and, second, how much will the monopoly granted be detrimental to the public. The granting of exclusive rights must always take into consideration these two principles, and we have endeavored to follow that out in the study of the question of copyright which has been given by the two committees. We do not want to put it in the power of persons to establish an unholy monopoly to the detriment of the composer and of the public regarding musical compositions which may be reproduced in talking and singing machines. The bill provides against this, and it was the last dispute to be satisfied. All are now agreed upon what we have done in respect of this subject. The report sets forth the kernel of each section of the bill, and a perusal of this report makes extended explanation unnecessary.

The committees met for quite a while in joint session and heard everybody who had anything to say concerning the question of copyright in all its phases. No person who had any interest in the question was excluded from the hearings, and everything they had to say was heard and respectfully considered.

Now, I want to suggest that, after the committee had prepared a report touching the questions involved as complete as the report we have in this case, Members who are interested in the subject, both those who favor this legislation and those opposed, should study the report and see if we have not embodied everything that ought to be considered in the question of copyright legislation.

Now, this report was prepared and submitted for printing on the 22d of February; it has been, therefore, long enough before the House for everybody to have a chance to know what the legislation proposed contains. We have endeavored to provide for those things not provided for in the law as it stood before. The bill is certainly a good one and ought to pass.

Mr. GAINES of Tennessee. I understand I have two minutes remaining; I yield one minute to the gentleman from New York [Mr. DRISCOLL].

Mr. DRISCOLL. Mr. Speaker, I have not expressly joined the combine to reform the rules of the House, but there is one rule that ought to be made and enforced, and that is that no important bill should be brought before the House for consideration without a reasonable notice. The Members ought to have at least forty-eight hours' notice for the consideration of a bill like this before they are required to vote on it. My opinion in this regard has been growing and becoming more fixed by years of experience and observation in this body. This is an important measure, and I have no doubt the committee has given it long and careful consideration, and its report and recommendation are entitled to great weight on the part of the membership of this House. However, the Members are responsible for legislation and can not shift that responsibility on the committee. There are people in my district who are interested in this bill and interested in legislation on this subject, and a bill of this importance, which affects so many people in their homes and also affects many business interests, should not, in my judgment, be rushed through during the closing hours of Congress. If it is not the best measure that can be devised and recommended, it should not pass. If it is a meritorious measure, no great harm or damage will be done if it is allowed to stand until the beginning of the next Congress.

I have on several previous occasions complained of the practice which has obtained lately of forcing important legislation through Congress without sufficient time for consideration, and without any notice of the time when it is to be brought up for consideration, and I shall vote against this bill as a protest against this kind of legislation.

Mr. CURRIER. I yield one minute to the gentleman from Pennsylvania [Mr. FOCHT].

Mr. FOCHT. Mr. Speaker, as a member of the committee which had under consideration this bill I wish to take issue with the gentleman from Illinois with respect to the extent and length of consideration of this measure. We gave consideration during nearly the whole of last session and a large part of this session. Hearings were held, both sides thoroughly considered, and this bill has had the approval of all who know anything on the subject; and I believe that by a favorable consideration of this bill there will be recognition given to the labor and the skill of those men who create these songs and those who create these mechanical appliances. I therefore trust that the bill will be favorably considered as presented.

Mr. CURRIER. I yield fifteen seconds to the gentleman from North Dakota [Mr. GRONNA].

Mr. GRONNA. Mr. Speaker, in what little can be said in fifteen seconds, I desire to state that as I understand this bill it is to protect the product of the author and the artist; musical compositions, both as to sheet music and mechanical devices. I believe there is a great deal in what the gentleman from Illinois has just said, that so important a bill as this should be thoroughly considered. I believe, however, that I have given this matter consideration and acquired information that will permit me to vote for the bill. As I now understand the bill it will not create a monopoly, but simply give protection to honest labor.

Mr. CURRIER. Mr. Speaker, the gentleman from New York has said that Members of the House have had no opportunity to consider this bill and report before voting on it. I believe, Mr. Speaker, there has been a most unusual opportunity to consider this report. More than a week ago I had sent to every Member of this House a copy of the bill and report, and the report is so full that it discusses in detail every section of the bill.

Mr. DRISCOLL. Will the gentleman yield?

Mr. CURRIER. No. "The gentleman" has only a minute. The gentleman from Pennsylvania [Mr. OLMSTED], quoting me, has said the manufacturers of these devices were all in accord. I wish to say that while they are all in accord with the essential principle involved, as to some of the details they are not in accord.

Mr. Speaker, I now desire to ask unanimous consent to offer an amendment correcting the phraseology. Line 4, page 27 of the bill, amend by striking out the words in that line "of this act," and transpose the word "work" from before to after the word "copyright," so that it will read "copyright work," and so forth.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. CURRIER. Mr. Speaker, I ask for a vote.

The question was taken; and the rules were suspended, and the bill was passed. [Applause.]

OMNIBUS CANNON BILL.

The SPEAKER laid before the House the bill (H. R. 28304) granting certain obsolete ordnance for ornamental purposes, with Senate amendments, which were read.

Mr. HULL of Iowa. Mr. Speaker, I move that the House concur in the Senate amendments.

The question was taken, and the motion was agreed to.

REPORTS OF HOSPITAL FOR FOUNDLINGS.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill S. 8520.

The bill was read, as follows:

A bill (S. 8520) requiring reports of the Hospital for Foundlings to be made to the Commissioners of the District of Columbia.

Be it enacted, etc., That section 4 of "An act incorporating a hospital for foundlings in the city of Washington," approved April 22, 1870 (16 Stat., p. 92), which provides that "it shall be the duty of the president and directors to report to the Secretary of the Interior the condition of said institution on the 1st day of July in each year," is hereby amended by substituting the words "Commissioners of the District of Columbia" for the said words "Secretary of the Interior."

The SPEAKER. Is a second demanded?

Mr. SIMS. I demand a second.

The SPEAKER. Under the rules a second is ordered.

Mr. SIMS. Mr. Speaker, I will state that I have demanded a second simply so that if any person wanted opportunity to have the bill explained I would be able to yield to them.

Mr. SMITH of Michigan. Mr. Speaker, this bill provides that the report be made to the Commissioners of the District instead of to the Secretary of the Interior. The Secretary of the Interior has twice made a report that they had nothing to do with this institution, and for that reason this request is made. I yield to the gentleman from Vermont to make a request.

Mr. FOSTER of Vermont. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. FOSTER of Vermont. Mr. Speaker, I rise for the simple purpose of placing in the RECORD my report in connection with House joint resolution No. 257. In this connection it is but proper that I should say that the body of the report is an article prepared by Hon. Henry W. Hill, of Buffalo, N. Y. This article was prepared by Mr. Hill with so much care and is so full of historic interest that I took the liberty of incorporating it in full in the report. This statement is due to Mr. Hill, and I am glad to make it. The report is as follows:

[House of Representatives, Report No. 2169. Sixtieth Congress, second session.]

TERCENTENARY CELEBRATION OF DISCOVERY OF LAKE CHAMPLAIN.

Mr. FOSTER of Vermont, from the Committee on Foreign Affairs, submitted the following report, to accompany H. J. Res. 257.

The Committee on Foreign Affairs, to whom was referred House joint resolution 257, submit the following report:

In the month of November, 1906, a joint resolution for the appointment of a commission for the celebration of the three hundredth anniversary of the discovery of Lake Champlain was adopted by the senate and house of representatives of the State of Vermont, containing the recital that—

"Whereas the discovery of Lake Champlain was an event in history fully as important as many others that have been recognized by various States as well as by the National Government; and

"Whereas the three hundredth anniversary of such discovery will occur on July 4, 1909, it is hereby

"*Resolved by the senate and house of representatives*, That this event should be observed in a fitting manner and bring about an observance commensurate with its importance, there is hereby provided a commission, consisting of the governor, who shall be chairman ex officio, and six other members to be appointed by the governor before January 1, 1907, one of whom shall act as secretary. Said commission is hereby empowered to adopt such measures as in its judgment may be reasonable or necessary to bring about the fitting observance of such event. And as the interests of the State of New York and of the Dominion of Canada are allied with those of Vermont in such observance, it is hereby recommended that said commission confer with the proper authorities of New York and Canada to ascertain what action they, or either of them, will take with Vermont in making the observance of this event successful and a credit to all, and that the commission report the result of such efforts, together with its recommendations, to the general assembly of 1908"—

which resolution was approved by Governor Fletcher D. Proctor on November 15, 1906; and thereafter Governor Proctor appointed as members of such commission Walter E. Howard, of Middlebury; Horace W. Bailey, of Newbury; R. W. McCuen, of Vergennes; Lynn M. Hays, of Essex Junction; Walter H. Crockett, of St. Albans; M. D. McMahon, of Burlington; and thereafter, on April 15, 1907, on motion of Senator Henry W. Hill, of Buffalo, the senate of the State of New York adopted the following resolution, which was concurred in by the assembly on April 16, 1907:

"Whereas the discovery of Lake Champlain by Samuel Champlain on July 4, 1609, antedates the discovery by the whites of any other portion of the territory now comprising the State of New York, and was an event worthy of commemoration in the annals of the State and Nation; and

"Whereas the State of Vermont in 1906 appointed a commission, consisting of the governor of that State and six other commissioners, to confer with commissioners to be appointed on the part of New York and the Dominion of Canada, to ascertain what action, if any, ought to be taken by such States and the Dominion of Canada for the observance of such tercentenary: Therefore

"*Resolved (if the assembly concur)*, That a commission consisting of the governor, who shall be chairman ex officio, two citizens to be designated by him, the lieutenant-governor, the speaker of the assembly, two senators to be designated by the lieutenant-governor, and two members of the assembly to be designated by the speaker, be appointed to represent the State of New York at such conference, with power to enter into negotiations with the commissioners representing the State of Vermont and those representing the Dominion of Canada for the observance of such tercentenary, and that such commission report the results of their negotiations, together with their recommendations thereon, to the legislature of 1908."

The New York commission appointed under the foregoing resolution consisted of Governor Charles E. Hughes, Lieutenant-Governor Lewis Stuyvesant Chanler, Senators Henry W. Hill and John C. R. Taylor, and Assemblymen James W. Wadsworth, jr., speaker of the assembly, Alonson T. Dominy, James A. Foley, and Frank S. Witherbee, and John H. Booth.

That commission, together with the Vermont commission, during the summer of 1907, made a tour of Lake Champlain, held several joint and separate meetings, and the New York commission formulated its report and transmitted it to the New York legislature of 1908, a copy of which is annexed hereto, in the conclusion of which report they recommended as follows:

SIGNIFICANCE OF THE ANNIVERSARY OF 1909.

"Your commission respectfully submit the foregoing report to the consideration of the legislature of New York. The anniversary which we desire shall be suitably observed has great significance. Important as it is to the student of history, it makes a wider and stronger appeal to that large body of our citizens whose forefathers fought in the wars of the Champlain region or were among the pioneers who transformed it from the wilderness.

"But chief of all the considerations which we urge upon your attention is the international character of the proposed celebration. The history of the Champlain Valley belongs to the history of three great nations, whose cordial relations we believe will be promoted by the suitable observance of this significant date.

RECOMMENDATION.

"To that end your commission, after careful investigation, reaches the conclusion that the three hundredth anniversary of the discovery of Lake Champlain should be suitably celebrated by New York State; and to that end we respectfully recommend the enactment of the following bill."

Thereafter a bill was prepared and submitted to the legislature, which was amended in some respects, and subsequently enacted and became chapter 149 of the New York Laws of 1908, providing in substance for a celebration of the tercentenary of the discovery of Lake Champlain by Samuel Champlain in the month of July, 1609, which celebration, by the terms of the bill, is to occur in the month of July, 1909, at various points in the Champlain Valley.

The commission appointed thereunder consisted of H. Wallace Knapp, Mooers, N. Y., chairman; Henry W. Hill, of Buffalo, secretary; Walter C. Witherbee, Port Henry, treasurer; James J. Frawley, New York City; James Shea, Lake Placid; James A. Foley, New York City; John H. Booth, Plattsburg; John B. Riley, Plattsburg; Louis C. Lafontaine, Champlain; Howland Pell, New York City.

This commission was empowered under the last-mentioned statute to enter into negotiations and cooperate with the State of Vermont, the Government of the United States, the Dominion of Canada, and the Province of Quebec, and either or all of them, in such tercentenary celebration, and appropriated by chapter 466 of the New York Laws of 1908 the sum of $50,000 for that purpose.

The Vermont commission made its report to the legislature of Vermont, held in the fall of 1908, also recommending, among other things, that a proper celebration be held in conjunction with the State of New York, the Government of the United States, and the Dominion of Canada, a copy of which report is annexed hereto. Subsequently the State of Vermont made an appropriation of $25,000 to enable that State to participate in the tercentenary celebration.

The commission appointed thereunder consisted of Governor George H. Prouty, chairman; Lynn M. Hays, of Burlington, secretary; Walter H. Crockett, of St. Albans; Rev. John M. Thomas, of Middlebury; Horace W. Bailey, of Rutland; W. J. Van Patten, of Burlington; Frank L. Fish, of Vergennes; Arthur L. Stone, of St. Johnsbury; and F. O. Beaupre, of Burlington.

The facts warranting federal appropriation are briefly set forth in the report of the New York and Vermont commissions, and in amplification thereof the following additional facts are respectfully submitted to the consideration of the President and the Congress of the United States:

Long before its discovery by Samuel Champlain, in July, 1609, Lake Champlain was the resort and battle ground of the savage Algonquin, Huron, and Iroquois nations who peopled its islands and circumjacent beautifully shaded and picturesque shores. It was a paradise for the aborigines, whose native customs and adventurous but precarious life were a startling revelation to such an explorer as Champlain, coming as he did from the refinements of French life of the sixteenth and seventeenth centuries. Still, he was hospitably received and escorted to and through the lake, then known as "Caniaderiguarunte," which signifies the "gate of the country." The lake was also known as "Mer des Iroquois," and traversed by the warring Indian tribes, whose canoes formed picturesque flotillas in those early days on the blue waters of the lake.

Had Champlain been gifted with the poetic imagination of a Homer or a Virgil, he might have cast into an epic the story of his explorations and discoveries, which were quite as thrilling as those of the Iliad, the Odyssey, or the Æneid. Other poets have dwelt upon the beauties of this lake and have sung of the tragic events that have occurred on its waters.

The Champlain Valley is one of the historic portions of the American Continent. Its Indian occupation was succeeded by that of the French, and in turn by the English. From its discovery, in July, 1609, to the battle of Plattsburg, in September, 1814, Lake Champlain was the thoroughfare of many expeditions and the scene of many sanguinary engagements. Noted French, British, and American officers visited it and stopped at its forts, from St. Anne on the north, founded at Isle La Motte in 1665, to St. Frederic, founded in honor of the French secretary of foreign affairs, Frederick Maurepas, by Marquis de Beauharnais, governor-general of Canada, at Crown Point in 1731, and Fort Carillon, founded at Ticonderoga in 1766, on the south.

The grants of some of its islands and adjacent shore lands under French seigniories were the subject of a long conference between the French and British Governments, challenging on the one side the consideration of such officials as Marquis de Beauharnais and others under Louis XV and Louis XVI, and on the other side such statesmen as Lord Dartmouth, Edmund Burke, and Sir Henry Moore under the British Crown. But few, if any, occupations were made under French seigniorial grants, and the controversy finally ended after the Seven Years' French and Indian war, which terminated with the capture of Ticonderoga and Crown Point by the British in 1759, and the later sovereign control by the Americans during the Revolution.

The Champlain Valley was the scene of important military and one naval engagement during the Revolutionary war, and permission has been obtained from the War Department to raise from the waters of Lake Champlain the *Royal Savage*, at Valcour Island, the flagship of Benedict Arnold during that engagement. The history of Ticonderoga and Macdonough's victory at the battle of Plattsburg, in September, 1814, are of such national importance as to merit federal consideration during the forthcoming celebration of the discovery of the lake.

For two hundred years or longer the Champlain Valley was the highway between Albany on the south and Quebec on the north, through which surged the tides of war and travel, until every prominent point and important island in the lake was marked by some notable event worthy of historic mention. The proposed celebration of the discovery of the lake will commemorate some of these important events. Sewell

S. Cutting, D. D., in a poem read at the University of Vermont in 1877, thus describes some of these events. He says:

I shift my theme, nor yet shall wander far;
My song shall linger where my memories are.
Dear Lake Champlain! Thou hast historic fame—
The world accords it in thy very name.
Not English speech these savage wilds first heard,
Not English prows that first these waters stirred;
Primeval forests cast their shadows dark
On dusky forms in craft of fragile bark,
When first the paleface from the distant sea
Brought hither conquering cross and fleur-de-lis.
On frowning headlands rose the forts of France—
Around them villages, and song, and dance.
Four generations came and passed away,
Of treacherous peace and sanguinary fray,
When hostile armies hostile flags unfurled,
To wage the destiny of half the world.

No part of the United States can vie in comparison with Lake Champlain and its environs for historic importance and the ultimate significance of the national and international events occurring in that valley. "Every bay and island of the lake and nearly every foot of its shore have been the scene of some warlike movement—the midnight foray of the predatory savage, the bloody scout of frontier settlers, the rendezvous of armed bands, or the conflict of contending armies." These stirring events cover a period of centuries—from the traditional history of the Indians to the close of the war of 1812.

From the earliest periods of settlement in Canada, New England, and New York the valley of Lake Champlain, both as watercourse or highway, served as a thoroughfare by which, in hostile times, predatory excursions were directed against both the French and English frontiers, and over which captives were conveyed into unenviable captivity. This was the route traversed by delegations engaged in diplomatic relations between the French and English colonists, and was used by agents employed to arrange an exchange of captives. The valley was a highway of commerce, particularly in the operations of the fur trade. Its Indian name, meaning "door of the country," was an apt designation, for into it there marched the flower of contending armies of France, England, and the United States, who struggled persistently for its control. The destinies of the United States and Canada and of England's colonial policy were largely decided by what occurred in the Champlain Valley.

An unjust historical perspective is often created by placing too high value upon the significance of figures. Large armies do not always count for as much in their influence upon the course of the world's history as events more hidden from view and surrounded with less of glamour. The one more easily bewitches the eye, but the other is more likely to appeal to reason. The history of the Champlain Valley exhibits in relief momentous martial and naval engagements and in intaglio the deeds of individuals and collections of men pregnant with far-reaching results in the evolution of the continent of North America.

Samuel Champlain laid the foundations of New France at Quebec in 1608, and in 1609 led an expedition into the Richelieu River, accompanied by a retinue of Algonquian and other Canadian Indians. At the falls of Chambly he abandoned the vessel in which he had sailed, and by portaging and canoeing reached the entrance of a great lake, which he named Lake Champlain. Its confines constituted one of the hunting grounds of the well-organized Iroquoian Confederacy. The Iroquois were then at great enmity with the Algonquians and the Canadian Hurons.

On the night of July 29, 1609, Champlain fell in with one of the hunting parties of the Iroquois. They spent the night in parleying and uttering defiance at one another, and on the morning of July 30 the now well-known battle of Champlain took place at or near the site of Ticonderoga, as is generally believed by the best historians. The significance of this battle is attested by the alienation of the Iroquois from the French and their affiliation with the Dutch and English, and was one of the embryonic factors which, under development, ultimately saved northern New York and a large contiguous territory to English instead of French interests.

France claimed the region by right of discovery, but England sought to repress her by the limitations of treaty. In 1731 France violated the compact of peace by the erection of Fort St. Frederic on the peninsula, known better as "Crown Point." The Iroquois, as claimants of territorial ownership, in June, 1737, protested against the French occupation. In 1739 the French commandant promised the Iroquois that France would not encroach or settle south of Fort St. Frederic, but he claimed for his king all the watershed of the St. Lawrence, inclusive of Lake Champlain and Lake George. In 1742 the fort, having been enlarged, was the strongest work held by the French in Canada—Quebec and Louisburg only excepted. The five years' war, familiarly known as "King George's war," involved the subjects of France and England in conflict, both in Europe and in America. A nominal peace was established by the treaty of Aix-la-Chapelle, in 1748. But soon the Acadian and other boundary contentions between the two Crowns were in ferment.

France practiced subtlety in her diplomatic negotiations, strengthened her frontier posts, and inoculated her Indian allies with hatred of her English colonial neighbors. In 1755 she built Fort Carillon, afterwards Ticonderoga, and thus advanced her outposts. Henceforth, and in a seven years' war, Fort Carillon and Ticonderoga bore the brunt of frontier aggrandizement. In August of that year Dieskau occupied Crown Point with 700 regulars, 1,600 Canadians, and 700 Indians. In 1756, 2,000 men of France were engaged on Fort Carillon; in 1757 it was garrisoned with 9,000 men under the Marquis de Montcalm. On July 8, 1758, Abercrombie, with regulars and provincials, unsuccessfully stormed its works and lost nearly 2,000 men. In the same year Robert Rogers, the intrepid ranger, lost 125 out of a total of 180 men. Upon the evacuation of the region by the French in 1759 General Amherst took possession of Ticonderoga in July, and of Crown Point in August. In 1760 Amherst assembled an army of 15,000 men at Crown Point, and in August of that year Colonel Haviland, with about 3,300 men, opened fire upon the French post at Isle aux Noix, forced the French commander, Bourlamaque, to withdraw, and captured the garrison that remained behind.

For a time after the treaty of Paris, in 1763, the region rested in comparative quiescence. England's acquisition by treaty of the vast domain of Canada eradicated the long-standing imbroglios with France in North America; but the intercolonial wars had schooled the English-American colonists in the arts of prowess and of war. The colonists also had greater freedom to consider internal interests, being now relieved from the erstwhile collisions with the French. A narrow colonial policy lent itself toward the growth of a spirit of resentment in the colonies, and England's determination to enforce obedience to her will by the employment of military authority served only to fan the slumbering embers into a conflagration. It was under these conditions in May, 1775, that the audacious Ethan Allen, accompanied by only about 83 men, surprised the English garrison at Fort Ticonderoga, and that Seth Warner took Crown Point, in each case without bloodshed. When De la Place, the English officer at Ticonderoga, asked Allen by what authority he demanded the fort's surrender, he replied with those now memorable words: "By the authority of the Great Jehovah and the Continental Congress." The personality of Allen was and is yet a subject of academic controversy, but his action in this affair is a landmark in the romantic history of America.

Benedict Arnold has been execrated for his treason to his country, yet his name is connected with one of the greatest of patriotic services during the American Revolution. On October 11, 1776, he engaged in an extraordinary naval battle on Lake Champlain against the overwhelming odds of the British fleet under Sir Guy Carleton. This battle is in our naval annals of the Revolution what Bunker Hill is to our military history—"a battle wherein glory and renown were gained in defeat." Spears, the naval historian, has characterized it thus: "Not only was the moral effect of this battle quite as great in the courage it gave the Americans, and the pause for thought it gave the enemy; it served to head off a victorious invading British army bound for Albany and the subjugation of northern New York. It taught the British that the Americans were not only willing, but they were able fighters. In spite of the tremendous odds against them, at the last they had proved themselves as unyielding as the rocks that echoed back the roar of the conflict."

Burgoyne made an unsuccessful attack upon the American occupants of Fort Ticonderoga in June, 1777, but with 7,000 men had forced the abandonment of Crown Point in that month; and in July, having erected a battery on Mount Defiance, which commanded Fort Ticonderoga, forced the Americans to evacuate it on the night of the 6th. The termination of the American Revolution, save for internal controversies between New York and Vermont, ended the storm and stress period in the Champlain Valley for many years, until our second war with Great Britain.

From September 6 to 11, 1814, various land engagements took place about Plattsburg. The British forces, numbering about 11,500 troops and including many of Lord Wellington's veterans, were under Sir George Prevost, governor and commander in chief in British North America; the Americans, commanded by Macomb and Bissell, numbered 4,500 men. On September 11, 1814, the American Navy on the lake, commanded by Thomas Macdonough, defeated the British squadron under the command of Commodore George Downie. This naval battle was crucial in bringing the war of 1812 to a termination. The success was acclaimed by the American people everywhere by rejoicing, bonfires, and illuminations, and was sung in the folk and war ballads of the day. Congress recognized its national significance by officially thanking the whole force engaged, and by voting gold medals to Macdonough, Henley, and Cassin, and a silver medal to each of the other commissioned officers. In this victory the United States gained prestige for the demands of the treaty of peace, and an estoppel was put upon England's endeavor to get possession of the northeast corner of the State of Maine.

If the lake itself was the door of the whole northern country, Larrabee's Point, on the Vermont side, opposite Fort Ticonderoga, was a side door to New England, and from that side door the New England frontiers suffered repeatedly the havoc of Indian devastations. But there are other places, besides those hitherto mentioned, whose historic associations are inseparable from a narration of the landmarks of the Champlain Valley. At Burlington, Vt., the first steamboat on the lake was launched in 1808 and bore the name of that State. This was only a year after Fulton's steamer, the *Clermont*, first plied the Hudson from New York to Albany. Shortly thereafter, during the period of our second war with Great Britain, Burlington was a garrisoned post and a base of supplies.

On the Isle La Motte (named from Pierre de St. Paul, sieur de la Motte-Lussiere, a captain of the famous Carignan regiment), the French built a fort in 1666, which was named Ste. Anne, and in July of that year, while garrisoned by several companies of the regiment above alluded to, was invested by hostile Mohawks, whose depredations included the death of Captains de Traversy and de Chazy. In October, 1666, M. de Tracy, governor-general of New France, guided and assembled an expedition on the Isle La Motte for the purpose of chastising the Iroquois. Twelve hundred combatants, borne by a fleet of 300 bateaux and canoes, and strengthened by two pieces of artillery, were engaged. They penetrated to the remotest hamlets of these Indians and planted the arms of France, in token of taking formal possession of the whole northern part of New York. The French remained undisturbed from the Mohawks for nearly a quarter of a century. Fort Ste. Anne became a Jesuit mission station, and was visited by Bishop Laval in 1668. In August, 1690, Capt. John Schuyler camped there during his return from a foray into Canada. Gens. Philip Schuyler and Richard Montgomery met on the island in September, 1775, during their advance against St. Johns and Montreal, and laid there the plans for that invasion of Canada. Now the shrine of Ste. Anne, on the west side of the island, is visited annually by thousands of devout pilgrims.

Maj. Robert Rogers and 142 men came into Missisquoi Bay in the autumn of 1760, secreted their boats and some provisions, and went off on an expedition against the St. Francis Indians, near the village of Three Rivers, which they burned. Earlier in that year this same intrepid ranger had landed at the place called Rouses Point, near which he was attacked by a superior body of French from the Isle aux Noix. The French were defeated and their commander was slain.

Swanton, in Vermont, at an early period formed a considerable settlement of the French and Indians, being then "probably the largest in the Champlain Valley with the exception of Crown Point." At the mouth of Otter Creek, the largest river in Vermont, where Fort Cassin was built, the American squadron was fitted out in 1814 for battle against the English navy. This fort was named for Lieutenant Cassin of our navy, who, with Captain Thornton of the United States Artillery, in May, 1814, had defended the American fleet then building there from attempted destruction by the British.

A little to the north of Rouses Point are the ruins of Fort Montgomery, built by error in what was then Canadian soil, and often called on that account "Fort Blunder," but corrected by international boundary concessions. Rouses Point is a place of commercial interest and the most important port of entry on this frontier. Near by is Point au Fer, fortified in 1776 by the patriot General Sullivan, but occupied by the British in June of the next year and relinquished by them only as late as 1788. At Valcour Island, off Bluff Point and Hotel Champlain, the scene of Arnold's naval battle of 1776, the wreck of the *Royal*

Savage lies under water to this day as a reminder of the beginnings of our national naval adventures. At the head of the lake to the south, near the present Whitehall, Maj. Israel Putnam, in August, 1758, was engaged in watching the enemy's maneuvers, and had a fierce encounter in the forest with French and Indians. He was captured, tied to a tree by the Indians, who made preparations to roast him alive. Only the stern interposition of the French officer, Marin, prevented them from dispatching him thus cruelly and robbing the patriot cause of one of its bravest leaders during the American Revolution.

The New York and Champlain commissions have concluded contracts with Mr. L. O. Armstrong, of Montreal, to present Indian pageants on Lake Champlain during the tercentenary celebration. These will be presented by 150 native Indians, descendants of the original tribes that occupied portions of the Champlain Valley at the time of its discovery by Champlain. They will reproduce the battle of Samuel Champlain with the Iroquois, and also present a dramatic version of Longfellow's Hiawatha on floating barges anchored on the waters of the lake at various places where exercises are to be held.

It is desirable that the United States detail national troops and the States of New York and Vermont regiments from the national guard to present military pageants at Ticonderoga, Plattsburg, and Burlington. The two commissions have decided to hold formal exercises on July 5, 1909, at Crown Point, on July 6 at Fort Ticonderoga, on on July 7 at Plattsburg, on July 8 at Burlington, and on July 9 at Isle La Motte, at each of which places Indian pageants will be presented.

The proposed celebration of the discovery of Lake Champlain may also include a celebration of such colonial, national, and international events occurring since the discovery of the lake as to make it eminently proper that the Government of the United States officially participate in the exercises commemorating these historical events. Historical addresses and other literary exercises are to be held, and it is important that the United States Government invite and entertain representatives of the Republic of France, the Kingdom of Great Britain, and the Dominion of Canada. The celebration is of national and international importance, and the committee recommends that the resolution do pass.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken, and the motion was agreed to and the bill was passed.

WASHINGTON HOME FOR FOUNDLINGS.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill (S. 8187) to change the name of the Washington Hospital for Foundlings.

The bill was read, as follows:

Be it enacted, etc., That the act entitled "An act for incorporating a hospital for foundlings in the city of Washington," approved April 22, 1870, be, and the same is hereby, amended by changing the name of said institution to the Washington Home for Foundlings.

The question being taken, the rules were suspended and the bill passed.

WALTER F. ROGERS.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill (S. 6852) for the relief of Walter F. Rogers, executor of the estate of Sarah Edwards, late owner of lot No. 116, square No. 628, Washington, D. C., with regard to assessment and payment of damages on account of changes of grade due to construction of the Union Station, District of Columbia.

The SPEAKER. Is that bill on the Private Calendar?

Mr. SMITH of Michigan. Yes.

Mr. MANN. Oh, well, Mr. Speaker, is it the intention to request the passage of bills on the Private Calendar?

The SPEAKER. No; the Chair supposed it was business in order on District day.

Mr. SMITH of Michigan. It seems to me it is business in order. It is on the Private Calendar, and if there is any objection, I will withdraw the bill.

The SPEAKER. Would it be in order on Monday, an ordinary District day?

Mr. SMITH of Michigan. Yes; it seems to me it would. That is my understanding.

The SPEAKER. Does the gentleman recollect any private bills being passed on District day?

Mr. MANN. The gentleman's bill would be reached in regular order anyway—a Senate bill on the calendar.

The SPEAKER. The Chair has no recollection of the Private Calendar being considered on District day.

Mr. SMITH of Michigan. Then I withhold the bill for a moment——

The SPEAKER. The gentleman withdraws his motion?

Mr. SMITH of Michigan. Yes.

The SPEAKER. The bill is withdrawn.

PENSIONERS OF THE METROPOLITAN POLICE FUND.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 23973) for the relief of pensioners of the Metropolitan police fund.

The SPEAKER. Is that on the Union Calendar?

Mr. SMITH of Michigan. Yes.

The SPEAKER. The gentleman from Michigan moves to suspend the rules, discharge the Committee of the Whole House on the state of the Union from the further consideration of the following bill, and pass the same.

Mr. MANN. Mr. Speaker, this bill is on the House Calendar, although it ought to be on the Union Calendar.

The SPEAKER. It has been transferred to the Union Calendar.

The bill was read, as follows:

Be it enacted, etc., That the amount withheld from pensioners of the police fund on account of deficiencies in said fund during the period from June 1, 1894, to May 31, 1896, is authorized to be paid, and the Commissioners of the District of Columbia are hereby authorized and directed to adjust and settle all claims for said deficiencies in the payment of allowances made by them to pensioners of said police fund, and report to Congress their conclusions for consideration. In case of death of any beneficiary under the provisions of this bill the amount due such beneficiary shall be paid to the legal representatives thereof.

With the following amendment:

Strike out of lines 10 and 11, page 1, the words "and report to Congress their conclusions for consideration," and insert a period after the word "fund," in line 10.

The SPEAKER. Is a second demanded?

Mr. SIMS. I demand a second.

The SPEAKER. A second is ordered.

Mr. SMITH of Michigan. I yield to the gentleman from Massachusetts [Mr. KELIHER].

Mr. KELIHER. Mr. Speaker, this bill is to appropriate money from the treasury of the District of Columbia to meet an obligation of long standing on account of the failure to pay amounts due from the police pension fund because of depleted condition of that fund between June 1, 1904, and May 31, 1906.

Prior to 1885 there was no authorized police pension fund in the District. The members of the force made up a fund from voluntary contributions on the part of members. They also held police picnics, they sold abandoned property, and the money derived from these sources was turned into a fund which was sufficient to meet all claims for pensions made against it until 1894.

In a period running from June, 1894, to May, 1896, there occurred a deficiency totaling over $16,000, and in 1896, in order to preclude a repetition of such deficiency, Congress passed an act authorizing the turning into that fund of the money from the sale of dog licenses in the District, and later on, in 1901, it passed another act increasing that fund by diverting such part of the money that comes from the fines imposed in the police court. Now, within the time I mentioned, from June, 1894, to May 30, 1896, the fund was, as I said, not sufficient to meet the drafts made upon it for the purposes for which it was provided, and a deficiency of $16,000 resulted, made up of sums that ranged from $20 to $300 or $400.

Mr. FINLEY. Will the gentleman yield?

Mr. KELIHER. Yes.

Mr. FINLEY. Do I understand the gentleman to say that on account of legislation depleting or reducing the fund which otherwise would have been sufficient for the purpose there arose this deficiency?

Mr. KELIHER. No; I mean to say that Congress recognized the desirability of providing a pension fund, and it compelled the deduction of $1 a month from policemen's pay and authorized the use of the dog-license money, and so forth; but that scheme, not being scientifically devised, resulted in a deficiency. Now, it is to pay up that deficiency that resulted in those years that this measure is offered.

Mr. FINLEY. That was done by act of Congress.

Mr. KELIHER. Yes.

Mr. HARRISON. Will the gentleman yield?

Mr. KELIHER. Certainly.

Mr. HARRISON. Does the gentleman know of any semi official means being employed to make up the police fund?

Mr. KELIHER. The "gentleman from Massachusetts" has no knowledge of any other means by which the police fund is made up other than the compulsory deduction from the policemen's salary, the money from the collections from the dog licenses in the District, and a sufficient part of the sum that comes from the fines imposed in the police court. These make this fund a practical working one to-day.

Mr. HARRISON. Has not the gentleman heard anything about a scheme that has been operated around the District whereby certain men representing themselves as collectors for the police pension fund have foisted on an unsuspecting individual, for $25, the so-called "official history of the police department," worth about $2, at a liberal calculation?

Mr. KELIHER. The "gentleman" has no knowledge of any such thing happening, and I am sorry to learn that anybody in the District is gullible enough to purchase such a work.

Mr. HARRISON. One of the commissioners has informed me that the scheme has the semiofficial patronage of that body, and that one-third of it is turned into the police pension fund.

Mr. KELIHER. Such a scheme ought to be prohibited. From From my understanding the sources of supply to the present fund are ample to supply its purposes, but the proposition contained in the pending measure applies directly to a condition which existed many years ago and aims to meet an obligation of the District which is fifteen years old—to pay what is due to the widows and the children of these policemen. It is an obligation, and I want to quote the statement of Auditor Petty of the District, who said of a similar bill:

This amount is the difference between what the Government promised to give and that which it actually paid, and is therefore an undeniable debt of honor.

Mr. Speaker, this bill has the approval of the three commissioners of the District; it is approved by the auditor of the District, and it seems to me that it ought not invite any opposition. Congress recognized the necessity for provision of such a fund; and simply and solely because the scheme in operation was inadequate to meet the obligation that Congress wished to fulfill, because the scheme was not scientifically devised and did not sufficiently meet requirements, we ask that $16,711 be appropriated out of the treasury of the District. I might add, Mr. Speaker, that there are moneys every year coming from the police fines beyond the amount required to supply this pension fund that are covered back into the treasury. As I said at the start, the amount is only $16,000, and as it has the indorsement of everybody who has officially to do with the matter, I hope there will be no opposition to it on the floor.

Mr. SIMS. Mr. Speaker, I was not on the subcommittee that investigated the matter, but the gentleman from Massachusetts was the minority member of that committee. I demanded a second for the purpose of yielding to any gentleman who might wish to oppose the bill. If there is no one who wishes to oppose the bill I will not occupy any further time.

The SPEAKER pro tempore (Mr. PARKER). The question is on suspending the rules and agreeing to the amendments and passing the bill.

The question was taken, and the rules were suspended, and the bill was passed.

ROAD ON THE BANK OF ANACOSTIA RIVER.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules, discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill (S. 671) to construct a road along the south bank of the Anacostia River, and pass the same.

The Clerk read the bill, as follows:

Be it enacted, etc., That within ninety days after the passage of this act the Commissioners of the District of Columbia be, and they are hereby, authorized and directed to institute proceedings to condemn the land that may be necessary for a road along the Anacostia River beginning in Glesboro Manor near the center of Omaha street extended and on the right of way of the outfall sewer; thence northeast along or near the line of said outfall sewer to the grounds of the Government Hospital for the Insane, connecting through the grounds adjacent to said hospital as hereinafter provided; thence from the north side of said grounds through the Barry farm northeastwardly and adjacent to the southwest side of the Alexandria branch of the Baltimore and Ohio Railroad to Howard avenue; said right of way to have a width of 90 feet south of the hospital grounds and to have a width of 60 feet through the Barry farm; the said proceedings to be had under and in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia: *Provided, however,* That one-half of the amount found to be due and awarded as damages for and in respect of the land condemned for the said road, together with the costs and expenses of the proceedings, shall be assessed by the jury as benefits, under the provisions of section 491g of said subchapter 1 of chapter 15 of said Code of Law.

SEC. 2. That the Secretary of War is hereby authorized and directed to open for use as a public thoroughfare a 90-foot strip of land from 35 to 100 feet westward of the right of way of the Alexandria branch of the Baltimore and Ohio Railroad Company through the grounds adjacent to the Government Hospital for the Insane, said strip to be hereafter under the control of the Commissioners of the District of Columbia.

SEC. 3. That the sum of $600 is hereby appropriated, one half out of the revenues of the District of Columbia and the other half out of any money in the Treasury not otherwise appropriated, to provide the necessary funds for the costs and expenses of the condemnation proceedings taken pursuant hereto, and a sufficient amount to pay for the land taken hereunder is hereby appropriated, one-half to be paid out of the revenues of the District of Columbia and one half out of any money in the Treasury not otherwise appropriated.

The SPEAKER pro tempore. Is a second demanded?

Mr. SIMS. I demand a second.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. SIMS. I certainly am.

The SPEAKER pro tempore. A second is ordered. The gentleman from Michigan is entitled to twenty minutes and the gentleman from Tennessee to twenty minutes.

Mr. SMITH of Michigan. Mr. Speaker, I yield such time as he desires to the gentleman from New York [Mr. OLCOTT].

Mr. OLCOTT. Mr. Speaker, this is a bill that has already passed the Senate. It is in accord with the general system for the development of that part of the District. It was first objected to, I would say, by the Secretary of the Interior, also by the superintendent of the insane asylum, on the ground that it might possibly do some damage to that institution, but since then the plan has been changed to some extent, and the Secretary of the Interior and the superintendent of the asylum are anxious and desirous that the bill should pass. The commissioners recommend its passage strongly. There is considerable of a settlement about there, and the people will be enabled to use the road to their several destinations, which will be something like 2 miles instead of 7, as they have to travel now. As far as I can find out, it would be advantageous to a great many people and it would be disadvantageous to none.

The commissioners are desirous of the bill passing, the Secretary of the Interior desires it, the superintendent of the hospital is not averse to it, and a steel manufactory that makes a great many of the projectiles for the United States Army will be able to bring their product and to carry their supplies in a direct and easy way, instead of by a circuitous and hilly, if not mountainous, road. There is no possible objection to the bill, and I hope it can be passed.

Mr. SULZER. How much will this improvement cost?

Mr. OLCOTT. Mr. Speaker, the cost for condemnation proceedings is limited by the bill to $600, and the estimate of the commissioners is that the property to be taken by condemnation will cost $15,000.

Mr. SULZER. And the people generally are in favor of it?

Mr. OLCOTT. Yes; and the people will pay for it, except in so far as it goes through government land. I reserve the balance of my time.

Mr. SIMS. Mr. Speaker, this is a bill to authorize the construction of a road or a street 90 feet wide away over beyond the asylum grounds, contiguous to a gun factory down there, a manufacturing institution, and to bring those people into the city of Washington. The object of this bill is indirectly to bring about in this District that which should never be brought about, and that is to make it the home of manufacturing concerns. The taxes in the District of Columbia are less than in any city of the United States. Manufacturers would like to come here and bring their laborers, and get them out from under the control of the state laws, and place them where the President and the army and the navy have control, where any kind of labor trouble that comes along may be dealt with exclusively by the military authorities of the United States.

To pass such bills here is to encourage manufacturers to come to the District, to fill up all the outlying space around here where the Government of the United States pays one-half of all expenses, and very soon if that be done we will have another Pittsburg as far as smoke and population is concerned.

Mr. OLCOTT. Will the gentleman yield?

Mr. SIMS. Certainly.

Mr. OLCOTT. Is it not a fact that everything that is manufactured there is used by the Government of the United States?

Mr. SIMS. I do not care who it is used by. It is a factory, a private concern.

Mr. DALZELL. It is there now.

Mr. SIMS. I know it is there, and I do not want any more to come and I do not want to spend money to build streets for factories that do come and locate here. I say there is no need of that road out there, if it was not for that factory. That factory has made it necessary, and it will cost thousands, many thousands of dollars to build and maintain a 90 foot street down there for the benefit of a manufacturing concern that has not come here for any charitable purpose, that has not come here to aid the Government of the United States, but has come here to take advantage of conditions here that exist in no State in the Union. I do not think that we ought to build these streets at vast expense to the Government, to help these factories and indirectly encourage manufacturing in the District, where one-half of the burden of taxation is paid by the people of the United States who do not live here, and where those who do pay here pay it upon a mandatory assessment of only two-thirds of the value of the property.

Mr. MANN. Will the gentleman yield for a question?

Mr. SIMS. Yes.

Mr. MANN. Does the gentleman say that the purpose behind the laying out of this road is to invite manufactures and smoke nuisances and everything of that kind into the District?

Mr. SIMS. The factory came there, and the people who are with it, brought there on account of it, are the people who are asking for this road, and it would never have been asked for if they had not gone there, and they never would have gone there for any other purpose than to escape the laws of the States of the Union and to be there under the eye of the capital and under the care of the military of the United States, the army

and navy, and of Congress; away from all the possibilities that may come about by means of labor strikes or the labor laws of the different States of the Union. That is why it is here, and I am not in favor of taxing the people of my country—my State and yours—to build 90-foot avenues to factories in this District, because others will come and others will have the right to demand the same. We are making a precedent here which will return to plague the gentlemen who come here in after years.

Mr. MANN. Will the gentleman yield for another question?

Mr. SIMS. Certainly.

Mr. MANN. Will the opening of this road be likely to encourage other factories in that locality?

Mr. SIMS. Oh, it is not a matter whether it is in that locality or not; they can put them up in some other locality and come here to Congress and make a similar request.

Mr. OLCOTT. Will the gentleman yield?

Mr. SIMS. Certainly.

Mr. OLCOTT. Does not the gentleman think, because I know he is familiar with the locality——

Mr. SIMS. In a general way.

Mr. OLCOTT. Does not the gentleman think that entirely apart from the place where the government projectiles are manufactured that that road will be most advantageous in the general road-plan system of Washington and the District of Columbia?

Mr. SIMS. I am not criticising the manner of its laying out, the artistic features of it; but why is it wanted at all? If that factory had not gone there and carried those people there, it never would have been asked for. It is directly the fruit of that factory being placed there.

Mr. OLCOTT. Does not the gentleman know it is a continuation of a street which is now in actual use, which goes to Omaha avenue, and if continued along will make for Anacostia a most desirable roadway in the District——

Mr. SIMS. But we are not here appropriating money to build roads where nobody else except manufacturing plants want them.

Mr. OLCOTT. No; but the gentleman must know, surely, there is a considerable population there in what is known as "Talbot's subdivision."

Mr. SIMS. Perhaps so; but the gentleman will be kind enough to admit that if it were not for the gun factory here this bill would not be here and would not be reported on at all.

Mr. OLCOTT. I am not satisfied as to that. I know perfectly well that the Commissioners of the District of Columbia say that it is a road that would have to be built and one that will unquestionably be needed in the future, as it is needed now.

Mr. SIMS. Some day or other; perhaps that is true. Now, we have declined to authorize the building of 90-foot avenues all over this city, where they have been laid out where there was really any necessity, but where there were no people to speak of——

Mr. OLCOTT. But has not the gentleman supported bills for the building of several large avenues?

Mr. SIMS. Supported them?

Mr. OLCOTT. I think you have before.

Mr. SIMS. No; never authorizing any new ones; if I did, I do not remember them. I am absolutely opposed to building these roads where the people are not demanding it. I want to absolutely discourage the gun factory. I want it to leave here. It is not a public institution; it is not a government institution. You might just as well have a soap factory here 4 or 5 miles away from the center of the city and build them an avenue. Why do we want to fill up this capital with manufacturing plants? Why do we want to bring people here from everywhere by encouraging those who do come here by spending public money to build avenues to their places of location? I do not know anything about the people who have built that gun factory. It is not a personal matter at all, but I do not think that the Representatives of the people who stand here on this floor should encourage this city to become a great manufacturing city.

Why, of course you can do so. You can fill it up. Let them be filled up like other manufacturing towns. Let the people of the locality pay the taxes and build the roads. Does anybody believe a 90-foot asphalted street would have to be built to that location in many years to come if it was not for that factory located there? This is indirectly inviting every manufacturing concern who can get a location in the District of Columbia to come here and be taxed less than anywhere on earth, less than in any State, and the people of the United States pay one-half of the street and other local improvements around it.

Now, why has not this bill been considered in the Committee of the Whole, as it ought to be? No such bill should ever pass under suspension of the rules. It is a bad precedent in the way of legislation. This is a bill of no great public importance. This is not a bill required to be passed in order that the Government may live for six weeks or six months or a year. It is purely a local matter. And yet there are bills on this calendar of a general nature that are not being considered; and a bill that will probably directly and indirectly call for many thousands of dollars is being put through here under suspension of the rules for the benefit of a firm that ought not, in the first place, to be here at all. And conditions should be made so bad for this manufacturing concern that no like concern would ever come here again. I say that it is bad legislation. It is worse to consider it under a motion to suspend the rules. It ought to go over and be considered by the Committee of the Whole, subject to amendment, with sufficient time to discuss it and understand it.

Mr. Speaker, I reserve the balance of my time.

Mr. SMITH of Michigan. Mr. Speaker, I yield four minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Speaker, this bill simply provides for a road into a section of the District of Columbia that is now inhabited by a great number of people that have no direct road. It requires 7 miles of travel over a very rough country to reach that section of the District, and this bill simply provides a roadway that will enable the people to reach that part of the District in about 2 miles. The purpose is to cut off about 5 miles of travel over a rough road and to give the people living there, or who want to go there, an opportunity to get to the same place in a little over 2 miles over a level road.

It is true that the people who live there work in a projectile factory. It is true that they are not department clerks. It is true that they are not clerks in the department stores of Washington or business houses here. But it is just as true that they are men and women who have their homes in the District of Columbia and earn their living at hard labor. They send in to the city for the things they eat and wear, and in order to have a delivery wagon reach them it is necessary now to travel about 7 miles.

Mr. FINLEY. Will the gentleman yield?

Mr. CAMPBELL. I yield to the gentleman from South Carolina for a question.

Mr. FINLEY. About how many people will be benefited or accommodated?

Mr. CAMPBELL. I do not know exactly the number, but there is a large number of people living down there.

Mr. FINLEY. Large is a comparative term. About how many? Five hundred or a thousand?

Mr. CAMPBELL. I should say that there are 300 to 500 people in the immediate vicinity of the end of the road, and then farther up the hillside, in a considerable village, I should say there were two or three thousand people.

Mr. FINLEY. About what will the extension cost?

Mr. CAMPBELL. It is estimated that it will cost about $15,000.

Mr. FINLEY. Is that a reasonable cost, considering the number of people to be accommodated?

Mr. CAMPBELL. It is the only way to accommodate them, I will say to the gentleman.

Mr. FINLEY. I asked the question from the standpoint of practicability. Is the cost reasonable, considering the number of people to be accommodated, in the gentleman's opinion? Of course that is all he can answer.

Mr. CAMPBELL. I should say so. If I lived out there I should think that I, as one of the citizens of that part of the District of Columbia, was entitled to this road. I understand that there are about 400 men employed in that projectile factory. That would make a population of something like 2,000 in connection with that industry, who live at the end of the proposed road. And in addition to that there are a large number of people living at the end of this proposed road. I hope the bill will pass.

Mr. SMITH of Michigan. Mr. Speaker, how much time have I left?

The SPEAKER pro tempore. The gentleman has fourteen minutes left.

Mr. SMITH of Michigan. I yield to the gentleman from Pennsylvania.

Mr. BRODHEAD. Mr. Speaker, for the first time I find myself not in sympathy with my ranking member on the District Committee, the gentleman from Tennessee [Mr. SIMS], whom I consider one of the hardest working and most valuable members of that committee. I am in favor of the passage of this bill. It appears to me to be a proper thing to do to open this road over there in Anacostia. It is in the District of Columbia. There is quite a settlement living at that end of the Dis-

trict, and at the present time they have no adequate means of ingress or egress. Whether that projectile factory was located there or not, it seemed to me a very wise thing for the District of Columbia to be properly opened up and properly developed. It is not altogether right to say that we must wait until a very large number of people live in a particular place in this District before we give them good roads. Nor do I clearly understand it to be the policy of Congress to forbid the erection of manufactories in the District. It may be a good thing to prohibit them; but if it is, the best way to do would be to pass a law directly and absolutely prohibiting their erection. But at the present there is nothing in the law preventing manufacturing establishments coming here, and this particular one referred to is one of the least objectionable. I was one of a small number of the Committee on the District of Columbia to go over to the locality of this proposed road, and I found it exceedingly hard traveling, going uphill and downhill for seven and a half miles to reach the end of the proposed new road, about 3 miles away, and yet most of the time we were traveling one could see where the road ought to be built—that is, on the level, where it is planned. Surely we should not oppose the development of that portion of the District merely because the new road will reach a manufacturing establishment which is now making projectiles for the Government. By the way, it is making them by means of machinery that is worked by electricity, the cleanest manufacturing establishment I ever saw.

The mere fact that this section of the District has an establishment over there now in active operation is no reason why it should not have a road for the people of the District of Columbia as well as for all others who wish to go to this establishment or to this section of the District. I am in favor of the bill.

Mr. SMITH of Michigan. Does the gentleman desire to consume any more of his time?

Mr. SIMS. If you are going to yield to no other person.

Mr. SMITH of Michigan. I do not know that I am.

Mr. SIMS. If you are going to close in one speech?

Mr. SMITH of Michigan. Yes.

Mr. SIMS. Then I will use the rest of my time. How much time have I remaining?

The SPEAKER pro tempore (Mr. PARKER). The gentleman has five minutes.

Mr. SIMS. Now, Mr. Speaker, it is clear from the statement made on this matter that the gun factory when it located there knew that hill was steep; they knew that it was hard to get to the city of Washington, but they were relying upon influences in this House, or perhaps at the other end of the Capitol, to have the Government of the United States expend money to build a 90-foot street in order that they could get their people to the city. This is a private concern; I do not care if it is manufacturing projectiles. We may just as well have a projectile factory because the Government is buying projectiles. We might just as well have an armor-plate manufactory because the Government is buying armor plate; we might just as well have a powder manufactory because the Government buys powder.

Now, the facts are—and you gentlemen who pay so little attention to the business of the House may find that the time may come to annoy you with another Buck Stove and Range case before the courts of the District of Columbia. They are led up to by such measures as this, giving a public street to manufacturers who want to get away from state courts and state jurisdiction, where the judge can not read the riot act every time a laboring man says a word in opposition to monopolists.

Mr. OLCOTT. Mr. Speaker, will the gentleman yield to me?

Mr. SIMS. Certainly.

Mr. OLCOTT. Does the gentleman not know that there were a good many people living in that part of Anacostia before the gun factory ever went there?

Mr. SIMS. I know, and the gentleman knows, that if it had not been for the gun factory this bill would not be here.

Mr. OLCOTT. I know nothing of the kind.

Mr. SIMS. I believe it, and you believe it.

Mr. OLCOTT. I do not believe it.

Mr. SIMS. Who had it come here?

Mr. OLCOTT. The commissioners had it come here, as a commissioners' bill, and they said they ought to have that road.

Mr. SIMS. Oh, well, it makes no difference. The gun factory has been the sole cause of getting that road there. You will put factories all over this District under such encouragement as this. If that gun factory was not there, and the influence of the gun factory was not behind this bill, it would not be here to-day.

Mr. GAINES of Tennessee. Whose gun factory is it?

Mr. SIMS. I do not know and I do not care. It does not belong to the Government. It is a private institution that wants to get under the flag of the United States, in the capital of the United States; where judges are appointed where they do not live and are not responsible to the votes of the people; and will put strikers in prison and put stripes on their bodies when they do not act to suit the preconceived ideas of gentlemen who may occupy those positions in this District. I say, outside of any political matter, do not encourage factories to come here. You do not allow a power plant here to emit black or gray smoke for over one minute. If we build 90-foot avenues to factories in this District, our constituents pay half the bills. Show me another avenue that is being built to-day by public taxation to any other point in the District of Columbia, as far from the center of this city as this is, that will cost $15,000, according to the gentleman's statement, and it will far exceed that, in order to make more valuable private property at public expense. I do not know these gentlemen; I do not know their politics; I do not care anything about it; but we never will do a worse thing in our lives than indirectly to say to every manufacturing concern in this country: "Locate here; get away from your state laws and state courts and state juries. Then your labor laws of your different States will not be worth the paper they are written on. Your eight-hour law will not apply to them here." This is not a government concern, but a private concern.

This is brought up here under a motion to suspend the rules. It ought to be debated three or four hours in Committee of the Whole; and whenever a bill like this is undertaken to be put through at the closing hours of a Congress, on a motion to suspend the rules, it is a very suspicious circumstance, and that, if nothing else, ought to defeat the bill.

Mr. Speaker, I have no personal interest in this matter, but from every standpoint of local and civic pride I am opposed to this bill. I will never consent to this or any other measure like it.

Mr. SMITH of Michigan. Mr. Speaker, how much time have I?

The SPEAKER. Ten minutes.

Mr. SMITH of Michigan. I yield the balance of my time to the gentleman from New York [Mr. OLCOTT].

Mr. OLCOTT. Mr. Speaker, it seems to me that there is a vast amount of undue excitement that has arisen in the mind of the gentleman from Tennessee [Mr. SIMS]. This is a plain proposition, and is as meritorious as any that ever came before us relative to laying out streets. It is merely a question of continuing an already existing avenue for about 2 miles, largely through government land, on a flat surface where a road on a level grade can be properly built, to a place that is fairly populous. In the immediate vicinity of the end of this route there are something like 2,000 people. It is an outlying district, where people of small means can go and live. The laying out of this road is to enable them to go on a level road instead of going up and down a high hill, and to enable them to get to their destination by traveling 2 miles instead of 7.

The possibility of this being for the benefit of supposed manufactories that may sometime come here is to me an absurdity. The only objection that was ever made, when this bill was first introduced some two or three years ago, was from the superintendent of the insane asylum, because he thought it would interfere with the proper care of the insane people in that institution, and the Secretary of the Interior agreed with him. The line of the road has been changed and has been put a little nearer the tracks of the Baltimore and Ohio road. It is laid out through lands belonging to the Government Insane Asylum, which land is worth little, and the line of the road has been so arranged that it will in no way interfere with the institution. The superintendent of the asylum has withdrawn his objection, the Secretary of the Interior has withdrawn his objection; and every one who knows anything about it and who has seen the contour of that land knows that it is an important matter for the people who live at the western terminus of the road that it should be built.

Why, because there happened to be a factory where government projectiles are manufactured, we have all of this demagogic utterance from the gentleman from Tennessee passes my belief. I want to say in connection with the suggestion he made to me that had it not been for this particular factory the road would not have been suggested, he is entirely in error. The Commissioners of the District of Columbia told me that it was a road that should have been built years ago, and the wonder is that it had not been provided for before.

Mr. COLE. Will the gentleman state what kind of a road this is to be?

Mr. OLCOTT. A macadamized road, in connection with the road that runs along the Anacostia River. Mr. Speaker, I ask for a vote on the bill.

The SPEAKER pro tempore. The question is on suspending the rules, discharging the Committee of the Whole House on the state of the Union, and passing the bill.

The question was taken; and the Chair being in doubt, the House divided, and there were 52 ayes and 30 noes.

Mr. SIMS. Mr. Speaker, to save demanding the yeas and nays, I make the point that no quorum is present.

The SPEAKER. Does the gentleman insist on his point of no quorum?

Mr. SIMS. If the gentleman from Michigan, in charge of the bill, will withdraw it for the present until other matters can be taken up, I will withdraw the point of no quorum.

Mr. SMITH of Michigan. I can not do that.

The SPEAKER. The gentleman from Tennessee makes the point that no quorum is present. A number of Members have come in, and the Chair will count. [After counting.] One hundred and ninety-six Members present; a quorum.

Mr. SIMS. I ask for the yeas and nays.

The SPEAKER. The gentleman from Tennessee demands the yeas and nays. All those in favor of taking the vote by yeas and nays will rise. [After counting.] Thirty-one Members have arisen, not a sufficient number. The yeas and nays are refused, the rules are suspended, and the bill is passed.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed without amendment bill and joint resolution of the following titles:

H. R. 28411. An act to grant two cannons to Ohio Northern University, at Ada, Ohio; and

H. J. Res. 261. Joint resolution authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America in the year 1912.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

Mr. BINGHAM. Mr. Speaker, I submit the following conference report on the legislative, executive, and judicial appropriation bill.

The Clerk read the report, as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 46, 62, 63, 64, 65, 66, 67, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 209, and 210.

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered sixty and agree to the same.

Amendment numbered 61: That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: Strike out the matter inserted by said amendment of the House, omit the matter inserted by said amendment of the Senate, and insert the following: ", and after the third of March, nineteen hundred and nine, the compensation of the President of the United States shall be seventy-five thousand dollars per annum; a sufficient sum to pay the increase in the compensation of the President herein authorized from March fourth to June thirtieth, nineteen hundred and nine, inclusive, is hereby appropriated."

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: In lieu of the sum proposed insert: "two hundred and fifty-five thousand eight hundred dollars;" and the Senate agree to the same.

HENRY H. BINGHAM,
F. H. GILLETT,
L. F. LIVINGSTON,
Managers on the part of the House.

F. E. WARREN,
J. A. HEMENWAY,
H. M. TELLER,
Managers on the part of the Senate.

Mr. CLARK of Missouri. Mr. Speaker, I want to ask the gentleman a question.

Mr. BINGHAM. I will make a statement to the House. The figures finally agreed upon are $31,978,484. The Senate added $664,234. The Senate yielded $344,500; and the House agreed to $319,734. That is in the entire bill, the body of which was adopted a few days ago. The Senate in the subject-matters that have been in dispute for the past few days has yielded in every item of disagreement excepting that we fix the compensation of the President at $75,000, a complete agreement throughout the entire line, and I therefore ask for the adoption of the report.

Mr. CLARK of Missouri. I would like to ask the gentleman a question. This fixes the President's salary at $75,000?

Mr. BINGHAM. It does.

Mr. CLARK of Missouri. When the House agreed to that $75,000, it had a positive provision, put in on a motion of the gentleman from Illinois [Mr. MANN], I think, that the $75,000 should be for everything, traveling expenses and all. Now, I understand that that proviso, or whatever it was, is taken out of this bill. Is it?

Mr. BINGHAM. The traveling expenses are statutory—not living the life of a year's appropriation, but statutory. We felt that the House having expressed itself for the $75,000, we could make concession to the Senate in the change, if you call it a change, running until the close of the fiscal year, leaving it for the House to determine. The conferees gave the President in the concession to the Senate $75,000 annual compensation. The question of traveling expenses being statutory, the House by future legislation can take care of it.

Mr. KEIFER. If the gentleman will permit, I would like to make a suggestion to the gentleman from Missouri. Under the Constitution of the United States we have no right to grant any emolument of any kind, whether traveling expenses or not, and I will read the clause of the Constitution on the subject. It is clause 6, section 1, Article II:

> The President shall, at stated times, receive for his services a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

It seems to me that if we should undertake to grant anything in the way of traveling expenses or other things in addition to the $75,000, it would be in violation of this provision of the Constitution. But that question is not involved here now.

Mr. CLARK of Missouri. That is exactly what they did do.

Mr. KEIFER. I agree to that, but I do not agree that we had a right to do it.

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, I hardly think the point made by the gentleman from Ohio [Mr. KEIFER] will hold water. Whatever may have been the theory of the Constitution, or whatever may have been the provision of the Constitution, we have done the thing which the gentleman says we can not do. During the present term of the present Executive we have provided by law for $25,000 traveling expenses, and have paid a large portion of it.

Now, then, as to the conference report. The conference report, as I understand it, sustains the position of the House on every item except in reference to the President's salary. The increases in the Department of State, the increases in the salary of the judges and all those other officers go out.

Now, as to the increase of the President's salary. As that item came to the House it provided for an increase to $100,000 a year, and, although it had an amendment which on its face whould appear to include the traveling expenses in the $100,000, as a matter of fact that amendment, either intentionally or unintentionally, was drawn to give a wrong impression, because in truth under the Senate amendment the President was to receive $100,000 compensation and in addition to that $25,000 a year if Congress should follow the law providing for traveling expenses. As it passed the House it provided for $75,000, to include traveling expenses. I take it, as a matter of fact, that if the Chief Executive travels as much as I hope he will travel, he will use a large share of the $25,000 for traveling expenses. I think it is wise for the Chief Executive to travel throughout the country. I believe it is for his benefit and for the benefit of the country if he comes in contact with the people in the different parts of the country, and I believe that he is much more likely to travel if his traveling expenses are paid out of the Treasury than he is if he has to put his hand into his own pocket and pay those expenses. So, on principle, it seems to me it would be advisable to pay the traveling expenses out of a separate fund. The House did indicate its desire to give the President $75,000 a year compensation. The amendment which I offered was offered after that vote had been taken, and while it seems to me it is not desirable for the President himself to have the salary increased at a time when the Treasury is almost empty, yet the House having expressed its opinion on that, I think we might well adopt the conference report, meeting the Senate on this one item halfway, reducing the proposed salary of the President from $100,000 to $75,000, increasing it $25,000 over that now

received, and allow, if the Congress shall so desire, the $25,000 for traveling expenses.

Mr. GAINES of Tennessee. My understanding was that we gave him $50,000, that the $75,000 was made up of $50,000 salary and the $25,000 traveling expenses allowable under the general law. Now, it seems that he is to get $75,000 salary exclusive of the $25,000 traveling expenses, which will make practically $100,000 he can spend.

Mr. MANN. Mr. Speaker, when the House voted on the proposition for $100,000 it defeated it. It then voted on the proposition of compensation to the President of $75,000, and that was passed. I then offered the amendment which provided that that should include the traveling expenses, because the Senate amendment had not then been voted upon to include the traveling expenses. I wish to call what seemed to me to be a bluff on the part of that distinguished aggregation at the other end of the Capitol.

Mr. GAINES of Tennessee. Does the conference report provide that we shall give him $50,000 in addition to the traveling expenses?

Mr. MANN. The conference report provides that the compensation of the President of the United States shall be raised from $50,000 to $75,000 and eliminates all question in regard to traveling expenses. If Congress chooses to pay the traveling expenses now authorized by law, Congress has that power.

Mr. GAINES of Tennessee. Will not Congress be compelled next session to give him $75,000 and $25,000 traveling expenses?

Mr. MANN. It will not be compelled legally, but morally I should think it would be.

Mr. OLLIE M. JAMES. Has not the $25,000 traveling expenses already been appropriated for?

Mr. MANN. No.

Mr. OLLIE M. JAMES. It is in conference, is it not, and will be appropriated for?

Mr. MANN. Yes; it is in conference.

Mr. OLLIE M. JAMES. And will be appropriated for?

Mr. MANN. Yes.

Mr. OLLIE M. JAMES. Certainly; there is no doubt about that; and that is why I am opposed to this as well as to the $25,000 for traveling expenses.

Mr. BINGHAM. There is nothing in this bill that carries traveling expenses.

Mr. GAINES of Tennessee. I know; but to give the President $75,000 by this bill and then obey the statute law by giving him $25,000 traveling expenses will make $100,000 per year he can spend.

Mr. MANN. The sum and substance of the conference report is that the salary of the President is increased from $50,000 to $75,000, an increase of 50 per cent, and that all the other increases in the salaries proposed by the Senate and the new offices proposed by the Senate, which were in dispute, go out.

Mr. ADAIR. When this bill came from the Senate, was it not stated on the floor of the House, and understood by the House, that the $100,000 included traveling expenses?

Mr. MANN. I can not say what was stated on the floor of the House or understood by the House, but I have stated to the House it did not include traveling expenses, and offered an amendment to cinch the matter.

Mr. ADAIR. But when Members voted upon the proposition they understood it provided $75,000 for both——

Mr. MANN. I did not so understand it.

Mr. ADAIR. I think the gentleman did understand it, because he offered an amendment.

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from Georgia [Mr. LIVINGSTON].

Mr. STEPHENS of Texas. The question which I asked the gentleman from Illinois was, How many years has it been since Congress doubled the salary of the President before, from $25,000 to $50,000?

Mr. LIVINGSTON. The gentleman from Pennsylvania has yielded me five minutes.

Mr. STEPHENS of Texas. Will the gentleman kindly state if we double it every twenty years; and we have done it——

Mr. LIVINGSTON. Mr. Speaker, I can not hear a word the gentleman says, there is so much noise here.

Mr. STEPHENS of Texas. That is what we are doing.

Mr. MANN. The gentleman and I will not be interested in what they are doing forty years from now.

The SPEAKER. Two or three Members address the Speaker and begin to talk. The gentleman from Georgia is entitled to the floor.

Mr. LIVINGSTON. Mr. Speaker, we have had this in conference for a couple of months, and the House has kept up with it. We have made our regular reports. The conference committee of the House this morning, I think, has kept faith with the House with every instruction which you have given us. We found that the question of traveling expenses of the President had been appropriated for until the 30th day of next June. Your conference committee nor this House can not undo it. That is a question of fact. Mr. Taft can get the benefit of that from the 4th day of March until the 30th day of June in spite of all that you and I can do or the committee on conference.

Mr. UNDERWOOD. Will the gentleman yield?

Mr. LIVINGSTON. I have only five minutes. However, I will answer a question.

Mr. UNDERWOOD. I will ask the gentleman from Pennsylvania to yield me five minutes——

Mr. LIVINGSTON. That is all right——

Mr. UNDERWOOD. Then I will ask the gentleman. The question I want to be informed on——

Mr. LIVINGSTON. The gentleman must not make a speech. I have only five minutes. Ask your question.

Mr. UNDERWOOD. I am trying to state——

Mr. LIVINGSTON. I do not want the gentleman to make a statement; ask your question.

Mr. UNDERWOOD. Then I will ask the gentleman from Pennsylvania to yield to me.

Mr. LIVINGSTON. I have only five minutes.

Mr. KIMBALL. Mr. Speaker, I desire to ask the gentleman from Georgia a question.

Mr. LIVINGSTON. Oh, just a question. I will answer it.

Mr. KIMBALL. State to the House the various items of expenditure connected with the maintenance of the White House outside of the President's salary.

Mr. LIVINGSTON. Every one of them has been read over and over here in the House.

Mr. KIMBALL. But it would come with greater emphasis if the gentleman on the committee would state it to us here.

Mr. LIVINGSTON. We have stated it positively and it has been printed in the RECORD and you will find it here, every item of expense.

Mr. KIMBALL. What is the aggregate amount?

Mr. LIVINGSTON. The aggregate amount was stated at $293,000. We can not be responsible for men who do not sit in their seats and listen to what is going on. But, Mr. Speaker——

Mr. OLLIE M. JAMES. Will the gentleman yield?

Mr. LIVINGSTON. Let me finish this statement. We found that to be the condition, in regard to traveling-expense matter, that it was already appropriated for until the 30th day of June. Now, being a committee on the legislative, executive, and judicial appropriation bill, we had no right to go into the question of traveling expenses, and have left it entirely on the outside. It is for this House to give him the $25,000 traveling expenses or not to do it. We have not touched on it in the report, and nothing that we say or do touches that question of traveling expenses.

Mr. FINLEY. Will the gentleman permit a question?

Mr. LIVINGSTON. Put your question.

Mr. FINLEY. Did not the House cut out traveling expenses?

Mr. LIVINGSTON. No; we did not.

Mr. FINLEY. Did not we vote to eliminate the traveling-expense amount?

Mr. LIVINGSTON. No; that amendment was offered after the vote of the House, and we had been instructed.

Mr. OLLIE M. JAMES. Was not that amount of $290,000 for the maintenance of the White House increased $12,000 by this Congress for an automobile, and therefore was not the salary——

Mr. LIVINGSTON. No; we have not increased it a cent.

Mr. OLLIE M. JAMES. Did you not increase it for an automobile $12,000?

Mr. LIVINGSTON. Was not that done by the House?

Mr. OLLIE M. JAMES. Certainly. I am talking about the House.

The SPEAKER. The time of the gentleman from Georgia [Mr. LIVINGSTON] has expired.

Mr. LIVINGSTON. I would like to have three minutes more.

Mr. BINGHAM. I yield to the gentleman from Georgia [Mr. LIVINGSTON] three minutes.

Mr. LIVINGSTON. The conferees are not chargeable with the $12,000 that you gave for automobiles. It was stated on the floor of the House that it was in lieu of carriages and horses. The debate on the floor was on that very question, and the conferees had nothing to do with it. You gave him the $12,000.

Mr. OLLIE M. JAMES. Will the gentleman yield right there?

Mr. LIVINGSTON. Yes.

Mr. OLLIE M. JAMES. And when the provision for $35,000 came before the House for carriages and horses for the White House I moved to strike out the $12,000 of that sum, in order to keep faith with the statement on the floor when the sum of $12,000 was voted that it would be taken out of the regular appropriation for carriages and horses usually provided, and it was voted down.

Mr. LIVINGSTON. I know. The House did it. That matter was closed by the House, and the conferees did not reopen it.

Mr. SIMS. And they would not even take the yeas and nays when I asked for one.

Mr. LIVINGSTON. The conferees have done one thing. They have carried out all your instructions, and your amendment, offered by the gentleman from Illinois [Mr. MANN], was after the vote was taken, and your conferees felt, rather than to have that bill defeated, we should do that much. We can simply say that $75,000 is his salary, no more and no less.

Mr. GAINES of Tennessee. Will the gentleman yield?

Mr. LIVINGSTON. Yes.

Mr. GAINES of Tennessee. When we go to appropriate next session of Congress for the next fiscal year, will not Congress be compelled to appropriate the $25,000 for traveling expenses?

Mr. LIVINGSTON. I never heard of Congress being compelled to do anything.

Mr. GAINES of Tennessee. Is not that now the law, and will it not be the law then? We have not repealed it, have we?

Mr. LIVINGSTON. It is the law, but there is no power to force Congress to appropriate.

Mr. GAINES of Tennessee. We have not repealed it, have we?

Mr. LIVINGSTON. We have not repealed it. You will have to repeal it to get rid of the law.

Mr. GAINES of Tennessee. Then the President will get the $75,000 and the $25,000 traveling expenses?

Mr. LIVINGSTON. Unless you repeal it; and that is a matter for the House and not for the conferees.

Mr. GAINES of Tennessee. Giving $75,000 now is a matter for the House, too.

Mr. LIVINGSTON. You have done that. What the conferees did was to conform their action with your action.

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from Ohio [Mr. KEIFER].

Mr. KEIFER. Mr. Speaker, I have no disposition to delay the House in the consideration of this matter. I only desire, if I can, to try to show that this conference report is entirely proper and logical. It is claimed that there is no provision in it prohibiting the granting of traveling expenses to the President of the United States in the future. If there were in this conference report such a provision, it would not bind future Congresses. If traveling expenses are "emoluments" as that word is used in the Constitution of the United States (par. 6, sec. 1, Art. II), then the Constitution prohibits granting them at any time. If the traveling expenses that the gentleman from Illinois [Mr. MANN] and the gentleman from Missouri [Mr. CLARK] refer to are mere expenses incident to the presidential office, and not a part of his salary, then we may appropriate for them in the future as we have in the past. Nothing we can enact into law will bind any future Congress. The conference committee's report is exactly right. That committee had nothing to do with what the future Congresses might choose to do in relation to appropriating money for traveling expenses.

It seems to me that we are doing the right thing in making the salary of the President of the United States $75,000, $25,000 more than hitherto. That $25,000 extra and as salary the President may expend, if he chooses, in traveling or in any other way. My understanding is that the appropriations made for the past few years of $25,000 each year for traveling expenses did not give the President the right to control the $25,000 any further than to use it in paying traveling expenses. Now, if this conference report is agreed to, he will have a salary of $75,000, and it may be proper to argue to the next Congress that there is no constitutional power to give him traveling expenses, or that it is not expedient to do it, in addition to the $75,000. I think the conference report ought to be adopted as it is presented. [Cries of "Vote!"]

Mr. BINGHAM. Mr. Speaker, there are but four minutes left, and I yield them to the gentleman from Tennessee [Mr. GAINES].

Mr. GAINES of Tennessee. Mr. Speaker, on this side of the House, when this matter was up before, I think the understanding was that the $25,000 traveling-expense money would be molded into and combine the $25,000 that is to make up the $75,000—the President's salary.

Mr. LIVINGSTON. Now, if the gentleman will permit me, the gentleman from Illinois told him a moment ago that he made the amendment to meet the bluff from the Senate. It was nothing but a bluff.

Mr. GAINES of Tennessee. As the matter comes back here, as I understand it, that $75,000 is clean-cut salary, exclusive of the $25,000 for traveling expenses, practically giving in dollars and cents the President a hundred thousand dollars of money to use in the course of a year.

Mr. LIVINGSTON. It does not do anything of the kind.

Mr. GAINES of Tennessee. Well, why does it not?

Mr. LIVINGSTON. Because there is no $25,000 in the bill.

Mr. GAINES of Tennessee. Well, it will be in another bill, because the general statute of the country allows and provides for $25,000 for the traveling expenses of the President. Now, when your next Congress undertakes to repeal this "traveling expense" statute or want to refuse to appropriate this $25,000 expense money you will be met with the argument that this expense money is an "emolument" of the President—part of his "compensation"—and in that way defeat the repeal of this statute, and in morals and law impel Congress to make the $25,000 appropriation. The Constitution ordains:

The President shall, at stated times, receive for his services a compensation, which shall neither be increased or diminished during the period for which he shall have been elected, and he—

Now listen—

shall not receive within that period any other emolument from the United States or any of them.

Now, then, if this $25,000 is construed as being a part of his "compensation," how can Congress raise or reduce it after Judge Taft becomes President? It will be so argued by some that we can not reduce it.

Mr. LIVINGSTON. But the $25,000 is not appropriated, for the President only spent $9,000.

Mr. GAINES of Tennessee. It is not the President's money; it is money he has in trust, I have contended from the start. I proposed by amendment in a bill here to buy the President an "executive car" and pay for hauling it, to stop him from getting passes from the railways and lift him from their grasp and above suspicion. My amendment went out on a point of order, but it started the move, and this statute was soon enacted. I was the first man in this House who opened his mouth against the "free-pass abuse;" and, thank God, as a result it has been exterminated by a law. Now you are trying to fix it by law that the President will not only get $75,000 as his own money, but also $25,000 to cover his traveling over the country. He must and should travel over the country in the discharge of his duties, and the $25,000 was expense money; and when this matter was up here last we said that "expense" money should become a part of this "compensation." The plan was to wipe out this "expense" money statute.

Mr. LIVINGSTON. Well, I have already asserted it on the floor, and I repeat it once more, that as touching the mileage and transportation question there is nothing of it here, and the Senate agreed under the express vote that was had in the House that the President should have $75,000 only.

Mr. GAINES of Tennessee. Is there any way now that we can stop the $25,000 being paid the President for traveling expenses?

Mr. LIVINGSTON. Yes; a concurrent resolution will stop it.

Mr. GAINES of Tennessee. I mean in this conference report.

Mr. LIVINGSTON. It is not in the bill, I beg the gentleman to remember. We have not put anything in there about mileage.

Mr. GAINES of Tennessee. What bill is that in? Are you not providing that the President shall be paid $75,000 for salary and also $25,000 for expense money.

Mr. LIVINGSTON. No; we do not.

Mr. GAINES of Tennessee. That is not the way I understand it. I want the $75,000 to cover everything.

Mr. BINGHAM. I yield five minutes to the gentleman from Missouri [Mr. CLARK].

Mr. CLARK of Missouri. Mr. Speaker, I think that the conferees on the part of the House are entitled to the thanks of the House for accomplishing so much as they did accomplish. [Applause.] They have saved the country about $300,000 per annum, as the House desired they should do. If this thing is finally agreed to all around, I want all Members to understand just exactly what they are doing. The President's salary remained at $25,000 a year until the 4th of March 1873, when it was raised to $50,000. It stayed that way until last Congress, when they voted this $25,000 for traveling expenses. I understand that the President only used eight or nine thousand of the $25,000. The proposition originally in the Senate was to increase the President's salary to $100,000. We defeated that proposition. Then the gentleman from Indiana [Mr. WATSON]

performed his great coup, and came in with the $75,000 proposition.

Mr. LIVINGSTON. That is what the House did.

Mr. CLARK of Missouri. And the House agreed to the $75,000.

Mr. LIVINGSTON. That is right.

Mr. CLARK of Missouri. Then the gentleman from Illinois [Mr. MANN], not satisfied with that, added to that amendment as a kind of vermiform appendix, in the shape of an amendment which made it so clear that a wayfaring man, though a fool, could not misunderstand the proposition, that the House was willing to give $75,000 to the President, and not one cent more. That is the only way that they got that $75,000 proposition through this House. Well, now, I agree with the gentleman from Georgia, that no difference what we do about this, the President will draw from this fund for traveling expenses to the 1st day of July.

Mr. LIVINGSTON. That is right.

Mr. CLARK of Missouri. That much I think is certain. But back of this there is an item in the sundry civil bill that restores this $25,000 of traveling expenses.

Mr. LIVINGSTON. If the gentleman will pardon me, Mr. HALE stated on the floor of the Senate yesterday that that would be taken out of the sundry civil bill, and his statement has been confirmed to-day.

Mr. CLARK of Missouri. If they take it out, then there is no kick about this.

Mr. MACON. None at all.

Mr. LIVINGSTON. And we are authorized by the Senate conferees to make that statement on the floor of the House.

Mr. CLARK of Missouri. Now, I serve notice on the floor of the House, so that all men may hear it, that if they bring that sundry civil bill in here with that $25,000 for traveling expenses in it I will have a roll call on every amendment that there is, in order to defeat that bill in the House. [Applause on the Democratic side.]

One other word, and then I am through with it. When we had the squabble here about the $12,000 for automobiles I believe that I could have won out on that proposition if the gentleman from Minnesota [Mr. TAWNEY] had not stated that the $12,000 for automobiles would be subtracted from the $35,000 for horses and carriages.

Mr. MANN. Will the gentleman yield?

Mr. CLARK of Missouri. Certainly.

Mr. MANN. It seems to me proper to suggest, in explanation of the statement of the gentleman from Minnesota, that I am informed that no part of that $35,000 has been used recently for the purchase of horses at all. Horses have been purchased out of another fund.

Mr. CLARK of Missouri. Well, they put that in now.

Mr. MANN. That is in explanation of the statement of the gentleman from Minnesota [Mr. TAWNEY], who I think did not understand that when he first made the statement to the House.

Mr. CLARK of Missouri. But what I was driving at is this, that they got the $12,000 for automobiles on that statement, and then, lo and behold, when they came in here the next time with the bill they had the same old $35,000 item for horses and carriages. I do not accuse the gentleman from Minnesota of double dealing about it, because I do not think he would, but I do not like that way of doing things.

Now, it is settled that the President shall have $75,000; but if they bring the sundry civil bill in here with that $25,000 in it for traveling expenses, I intend to fight it by every means known to this parliamentary body—what is left of it.

Mr. GARRETT. Or any part of the $25,000?

Mr. CLARK of Missouri. Yes; or any part of it.

Mr. MADDEN. If the gentleman will allow me, he remembers the fact that an amendment was offered on the floor of the House to reduce the $35,000 to $23,000, and that the House voted down the amendment.

Mr. CLARK of Missouri. I know it; of course it did.

Mr. MADDEN. Then it is hardly fair to state that the gentleman from Minnesota was responsible for the action of the House.

Mr. CLARK of Missouri. I did not say that he was, but I did say that it turned out that they got the $12,000 and the $35,000, too.

Mr. GAINES of Tennessee. And the gentleman from Minnesota opposed that amendment.

Mr. OLLIE M. JAMES. And voted it out by tellers, too.

Mr. CLARK of Missouri. I want to repeat that I think our conferees won a great victory over the Senate, on which I believe they ought to be congratulated.

Mr. BINGHAM. I yield five minutes to the gentleman from Massachusetts [Mr. GILLETT] and shall ask him at the end of that time to move the previous question.

Mr. GILLETT. I think the House understands this question thoroughly now. I was going to correct some misapprehensions that have been expressed, but I think the gentleman from Missouri has stated the facts exactly. Therefore I move the previous question now.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question being taken on agreeing to the conference report, on a division (demanded by Mr. OLLIE M. JAMES) there were—ayes 123, noes 75.

Accordingly the conference report was agreed to.

RECOGNIZANCES IN THE JUVENILE COURT.

Mr. CAMPBELL. Mr. Speaker, I ask unanimous consent to discharge the Committee on the District of Columbia from the further consideration of the bill (S. 8518) empowering the juvenile court of the District of Columbia to issue executions on forfeited recognizances, and that the bill be considered in the House at this time.

The bill was read, as follows:

Be it enacted, etc., That the juvenile court of the District of Columbia shall have power to issue execution on all forfeited recognizances upon motion of the proper prosecuting officer, and all writs of fieri facias or other writs of execution issued by said court shall be directed to and executed by the marshal of the District of Columbia. And any recognizance taken in the juvenile court, after being forfeited, may be transmitted to the clerk's office of the supreme court of the District of Columbia and therein docketed in the same manner as forfeited recognizances taken in the police court are now docketed, and thereupon shall have the same effect as if taken in said supreme court; and said lien shall continue as long as such judgment, decree, or recognizance shall be in force or until the same shall be satisfied or discharged.

The SPEAKER. Is there objection?

Mr. GARRETT. Mr. Speaker, reserving the right to object, I should like to ask what this is?

Mr. CAMPBELL. Mr. Speaker, if I can have the attention of the House, I will explain the purpose of this bill. There is now no power in the juvenile court of the District of Columbia to issue process for the collection of forfeited recognizances.

The purpose of this bill is to give the courts that power. The act creating the courts by an oversight omitted empowering the courts to collect forfeited bonds and recognizances. This simply fills in that omission.

Mr. GARRETT. Is this the unanimous report of the committee?

Mr. CAMPBELL. It is a unanimous report of the subcommittee; it did not reach the full Committee on the District of Columbia.

Mr. SMITH of Michigan. This is a very meritorious bill, and I hope the gentleman from Tennessee will not object.

Mr. GARRETT. Has it passed the Senate?

Mr. CAMPBELL. It has.

Mr. GARRETT. Was the Senate bill considered by the subcommittee?

Mr. CAMPBELL. It is an exact copy of the House bill, and was considered by the subcommittee and a report prepared, but not considered by the whole committee.

Mr. GARRETT. I will yield to my colleague on the committee [Mr. SIMS].

Mr. SIMS. Mr. Speaker, this bill has not been considered by the committee, and therefore I know absolutely nothing about it. If the gentleman from Kansas makes the statement that the House is willing to accept, I will not be discourteous to my own committee and object, but, as I say, it has not been considered by the committee as a committee; it may have been by the subcommittee, and they may have made a report, but there is nothing by which I can inform myself of the matter contained in the bill. I might do an injustice by objecting to it.

Mr. CAMPBELL. I am glad the gentleman from Tennessee has made that statement.

Mr. SHACKLEFORD. Mr. Speaker, I was a member of the subcommittee, but being engaged elsewhere I could not attend, and, like my colleague, the gentleman from Tennessee, I do not know what this bill contains. I think it is a bad policy for bills to come along at the last end of a session, interfering with our inauguration ceremonies, and I feel that it is improper to legislate in that way. Nobody knows what the bill contains. We have to take the word of two or three members of the committee, and every other member must vote without knowing or having the remotest idea of what he is voting for. I shall have to object.

The SPEAKER. Objection is heard.

BUILDING ASSOCIATIONS, DISTRICT OF COLUMBIA.

Mr. SMITH of Michigan. Mr. Speaker, I call up the conference report on the bill (S. 6055) to amend section 691 of subchapter 7, "Building associations," of the Code of Laws for

the District of Columbia. I ask that the statement be read in lieu of the report.

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 6055) to amend section six hundred and ninety-one of subchapter seven, building associations, of the Code of Law for the District of Columbia, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House numbered one, and agree to the same with an amendment as follows: Strike out the words "one hundred," in line 4 of said amendment, and insert in lieu thereof the words "two hundred and fifty;" and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered two, and agree to the same with amendments as follows: Page 3, line 5, strike out all after the word "act" down to and including the word "act" in line 7, with amendments as follows: On page 3 of the bill, in lines 4 and 5, strike out the words "except corporations organized under and availing themselves of the privileges of this act;" and in line 10, after the word "act," insert the following: ": *Provided*, That building associations heretofore organized and in actual operation before the passage of this act need not be incorporated;" and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered three, and agree to the same with amendments as follows: Strike out the words "the District of Columbia or," in line 3 of said amendment, and insert in the same line, after the word "Territory," the words "except the District of Columbia;" and also strike out the word "twenty," in line 11 of said amendment, and insert the word "ten;" and the House agree to the same.

S. W. SMITH,
J. HAMPTON MOORE,
J. DAVIS BRODHEAD,
Managers on the part of the House.
J. H. GALLINGER,
W. P. DILLINGHAM,
THOMAS S. MARTIN,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

Statement to accompany the report of the committee of conference on the disagreeing votes of the two Houses on S. 6055, an act to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia.

Amendment No. 1, as amended in conference, limits the expense of examination of any building association to $25 for the first $500,000 or fractional part thereof of assets and $10 for each additional $250,000 or fractional part thereof, thus reducing the maximum cost of examination, as proposed by the original House amendment.

Amendment No. 2, as amended in conference, relieves from the necessity of incorporation all building associations heretofore organized and in actual operation before the passage of this act, thus accomplishing in better and clearer phraseology the same purposes as were accomplished by the exceptions in page 3, lines 3, 4, 5, 6, and 7 of the act, as passed by the Senate.

Amendment No. 3, as amended in conference, makes every building association, incorporated or unincorporated, organized and existing under the laws of any State or Territory, except the District of Columbia, and doing business in the District, subject to the provisions of section 691 of the District Code, as amended by this act, and requires all such foreign associations to keep on deposit with the Comptroller of the Currency securities amounting to not less than 10 per cent of its capital and surplus, as security for its depositors and creditors.

To these amendments as thus amended the Senate agrees.

S. W. SMITH,
J. HAMPTON MOORE,
J. DAVIS BRODHEAD,
Managers on the part of the House.

The report was agreed to.

BILLS ON THE PRIVATE CALENDAR.

Mr. MANN. Mr. Speaker, I ask that the House proceed to the order made by the House making it in order to call up Senate bills on the Private Calendar not objected to.

The SPEAKER. The Clerk will report the first Senate bill.

LAPENE & FERRE.

The Clerk read as follows:

S. 2886. An act for the relief of the legal representatives of the late firm of Lapene & Ferre.

Mr. MANN. Mr. Speaker, to save time, I object.

Mr. MACON. I join with the gentleman from Illinois in the objection.

The SPEAKER. The Clerk will report the next bill.

STEWART & CO.

The Clerk read as follows:

S. 3843. An act for the relief of the legal representatives of Stewart & Co. and A. P. H. Stewart.

The SPEAKER. Is there objection?

Mr. MACON. I object.

Mr. FINLEY. I object.

The SPEAKER. The Clerk will report the next bill.

NAPOLEON B. GIDDINGS.

The Clerk read as follows:

S. 4690. An act for the relief of the legal representatives of Napoleon B. Giddings.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. MACON. I object.

ACCOUNTS OF TREASURER UNITED STATES.

The Clerk read as follows:

S. 4049. An act authorizing a credit in certain accounts of the Treasurer of the United States.

Mr. SHACKLEFORD and Mr. MACON objected.

OMAHA TRIBE OF INDIANS.

The Clerk read as follows:

S. 2901. An act authorizing the Omaha tribe of Indians to submit claims to the Court of Claims.

Mr. MANN and Mr. STAFFORD objected.

ROBERT MORGAN GILSON.

The Clerk read as follows:

S. 3952. An act to restore to the active list of the United States Marine Corps the name of Robert Morgan Gilson.

The SPEAKER. Is there objection?

Mr. MACON. Mr. Speaker, I reserve the right to object to that bill. If the gentleman who fathers it desires to explain it, I will be glad to hear him.

The SPEAKER. Is there another objection?

Mr. BUTLER. Mr. Speaker, there is but one objection, and I ask that that bill may be passed without prejudice, so that an amendment may be offered to it by the gentleman from Vermont, who is not now in his seat.

Mr. MANN. I object.

Mr. MACON. Mr. Speaker, I said I would reserve the objection, if the gentleman cared to explain it. I want to give the gentleman a chance to explain the bill.

Mr. MANN. I am willing for the gentleman to reserve the objection. There is no reason given in this report for this reinstatement. If there be a reason, we might not object.

Mr. MACON. The report shows that he resigned, and now he wants to be reinstated without giving any reason for the resignation or cause for the reinstatement.

Mr. BUTLER. The reason for the retirement has been stated in the House. At one time an objection was reserved, and the explanation was made and will be made again when the gentleman from Vermont offers the amendment.

Mr. BARTLETT of Georgia. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BARTLETT of Georgia. I desire to know whether under the rule the objection is to be made before the bill is read or after. Some of us were trying to find out what the bills were, so that we could know whether to object or not.

The SPEAKER. I suppose it would save time if the bill was not read, but does the gentleman demand the reading of the bill?

Mr. BARTLETT of Georgia. No; not this bill.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. MACON. There were two objections, Mr. Speaker.

The SPEAKER. Then the Clerk will report the next bill.

Mr. BUTLER. Were there two objections?

Mr. OLLIE M. JAMES. No; I think not. The gentleman from Illinois objected to the bill going over.

Mr. BUTLER. I can not hear the parliamentary situation.

The SPEAKER. The parliamentary situation is that objections are asked for. One gentleman objects, and then there

seems to be a disposition for disorder and talk. Is there objection?

Mr. MACON. I object.

Mr. MANN. Mr. Speaker, I ask unanimous consent that the bill may be passed without prejudice.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the bill may be passed without prejudice. Is there objection?

There was no objection.

MARY S. FERGUSSON.

The Clerk read as follows:

S. 6529. An act for the relief of Mary S. Fergusson.

The SPEAKER. Is there objection?

Mr. MANN and Mr. MACON objected.

ELLA M. COLLINS.

The Clerk read as follows:

S. 1750. An act to reimburse Ella M. Collins, late postmaster at Goldfield, Nev., for money expended for clerical assistance and supplies.

The SPEAKER. Is there objection?

Mr. STAFFORD and Mr. MACON objected.

GARRETT R. BRADLEY.

The Clerk read as follows:

S. 1752. An act to reimburse Garrett R. Bradley, late postmaster at Tonopah, Nev., for money expended for clerical assistance.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Garrett R. Bradley, late postmaster at Tonopah, Nev., out of any money in the Treasury not otherwise appropriated, the sum of $442.14, to reimburse him for money expended for necessary clerical assistance.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

GEORGE Q. ALLEN.

The Clerk read as follows:

S. 4435. An act for the relief of George Q. Allen.

The SPEAKER. Is there objection?

Mr. MANN and Mr. MACON objected.

WILLIAM BOLDENWECK.

The Clerk read as follows:

S. 890. An act for the relief of William Boldenweck, assistant treasurer of the United States at Chicago.

The SPEAKER. Is there objection?

Mr. MACON and Mr. STAFFORD objected.

ORVILLE AND WILBUR WRIGHT.

The Clerk read as follows:

S. R. 119. A joint resolution authorizing the Secretary of War to award gold medals to Orville Wright and Wilbur Wright.

The SPEAKER. Is there objection?

Mr. MACON. I object to that.

Mr. COLE. Mr. Speaker, I hope the gentleman will not object.

Mr. OLLIE M. JAMES. There is but one objection.

The SPEAKER. The Chair hears but one objection. The Clerk will report the joint resolution.

The Clerk read as follows:

Joint resolution (S. R. 119) authorizing the Secretary of War to award gold medals to Orville Wright and Wilbur Wright.

Resolved, etc., That in recognition and appreciation of the great services of Orville Wright and Wilbur Wright, of Ohio, rendered the science of aerial navigation in the invention of the Wright aeroplane, and for their ability, courage, and success in navigating the air, the Secretary of War be, and he hereby is, authorized and directed to cause to be struck and presented to Orville Wright and Wilbur Wright appropriate gold medals with suitable emblems, devices, and inscriptions, to be determined by him; and that to enable the said Secretary to carry this resolution into effect a sufficient sum of money is hereby appropriated out of any money in the Treasury not otherwise appropriated.

The committee amendment was read, as follows:

Page 1, line 21, after the word "money," insert the words "not to exceed three hundred dollars."

The amendment was agreed to.

The joint resolution as amended was ordered to be read a third time, was read the third time, and passed.

CLAIMS ARISING UNDER NAVY DEPARTMENT.

The next business under the order was the bill (S. 4033) to satisfy certain claims against the Government arising under the Navy Department.

The SPEAKER. Is there objection?

Mr. MACON. Mr. Speaker, I object.

Mr. MANN. Mr. Speaker, this is a long bill and there is no chance of it becoming a law. There are a lot of amendments, and probably no chance of its becoming a law at this session, and I think I shall object.

Mr. MACON. There are 28 propositions, and I object.

MADISON COUNTY, KY.

The next business under the order was the bill (S. 5349) for the relief of Madison County, Ky.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury and the Commissioner of Internal Revenue be, and are hereby, authorized and required to audit and adjust the claim of Madison County, State of Kentucky, for internal-revenue taxes on dividends on shares of stock or bonds owned by said county in the Louisville and Nashville Railroad to the extent that such taxes were deducted from any dividends due and payable to said county, any statute of limitations to the contrary notwithstanding; and the Secretary of the Treasury is authorized to pay to Madison County, State of Kentucky, out of any money in the Treasury not otherwise appropriated, the amount of the claim so audited and adjusted.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

JOSEPH SCHREMBS.

The next business under the order was the bill (S. 3452) for the relief of Joseph Schrembs.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to reimburse Joseph Schrembs, out of any money in the Treasury not otherwise appropriated, the sum of $262.20, which amount was paid by said Schrembs, under protest, to the surveyor of the port of Grand Rapids and covered into the Treasury, as duty unlawfully assessed and collected by said surveyor on four cases of statuary for the use of St. Mary's Church, Grand Rapids, Mich., December 16, 1902.

The SPEAKER. Is there objection. [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

HAROLD BROWN, DECEASED.

The next business under the order was the bill (S. 5905) for the relief of the executors of the estate of Harold Brown, deceased.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the executors of the estate of Harold Brown, late a citizen of Newport, in the State of Rhode Island, the sum of $861.75, being an excess of taxes improperly levied and collected on legacies and distributive shares of the personal property of the said estate, which tax was paid by the executors on October 20, 1900, said payment to be in full for all claims by reason of such assessment and collection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

PARSEY O. BURROUGH.

The next business under the order was the bill (S. 7859) for the relief of Parsey O. Burrough.

The Clerk read the bill, as follows:

Be it enacted, etc., That jurisdiction be, and is hereby, conferred upon the United States circuit court for the eastern district of Pennsylvania to adjudicate the two suits at law commenced in the courts of common pleas of Philadelphia which by certiorari were removed to the said circuit court, namely, the suits of Parsey O. Burrough for the recovery of alleged illegally collected taxes, paid under protest, one against the administrator of William H. Barnes, late collector of internal revenue for the first district of Pennsylvania, in which claim is made for the sum of $2,204.49, and the other against the administrator of John H. Diehl, late collector of internal revenue for the second district of Pennsylvania, in which claim is made for the sum of $1,807.09; and the said court is hereby authorized and empowered to hear, determine, and render final judgments in said suits for the amount of such taxes as may be shown to have been illegally collected and paid over to the Government and notwithstanding any error in the record as to the proper name of the collector who may have collected the same.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

PETER H. BRODIE, ALIAS PATRICK TORBETT.

The next business under the order was the bill (S. 1163) to correct the naval record of Peter H. Brodie, alias Patrick Torbett.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Navy be, and he is hereby, authorized and directed to correct the naval record of Peter H. Brodie, alias Patrick Torbett, late a sailor in the United States Navy, serving on the U. S. battle ship Ohio, the U. S. S. Maria Denning, and the Undine, and to issue to said Brodie a discharge from the service of the United States.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

REFUNDING CERTAIN TONNAGE TAXES AND LIGHT DUES, STEAMER "MONTARA."

The next business under the order was the bill (S. 8429) to refund certain tonnage taxes and light dues levied on the steamship *Montara*, without register.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized to refund, out of any money in the Treasury not otherwise appropriated, the sum of $1,695, assessed and collected under sections 4219 and 4225, Revised Statutes, in the case of the steamship Montara, entered at Seattle on July 9, 1906, from Yokohama without register, upon application by the Pacific Coast Steamship Company.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, if I may, I would like to ask the gentleman from Nebraska, or some member of the Committee on Merchant Marine and Fisheries, in regard to this bill. Here was a vessel registered by the United States engaged in carrying contraband goods during the Japanese-Russian war and was captured by the Japanese and offered for sale and sold, brought back then to the United States, and there the Government required the payment of light dues and other fees on the vessel, which was more than coming from abroad, but on the ground that she was not then registered in the United States and not entitled to register without paying those fees.

Mr. HINSHAW. Having been purchased by the Japanese Government.

Mr. MANN. Having been seized by the Japanese Government and sold at auction. I know all about the facts, but I would ask some member of the Committee on Merchant Marine, who was not interested in the subject, what the policy of the Government was?

Mr. HINSHAW. I do not know what disposition was made of it.

Mr. MANN. It does not belong to the gentleman's committee, of course, the Committee on Claims; this is to pay back certain money, and I wanted to know if there was a policy.

Mr. HINSHAW. No; I do not think there is any policy in regard to it, as far as I know.

Mr. MANN. Very well.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

HOWARD B. CARPENTER.

The next business on the Private Calendar was the bill (S. 3810) for the relief of Howard B. Carpenter.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Howard B. Carpenter the sum of $2,446.34, the balance due him for survey of boundary line between the States of Idaho and Montana, under contract dated February 10, 1904.

The SPEAKER pro tempore (Mr. FASSETT in the chair). Are there objections?

There were no objections.

The bill was ordered to be read a third time, was read the third time, and passed.

THE TUG "JUNO."

The next business on the Private Calendar was the bill (S. 5510) for the relief of the owners of the tug *Juno*.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the owners of the tug Juno, the sum of $376.50, in full compensation for damages occasioned by collision with the United States Marine-Hospital Service steamer Neptune in Wilmington Creek, Delaware, on June 4, 1907.

The SPEAKER pro tempore. Are there objections?

There were no objections.

The bill was ordered to be read a third time, was read the third time, and passed.

NESTLER BREWING COMPANY.

The next business on the Private Calendar was the bill (S. 6373) waiving the statute of limitations as to the claim of the Nestler Brewing Company, and authorizing the Commissioner of Internal Revenue to adjudicate the same.

The bill was read in full.

The SPEAKER pro tempore. Are there objections?

Mr. BARTLETT of Georgia. Mr. Speaker, I object.

Mr. FINLEY. Mr. Speaker, I object.

W. B. GRAHAM.

The next business on the Private Calendar was the bill (S. 6682) to reimburse W. B. Graham, late postmaster at Ely, Nev., for money expended for clerical assistance.

The bill was read in full.

The SPEAKER pro tempore. Are there objections?

Mr. FINLEY. Mr. Speaker, I object.

Mr. BARTLETT of Georgia. So do I.

JAMES H. OWEN.

The next business on the Private Calendar was the bill (S. 7782) for the relief of James H. Owen.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $930 to James H. Owen, of Los Angeles, Cal., found and held to be due him by the Secretary of the Interior under contract of May 31, 1906, for the construction of buildings and irrigation works at the Truxton Canyon Indian School, Arizona.

The SPEAKER pro tempore. Are there objections?

There were no objections.

The bill was ordered to be read a third time, was read a third time, and passed.

B. D. CROCKER.

The next business on the Private Calendar was the bill (S. 7861) for the relief of B. D. Crocker.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to credit B. D. Crocker, collector of internal revenue for the district of Washington, and his accounts with the sum of $2,500, being the value of a book of retail liquor dealers' special tax stamps charged to him, destroyed by accidental burning in the building in Tacoma, Wash., in which the collector's office is located.

The SPEAKER pro tempore. Are there objections?

Mr. FINLEY. I object, Mr. Speaker.

Mr. CARLIN. I object, Mr. Speaker.

Mr. MANN. Will the gentleman reserve his objection on that?

Mr. CUSHMAN. Mr. Speaker, I trust the gentleman will withhold his objection.

Mr. BOOHER. I object to that bill, Mr. Speaker.

Mr. CUSHMAN. Will the gentleman withhold his objection?

Mr. BOOHER. No; I object.

Mr. CUSHMAN. The bill is simply to credit the collector of internal revenue in my home city with certain internal-revenue stamps that were accidentally burned. There is no appropriation made here. The Government has lost nothing. The passage of this bill is recommended by the Secretary of the Treasury, and the Secretary of the Treasury would credit him for this amount on the books now if the legal authority existed for him so to do. It is simply in order that the legal authority may be given to the Secretary of the Treasury to straighten up this account. It costs the Government nothing—not a cent. I trust the gentleman will not object.

Mr. BOOHER. I withdraw my objection.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

AARON CORNISH.

The next business on the Private Calendar was the bill (S. 4806) to amend the military record of Aaron Cornish.

The bill was read in full.

The SPEAKER pro tempore. Are there objections?

Mr. FINLEY. Reserving the right to object, I would like to have an explanation of the bill.

Mr. BARTLETT of Georgia. Unless there is an explanation, I will object.

The SPEAKER pro tempore. Two objections are heard. The Clerk will report the next bill.

DEWITT EASTMAN.

The next business on the Private Calendar was the bill (S. 8588) to amend an act entitled "An act for the relief of Dewitt Eastman," approved January 8, 1909.

The bill was read, as follows:

Be it enacted, etc., That Dewitt Eastman shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a member of Battery I, Fourth Regiment U. S. Artillery, on the 13th day of June, 1865: *Provided*, That no pay, bounty, or other emoluments shall accrue by virtue of the passage of this act.

The SPEAKER pro tempore. Is there objection?

Mr. BARTLETT of Georgia. The President has been vetoing bills like this. I therefore object.

Mr. STEVENS of Minnesota. Will the gentleman withhold his objection for a moment? This is to correct an error that

was made in the passage of a bill through the Senate and House this very winter. A bill passed unanimously correcting the military record of this man, who served over four years, until May, 1865. When he arrived at Fort Snelling, Minn., there was no officer there to muster him out of the service, there were no rations for him, and the commanding officer told him to go home, and he went. By some inadvertence we left out the words "honorable discharge." We have corrected his military record, and all this does is to give him an honorable discharge.

Mr. BARTLETT of Georgia. With that explanation, I have no objection.

The bill was ordered to a third reading, read the third time, and passed.

HENRY G. RUPP.

The next business on the Private Calendar was the bill (S. 2489) for the relief of Henry G. Rupp.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Harry G. Rupp, quartermaster's clerk at Seattle, Wash., the sum of $1,556.70, out of any money in the Treasury not otherwise appropriated, to reimburse him for household goods destroyed by a fire which consumed the quartermaster's warehouse at Seattle, Wash., May 7, 1906, which goods were in the custody of the United States for shipment on a Government bill of lading from Seattle, Wash., to Spokane, Wash.

Mr. CARLIN. I object.

Mr. BARTLETT of Georgia. I will also.

Mr. HUMPHREY of Washington. I hope the gentleman will withhold the objection.

Mr. BARTLETT of Georgia. I will withhold the objection.

Mr. HUMPHREY of Washington. This is to pay a clerk in the Quartermaster-General's Department for goods that he lost in a fire on a United States wharf at Seattle. I desire to say that we have passed bills for the benefit of the officers. They have all been paid under bills of this character. Here was a clerk who lost more heavily than anyone, and they would not allow him for the clothing of his wife or children, and his loss was over $1,500. He was a poor boy.

Mr. BARTLETT of Georgia. May I inquire under what rule the Government pays for these accidental losses; why it becomes an insurer against loss?

Mr. HUMPHREY of Washington. He was ordered there and directed to place his goods on this wharf.

Mr. JONES of Washington. I just want to suggest that we passed two bills of a similar character to pay the claims for the destruction of goods in the same fire for the officers, and as we have paid the claims of the officers, I do not think it is fair to object to the payment of the claim of this poor boy, who was a clerk.

Mr. BARTLETT of Georgia. I do not think so either; and I will withdraw my objection.

The bill was ordered to a third reading, read the third time, and passed.

THOMAS C. CLARK.

The next business on the Private Calendar was the bill (S. 4426) for the relief of Thomas C. Clark.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Thomas C. Clark, inspector of construction, quartermaster's department at Seattle, Wash., the sum of $758.75, out of any money in the Treasury not otherwise appropriated, to reimburse him for household goods destroyed by a fire which consumed the quartermaster's warehouse at Seattle, Wash., May 7, 1906, which goods were in the custody of the United States Government for transportation.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to a third reading, read the third time, and passed.

BRITISH STEAMSHIP "MAROA."

The next business on the Private Calendar was the bill (S. 8379) for the relief of the owners of the British steamship *Maroa*.

The bill was read, as follows:

Be it enacted, etc., That the claim of the owners of the British steamship Maroa for reimbursement for the cost of repairs and for demurrage as the result of a collision with the U. S. S. Rocket on the night of February 2, 1907, in the harbor at Norfolk, Va., be, and the same is hereby, referred to the United States district court, eastern district of Virginia, with jurisdiction to hear and determine the same to judgment: *Provided*, That the petition is filed within twelve months from the passage of this act.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to a third reading, read the third time, and passed.

WILLIAM J. SCOTT.

The next business on the Private Calendar was the bill (S. 8839) for the removal of restrictions from the third selection or allotment of lands selected by William J. Scott, a minor member of the Osage tribe of Indians, and for other purposes.

The bill was read, as follows:

Be it enacted, etc., That the restrictions be, and they are hereby, removed from the third selection or allotment of lands allotted to and in the name of William J. Scott, a minor member of the Osage tribe of Indians, being the following-described tract of land, to wit: The east half and the northwest quarter of the southeast quarter and southeast quarter of the northeast quarter of section 14, township 21, range 8 east of the Indian meridian, containing 160 acres of land, more or less, in Osage County, Okla.: *Provided*, That the said lands may be sold by the surviving parent, or in the event of his death by a guardian of said minor appointed by the county court of Osage County, Okla., and the proceeds of said sale covered into the United States Treasury and placed to the credit of said minor, to be held for his benefit and use and the interest thereon paid in the manner and at the same rate as is provided for funds of the Osages segregated under the terms of the Osage allotment act approved June 28, 1906: *Provided further*, That upon the passage of this act the Secretary of the Interior shall cause to be issued a deed conveying said lands to the surviving parent of said minor, or to the guardian of said minor if said parent be dead, and that in case of sale of said lands by said parent or guardian the same shall be sold subject to the approval of the Secretary of the Interior.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to a third reading, read the third time, and passed.

S. W. LANGHORNE AND H. S. HOWELL.

The next business on the Private Calendar was the bill (S. 1177) for the relief of S. W. Langhorne and H. S. Howell.

The bill was read.

The SPEAKER pro tempore. Is there objection?

Mr. FINLEY. I will reserve the right to object.

Mr. MANN. I object.

The SPEAKER pro tempore. Two objections are heard.

The Clerk will read the next bill.

O BAH BAUM.

The next business on the Private Calendar was the bill (S. 4103) authorizing the Secretary of the Interior to ascertain the amount due O bah baum, and pay the same out of the fund known as "For the relief and civilization of the Chippewa Indians."

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized and directed to ascertain the value of the timber heretofore and during the years of 1896, 1897, and 1898 cut upon the allotment of O bah baum, an allottee of the White Earth Diminished Reservation, upon lot No. 2 of the northeast quarter and lot No. 3 of the northwest quarter of section 16, township 142, range 37, and after deducting from the value of said timber the amount heretofore paid the said O bah baum to pay over to the said O bah baum the balance of the value of said timber, said payment to be made from the funds carried on the books of the office of the Secretary of the Interior under the head "For the relief and civilization of the Chippewa Indians in the State of Minnesota," created by the act of January 14, 1889.

SEC. 2. That this act shall take effect and be in force from and after the date of its passage.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

CERTAIN ACCOUNTS OF THE TREASURER.

The next business on the Private Calendar was the bill (S. 3956) authorizing a credit in certain accounts of the Treasurer of the United States.

The bill was read.

The SPEAKER pro tempore. Is there objection?

Mr. MACON, Mr. SHACKLEFORD, and others objected.

The SPEAKER pro tempore. Objection is heard.

WALTER F. ROGERS.

The next business was the bill (S. 6852) for the relief of Walter F. Rogers, executor of the estate of Sarah Edwards, late owner of lot No. 116, square No. 628, Washington, D. C., with regard to assessment and payment of damages on account of changes of grade due to construction of the Union Station, District of Columbia.

The bill was read, as follows:

Be it enacted, etc., That under and in accordance with the terms and provisions of the act of Congress approved April 22, 1904, entitled "An act to provide for payment of damages on account of change of grade due to construction of the Union Station, in the District of Columbia," as amended by the act of Congress approved June 29, 1906, the commission appointed under said act is hereby authorized and directed to meet and view the property known as lot No. 116, according to the subdivision made by A. B. Kelly, trustee, in square No. 628, as per plat of said subdivision in the office of the surveyor of the District of Columbia in book 14, at page 197, improved by house and premises No. 19 McCullough street NW., Washington, D. C., and hear testimony touching the damages to said property which have resulted from changes in the grade of streets, avenues, or alleys authorized by

the act of Congress approved February 28, 1903, relating to the construction of a union railroad station in the District of Columbia, and to appraise and determine the amount of damages, if any, to which the owner of said property so affected by change of grade may be entitled.

SEC. 2. That if any of the parties interested, their personal representatives, or the Commissioners of the District of Columbia shall be dissatisfied with the appraisement or award of said commission, the court shall, on motion of the parties so dissatisfied, direct the United States marshal to summon a jury of seven disinterested men, not related to any person in interest, to meet and view the said property and to appraise and determine the amount of damages to which the owner of said property so affected by change of grade may be entitled, as provided in and by the aforesaid act of Congress, so amended as aforesaid.

SEC. 3. That a sufficient sum to pay the compensation and expenses of said commission and the compensation of said jurors and the amount of any appraisement or award of damages made in favor of the owner of said property is hereby appropriated out of the revenues of the District of Columbia, and 50 per cent thereof shall be refunded to said District of Columbia by the United States.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

CERTAIN LANDS, KOOTENAI COUNTY, IDAHO.

The next business on the Private Calendar was the bill (S. 8822) providing for the relinquishment by the United States of certain lands in the county of Kootenai, in the State of Idaho.

The bill was read, as follows:

Be it enacted, etc., That the United States relinquish unto the county of Kootenai, in the State of Idaho, all of its right, claim, or title to or the possession of that certain piece or parcel of land situated in Kootenai County, in the State of Idaho, being a part of lot 49, which is a portion of the Fort Sherman Military Reservation, described as follows: Beginning at a point 1,332 feet north of a stone monument at or about high-water mark on the east boundary of Fort Sherman Military Reserve (abandoned), said point being the northeast corner of the Coeur d'Alene and Spokane Railway terminal grounds, in section 14, township 50 north, range 4 Washington base meridian, said point being also the northeast corner of lot 49 of said military reserve (abandoned); thence running west along the north line of said terminal grounds 332 feet; thence southeasterly along a straight line 265 feet, more or less, to a point 252 feet south of and 252 feet west of the place of beginning; thence east 252 feet to the intersection with the east line of said terminal grounds; thence north along said east line 252 feet to the place of beginning; to have and to hold forever as a part of the public lands belonging to the said county of Kootenai.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

CERTAIN LAND IN DADE COUNTY, FLA.

The next business on the Private Calendar was the bill (S. 8555) to relinquish the interest of the United States in and to certain land in Dade County, Fla., to John M. Bryan, jr.

The bill was read, as follows:

Be it enacted, etc., That the interest of the United States in and to the land situated in Dade County, in the State of Florida, to wit, the northwest quarter of the northeast quarter of section 1, township 51, range 41 south and east, is hereby relinquished and released unto John M. Bryan, jr., of Dade County, Fla., and patent issue therefor: *Provided*, The said John M. Bryan, jr., pay one dollar and a quarter for the land referred to prior to the issuance of the patent to him.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

JOHN H. LAYNE.

The next business on the Private Calendar was the bill (S. 9402) for the relief of John H. Layne.

The bill was read, as follows:

Be it enacted, etc., That in the administration of the civil-service laws John H. Layne shall hereafter be held and considered to have been discharged from the military service of the United States as a private of Company G, Nineteenth Regiment U. S. Infantry, on the 19th day of December, 1898, by reason of disability resulting from wounds or sickness incurred in the line of duty.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

CERTAIN CLAIMS AGAINST THE DISTRICT OF COLUMBIA.

The next business on the Private Calendar was the bill (S. 4035) to provide for the payment of certain claims against the District of Columbia in accordance with the act of Congress approved January 26, 1897, and as amended July 19, 1897.

The bill was read, as follows:

Be it enacted, etc., That the auditor of the supreme court of the District of Columbia is hereby empowered and directed to examine and audit for settlement in accordance with the act of Congress approved January 26, 1897, and as amended July 19 1897, the claims of the following persons, as named below, for property taken, injured, or destroyed by reason of the destruction or removal of the Northern Liberty Market, in the city of Washington, D. C., in September, 1872, as also all claims of said persons for payments made for the purchase, rent, or use of any stall privilege in said market house and for license for conducting any business therein, to the extent of the unexpired term of said purchase, rent, use, or license.

The names of the persons whose claims are to be audited are: Louisa A. Berger, Henry Stello, Charles H. Stello, and Theodore J. Stello, upon proof of their being the widow and only heirs of Henry Stello, deceased, and upon proof that said Henry Stello was the owner of stall privileges, the compensation for the loss of stalls in this case not to exceed the sum of $300 for any one stall; Catherine E. Shreve and Nellie M. Healey, upon proof of their being the widow and only heir of William H. Shreve, deceased, and upon proof that the said William H. Shreve was the owner of the stall privileges, the compensation for loss of stall not to exceed the sum of $200 for any one stall; Elizabeth Haase and Rosa Haase, upon proof of their being the widow and only heir of Henry Haase, deceased, and upon proof that the said Henry Haase was the owner of the stall privilege, the compensation for the loss of stall not to exceed the sum of $300; Harriet Dover, William G. Reed, and Ida V. Reed, upon proof of their being the only heirs of Armistead Reed, deceased, and upon proof that the said Armistead Reed was the owner of the stall privilege, the compensation in this case not to exceed the sum of $200 for the loss of any one stall; Alexander P. Gray, upon proof that he was the owner of the stall privilege, the compensation in this case not to exceed the sum of $300 for the loss of any one stall; Jacob N. Leapley, upon proof that he was the owner of the stall privilege, the compensation in this case not to exceed the sum of $300 for any one stall; Annie F. Ward, Eva M. Eppley, Mamie M. Leimbach, Lydia Baptista, and George J. Stinzing, upon proof of their being the only heirs of Frederick Stinzing, deceased, and upon proof that the said Frederick Stinzing was the owner of the stall privileges, the compensation for the loss of stalls in this case not to exceed the sum of $200 for any one stall; Eliza Shaffer and Emma Myers, upon proof of their being the only heirs of Christian Wagner, deceased, and upon proof that the said Christian Wagner was the owner of stall privileges, the compensation for the loss of stalls in this case not to exceed the sum of $200 for any one stall; Mary E. Gross, upon proof of her being the only heir of Barbara Brown, deceased, and upon proof that the said Barbara Brown was the owner of stall privileges, the compensation in this case not to exceed the sum of $200 for any one stall; Mary L. Simaker, Emma J. Ward, Cecelia Manning, and Joseph Gold, upon proof of their being the only heirs of Joseph Gold, deceased, and upon proof that the said Joseph Gold was the owner of stall privileges, the compensation in this case not to exceed the sum of $200 for any one stall.

SEC. 2. That when the auditor has ascertained the amount of the loss, as above described, in any case growing out of the removal or destruction of the market as aforesaid, he shall report such claims, so far as allowed by him, the total amount of such allowances not to exceed the sum of $2,000, to the Commissioners of the District of Columbia, who shall, in case they approve said claims, report the same to Congress, in their annual or deficiency estimates, for payment out of the revenues of the District of Columbia. That the sum of $300, or as much thereof as may be necessary, to pay for the services of the auditor in examining and auditing said claims for settlement, and the further sum of $250, or so much thereof as may be necessary, to pay the actual and necessary expenses incurred in making said examination and audit, is hereby appropriated, to be paid wholly from the revenues of the District of Columbia.

SEC. 3. That the said auditor shall make a tabular statement of the within-named claims, the persons owning the same, and the amount found to be due on account of each; and for the purposes hereinbefore specified said auditor shall have the power to subpœna witnesses, administer oaths, and examine witnesses under oath, and shall have full access to all of the records, books, papers, and vouchers of every kind whatever of the late board of public works and the District of Columbia, and shall provide, by fair and equitable rules, for the examination of the same by claimants or their attorney. Said auditor shall give notice for the presentation of the claims hereinbefore specified in such manner as he may deem necessary, and no claim shall be audited or allowed unless presented within thirty days after the first publication of such notice; and said auditor shall make full report of all his acts and proceedings to the Commissioners of the District of Columbia.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

DEMETRIO CASTILLO, JR.

The Clerk read as follows:

S. R. 108. Joint resolution authorizing the Secretary of War to receive for instruction at the Military Academy, at West Point, Mr. Demetrio Castillo, jr., of Cuba.

The Clerk read the bill.

Mr. PARKER. Mr. Speaker, that gentleman is already provided for in the Military Academy bill.

Mr. MANN. Is the gentleman sure of that?

Mr. PARKER. Yes.

Mr. MANN. I object.

WILLIAM MARTINSON.

The Clerk read as follows:

S. 2544. An act for the relief of William Martinson.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to correct the military record of William Martinson, late of Company G, Twelfth Regiment Illinois Volunteer Cavalry, and grant him an honorable discharge: *Provided*, That no pay, bounty, or other emolument shall become due or payable by virtue of the passage of this act.

Mr. HOLLIDAY. I would like to ask the gentleman if this has been reported by the Committee on Military Affairs in the House?

Mr. CAMPBELL. It has.

The bill was ordered to be read a third time, was read the third time, and passed.

PAUL SINOCK.

The Clerk read as follows:

S. 3164, an act to correct the military record of Paul Sinock.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to amend the records of the Second Regiment of Louisiana Infantry Volunteers so as to show that Paul Sinock, late a sergeant of Company G of said regiment, was born in Germany, and to issue to him a certificate of honorable discharge, as of date of April 18, 1899, showing such birthplace: *Provided*, That no pay, bounty, or other emolument shall accrue by reason of the passage of this act.

The bill was ordered to be read a third time, was read the third time, and passed.

ROBERT MORGAN GILSON.

Mr. FOSTER of Vermont. Mr. Speaker, I ask unanimous consent to return to the bill (S. 3952) to restore to the active list of the United States Marine Corps the name of Robert Morgan Gilson, which was passed without prejudice.

The Clerk read the bill, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to restore Robert Morgan Gilson, late a captain in the United States Marine Corps, to be a captain in the United States Marine Corps: *Provided*, that the said Robert Morgan Gilson shall establish to the satisfaction of the Secretary of the Navy, by the usual examination for such grade, his physical, mental, moral, and professional fitness to perform the duties thereof: *And provided further*, That the said Gilson shall be carried as additional to the number of the grade to which he may be restored or at any time thereafter promoted; and that no pay, bounty, or emoluments shall be allowed by reason of the passage of this act.

Mr. MANN. I reserve the right to object.

Mr. FOSTER of Vermont. Mr. Speaker, the purpose of this is to give to this man the position that he had when he resigned from the service.

Mr. MANN. I may say to the gentleman from Vermont that no reason has been given for the report, and neither the gentleman nor anyone else has given a reason for the passage of the bill.

Mr. FOSTER of Vermont. I shall be very glad to give a reason for it. This man served faithfully for five years, and then his health failed him to the extent that would not justify his application to be placed on the retired list. He felt that his condition was such that it was not safe for him to remain in the service; that he could not perform properly the duties of the service as they should be performed. He was a conscientious young man and accordingly he retired. He has now recovered his health and his strength, and he is very anxious to return to the service of his country.

All he asks is that the United States naval authorities shall examine him physically and mentally, and if they find him qualified physically and mentally that he shall be restored to the place that he left.

Mr. MACON. Does the gentleman from Vermont think it would be right or fair to other officers in the army to allow this man to retire for five years and then go back and take rank over them?

Mr. FOSTER of Vermont. He does not take the rank from anyone. He simply goes back to the place he left.

Mr. MACON. Have not some others been promoted since then?

Mr. MANN. Does the gentleman propose to restore him to the same position he occupied when he resigned?

Mr. FOSTER of Vermont. No; to the same relative position, so he does not gain anything.

Mr. MANN. So if he has been out five years, he still will in the end receive the benefit of promotion as though he had remained in the service?

Mr. FOSTER of Vermont. No; not that.

Mr. MANN. Does the gentleman propose to restore him to the place following the same name that he would have followed if he had remained in?

Mr. FOSTER of Vermont. If I understand the gentleman correctly, that is it.

Mr. MANN. That would give him the same benefit of promotion hereafter as though he had remained in the service?

Mr. FOSTER of Vermont. He does not get the benefit of longevity. I will yield to the gentleman from Pennsylvania.

Mr. BUTLER. Mr. Speaker, it is intended by this amendment to restore this man to the service in the place that he had when he left the service. The man whose name is indicated in the bill is the one that stands in the place now, by regular promotion, that Mr. Gilson had when he left.

Mr. MANN. Does he go back into the same position he occupied when he left?

Mr. BUTLER. The same grade, may I ask my friend?

Mr. MANN. No; the same relative position.

Mr. BUTLER. He goes back on the register in the same place that he retired from.

Mr. SLAYDEN. What rank did he have when he retired?

Mr. BUTLER. Captain, and he goes back as captain; and I think he is twenty-second or twenty-third on the register.

Mr. SLAYDEN. What do all the other captains below 22 or 23 think about this?

Mr. BUTLER. It is asked that he be restored as an additional number.

Mr. FOSTER of Vermont. It will not interfere with the others.

Mr. SLAYDEN. It is bound to.

Mr. BUTLER. It is asked to restore him as an additional number, so that he will not stand in the way of the promotion of anyone.

Mr. MANN. Suppose he was No. 22 on the list of captains when he went out; if he goes in now what would he go in as—No. 22A?

Mr. BUTLER. Yes; or as an additional number. He will promote along with No. 21.

Mr. MANN. Although the man who was No. 21 when he went out now may be a major?

Mr. BUTLER. No, no! The name is mentioned particularly there in the bill, as an amendment.

Mr. MANN. The name of the man means nothing to us.

Mr. BUTLER. But this man stands a certain number on the register.

Mr. MANN. I know; but the question which I ask is plain and simple to everyone in the House. Suppose when he went out he was No. 22 on the list of captains?

Mr. BUTLER. Yes.

Mr. MANN. Now, the man who was No. 21 on the list of captains at that time is probably a major by this time.

Mr. BUTLER. Yes.

Mr. MANN. Or at least away up on the captains' list. Now, does this man go back now as No. 22A on the list of captains?

Mr. BUTLER. He goes back as No. 22A on the list of captains, just where he left, and it is intended by this amendment to put him there.

Mr. SLAYDEN. Has the President recommended that the Marine Corps be increased by an additional officer?

Mr. BUTLER. No.

Mr. SLAYDEN. Has the commander in chief of the Marine Corps recommended that he needs one more captain?

Mr. BUTLER. The department has asked for the restoration of this man.

Mr. SLAYDEN. Unsolicited, of course?

Mr. BUTLER. I could not tell.

Mr. FOSTER of Vermont. I will answer that question——

Mr. MANN. This is not a West Point man?

Mr. BUTLER. No.

Mr. MANN. So he would take the place of no one?

Mr FOSTER of Vermont. No.

Mr. MACON. I want to ask the gentleman a question. When this captain retired, some one else took his place?

Mr. FOSTER of Vermont. Yes.

Mr. MACON. In going back and taking that particular place, will he not displace somebody?

Mr. FOSTER of Vermont. No.

Mr. BUTLER. This is restoring him as an additional number, and he stands alone.

Mr. FOSTER. No. 22A. He displaces no one, I will say to the gentleman.

The SPEAKER pro tempore. Is there any other objection? [After a pause.] The Chair hears none. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

RECOGNIZANCES IN THE JUVENILE COURT.

Mr. CAMPBELL. Mr. Speaker, I now ask unanimous consent that the Committee on the District of Columbia be discharged from the further consideration of the bill (S. 8518) empowering the juvenile court of the District of Columbia to issue execution on forfeited recognizances, and that the bill be now passed, which bill I send to the clerk's desk and ask to have read. I will state that this is the bill which was called up a few moments ago and to which the gentleman from Missouri [Mr. SHACKLEFORD] made objection. Since that time the gentleman from Missouri has examined the bill and, as I understand it, now has no objection to its passage.

Mr. SHACKLEFORD. Mr. Speaker, having read the bill, which I had not an opportunity to do before, I withdraw my objection.

Mr. CAMPBELL. Then, I ask for its present consideration.

The SPEAKER pro tempore. The Clerk will read the bill.

The Clerk read as follows:

Be it enacted, etc., That the juvenile court of the District of Columbia shall have power to issue execution on all forfeited recognizances upon motion of the proper prosecuting officer, and all writs of fieri facias or other writs of execution issued by said court shall be directed to and executed by the marshal of the District of Columbia. And any recognizance taken in the juvenile court, after being forfeited, may be transmitted to the clerk's office of the supreme court of the District of Columbia and therein docketed in the same manner as forfeited recognizances taken in the police court are now docketed, and thereupon shall have the same effect as if taken in said supreme court; and said lien shall continue as long as such judgment, decree, or recognizance shall be in force or until the same shall be satisfied or discharged.

The SPEAKER pro tempore. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, read the third time, and passed.

NESTLER BREWING COMPANY.

Mr. HOWELL of Utah. Mr. Speaker, I ask unanimous consent to return to Calendar No. 1237, on page 34 of the calendar, to consider Senate bill 6373.

Mr. MACON. Mr. Speaker, I would like to know what the bill is before giving consent.

Mr. HOWELL of Utah. It is Senate bill 6373, a bill for a small claim of $50, which was objected to by the gentleman from Georgia and the gentleman from South Carolina, and both of them, on further consideration, have withdrawn their objections, and I understand there is no further objection.

Mr. MACON. State what the bill provides, so we will know whether it is meritorious or not.

Mr. HOWELL of Utah. The bill is to pay to the Nestler Brewing Company the sum of $50 for a repayment of stamps. This company assigned their claim to their attorney, and the application for the repayment of those stamps——

Mr. MANN. That is, the attorney made application.

Mr. HOWELL of Utah. The attorney made application, but under the law the Commissioner of Internal Revenue could not recognize the attorney as having a redeemable interest in those stamps, and therefore he refused the claim, and before they could get the claim in directly the statute of limitation worked.

Mr. MACON. I will say in regard to that, Mr. Speaker, that we have a great many Spanish-American war stamps that are barred by the statutes. If we are to open up this matter and allow these stamps to be revived by removing the statutory bar, why should we not allow the removal of the statutory bar against the other class of stamps?

Mr. MANN. With the permission of my friend from Arkansas, I will suggest that in this case it appears by the report that the company not being familiar with the law, as a matter of convenience made an assignment of the claim to their attorney so that he might make the claim here. The claim was not, I understand, assigned until the statute of limitation had run.

Then it was rejected on the ground that under the law they could not allow a claim to an assignee. As a matter of fact, no negligence on the part of the company occurred; it was nothing but a lack of knowledge, and it is only a repayment of a $50 stamp which was not used.

Mr. MACON. Does not that same lack of knowledge extend, in a way, to the owners of Spanish-American war stamps? They had no direct knowledge; they had to take knowledge of the law, but they failed to do so, and hence the statute of limitation has barred their right to have them redeemed.

Mr. MANN. I may say to my friend from Arkansas we have once or twice since I have been in the House extended the time for the redemption of those stamps.

Mr. MACON. If there is any considerable number of them outstanding, perhaps it would be wise to extend it again. The amount carried in this bill is small, so I will not object to its passage.

The bill was ordered to be read a third time, was read the third time, and passed.

SARAH J. FOWLER.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules, discharge the Committee of the Whole House from further consideration of the bill H. R. 25980, and pass the bill.

The SPEAKER pro tempore (Mr. FASSETT). The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 25980) for the relief of Sarah J. Fowler.

Be it enacted, etc., That the Commissioners of the District of Columbia be, and they are hereby, authorized to place the name of Sarah J. Fowler, widow of the late John H. Fowler, on the pension roll of the police department of the said District at the rate of $50 per month.

The SPEAKER pro tempore. Is a second demanded?

A second was not demanded.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

DISTRIBUTION OF CONGRESSIONAL RECORD, ETC., TO GOVERNOR-GENERAL OF THE PHILIPPINE ISLANDS.

Mr. LANDIS. Mr. Speaker, I desire to ask unanimous consent for the present consideration of the bill H. R. 24864.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 24864) to provide for the distribution of the CONGRESSIONAL RECORD and public bills, documents, etc., to the governor-general of the Philippine Islands at Manila, P. I.

Be it enacted, etc., That the Public Printer is hereby authorized to furnish gratuitously to the governor-general of the Philippine Islands at Manila 10 copies of the daily CONGRESSIONAL RECORD and three copies of all bills, resolutions, documents, and reports, as printed, and he is hereby directed to print, if necessary, the extra number required to comply with this act.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

PRINTING HEARINGS, INVESTIGATION OF WOOD PULP, ETC.

Mr. LANDIS. Mr. Speaker, I ask unanimous consent for the present consideration of the following concurrent resolution.

The SPEAKER pro tempore. The Clerk will report the concurrent resolution.

The Clerk read as follows:

House concurrent resolution 60.

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound 2,000 copies of the hearings, including index, of the select committee of the House to investigate as to pulp wood, pulp, and paper, of which 1,500 copies shall be for the use of the House, including 300 copies to be distributed under the direction of the members of said committee elected to the Sixty-first Congress, and 500 copies for the use of the Senate.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The question was taken and the concurrent resolution was passed.

ANNUAL REPORT, ISTHMIAN CANAL COMMISSION.

Mr. LANDIS. Mr. Speaker, I ask unanimous consent for the present consideration of Senate concurrent resolution No. 105.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed 3,000 additional copies of the Annual Report of the Isthmian Canal Commission for 1908; with accompanying illustrations, 1,000 copies for the use of the Senate and 2,000 copies for the use of the House of Representatives.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

BRUSSELS CONVENTION.

Mr. LANDIS. Mr. Speaker, I also offer the following Senate joint resolution, S. R. 105, reported from the Committee on Printing (H. Rept. 2317).

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read as follows:

Joint resolution (S. R. 105) for the purpose of more fully carrying into effect the convention concluded at Brussels on March 15, 1886, in reference to the exchange of official journals, etc.

Resolved, etc., That for the purpose of more fully carrying into effect the provisions of the convention concluded at Brussels on March 15, 1886, and proclaimed by the President on January 15, 1889, the Public Printer is hereby authorized and directed to supply to the Library of Congress such number as may be required, not exceeding 100 copies, of the daily issue of the CONGRESSIONAL RECORD for distribution, through the Smithsonian Institution, to the legislative chambers of such foreign governments as may agree to send to the United States current copies of their parliamentary record or like publication, such documents, when received, to be deposited in the Library of Congress.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

CUSTOMS TARIFF.

Mr. LANDIS. Mr. Speaker, I ask unanimous consent for the present consideration of the following concurrent resolution (S. C. Res. 102).

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, etc., That there be printed 15,000 additional copies of Senate document 547, Sixtieth Congress, second session, relating to customs tariffs and consisting of Senate and House reports of 1888, 1890, 1894, and 1897; 5,000 copies for the use of the Senate and 10,000 copies for the use of the House of Representatives.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

REPORT OF SUPERINTENDENT OF THE CAPITOL.

Mr. BARTHOLDT. Mr. Speaker, I ask unanimous consent to have printed as a document the report of the Superintendent of the Capitol, with illustrations (H. Doc. No. 1499).

The SPEAKER pro tempore. Is there objection?

There was no objection.

ADDITION TO ROCK CREEK PARK.

Mr. SMITH of Michigan. Mr. Speaker, I move to discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill S. 4441, and ask for its passage.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the title, as follows:

An act (S. 4441) to acquire certain land in the District of Columbia as an addition to Rock Creek Park.

Mr. SULZER. Mr. Speaker, I object.

Mr. ALEXANDER of Missouri. I object, Mr. Speaker.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

An act (S. 4441) to acquire certain land in the District of Columbia as an addition to Rock Creek Park.

Be it enacted, etc., That certain pieces and parcels of land lying in the vicinity of Massachusetts avenue and Rock Creek, as hereinafter described, be acquired, as hereinafter set forth, and they shall thereupon become a part of Rock Creek Park, District of Columbia.

SEC. 2. That the Chief of Engineers of the United States Army and the Commissioners of the District of Columbia, hereinafter referred to as the board of control of Rock Creek Park, shall cause to be made an accurate map of said pieces and parcels of land showing the location, quantity, and character of each piece and parcel of private property to be acquired and the location of proposed new streets, which map shall be filed and recorded in the public records of the District of Columbia, and from and after the date of filing said map the several tracts and parcels of land shown thereon shall be held as taken for public uses and the title thereof vested in the United States, subject to the payment of just compensation to be determined by said board of control of Rock Creek Park and approved by the President of the United States: *Provided*, That such compensation be accepted by the owner or owners of the several pieces and parcels of land.

SEC. 3. That the pieces and parcels of land first to be taken shall be those tracts of land in the District of Columbia the title to which was vested in Charles J. Bell, Amos H. Plumb, and John Cassels, trustees by decree of the supreme court of the District of Columbia, entered on the 15th day of April, 1903, in equity cause No. 23345, described as follows: All that part of the aforesaid property lying to the south of the south building line of Massachusetts avenue and to the east of the center line of Rock Creek drive, containing 3½ acres, more or less; also all that part of the aforesaid property beginning on the center line of Rock Creek drive and on the dividing line of the aforesaid property and Woodley Park; thence southerly along the line of said property to a point at or near Rock Creek, and thence southwesterly along the line of said property down Rock Creek to the north building line of Massachusetts avenue; thence northwesterly along said building line of Massachusetts avenue to where the west line of said property leaves said avenue; thence following said property line in a northerly and northwesterly direction to its intersection with the north building line of the Observatory circle; thence along said building line of said circle westerly to its intersection with the center line of Thirty-fourth street; thence north along the center line of Thirty-fourth street to the center of Garfield street; thence due east to a point perpendicular distant 325 feet from the center line of Cleveland avenue; thence southeasterly and parallel to said center line of Cleveland avenue and 325 feet distant therefrom along the center of a proposed new street to the point where said line intersects the center line of Twenty-ninth street; thence southeasterly by reverse curved line, following the center of a proposed new street, to the intersection of the center line of Rock Creek drive; thence about 350 feet along said center line of Rock Creek drive to the point of beginning, containing about 84½ acres; also all the portions of lots 1, 2, 3, 4, and 5, block 14, and parts of lots 2 and 21, block 12, Woodley Park, as are included between Connecticut avenue, Rock Creek, the west line of Woodley Park, and the center line of Rock Creek drive, containing 8¾ acres, more or less; also that part of a tract known as Normanstone, owned by William E. Edmonston and others, trustees, and lying between Massachusetts avenue, the grounds of the United States Naval Observatory, and the east line of said tract north of Massachusetts avenue, containing 2.7 acres, more or less: *Provided, however*, That the said board of control may exchange for a portion of this ground, foot for foot, that piece or parcel of ground now owned by the United States, containing 0.7 of an acre, more or less, lying on the south side of Massachusetts avenue next to the Observatory circle and east thereto and bordering on the north line of the tract known as Normanstone. All references to streets, avenues, or highways in the foregoing description refer to such streets, avenues, and highways as the same are laid down on the third section of the plans for the permanent system of highways in that part of the District of Columbia lying outside of cities.

SEC. 4. That the portion of Benton street from where said Benton street intersects the reverse curved line of boundary referred to in the aforesaid description eastwardly to the junction of said Benton street with said Rock Creek drive, as laid down on said highway plans, be, and the same is hereby, abandoned as a highway and for highway purposes, and upon acquisition by the United States of the title to the pieces and parcels of land herein described, and to be purchased as aforesaid, the United States shall dedicate and set apart for and as a public highway a strip of land 30 feet wide along the boundary line of said park, as above described, wherever said boundary is the center line of a street laid down in said plan of the permanent system of highways of the District of Columbia or is the center line of any new street or streets provided for herein, and shall further establish a building restriction line 15 feet back of the said 30-foot strip of land.

SEC. 5. That as one of the conditions upon which this act shall become operative, and contemporaneously with conveyance of the title to the United States of the pieces and parcels of land hereinbefore described, the aforesaid trustees or owners, without compensation and free of all costs and charges to the United States or the District of Columbia, by proper conveyance, shall set apart, convey, and dedicate for the purposes of a public highway, out of and from the remainder of the property the title to which is vested in said trustees or owners aforesaid, a strip of land 30 feet wide along the boundary line of said park, as above described, wherever said boundary line is the center line of a street laid down on the said plan of permanent system of highways or is the center line of any new street or streets provided for herein; and shall, in addition to such conveyance and dedication and in the same deed, enter into an agreement to establish building restriction lines to agree with the street lines, as shown on said highway plan, or where any new street or streets are provided for herein, the said building restriction lines to be a width of 15 feet adjacent to the dedicated portion of the street, the intent of this act being that the width of such street or streets included within such building restriction lines shall be 90 feet: *Provided*, That the space between the street lines conveyed and dedicated as herein required and the building restriction lines established as herein required shall be considered as private property set aside and to be used for parking purposes, and in such agreement said trustees or owners shall agree that said parking shall be subject to the regulations of the Commissioners of the District of Columbia in regard to the height of parking and the projection of buildings beyond the building line, and that the District of Columbia shall have a right of way through said parking for sewers and water mains free of cost, and to lay thereon sidewalks, if, in the judgment of said commissioners, the space between street lines is not sufficient to admit the construction of such sidewalk within said lines.

SEC. 6. That to pay the expense of inquiry, survey, cost of land taken, and all other necessary expenses incidental thereto, the sum of $423,000, or so much thereof as may be necessary, is hereby appropriated, one half out of the revenues of the District of Columbia and the other half out of any moneys in the United States Treasury not otherwise appropriated, the said sum to be disbursed by the disbursing officer of the District of Columbia as now provided by law, upon vouchers to be approved by the said board of control of Rock Creek Park.

During the reading,

Mr. HACKNEY. Mr. Speaker, a parliamentary inquiry. I understand that the special rule applies only to the Private Calendar. This is not on the Private Calendar.

The SPEAKER pro tempore. This is a motion to suspend the rules.

The Clerk concluded the reading of the bill.

The SPEAKER pro tempore. Is a second demanded?

Mr. NORRIS. I demand a second.

The SPEAKER pro tempore. Under the rules a second is ordered. The gentleman from Michigan [Mr. SMITH] is entitled to twenty minutes and the gentleman from Nebraska [Mr. NORRIS] is entitled to twenty minutes.

Mr. SMITH of Michigan. Does the gentleman desire to use his time now?

Mr. NORRIS. I desire to hear the bill explained.

Mr. SMITH of Michigan. Mr. Speaker, I yield ten minutes to the gentleman from Ohio [Mr. BURTON].

[Mr. BURTON of Ohio addressed the House. See Appendix.]

Mr. NORRIS. Mr. Speaker, not knowing that this bill was coming up, I am not myself prepared with some of the documents that I would otherwise have here to-day had I known in advance that the bill was to be taken up at this time. It comes from the Committee on Appropriations. About a year or two ago, I think, practically the same bill was referred to the Committee on Public Buildings and Grounds. I was a member of the subcommittee that went out and examined this particular land, and, as I remember it, it is absolutely valueless for any building purposes, or for almost any other purposes. I do not believe it suitable for a playground, because if the children ever got down into the gullies you never could get them out, and if they went down from the top they would certainly be killed when they struck the bottom. I do not believe that the Government of the United States can afford to pay this price for this land that, as a matter of fact, we thought at that time neither the Government nor the District needed.

Mr. HEFLIN. Is this the same land that was talked about here about a year ago, the purchase of which the gentleman from Florida [Mr. CLARK] so earnestly opposed?

Mr. NORRIS. I think it is. I do not remember about the gentleman from Florida, but I opposed it, as did several other gentlemen, practically all of the gentlemen from the Committee on Buildings and Grounds, and the proposition was defeated in the House. Now, as I understand it, without any further consideration from any other committee, it comes up again.

Mr. PERKINS. Will the gentleman yield for a question?

Mr. NORRIS. I will.

Mr. PERKINS. Will the gentleman state briefly where this land is situated?

Mr. NORRIS. It is north of Massachusetts avenue, near the Naval Observatory, and runs north in an irregular shape.

Mr. PERKINS. On both sides of Rock Creek?

Mr. MANN. Mainly on the other side of Rock Creek, between the observatory and the present park.

Mr. NORRIS. I yield five minutes to the gentleman from Missouri [Mr. BARTHOLDT].

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

CRIMINAL CODE.

Mr. MOON of Pennsylvania. Mr. Speaker, I ask unanimous consent to suspend the proceedings on the present motion and consider a conference report on the bill S. 2982, the criminal-code bill.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to suspend the proceedings on the present motion and consider the conference report on the bill S. 2982, the criminal code bill. Is there objection? [After a pause.] The Chair hears no objection.

Mr. MOON of Pennsylvania. And I ask unanimous consent that the statement may be read in lieu of the report.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 2982, being a bill to codify, revise, and amend the penal laws of the United States, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate agree to the House amendment, with amendments to sections 7, 19, 20, 37, 51, 95, 125, 126, 140, 187, 200, 226, 227, 243, 253, 254, 255, 256, 257, 262, 263, 276, 295, 300, 321, 322, 323, and 349.

That the House agree to the amendments proposed by the Senate conferees, as follows:

Section 7: On page 4, in line 21, after the words "United States," insert the words "or in any place subject to the jurisdiction thereof."

Section 19: On page 12, line 13, substitute a semicolon for the period, and add the following: "and shall, moreover, be thereafter ineligible to any office or place of honor, profit, or trust created by the Constitution or laws of the United States."

Section 20: On page 12 strike out section 20.

Section 23: On page 14, strike out section 23, reading as follows:

"SEC. 23. No citizen possessing all other qualifications which are or may be prescribed by law shall be disqualified for service as grand or petit juror in any court of the United States, or of any State, on account of race, color, or previous condition of servitude; and any officer or other person charged with any duty in the selection or summoning of jurors who shall exclude or fail to summon any citizen for the cause aforesaid shall be fined not more than five thousand dollars."

Section 24: Page 14, in line 16, strike out the words "or to keep the peace at the polls."

Section 37: On page 22, in line 11, substitute a comma for the semicolon, strike out the remainder of the section, and in lieu thereof insert the following: "shall be fined not more than five thousand dollars or imprisoned not more than five years, or both. And whoever shall knowingly purchase or receive in pledge for any obligation or indebtedness from any soldier, officer, sailor, or other person called into or employed in the military or naval service, any arms, equipments, ammunition, clothes, military stores, or other public property, whether furnished to the soldier, sailor, officer, or person under a clothing allowance or otherwise, such soldier, sailor, officer, or other person not having the lawful right to pledge or sell the same, shall be fined not more than five hundred dollars and imprisoned not more than two years."

Section 51: On page 28, at the end of the section, add the following: "And nothing in this section shall interfere with or take away any right or privilege under any existing law of the United States to cut or remove timber from any public lands."

Section 95: On page 48, at the end of line 21, add the words "prima facie."

Section 105: On page 53, in line 1, after the word "or," strike out the word "be."

Section 125: On page 63, in lines 3 to 7, amend the proviso so as to read as follows: "*Provided*, That no person shall be deemed guilty of a violation of any such rule unless prior to such alleged violation he shall have had actual knowledge thereof."

Section 126: On page 63, in line 13, strike out the word "and" and insert in lieu thereof the word "or;" and in line 14 substitute a comma for the period at the end of the section and add the words "or both."

Section 140: On page 70 strike out section 140.

Section 142: On page 71, in line 1, strike out the word "now" before the word "provided."

Section 187: On page 98, in line 17, after the word "vessel," insert the words "to the current business of the carrier."

Section 194: On page 100, in line 18, strike out the word "or" before the word "embezzling."

Section 200: On page 104, in line 14, substitute a semicolon for the comma, strike out the remainder of the section, and in lieu thereof insert the following: and if in effecting or attempting to effect such robbery he shall wound the person having custody of such mail, or put his life in jeopardy by the use of a dangerous weapon, or for a subsequent offense, shall be imprisoned twenty-five years.

Section 226: On page 123, in line 6, before the word "submit," insert the word "knowingly."

Section 227: On page 123, in line 22, before the word "misstate," insert the word "or;" and in line 23, before the word "conceal," insert "for the purpose aforesaid shall knowingly and willfully."

Sections 241, 242, 243: On pages 132 and 133 strike out the word "That" at the beginning of each section and begin the first word of each section with a capital letter.

Section 243: On page 133, in line 13, after the word "shall," insert the word "knowingly."

Section 248: On page 136, in line 19, substitute for the words "and every" the words "or any."

Section 253: On page 140, in lines 9 and 10, strike out the words "being a citizen or other person resident."

Section 254: On page 140, in line 17, strike out the word "American;" and in line 18 substitute for the words "jurisdictional limits" the word "jurisdiction."

Section 255: On page 141, in line 1, strike out the word "American."

Section 256: On page 141 strike out section 256.

Section 257: On page 141, in line 12, strike out the words "State, Territory, or District," and in lieu thereof insert the words "place subject to the jurisdiction."

In line 13 strike out the words "a foreign country, state, or" and in lieu thereof insert the words "any other."

In lines 14 and 15 strike out the words "State, Territory, or District" and in lieu thereof insert the words "place subject to the jurisdiction."

Section 262: On page 143, in lines 13 and 14, strike out the words "jurisdictional limits" and in lieu thereof insert the word "jurisdiction."

Section 263: On page 143, in line 21, before the word "directly" insert the words "or under the jurisdiction thereof."

Section 270: On page 146, in line 11, strike out the word "other" before the word "foreign."

Section 276: On page 150, in line 8, strike out all after the period, and also all of lines 9 and 10.

Section 279: On page 151, in line 20, strike out the word "be" before the word "fined."

Section 295: On page 158 transpose the language of line 10 so that it will read "United States, beats, wounds, or without justifiable cause, im-."

Section 300: On page 161, in line 3, strike out the word "and" at the end of the line and in lieu thereof insert the word "or."

Section 321: On page 169, in line 15, strike out the words "in any Territory."

Section 322: On page 169, in line 19, strike out the words "in any Territory."

Section 323: On page 169, in line 23, strike out the words "in any Territory."

On page 183 strike out all of lines 21, 22, and 23, reading as follows:

"Section 4 of 'An act to protect all citizens in their civil and legal rights,' approved March 1, 1875."

On page 196 strike out all of lines 13 to 20, both inclusive, reading as follows:

"No citizen possessing all other qualifications which are or may be prescribed by law shall be disqualified for service as grand or petit juror in any court of the United States, or of any State, on account of race, color, or previous condition of servitude; and any officer or other person charged with any duty in the selection or summoning of jurors who shall exclude or fail to summon any citizen for the cause aforesaid shall be fined not more than $5,000."

Section 349: On page 198, in line 1, strike out the word "from" and in lieu thereof insert the word "on;" in line 2

strike out the word "July" and in lieu thereof insert the word "January;" also in line 2 strike out the word "nine" and in lieu thereof insert the word "ten."

R. O. MOON,
HERBERT PARSONS,
SWAGAR SHERLEY,
Managers on the part of the House.

W. B. HEYBURN,
GEO. SUTHERLAND,
JAMES P. CLARKE,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying report as to each of the amendments of the Senate, namely:

Section 7: The words "or in any place subject to the jurisdiction thereof" are added after "United States."

The offense denounced by this section is that of recruiting soldiers and sailors to engage in any armed hostility against the United States. No reason exists why this should not be made unlawful not only within the United States, but in all places subject to the jurisdiction thereof. When the law was originally passed the words "United States" fully covered our whole jurisdiction.

Section 19: The restoration in section 19 of the words "and shall moreover be thereafter ineligible to any office, or place of honor, profit, or trust created by the Constitution or laws of the United States."

Section 20: The omission of section 20, which is in the following language: "If in the act of violating any provision of the preceding section any other felony or misdemeanor be committed, the offender shall be punished for the same with such punishment as is attached to such felony or misdemeanor by the laws of the State in which the offense is committed."

Sections 19 and 20 are a part of what is popularly known as the "civil rights" sections, passed May 31, 1870.

It will be observed that section 20 creates no new offense. It simply imposes an additional penalty for an overt act that may be committed in pursuance of the conspiracy denounced in section 19.

By section 20, if in pursuance of a conspiracy to injure or intimidate any citizen in the free exercise of any right or privilege secured to him by the Constitution or laws of the United States, a murder should be committed, upon indictment and conviction for the conspiracy the person found guilty may be executed if the laws of the State in which the offense is committed impose the penalty of death for the crime of murder.

The House and Senate adopted different methods of modifying the rigors of the punishment under these two sections. Section 19 provides for a maximum penalty of a fine of not more than $5,000 and imprisonment for not more than ten years, and declares that any person convicted thereunder shall be thereafter ineligible to any office, place of honor, profit, or trust created by the Constitution or laws of the United States.

The House modified section 19 by striking out this disqualifying clause. The Senate left the disqualification to hold office in and struck out the additional punishment prescribed by section 20. The managers on the part of the House, recognizing that section 20 was an anomaly in criminal law, which made it possible that under an indictment and conviction for a misdemeanor a man might be executed, and also recognizing that any offense that might come within the provisions of this section might and ought to be punished by the laws of the State wherein it was committed, agreed to its omission, but in consideration of this omission restored the disqualifying penalty omitted from section 19. Section 19 therefore is restored as existing law and the maximum punishment for the offense prescribed thereby is a fine of not more than $5,000, imprisonment for not more than ten years, and the disqualification to hold any office, place of honor, profit, or trust created by the Constitution or laws of the United States.

Section 23, page 14, is omitted.

Section 23 provides that no citizen possessing all other qualifications prescribed by law shall be disqualified for service as grand or petit juror in any court of the United States on account of race, color, or previous condition of servitude, and makes penal provisions for the violation thereof.

While this section is omitted from the codification, at the same time the provisions on page 183 of the bill repealing existing law upon that subject is also omitted.

The omission of section 23 therefore does not change existing law, but simply leaves this single section uncodified.

Section 24, page 14: Strike out in line 15 the words "or to keep peace at the polls."

Section 24 provides that every officer of the army or navy who orders or brings or keeps armed men at any place where a general or special election is held in any State, unless such force be necessary to repel armed enemies of the United States or to keep peace at the polls, shall suffer fine and imprisonment.

The omission of the words "or to keep peace at the polls" leaves the section as a prohibition against keeping armed men at a place where an election is held unless such force be necessary to repel armed enemies of the United States.

The provision for keeping peace at the polls is inoperative, as there is no provision anywhere in the law authorizing the keeping of troops for that purpose. The omission of these words therefore does not in any sense diminish the force of existing law.

Section 51: Add to the proviso the following words: "And nothing in this section shall interfere with or take away any right or privilege under any existing law of the United States to cut or remove timber from any public lands."

The offense denounced by this section is the cutting or wantonly destroying of growing timber on public lands or the exporting or disposing of the same. Under existing law any miner or agriculturist may clear his land, prepare his farm for tillage, and take timber necessary to support his improvements. The amendment simply makes clear that it is not the intention of this law to interfere with or take away any right to cut or remove timber that is now conferred by existing law.

Section 95: The amendment adds the words "prima facie."

The provision of section 95 is that upon the trial of any indictment for embezzling public money under certain enumerated sections it shall be sufficient evidence, for the purpose of showing a balance against such person, to produce a transcript from the books of the Treasury, as required in civil cases. The addition of the words "prima facie" only states more clearly what is the existing law upon the subject.

Section 125: The proviso in this section is changed in its form by striking out the words "been provided with a duly authenticated written or printed statement of such rule or practice" and substituting therefor the words "had actual knowledge thereof."

The offense denounced by this section is that of an officer or employee of the United States, etc., who by virtue of his office shall become possessed of information which might exert an influence upon or affect the market value of any product of the soil, which information is by law or rule of the department required to be withheld from publication until a fixed time, who willfully imparts such information to any person not entitled under the law to receive the same, or who shall speculate by buying or selling the same. The proviso appended to this section is: "That no person shall be deemed guilty of a violation of any rule of any department unless prior to such alleged violation he shall have been provided with a duly authenticated written or printed statement of such rule or practice." The amendment adopted by the conferees simplifies this proviso, while in no sense altering its legal effect. It provides "That no person shall be deemed guilty of a violation of any such rule unless prior to such alleged violation he shall have had actual knowledge thereof."

Section 126: The substitution of the word "or" for the word "and" and the insertion of the words "or both."

The provision in the House amendment provided for the offense denounced a fine of not more than $5,000 and imprisonment not more than five years.

This change of the substitution of the word "or" for "and," and the addition of "or both" are in harmony with the general system of punishments as provided for in the bill.

Section 140: Strike out section 140.

This was a new section reported by the committee. It provides that whoever being a prisoner confined in a jail, penitentiary, etc., and being in lawful custody of an officer, etc., shall escape or attempt to escape, etc., shall be fined not more than $1,000 or imprisoned not more than seven years, or both. This was stricken out by the Senate. Being new law, the House assented thereto.

Section 187: Insert the words "to the current business of the carrier."

Section 187 provides that the owner, driver, master, etc., or other person having charge of a stagecoach, railway car, steamboat, etc., which regularly performs trips on post routes, etc., shall be guilty of a criminal offense if he carries, otherwise than in the mails, any letters or packets except such as relate to some part of the cargo of such steamboat or other vessel.

The insertion of the words "to the current business of the carrier" permits a common carrier to which a mail coach is attached to transmit by its servants to other stations on its route communications not inclosed in the mail, if such communications are confined to the carrier's business. This is in exact conformity with the construction placed upon existing law. The regulations of the Post-Office Department permit such communications, and these regulations have been declared legal by an opinion of the Attorney-General of the United States.

The amendment therefore only makes clear the existing law upon the subject.

Section 200: The amendment to this section in effect restores existing law upon this subject. The House amendment consolidated two sections of existing law, to wit, sections 5472 and 5473, Revised Statutes. The effect of the amendment is to divide the offense denounced, one being an assault of a person having lawful control of the mail with intent to rob, steal, or purloin such mail or the robbing of such person of such mail, and the second being the effecting or attempting to effect such robbery by the use of a dangerous weapon.

The amendment simply divides the sections into two parts and affixes a different penalty for the two distinct offenses.

Section 226: Insert the word "knowingly."

Section 226 punishes anyone who submits or causes to be submitted to any postmaster, etc., any false evidence relative to any publication for the purpose of securing the admission thereof at the second-class rate. The change simply requires that such evidence shall be submitted knowingly.

Section 227: Insert the words "for the purpose aforesaid shall knowingly and willfully."

This section denounces as a crime the presenting or causing to be presented any false claim for the loss of any registered letter, etc., and further provides that any person who shall knowingly and willfully misrepresent or misstate or conceal any material fact in respect of such claim shall be guilty of the offense denounced.

The amendment relates entirely to the offense of concealing a material fact and provides that such concealment shall be for the purpose of presenting such false claim and shall be knowingly and willfully done.

Sections 241, 242, and 243: Simply for the sake of euphony the word "that" is stricken out at the beginning of each section and begin each section with a capital letter. It in no way interferes with the sections themselves.

Section 243: Insert the word "knowingly" after the word "shall," in line 13.

Section 243 is the third section of the amendment added to the bill by the House, and is what is popularly known as the "Knox bill," for the regulation of interstate shipments of liquor. This section denounces as an offense and punishes by a suitable fine the shipping or causing to be shipped from one State, Territory, or District, etc., into any other State, Territory, or District, etc., any package containing spirituous, vinous, malted, etc., liquor, unless such package be so labeled on the outside cover as to plainly show the name of the consignee, the nature of its contents, and the quantity contained therein.

The insertion of the word "knowingly" changes this provision so that it shall read: "Whoever shall knowingly ship or cause to be shipped from one State, Territory, or District," etc., shall be fined as therein provided. The word "knowingly" as employed in a criminal law imports legal and not actual knowledge. Legal knowledge has been judicially defined to be such information as would lead a prudent man to believe the fact existed and which, if followed by an inquiry, must bring knowledge of the fact home to him. It was believed by the conferees that before a conviction of this offense this degree of knowledge should be brought home to the person accused.

Section 248: For the sake of clearness and in conformity with the general provisions of the section itself, the words "and every" are stricken out and the words "or any" inserted. It does not in any sense change the provisions of the section.

Section 253: Strike out the words "being a citizen or other person resident."

This section provides that whoever, being a citizen or other person resident within the jurisdiction of the United States, takes on board or transports from any foreign country any person in any vessel, for the purpose of holding, selling, or otherwise disposing of such person as a slave, shall be punished, etc.

The words "being a citizen or other person resident" are redundant. When they are stricken out the section reads: "Whoever, within the jurisdiction of the United States, takes on board," etc., the remaining words being an ample and complete definition of jurisdiction.

Section 254: Strike out the word "American;" substitute the word "jurisdiction" for "jurisdictional limits."

The offense defined in this section is that of a captain, master, etc., of a vessel found in any river, port, etc., within the jurisdiction of the United States, having on board any person for the purpose of selling such person as a slave, etc.

The place defined is wholly within the jurisdiction of the United States, and the offense, therefore, need not be limited to an American vessel. The change of the word "jurisdiction" for the words "jurisdictional limits" is merely verbal and tends to clearness and simplicity of expression.

Section 255: The word "American" is stricken out for the same reason set forth in the preceding section.

Section 256: Strike out the section.

By reason of the elimination of the word "American" in the two preceding sections section 256 becomes unnecessary.

This section simply provides that any person, a citizen of the United States, who voluntarily serves on board of any foreign vessel employed in the slave trade, shall be punished. The elimination of the word "American" in the preceding sections gives the United States power to punish within her jurisdiction persons on board vessels whether foreign or American.

Section 257: Strike out the words "State, Territory, or District" and in lieu thereof substitute the words "place subject to the jurisdiction."

No other change is made in this section. The amendment is for the sole purpose of clearness and simplicity of expression.

Section 262: Strike out the words "jurisdictional limits" and insert in lieu thereof the word "jurisdiction." This change is made for the reason set forth in the above section.

Section 270: Strike out the word "other," which is simply a clerical error.

Section 276: In lines 8, 9, and 10, page 150, strike out the following: "The jurisdiction, conferred by this paragraph, of crimes committed upon any such vessel while within the limits of any State, shall be concurrent with that of the courts of such State."

The conferees decided that these words are entirely unnecessary, as the jurisdiction conferred by the paragraph referred to would remain in such States without this provision.

Section 295: A mere transposition of language.

The effect of this transposition is as follows: Existing law provides that the master or officer of a vessel of the United States on the high seas, etc., shall not beat, wound, or without justifiable cause imprison any of the crew. Since the provision of the law abolishing flogging in the navy, it was deemed necessary to so transpose the words as to prohibit the said master, etc., from beating or wounding without justifiable cause. This is effected by this amendment.

Section 300: Substitute the word "or" for the word "and," which results in no substantial change in existing law.

Sections 321, 322, and 323: Strike out the words "in any Territory."

These words are unnecessary in the separate sections, because the general jurisdictional clause at the beginning of the chapter provides that "Except as otherwise expressly provided, the offenses befined in this chapter shall be punished as hereinafter provided, when committed within any Territory or District," etc., of the United States. This amendment, therefore, is a purely formal one.

In the repealing sections, on page 183, strike out all of lines 21, 22, and 23.

On page 196 strike out all of lines 13 to 20, both inclusive.

These omissions from the repealing sections of the bill are those above referred to, being in effect the omission of repealing sections relating to section 23, which remains uncodified, as before mentioned.

Section 349: Strike out "from" and insert "on;" strike out "July" and insert "January;" and consequently strike out "nine" and insert "ten."

The effect of this is to postpone the time of this code going into effect until January 1, 1910.

R. O. MOON,
HERBERT PARSONS,
SWAGER SHERLEY,
Managers on the part of the House.

Mr. MOON of Pennsylvania. Mr. Speaker, I move that the conference report be agreed to.

Mr. UNDERWOOD. I would like to ask the gentleman a question. I would like to know whether this is a final and complete report?

Mr. MOON of Pennsylvania. It is.

Mr. UNDERWOOD. What disposition was made of the Humphreys amendment as to the transportation of liquors?

Mr. MOON of Pennsylvania. It was accepted as it left the House, except that the word "knowingly" was put in the last clause, so that it will read:

Whoever knowingly ships or causes to be shipped without being marked—

And so forth, shall be subject to a penalty.

Mr. GAINES of Tennessee. What was done about the provision to prevent the sending out of fraudulent information from the Agricultural Department?

Mr. MOON of Pennsylvania. That exists in the law, and was adopted by the conferees, and will be section 126.

Mr. GAINES of Tennessee. I want to congratulate the gentleman on that and the Humphreys amendment.

Mr. MANN. Will the gentleman yield to me?

Mr. MOON of Pennsylvania. I will yield five minutes to the gentleman from Illinois.

Mr. MANN. Mr. Speaker, I want to pay a compliment or two. The penal code has been before the House since the beginning of the last session of Congress. Other matters have been before the House in regard to the transportation of liquors between the States. Both problems have been somewhat intricate and rather difficult of solution. I want to take this occasion, Mr. Speaker, to compliment the chairman of the Committee on the Revision of the Laws, Mr. MOON of Pennsylvania [applause], the gentleman from New York, Mr. PARSONS [applause], a member of the committee; the gentleman from Michigan, Mr. DENBY, another member of the committee [applause]; the gentleman from Kentucky, Mr. SHERLEY, a member of that committee [applause]; and the gentleman from Tennessee, Mr. HOUSTON [applause].

Without their persistent efforts this bill would not have become a law. And in connection with what seems to me a deserved compliment to those gentlemen, I shall extend my congratulations to the gentleman from Mississippi [Mr. HUMPHREYS] and the gentleman from Kansas [Mr. MILLER] for the work they did in bringing before this House the so-called "Humphreys, Knox, or Miller amendment" in reference to the interstate transportation of liquor, which, by the adoption of this report, will become the law of the land.

I may say, Mr. Speaker, that during this session of Congress, notwithstanding the criticism that is often leveled against the rules, this work has been done without a special rule from the Committee on Rules, by the action of the House, moving along the line of the rules, as they exist, because the House was determined upon having legislation upon that subject in answer to the proper demand or request from the country.

I congratulate Congress upon the enactment of the penal code, including the proper regulation of interstate transportation of intoxicating liquors. [Applause.]

Mr. HUMPHREYS of Mississippi. Mr. Speaker, will the gentleman yield?

Mr. MOON of Pennsylvania. I yield to the gentleman.

Mr. HUMPHREYS of Mississippi. Mr. Speaker, I want to say that so far as the regulation of the interstate transportation of liquors is concerned, in my opinion that amendment never would have been the law but for the earnest, intelligent, and most effective cooperation of the gentleman from Illinois [Mr. MANN]. [Applause.]

Mr. MANN. O Mr. Speaker, I acted only as an adviser to the gentleman from Mississippi.

Mr. SHERLEY. Mr. Speaker, while the many pleasant things are being said about many Members of this House, I feel that I should say a word in behalf of a man who has done as much of the drudgery in connection with this particular piece of legislation as any man who had anything to do with it, and it has been a bill which carried with it tremendous drudgery. The work of the committee extended over many months, and the members of this joint committee, I am sure, would not have been able to present what they believe to be a very accurate revision of the penal laws of the land if it had not been for the able assistance of Mr. John L. Lott, who was the clerk of that committee and who is entitled to this public recognition of his services. [Applause.]

Mr. MILLER. Mr. Speaker, I will ask the gentleman from Pennsylvania to yield to me.

Mr. MOON of Pennsylvania. I yield to the gentleman.

Mr. MILLER. Mr. Speaker, I want to state that I agree most heartily with the statement just made by the gentleman from Mississippi [Mr. HUMPHREYS]. That gentleman and myself know probably better than any other Members of this House of the work done by the gentleman from Illinois [Mr. MANN], and of the earnest and consistent course which was followed by him from the beginning of this session until now, and which has enabled us to do whatever we were able to do. [Applause.]

Mr. BARTHOLDT. Mr. Speaker, I will ask the gentleman to yield to me for a moment.

Mr. MOON of Pennsylvania. I yield to the gentleman.

Mr. BARTHOLDT. Mr. Speaker, I desire to express a devout wish, namely, that the agitation for liquor legislation at the hands of Congress may have received a quietus by the adoption of the Humphreys amendment, and that that amendment marks the line of demarcation beyond which Congress in its legislation on that subject will not go.

Mr. LANGLEY. Mr. Speaker, I desire to express the opinion that the wish of the gentleman from Missouri [Mr. BARTHOLDT], which is evidently father to the thought, will not be realized. This is only a step in the right direction.

Mr. MOON of Pennsylvania. Mr. Speaker, I do not desire and do not intend to take up the time of the House by any speech. It is certainly pleasant at this period of our monumental labor—for I think this House will agree with me that the labor of this committee during the entire session of two Congresses has been monumental—to listen to these tributes and the complimentary remarks of the gentleman from Illinois [Mr. MANN]. These compliments have been tendered to the committee. I desire to tender to the legal profession at large, to the members of the judiciary, to the members of the bar throughout this country this completed work as a tribute of the Sixtieth Congress. In my judgment, no more important piece of legislation has been enacted at this session. Probably no one except members of the legal profession will absolutely agree to that statement, but when we come to consider the fact that prior to this enactment the penal laws of the United States were scattered in six or seven different volumes of great magnitude commingled with general legislation and frequently overlapping each other, and that it was almost impossible even for the judge upon the bench or the man learned in the law by exhaustive and patient investigation to tell with accuracy what the law exactly was, I think all will agree that this body of men will welcome this codification, which brings within the narrow compass of a few pages all of the penal and criminal sections of the laws of the United States.

Therefore, in conclusion, I say, on behalf of the committee, that we tender to the judiciary and to the bar and to the citizens of this country this completed work, in the belief that it will be of great service to them in the administration and enforcement of the criminal laws of this Nation. [Applause.]

Mr. Speaker, I ask for the adoption of the report.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

Mr. MOON of Pennsylvania. Mr. Speaker, I now ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk and ask to have read.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the Clerk will read.

The Clerk read as follows:

Resolved, That the Secretary of the Senate be authorized to renumber the sections consecutively; to strike out the headnotes at the beginning of each chapter to sections which have been omitted and to renumber the headnotes to correspond to the numbers given the sections; to correct the reference in one section to other sections; to correct typographical errors; and to correct the punctuation as indicated by the committee on conference.

The SPEAKER. The Chair suggests to the gentleman from Pennsylvania that this resolution probably should be a concurrent resolution.

Mr. MOON of Pennsylvania. Mr. Speaker, the committee did not think so. This matter is with the Clerk of the Senate. The Senate adopted a similar resolution giving to its Clerk the power to make these very slight changes; but in view of the fact that the House was also interested in this legislation, we felt the only thing necessary was to give the assent of the House to the Clerk of the Senate to make these simple corrections.

Mr. MANN. But the House has no authority to confer any jurisdiction upon the Clerk of the Senate. The House may direct its own Clerk.

Mr. MOON of Pennsylvania. Mr. Speaker, this work is practically all done. This same resolution passed the Senate. If the Chair thinks it advisable, I will ask unanimous consent to change this to a concurrent resolution.

The SPEAKER. Unless the gentleman has examined it very closely and is satisfied with it, it seems to the Chair that the resolution should be a concurrent one.

Mr. MOON of Pennsylvania. We have simply acquiesced in the Senate's instruction to its Clerk. We do not attempt to instruct the Clerk of the Senate, but the Senate has already instructed its Clerk. That was our thought, so that we simply acquiesced in the instructions of the Senate to its own Clerk. That Clerk must do the work.

The SPEAKER. The House can only know of the action of the Senate——

Mr. MANN. Mr. Speaker, this is the penal code, and it seems to me it is desirable to pass it in accordance with the law and the Constitution.

Mr. MOON of Pennsylvania. Then, Mr. Speaker, I ask unanimous consent to change the joint resolution and put it in the form of a concurrent resolution.

The SPEAKER. The gentleman from Pennsylvania modifies the resolution and offers it as follows.

The Clerk read as follows:

Amend so that it will read:

House concurrent resolution 78.

"Resolved by the House of Representatives (the Senate concurring), That the Secretary of the Senate," etc.

The question was taken, and the resolution as modified was agreed to.

On motion of Mr. MOON of Pennsylvania, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

ADDITION TO ROCK CREEK PARK.

The House resumed consideration of the bill (S. 4441) to acquire certain land in the District of Columbia as an addition to Rock Creek Park.

Mr. BARTHOLDT. Mr. Speaker, as has already been stated, this bill is an old acquaintance. It was here at the last session and it was defeated by this House by a vote of two to one. Some years ago a very thorough investigation was had by a commission consisting of three Senators and three Members of the House, all members of the Committee on Public Buildings and Grounds of the two Houses. At that time hearings were had upon all the different propositions, and I do not remember a single disinterested citizen of Washington who appeared before the committee, save one, and that one had been sent by another gentleman who was very much interested in the proposition. So much in reply to the statement of the gentleman from Ohio that the sentiment of the people of the District of Columbia was unanimous on that question.

When this bill was before the House the last time the statement was made positively and unequivocally that unless the House acted favorably upon the proposition we would have no more opportunity to purchase that land, because the options would expire.

The proceedings to-day prove that either there were no options at all or that they have not expired, consequently the statement made to us at that time is not borne out by the facts. The Committee on Public Buildings and Grounds is heartily in favor——

Mr. McGUIRE. Will the gentleman yield for a question?

Mr. BARTHOLDT. I have only one minute—is heartily in favor of parks in this city, but we would like to establish parks on the principle on which they were established by the forefathers of the present generation, namely, as breathing spots within the city of Washington. There is a large part of the city of Washington lying on Mount Pleasant, every foot of which is being rapidly covered with houses and improvements, and no provision whatever has been made to provide breathing spots for the people there. I would be in favor of putting a park there instead of a park away out, which can only be reached by automobiles. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Missouri has expired.

Mr. NORRIS. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. ANDRUS]. [Applause.]

Mr. ANDRUS. Mr. Speaker, the work of a session of Congress apparently is never completed until we have some little discussion in regard to an appropriation for the purchase of land in Rock Creek Park. My time is rather limited, but at the outset I want to state how I stand on parks. I am in favor of parks as I am in favor of public schools, in favor of churches; churches to grow a better moral influence in the community, churches so that the children may acquire an education, and parks where the children can play and grow bone and muscle and nerve to help them bear the heavy burdens of life that will follow. I would like to give you just a hasty résumé of this matter for four years. On March 27, 1906, Senate bill 5289 called for $600,000. On the 27th of March a Senator wrote to the president of the District Commissioners asking certain information, and among the information asked for I find this.

I read from his report. It is Calendar No. 2811, near the bottom of the third page:

The price named in the bill, $600,000, for about 437,000 square feet of land, or about $1.37 a square foot, is in excess of the estimated value of the land by the board of assessors, their value being $230,000.

Mr. Speaker, I have had some experience, having bought a few lots during my life, and I found the assessors' value as a rule a pretty good criterion on which to act. On March 30, 1906, evidently a conscience was pricked, and a bill (H. R. 5102) was introduced for $550,000—$50,000 less. On February 16, 1907, conferees of the House and the Senate came to an agreement of $475,000, but it was not satisfactory to the House Committee on Public Buildings and Grounds, and the matter dropped with the expiration of the Fifty-ninth Congress.

The thing took on new life, and on January 27, 1908, the bill S. 4441 was reported for $423,000—a gradual coming down. That bill went directly to one of the appropriation committees, and on May 26 last, under a suspension of the rules, it was defeated by a vote of 57 for and 164 against.

Mr. NORRIS. That was this same bill?

Mr. ANDRUS. This same bill that is brought up to-day. Now, what have the Government and the people lost in these three years? We are talking now about $423,000 as against $600,000 three years ago, a saving to some one of $177,000. The interest on $600,000 for three years at 2 per cent is $36,000. It makes a total of $213,000. It may be a small sum in this House, but, Mr. Chairman, there are 10,000 boys in my district who would be exceedingly happy if in a legitimate way they could make that money in three years. [Applause.]

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. SMITH of Michigan. Mr. Speaker, how much time has the gentleman from Nebraska [Mr. NORRIS] left?

The SPEAKER pro tempore. The gentleman from Michigan has ten minutes left, and the gentleman from Nebraska has eight minutes.

Mr. SMITH of Michigan. Mr. Speaker, I yield to the gentleman from New York [Mr. MCMILLAN] two minutes.

Mr. MCMILLAN. Mr. Speaker, it has been my privilege to know something about parks; being one of the park commissioners, as well as president of the board for four years, in the city of New York, and having been engaged in the condemnation proceedings of large acreage that was taken for parks, I know whereof I speak.

I say to you that this area that is about to be created for a park is of divine construction. And as to its being worth $4,000 an acre, I challenge any man to create such a possibility of a park, with a stream running through it, that only a divine architect or a divine landscape artist could create. Why do you leave it to man to deface and wipe out? If you do that, it will be a sacrilege. It would be an injustice to the Paris of America. I have traveled considerably, and I can say to you that there is no place to-day on the divine footstool that should be kept so sacred as park territory as Rock Creek.

Do you know what it takes to create an acre of parkage? We spend $20,000 an acre on our parks in the city of New York, and we could not create anything like that. I beg of you, gentlemen, to not let this opportunity pass to purchase it, for if you do, some real estate speculator like myself will buy it, and then you will not get it for any such sum as that at which it is now offered. The reason that you get it to-day for $4,000 an acre is that you have worked them down from $6,000 to $4,000, and I thank the gentleman from New York [Mr. ANDRUS] for telling us this. [Applause.]

Mr. SMITH of Michigan. Mr. Speaker, I yield one minute to the gentleman from New Jersey [Mr. PARKER].

Mr. PARKER. One minute, Mr. Speaker. I know this property. I have ridden or walked over it often during the last twelve years. My children, year after year, have picknicked down in the bottom of the ravine that everybody says children can not get to. We selected a picnic ground there, and have an annual children's picnic. So I know the property, and I know that it is available for a park.

It is necessary for the Government to own along Rock Creek. I know that as to value the price asked in old times was too much. It has come down, and values are going up. If anyone will go out Massachusetts avenue he will see that property and buildings of the very best description are moving by leaps and bounds, by miles, since I have been in the city, along Massachusetts avenue. The improvement has just gotten to the edge of this property, where there is a frontage of nearly 1,000 feet obtained on the north side of Massachusetts avenue, just beyond Rock Creek, and those front feet alone will, within a few years, be worth the price that is paid. [Applause.]

Mr. SMITH of Michigan. Mr. Speaker, I yield two minutes to the gentleman from Massachusetts [Mr. LOVERING].

Mr. LOVERING. Mr. Speaker, I know something of this proposition, and I believe it to be the best and most favorable proposition that can be made to enlarge our park system at Rock Creek. I have had something to do with land in my day,

and I know that unless we take this land at this time the chances are that we will have to pay at least 25 or 50 per cent more than we are now asked, if indeed we ever again have the opportunity.

Mr. SHERLEY. Will the gentleman yield?

Mr. LOVERING. I yield.

Mr. SHERLEY. That statement was made last year, the year before, and the year before that.

Mr. LOVERING. The gentleman need not say that to me. I know it. It is none the less true, even if it has been said before. I am credibly informed that the owners of this property would not object to have the proposition fall down in the House at this time. It is just the sort of a project that I should be glad to enter into myself if I were in land speculation.

Mr. Speaker, I yield back my time.

Mr. SMITH of Michigan. How much time did the gentleman yield back?

The SPEAKER pro tempore. Half a minute.

Mr. SMITH of Michigan. Now will the gentleman from Nebraska use some time?

Mr. NORRIS. I yield one minute to the gentleman from Alabama.

Mr. HEFLIN. Mr. Speaker, this bill carries an appropriation of nearly half a million dollars. The same bill was up for consideration in May, 1908, and was voted on and defeated. Fifty-seven votes were cast in favor of it and 164 votes cast against it. I trust that this bill will not be pushed through in the closing hours of this session. Let it go over until the next Congress, and then all of us who desire to do so can see this land and can investigate the matter of its real value, and then if we must purchase it for the Government, let us exercise business judgment and get it as cheaply as we can. [Applause.]

Mr. NORRIS. How much more time have I remaining, Mr. Speaker?

The SPEAKER pro tempore. The gentleman has seven minutes.

Mr. NORRIS. I yield five minutes to the gentleman from Tennessee [Mr. SIMS].

Mr. SIMS. Mr. Speaker, when this identical bill, without the change of a letter, was voted on by yeas and nays in this House on the 26th day of May last, 164 noes were recorded as against 57 ayes. ow many gentlemen are going to change, and what reason are you going to give for your flop in so short a time? Now, there will be a yea-and-nay vote at this time on this bill, and you will have to explain some day why you changed in so short a time, without any new evidence or any new reason given for the change. There is no option on this land at this time. I will read from a statement made by Mr. Charles Glover in the hearings before the Committee on Appropriations last year, before this bill was voted on in May last:

> The CHAIRMAN. How it is, Mr. Glover, with respect to the 88 or 98 acres; would it be possible for you to have the option renewed another year?
>
> Mr. GLOVER. No, sir; that is out of the question, Mr. TAWNEY. They have assessed this ground at $7,500 an acre. The assessment has gone up tremendously.
>
> Mr. FITZGERALD. The assessed valuation of it?
>
> Mr. GLOVER. Yes; they have put it up enormously, and justly so. It is a pretty fine piece of ground. Bell told me the other day that they hardly knew what to do about this thing.
>
> The CHAIRMAN. You think it would be impossible to renew the option?
>
> Mr. GLOVER. Absolutely.
>
> The CHAIRMAN. When will the option expire?—
>
> Now listen—
>
> Mr. GLOVER. With this session of Congress.

That was the last session Mr. Glover said this option expired. When has it been renewed? If he told the truth then, and I do not question his veracity, there is no option on that land at this time. I was told by as good a Member as there is in this House that another Member, who is a Member now, is interested in one of the syndicates mentioned by Mr. Glover, in one of these pieces of land. Are you going to be influenced into enacting such legislation as this under suspension of the rules?

Mr. CLAYTON. May I ask the gentleman a question?

Mr. SIMS. Certainly.

Mr. CLAYTON. Do you think it is fair to the membership of this House to make that statement without naming the man or at least giving the authority?

Mr. SIMS. The gentleman who told me is in his seat on the floor of the House at this moment, and he can tell the name of the Member if he so desires.

Mr. CLAYTON. On which side of the Chamber?

Mr. SIMS. On the other side of the Chamber.

Mr. CLAYTON. What is the color of his hair?

Mr. SIMS. Oh, his hair is all right.

Mr. CAMPBELL. I think that if the gentleman has any information upon that subject he ought to name the man.

Mr. SIMS. The gentleman who told me is present, and he will tell you that a Member of this House is now, or was, interested in one of these pieces of land, and has used his personal influence heretofore to pass this bill.

Mr. CLAYTON. I insist that the gentleman from Tennessee ought to give the name of the Member from whom he obtained that information.

Mr. SIMS. Oh, he is now in the Chamber.

Mr. CLAYTON. I want to hear all the information, and I insist that he furnish the name. Give us the name.

Mr. SIMS. The gentleman who told me is on the floor of the House; he can give it.

Mr. CLAYTON. Name him.

Mr. SIMS. I will not name him. He is here and hears what I say. Will giving the name tend to prove anything except this: That whenever people in this District have land they can not sell to anybody else they try to sell it to the Government before it goes up. They started in on this tract at $600,000 and now they have got it down to $435,000. Of course the gentleman from Ohio [Mr. BURTON], and the other gentlemen who have spoken in behalf of this bill, did not know that any Member of the House was interested in any of this land.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. SMITH of Michigan. I yield one minute to the gentleman from New York [Mr. PARSONS].

Mr. PARSONS. Mr. Speaker, I have walked over this land. It ought to be a part of the parking system of Washington. The average cost of it will be 10 cents a square foot. I understand that land for building purposes out in the extension of Massachusetts avenue approaching this property has been selling at $2.50 a square foot, or twenty-five times as much as the average price for this land.

Some day this land will have to be taken. I believe it is economy to take it now, and I hope it will be taken.

Mr. NORRIS. We have only two minutes remaining. Will the gentleman from Michigan use some of his time?

Mr. SMITH of Michigan. I yield three minutes to the gentleman from Michigan [Mr. GARDNER].

Mr. GARDNER of Michigan. Mr. Speaker, for several years it has been my fortune, as a member of the District appropriations committee of the Committee on Appropriations, to go thoroughly over nearly the entire District. The thing that has impressed me more than any other, except the rapid growth and development of the city, is the utter lack of park provision for the future. Go out Fourteenth street, Thirteenth street, Eleventh street, Seventh street, Connecticut avenue, Massachusetts avenue, and many others, and you find that the real estate man has his grip upon the land, and he does not give anything for park purposes. Take out Rock Creek Park, and beyond the boundary, there is scarcely anything where in the future our people can go to get a breath of fresh air. We are building as solidly, as the gentleman from Missouri says, on Columbia Heights as they are in Philadelphia, New York, Boston, and Chicago, with absolutely no park reservations.

Old Washington, or lesser Washington, is known everywhere for the number and beauty of its parks, but the greater Washington, unless you do something, will be without parks.

Now, they talk about this being a good price, $422,000 for 100 acres of land, admirably adapted as it is for park purposes. On Meridian Hill, out Sixteenth street, in the edge of the city, they want $600,000 for 18 acres of land for public purposes. Every year in the future we are likely to pay more for this or any other tract that lies within reasonable distance of the growing population of this city. [Applause.]

Mr. NORRIS. I yield one minute to the gentleman from Minnesota [Mr. DAVIS].

Mr. DAVIS. Mr. Speaker, I am certainly in favor of as much free air as it is possible to obtain, but Members ought not forget that Rock Creek Park now contains 2,000 acres of land adjoining this 100-acre tract that is sought to be purchased. It seems to me that when they obtained that 2,000 acres they obtained all the land that was suitable for a park or for any other purpose at the time. Now there remain 100 acres of land that it will cost many times more to improve—to make it useful for park purposes—than the contemplated purchase price. We are making now, as the record shows, between two and three hundred thousand dollars every two or three years by not purchasing this land. Let us wait a few years more and we will get it for half the money. But I will say that if we obtain it then, we will have an elephant on our hands that will cost many times more than its value to improve it for park purposes. It is

apparent that the opportunity to obtain this cavernous tract will not be foreclosed for many years, for the reason that the Government is the only visible purchaser, and its only apparent value is confined to park purposes. [Applause.]

Mr. NORRIS. Mr. Speaker, I yield the balance of my time to the gentleman from Minnesota [Mr. NYE].

The SPEAKER pro tempore. The gentleman from Minnesota [Mr. NYE] is recognized for one minute.

Mr. NYE. Mr. Speaker, if we really want economy, we ought to defeat this bill, because the price of the property has declined $200,000 in the last three years, and if we wait long enough we will get it perhaps for what it is worth. [Laughter.] It has declined $200,000 in a time of the greatest prosperity known in the history of this country. I am opposed to it, for this reason: As a new Member of this House I am appalled at the manner in which legislation is sluiced through here the last minute of the session, legislation which carries millions of dollars, and at the last moment a real-estate scheme is sprung upon us. [Applause.] I am opposed to the bill and I hope it will be beaten more overwhelmingly than it was last session. [Applause.]

Mr. SMITH of Michigan. I yield the balance of my time to the gentleman from Ohio [Mr. BURTON].

The SPEAKER pro tempore. The gentleman from Ohio is recognized for three minutes.

[Mr. BURTON of Ohio addressed the House. See Appendix.]

The SPEAKER pro tempore. The time of the gentleman has expired, all time has expired; and the question is on discharging the Committee of the Whole House on the state of the Union, suspending the rules, and passing the bill.

The question was taken, and the Speaker pro tempore stated that he was in doubt.

Mr. CLAYTON. In order that there may be no doubt, Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 31, nays 192, answered "present" 13, not voting 149, as follows:

YEAS—31.

Barchfeld	Foelker	Longworth	Olcott

So the motion was rejected.

The Clerk announced the following pairs:

For the session:

Mr. MCMORRAN with Mr. PUJO.

Mr. SHERMAN with Mr. RIORDAN.

Mr. WANGER with Mr. ADAMSON.

Mr. CURRIER with Mr. FINLEY.

For the balance of the session:

Mr. BRADLEY with Mr. RANDELL of Texas.

Mr. OVERSTREET with Mr. MOON of Tennessee.

Until further notice:

Mr. HEPBURN with Mr. WOLF.

Mr. DWIGHT with Mr. HAMILTON of Iowa.

Mr. DENBY with Mr. HAMILL.

Mr. CRUMPACKER with Mr. HACKETT.

Mr. COUDREY with Mr. GLASS.

Mr. CARY with Mr. WEISSE.

Mr. BURLEIGH with Mr. GILL.

Mr. BURKE with Mr. FAVROT.

Mr. BENNET of New York with Mr. FORNES.

Mr. ANTHONY with Mr. ESTOPINAL.

Mr. LANDIS with Mr. LEVER.

Mr. KNOPF with Mr. LEGARE.

Mr. KENNEDY of Iowa with Mr. LEE.

Mr. KAHN with Mr. LEAKE.

Mr. JENKINS with Mr. LASSITER.

Mr. ADDISON D. JAMES with Mr. LAMAR of Florida.

Mr. GRAHAM with Mr. KIMBALL.

Mr. GILLETT with Mr. HILL of Mississippi.

Mr. FOSTER of Vermont with Mr. HELM.

Mr. FAIRCHILD with Mr. HAMMOND.

Mr. ELLIS of Missouri with Mr. SMITH of Missouri.

Mr. PEARRE with Mr. RUSSELL of Texas.

Mr. MUDD with Mr. ROBINSON.

Mr. MOON of Pennsylvania with Mr. RICHARDSON.

Mr. MARSHALL with Mr. REID.

Mr. MALBY with Mr. MOORE of Texas.

Mr. MCLAUGHLIN of Michigan with Mr. MCLAIN.

Mr. MCGAVIN with Mr. LIVINGSTON.

Mr. LAW with Mr. LINDSAY.

Mr. BANNON with Mr. WILEY.

Mr. WATSON with Mr. WILLIAMS.

Mr. TAWNEY with Mr. TAYLOR of Alabama.

Mr. STERLING with Mr. SPIGHT.

Mr. SOUTHWICK with Mr. SPARKMAN.

Mr. SLEMP with Mr. SMITH of Texas.

Mr. SMITH of Iowa with Mr. ADAIR.

Mr. CAMPBELL with Mr. CALDWELL.

Mr. HUGHES of West Virginia with Mr. BRUNDIDGE.

Mr. WOODYARD with Mr. BARTLETT of Nevada.

Mr. SMITH of Michigan with Mr. ANSBERRY.

Mr. BOUTELL with Mr. BURLESON.

Mr. BROWNLOW with Mr. GARRETT.

Mr. MARTIN with Mr. FULTON.

Mr. BATES with Mr. DAVENPORT.

Mr. LONGWORTH with Mr. GOLDFOGLE.
Mr. ALEXANDER of New York with Mr. CARLIN.
Mr. BIRDSALL with Mr. LAMAR of Missouri.
Mr. AMES with Mr. CLARK of Florida.
Mr. ALLEN with Mr. JOHNSON of South Carolina.
For this vote:
Mr. GAINES of West Virginia in favor, with Mr. FLOOD of Virginia against.
The result of the vote was announced as above recorded.

REPORT ON FRAUDS AND DEPREDATIONS UPON THE PUBLIC SERVICE.

Mr. OLMSTED. Mr. Speaker, I ask unanimous consent to print in the RECORD, without taking the time of the House to read it at this time, the report which by House resolution No. 480 the committee appointed thereunder was directed to make at this session, which report, by direction of that committee, I now present to the House.

The SPEAKER. Is there objection?

Mr. CLARK of Missouri. Mr. Speaker, what is this report about?

The SPEAKER. It is the report from the special committee of which Mr. OLMSTED is chairman, touching an investigation——

Mr. HIGGINS. Mr. Speaker, I object.

The SPEAKER. Does the gentleman from Pennsylvania desire to move to suspend the rules?

Mr. OLMSTED. If there was any objection to my request for unanimous consent, Mr. Speaker, I move to suspend the rules——

Mr. MANN. Has not the gentleman the right to make this report?

Mr. OLMSTED. We were directed by the resolution to make report at this session, and I think we have the right to make it at any time.

The SPEAKER. The gentleman can make the report, but the gentleman asks unanimous consent that it might be printed in the RECORD. It would be printed as a document.

Mr. MANN. Mr. Speaker, a parliamentary inquiry. If this is a privileged report, the gentleman would have the right to have it read, and thereupon it would appear in the RECORD and we would do without our dinners——

Mr. OLMSTED. Mr. Speaker, my object is to have it printed in the RECORD without taking up the time of the House to have it read now.

Mr. KEIFER. Would it be printed as a document, too?

Mr. OLMSTED. That would follow.

The SPEAKER. The Chair would again ask if there be objection.

Mr. HIGGINS. Mr. Speaker, I withdraw my objection.

The SPEAKER. The Chair hears none.

The report is as follows:

[House of Representatives, Report No. 2320, Sixtieth Congress, second session.]

Report of select committee on appropriations for and employees engaged in the detection and prevention of fraud in and depredations upon the public service appointed under House resolution 480. Presented by Mr. OLMSTED, March 3, 1909.

The select committee, appointed in pursuance of House resolution No. 480, respectfully report that—

The said resolution authorizing the appointment and defining the duties of this committee was as follows:

"Resolved, That the Speaker is authorized to appoint a select committee of five members, whose duty shall be to inquire and report to the House at its present session, as follows:

"First. What appropriations were made at the first session of the Sixtieth Congress for the fiscal year nineteen hundred and nine that could be used to prevent frauds in and depredations upon the several branches of the public service, including the protection of public lands and their products from fraudulent entry or appropriation, and to apprehend and punish persons charged with violation of the laws of the United States; also what increase, if any, was made in any of such appropriations over the amounts apropriated for nineteen hundred and eight.

"Second. What branches of the public service, paid for in whole or in part out of the United States Treasury, are authorized or are in existence and supported by appropriations made by Congress, whose principal duties are to detect and prevent frauds, or to apprehend and bring to trial and punishment persons charged with violating the laws of the United States; whether such branches of the public service or any persons employed therein have been or are engaged in any duty not contemplated by the law or the appropriation establishing or providing for such service; the names of the persons employed, for any period, in each branch of such service during the current and last fiscal year; the rates of compensation and allowance paid or being paid to each of them, by whom they were appointed and on whose recommendation, and a statement of the specific duty performed or engaged upon by each of such employees each day since the beginning of the fiscal year nineteen hundred and eight.

"The committee, or any subcommittee thereof, is authorized to sit during the sessions of the House; to send for persons and papers, including private or secret archives; to administer oaths; and to employ such clerical, messenger, and stenographic assistance as they shall deem necessary. All expenses incurred hereunder shall be paid on the certificate of the chairman of the committee out of the contingent fund of the House."

Your committee soon learned that compliance with the said resolution would be utterly impossible within the life of the present Congress. It therefore, upon the 1st day of February, 1909, presented to the House a preliminary report, whereupon, as recommended therein, the House limited the scope of the inquiry by the adoption of a resolution reading as follows:

"Resolved, That the select committee appointed in pursuance of House resolution numbered four hundred and eighty, and thereby requested to report to the House during the present session, shall inquire and report only as follows:

"First. What appropriations were made at the first session of the Sixtieth Congress for the fiscal year nineteen hundred and nine that could be used to prevent frauds in and depredations upon the several branches of the public service, including the protection of public lands and their products from fraudulent entry or appropriation, and to apprehend and punish persons charged with violation of the laws of the United States; also what increase or decrease, if any, was made in any of such appropriations as compared with the amounts appropriated for the fiscal year ending June thirtieth, nineteen hundred and eight.

"Second. What branches of the public service, paid for in whole or in part out of the United States Treasury, are authorized or are in existence and supported by appropriations made by Congress, whose duties, in whole or in part, are to detect and prevent frauds, or to apprehend and bring to trial and punishment persons charged with violating the laws of the United States; whether such branches of the public service or any persons employed therein have been or are engaged in any duty not contemplated by law or the appropriation establishing or providing for such service; the number of persons so employed, for any period, in each branch of such service during the current and last fiscal year, the rates of compensation and allowance paid or being paid to them.

"The committee, or any subcommittee thereof, is authorized to sit during the sessions of the House; to send for persons and papers; to administer oaths; and to employ such clerical, messenger, and stenographic assistance as they shall deem necessary. All expenses incurred hereunder shall be paid on the certificate of the chairman of the committee out of the contingent fund of the House."

By reference to the resolution, which is the chart of our authority, it will be found that there has not been referred to this committee all or any part of any message of the President touching upon the Secret Service; nor any question as to the effect of any limitation contained in last year's sundry civil appropriation bill. The committee is not asked by the resolution to express any opinion or make any recommendation upon those matters, and will not therefore discuss them. We have not considered it within our authority, as it certainly was not within our limit of time, to investigate or pay any attention to the numerous cases which have been brought to our attention of alleged abuses by government agents, inspectors, or detectives.

The resolution does not limit this inquiry to the so-called "Secret Service" or to persons who are by the terms of their employment designated as "detectives." In fact, neither the "Secret Service" nor "detectives" are referred to at all in the resolution except as they are included in the broader language requiring ascertainment and report as to the appropriations which could be used; and the number of persons employed whose duties, in whole or in part, are to detect and prevent frauds, or to apprehend and bring to trial and punishment persons violating the laws of the United States. The language is very comprehensive and if given its widest meaning would embrace nearly every officer and employee in the public service, including heads of departments, courts, district attorneys, marshals, etc. We have assumed, however, that a somewhat narrower meaning was intended.

The information called for by the resolution is difficult of exact ascertainment and accurate report owing to the mixed duties of certain classes of government employees and the fact that very frequently appropriations are made in a lump sum for a great variety of objects, no particular amount being appropriated for any particular purpose. As an illustration of this take the case of the

INTERSTATE COMMERCE COMMISSION.

After appropriating for the salaries of the commissioners and their secretary, the sundry civil appropriation act for the fiscal year 1908 contains this item:

"Interstate Commerce Commission: For all other authorized expenditures necessary in the execution of laws to regulate commerce, of which sum not exceeding $50,000 may be expended in the employment of counsel, and not exceeding $3,000 may be expended for the purchase of necessary books, reports, and periodicals, and not exceeding $1,500 may be expended for printing other than that done at the Government Printing Office, $603,245."

The sundry civil appropriation act for the fiscal year 1909 is in precisely the same language, except that the amount is $700,000, an increase of $96,755. Each of these was an appropriation that "could be used" in the prevention and detection of frauds, etc.; but it was out of this fund that the commission had also to pay the salaries of all its clerks, counsel, office rent, printing, incidental expenses, office furniture, traveling expenses, stenographers, typewriters, and all other necessary expenses. Had the entire sum been expended in the prevention or detection of fraud, the other business of the department must have come to a standstill, or else the department must have asked for a deficiency appropriation. As a matter of fact, the evidence shows that out of that appropriation there were employed, during some or all of the fiscal year ending June 30, 1908, seven, and during the current fiscal year eight, special agents, practically detectives, making investigations with relation to violations of the criminal provisions of the act to regulate commerce, particularly in regard to the payment of rebates by carriers and misbilling by shippers. Except for the payment of the salaries of special agents, the balance of this appropriation was used for purposes other than the prevention or detection of fraud. The entire expenditure out of this appropriation for the fiscal year 1908 was $562,429.08. For the current year the amount expended to January 30, 1909, was $355,390.34.

The sundry civil appropriation act, passed at the first session of the Sixtieth Congress, for the fiscal year 1909 contained, for the first time, an appropriation "to further enable the Interstate Commerce Commission to enforce compliance with section 20 of the act to regulate commerce as amended by the act approved June 29, 1906, including the employment of necessary special agents or examiners." The amount appropriated was $350,000, a clear increase of that amount over appropriations for 1908 available for that purpose. There was for each year a general fund which could be used. In the fiscal year 1908 there were 19 men employed at an expense of $30,968.15, and 34 men in the fiscal year 1909 to January 31 at an expense of $41,534.14. Up to that date, covering seven months, no more than that amount had been used

out of the $353,000 appropriation. The said section 20 provides that persons guilty of violation of its provisions shall be deemed guilty of a misdemeanor and may be subjected to fine and imprisonment. These special agents were paid from $1,600 to $3,000 per annum and their expenses when away from official headquarters.

During each of the fiscal years in question there was appropriated $100,000 to enable the Interstate Commerce Commission to keep informed regarding compliance with, and to execute and enforce the requirements of, the safety appliance act of March 2, 1903, out of which appropriation 23 inspectors were employed in each year whose duties were largely those of special detectives, and were sometimes performed in secret; that is to say, without the knowledge of the corporations whose appliances they were inspecting for the purpose of ascertaining violations of the law.

There was also appropriated, for each of the years in question, $10,000 to carry out the objects of the acts concerning carriers engaged in interstate commerce approved June 1, 1898.

Out of these appropriations the Interstate Commerce Commission employed special attorneys to assist the United States district attorneys in the prosecution of cases arising under the interstate-commerce laws. It does not appear that the Interstate Commerce Commission has used the secret-service men or detectives of any other department of the Government.

POST-OFFICE DEPARTMENT.

For the fiscal year 1908 the postal appropriation act appropriated $599,150 for salaries of post-office inspectors. The same act for the fiscal year 1909 carried $572,750, a reduction of $26,400.

The total number of post-office inspectors employed in 1908 was 377, and in 1909, 355, a reduction of 22.

For per diem allowance and traveling expenses of these inspectors, for 1908 the appropriation was $350,000, and for 1909, $325,000, a reduction of $25,000.

For traveling expenses of inspectors without per diem allowance, the amount appropriated for 1908 was $25,000, and for 1909, $35,000, an increase of $10,000.

The appropriation for livery hire for inspectors was $60,000 for 1908, and $50,000 for 1909, a reduction of $10,000.

There was also an appropriation of $96,620 for each year for clerical and other expenses and $6,000 for miscellaneous expenses at the division headquarters of these inspectors. Also an appropriation of $20,000 for each year for rewards for detection, arrest, and conviction of post-office burglars and highway robbers, and for securing information relative to the violation of the postal laws, and services in the apprehension of criminals.

The duties of these post-office inspectors are of a mixed character. They may be called upon to inspect and lay out rural free-delivery routes and perform other services not in the line of this inquiry, but they also constitute a very important body of men performing what may be fitly termed "detective services" in regard to violations of the postal laws and regulations.

They have fifteen division headquarters in different parts of the country, and the inspectors are shifted from one division to another as occasion may require. The Post-Office Department has not, within the past two years, called upon any other department for any detail of secret-service men, or detectives, and its officers believe that the fraud or depredation cases can be better and more economically handled by these inspectors, familiar with the postal laws and regulations, than by secret-service men obtained from another department. They handle a vast number of such cases, amounting to thousands in a single year. The reduction from 377 to 355 in the number of inspectors grew out of the merging of duties, so that rural agents, whose sole duty had previously been to examine into petitions for the institution of rural free-delivery routes and the inspection of such routes, were made available for the general purposes of inspectors. The then chief of inspectors had recommended a reduction of 15 and Congress reduced it 7 more, or 22 in all. No complaint has been made to this committee that the present number is inadequate.

In addition to inspectors there are, at their 15 division headquarters, 99 clerks and laborers, at an expense in each of the two years of $96,620.

In the legislative, executive, and judicial appropriation act for 1908 there was appropriated $8,000, and for 1909, $12,000 for special agents in the Division of Classification, at $2,000 each. There were 4 such agents in 1908, and 6 in 1909. The detection or prevention of fraud is incidental to, but not the chief purpose of, their employment, and the same may be said of 6 for each year in the Division of Registered Mails.

TREASURY DEPARTMENT.

The so-called "Secret Service Division."—The sundry civil appropriation act, passed at the first session of the Fifty-ninth Congress for the fiscal year 1908, contained the following item:

"Suppressing counterfeiting and other crimes: For expenses incurred under the authority or with the approval of the Secretary of the Treasury in detecting, arresting, and delivering into the custody of the United States marshal having jurisdiction, dealers and pretended dealers in counterfeit money, and persons engaged in counterfeiting Treasury notes, bonds, national-bank notes, and other securities of the United States and of foreign governments, as well as the coins of the United States and of foreign governments, and other felonies committed against the laws of the United States relating to the pay and bounty laws, including $1,000 to make the necessary investigation of claims for reimbursement of expenses incident to the last sickness and burial of deceased pensioners under section 4718 of the Revised Statutes, the act of March 2, 1895, and for no other purpose whatever, except in the protection of the person of the President of the United States: *Provided*, That no part of this amount be used in defraying the expenses of any person subpœnaed by the United States courts to attend any trial before a United States court or preliminary examination before any United States commissioner, which expenses shall be paid from the appropriation for "Fees of witnesses, United States courts, $125,000."

The similar act, passed at the first session of the Sixtieth Congress for the fiscal year 1909, contained precisely the same item in the same language, except that the appropriation was for $115,000, or $10,000 less, and the following words were added to the paragraph:

"No part of any money appropriated by this act shall be used in payment of compensation or expenses of any person detailed or transferred from the Secret Service Division of the Treasury Department or who may at any time during the fiscal year 1909 have been employed by or under said Secret Service Division."

Similar appropriations in varying amounts have been made from year to year for a long period of time. The words "Secret Service" do not appear in the statutes above-mentioned, and there is no provision of law creating a separate department or division, but the various men employed under and paid out of this appropriation have come to be spoken of as "The Secret Service Division of the Treasury," and in the legislative, executive, and judicial appropriation act of 1908 there appears this item:

"Secret Service Division: For 1 chief, $4,000; assistant chief, who shall discharge the duties of chief clerk, $3,000; 1 clerk of class 4; 1 clerk of class 3; 2 clerks of class 2; 1 clerk of class 1; 1 clerk, $1,000; and 1 attendant, $720; in all, $17,020."

In the same act for 1909 the appropriation is $16,120, a reduction of $900.

The practice has grown up in this Secret Service Division of the Treasury of keeping upon the rolls a larger force of detectives than are at all times required for the purposes specified and limited in the statute and of lending or detailing such of them as may be desired from time to time by other departments, from 90 to 95 per cent of such loans or details having been to the Department of Justice. Mr. Wilkie in his testimony says: "I kept as an available force enough men to take care of the Department of Justice's demands as well as my own." This was without the authorization of the statute, but originated, doubtless, in the exigencies and necessities of the case, and the practice has been more or less followed for a good many years. When men have been so detailed from the Secret Service Division, their pay in that division and from that appropriation has ceased, and they have been paid out of appropriations made for the purposes of the departments to which they were detailed.

The Attorney-General, in his report for 1907, expressed his desire for a detective force in his own department, subject wholly to his own control.

Upon the addition of the lines above referred to in the sundry civil appropriation act for the current fiscal year it was considered that the further detail of men from the Secret Service of the Treasury to the Department of Justice, to be paid for out of appropriations carried in the same act, was prohibited, and no such details were made after June 30, 1908. Upon the 1st day of July, 1908, nine of the secret-service employees of the Treasury Department resigned entirely from that service and were employed by the Attorney-General in the Department of Justice, along with others, in the creation of a force of secret-service men there, to which further reference will be made.

The number of men employed in the Secret Service Division of the Treasury Department during the fiscal year 1908 was as low as 44, and at times as high as 68. The average was about 56 men.

On the 30th of June, 1908, the end of that fiscal year, the number employed was 65, which, by the resignation of the 9 who went to the Department of Justice, was reduced to 56, which is the number at the present time.

The assignments, loans, or details from the Treasury Department to departments other than the Department of Justice for the fiscal years 1908 and 1909, as testified by Mr. Wilkie, chief of the division, were as follows:

Fiscal year 1908:

State Department: 1 man for 26 days; 1 man for 12 days; 1 man for 11 days; 1 man for 7 days; 1 man for 6 days; 1 man for 5 days; 1 man for 2 days; total, 7.

War Department: 1 man for 50 days; 1 man for 9 days; 1 man for 8 days; 1 man for 4 days; total, 4.

Navy Department: 1 man for 156 days; 1 man for 32 days; 1 man for 27 days; 1 man for 11 days; 1 man for 10 days; 1 man for 7 days; total, 6.

Treasury Department, Customs Division: 1 man for 17 days; 1 man for 17 days; 1 man for 9 days; 1 man for 8 days; total, 4. Internal Revenue: 1 man for 66 days; 1 man for 33 days; 1 man for 32 days; total, 3. Bureau of Engraving and Printing: 1 man for 4 days.

Department of Agriculture: 1 man for 4 days.

Government of Porto Rico: 1 man for 74 days.

Fiscal year 1909 (6 months):

State Department: 1 man for 159 days; 1 man for 20 days; 1 man for 11 days; 1 man for 8 days; 1 man for 7 days; total, 5.

War Department: 1 man for 4 days.

Navy Department: 1 man for 20 days; 1 man for 16 days; 1 man for 14 days; 1 man for 13 days; 1 man for 11 days; total, 5.

Mr. Wilkie, in a computation made upon the basis shown in his letter to the chairman under date of February 25, 1909, which will be found with the testimony, makes it appear that the average number engaged in all "special investigations" in 1908 was 20½ and for 1909 (six months) 1½. By "special investigations" we assume that he means investigations made for departments and divisions other than the Secret Service Division of the Treasury, from which it would appear that the division had upon its rolls for that year an average of 20½ men more than were required for the purposes expressly authorized by the statute and in 1909 an average of only 1½ men.

During the fiscal year 1909 none of the Treasury secret-service men have been used by the Department of Justice.

Frauds upon the customs revenue.—In the sundry civil appropriation acts for 1908 and 1909, there is an appropriation of $200,000 for each year "for the detection and prevention of frauds upon the customs revenue," also for 1908 an appropriation of $20,000 and for 1909 of $25,000 "for compensation in lieu of moieties in certain cases under the customs-revenue laws." Out of these appropriations there were employed, during each of the fiscal years 1908 and 1909, 27 special agents and 1 supervising special agent, all in the classified service, with salaries fixed and established by law. In 1908 there were employed 52 and in 1909 54 special employees performing similar services, but not within the classified service. They are considered temporary employees and are paid from $4 to $7 per day and traveling expenses when away from home; and there was a third class of confidential agents, 5 in number each year, employed in foreign countries.

There was also employed throughout the whole country in each year about 1,200 customs inspectors, whose duty it is to prevent or detect smuggling and similar violations of the customs laws, and some or all of them have also other duties to perform. They are all in the classified service and receive salaries specified by law. It is not understood that they perform any detective services outside of the customs department. They secure the evidence upon which the Government proceeds against smuggled goods, and the Department of Justice conducts prosecutions for violations of the customs laws.

There are in this department also, and were during each of the fiscal years 1908 and 1909, 225 examiners, whose duty it is to detect undervaluations and other violations of the customs laws. They are all in the classified service.

Mr. Reynolds, Assistant Secretary of the Treasury, did not recall that during 1908 or 1909 the customs department had used any of the men of the Secret Service Division of the Treasury, and said that there had not been any more than two or three such cases within four years. The statement of Mr. Wilkie, Chief of the Secret Service Division of the Treasury Department, shows that on four different occasions in 1908 there were assignments of one man for a short period, in one case for eight days, another for nine days, and two for seventeen days each, and that there were none in 1909.

Internal Revenue Department.—In the internal-revenue branch of the Treasury Department there were during the fiscal year 1908 and are now employed 40 internal-revenue agents charged with the detection and punishment of fraud. They are in the classified service, and their salaries are provided for in the appropriation for agents, gaugers, storekeepers, and other subordinate officers carried in the legislative, executive, and judicial appropriation act. The total appropriation for the fiscal year 1908 was $2,310,000, and for 1909 $2,400,000, an increase of $90,000.

In the same acts there were appropriated for the fiscal year 1908 $250,000 and for 1909 $200,000 to carry out the provisions of the act of March 2, 1907, relating to denatured alcohol. The work for which that appropriation was intended has not developed sufficiently to require the full appropriation, and the men employed under it have been assigned to aid the internal-revenue agents in the investigation of frauds and evasions of taxes. Out of that appropriation there were paid during the fiscal year ending June 30, 1908, 6 agents at $6 per day, and 1 at $5 per day, or 7 in all, with an allowance of $3 per day for subsistence; and during the present fiscal year there have been employed 2 agents at $7 per day, and 5 at $6 per day and subsistence, or a total of 7. From the same appropriation there were employed during the fiscal year 1908, 33 men known as "inspectors" at $5 per day and subsistence, 15 at $4 per day, and 2 at $3 per day, or 50 in all.

During the present fiscal year there have been employed in all 47 such inspectors. These men, paid out of the denatured-alcohol fund, have not all been required by that particular service, but the department considered it wise to keep them, to be in training as the denatured-alcohol business grows, and in any event to help out in the other branch of the work where it is claimed the authorized employees were too few to perform the service.

On three different occasions in 1908 one man was used from the Secret Service Division of the Treasury Department.

Fraud fund.—The sundry civil appropriation act of 1908 appropriated $100,000 for detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws, or conniving at the same. For 1909 this appropriation was $125,000, an increase of $25,000. Out of this fund there were paid, in 1908, 9 special employees at $5 per day and 33 at $4 per day, 42 in all, with $2 per day for subsistence while at their stations, and $2.50 and traveling expenses while away from their stations.

In 1909 there were 14 at $5 per day, and 44 at $4 per day, 58 in all, and in addition there were about 10 such special employees on duty from 30 to 90 days each, employed in emergency cases. Their work is substantially that of detectives. They are practically secret-service men. None of them have within the past two years been loaned or detailed to any other branch of the Secret Service outside of the strictly Internal-Revenue Department.

The salaries and expenses of electors, deputy collectors, surveyors, clerks, messengers, and janitors in the internal-revenue offices were the same for each of the years 1908 and 1909, $2,075,000 having been appropriated for each year. For the salaries and expenses of 40 revenue agents, salaries and expenses of gaugers, salaries and expenses of storekeepers and storekeeper-gaugers, the appropriation for 1908 was $2,310,000, and for 1909 $2,400,000, an increase of $90,000.

Special gaugers.—In a general sense all the officers, agents, or employees of the Internal-Revenue Department have as part of their duties the detection and prevention of fraud, and they are all subject to special duties in that regard. This department has in particular a force of special gaugers and specially assigned deputy collectors under the direct control of the Commissioner of Internal Revenue, whose duties are essentially those of a detective character, such as looking up illicit distillers and other violators of law. The special gaugers are paid not to exceed $5 per day and their actual and necessary traveling expenses. The pay accounts of the detailed deputy collectors are settled by the collectors upon whose recommendation they are appointed, and although detailed to other services they are continued as officers of their respective districts. They receive the same pay and allowance for expenses as though performing duty in their own districts.

Miscellaneous in Treasury Department.—For each of the years 1908 and 1909 there were appropriations as follows: $5,000 for one general inspector of supplies for public buildings, the salary being $3,000 and expenses $2,000. Inspector of furniture and other furnishings for public buildings, salary, $3,000; traveling expenses, $2,500. Assistant inspector of furniture, etc., $1,600. Salaries of special agents and expenses of examiners detailed to examine books and accounts at subtreasuries and depositories, $3,000.

There were also appropriations for employees in the office of the Comptroller of the Treasury, $69,820 for 1908 and $71,420 for 1909, an increase of $1,600. For the office of the Auditor for the Treasury Department, $152,500 for 1908 and $153,700 for 1909, an increase of $1,200. For the office of the Auditor for the War Department, $391,280 for each year. For the office of the Auditor for the Navy Department, $142,540 for 1908 and $146,340 for 1909, an increase of $3,800. For the Auditor for the Interior Department, $167,380 for 1908 and $170,380 for 1909, an increase of $3,000. For the office of the Auditor for State and Other Departments, $113,840 for 1908 and $120,760 for 1909, an increase of $6,920. For the Auditor for the Post-Office Department, $816,370 for 1908 and $825,270 for 1909, an increase of $8,900.

While the officers and employees of these departments are in one sense engaged in the prevention or detection of frauds upon the Government, and their duties are of very great importance, we nevertheless do not consider them as strictly within the scope of our inquiry, and have not stopped to ascertain their number, except to learn that there were a few more in 1909 than in 1908.

DEPARTMENT OF COMMERCE AND LABOR.

Bureau of Immigration and Naturalization.—The act of February 20, 1907 (34 Stat. L., 898), entitled "An act to regulate the immigration of aliens into the United States," provides in its twenty-fourth section that in the enforcement of that portion of the act which excludes contract laborers the Secretary of Commerce and Labor may draw from the immigration fund annually $50,000 for salaries and expenses of persons employed thereunder. Under that act the Secretary employed 56 men to detect contract laborers, one of whom subsequently resigned. Their duties are of a secret-service character. They are not in the classified service, and the Secretary may fix, raise, or decrease their pay.

The "immigrant fund" is derived from a head tax of $4 required to be paid by aliens entering the United States. It may not exceed $2,500,000 in each year.

Many of the provisions of the immigration law are penal in character, and the entire force of the Bureau of Immigration and Naturalization may, in a broad sense, be considered as engaged in the detection or prevention of frauds upon the Government, or violations of that law. They guard all our inland borders, as well as the seaboards, against clandestine entries, and they make arrests. The immigration inspector and other immigration officers, clerks, and employees, as authorized by law, are appointed, and their compensation fixed and raised or decreased from time to time by the Secretary of Commerce and Labor upon the recommendation of the Commissioner-General of Immigration.

There were in that bureau 1,436 employees for the fiscal year 1908, of whom 79 were stationed in the District of Columbia and 1,357 outside thereof. On the 31st of January, 1909, there were a total number of 1,441, of whom 79 were in the District of Columbia and 1,362 in other parts of the country.

Steamboat Inspection Service.—The number of men employed July 1, 1908, was 252, of whom 9 were in the District of Columbia and 243 elsewhere; January 31, 1909, the total number was 261, of whom 9 were in the District of Columbia and 252 outside thereof.

Some of the provisions of the acts regulating steam vessels are penal in their character, and it is part of the duty of these inspectors and other employees to ascertain whether or not their provisions are being violated. Their services are chiefly of an expert character in the inspection of the hulls, boilers, steam pipes, steel plates, and other parts of vessels; they also ascertain whether or not they carry gunpowder or other explosives in violation of law. They issue licenses to masters, chief mates, engineers, and pilots of such vessels, and for sufficient cause may revoke them. Their salaries and expenses are provided for in a permanent appropriation, to be paid out of the revenues received from the inspection of steam vessels and licensing of officers thereof. In no other sense than as above indicated are the employees of this service within the scope of this inquiry.

Bureau of Navigation.—The employees of the Bureau of Navigation ascertain and report violations of the navigation laws.

There were in each of the years 1908 and 1909, 76 of those employees, of whom 23 were in the District of Columbia, and 53 in other parts of the country.

Bureau of Fisheries.—This department maintains 4 agents upon the Pribilof Islands to protect the seals and detect poaching, and this year the Navy Department sent a small man-of-war and the Revenue Department 4 revenue cutters to guard the rookeries.

Bureau of Standards.—This bureau is very useful in preventing frauds upon the Government in the matter of supplies for the various departments, as, for instance, ink and paper, the character of the light used in light-houses, etc., but we hardly think that it is within the scope of this inquiry. It had 118 employees in each of the years 1908 and 1909, all within the District of Columbia.

Bureau of Corporations.—For each of the fiscal years 1908 and 1909 there was appropriated the sum of $175,000 for compensation and per diem, to be fixed by the Secretary of Commerce and Labor, of special attorneys, special examiners, and special agents, for the purpose of carrying on the work of said bureau as provided by the act approved February 14, 1903, entitled "An act to establish the Department of Commerce and Labor," the per diem to be subject to such rules and regulations as the Secretary of Commerce and Labor may prescribe, in lieu of subsistence, at a rate not exceeding $4 per day to each of said special attorneys, special examiners, and special agents, and also of other officers and employees in the Bureau of Corporations while absent from their homes on duty outside of the District of Columbia, and for their actual necessary traveling expenses, including necessary sleeping-car fares.

The regular office force of this bureau is paid for out of a separate appropriation, carried in the legislative, executive, and judicial appropriation bill, which appropriated for the fiscal year 1908 $72,720 and for the fiscal year 1909 $72,720.

The payments out of the lump-sum appropriation of $175,000 cover field men, lawyers, statisticians, etc., that may be employed either in or out of the office, according to the duties assigned them. During the fiscal year 1908 there were paid out of this appropriation 72 persons on the roll as special attorneys, special examiners, and special agents. Twenty-nine of those were temporary appointments. During the fiscal year 1909 there have been employed at one time as many as 81 special attorneys, special examiners, and special agents, of whom 34 were temporary men, and 22 have been dismissed. The statutory roll, so called, included 59 in 1908 and 55 in 1909. It is difficult to differentiate between those required for field service and those required for office service, as they are to a certain extent used interchangeably.

The functions of this bureau while not primarily are nevertheless largely in the direction of the detection or prevention of violations of the law by ascertaining whether or not the corporations and trusts are observing its provisions. The agents of this bureau do not make arrests, nor themselves institute prosecutions, but upon information obtained by the bureau prosecutions may be, and in some notable cases have been, instituted by the Department of Justice. About 15 men from this bureau were detailed or lent to the Department of Justice to assist in the prosecution of the Standard Oil Company and the beef trust. While so employed they were not paid by the Department of Justice, but continued upon the roll and in the payment of the Bureau of Corporations.

This bureau has not during the past two years called upon the Secret Service Division of the Treasury Department nor upon any other department for the loan or detail of secret-service men or detectives, and has not lent nor detailed any of its men for the use of other departments, except to the Department of Justice, as above indicated.

Secretary Straus testified that the Department of Commerce and Labor never called upon the Secret Service Division of the Treasury Department for assistance, and that it had no occasion for such men except to investigate and keep track of officials and employees of his own department. If he needed that kind of men, he much preferred to have them in his own department, as it is "always administratively better if the head of a department has complete control of the men that are working for the department." He testified that on one or two occasions he had used one immigration inspector, experienced in work of that kind, to investigate employees in his own department, and paid

him out of the immigration fund. He stated that with perhaps a little stretch of authority he has one man now investigating the "white slave" traffic, and also that as the case requires he adopts the course of selecting one, two, or three men in his office and sending them to California or El Paso, for instance, to make investigations, the only difficulty about that being that his department is deprived of their services in the office while they are away.

DEPARTMENT OF AGRICULTURE.

Bureau of Animal Industry.—For each of the fiscal years 1908 and 1909 there was appropriated $3,000,000 for the inspection of meat and meat food products entering into interstate or foreign commerce and carrying into effect the meat-inspection laws. Out of this fund there were employed in 1908 2,177 persons and in 1909 a few more. These persons are stationed in packing houses throughout the country, and when violations of law are found they report to the department and the matter is turned over to the solicitor of the department to institute prosecution. They are in the classified service. They are frequently transferred from one field of operation to another and are engaged in preventing or detecting violations of the act of June 30, 1906.

There was appropriated for 1908 $897,200 and for 1909 $947,200, an increase of $50,000, for general expenses of the Bureau of Animal Industry, including the carrying out of the provisions of the act of February 2, 1903, for the suppression and prevention of the spread of contagious and infectious diseases of live stock; the act of March 3, 1905, for the establishment of quarantine districts, and the so-called 28-hour law. For these purposes the department maintained in the field about 250 men in each year, whose duty it was to prevent or detect violations of these laws. When such violations are discovered they are reported through the regular channels to the Department of Justice, which institutes proper legal proceedings.

The Forestry Service.—For the year 1908 there was appropriated for the general expenses of the Forestry Service (exclusive of regular salaries) $1,756,800, and for 1909 $3,151,900, an increase of $1,395,100. This appropriation covered a variety of objects, but out of it 2,551 men were employed in 1908, and 2,345 during the first half of the fiscal year 1909. Their duties are of a mixed character, among them to prevent depredation upon the public lands, violations of the liquor laws, and to report violations whenever discovered to the end that proper prosecutions may be brought. This force includes the so-called "forest guard."

Bureau of Chemistry.—In the Bureau of Chemistry 109 persons were employed in 1908 and 122 in 1909 whose business in a general way is the prevention of fraud in articles of food and drink. They are employed in the execution of the pure-food law, and their operations are confined to that bureau. The appropriations for this bureau were $650,000 for 1908 and $760,000 for 1909, an increase of $110,000.

No secret-service men from any other department have been detailed within the last two years to the Department of Agriculture, and no employees of that department have been detailed for use in any other department. The Secretary of Agriculture has one secret-service man in his own department and would like another.

STATE DEPARTMENT.

For the State Department for each of the years 1908 and 1909 there was appropriated $25,000—the salaries of five consular inspectors, at $5,000 each—and $15,000 each year for their expenses. They inspect the offices of consuls and consular agents and, if necessary, outside persons having relations with those agencies.

During the fiscal year 1908, for the purpose of making special investigations and of guarding the persons of distinguished foreign guests, the State Department obtained from the Secret Service Division of the Treasury nine men, or rather there were nine different employments in which seven different men were concerned. The evidence shows that "they were gotten from the Treasury Department on special detail at the expense of the Department of State."

During the fiscal year 1909 the State Department has had six details from the Secret Service Division of the Treasury Department and two special details from consular offices. Their services were paid for at the rate of from $3 to $6 per day. Some of them were paid out of an appropriation of $90,000 for each year for "emergencies arising in the diplomatic and consular services," and some of them out of an $8,000 appropriation for each year "for expenses under the neutrality act." The State Department had no difficulty in obtaining from the Secret Service Division of the Treasury Department all the men that it needed either in 1908 or 1909.

NAVY DEPARTMENT.

In the naval appropriation act for each of the fiscal years 1908 and 1909 there was appropriated $65,000 for emergencies and extraordinary expenses. Out of this fund the Navy Department in 1908 obtained from the Secret Service Division of the Treasury Department 10 men who were employed for brief periods in connection with thefts at navy-yards. For the present fiscal year, up to January 9, 1909, there had been 5 men employed from the same source. During both years the Navy Department had from the Treasury Department all the secret-service men that it called for or required.

During each of the years 1908 and 1909 the Navy Department had 92 civilian watchmen employed at the various navy-yards in different parts of the country. Some of them, one at least, is classed under the head of "Special labor detectives." It is their duty to prevent thefts or other depredations upon the government property. But their duties in that regard are not different from those of watchmen about the public buildings in Washington, and we therefore give them no further consideration.

There is also in this Department a Bureau of Supplies and Accounts, and the office of the Paymaster-General, by which all accounts are investigated and audited for the purpose of preventing frauds against the Government. There are two general inspectors, office of the pay corps of the navy, who travel around to the various navy-yards to inspect the accounts of the various offices. Their compensation is the pay for their rank and corps. In the Bureau of Supplies and Accounts there are nine civil employees and seven or eight officers directly connected with the Department at Washington. The committee has not obtained detailed information as to the number of men and officers of the navy employed in investigating armor plate, gunpowder, naval stores, and the various supplies purchased and required in the Department.

THE ARMY.

A vivid illustration of the difficulty of determining the amount of appropriations "that could be used" to prevent or detect frauds or the apprehension and punishment of persons charged with violations of the laws is found in the appropriation for incidental expenses contained in the army appropriation act. It is in precisely the same language for each of the years 1908 and 1909. For 1908 the lump sum of $1,944,016.72 is appropriated for incidental expenses, among which are enumerated postage, telegrams, erection of barracks, reimbursement of funeral expenses, office furniture, hire of laborers, compensation of clerks in certain offices, hire of veterinary surgeons, purchase of medicines for horses, blacksmith tools, horseshoes, and scores of other purposes.

Along in the body of the paragraph occurs the word "spies," and in another place the words "for the apprehension, securing, and delivering of deserters, escaped military prisoners, and the expenses incident to their pursuit." The appropriation for 1909 was $2,200,000, an increase of $255,983.28. By sacrificing the other objects enumerated, these appropriations might all have been expended in the hiring of spies, but as matter of fact the evidence shows that nothing whatever was so expended during either year, unless possibly in the Philippine Islands, and only comparatively small sums for the apprehension of deserters and escaped military prisoners. Even the investigation of the Brownsville matter was not paid for out of these appropriations. They need not, therefore, be further considered.

In the Brownsville case the War Department made a contract with the chief of the detective bureau which serves certain southern railways, or with him and one other, to undertake certain work for a certain specified amount of money. These contractors were two in number. They employed a number of private detectives, but just how many the War Department does not know, as these detectives were employed by the two contractors and reported to them, and they in turn made report to the department. The amount paid to these contractors was $5,000 in the fiscal year 1908 and $10,000 in the fiscal year 1909. These payments were made out of an appropriation of $3,000,000 made in the deficiency appropriation act of March 3, 1899 (30 Stat. L., 1214–1223), "for emergency fund to meet unforeseen contingencies constantly arising, to be expended at the discretion of the President." The balance of that fund still unexpended is $229,639.32. The entire fund may be declared as one "that could be used" for purposes such as are covered by this inquiry, but no part of it appears to have been so used except the $15,000 above mentioned.

In the army appropriation act for 1908 an item of $10,000 and for 1909 of $15,000 "for all contingent expenses of the army not otherwise provided for" was included, which doubtless could be used for such purposes, but the evidence shows that it was not, there having been no occasion for such use.

The army appropriation act carried a total of $69,000 for each year for the pay of officers in the Inspector-General's Department and one expert accountant, and other items relating to that department were carried in the legislative, executive, and judicial appropriation act, aggregating in all $105,005.76. In this department there were in each year 17 commissioned officers, 1 expert accountant, 24 clerks, 10 messengers, and 6 enlisted men.

While the prevention or detection of fraud by the officers and men of the Inspector-General's Department is not the primary object of that department, it is an important incident thereof. The evidence shows that "officers of the department are detailed to investigate special charges against officers, soldiers, or civilian employees involving fraudulent practices against the Government or in their private relations, which bring discredit upon the Government which they serve," and that "their work sometimes incidentally involves the investigation of persons not directly connected with the army, through misconduct or financial irregularities involving army officers with those persons, but never for such persons directly only when that purpose is involved in the investigation of the conduct of somebody connected with the army." It does not investigate the affairs of private individuals, firms, or corporations unless in some way connected with the army itself or some army officer, or something of that kind.

The celebrated Carter case is one in which a member of the Engineer Corps having made a complaint or allegation against Carter, an inspector of the Inspector-General's department was ordered there to make an investigation, and having made the same he reported, and, based upon his report, charges were preferred against Captain Carter.

The Chief of Staff testified that, so far as he knew, the War Department had not called upon the Secret Service Division of the Treasury Department or used any of its men during either of the years 1908 or 1909.

The difficulty of determining just what officers or employees should be considered as fairly within the scope of this inquiry is further illustrated in the case of other branches of the War Department. Maj. Gen. J. F. Bell, Chief of Staff, in order that he might fully inform the committee, sent a communication to all bureau chiefs of the War Department calling for information, in the course of which he said:

"It will in some cases be hard to draw a line between those who are and are not employed in detecting or preventing frauds against the Government; but all those whose duties clearly come within the scope of these provisions should be enumerated, and a general statement should be submitted covering all those whose duties come partially within this scope, such, for instance, as officers and employees of the Inspector-General's department, inspectors employed by constructing quartermasters, inspectors of articles being manufactured under contract, such as ordnance, subsistence, quartermaster supplies, clothing, furniture, etc.

"Their actual status and duties should be sufficiently defined in each case as to show clearly just what part of their duty consists in such work. Clerks to inspectors and those handling administrative work connected therewith need not be included unless that is their exclusive work."

We have already sufficiently referred to the Inspector-General's department. The replies from the other bureaus, showing the number of persons employed and the character of their duties, may be found in the testimony. The persons so employed, while neither detectives nor secret-service men, were, to some extent, and many of them in a very important way, engaged in preventing or detecting frauds upon the Government.

INTERIOR DEPARTMENT.

Pension Bureau.—Of course part of the duties of the clerks in the Pension Department is to detect or prevent fraud. That, however, is merely incidental to their general duty of ascertaining whether or not the applicant for a pension is within the law, and the amount of pension to which he is entitled. We do not think that these clerks are within the pending inquiry.

The legislative, executive, and judicial appropriation act for 1908 carried $162,500 for the payment of 125 special examiners, and the

same act in 1909 carried $130,000 for 100 special examiners, a decrease of $32,500 in the appropriation and 25 in the number of special examiners. It is provided in the law that no person appointed as special examiner "shall be employed in the State from which he is appointed." In addition to this, the commissioner is authorized to make such details as may be necessary for field work.

The average number of these special agents or examiners engaged in field work in 1908 was 135, and the present number is 148. While they are used to investigate cases of alleged fraud, they are also used to take testimony in cases of poor persons applying for pensions, who are unable to bear the expenses of producing the necessary witnesses. In other words, they help the poor, righteous claimant, and detect the fraud of the unjust claimant. The appropriation for traveling expenses of special examiners and those detailed for making special investigations pertaining to the Pension Bureau was $300,000 for 1908, and $250,000 for 1909, a reduction of $50,000. The reduction was made upon the recommendation of the Commissioner of Pensions. The Pension Department has not had occasion to call upon any other department or branch of the Government for secret-service men within the past two years.

Indian Affairs.—In this department there were 12 in 1908 and 8 in 1909 so-called Indian inspectors, who are presidential appointees and have been or will be transferred to the Secretary's roll so as to serve the whole department. Their duties are of a mixed character, and they often take up cases involving violations of law. They are not in the classified service. They are paid out of a special appropriation for inspectors. The amount appropriated in the Indian appropriation bill for salaries and expenses was $33,800 for each year.

For 1908 there was appropriated $25,000, and for 1909 $40,000 to be used by the Commissioner of Indian Affairs in the suppression of the liquor traffic among Indians.

There was also an appropriation for each year for expenses of Indian police.

There was appropriated $75,000 for 1908 and $85,000 for 1909 for contingencies in the service, including expenses of Indian agents.

Out of these appropriations for Indian Affairs there were employed 12 inspectors in 1908 and 8 in 1909 at $2,500 each, with $3 in lieu of subsistence and $3 per diem for traveling expenses.

In 1908 the Indian police numbered 44 officers and 667 privates, and in 1909 there were 49 officers and 685 privates. The officers received $25 per month and the privates $20. There was also one special officer at $2,500 per annum and 7 at $1,200 per annum engaged in suppressing liquor traffic, with an allowance of $3 per diem for traveling and subsistence.

General Land Office.—In the sundry civil appropriation act for the fiscal year 1908 there was an appropriation of $250,000 for protecting public lands from illegal and fraudulent entry or appropriation, providing for the appointment of agents by the Secretary of the Interior, etc. For the fiscal year 1909 the appropriation was $500,000, an increase of $250,000. Out of these appropriations special agents were employed. During the fiscal year 1908 the average number was 90. The number at the end of the year was 107. During the fiscal year ending June 30, 1909, to the end of January, there were employed at times as high as 173. The number in January, 1909, was 128, and the average for that portion of the year was 156. They were and are engaged in preventing or detecting frauds and trespasses, stealing of timber, illegal entries of land, fraudulent surveys, fraudulent titles, and the like. These special agents were assisted in each of the years 1908 and 1909 by 23 examiners of surveys for the purpose of detecting fraudulent surveys. These special agents were not, during the years in question, detailed to or used in any other branch of the public service. Their compensation varies from $1,200 to $1,800 per annum, and they are allowed by law $3 per day in lieu of subsistence, and actual expenses for transportation.

The Interior Department has not in any of its branches or bureaus used any of the men of the Secret Service Division of the Treasury Department during either of the years 1908 or 1909.

Mr. Garfield, the Secretary of the Interior, testified before this committee that there had been no embarrassment to his department during either of the years for lack of assistance of that kind; that many of his special agents had become expert in ferreting out perjury, forgery, and other crimes, and that being familiar with the land laws they were, in a general way, more effective than an ordinary detective. Speaking of his force of special agents, he said: "They are engaged in just such work as you have indicated;" that is to say, in the detection or prevention of fraud.

It seems that formerly these land-fraud cases, or many of them, were worked up, in the first instance, by secret-service men put upon the work by the Department of Justice and taken either from its own employees or those of the Secret Service Division of the Treasury. But soon after Mr. Garfield came into office he made an arrangement with the Attorney-General whereby such cases were to be worked up, in the first instance, by the special agents of the Interior Department without the assistance of men from any other department. The secret-service men of the Department of Justice now assist in these matters only after they have been referred to that department by the Secretary of the Interior, but no employees of the Department of Justice, or any other department, are now engaged in the preliminary investigation of cases in the Land Department except in a few particular cases, the investigation of which they had started before the present arrangement between the two departments was made.

This arrangement between the Department of the Interior and the Department of Justice was made some time in 1907, and became effective February 16, 1908, at which date the records which employees of the Department of Justice or of the Secret Service in the Treasury loaned to it for that purpose had made in the West were turned over to the agents of the Interior Department. From that time to the present the Interior Department has done its own investigating with its own special force and without outside assistance.

Speaking of the arrangement between the two departments, Secretary Garfield said:

"The present line of division of work between the Department of Justice and the Interior Department is as follows: All the land cases involving litigation are prepared by the special agents of the General Land Office. In case they report that a certain set of facts justifies prosecution, either criminal or civil, report is made to the Assistant Attorney-General's office of my department and thereafter passed upon by me. If I determine that the facts justify either criminal or civil prosecution, I forward all the papers to the Department of Justice with the request that that department give the matter consideration and take such action as it may deem advisable from the facts, stating to the department that if a case is brought the agents of the Land Office are available for the Department of Justice as witnesses and for such further investigation of the facts of the case as the Department of Justice may require." (Record, p. 244.)

Speaking further of this force of special agents, Mr. Garfield, in his letter of January 16, 1909, addressed to the Secretary of the Treasury, and by him in turn forwarded to the Speaker of the House of Representatives, said:

"The increased appropriation given by Congress last year has been of the greatest benefit in putting the service upon a proper basis. * * *

"The field force is at present better organized than at any time in its history, and I can readily add other agents in the different districts where work is required. The older men—those who have had experience in the field—will handle the more difficult cases, and the new men will be immediately assigned to the simpler cases. * * *

"I have given the closest personal attention to the organization and personnel of the special-agent force. At best the work of a special agent is most difficult. No matter how honestly, how effectively, he works, he is constantly subjected to the criticism of every entryman upon whose claim an adverse report is made, and it is unfortunately too often the case that the dishonest entryman seeks to cover up his own fraud by charging the agent with unfair or corrupt action."

After explaining the arrangement between his department and the Department of Justice, whereby his force of special agents do the investigating in the first instance and the Department of Justice investigates only after it has been called upon to make such investigation, Mr. Garfield in his testimony said:

"There is a clear line of division of work, and we are endeavoring to keep as close to that as possible. That is the only case where the Department of the Interior, so far as its particular cases of fraud are concerned, is at all embarrassed. If the Department of Justice does not have a force of secret-service men who can do work of the character that I have just indicated, then the cases which the Land Department has forwarded to them, involving criminal prosecution, might be seriously embarrassed.

"Mr. OLMSTED. Are many of your men detailed at any time to assist the Department of Justice in detective work, so called, or the preparation of cases, other than looking after the facts?

"Mr. GARFIELD. No; there are none.

"Mr. OLMSTED. Has there been any embarrassment resulting from a lack of detective or secret-service force available for the Department of Justice?

"Mr. GARFIELD. I understand that there was prior to my administration of the Interior Department.

"Mr. OLMSTED. But since your administration?

"Mr. GARFIELD. Since that time I have had no difficulty of that character, because of an arrangement which the Attorney-General and I have made with regard to the conduct of those cases.

"Mr. OLMSTED. The Attorney-General now has, we understand, an effective force of his own available for his use.

"Mr. GARFIELD. I do not know whether he has that force.

"Mr. OLMSTED. We have a letter so stating, and he has 34.

"Mr. GARFIELD. So far as we are concerned, there is no lack on our side.

"Mr. OLMSTED. So far as your department is concerned, there has been no embarrassment for lack of assistance of that kind?

"Mr. GARFIELD. There has not. I am speaking now in my own administration. There was difficulty prior to that time.

"Mr. OLMSTED. Our inquiry does not go back of that time.

"Mr. BRANTLEY. The ordinary detective, so called, would he really be a competent man in the investigation of these land frauds and land matters unless he was specially trained in the matter of titles, and so on?

"Mr. GARFIELD. He would be at a disadvantage if he did not know the land laws and the operations under the land laws. It is of course true that certain classes of claims, such as forgery and perjury, that are wholly disconnected with the enforcement of any particular law, a detective would be able to discover, but in the investigation of these land-fraud cases, where either forgery or perjury or similar claims are charged or alleged, it is a very great help to the man who is investigating these cases to know very clearly the public-land laws, the methods of their administration, and the effect of the various papers that are filed in connection with these various entries. It is, therefore, not a wise or effective way of conducting such an investigation as that to put it in the hands of a detective simply. Whereas he might very readily discover some of these particular points, he would not be as effective as the land officer who is approaching the case from the other point of view, and incidentally is able to follow out any of the leads that may result in the exposure of either forgery or perjury or similar crimes."

In pursuance of that arrangement a large number of pending cases, which had theretofore been partially investigated by the secret or special service of the Department of Justice, were, upon the 16th of February, 1908, transferred to the General Land Office field force, by whom such investigations are now made.

Accompanying the letter to the Speaker above referred to was a communication addressed by H. H. Schwartz, chief of the field service, to the Commissioner of the General Land Office, in which, after detailing to some extent the cases upon which they are engaged and the effectiveness of the force, he said:

"However the investigations of the past two years by your special agents, aided by an aroused public sentiment, have produced evidence and information of wholesale and astounding frauds upon the public lands, and such cases necessarily require much time from the field force. As a result, we have of record in the special service division of this office the 32,000 distinct cases demanding further field action, notwithstanding that during the past seventeen months there have been investigated a total of over 28,000 cases."

As the result of that correspondence the appropriation, which for 1908 was $250,000 and for 1909 $500,000, has been increased to $1,000,000 for 1910 in the sundry civil appropriation bill as it passed the House of Representatives, February 26, 1909.

Secretary Garfield also testified that since he became the head of the department, March 4, 1907, "I have made no use or any requisition upon the Treasury Secret Service for the use of their men."

DEPARTMENT OF JUSTICE.

In the Department of Justice there are six classes of employees who fall fairly within the limits of this inquiry.

Special agents.—What are designated as "special agents" in this department are secret-service men. Prior to July 1, 1908, there were 20 of them. Upon that date there were added the 9 men previously referred to, who were chosen, and thereupon resigned, from the Secret Service Division of the Treasury, making 29. Three of the 9 have since

been dropped—1 for insubordination, 1 for unfitness, and the third for some reason not definitely stated. Others have been added to this force, so that on the 30th of January, 1909, there were 40.

The appropriation fund out of which these men were employed was $540,000 for the fiscal year 1908 and $560,000 for 1909, an increase of $20,000. Taking the Secret Service Division of the Treasury and the Secret Service Division of the Department of Justice together, it appears that, as the appropriation for one was decreased $10,000 and the other increased $20,000, there was a net increase of $10,000 for purely secret-service men. Adding the 20 who were in the Department of Justice June 30, 1908, to the 65 in the Treasury division, gives a total of 85 for that year. At present there are 56 in the Treasury division and 40 in the Department of Justice, making 96—a net increase of 11.

In his report to Congress for 1907 Attorney-General Bonaparte said:

NEED OF A DETECTIVE FORCE.

"The attention of the Congress should be, I think, called to the anomaly that the Department of Justice has no executive force, and, more particularly, no permanent detective force under its immediate control. This singular condition arises mainly from the fact that before the office of the Attorney-General was transformed into the Department of Justice a highly efficient detective service had been organized to deal with crimes against the Treasury laws, which force has been, in effect, lent from time to time to this department to meet its steadily increasing need for an agency of this nature, without, however, being removed from the control of the Treasury Department. I note with pleasure the efficiency and zeal with which these officers have cooperated with the United States attorneys and marshals, as well as with the special representatives of this department, in securing the enforcement of the federal laws; but occasionally circumstances have suggested the advisability of having all those engaged in this common work, in last resort, under a common head; and in some instances it has been found inexpedient to employ secret-service officers in the general police work of this department in the interest of their own special and appropriate duties. When emergencies arise requiring prompt and effective executive action, the department is now obliged to rely upon the several United States marshals; if it had a small, carefully selected, and experienced force under its immediate orders, the necessity of having these officers suddenly appoint special deputies, possibly in considerable numbers, might be sometimes avoided with greater likelihood of economy and a better assurance of satisfactory results. I venture to recommend, therefore, that provision be made for a force of this character; its number and the form of its organization must be determined by the scope of the duties which the Congress may see fit to intrust to it. It may well be thought wise to preserve unchanged the existing detective organization, especially in view of its highly creditable record and excellent service, and it is not in any wise my purpose to suggest a different view, but it seems obvious that the department on which not only the President, but the courts of the United States, must call first to secure the enforcement of the laws ought to have the means of such enforcement subject to its own call; a Department of Justice with no force of permanent police in any form under its control is assuredly not fully equipped for its work."

In his report for 1908, after the establishment of the force above mentioned, he said:

THE NEW SPECIAL-AGENT FORCE.

"In my last annual report I called attention to the fact that this department was obliged to call upon the Treasury Department for detective service and had, in fact, no permanent detective force directly under its orders. Through the prohibition of its further use of the secret-service force, contained in the sundry civil appropriation act approved May 27, 1908, it became necessary for the department to organize a small force of special agents of its own. Although such action was involuntary on the part of this department, the consequences of the innovation have been, on the whole, moderately satisfactory. The special agents, placed as they are under the direct orders of the chief examiner, who receives from them daily reports and summarizes these for submission each day to the Attorney-General, are directly controlled by this department, and the Attorney-General knows, or ought to know, at all times what they are doing and at what cost. Under these circumstances he may be justly held responsible for the efficiency and economy of the service rendered. The experience of the past six months has shown clearly that such a force is, under modern conditions, absolutely indispensable to the proper discharge of the duties of this department, and it is hoped that its merits will be augmented and its attendant expense reduced by further experience."

In his testimony before this committee he said that the transfer of the land-fraud investigations to the Interior Department early in the calendar year 1908 had resulted in considerable economy in expenses.

In his testimony he also said:

"The general result has been fairly satisfactory. This, as the committee will of course understand, is during the six months that immediately succeeded the elimination of the secret-service operatives. Some of the United States attorneys were very much annoyed and caused anxiety by not being able to call for this force of experienced men, upon whom they had become accustomed to rely, and they hesitated to intrust our new force of special agents with the same responsible duties. That was particularly noticeable in the case of the United States attorney for the southern district of New York, in connection with the Morse prosecution. Some instances of it, however, occurred in other cases. This was quite a reasonable frame of mind for those attorneys to entertain, and I fully appreciated the difficulty of the situation. Nevertheless, I can not say that any miscarriage of justice occurred as a result of it, and certainly the result in the Morse case did not indicate that the new special agents were less faithful than the more experienced ones they had had previously."

The Attorney-General thinks that no serious difficulty will be found in recruiting as more men are needed.

In the course of his testimony the following occurs:

"Mr. YOUNG. You still retain the same opinion as to the policy of having a secret force under the direct control of the Attorney-General that you expressed in those reports, do you not?

"Mr. BONAPARTE. I do.

"Mr. YOUNG. Your experience has rather confirmed your opinion in that respect than otherwise?

"Mr. BONAPARTE. It has; and so far as it has affected my opinion at all it has strengthened it. I am clear that it is better administration to have a separate force under the Department of Justice, and I think that force ought to be a general detective force, for all government work. I think the Department of Justice ought to have the control of the detection of crime and the preparation of evidence for all classes of federal offenses. In other words, I think that wherever the Department of Justice has to try a case the Department of Justice ought to have the work of ascertaining the persons probably guilty, and of bringing the case against them.

"Mr. YOUNG. In other words, where the responsibility lies, the power should be.

"Mr. BONAPARTE. I think that is a principle of good administration."

With that view of the matter we understand that Mr. Wilkie, the chief of the Secret Service Division of the Treasury, concurs.

Bank examiners.—In his report to Congress for 1908 the Attorney-General said:

SPECIAL ACCOUNTING FORCE NEEDED.

"In prosecutions for violations of the laws relating to national banks it is often necessary, and has become customary, for this department to secure the services of national-bank examiners to prepare the cases for trial and testify as expert witnesses regarding the records of the banks involved. These officers display both zeal and capacity in the discharge of these duties, but it would be more satisfactory and less expensive if the Department of Justice had a small number of trained accountants in its permanent employ for these and similar purposes. The reasons which have been found by experience to, in some measure, counterbalance the loss of the very valuable services of the secret-service force apply with at least equal force to bank examiners; and if the Congress shall not see fit to indicate its disapproval, the employment of such accountants in their places may receive careful consideration by the department in the near future.

"The number and gravity of offenses against the national banking laws by officers or employees of national banks constitute matters of reasonable solicitude and regret. The moral culpability involved in such offenses seems often to be imperfectly appreciated and, although they usually excite great indignation and provoke loud complaints from the sufferers when they are first discovered, so much time is frequently lost in the preparation for trial and actual trial of these long and complicated cases that the crime itself has faded from public memory when the criminal is at last convicted, and there is need of vigilance lest he finally escape with wholly insufficient punishment. The department has felt bound in duty energetically to assist the several United States attorneys in bringing this class of offenders to justice, and to do all in its power to assure them adequate penalties."

During each of the years 1908 and 1909 the Department of Justice in the prosecution of cases of offenses against the national banking laws has employed 35 national-bank examiners. These men who are agents of the Treasury Department do not receive salaries from the Government, but when one of them examines a national bank he receives certain legal fees which are required to be paid by the bank. He receives nothing from the United States Treasury for his regular services. When the Attorney-General sends these examiners to investigate the affairs of a bank for the purposes of a criminal prosecution, they charge from $10 to $25 per day and expenses. These charges are paid out of the appropriation for "Such miscellaneous expenses as may be authorized by the Attorney-General," etc. The department has no means of telling whether their services are really needed, or whether they are giving a fair return for the money, or, as the Attorney-General expresses it, "Simply making time."

He thinks it would be a source of very considerable economy to have a force of expert accountants in his own department, whom he could send to make such investigations. He complains that he has no method of supervising the work of the bank examiners, and says:

"No; the relations of the Department of Justice to the bank examiners are very similar to what they were to the secret-service operatives. The bank examiners are under the control of the Treasury Department, and they are loaned to us, so to speak—that is, they are designated for accounting work, and we appoint them as special officers of our department for the time being, and they are paid out of our appropriations. I have several times called attention to the fact that it would be very desirable for us to have a corps of accountants of our own, and if I were going to remain Attorney-General I should organize such a corps to at least relieve the bank examiners of their duties in the preparation of criminal cases."

He complains that he has no method of supervising the work. "No; we have no means at all. There was the same objection to the work of the secret-service operatives," who, he says, did not report to him daily, but "to the chief of their division in the Treasury Department. They also made reports, more or less regularly, to the United States attorney under whom they worked, but there was not any coordination of those reports which enabled the Attorney-General to supervise and know." Speaking of them and the bank examiners, he says:

"I think both those forces ought to be under the control of the Attorney-General."

Antitrust law agents or investigators.—There are 2 men regularly employed as antitrust investigators and paid out of the appropriation for the enforcement of the antitrust laws. From time to time others are occasionally employed. At the present time there are 3, one having been employed under authority of the Attorney-General by the special counsel in the prosecution against the Harriman railway system.

The Attorney-General, before the committee, could not remember the number of men that had been temporarily employed, but said "the number was certainly not large."

Regular examiners of the Department of Justice.—The department has a force known as regular examiners, consisting of one chief examiner at $2,750 per annum, 3 examiners at $2,500, 4 at $2,250, 2 at $2,000, and 3 at $1,800. Under instructions from the Attorney-General these examiners examine the offices, records, accounts, and official acts of United States marshals, attorneys, commissioners, and clerks of courts. They make confidential reports as to the conduct of the United States officers connected with the Department of Justice. The number was the same in each of the years 1908 and 1909.

These men are paid from $3 to $5 per day and a per diem for expenses out of an appropriation carried in the sundry civil act for "Payment of such miscellaneous expenses as may be authorized by the Attorney-General for the United States courts and their officers, including the furnishing and collecting of evidence," etc. As already stated, the amount appropriated for 1908 was $540,000 and for 1909 $560,000.

Naturalization examiners.—Connected with the Department of Justice there are 34 naturalization examiners, whose duties are to assist in every possible way the assistant United States attorneys in charge of naturalization matters, in obtaining evidence necessary to prevent fraudulent naturalization, and to enable such attorneys to prosecute suits to set aside judgments of naturalization fraudulently or illegally obtained. There are 34 of these assistant United States attorneys, and they and the examiners are paid out of the appropriation for "Pay of

assistant attorneys in naturalization cases." The number is understood to have been the same in each of the years 1908 and 1909.

Other agents engaged in certain classes of detective work.—The Department of Justice had during 1908 and 1909 about 7 men constantly employed "in certain classes of cases of detective work, principally peonage and land-fraud cases, which we deemed it inadvisable to place in the hands of the secret-service operatives." They were all paid out of the appropriation for miscellaneous expenses.

We submit herewith the testimony taken by the committee. Under the appropriate heads of this report we have indicated the number of men in each department whose duties we think bring them fairly within the scope of this investigation, including not only secret-service men and detectives, so called, but those who are designated as special agents, special examiners, investigators, inspectors, special employees, and the like, showing the increase or decrease in number in each branch of the service; the appropriations available for their employment, and the increase or decrease therein, for the fiscal years 1908 and 1909.

The net increase in the total number in all departments in 1909 over the number for 1908 was 100.

The appropriations for 1909 "that could be used" for such purposes were, in the aggregate, $1,980,708.28 more than the similar appropriations for 1908.

It must not be understood, however, that this increased sum was all actually expended for such purposes. By far the larger amount of the increases were in lump sum appropriations, covering a great variety of objects, and while they were such as could be, they were not actually all used in the employment of persons for the detection or prevention of fraud.

The largest single increase is $1,395,100 in an appropriation for the Department of Agriculture, most of which was used for entirely different purposes. So there was an increase of $255,983.28 in a lump sum appropriation for the army, which could have been, but was not, used for the hiring of spies.

Except in the few instances indicated in this report we have found no branches of the public service, or persons employed therein, engaged in any duty not contemplated by law; but whether any such persons have been or are engaged in any duty not contemplated by law or the appropriation establishing or providing for such service could be accurately ascertained only by an examination of each person so engaged in any such service, which examination could not be made within the life of the present Congress.

While your committee is not required, by the terms of the resolution under which it is acting, to make any recommendation, we deem it proper to call attention to the fact that the Secret Service Division of the Treasury Department now exists without permanent authority of law, dependent entirely upon appropriations made from year to year, and that the like force in the Department of Justice is similarly without permanent authority of law, and paid out of lump-sum appropriations for incidental expenses. We call attention also to the recommendations of the Attorney-General in his reports to Congress for 1907 and 1908 recommending that provision be made for a force of this character, its number, and the form of its organization to "be determined by the scope of the duties which Congress may see fit to intrust to it;" and that a sufficient number of accountants be included therein, or their employment authorized by him, to dispense with the costly and unsatisfactory employment of bank examiners, referred to in his reports and in his testimony. Whether the separate forces of secret-service men now existing in the Treasury Department and in the Department of Justice should be combined in one, under control of the Attorney-General, we do not attempt to decide, but suggest that, whether separately maintained or under one control, they should be permanently provided for and their duties clearly defined and limited by law.

MARLIN E. OLMSTED,
FRANK D. CURRIER,
H. OLIN YOUNG,
WILLIAM G. BRANTLEY.
EATON J. BOWERS.

MARCH 3, 1909.

MESSAGE FROM THE SENATE.

A message from the Senate announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes.

ENROLLED BILLS SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 28304. An act granting certain obsolete ordnance for ornamental purposes;

H. R. 28411. An act to grant two cannons to Northern Ohio University, at Ada, Ohio;

H. R. 28059. An act making appropriations for the Military Academy for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 27053. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910;

H. R. 21003. An act fixing the compensation of certain officials in the customs service, and for other purposes;

H. R. 28167. An act to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public building acts, and for other purposes;

H. R. 24834. An act for the protection of the surface rights of entrymen;

H. R. 28243. An act to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes;

H. R. 28055. An act to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa.; and

H. R. 21896. An act to amend section 86 of "An act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes."

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 7640. An act to extend the time for the completion of a bridge across the Missouri River at Yankton, S. Dak., by the Yankton, Norfolk and Southern Railway Company;

S. 9278. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors;

S. 8520. An act requiring reports of the Hospital for Foundlings to be made to the Commissioners of the District of Columbia;

S. 8187. An act to change the name of the Washington Hospital for Foundlings; and

S. 9421. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills and joint resolution:

H. R. 24835. An act authorizing the necessary resurvey of public lands;

H. R. 26916. An act making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1910;

H. R. 8661. An act for the relief of the Richmond Light Infantry Blues, of Virginia;

H. R. 21896. An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes;

H. R. 28243. An act to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes;

H. R. 28055. An act to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa.;

H. R. 24834. An act for the protection of the surface rights of entrymen;

H. R. 27053. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1909;

H. R. 21003. Fixing the compensation of certain officials in the customs service, and for other purposes;

H. R. 28167. An act to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public building acts, and for other purposes; and

H. J. Res. 262. Joint resolution extending the operation of an act for the control and regulation of the waters of the Niagara River, for the preservation of Niagara Falls, and for other purposes.

PRINTING OF "NOTES ON TARIFF REVISION," "IMPORTS AND DUTIES," "TARIFF HEARINGS."

Mr. PERKINS. Mr. Speaker, I submit the following report (H. Rept. No. 2323) from the Committee on Printing and move its adoption.

The SPEAKER. The Clerk will read the resolution.

The Clerk read as follows:

House concurrent resolution 77.

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound 1,000 copies of "Notes on Tariff Revision," prepared under the direction of the clerk of the Committee on Ways and Means, 700 copies for the use of the House and 300 copies for the use of the Senate; that there be printed and bound 1,000 copies of "Imports and Duties," 1894 to 1907, prepared under the direction of the Committee on Ways and Means, 700 copies for the use of the House and 300 copies for the use of the Senate; that there be printed and bound 2,500 copies of "Tariff Hearings" before the Committee on Ways and Means of the House of Representatives since the 10th day of November last, 1,700 copies for the use of the House and 800 copies for the use of the Senate.

The amendments recommended in the report of the Committee on Printing are as follows:

In line 2 strike out the words "one thousand" and insert in lieu thereof the words "thirteen hundred."

In line 5 strike out the words "seven hundred" and insert in lieu thereof the words "one thousand."

In line 7 strike out the words "one thousand" and insert in lieu thereof the words "thirteen hundred."

In line 10 strike out the words "seven hundred" and insert in lieu thereof the words "one thousand."

Mr. UNDERWOOD. Mr. Speaker, will the gentleman yield for a question?

Mr. PERKINS. Yes.

Mr. UNDERWOOD. I desire to ask the gentleman whether these books will be distributed to the Members through the folding room or through the document room?

Mr. PERKINS. Through the folding room.

Mr. FITZGERALD. It does not so provide in the resolution.

Mr. PERKINS. This resolution calls for printing for the use of the House, and under such resolution I think they are distributed among the Members.

Mr. BARTLETT of Georgia. They can not be, unless they art put in the folding room. Unless the gentleman provides they shall go to the folding room we will get them from the document room.

Mr. PERKINS. No, the gentleman is wrong; they are distributed from the folding room pro rata to Members.

Mr. GAINES of Tennessee. Will the gentleman inform us whether they go to the credit of Members of this Congress or to Members of the next Congress.

Mr. PERKINS. They go to the credit of Members of this Congress.

Mr. GAINES of Tennessee. I do not want them, and I will give them to my successor.

Mr. PERKINS. The gentleman can turn them over to his successor. Mr. Speaker, I move the adoption of the resolution.

The amendments were agreed to.

The resolution as amended was agreed to.

BUREAU OF ANIMAL INDUSTRY, DEPARTMENT OF AGRICULTURE.

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with the accompanying documents, referred to the Committee on Agriculture.

The message is as follows:

To the Senate and House of Representatives:

I transmit herewith a letter from the Secretary of Agriculture submitting a report of the operations of the Bureau of Animal Industry of the United States Department of Agriculture for the fiscal year ended June 30, 1908, prepared in compliance with the requirement of section 11 of the act approved May 29, 1884.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *March 2, 1909.*

LEAVE OF ABSENCE.

By unanimous consent, Mr. CLARK of Florida was granted leave of absence for the balance of the session on account of sickness.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes.

The message also announced that the Senate had passed without amendment the following resolutions:

House concurrent resolution 69.

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound 2,000 copies of the hearings, including index, of the select committee of the House to investigate as to pulp wood, pulp, and paper, of which 1,500 copies shall be for the use of the House, including 300 copies to be distributed under the direction of the members of said committee elected to the Sixty-first Congress, and 500 copies for the use of the Senate.

House concurrent resolution 77.

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound 1,000 copies of "Notes on Tariff Revision," prepared under the direction of the clerk of the Committee on Ways and Means, 700 copies for the use of the House and 300 copies for the use of the Senate; that there be printed and bound 1,000 copies of "Imports and Duties," 1894 to 1907, prepared under the direction of the Committee on Ways and Means, 700 copies for the use of the House and 300 copies for the use of the Senate; that there be printed and bound 2,500 copies of "Tariff Hearings" before the Committee on Ways and Means of the House of Representatives since the 10th day of November last, 1,700 copies for the use of the House and 800 copies for the use of the Senate.

Joint resolution (S. R. 140) to create a joint commission to consider the revision and codification of the laws of the United States.

The message also announced that the Senate had passed with amendment joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

H. J. Res. 235. Joint resolution concerning and relating to the treaty between the United States and Russia.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 8819. An act to amend an act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and the acts supplementary thereto, so as to extend the benefits thereof to the District of Columbia.

S. 6934. An act for the relief of the Merritt & Chapman Derrick and Wrecking Company.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 28192. An act to amend and consolidate the acts respecting copyright;

H. R. 23468. An act to amend sections 11 and 12 of an act entitled "An act to provide for eliminating certain grade crossings on the line of the Baltimore and Potomac Railway Company in the city of Washington, D. C., and requiring said company to depress and elevate its tracks and to enable it to relocate parts of its railroad therein, and for other purposes," approved February 12, 1901;

H. R. 21029. An act for the relief of James W. Sears;

H. R. 16696. An act for the relief of the estate of Peter McEnery, deceased;

H. R. 15603. An act for the relief of John W. Wood;

H. R. 12712. An act for the relief of the estate of Samuel J. Rogers;

H. R. 12512. An act for the relief of persons who sustained damage by explosion near Frankford Arsenal, Philadelphia;

H. R. 4168. An act to carry out the findings of the Court of Claims in the case of James A. Paulk;

H. R. 3622. An act for the relief of John D. McLain;

H. R. 2950. An act for the relief of certain officers of the United States Signal Corps;

H. R. 1549. An act granting a pension to Lela L. Ellis;

H. R. 1072. An act for the relief of the legal representatives of Sewell Coulson, deceased;

H. R. 24864. An act to provide for the distribution of the CONGRESSIONAL RECORD and public bills, documents, etc., to the governor-general of the Philippine Islands at Manila, P. I.; and

H. R. 23973. An act for the relief of pensioners of the Metropolitan police fund.

RESIGNATION FROM COMMISSION, HOUSE OF REPRESENTATIVES OFFICE BUILDING.

The SPEAKER laid before the House the following letter, which the Clerk read as follows:

HOUSE OF REPRESENTATIVES, UNITED STATES,
Washington, D. C., March 3, 1909.

Hon. JOSEPH G. CANNON,
Speaker House of Representatives,
Washington, D. C.

SIR: I hereby tender my resignation as a member of the commission created for the purpose of superintending the construction of the House of Representatives Office Building and a lighting and heating plant.

Your obedient servant,

W. P. HEPBURN.

The SPEAKER. The Chair designates the gentleman from Iowa [Mr. SMITH] to fill the vacancy.

RECESS.

Mr. PAYNE. Mr. Speaker, I move that the House do now take a recess until 10 o'clock this evening.

The motion was agreed to.

Accordingly (at 6 o'clock and 15 minutes p. m.) the House was declared in recess.

AFTER RECESS.

The recess having expired (at 10 o'clock p. m.), the House was called to order by the Speaker.

SILETZ POWER AND MANUFACTURING COMPANY.

Mr. HAWLEY. Mr. Speaker, I ask unanimous consent that the Committee of the Whole House on the state of the Union be discharged from the further consideration of the bill H. R. 6183, on the House Calendar, and that it be passed as amended.

The SPEAKER. The gentleman from Oregon [Mr. HAWLEY] asks unanimous consent to discharge the Committee of the Whole House on the state of the Union from the further consideration of the following bill, and to consider the same in the House at this time.

Mr. CLAYTON. Mr. Speaker, I object, in order to have an explanation of what it is.

The SPEAKER. The bill will first be read as amended, and then objection will be in order.

The Clerk read as follows:

A bill (H. R. 6183) granting to the Siletz Power and Manufacturing Company a right of way for a water ditch or canal through the Siletz Indian Reservation, in Oregon.

Be it enacted, etc., That the right of way is hereby granted, as hereinafter set forth, to the Siletz Power and Manufacturing Company, a corporation organized and existing under the laws of the State of Oregon, and its successors and assigns, for the construction, operation, and maintenance of a water ditch or canal through the lands of the United States in the Siletz Indian Reservation, Oreg., beginning at a point on the right bank of the Siletz River, in lot 13 of section 9, township 10 south, range 10 west Willamette meridian; running thence in a northeasterly direction through said section and terminating at a point on the right bank of the Siletz River, in lot 30 of section 4, township 10 south, range 10 west of Willamette meridian: *Provided,* That no rights hereunder shall attach until the Secretary of the Interior shall have determined to his satisfaction that the interests of the Indians and the public will be promoted thereby.

SEC. 2. That the right of way hereby granted shall be 50 feet in width on each side of the central line of such water ditch or canal.

SEC. 3. That before the grant of such right of way shall become effective, a map showing the definite location of such water ditch or canal must be filed with and approved by the Secretary of the Interior, and the company shall make payment to the Secretary of the Interior for the benefit of the allottees of full compensation for such right of way through their allotments, including all damage to their improvements and lands, and for damage to lands reserved for agency purposes, which compensation shall be determined and paid under the direction of the Secretary of the Interior in such manner as he may prescribe: *Provided further,* That the Siletz Power and Manufacturing Company, its successors or assigns, where not otherwise provided, shall, at its own expense, construct and maintain sufficient and suitable bridges across the water ditch or canal the right of way for which is hereby granted at the crossing of public roads, and be designated by the county court of the county in which they may be, failing in which the rights herein granted shall be forfeited.

SEC. 4. That the rights herein granted shall be forfeited by said corporation unless the water ditch or canal shall be constructed through the said lands within three years from the passage of this act.

Mr. CARLIN. Mr. Speaker, I object.

Mr. HAWLEY. Mr. Speaker, I move to suspend the rules and pass the bill with an amendment.

The SPEAKER. The gentleman from Oregon moves to suspend the rules and pass the bill with an amendment. Is a second demanded? [After a pause.] The question is on agreeing to the motion.

The motion was agreed to.

Accordingly the rules were suspended and the bill was passed.

GENERAL DEFICIENCY BILL.

Mr. VREELAND. Mr. Speaker, I desire to call up the conference report on the bill H. R. 28376—the general deficiency bill—and ask that the statement be read in lieu of the report.

The SPEAKER. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 5, 7, 8, 9, 14, 15, 18, 19, 20, 26, 27, 28, 30, 41, 69, 75, and 76.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 6, 10, 11, 12, 13, 16, 17, 21, 22, 24, 25, 29, 31, 32, 33, 36, 37, 38, 39, 40, 42, 43, 44, 45, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 70, 71, 72, 73, 79, 81, 82, 83, 84, 85, 86, 87, 88, 90, 91, 92, 93, 94, and 95, and agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: On page 23 of the bill, in line 11, after the word "fifty-one," insert the words "and fourteen hundred and sixty-nine;" and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In line 3 of said amendment, after the word "Survey," insert the words "during the fiscal year nineteen hundred and ten;" and the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In line 5 of said amendment strike out the words "the said sum of three thousand dollars;" and the Senate agree to the same.

Amendment numbered 46: That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows: In line 4 of said amendment insert in the blank the number "seven hundred and forty-nine;" and the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "nine thousand dollars;" and the Senate agree to the same.

Amendment numbered 77: That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with amendments as follows: After the word "Representatives," in lines 11 and 12 of said amendment, strike out all that follows down to and including the word "Printing," in line 21; and in line 21 of said amendment strike out the word "twelve" and insert in lieu thereof the word "ten;" and the Senate agree to the same.

Amendment numbered 78: That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment as follows: After the word "Document" in said amendment insert the words "Numbered seven hundred and forty-seven;" and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: After the word "Numbered" in said amendment insert the words "seven hundred and forty-five;" and the Senate agree to the same.

Amendment numbered 89: That the House recede from its disagreement to the amendment of the Senate numbered 89, and agree to the same with an amendment as follows: In line 12 of said amendment, after the word "Numbered," insert the words "seven hundred and forty-six;" and the Senate agree to the same.

J. A. TAWNEY,
EDWARD B. VREELAND,
S. BRUNDIDGE, Jr.,
Managers on the part of the House.
EUGENE HALE,
J. H. GALLINGER,
H. M. TELLER,
Managers on the part of the Senate.

The Clerk read the statement as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate on the general deficiency bill submit the following written statement in explanation of the effect of the accompanying conference report thereon:

The bill as finally agreed upon appropriates $19,431,727.29.

The Senate by its amendments added $2,654,406.68.

By the conference agreement the Senate recedes from $844,663.58, which includes $120,000 for payment of the claim of the State of Virginia; $72,000 for payment of the claim of the State of Maryland; $50,000 for the Lincoln memorial; $497,000 for army transportation; $66,000 for the contributors to pay the ransom of Miss Ellen M. Stone; and the House agrees to amendments involving $1,809,743.10, which includes $500,000 for payment to the Republic of Colombia; $61,258 to refund duties on anthracite coal; and $750,000 for inland mail transportation.

J. A. TAWNEY,
EDWARD B. VREELAND,
S. BRUNDIDGE, Jr.,
Managers on the part of the House.

Mr. VREELAND. Mr. Speaker, I move the adoption of the conference report, the statement concerning which has been read at the Clerk's desk.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

AMENDMENT OF REVISED STATUTES.

Mr. PARKER. Mr. Speaker, I move to suspend the rules and discharge the Committee on the Judiciary from the further consideration of the bill (S. 3526) entitled "A bill to amend section 876 of the Revised Statutes," which I now send to the Clerk's desk, and pass the same; and that H. R. 12403, on the House Calendar, be laid on the table, it being a similar bill.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

An act (S. 3526) to amend section 876 of the Revised Statutes.

Be it enacted, etc., That section 876 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 876. Subpœnas for witnesses who are required to attend a court of the United States in any district may run into any other district: *Provided*, That in civil causes the witnesses living out of the State in which the court is held do not live at a greater distance than 100 miles from the place of holding the same."

The SPEAKER. Is a second demanded?

Mr. CLAYTON. I demand a second, Mr. Speaker.

The SPEAKER. Under the rules a second is ordered.

Mr. PARKER. Mr. Speaker, this is the original section that was enacted about one hundred and twenty years ago, except that it changes the word "district" to "State." In olden times the districts were coterminous with the States. A subpœna issued out of the district courts could run in any part of the district or State. It could likewise run in any other district within a hundred miles. Now that they have divided up the districts a subpœna out of the district court can not run all over the State, and the district court of the southern district of New York can not subpœna witnesses from Buffalo, while the state court can.

It was suggested by Mr. Griggs, former Attorney-General, that that ought not to be. He suggested that the word "district" should be changed to the word "State," so that the subpœna should run throughout the State. I will say that the House bill contained also the words "and Territory." The Senate, I think justly, held that the courts in the Territories were not United States courts, and was opposed to passing the bill with those words in, and we have adopted the Senate bill.

Mr. MANN. Will the gentleman yield to me for a question?

Mr. PARKER. Certainly.

Mr. MANN. I did not quite understand the gentleman. I supposed the Senate bill was the same as the House bill outside of the question of the Territories. In what other respect does it differ?

Mr. PARKER. In no other way. The House bill had, "*Provided*, That in civil cases the witnesses live in the State or Territory in which the court is held." The Senate took objection, I think justly, that the courts of the Territory are not district courts of the United States or courts of the United States at all.

Mr. MANN. In other respects is the Senate bill the same?

Mr. PARKER. In exactly the same words.

Mr. DALZELL. Has the bill been reported by the Committee on the Judiciary?

Mr. PARKER. The House bill was reported by the Committee on the Judiciary, but the House bill was broader.

Mr. CLAYTON. Mr. Speaker, I demanded a second in order that the gentleman might explain this bill to the House. I have had many inquiries made about it by gentlemen on this side of the Chamber. The gentleman has made a very lucid explanation of the bill. I think it is a proper bill, and think it ought to pass.

The question was taken, the rules were suspended, and the bill was passed.

The SPEAKER. The House bill (H. R. 12403) will lie on the table.

JAMAICA BAY IMPROVEMENT COMMISSION.

Mr. LAW. Mr. Speaker, I ask unanimous consent that the report of the Jamaica Bay improvement commission, appointed pursuant to a resolution of the board of estimates and apportionment, dated March 2, 1906, for the purpose of reporting upon the general improvement and development of Jamaica Bay in the boroughs of Brooklyn and Queens, and also upon the condition of the water front of the city of New York other than that of Manhattan Island be printed as a public document (H. Doc. No. 1488).

Mr. MANN. Reserving the right to object——

Mr. CLARK of Missouri. We could not hear what the paper was.

The SPEAKER. The Clerk can read the title of the report.

The Clerk read as follows:

Report of the Jamaica Bay improvement commission, appointed pursuant to a resolution of the board of estimates and apportionment, dated March 2, 1906, for the purpose of reporting upon the general improvement and development of Jamaica Bay, in the boroughs of Brooklyn and Queens, and also upon the condition of the water front of the city of New York other than that of Manhattan Island.

Mr. MANN. Reserving the right to object, I would like to ask the gentleman who makes the report, is that the report of a government official?

Mr. LAW. Mr. Speaker, I think I can explain the object of this report.

Mr. MANN. The gentleman will have plenty of time.

Mr. LAW. In the river and harbor act of March 2, 1907, this provision was contained for a survey of the waters of Jamaica Bay:

The waters of Jamaica Bay, including entrance to said bay at Rockaway Inlet and those waters having their outlet in Dead Horse Inlet, with a view to framing a plan for their improvement and recommending the order of such improvement with the cost thereof, and to recommend the proportion of such cost to be borne by the city of New York; and the Secretary of War is hereby requested to confer and cooperate with the commissioner of docks and ferries of the city of New York, or with any other duly authorized agents, officers, or representatives of the city of New York, and with any commission of engineers appointed, or who shall hereafter be appointed, to survey or examine said bay and to recommend to the city of New York plans for the improvement of said Jamaica Bay or the lands in and about said bay.

Mr. CLAYTON. Mr. Speaker, we were unable on this side of the Chamber to hear the very long explanation made by the gentleman. Can not the gentleman tell us whose report this is?

Mr. LAW. This is a report by a commission of engineers appointed by the mayor of the city of New York, directed under the provisions of the act which I have just read, to confer with the Secretary of War. The Secretary of War has since then made his report, which has been transmitted to Congress after a conference with this commission, whose report I present.

Mr. MANN. Does the report of the Secretary of War refer in any way to this report?

Mr. LAW. Yes, sir; it does. And I would say, in addition to that, it is the judgment of the district engineer, whose report has been submitted, that the report can not be completely understood without reference to this report of the city's commission of engineers of which it speaks.

Mr. MANN. The gentleman desires to have this printed as a document in order that the whole matter may be printed and before the House?

Mr. LAW. Exactly so.

Mr. CLAYTON. Mr. Speaker, I desire to ask the gentleman what will be the probable cost of this document?

Mr. LAW. I can not say in regard to that. It contains 157 pages.

Mr. CLAYTON. It will be a small amount.

Mr. LAW. I think so.

Mr. CLAYTON. Was this report made by joint expenditure by the Federal Government and the city of New York?

Mr. LAW. Well, not exactly. It was made by an expenditure of the city of New York. The report which the Secretary of War has transmitted recommends a plan of improvement to be carried out jointly by the Government and the city of New York, and this contains what the city of New York proposes it must do in conjunction with the Government.

Mr. CLAYTON. This preserves in printed form for the use of the committee, in order that it may have the information about this work that relates to the public improvement?

Mr. LAW. Exactly so.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and it is ordered that the report be printed as a public document.

WATER IN NORTH CAROLINA WHERE FISHING IS PROHIBITED.

Mr. SMALL. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 19607) to authorize the Secretary of Commerce and Labor to cooperate, through the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries, with the fish commissioner of the State of North Carolina in making surveys of the waters of North Carolina where fishing is prohibited by law.

The SPEAKER. Is this bill on the Union Calendar?

Mr. SMALL. It is.

The SPEAKER. The gentleman from North Carolina asks unanimous consent to discharge the Committee of the Whole House on the state of the Union from the further consideration of the following bill, and to consider the same in the House. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of Commerce and Labor be, and he is hereby, authorized and directed, upon the request of the governor of the State of North Carolina, to designate such officers, experts, and employees of the Bureau of the Coast and Geodetic Survey and of the Bureau of Fisheries as may be necessary to cooperate with the North Carolina state fish commissioner in making a survey of and marking in a prominent manner all those areas of the waters of the sounds and their tributaries of the State in which the use of any or all fishing appliances are prohibited by law; and the Secretary of Commerce and Labor is hereby authorized and directed to furnish to the officers, experts, and employees of said bureaus so detailed as aforesaid such instruments, appliances, and steam launches as may be necessary to make the survey aforesaid; and the Secretary of Commerce and Labor is hereby authorized to have made in the Bureau of the Coast and Geodetic Survey all the plats necessary to show the results of the aforesaid survey, and to furnish to the fish commissioner of the State of North Carolina such copies as may be necessary for his use, and for

this purpose to employ in the District of Columbia and elsewhere such technically qualified persons as may be necessary to carry out the purposes of this act.

SEC. 2. That the Secretary of Commerce and Labor is hereby further authorized to have erected or constructed by the officers so detailed as aforesaid, while making said survey, such structures as may be necessary to mark in a prominent and satisfactory manner the points of triangulation so that the same may be used for such future work of the Coast and Geodetic Survey as the said bureau may be hereafter required to perform in prosecuting the government coast survey of the navigable waters of the United States located within the State of North Carolina.

SEC. 3. That the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries be, and they are hereby, authorized and directed to expend, under the direction of the Secretary of Commerce and Labor, a sum of money not exceeding $15,000 in carrying out the purposes of this act.

SEC. 4. That this act shall take effect from the date of its passage.

With the following amendment:

Amend section 3 by striking out the same and substituting the following therefor:

"SEC. 3. That the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries be, and they are hereby, authorized and directed to expend, under the direction of the Secretary of Commerce and Labor, such sum or sums of money as may be necessary, and as may be hereinafter appropriated, in carrying out the purposes of this act."

The SPEAKER. Is there objection?

Mr. MADDEN. Mr. Speaker, I will reserve the right to object, in order that the gentleman may have an opportunity to explain why the Secretary of Commerce and Labor should be called upon to cooperate with the State of North Carolina, and also to tell the House how much money it is going to cost to do the thing which he proposes by this bill to have done.

Mr. SMALL. Mr. Speaker, I am sure I can make a satisfactory explanation.

There are two large inland sounds in North Carolina in which the catch of shad is larger than in any similar area in the United States, and it has become necessary in the past few years for the legislature of the State to limit the area within which shad may be caught, in order that the supply may be increased. It is necessary to mark out this area. The State of North Carolina has no bureau which has the facilities necessary to make this survey; therefore the cooperation of the Coast and Geodetic Survey and of the Bureau of Fisheries has been asked. There is no appropriation in this bill, and it is estimated that the cost will be inconsiderable—not more than $1,000. The object of asking the cooperation is because the State of North Carolina has no facilities for making the survey.

Mr. MADDEN. Does the gentleman think, because the State of North Carolina has no such facilities, that is a good reason why the Government of the United States should be asked to cooperate?

Mr. SMALL. I will say to the gentleman that we think so, because there are several precedents for this. It has been done for Chesapeake Bay and for Long Island Sound and for other sections of the country.

Mr. MADDEN. How much money will it involve?

Mr. SMALL. Not more than a thousand dollars, and, in addition to that, it will be in the interest of the Coast and Geodetic Survey in making certain marks there which are necessary for the purposes of navigation.

Mr. MANN. The gentleman says the cost will not probably exceed $1,000. Section 3 of the bill originally limited the cost to $15,000. Has the gentleman received more definite information since introducing the bill?

Mr. SMALL. I may say to the gentleman from Illinois that that amount was inserted prior to consultation with the officials of the Coast and Geodetic Survey and the Bureau of Fisheries here.

Mr. MANN. And their estimate is that it will not cost to exceed a thousand dollars?

Mr. SMALL. Not to exceed a thousand dollars. It is an inexpensive thing.

The SPEAKER. Is there objection?

There was no objection.

The amendments recommended by the committee were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. SMALL, a motion to reconsider the last vote was laid on the table.

OUTWARD ALIEN MANIFESTS ON CERTAIN VESSELS.

Mr. BENNET of New York. Mr. Speaker, I move to suspend the rules and pass the bill (S. 7785) relative to outward alien manifests on certain vessels, with the committee amendment.

The bill was read, as follows:

Be it enacted, etc., That until the provisions of section 12 of the immigration act of February 27, 1907, relating to outward alien manifests, shall be made applicable to passengers going out of the United States to Canada by land carriage, said provisions shall not apply to passengers going by vessels employed exclusively in the trade between the ports of the United States and the Dominion of Canada and the Republic of Mexico.

With the following committee amendment:

In line 4 strike out "twenty-seven" and insert "twenty."

Mr. CLAYTON. Mr. Speaker, I demand a second.

The SPEAKER. A second is ordered under the rule. The gentleman from New York [Mr. BENNET] is entitled to twenty minutes and the gentleman from Alabama [Mr. CLAYTON] is entitled to twenty minutes.

Mr. BENNET of New York. Mr. Speaker, this bill is to correct an injustice. When we passed the immigration statute in 1907, we put in a very wise provision, which is this:

It shall further be the duty of the master or commanding officer of every vessel taking alien passengers out of the United States from any port thereof to file before departure therefrom with the collector of customs a complete list of all of such alien passengers taken on board. Such list shall contain the name, age, sex, nationality, residence in the United States, occupation, and the time of last arrival of every such alien in the United States.

Then follow the appropriate provisions for the enforcing of the law.

It is very evident that the purpose of the bill is to enable us to find out how many aliens go out each year; so by deducting that from those who come in we can find the precise increase or decrease, as the case may be, in the number of aliens who have come into this country during a particular fiscal year.

Mr. REEDER. Is that in the law or in the bill?

Mr. BENNET of New York. What I have read is in the law. Between our ports and Canada it has been found impossible, so far, to make any such statute apply to the railways; and our statistics, so far as Canada is concerned, will remain imperfect; but the principal object of the committee and what Congress had in view was to get the statistics as they came across the Atlantic and Pacific.

Mr. GOULDEN. Will the gentleman yield for a question?

Mr. BENNET of New York. Certainly.

Mr. GOULDEN. Why are the railroads exempt from the requirements of the law with reference to immigrants coming over the border?

Mr. BENNET of New York. Because every day thousands of Canadians cross the border on the railways temporarily, one way or the other. They cross the ferry at Detroit, and everywhere that a railway crosses the border they go in and go out. It would seriously impede travel. Several years ago we authorized the department to make a contract with the Canadian government relative to the inspection of aliens coming in on the railway.

Mr. GOULDEN. Will the gentleman tell me what restrictions there are regarding the immigrants where he says arrangements have been made with the Dominion of Canada?

Mr. BENNET of New York. I will do that in a moment. But one steamship line that carries passengers from Boston up to Canada, and that runs nightly, complains of this discrimination. They say if a man could walk into the office in Boston and buy a ticket, and they could ask him the questions, they would not mind, but when seven or eight hundred people, starting from all parts of the United States, get on board the ship and the purser has to go around in the night and ask everybody the preliminary question whether they are aliens, and then ask them all these questions, it puts a burden on their traffic that is unfair in competition with the railways. They ask that until the provisions of section 12 of the immigrant act, relating to the outward manifest, is made applicable to Canadian railroads, the provision as applied to passengers going by vessel employed exclusively between the United States and Canada and the Republic of Mexico shall not apply, and it seemed to the committee that their request was fair, and that the Government ought not to interfere one way or the other between competing carriers, and until we place the same burden on the railways we ought not to place it on the steamers.

Now, I will answer the gentleman from New York. Until we made the arrangement with Canada by which we put our own officials in Montreal and Quebec, until we made the arrangement with the Canadian government by which they enforce the immigration laws in Canada, there was no protection at all. Any alien that came into a Canadian port could walk across the border anywhere. Now no alien can get into a Canadian port that could not get into a similar American port.

Mr. MANN. I would like to ask the gentleman a question. Has this bill the support of the Department of Commerce and Labor

Mr. BENNET of New York. Yes; the gentleman will find the letter of the Secretary on the second page.

Mr MANN. On the second or third page?

Mr. BENNET of New York. On the second page.

Mr. MANN. I would like to ask the gentleman whether in preparing the report he thought it would add to the value of the letter of the department by inserting it twice? [Laughter.]

Mr. BENNET of New York. The gentleman now speaking did not prepare the report. It was prepared by the gentleman from Massachusetts [Mr. GARDNER].

Mr. MANN. I thought it might be one of the new rules prepared by the gentleman from Massachusetts that, instead of quoting the letter once in the report, it would add to the expense and value by copying it twice.

Mr. BENNET of New York. Everybody is not as careful as the gentleman from Illinois.

Mr. MANN. The gentleman from Massachusetts is always careful, especially when dealing with the subject of the rules. I would like to know from him whether it is one of his rules to have a letter printed in a report twice.

Mr. BENNET of New York. I am going to yield to the gentleman from Massachusetts to answer the question.

Mr. GOULDEN. Let me ask the gentleman if this is the unanimous report of the committee?

Mr. BENNET of New York. It is not; there are minority views.

Mr. Speaker, I reserve the balance of my time.

Mr. BONYNGE. Mr. Speaker, I will ask the gentleman what is the committee amendment?

Mr. BENNET of New York. The committee amendment simply strikes out "twenty-seven" and inserts "twenty."

Mr. BONYNGE. To what does that refer?

Mr. BENNET of New York. The Senate alluded to the act of February 27. It is simply a clerical error. I reserve the balance of my time.

Mr. BURNETT. Mr. Speaker, the very form of this bill I think ought to defeat it. The proposition involved is that a law that is now in existence shall be superseded or suspended until some other law in the dim and distant future shall be passed. This is just the reading of the bill:

That until the provisions of section 12 of the immigration act of February 20, 1907, relating to outward alien manifests, shall be made applicable to passengers going out of the United States to Canada by land carriage, said provisions shall not apply to passengers going by vessels employed exclusively in the trade between the ports of the United States and the Dominion of Canada and the Republic of Mexico.

Mr. Speaker, the form of the bill itself ought to condemn it, as I say, and then the bill itself is wrong. The Secretary of Commerce and Labor, instead of really indorsing and approving the bill, says in his report:

It would be highly desirable to require all railway lines doing an international business to comply with the provisions of section 12, which are now applicable only to steamship lines.

It is proposed by this bill that, because the law does not go far enough and apply to railroad companies going into Canada and Mexico, it shall not apply to these steamship lines that go from Boston or from ports of the United States into Canada and Mexico. The purpose of section 12 of the immigration law was to require that all steamship companies leaving our ports should make manifests of outgoing aliens in order that we might have statistics giving information in regard to those who were outgoing. It was frequently said, especially by those who are opposed to restriction of immigration, that those who came in did not form a fair estimate as to the number, because many of them went out. In order to test that contention, the last immigration law enacted in February, 1907, required that all steamships leaving American ports should keep these manifests of outgoing aliens. Now, this bill asks us to suspend that law until we make it apply to railroad companies, and the Secretary of Commerce and Labor says that it ought to apply to railroad companies. The gentleman from California [Mr. HAYES] and myself filed a minority report on the idea that we are going backward in this bill, that instead of repealing the law so far as these particular steamship lines are concerned, it ought to be made to apply as well to railroad companies as to steamship companies, and hence that the law ought not to be amended in the way provided by this bill, but that it ought to be extended further.

Mr. REEDER. Will the gentleman permit a question?

Mr. BURNETT. Yes.

Mr. REEDER. I want to ask the gentleman if the committee that made the minority report regard that it is possible to make this law applicable to railroads?

Mr. BURNETT. I think it is. It is a very simple requisition in the first place. Just read what is required.

Mr. REEDER. Then, I want to ask why such a bill was not prepared instead of this one?

Mr. BURNETT. The immigration law did not go far enough. We could not get everything that we wanted in the law, and therefore we went as far as we could in order to pass the bill, hoping that by amendment we might perfect it. Here is all that is required in the manifests, and it is very simple and does not take a great deal of time to make it: It says that steamships leaving from any port of the United States shall file before departure with the collector of customs of each port a complete list of all such alien passengers taken on board; and such list shall contain the name, age, sex, nationality, and residence in the United States, occupation, and the time of last arrival of such alien in the United States. That is not much. The companies have their blanks all ready. The gentleman indicates that the steamship companies make up that list after they leave the port. If they do, it is in violation of the law, because the law requires that before leaving port these manifests shall be taken for statistical purposes, in order that we might have full information as to those that are going out.

Mr. BENNET of New York. Does not the law provide, on page 6 of the immigration law at the last end of section 12, that vessels making regular trips may, when expedient, arrange for delivery of such lists of outgoing aliens at a later date, so that they do not have to make it before they leave the ports?

Mr. BURNETT. What section is that, section 6?

Mr. BENNET of New York. No; section 12. It says that in case of vessels making regular trips from the United States the Commissioner-General of Immigration, with the approval of the Secretary of Commerce and Labor, may, when expedient, arrange for the delivery of such lists of outgoing aliens at a later day.

Mr. BURNETT. It does not matter about that, Mr. Speaker, whether it does or not, so far as that is concerned. The purpose here is to repeal the law and go backward in the steps that we have already taken in regard to gathering these statistics. If they are valuable it ought to be complied with, and the law extended instead of abrogated. There is another thing. It was brought to the attention of the committee that there were steamship lines running regularly across from several Canadian ports to European countries, and if that is true how easy it would be for the aliens who desire to leave this country and go to Europe, in order to avoid giving the very important information required by these manifests, to go to the Canadian ports and then take ship for the European ports, and in that way absolutely abrogate and neutralize the law.

Mr. RYAN. May I ask the gentleman a question?

Mr. BURNETT. Yes.

Mr. RYAN. Can not people who leave this country go to Canada over the bridges at Niagara Falls and Buffalo, or cross in other ways? Can not they go to Europe by these same steamboat lines and the statistics will be inaccurate because their records will not have been taken?

Mr. BURNETT. Of course. Therefore the law ought to go further instead of going backward. It ought to be made to apply to the railroad companies as well as to the steamship lines.

Mr. RYAN. The question I was about to ask was this——

Mr. GARDNER of Massachusetts. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. GARDNER of Massachusetts. For the purpose of asking the gentleman from Alabama a question.

Mr. BURNETT. Mr. Speaker, I must refuse to yield until I finish with the gentleman from New York [Mr. RYAN].

Mr. GARDNER of Massachusetts. Mr. Speaker, I raise the point of order that the House is not in order, and it is impossible to hear what the gentleman from New York is saying.

The SPEAKER pro tempore. The House will be in order.

Mr. RYAN. Mr. Speaker, the point I wanted to make was that the statistics were inaccurate now in regard to people going from the United States to Canada; and until you have a complete register of all people, whether going by steamship or railroad, in my opinion there ought to be none, because I think it is unfair to ask the steamships to register their people when the railroads or footbridges are not required to perform the same duty.

Mr. BURNETT. Mr. Speaker, the same argument would say we ought to repeal the law entirely as to the ships that are leaving this country and are going to any country, because some escape the operation of the law by rail across into Canada. The contention of those of us who differ from the majority of the committee on this question is that instead of repealing the law or getting rid of a part of it, we ought to go further and extend the law and require that the railroads that are crossing into Canada and Mexico collect these statistics. That could be done quite easily, as blanks could be provided for the taking of the manifest at all stations, and that would be an accurate manifest of aliens who are outgoing. But, Mr. Speaker, the

proposition of the gentleman from New York is that instead of vitalizing the law we ought to repeal it entirely and put it where it would not be effective as to those who go in these ships into Canada and Mexico.

I would now ask the gentleman from New York to use some of his time.

Mr. BENNET of New York. How much time have I remaining?

The SPEAKER pro tempore. Fifteen minutes.

Mr. BENNET of New York. I yield to the gentleman from Massachusetts [Mr. GARDNER] ten minutes.

Mr. BURNETT. How much time have I, Mr. Speaker?

The SPEAKER pro tempore. The gentleman has ten minutes remaining.

Mr. GARDNER of Massachusetts. Before the gentleman from Alabama [Mr. BURNETT] takes his seat I would like to ask him if he thinks these statistics obtained from these four steamboat lines are of any value?

Mr. BURNETT. Well, Mr. Speaker, I will answer that if they are honestly obtained from the steamboat companies they are of value. The gentleman voted for the bill in its form, he helped to pass the bill in its form, and he certainly was not asking for something that was nugatory and of no benefit at all as applied to the steamship companies; and yet if they are beneficial for the steamships going across the Atlantic or Pacific, then they are certainly beneficial in requiring the boats, if they are going into Canada, to make up the manifest—if the law is enforced. If the law is not enforced, then they are not. I doubt if any of the immigration laws as enforced by the present Secretary of Commerce and Labor are of much benefit, as he seems to try to nullify instead of enforcing them. [Laughter and applause.]

Mr. GARDNER of Massachusetts. Mr. Speaker, I hope that the gentleman will yield me as much of his time as he has occupied of mine. Now, Mr. Speaker, these statistics are perfectly valueless. On our outgoing trans-Atlantic steamship lines they are of value. That is why they put them in the law. But here are three steamboat lines running from Boston, one to Yarmouth, one to Halifax, and one to St. Johns, and I understand there are two steamboat lines running from Seattle to Vancouver. The statistics obtained on those steamboat lines do not amount to a drop in the bucket as compared to the passage across the border by train or over the border from the east to the west coast or by ferries crossing at Detroit or by the traffic on the Great Lakes. And no figures whatever are kept on that vast volume of traffic, and therefore it is perfectly valueless to take the statistics from these small steamboat lines which run and make night trips from Boston to the provinces of Canada.

The gentleman from Alabama [Mr. BURNETT] asks why we do not extend it. Why do you not extend your laws so that everybody who goes on a ferry has to fill out a paper like that [exhibiting], or so that everybody crossing on a railroad train has to fill out a paper like that? Because it is not practicable. And that is why we did not put it into the law. We asked all about these steamboat lines, and now we wish to correct it.

Now I read from a letter written by the chairman of the Interstate Commerce Commission. We wrote to him to find out whether it was practicable to do what the gentleman from Alabama [Mr. BURNETT] suggests; whether it was practicable to extend this law to the ferries and the steamboat lines, and he tells us that it is not practicable. He says:

> The members of the commission have no special familiarity with the subject-matter of your communication, but so far as we can judge it would not be practicable to apply the provisions of section 12 of the immigration act of 1907, copy of which was inclosed in your letter, to transportation lines, such as steam and electric roads and ferries, operating between the United States and Canada and the United States and Mexico.

Mr. Speaker, look at the practical effect of this law. People come from the interior, people come from Pennsylvania, people come from New York State with tickets to Halifax and St. Johns. They go down to the steamboat wharves; they go aboard of the steamer for the night trip, and go to bed. They go to sleep, and it comes on rough. Sometimes there are 600 or 800 passengers, but not more. Then the purser comes along, and he wakes all those ladies and children and asks them to tell him their family name, their given name, their age, their sex, their calling or occupation, the country of which they are a citizen or subject, their race or people, their State, their city or town, their country of last permanent residence, and the country of intended future permanent residence.

Mr. BENNET of New York. Will the gentleman yield for just a question?

The SPEAKER pro tempore. Does the gentleman from Massachusetts yield to the gentleman from New York?

Mr. GARDNER of Massachusetts. Yes.

Mr. BENNET of New York. Assuming that one of the passengers is a large, able-bodied citizen, how far does the gentleman from Massachusetts think that the purser would ask him the questions in that list before there was some peculiar language in the stateroom?

Mr. GARDNER of Massachusetts. It is not the language, gentlemen; it is the call for steward. [Laughter.]

You can imagine yourselves in the place of those passengers on that rough voyage by sea and having the purser knock at your door, in order to try to get you to answer those questions. Just as sure as you are born you would come back by rail, and then what would become of your statistics? You apparently had a crowd going and nobody coming back, and you have vitiated what little statistics you are able to obtain.

Mr. Speaker, in pure justice to these small steamboat lines running out of Boston do not put this law any further in force. There is nobody asking for it. Mr. Larned, Deputy Commissioner of Immigration, told me it was impracticable.

Everybody who knows anything about that knows that it is impracticable; and the only result under heaven is to drive the people from these little steamboat lines to the great railroads that cross the border and the ferries which cross from the city of Detroit. I yield back the balance of my time.

Mr. BENNET of New York. How much time does that leave me?

The SPEAKER pro tempore (Mr. WEEKS). That leaves the gentleman from New York six minutes and the gentleman from Alabama ten minutes.

Mr. BENNET of New York. I will ask the gentleman from Alabama to consume the remainder of his time now, as, so far as I know, there will be but one speech on this side.

Mr. BURNETT. I yield five minutes to the gentleman from California.

Mr. HAYES. Mr. Speaker, this is a bill of great importance, and there developed, when it was under consideration by the Committee on Immigration, quite a difference of opinion in regard to it. For that reason I believe it is hardly proper that a bill of this kind should be brought up and an effort made to push it through on the last night of the session, as the gentleman from New York proposes. I believe that under these circumstances this bill ought to be voted down. Gentlemen, there is no immediate pressing demand for legislation of this kind.

Now as to the merits of the bill. The troubles that the gentleman from Massachusetts so eloquently depicts would come from an effort to enforce this law or to administer it can easily be overcome by regulations of the Department of Commerce and Labor, or, if necessary, by legislation by the Congress of the United States.

There is no need for a man when he crosses the ferry every day to be obliged to answer these questions. An arrangement can be made so that he can have a permanent certificate, when all he will have to do will be to show it as he goes on board a ferryboat or a train.

Mr. GARDNER of Massachusetts. Mr. Speaker, I will ask the gentleman from California if he has consulted the officials of the Immigration Bureau about this?

Mr. HAYES. I did some time ago. I consulted one of the officials.

Mr. GARDNER of Massachusetts. May I ask the name of that official?

Mr. HAYES. I believe the Assistant Secretary of Commerce and Labor.

Mr. GARDNER of Massachusetts. I say "any of the immigration officials?"

Mr. HAYES. No; I have not.

Now, Mr. Speaker, the Secretary of Commerce and Labor evidently thinks that it would be possible to make this regulation apply to railroad companies, for he has stated that in effect in a letter which he wrote to the Committee on Immigration on the subject, saying that it was highly desirable that it should be done, and I and the gentlemen who signed the minority report with me believe it is not only desirable but absolutely necessary to have this done. These statistics will be robbed largely of their value unless it is done. As has already been stated, other steamship lines will be formed, such as the line from Montreal and other Canadian ports, and many aliens will take that route, being shorter than by New York, and these statistics will thus be very imperfect. I see no reason why, under proper regulations, these statistics may not be gathered by the railroad companies from the aliens they carry over the border.

I believe that instead of loosening up the regulations by which we should keep track of the immigration into and emigration from this country these regulations should be enlarged and stiffened up. Therefore I believe this bill should not pass.

Mr. HACKNEY. Do you know whether the present law requiring this information is beneficial in keeping track of the aliens coming from Canada and British Columbia?

Mr. HAYES. These reports are.

Mr. HACKNEY. It is valuable in that respect?

Mr. HAYES. Because these reports will enable the immigration officials to better keep track of the movement of Asiatics on the borders is one of the reasons why I am opposed to the passage of this bill. There should be strict surveillance of the travel between Mexico and Canada and this country, and aliens, especially Asiatics, should not be allowed to pass backward and forward without any track being kept of them.

The SPEAKER. The time of the gentleman has expired.

Mr. BURNETT. I yield two minutes to the gentleman from Alabama [Mr. CLAYTON].

Mr. CLAYTON. Mr. Speaker, the presentation of this bill at this time furnishes an object lesson of the unwisdom, in the closing hours of the session, of Congress passing upon important measures without giving them proper consideration. Now, here we have a standing committee of this House appointed to deal with the subject-matter involved in this bill. This committee has been sitting time after time during the long and the short sessions of Congress for the consideration of just such measures as this; and yet the House to-night is presented with this spectacle of a divided committee on a matter that must be of great importance, or else the gentleman from Massachusetts would not be so insistent upon its instant passage. And certainly the gentleman from California and my colleague from Alabama would not be so insistent in their opposition to it if they did not think it a hurtful measure. [Applause.]

Therefore, Mr. Speaker, in view of the fact that we are soon to have an extraordinary session, when this matter can be considered, this House to-night ought to vote down this measure in order that the committee may properly consider it and the House may have the benefit of the further action of the committee after it has given it a full and careful consideration. [Loud applause.]

Mr. BURNETT. I yield two minutes to the gentleman from Tennessee [Mr. GAINES].

Mr. GAINES of Tennessee. Mr. Speaker, I have listened with great interest to the remarks of the gentleman from Massachusetts [Mr. GARDNER]. The main objection of the gentleman from Massachusetts, it seems, is that a person must write his name in full, his age, sex, and previous condition. I will ask the gentleman if every man who lives in Boston or any other place in this country, under the tariff law that the gentleman helped to put upon the statute book, when that man comes into this country from a foreign country, is not required to write his name, age, and be also able to tell everything that he has brought in from a foreign country; and not only to write it all down, but swear to it. And is it any more inconvenient, is it any more unrepublican to have to do what is required under this bill than to carry out the other rule that has been promulgated ever since we have had a high protective tariff? [Applause.]

Mr. BURNETT. Mr. Speaker, how much time have I remaining?

The SPEAKER pro tempore. Two minutes.

Mr. BURNETT. Mr. Speaker, I will not reiterate what I said a moment ago. This is really a step in the direction of breaking down the manifest law as applied to the steamships. I know of their ways that are devious. I know the tricks that they play. I know the efforts that they make to break down the immigration laws whenever they can; and this is simply a step in the direction of breaking down that wholesome provision which requires that they shall keep these manifests. At this time the pretext is that the boats from Boston do not have time to make them. They have from fifteen to twenty hours in going from Boston to the Canadian ports; and yet the gentleman says the passengers may be seasick, and it is irksome to make them. It is true as to the large ships that many get seasick. Sometimes people are seasick all the way across. Yet the gentleman says that fifteen or twenty hours are not a sufficient time for them to sign up a paper already made out, stating their names, age, sex, and occupation while they lived here and how long they had remained in this country. A few simple lines would cover it all. If the steamship companies break this down you will have them coming here next time with the proposition that the steamships be released entirely from keeping these manifests. Then those who oppose restriction will come up here with the same old false cry, that as many aliens have been going out of the country as have been coming in. It was for the purpose of getting exact statistics in order to disprove that contention and to furnish accurate statistics that this law was passed. If this bill passes, you will see in the next session of Congress that the abandonment of the manifests will be advocated by the steamship companies and by gentlemen on this floor. [Applause.]

Mr. GARDNER of Massachusetts. May I ask the gentleman a question?

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. BENNET of New York. Mr. Speaker, in my four years of service this is the first time that the gentleman from Massachusetts [Mr. GARDNER] and myself have thoroughly agreed upon any proposition touching the immigration question. The reason that we do so to-night is because of the absolute, plain, evident justice of the proposition. This bill does not in any way touch the question of immigration into this country. It touches merely the question of statistics. It puts the steamships and the railways on the same plane. It corrects an injustice which we admit in the original bill. The Interstate Commerce Commission advised us that these laws could not be made applicable to railways. They are not now applicable to railways. Therefore, unless we wish to confuse the statistics, we ought to pass this bill.

Personally I do not think the great body of American people care very much how many Canadians come into this country or go out of it; while a great proportion of our population, for one reason or another, care a great deal how many Europeans or Asiatics come in. I was one of the men who drafted this section 12, under which we can find out accurately about the number of Europeans and Asiatics that leave our shores every year. It is beneficial legislation, and I want the statistics to be collected as accurately as possible. If you pass this bill and wipe out these inaccurate statistics relative to temporary absences of Canadians domiciled in this country, you aid in making the statistics more accurate. I hope that the bill will pass.

The SPEAKER. The question is on the motion to agree to the amendment and pass the bill.

The question being taken, on a division (demanded by Mr. BURNETT) there were—ayes 137, noes 104.

Mr. KIMBALL, Mr. SHACKLEFORD, and Mr. BURNETT demanded the yeas and nays.

The yeas and nays were refused, 8 Members, not a sufficient number, rising in support of the demand.

Mr. BURNETT. Tellers, Mr. Speaker.

Tellers were ordered, and the Speaker appointed Mr. BENNET of New York and Mr. BURNETT.

The House again divided; and the tellers reported that there were—ayes 104, noes 87.

So the rules were suspended and the bill was passed.

BILLS AND RESOLUTIONS WITH MORE THAN ONE NAME ATTACHED.

Mr. FITZGERALD. Mr. Speaker, I present the following privileged report (H. Rept. No. 2322).

The Clerk read as follows:

RIGHT OF MEMBERS TO PRESENT BILLS OR RESOLUTIONS WITH THE NAME OF MORE THAN ONE MEMBER ATTACHED THERETO.

Mr. FITZGERALD, from the select committee to investigate and report as to the right of Members to present bills and resolutions with the name of more than one Member attached thereto submits the following report:

The select committee appointed under House resolution No. 553 to investigate and report as to the right of Members to present bills or resolutions as provided by the rules with the name of more than one Member attached thereto beg leave to report as follows:

"Bills, resolutions, petitions, and memorials are introduced or presented to the House in accordance with the provisions of the first four sections of Rule XXII."

The rule is as follows:

"1. Members having petitions or memorials or bills of a private nature to present may deliver them to the Clerk, indorsing their names and the reference or disposition to be made thereof; and said petitions and memorials and bills of a private nature, except such as, in the judgment of the Speaker, are of an obscene or insulting character, shall be entered on the Journal, with the names of the Members presenting them, and the Clerk shall furnish a transcript of such entry to the official reporters of debates for publication in the RECORD.

"2. Any petition or memorial or private bill excluded under this rule shall be returned to the Member from whom it was received; and petitions and private bills which have been inappropriately referred may, by the direction of the committee having possession of the same, be properly referred in the manner originally presented; and an erroneous reference of a petition or private bill under this clause shall not confer jurisdiction upon the committee to consider or report the same.

"3. All other bills, memorials, and resolutions may, in like manner, be delivered, indorsed with the names of Members introducing them, to the Speaker, to be by him referred, and the titles and references thereof and of all bills, resolutions, and documents referred under the rules shall be entered on the Journal and printed in the RECORD of the next day, and correction in case of error of reference may be made by the House, without debate, in accordance with Rule XI, on any day immediately after the reading of the Journal, by unanimous consent, or on motion of a committee claiming jurisdiction, or on the report of the committee to which the bill has been erroneously referred.

"4. When a bill, resolution, or memorial is introduced 'by request,' these words shall be entered upon the Journal and printed in the RECORD."

Bills may also be reported to the House by a Member as a result of instructions of a committee to which has been referred petitions on given subjects (1st sess., 32d Cong. Jour., p. 935); and bills are also so reported from committees to which messages from the President or some other papers have been referred. It has been held almost universally that unless a memorial, petition, bill, or other paper upon a designated subject has been referred to a committee it can not report a bill on a subject-matter not thus before it.

These procedures are as firmly established as any founded upon the written rules of the House. It is apparent, therefore, that the introduction or presentation of bills and resolutions is governed in some instances by the practice of the House rather than by express rule. Investigation discloses that in construing the rules it is necessary to keep in mind the prevailing practice prior to the adoption of the rule to be construed and the purpose sought to be accomplished by its adoption.

As at present constituted, Rule XXII has been continued since the revision in the Fifty-first Congress.

To ascertain accurately its meaning and to understand the rights conferred by its provisions it is necessary to trace the various changes in the practice of the House prior to its adoption.

The general parliamentary rule is stated by Jefferson in his Manual, as follows:

"When a Member desires to bring in a bill on any subject, he states to the House in general terms the causes for doing it, and concludes by moving for leave to bring in a bill, entitled," etc. (Jefferson's Manual, sec. 23, p. 163, Manual and Digest, 60th Cong., 2d sess.)

With the aid of Hind's Precedents, it has been possible to trace readily the evolution in the practice of the House in relation to the introduction of petitions, memorials, bills, and resolutions. The first rule in reference to petitions and memorials was adopted by the House April 7, 1789, and was as follows:

"Petitions, memorials, and other papers addressed to the House shall be presented through the Speaker or by a Member in his place, and shall not be debated or decided on the day of their being first read, unless where the House shall direct otherwise; but shall lie upon the table to be taken up in the order they were read." (Hind's Precedents, Vol. IV, p. 263.)

The rule as to the presentation of bills was as follows:

"Every bill shall be introduced by motion for leave or by an order of the House on the report of the committee; and in either case a committee to prepare the same shall be appointed. In cases of a general nature one day's notice, at least, shall be given of the motion to bring in a bill, and every such motion may be committed." (Hind's Precedents, Vol. IV, p. 283.)

As early as 1803 the reading of memorials and petitions took considerable time, and in course of time became extremely burdensome.

In 1842, on motion of Mr. John Quincy Adams, the following rule was adopted:

"That Members having petitions and memorials to present be permitted to hand them to the Clerk, indorsing the same with their names and the reference or disposition to be made thereof, and that such petitions and memorials be entered on the Journal, subject to the control and direction of the Speaker, and if any petition or memorial be so handed in which, in the judgment of the Speaker, is excluded by the rules that the same be returned to the Member from which it was received."

In 1874, on the report Mr. Samuel J. Randall, from the Committee on Rules, a provision was adopted requiring the reporters of debates to furnish for publication a list of memorials, petitions, and other papers, with their reference, each day presented under the rule.

Section 1 of the present Rule XXII is substantially the rule of 1842 with the provision adopted in 1874, and in addition the words "bills of a private nature."

About the year 1870 bills for the establishment of post routes had become exceedingly numerous. The time taken in their presentation was so great that the following rule was adopted:

"But the Speaker shall not entertain a motion for leave to introduce a bill or joint resolution for the establishment or change of post routes, and all propositions relating thereto shall be referred, under the rule, like petitions and other papers, to the appropriate committee."

This was the first time that a rule was adopted which permitted the introduction of bills or resolutions without personal recognition and by motion.

In 1879 bills for the improvement of rivers and harbors were placed in the same category as post-route bills and were required to be presented and referred as were petitions and memorials.

The most comprehensive revision of the rules was made in 1880. The provisions already mentioned as having been adopted as to bills for post routes and the improvement of rivers and harbors were included at that time as section 5 of the then Rule XXI, which related to bills. Section 1 of Rule XXII was adopted practically as it is at present, except that the words in the first clause "or bills of a private nature" were not included.

In December, 1887, Mr. Randall reported the provisions requiring the filing of all private bills at the box at the desk, instead of presenting them in the open House on the call of States and Territories on Mondays, which was then the day and method for presenting bills. He explained that the effect of the change would be to permit the presentation of private bills on any day instead of confining their introduction to Monday.

In the revision in the Fifty-first Congress, in 1891, the result of which is commonly referred to as the "Reed Rules," the rule for the call of States and Territories in their alphabetical order for the presentation of bills was dropped. Rule XXII as it is at present was framed, and practically all bills, resolutions, petitions, and memorials were required to be presented in the same manner—by placing them in the basket, or, as the rule provides, by delivering them either to the Speaker or the Clerk, according to their character.

The rule is substantially as it has been for many years as to petitions and memorials, and section 3 was designed to include all bills and papers which prior to its adoption had been presented on the call of States and Territories, but which thenceforth were to be presented without the formality of recognition.

The present practice is the result of a gradual evolution, the result of imperative demands for time for more important matters than the merely formal presentation of bills. With 396 Representatives and Delegates introducing in one Congress more than 25,000 bills, it is apparent that unless some rule similar to the one now in force was devised that the time occupied in presenting bills would be a burden which could not long be tolerated.

While the rule itself does not in express terms prohibit the attaching of the name of more than one Member to a bill or resolution when it is delivered to the Clerk or to the Speaker, as the case may be, for reference, attention is called to the second clause, requiring that under certain conditions the bill "shall be returned to the Member from whom it was received." The House, however, in the conduct of its business is not controlled, nor is the business conducted, merely in accordance with the express rules of the House. There are many situations not specifically covered by the written rules which are nevertheless regulated definitely by the procedure which has come down from time immemorial and which procedure is essential to the orderly conduct of the business of the House.

Rule XLIV, which was first adopted in 1837, provides that "the rules of parliamentary practice in Jefferson's Manual shall govern the House in all cases to which they are applicable and in which they are not inconsistent with the standing rules and orders of the House and joint rules of the Senate and House of Representatives."

A casual examination of Rule XXII does not disclose any inhibition against the attachment of more than a single name to a bill or resolution. Examined in the light of the evolution of the rules and practice relating to the presentation of bills, however, and bearing in mind the purpose sought to be accomplished by the changes made from time to time resulting finally in the introduction of all bills without the formality of recognition, it seems clear to the committee that the underlying principle of individual recognition still prevails and that the presentation of a bill involves such recognition.

A careful search has been made to ascertain whether the question referred to the committee had ever been raised and determined. No record of such a decision has been found.

The committee has had called to its attention the action of Mr. Thomas B. Reed when Speaker, in a matter involving the same question to be determined by this committee.

Mr. JOHN SHARP WILLIAMS, of Mississippi, informed the committee that he had received a memorial from the legislature of Mississippi while Mr. Reed was Speaker. There were attached to the memorial the names of all of the Representatives from that State, and Mr. WILLIAMS placed it in the basket at the Clerk's desk. In the RECORD the day following, the memorial was reported as having been presented by Mr. WILLIAMS alone. Upon inquiry, he was informed that the Speaker, Mr. Reed, had stricken all other names from the memorial, and he later informed Mr. WILLIAMS that he had done so since, under the rules, it was impossible for more than one Member to present a memorial.

Had this decision been made in such manner as to have been preserved in the records of the House, it would undoubtedly have been regarded as controlling forever.

A search of the files of the document room discloses that at least 10 bills and resolutions have been presented with the name of more than one Member attached thereto.

Some of these bills were presented in the Fifty-ninth Congress, the others during this Congress. The search could not possibly be complete in its results, since no record is kept of bills so introduced, and it is necessary to rely largely upon the recollection of the employees in the document room.

The information obtained indicated that while the practice has not been so prevalent and long continued as to justify the assertion that it has become a custom and part of the unwritten regulations controlling the procedure and business of the House, it has undoubtedly been sufficiently indulged to vindicate those who, in the absence of a controlling ruling or some action by the House, contend for the practice.

Possible abuses from the continuance of the practice are not discussed, since the committee is unanimously of the opinion that under the true and proper construction of the rule the attaching of the name of more than one member to a bill or resolution is unauthorized.

JOHN J. FITZGERALD.
MARLIN E. OLMSTED.
FRANK D. CURRIER.
CHARLES E. TOWNSEND.
SWAGAR SHERLEY.

Mr. FITZGERALD. Mr. Speaker, I move that the committee be discharged from further consideration of the subject.

Mr. MANN. Will the gentleman yield?

Mr. FITZGERALD. Certainly.

Mr. MANN. This is a unanimous report?

Mr. FITZGERALD. This is a unanimous report. Perhaps I might state, by permission of the Speaker, as it may be of interest to the House to know, that three members of the committee have at one time or another joined with other members in attaching their names to bills. After investigation of the matter, the committee concluded, as the report shows, that under a proper construction of the rules such practice was not authorized.

Mr. MANN. If the House should adopt the report, of course that would have no effect on any proposition that has already been submitted?

Mr. FITZGERALD. None whatever.

Mr. MANN. Then why does not the gentleman move to adopt the report and discharge the committee?

Mr. FITZGERALD. Mr. Speaker, at the suggestion of the gentleman from Illinois, I shall modify my motion, that the report be adopted and the committee be discharged.

Mr. SHACKLEFORD. I would like to ask the gentleman what useful purpose can be served by bringing in this report at the last hour of the session, when there is not a chance to discuss it? Is not the resolution introduced here precisely like what often happens in a court, where a particular plea can not be filed except when consent of the court is given? There may be three or four or more men sign a plea as counsel, but only one man can stand in the place and ask permission to file the plea. It can not be filed without leave of court. Does the gentleman from New York insist that the plea must be stricken from the files because more names are signed to it than that of

the man who asked permission to file it? Is there any difference between that and this?

Mr. FITZGERALD. I think the usages and practice controlling parliamentary bodies is so peculiar to the bodies themselves that there can be no fair contrast with what might be proper in a court.

Mr. SHACKLEFORD. I ask the gentleman what useful purpose is to be gained by waiting until the last days of the session, when we are about to inaugurate a President, to bring up a resolution, without any opportunity for fair discussion?

Mr. FITZGERALD. The committee was directed to make the report. Since the committee was appointed until this week I have been engaged day and night in work of the Committee on Appropriations in preparing and considering the sundry civil appropriation bill, as has also one other of the members of the committee.

It has been utterly impossible to bring a report in earlier. Since the report is unanimous, and since three members of the committee have been among those who have believed that the practice of attaching more than one name was authorized, after investigation have come to the conclusions stated in the report, it seems to me that since no attempt is made in any way to interfere with any bill or resolution which has been introduced in that way prior to this time, there can not be any objection to the adoption of this report, but that it will be conducive to proper procedure in the House to adopt it at this time.

Mr. UNDERWOOD. In other words, if the gentleman will allow me, the result of the report is not to reflect upon the past procedure of the House, but merely to make a precedent for the House in the future?

Mr. FITZGERALD. That is so.

Mr. SHACKLEFORD. If this report is correct, are not the other bills where two or more names have been attached invalid, and ought they not to be stricken from the files?

Mr. FITZGERALD. No; not unless the House takes some action. Nobody has suggested that any action should be taken in regard to any bill or resolution heretofore introduced. It seemed to the committee that it might be desirable if the practice be unauthorized to have it declared so, and it has been done in a manner that anybody reading the report would say that without such an investigation as has been made there was some justification for the belief that the practice was justifiable.

Mr. MANN. Would not the adoption of the report simply mean to say that in the opinion of the House, without striking anything from the files, without in any way reflecting upon any Member who has signed reports of that character, in the future it would be the desire of the House that only one Member introduce memorials?

Mr. MURDOCK. Did the committee find whether any action similar to the action now taken by this committee had been taken in previous Congresses?

Mr. FITZGERALD. There is no record of any case, and the only case like it is that one called to the attention of the committee as pointed out in the report of the committee by the gentleman from Mississippi [Mr. WILLIAMS] when he presented a memorial from the State of Mississippi, to which he attached the names of all of the members of the Mississippi delegation, and Mr. Speaker Reed struck from that memorial all of the names excepting the name of Mr. WILLIAMS, which appeared first on the memorial, and informed him that under the rules and practices of the House it was impossible for more than one Member to present a memorial; and, as the committee states, if that decision had been made in a manner in which it had been preserved in the records of the House, nobody would have ever questioned it, and it would have been controlling since that time.

Mr. SHACKLEFORD. But was it made in that manner so that it could be stated as a precedent?

Mr. FITZGERALD. It was not.

Mr. SHACKLEFORD. Then it is not a precedent.

Mr. OLMSTED. Will the gentleman yield?

Mr. FITZGERALD. I yield to the gentleman.

Mr. OLMSTED. Mr. Speaker, I merely wish to say that this does not change the rules of the House in any way. This report, if adopted, will merely express the opinion of the House as to what is the proper practice under the present rules of the House. If it shall be the desire of the next House when it comes to adopt rules to so change the present rules as to permit two or more Members to join in offering one bill or resolution, well and good; but until that time it will know the adopted construction of the present rules. We found that in one case a committee had instructed two Members to make a report. They both put their names to it as offering it, and put it in the basket. Now, suppose it had been a privileged report, could two people rise at one time and say, "We demand recognition to present a privileged report?"

Could a dozen Members be recognized to present one bill? Could a dozen rise and say, "We present a bill entitled so-and-so?" Such a proposition could not be considered for a moment. The placing of the bill in the basket simply takes the place of the personal recognition which was formerly the practice. This report simply expresses the opinion, without reflecting upon the integrity of any bill or resolution heretofore offered, that no more than one Member may present one bill or resolution. I may say that we found that even one member of the Committee on Rules had joined another Member of the House in presenting a bill. This report simply expresses an opinion as to the better practice to be observed in the future.

Mr. DAVIS. Will the gentleman yield?

Mr. OLMSTED. Yes.

Mr. DAVIS. Upon the theory that the gentleman has just advanced, and the case which of course this special committee was appointed to investigate——

Mr. OLMSTED. We were not appointed to investigate any special case.

Mr. DAVIS. Was not the committee appointed as a special committee to investigate the resolution that was introduced by the so-called "insurgents?"

Mr. OLMSTED. No; there was no reference made to any particular case in the resolution under which the committee was appointed.

Mr. MANN. There are a large number of these bills, I may say to the gentleman from Minnesota.

Mr. OLMSTED. We found 10 or more.

Mr. DAVIS. Take the case of the insurgent resolution that was introduced upon the idea the gentleman has just expressed, would it have been proper for the gentleman whose name is at the head of those signing that resolution to have presented it to the House?

Mr. OLMSTED. Undoubtedly.

Mr. DAVIS. And to have stated that he, on behalf of Messrs. So-and-so, mentioning seven or eight Members, presented the following resolution.

Mr. OLMSTED. I think he could present it if he were recognized.

Mr. DAVIS. Calling them by name?

Mr. OLMSTED. If he were recognized, he could present it, and he could say anything that he was permitted to say.

Mr. DAVIS. Would it be proper for him to say, "I, in behalf of John Smith and John Doe and others, present the following resolution?"

Mr. OLMSTED. If he could not say it on the floor, he could not say it in the basket.

Mr. DAVIS. Is not that the same system that the chairman of the committee adopts when he presents a report of a committee and says that on behalf of the committee he presents the following report?

Mr. OLMSTED. He says that he is directed by that committee to do it.

Mr. DAVIS. That shows that he is directed by a number of men to do it.

Mr. OLMSTED. Yes; by a committee.

Mr. DAVIS. Then this particular resolution would have been proper, and it would have been proper for one of the Members who introduced that resolution to have said, "I and certain others hereby introduce for consideration the following resolution, or place it in the basket."

Mr. HAMILTON of Michigan. But they were not a committee.

Mr. DAVIS. Neither was there a committee in this John Sharp Williams case.

Mr. OLMSTED. And that is why Speaker Reed struck the other names off.

Mr. FITZGERALD. The gentleman understands the principle underlying that, and the evolution shows it, that the presentation of a memorial which is dropped in the box is, in effect, a recognition, and it would be impossible for more than one man to be recognized to present a memorial. Only one man can present it.

Mr. DAVIS. What I was trying to get at is this: Would it be proper for one man, then, to say that on behalf of—naming 15 or 20 Members of the House—"I hereby present the following resolution for consideration?"

Mr. FITZGERALD. He does the same thing by dropping it in the basket. I do not think a gentleman could go on and say that on behalf of somebody besides himself he did something unless we adopt a procedure here that would eliminate completely individual initiative and responsibility. It is the indi-

vidual responsibility of the Member on the floor that must be considered.

Mr. DAVIS. But he does it by direction of a committee, say, of 16. Why can not he say that by direction of a committee of 15 or 20 members he does so and so?

Mr. RYAN. Does not the rule provide that a bill or memorial must be submitted by one Member alone?

Mr. FITZGERALD. Nothing specific.

The SPEAKER. What is the motion of the gentleman from New York?

Mr. FITZGERALD. Mr. Speaker, the report having been unanimous, and not thinking there would be any contention, I moved that the report be adopted and the committee be discharged.

Mr. GARDNER of Massachusetts. Mr. Speaker, will the gentleman from New York yield me a little time before he moves the previous question upon the adoption of the report?

Mr. FITZGERALD. How much time does the gentleman desire—five minutes?

Mr. GARDNER of Massachusetts. Yes.

Mr. FITZGERALD. Well, I yield the gentleman from Massachusetts five minutes.

Mr. GARDNER of Massachusetts. Mr. Speaker, I do not think it makes any difference whether you adopt this rule or not. Nobody cares whether one man introduces a resolution or whether 29 men introduce a resolution, but I understand the gentleman brings it up as a privileged matter. Am I correct?

Mr. FITZGERALD. The committee was directed to report.

Mr. GARDNER of Massachusetts. At no particular time; it was a privileged resolution.

Mr. FITZGERALD. If it was not reported to-day or to-morrow, I suggest to the gentleman, it could never be reported.

Mr. GARDNER of Massachusetts. In all events it comes in here, if it comes at all, as a privileged matter, and when it came up originally it was a privileged matter. And that means, Mr. Speaker, that the gentleman from New York has discovered a new way, besides an appeal, of reviewing the action of the Speaker.

If his report means anything, it means that the Speaker transcended his power when he referred that bill to any committee at all, because if it was not properly introduced the Speaker could not have referred it to a committee, and I am delighted to find that it is now a privileged matter to ascertain whether or not the Speaker's action has been correct, because in the future as a privileged matter, when the Speaker makes a rule, for instance, as he did in the case of the gentleman from Tennessee [Mr. GAINES] when he brought in the Lilley resolution, that the control of the floor passed to the gentleman from New York [Mr. PAYNE], those of us who did not think so have now the means of bringing before this House as a privileged question a resolution in order to see whether his decision was correct or whether it was not correct.

Not only that case, but when the gentleman from New York [Mr. FITZGERALD] raised the point of order that the control of the floor passed from Mr. BENNET of New York to Mr. SABATH of Illinois and the Speaker ruled otherwise, those of us who disagreed in that decision now find that whether one gentleman or another chooses to appeal or not we have the means we did not have before of reviewing a decision of the Speaker, and for that reason I do not care two shakes of a cat's tail whether the resolution of the gentleman goes through or not. I am very glad to learn that it is a matter of privilege to review the action of the Speaker. [Applause and cries of "Vote!"]

Mr. OLLIE M. JAMES. Mr. Speaker, I would like to ask the gentleman from New York [Mr. FITZGERALD] a question.

Mr. HEPBURN. Mr. Speaker, will the gentleman yield to me for a moment for a question?

Mr. FITZGERALD. Yes.

Mr. HEPBURN. I would like to ask the gentleman if there is any question in his mind as to the right of the 29 gentlemen introducing that resolution each in his turn to have introduced the same resolution?

Mr. FITZGERALD. If the gentleman will permit me to say, first, I have no ulterior designs against the particular 29 gentlemen.

Mr. HEPBURN. It was the action back of the 29 gentlemen that inspired the gentleman from New York to action, however.

Mr. FITZGERALD. Not particularly their action, but the number of names by the appearance in the RECORD did attract my attention.

Mr. HEPBURN. Will the gentleman answer my question?

Mr. FITZGERALD. I said I knew of no——

Mr. HEPBURN. No rule that would prohibit it?

Mr. FITZGERALD. None whatever.

Mr. HEPBURN. And that course might have been pursued; and the gentleman reports now, as I understand, that it would be the better practice that 29 gentlemen each for himself should have introduced this bill and required the printing of it, and left the record to be made with regard to each one of them, and that that would be the better practice, rather than the 29 uniting in one in order to save the extraordinary printing of 28 of these bills?

Mr. FITZGERALD. I doubt if the gentleman from Iowa [Mr. HEPBURN], by the most careful examination of the report, will find anything that will justify his conclusions as to the position he ascribes to me. [Cries of "Vote!"]

The SPEAKER. The question is on the adoption of the report and the discharge of the committee.

The question was taken, and the motion was agreed to.

CODIFICATION OF THE LAWS.

Mr. MOON of Pennsylvania. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate joint resolution 140, and have it considered at this time.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Senate joint resolution (No. 140) to create a joint committee to consider the revision and codification of the laws of the United States.

Resolved, etc., That a special joint committee be appointed, consisting of five Senators, to be appointed by the Vice-President from Members of the Sixty-first Congress, and five Members of the House of Representatives, to be appointed by the Speaker from the Members of the Sixty-first Congress, to examine, consider, and submit to Congress recommendations upon the revision and codification of laws reported by the statutory revision commission heretofore authorized to revise and codify the laws of the United States, including all laws of a general nature, permanent in character, passed since the submission to Congress on December 15, 1906, of the final report of said commission; and that the said joint committee be authorized to sit during the recess of Congress and to employ necessary assistants, to order such printing and binding done as may be required in the transaction of its business, and to incur such expense as may be deemed necessary; all such expense to be paid in equal proportions from the contingent funds of the Senate and House of Representatives.

The SPEAKER. Is there objection?

There was no objection.

The resolution was ordered to be read a third time, was read the third time, and passed.

TREATY BETWEEN UNITED STATES AND RUSSIA.

The SPEAKER laid before the House the House joint resolution No. 235, concerning and relating to the treaty between the United States and Russia, with a Senate amendment.

The Senate amendment was read.

Mr. SABATH. Mr. Speaker, I move that the House concur in the Senate amendment.

The amendment was agreed to.

REPRESENTATIVE JAMES S. SHERMAN.

Mr. FOSTER of Vermont. Mr. Speaker, it seldom happens in the history of the House of Representatives that we furnish to the republic a Vice-President. We shall do that to-morrow noon when the Hon. JAMES SCHOOLCRAFT SHERMAN takes the oath of office. [Loud applause.]

I am sure, Mr. Speaker, that I voice the sentiment of the entire membership of the House when I say that we regret Mr. SHERMAN's leaving us. Nevertheless, our loss is the Nation's gain. And I am sure also, Mr. Speaker, that I speak in behalf of the entire membership of the House when I say that Mr. SHERMAN will carry with him to his new office the respect, the friendship, and the best wishes of the House of Representatives. [Loud applause.]

Mr. Speaker, it sometimes occurs to some of us that with that intuitive mind of yours you occasionally recognize a Member before he asks for recognition. Again, Mr. Speaker, I believe that I speak the sentiment of the entire membership of the House when I respectfully ask you just now to recognize the gentleman from New York [Mr. SHERMAN]. [Loud and long-continued applause.]

The SPEAKER. The gentleman from New York [Mr. SHERMAN] is recognized. [Loud applause.]

Mr. SHERMAN. Mr. Speaker, were it not for the particularly auspicious occasion, so far as I am concerned I should hesitate to emphasize the arbitrary right which the gentleman from Vermont suggests that the Chair has. But, Mr. Speaker, I do value the privilege of occupying the floor for just a moment or two in response to the thought which the gentleman from Vermont has brought to my mind.

It is twenty-one years, Mr. Speaker, last December since I entered the House of Representatives in the Fiftieth Congress. I have served here since then continuously, save only for one term, and that intermission was occasioned by my acceptance of an invitation differing from that ordinarily given me by a considerate constituency, to remain at home and become better

acquainted with that constituency during that period of two years. [Laughter.]

In the Fiftieth Congress, Mr. Speaker, there sat but five men who are to-day Members of Congress—your honored self; the gentleman from Pennsylvania, Mr. BINGHAM; the gentleman from Pennsylvania, Mr. DALZELL; the gentleman from New York, Mr. COCKRAN, and myself. It is true that both Colonel HEPBURN and Mr. PAYNE rank me in service, because they had sat in a prior Congress but were not Members of the Fiftieth Congress. There have been wonderful changes in the House of Representatives in those twenty-one years. In the first place, the House to-day has a membership of more than 60 greater than it had at that time—a membership greater by almost the number that were originally provided by the Constitution for the First Congress, which was, as I recollect it, 65. Then we had a membership of 332; now of 391.

I can almost see, Mr. Speaker, filing by me in my memory some of the great men of that period. I can see over yonder Samuel J. Randall, of Pennsylvania [applause]; strong, able, fearless, a concise debater, a splendid presiding officer, fair in debate, considerate in his antagonisms, mindful for his country, standing here, day after day, performing the work that an honest conscientious guardian of the Nation's interests should perform.

I remember, sir, that at that time there sat in the chair which you now occupy that great citizen of Kentucky, since elevated to the Senate, then to the Treasury portfolio, a man who in every decision in that chair meted exact justice to both sides of this House. [Loud applause.]

Mr. Speaker, I think I but speak the plain truth when I say that from John G. Carlisle until now, to the present Speaker, through Crisp, and Reed, and Henderson, and yourself, through all, no man on either side of this House has the right to claim that he has ever received from any Speaker other than his just deserts, other than fair treatment. [Loud applause.]

I can almost see, sir, sitting in the seat which is now mine, the first seat on this side, little Charley O'Neill, as we called him; concise, prim, considerate, courteous, gallant to a degree; always at his post of duty performing his share of legislation.

I can see back here "Pig Iron Kelley," as he was called, William D. Kelley, with his erect form, notwithstanding his three and seventy years of life, with his sonorous voice resounding through this Hall, always voicing the sentiment of his State and his party in favor of that great economic principle which I have always believed is the mainstay of the Republican party.

I can see over yonder Breckinridge the greater, and Breckinridge the lesser, the Breckinridge from whose lips there came like ripples of water liquid eloquence, whose equal there never was in this House or in any other body, William C. P. Breckinridge. [Loud applause.] He was a natural-born orator.

Right over here sat that other man from Massachusetts, the impassioned orator without equal in any legislative body, John D. Long. [Applause.] Up the middle aisle sat he, a leader who was elevated to the highest gift in the American Republic—aye, the highest gift, I believe, in the hands of any electorate in the world—William McKinley, of Ohio. [Great applause.] William McKinley, beloved by the Members on both sides of this Chamber; beloved by the people of this country; who served the people on battlefield, in forum, and executive chair, ably, faithfully, and well; and who with an appeal to the Almighty to forgive his slayer when he fell by the hand of an assassin, passed over to the great beyond. And standing by him in the aisle was the ponderous and powerful, calm and forceful, not eloquent always, ready always, fair always, able, a leader of men born was he, Thomas B. Reed, of the State of Maine. [Loud applause.]

All these men, Mr. Speaker, save Mr. Carlisle, have gone to their reward. Others, Mr. Speaker, some you and I have known and respected, have admired, for whom there has grown up even our strong affection, are still here.

I came to the House the youngest Member; I go out not the oldest, but among the oldest, Mr. Speaker, and I can not think of going out without more than a tinge of sadness. It has been a delightful service in this House. A wonderful period during which we have served. We have grown in population, in wealth, in enterprise; we have extended our territory. Indeed, we have become, Mr. Speaker, within those twenty years a world power and recognized as such.

The strength of our navy has been recently demonstrated, and in its globe-encircling voyage that navy has been the admiration of the world. [Applause.] It was at the beginning of my service here that the American Navy first began its progress toward its present wonderful development, under the recommendation of William C. Whitney, of the State of New York. [Applause.]

But, Mr. Speaker, I did not mean to encroach upon the time of the House to this extent. I did wish to say that I look back upon my service here with delight. For you gentlemen who are now in the Chamber, and for scores upon scores of others who have done their duty and who have passed on, some to the great beyond and some to perform duties in private life, I have formed for many of these a warm and a close affection. For many of those into whose faces I now look I have more than a personal regard, an affection which borders on love.

Mr. Speaker, there can never be for a boy anything like the early friendships. There never can be for me anything which quite measures up to the delight and the satisfaction of my service in the Congress of the United States. [Applause.] As I think of going out, there comes to my mind the words which many of you remember—

Love goes from love,
Like schoolboy to his books—

And I guess there are none of us so old but that we remember, when the skating was good or the baseball game was on, with what reluctance we went to our books. And that is my feeling to-night, Mr. Speaker. I go from this body with reluctance. I sever my official connection with you all with the utmost regret.

I carry with me, for a little time of service in the other end of this Capitol, and then to private life, the keenest remembrance of the kindly consideration that I have always received from both sides of the House. That of this side I always felt as though perhaps I was somewhat entitled to. Over there it did not seem quite as though I had the right to expect the generous treatment, gentlemen of the Democracy, that I have always received at your hands. [Applause.] And I take delight to-night in giving public expression to it.

All this memory will be with me while life lasts; and I trust, gentlemen, that the friendship will not be all upon one side. I hope I will live, for a little time at least, in the minds and the hearts of many of you. I shall not stay constantly over at the other end of the Capitol, boys. [Applause.] I am coming over to mingle with you now and again. Of course I shall find some associates over there. Why, Mr. Speaker, more than one-third of the United States Senate to-day is made up of men who have served with me in this House during the last twenty years. [Applause.] Thirty-two of the 90 United States Senators have had their schooling in this House.

Therefore, Mr. Speaker, that body can be properly looked upon as a very great, if not the greatest legislative body in the world. [Applause and laughter.] It, perhaps, may be looked upon as a college, for which a very considerable minority were prepared in this Chamber.

Gentlemen, please take with you to your homes my assurances of respect, of esteem, of regard; respect and esteem and regard for men who, it seems to me, time and again have shown their patriotic devotion to their country, who have shown their desire to do that which is right. And, Mr. Speaker, I say, what some other gentleman said in debate here to-night, that during all these years I have not found a man on either side of the Chamber whose actions I believed were impelled by any improper or impure motive. [Applause.] We have differed, to be sure, differed at times diametrically. Our antagonisms at times have been keen, our contests sharp.

But, Mr. Speaker, victor and vanquished have always been ready to accord to the other side the honesty of their beliefs, the sincerity of their purposes, the patriotism of their acts.

Take with you, gentlemen, to your homes my regard, my esteem, my affection; and I hope that after the morrow, when the excitement of that day has passed, you will in the greatest comfort possible under the congested conditions reach your homes in safety; and I sincerely hope each of you will find all your loved ones waiting for you there, happy and contented, and that peace, prosperity, and plenty and length of days may abide with you, one and all. [Prolonged applause.]

PERSONAL PRIVILEGE.

Mr. WALDO. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER. The gentleman will state it.

Mr. WALDO. Mr. Speaker, on February 20, 1908, at the request of Hon. Lorrin Andrews, late attorney-general of Hawaii, and who represented the American lawyers and other American citizens, residents of Shanghai, China, I presented to the House articles of impeachment against Lebbeus R. Wilfley, judge of the United States court for China.

These articles charged judicial outrages and gross abuse of power which, in my judgment, showed Judge Wilfley to be utterly unfit to hold judicial office.

The President, without any investigation of the facts, except to hear Judge Wilfley and his friends, sent to the subcommittee of the Judiciary Committee, which was then investigating the facts, a copy of a letter from himself to Secretary Root, in which the President used this language:

I have received and read your report of February 29 upon the charges submitted by Lorrin Andrews, under date of November 19, 1907, against Judge Wilfley; it appearing from your report that Congressman WALDO stands sponsor for the charges.

And concluded letter as follows:

It is not too much to say that this assault on Judge Wilfley in the interest of the vicious and criminal classes is a public scandal.

This was evidently an intentional reflection upon the uprightness of my motives and conduct and an invasion of my privileges as a Member of this House.

Judge Wilfley was charged with disbarring as unfit and unqualified, without hearing and in defiance of law, all the American lawyers whom he found practicing in Shanghai when he came there; of holding a sham and fraudulent examination, which he asserted the leaders of the bar did not pass, while only two lawyers did, members of a partnership in which the one member was disqualified to try cases by age and infirmities, the other by youth and inexperience.

Several of those held unfit and not qualified were then and are to-day members in good standing of the bar of the Supreme Court of the United States, lawyers of high standing and ability and of the best character and reputation.

Judge Wilfley was charged with convicting American citizens of crimes in defiance of law and evidence and then refusing bail pending appeal from his outrageous decisions and even attempting to evade the order of the circuit court of appeals directing him to admit to bail.

Judge Wilfley was charged with appointing receivers, stripping American citizens of their property and business without an opportunity to obtain counsel or to present evidence, while at the same time he protected fraudulent lottery and gambling schemes conducted by his friends.

Judge Wilfley appeared before the committee of this House, cross-examined in person, and made a statement or speech of an hour and a half, not under oath, in which he admitted practically every charge against him except the lottery charge, which was proved by his own letter in evidence, his only defense being that he acted with good motives, and that the Americans in Shanghai were very corrupt and disreputable.

The subcommittee reported, although the acts complained of were in the nature of tyranny or judicial outrage showing unfitness for judicial office, they were not, each considered by itself, impeachable offenses, but nevertheless closed its report with these grave reflections:

It is obviously true that an aggregation of entirely legal acts may develop into a system of tyranny and oppression; and that an inequitable exercise of judicial discretion may convert the machinery of justice into an engine of despotic and autocratic power. This may be accomplished without the taint of individual corruption and with a laudable purpose of purifying a community and of inaugurating civic reform.

Terror to evil doers if purchased at the price of judicial fairness and overstrained legal authority is achieved at too great an expense, for it defeats its own high aim and warps the very fabric of the law itself.

The temptation of an honest judge to—

"Bend once the law to his authority
To do a great right—do a little wrong—"

is fraught with such danger to our whole system of remedial justice that it merits the condemnation of every legal mind.

Such acts of legal oppression and of abuse of judicial discretion lie at the base of these charges. They are made before the House of Representatives in the form prescribed by law and custom, and are presented as a question of high privilege upon the solemn responsibility of a Member of the House. Charges so presented against this court have a peculiar and dangerous significance. In this case they are dismissed as falling short of impeachable offenses, by what we believe to be sound principles of legal construction, and Judge Wilfley is therefore denied any opportunity of defense. He can file no answer, make no denial, nor explain to the House the legality or necessity for his action.

These charges therefore stand uncontroverted, and if Judge Wilfley's judicial acts in the future are marked by the rigorous and inflexible harshness imputed to him they will hang as a portentous cloud over this new court, impairing his usefulness, impeding the administration of justice, and challenging the integrity of American institutions.

It was never my contention that any one of the judicial outrages committed by Judge Wilfley upon the American lawyers and residents of Shanghai was in itself sufficient to warrant his impeachment. I did and do now assert that the continued defiance of law and the rules of justice and equity by Judge Wilfley, and his continuous series of judicial outrages upon the rights of American citizens, show him to be utterly unfit to hold judicial office.

Such judicial outrages, even if committed, as Judge Wilfley claims, "with good intention," are, in my opinion, "high crimes and misdemeanors" under the Constitution and grounds for impeachment. If it were not so, the people of a community would be, as the Americans of Shanghai were, the helpless prey of an unscrupulous judicial tyrant.

This report of the subcommittee was accepted by the Judiciary Committee and a resolution adopted recommending that no further action be taken by the House.

Members of the Judiciary Committee, and Members of the House, who had used every honorable means to protect Judge Wilfley from the result of his high-handed and unjust treatment of American citizens in Shanghai, told Judge Wilfley that he had barely escaped impeachment, and warned him that on his return to China he must alter his judicial methods and conduct and in the future temper his judgments with some consideration of justice and equity.

This Judge Wilfley failed to do, but on his return to China was even more disregardful of all law and rules of equity and justice.

Mr. MANN. Will the gentleman yield?

Mr. WALDO. I had rather finish, and then I will yield.

Mr. MANN. Then, I make the point of order that the gentleman is not stating a question of personal privilege.

Mr. WALDO. I submit to the Chair that if there is any question of personal privilege this is one.

Mr. MANN. I was going to ask the gentleman if he himself thought it was a question of personal privilege.

Mr. WALDO. I do.

Mr. MANN. I have listened very attentively, and I do not think the gentleman has yet stated a question of personal privilege.

Mr. WALDO. This is an attack on a Member of the House.

Mr. MANN. I think it is an attack on some one who is not a Member of the House.

Mr. WALDO. Not at all; I have not related the charge in detail. I have gone over it in a concise way, simply calling the attention of the country to the fact that I had been charged with having committed an act of public scandal as a Member of this House. I think I am in order.

Mr. CLAYTON. Mr. Speaker, I rise to a point of order that the gentleman presents no question of personal privilege. I have listened carefully to what he has said, and it seems to me the whole effort is to kick a judge now out of office and to kick a President who goes out to-morrow. [Laughter.]

Mr. WALDO. I have no such intention, and I think the gentleman will fail to find any such intention in anything that I have said.

The SPEAKER. May the Chair suggest to the gentleman that he ask unanimous consent to print his statement?

Mr. WALDO. I shall only take about six minutes more.

The SPEAKER. The Chair does not like to rule on a question of privilege.

Mr. CLAYTON. I have no objection to the gentleman taking six minutes more if he wants to hasten the outgoing Republican President.

Mr. WALDO. I would suggest to the gentleman that I should have been through by this time if I had not been interrupted.

Mr. PAYNE. That is not the question at all. If I understand the gentleman, what he proposes to say now is on a line with what he has been saying. As I understand, Judge Wilfley has retired to private life. The matter was investigated by the Judiciary Committee and the contention of my colleague was not founded on fact. I object to cumbering the RECORD now with any more charges against Judge Wilfley.

Mr. MILLER. I would like to suggest to the gentleman from New York that Judge Wilfley has been fired from public life into private life, and very justly as I think.

Mr. PAYNE. Well, there are two attacking a man who can not protect himself in this body. I object to any further statements in this line.

Mr. MANN. I will not insist on the point of order.

The SPEAKER. But the gentleman from New York makes the point of order.

Mr. MANN. If the gentleman from New York is going to talk very long, I will.

Mr. WALDO. I should have been through twice over if I had not been interrupted. I ask unanimous consent of the House that I may proceed, although it seems to me that it is not necessary to ask unanimous consent.

Mr. KIMBALL. I object.

The SPEAKER. Does the gentleman from New York ask unanimous consent to print the remainder of his statement?

Mr. WALDO. I will, if the Chair rules that it is not a question of personal privilege.

The SPEAKER. The gentleman from New York asks unanimous consent to print the balance of his statement. Is there objection? [After a pause.] The Chair hears none.

The balance of the statement is as follows:

In the case of Captain Price, the United States circuit court of appeals in California had reversed the judgment of conviction of assault with a deadly weapon and sent the case back for a new trial, stating that in case Captain Price was not acting in self-defense his action, at the most, would constitute only a simple assault.

On the second trial before Judge Wilfley, shortly after his return to Shanghai, the complaining witness failed to appear. Judge Wilfley, in defiance of the law of all civilized countries, ordered the stenographer's minutes of the witnesses' testimony at the first trial read as evidence on the second trial. The Chinaman who had corroborated the testimony of the complaining witness on the first trial that the complaining witness had not in the first instance assaulted Captain Price with a carving knife now testified that this was false; that the complaining witness had first assaulted Captain Price with a carving knife; and that he had testified falsely on the first trial because the complaining witness had paid him to do so and because of the threats of District Attorney Bassett.

On this kind of evidence Judge Wilfley convicted Captain Price of assault a second time and sentenced him to prison for three months at hard labor. A second time Judge Wilfley refused to admit Captain Price to bail; a second time Captain Price's lawyer was obliged to go all the way to San Francisco, Cal., to apply for a mandamus; and a second time the circuit court of appeals ordered Judge Wilfley to admit Captain Price to bail.

Judge Wilfley next attempted to get Captain Price's bookkeeper and cashier in his large restaurant and casino business deported in defiance of law. Because the United States consul-general refused to commit this gross outrage against an American citizen, Judge Wilfley made false and scandalous charges against the consul-general, asserting that he was now standing in with the disreputable element in Shanghai; more than that, Judge Wilfley has, since his return to America, been repeating these false and scandalous charges to anyone who would listen to him.

Since these last scandalous judicial and nonjudicial outrages upon the Americans of Shanghai Judge Wilfley has been permitted by cable to resign.

He attempted to get from the people of Shanghai a protest to the President against his recall, and at the same time announced in the public press that his resignation was entirely voluntary.

Such action as I took in this case was taken after long deliberation and with a consideration of the consequences of the President's custom of acting on impulse without consideration or knowledge of facts. I knew well the President's inability to confess a wrong done a friend in haste and ignorance.

Although time has shown that I was right and the President was wrong, I never expect him to admit it or to do me such partial justice as is now possible.

I can only rely upon the approval of sober-minded men, my friends and countrymen within this House and without—to whom the final event will now show the uprightness of my motives and the necessity of my action for the protection of defenseless Americans in a far land, at any cost to myself.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 3952) to restore to the active list of the United States Marine Corps the name of Robert Morgan Gilson.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 25980. An act for the relief of Sarah J. Fowler.

INTERNATIONAL EXHIBITION, BRUSSELS.

Mr. COUSINS. Mr. Speaker, I move to suspend the rules, discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill (H. R. 27818) providing for participation in the Universal and International Exhibition to be held at Brussels in 1910, and to pass the bill, which bill I send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to accept the invitation extended by the Government of Belgium to the Government of the United States to participate in the Universal and International Exhibition to be held at Brussels from April to November, 1910.

In accepting said invitation it is hereby declared to be the purpose of the Government of the United States to participate in said Universal and International Exhibition at Brussels by erecting suitable buildings and making an appropriate exhibit of arts, industries, manufactures, and products of the soil and mines, and, as far as practicable, of the functions of the General Government of the United States, and an exhibit of such other articles as the President of the United States may direct: *Provided*, That such participation, buildings, exhibits, and all expenses connected therewith, including salaries, clerical and other services, and transportation of persons and exhibits shall not exceed $300,000.

Toward the expenses herein authorized incident to the participation of the United States in the said exhibition there is hereby appropriated the sum of $100,000, to be immediately available and to remain available until expended.

SEC. 2. That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to appoint one commissioner-general and six commissioners, one of whom shall be a Senator of the United States and one of whom shall be a Member of the House of Representatives. Said six commissioners shall serve without salary, but shall be paid $2,000 in lieu of all personal and traveling expenses.

It shall be the duty of the commissioner-general, under the direction of the Secretary of State, immediately to take such steps as are necessary to ascertain the general plan and scope of the said Universal and International Exhibition at Brussels, and the extent and character of the exhibit that will best serve the interests of the United States and its citizens and will be best adapted to illustrate the growth and development of the country and the character of our people.

That as soon as practicable the said commissioners shall report fully to the President and the Secretary of State the result of such investigation, together with their recommendations and the estimated cost of such participation in the said exhibition within the foregoing authorization, and that it shall be the duty of the commissioner-general, under the direction of the Secretary of State, to construct such buildings as may be necessary, and to make all arrangements essential to participation, within the meaning and scope of this act.

That the said commissioner-general shall receive as compensation for his services the sum of $8,000 per annum, together with his actual traveling expenses, including sleeping-car service and a per diem in lieu of subsistence of $7 when actually traveling in the discharge of his duties.

That the President shall also appoint a secretary, at a compensation of $6,000 per annum, together with his actual traveling expenses, including sleeping-car service and a per diem in lieu of of subsistence of $6 when actually traveling in the discharge of his duties as such secretary, who shall act as disbursing agent and who shall perform such duties as may be assigned to him from time to time by the commissioner-general, and who shall render his accounts at least quarterly to the proper accounting officers of the Treasury of the United States, and shall give bond in such sum as the Secretary of the Treasury may require. That the term of service of the commissioner-general and the secretary herein provided for shall not exceed two years. And the said commissioners, subject to the approval of the Secretary of State, shall appoint from time to time such clerical and other assistants as may be necessary and as may hereafter be necessary and as may hereafter be appropriated for in connection with the participation herein authorized.

SEC. 3. That upon the request of the Secretary of State the Secretary of War is hereby authorized to furnish free transportation on government transports from seaports on the Atlantic seaboard to Belgium and return of all government exhibits and for such officials or employees connected with the commission or in charge of any or all government exhibits.

The Secretary of Agriculture is hereby authorized to prepare suitable exhibits of agricultural and food products of the States and Territories of the United States, and shall exhibit the same under the direction and control of the commissioner-general.

All officers and employees of the executive departments and of the Fish Commission and of the Smithsonian Institution, in charge of or responsible for the safe-keeping of exhibits belonging to the United States, may permit such exhibits to pass out of their possession for the purpose of being transported to and from and exhibited at said exhibition as may be requested by the commissioner-general, whenever authorized to do so, respectively, by the heads of the departments and the Commissioner of Fisheries and the Secretary of the Smithsonian Institution; such exhibits and articles to be returned to the said respective departments to which they belong at the close of the exhibition.

The commissioner-general shall employ such number of experts as may be needed, having special attainments in regard to the subjects of the group or groups in said exhibition to which they may be assigned, respectively, and he may employ from time to time such other experts as he may deem necessary in the preparation and installation of such exhibits.

Mr. MANN. Mr. Speaker, I demand a second.

The SPEAKER. The gentleman from Illinois demands a second. Under the rule a second is ordered. The gentleman from Iowa is entitled to twenty minutes and the gentleman from Illinois to twenty minutes.

Mr. COUSINS. Mr. Speaker, I have not proposed this bill for the purpose of making a speech at this closing hour by any means. I shall speak but a very few moments in its behalf. It was reported from the Committee on Foreign Affairs by the gentleman from Rhode Island [Mr. CAPRON], who is at his home ill. It has seemed to me all the time, ever since the bill has been reported, that it should have at least respectful consideration, and I believe the unanimous support of every Member in this House and of the other House. It is the ordinary proposition for a universal exposition. It is a proposition which comes from the great Government of Belgium. It is to be their great international exposition in 1910.

That Government when we held our last exposition at St. Louis appropriated $300,000; made her exhibits there one of the very best among the five great nations of the world. She is fifth to-day in the nations of the earth as to commerce and trade. She is one of the best customers that the United States

has, maybe because she has to be and maybe not. Our relations with that Government are the most cordial. It seems to me it would be very shortsighted if on the heels of our great St. Louis Exposition we did not recognize this invitation of this great neighbor of ours across the sea and reciprocate in like, as she did in the days when we were having our great exposition here. During the last five years we have participated in but one great international exposition in Europe, that of Paris. During that time the six foremost nations of the earth have participated in five expositions here in our country.

I wish to offer the proposition that we can do no less than recognize this invitation, that as a great nation, enjoying friendly and extensive commercial relations with Belgium, we can do no less than recognize her as she did us at St. Louis.

Mr. SULZER. Will the gentleman yield?

Mr. COUSINS. Yes.

Mr. SULZER. Mr. Speaker, I am very much in favor of this bill, and I sincerely hope it will pass. I would like to ask the gentleman when the exposition at Brussels will be held.

Mr. COUSINS. From April until November, 1910.

Mr. SULZER. Hence it is important to pass the bill at this session of Congress.

Mr. COUSINS. Unless it is passed now it can not be made practical.

Mr. TAWNEY. Is it not a fact that this Government appropriated $300,000 to participate in the Louisiana Purchase Exposition?

Mr. COUSINS. That is very likely.

Mr. OLLIE M. JAMES. How much is it to cost the Government?

Mr. COUSINS. Not to exceed $300,000, including everything. It seems to me that there is no argument needed in a case of this kind, when we come to consider that a nation that is fifth in the trade and commerce of the world, and who came to us at St. Louis a year or two ago appropriating $300,000, representing all the vast industries that she has—agriculture, mining, and manufacturing—now asks us to participate in her exposition. We asked them to come. They accepted, and appropriated liberally. Now, they ask us to return. It surely would be shortsighted in us not to do it, laying aside the question of commerce, even as to the matter of amity. I reserve the balance of my time.

Mr. MANN. Mr. Speaker, I do not know that I have any objection to this bill. I think, on the contrary, that we ought to be represented at the Brussels Exposition. This bill, however, contains one of the most remarkable sections which ever has come before this House. Section 2 provides:

> That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to appoint one commissioner-general and six commissioners, one of whom shall be a Senator of the United States and one of whom shall be a Member of the House of Representatives.

It seems to me a remarkable proposition that if the House of Representatives is to be represented among the commissioners-general, or among commissioners, that that Member shall be appointed by the President and confirmed by the Senate. Since when did we turn over all of our power to the Senate of the United States to select a Member from the House to act upon a commission? It is customary in these matters to let the Senate select its member of the commission, and to permit the House to select its member of the commission. But here is a proposition, originating I do not know where. The bill was never introduced into the House except as reported from the Committee on Foreign Affairs, and I give that committee the credit to say that I think that they never read the bill through, as it was evidently sent to them by some one outside of the legislaive branch of the Government.

Certainly the Committee on Foreign Affairs would not presume to propose in this House that when you select a Member of the House to represent it you shall ask the Senate to make the selection. Now, the distinguished gentleman now occupying the chair—and it will be a great regret to us that he will not occupy the position of the head of this commission in the next Congress—I am sure would not condone such an offense as a Member of the House. Why, if it were proposed to select the distinguished gentleman from Indiana [Mr. LANDIS] as the most fitting representative of the House, would we think it necessary to go to the other end of the Avenue and ask the President to ask the Senate if he might be the representative from the House? Is it the intention by this legislation to utterly and entirely abandon the prerogatives and privileges of the House of Representatives?

This bill will not pass; it is a House bill, and the only purpose that can be effected by passing the bill through the House to-night is to say that we no longer want our rights as Members of the House, but that we seek to go into the other end of the Capitol so that we may there control the action of the House. It will not send commissioners to Brussels, the passage of the bill in the House to-night will not provide an exhibit at Brussels, but it will register the last expiring effort of the House of Representatives to efface itself from taking a part in the government of the United States. Mr. Speaker, I reserve the balance of my time. [Applause.]

Mr. MACON. Mr. Speaker, before the gentleman takes his seat will he allow me to suggest there is one other bad feature about this bill, and that is it proposes to take $300,000 out of a depleted Treasury in order to make entertainment for people somewhere, which the people of the United States will not even have an opportunity to attend themselves.

Mr. MANN. Well, as I suggested to my friend from Arkansas, the passage of the bill through the House, in my opinion, will not take a dollar from the Treasury, because I do not think it will pass through the Senate; possibly it might, but it will register the will of the House that it wants to efface itself.

Mr. OLLIE M. JAMES. The gentleman, in making that statement with a degree of assurance that it will not pass the Senate, perhaps has not taken into his conclusions the rapidity with which a bill like this can go through the Senate.

Mr. MANN. It might go through the Senate, but I do not think it will pass. I yield two minutes to the gentleman from Tennessee [Mr. GARRETT].

Mr. GARRETT. Mr. Speaker, I do not care to discuss the question of dignity suggested by the gentleman from Illinois. The gentleman from Illinois has suggested that the bill will not pass the Senate. It occurs to me that the greatest inducement which could lead the Senate to pass the bill would be the provision to which he has called attention, of the Senate passing upon the Member from the House who should be a member of the commission. But, Mr. Speaker, without reference to the question of dignity, I wish to say that the people of the United States, in my humble judgment, are getting exceedingly tired of paying for expositions, and they are particularly tired of paying for expositions in which they have no interest, directly or indirectly.

Mr. Speaker, I now yield back the balance of my time.

Mr. COUSINS. Mr. Speaker, I yield three minutes to the gentleman from New York [Mr. SULZER].

Mr. SULZER. Mr. Speaker, this bill should pass. I agree with the gentleman from Iowa, and I differ with the gentleman who has just taken his seat regarding the advantages of these expositions. They benefit and elevate the people far beyond the conception of the unthinking. These great international expositions do much good in an educational way and go far to establish cordial relations between people of different countries, dissipate prejudices, and broaden humanity. We must do as other great countries do. We must be abreast of the times. [Applause.] When we held expositions in this country we invited all other countries to participate, and they generally did so. We are a world people and we should participate in all the great expositions. When we consider the friendship of Belgium and the advantages bound to result from our participation in this exposition, I believe it will be a mistake to defeat this bill. I am in favor of expositions, and I hope this measure will pass without opposition. The money invested in this display in the products of our fields and forests and factories will return to us an hundredfold. We can not be a country apart. We must hold our place in the forefront of the world's progress.

Mr. OLLIE M. JAMES. Will the gentleman yield? The gentleman from Iowa [Mr. COUSINS] assured us that $300,000 was to be appropriated for the purpose of this exposition. If the gentleman will examine this bill, he will find out that it starts off with a salary of $8,000 to the commissioner-general, and besides that he is to get his actual traveling expenses, sleeping-car service, and per diem in lieu of subsistence of $7 a day. In addition to that there is a secretaryship of $6,000, for sleeping-car service an additonal $7 a day, and then there are 8 commissioners, at $2,000 each. Now, how much will be left, after all these officers are paid, for the exposition in Belgium?

Mr. SULZER. I only have a few minutes. I can not yield for a speech. I hope we will appropriate sufficient money to fittingly take part in this exposition. If we do not, we will be recreant to the best interests of the people of the country.

Mr. OLLIE M. JAMES. Is this to be an exposition of office-holders or an exposition of the products of the United States?

Mr. SULZER. Mr. Speaker, I believe, and I want to say this as emphatically as I can, that it will be to the best interests of the producers of this country for us to participate in a fitting way in this Brussels Exposition. I hope the bill passes.

The SPEAKER. The time of the gentleman has expired. [Cries of "Vote!"]

The SPEAKER pro tempore (Mr. LANDIS in the chair). The question is on suspending the rules and passing the bill with committee amendments.

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. SULZER. Division, Mr. Speaker.

The House divided; and there were—ayes 60, noes 70.

So the motion to suspend the rules was rejected.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I submit the conference report on the bill H. R. 28245, the sundry civil appropriation bill, and ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 20, 24, 28, 29, 32, 33, 41, 42, 44, 58, 60, 70, 71, 74, 75, 79, 81, 96, 113, 114, 116, 118, 119, 121, 122, and 127.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 21, 22, 23, 30, 31, 35, 36, 37, 39, 45, 47, 48, 49, 52, 54, 55, 56, 57, 59, 61, 62, 63, 64, 65, 66, 69, 72, 73, 76, 77, 78, 80, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 97, 98, 99, 100, 101, 105, 106, 107, 108, 109, 110, 112, 115, 117, 120, 124, 125, 126, 128, and 129, and agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "two hundred and fifty thousand dollars;" and the Senate agree to the Same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Point Judith breakwater lights, Rhode Island: For establishing lights and fog signals on the breakwater of the national harbor of refuge, Point Judith, Rhode Island, twelve thousand dollars."

And the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: Add at the end of said amendment the words "to be immediately available;" and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: Add at the end of said amendment the words "to be immediately available;" and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "sixty thousand dollars;" and the Senate agree to the same.

Amendment numbered 38: That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "one hundred and fifty thousand dollars;" and after the word "dollars" at the end of the said amendment insert the following, "and the said commission shall complete their entire work and make their final report, and the commission shall cease on the first day of March, nineteen hundred and ten;" and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended as follows: On page 100 of the bill, in line 5, strike out the word "fifty" and insert in lieu thereof the word "twenty-five;" and the Senate agree to the same.

Amendment numbered 43: That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment as follows: Add at the end of said amendment the words "to be immediately available;" and the Senate agree to the same.

Amendment numbered 46: That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows: In line 4 of said amendment, after the word "services," insert the words "for the Senate Office Building;" and the Senate agree to the same.

Amendment numbered 50: That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment as follows: On page 106 of the bill, in line 3, strike out the words "to indict" and insert in lieu thereof the words "or other juries to indict and try;" and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In line 3 of said amendment strike out the word "seventy-five" and insert in lieu thereof the word "sixty;" and the Senate agree to the same.

Amendment numbered 53: That the House recede from its disagreement to the amendment of the Senate numbered 53, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "two hundred and twenty-five thousand dollars;" and the Senate agree to the same.

Amendment numbered 67: That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: Strike out all after the word "Treasury," in line 8 of said amendment; and the Senate agree to the same.

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one million four hundred and seven thousand three hundred and ninety dollars;" and the Senate agree to the same.

Amendment numbered 102: That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment as follows: On page 166 of the bill, in line 8, strike out the words "forty-two thousand six" and insert in lieu thereof the words "forty-seven thousand one;" and the Senate agree to the same.

Amendment numbered 103: That the House recede from its disagreement to the amendment of the Senate numbered 103, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "five hundred dollars;" and the Senate agree to the same.

Amendment numbered 104: That the House recede from its disagreement to the amendment of the Senate numbered 104, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "four hundred and two thousand two hundred dollars;" and the Senate agree to the same.

Amendment numbered 111: That the House recede from its disagreement to the amendment of the Senate numbered 111, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "four million three hundred and twenty-eight thousand seven hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 123: That the House recede from its disagreement to the amendment of the Senate numbered 123, and agree to the same with an amendment as follows: In line 6 of said amendment, after the word "the," insert the words "Congress and the;" and on page 200 of the bill, in line 25, strike out the words "forty-one thousand two hundred and thirty-two" and insert in lieu thereof the words "forty-eight thousand and thirty;" and the Senate agree to the same.

Amendment numbered 130: That the House recede from its disagreement to the amendment of the Senate numbered 130, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended as follows: On page 215 of the bill, in line 20, after the word "shall," insert the words "transmit the estimates to Congress as heretofore required by law and;" and change the number of the section to 7; and the Senate agree to the same.

Amendment numbered 131: That the House recede from its disagreement to the amendment of the Senate numbered 131, and agree to the same with an amendment as follows: In lieu of the number proposed insert "8;" and the Senate agree to the same.

Amendment numbered 132: That the House recede from its disagreement to the amendment of the Senate numbered 132, and agree to the same with an amendment as follows: In lieu of the number proposed insert "9;" and the Senate agree to the same.

Amendment numbered 133: That the House recede from its disagreement to the amendment of the Senate numbered 133, and agree to the same with an amendment as follows: After the word "is" at the end of line 13 of said amendment insert the words "specifically and in express terms;" and change the number of the section to 10; and the Senate agree to the same.

J. A. TAWNEY,
WALTER I. SMITH,
JOHN J. FITZGERALD,
Managers on the part of the House.

EUGENE HALE,
GEO. C. PERKINS,
H. M. TELLER,
Managers on the part of the Senate.

The statement was read, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill making appropriations for sundry civil expenses for the fiscal year 1910 submit the following written statement in explanation of the accompanying conference report:

The bill as finally agreed upon appropriates $137,609,906.93.

The Senate by its amendments added to the bill $1,954,719.

By the conference agreement the Senate yields from $1,134,658, and the House agrees to $820,061.

Among the principal items agreed to by the House are the following:

Everett, Wash., public building, $40,000.

Riverside, Cal., public building, $50,000.

For the National Museum, $250,000, instead of $300,000 as proposed by the House and $190,000 as proposed by the Senate.

For Ambrose Channel, New York, lights, $40,000.

For Alcatraz light station, California, $35,000.

For lights in Alaskan waters, $60,000.

For Immigration Commission, $150,000, with a requirement that said commissison shall report and cease on the 1st day of March, 1910.

For the Senate Office Building, $123,000.

For topographical surveys, Geological Survey, $350,000, as proposed by the Senate, instead of $300,000, as proposed by the House.

For geological surveys, $225,000, instead of $260,000, as proposed by the Senate.

For additional wing to Freedmen's Hospital building, Washington, D. C., $55,700.

For additional shop building for Frankford Arsenal, $23,500.

For addition to the building for offices of the President, $40,000.

For water supply, Presidio of San Francisco, $100,000.

For payment to the Catholic Church in Porto Rico, $120,000.

The principal items inserted by the Senate which are stricken from the bill include:

For six launches and revenue cutters for the Revenue-Cutter Service, at a total cost of $615,000.

For light keepers' dwellings, $75,000.

For Winter Quarters Shoal light-vessel, Virginia, $135,000.

For Buffalo breakwater light station, $43,200.

For aids to navigation in Puget Sound, $41,600.

For gauging streams, the increase from $100,000 to $200,000.

For investigation of structural materials, the increase from $100,000 to $150,000.

For Platt National Park, Oklahoma, $20,000.

For continuing improvement of Potomac Park, $50,000.

For traveling expenses of the President, $25,000.

The following items proposed to be stricken out of the bill by the Senate are restored, as follows:

For special examiners, division of naturalization, $125,000 instead of $150,000.

For fees of clerks of courts for services in naturalization cases, $25,000.

For testing machine for the Bureau of Standards, $50,000.

Provisions of law inserted by the House and stricken out by the Senate are restored as follows:

Fixing the compensation of linotype operators in the Government Printing Office.

The section requiring the estimates of expenditures to be submitted by the Secretary of the Treasury to the President, when the same exceed the estimated revenues, for his suggestions to Congress with reference to their reduction or for such loans or new taxes as may be necessary to cover the deficiency.

Section 9, inserted by the Senate, repealing certain unexpended balances of appropriations is agreed to.

J. A. TAWNEY,
WALTER I. SMITH,
JOHN J. FITZGERALD,
Managers on the part of the House.

Mr. TAWNEY. Mr. Speaker, I move the adoption of the report, and on that motion I ask for the previous question.

Mr. CLARK of Missouri. Mr. Speaker, I want to ask just one question. That $25,000 for traveling expenses goes out?

Mr. TAWNEY. That is out.

Mr. BENNET of New York. Will the gentleman from Minnesota [Mr. TAWNEY] yield me two or three minutes?

Mr. TAWNEY. I yield three minutes to the gentleman.

Mr. BENNET of New York. Mr. Speaker, I think that as a member of the Immigration Commission I ought perhaps to say that the provision inserted in the bill for the commission is, so far as I am concerned, and as far as I have been able to consult the members of the commission, entirely satisfactory. There is no reason why we ought not to complete our work in a year, and there is no reason why we ought to spend in the fiscal year provided for by this bill more than the money appropriated.

The gentleman from Kansas [Mr. MURDOCK], who the other day made the point of order against the appropriation of $300,000 as it came from the committee, deprived me of the unique opportunity of offering an amendment, which I had already prepared, reducing the amount of the appropriation from $300,000 to $200,000.

Mr. TAWNEY. If the gentleman will permit an interruption, the $300,000 recommended from the Committee on Appropriations is the amount estimated by the commission.

Mr. BENNET of New York. Not by the commission, if the gentleman will permit me, but by the bureau. The committee has treated us with great liberality and entire fairness, and I thought that the commission at that time owed a duty to the committee, and thinking that it ought not to spend as much money, I had intended to make the motion at that time.

Mr. MURDOCK. How much does the bill now carry?

Mr. BENNET of New York. One hundred and fifty thousand dollars, and I think it is enough.

Mr. BURNETT. Will the gentleman yield two or three minutes to me?

Mr. TAWNEY. I yield three minutes to the gentleman from Alabama [Mr. BURNETT].

Mr. BURNETT. Mr. Speaker, I desire to say that I shall not offer any objection or amendment, or try to prevent the adoption of the report of the committee of conference on the sundry civil bill, but I think the time that is given to the Immigration Commission to make its final report is entirely too long. I believe, Mr. Speaker, that this commission can make its report by the 1st day of December or, at least, by the 1st day of January, without any trouble whatever.

In support of that I want to read just one clause of the report of the commission that was filed the other day. I am a member of that commission and know something of its work. I think, without question, if this House will require the commission to do so they can make their final report by the 1st day of January, when legislation on this question can proceed. Here is what we said:

> The plans of the commission are realized, the various lines of work outside Washington will be terminated as sufficient data is secured from each, and practically all field work will be completed in the early fall, probably by September 15, 1909. When field investigations are completed, the work will consist entirely of compiling the data secured and in preparing reports upon the various subjects.

Mr. Speaker, these tabulations and compilations are going on now. Why, then, should it be necessary, after the field work has been completed on the 15th of September, to extend the time of making its final report beyond two months and a half, solely for the purpose of preparing this report?

Mr. FITZGERALD. Will the gentleman yield?

Mr. BURNETT. Certainly.

Mr. FITZGERALD. Let me say to the gentleman that there is nothing to prevent the commission from presenting its report earlier. The House conferees believed it could be presented in a month from the completion of the field work; but the insistence of the Senate was that there should be longer time given. I did not believe it was necessary.

Mr. SABATH. Unless to extend the appropriation.

Mr. OLLIE M. JAMES. I want to suggest to the gentleman from New York that I know of nothing that hastens the report of one of these commissions like fixing the time when it shall die.

Mr. FITZGERALD. That is true. I was as anxious as the gentleman from Alabama that the life of the commission should end on the 1st of December, and to give the commission $100,000, but it was impossible to bring that about, and this was the best that could be done.

Mr. BURNETT. Well, Mr. Speaker, I think if the gentlemen had had this report of the commission before them, in which the commission states that the field work will be completed by the 15th of September, certainly two months and a half would leave the commission ample time to make its report.

The SPEAKER. The time of the gentleman has expired.

Mr. TAWNEY. I yield the gentleman two more minutes.

Mr. BURNETT. When this report was prepared, Mr. Speaker, I reserved the right as a member of the commission to make objection to the suggestion that they made, that their report could be completed by the end of the next fiscal year, because, as stated by the gentleman from Kentucky, if it was forced to do so, it could soon report. This commission was created at the time for the purpose of preventing legislation restricting immigration. There is no doubt that that was the purpose, Mr. Speaker; and it has accomplished that purpose so far, because every time any effort is made to report restrictive legislation before the Committee on Immigration those opposing it say, "Oh, wait until your commission reports;" and that is the real reason why it was desired that this commission should postpone its report during the next fiscal year, in order to prevent any legislation, although the people all over the country are demanding it. Therefore I believe that the 1st day of December, or the 1st day of January, at the very farthest, should be the time fixed for them to file their report. If they were required to do so, they would do it. But this commission will follow the rule of all other commissions and take every minute of time the law gives them to finish its work, unless the appropriation gives out before that time.

Mr. TAWNEY. Mr. Speaker, just one minute. In answer to the gentleman from Alabama, I desire to state that the contention elsewhere was in favor of a continuation of this commission for a period of two years, at a very much greater cost to the Government than the amount now authorized. The managers on the part of the House felt that they were making a fairly good compromise settlement by securing the final report of the commission on March 4, 1910, instead of December 1, 1909, or January 1, 1910, as the gentleman from Alabama now suggests. I take it that under all the circumstances, and in view of the fact that under this provision the existence of this commission is terminated entirely, we have made a very good compromise.

I want to say, in addition, by the conference agreement the Senate yields $1,134,658 and the House agrees to $820,061. The addition made by the Senate to the House bill was only $1,954,719. So that the managers on the part of the House feel that they secured a fair settlement with the other branch of the legislative department on their proposed increases to our bill.

I now move the adoption of the conference report.

The question was taken, and the conference report was agreed to.

ENROLLED BILLS SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolutions of the following titles, when the Speaker signed the same:

H. R. 23973. An act for the relief of pensioners of the Metropolitan police fund;

H. R. 12512. An act for the relief of persons who sustained damage by explosion near Frankfort Arsenal, Philadelphia;

H. R. 4168. An act to carry out the findings of the Court of Claims in the case of James A. Paulk;

H. R. 3622. An act for the relief of John D. McLain;

H. R. 1549. An act granting a pension to Lela L. Ellis;

H. R. 16696. An act for the relief of the estate of Peter McEnery, deceased;

H. R. 2950. An act for the relief of certain officers of the United States Signal Corps;

H. R. 15603. An act for the relief of John W. Wood;

H. R. 12712. An act for the relief of the estate of Samuel J. Rogers;

H. R. 21029. An act for the relief of James W. Sears;

H. J. Res. 225. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton memorial in Washington, D. C.; and

H. J. Res. 261. Joint resolution authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America in the year 1912.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 2982. An act to codify, revise, and amend the penal laws of the United States;

S. 9402. An act for the relief of John H. Layne;

S. 8822. An act providing for the relinquishment by the United States of certain land to the county of Kootenai, in the State of Idaho;

S. 8379. An act for the relief of the owners of British steamship *Maroa;*

S. 7859. An act for the relief of Parsey O. Burrough;

S. 6055. An act to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia;

S. 5905. An act for the relief of the executors of the estate of Harold Brown, deceased;

S. 4426. An act for the relief of Thomas C. Clark;

S. 3810. An act for the relief of Howard B. Carpenter:

S. 3164. An act to correct the military record of Paul Sinock;

S. 2544. An act for the relief of William Martinson; and

S. 671. An act to construct a road along the south bank of Anacostia River.

RECESS.

Mr. PAYNE. Mr. Speaker, I move that the House do now take a recess until 10 o'clock.

The motion was agreed to; and accordingly (at 1 o'clock and 3 minutes a. m.) the House was declared in recess.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

A letter from the Superintendent of the Capitol Building and Grounds, transmitting preliminary report relating to underground transportation between the Capitol and certain other public buildings (H. Doc. No. 1499)—ordered to be printed as a House document with illustrations.

A letter from the president of the Board of Commissioners of the District of Columbia, transmitting the report of the excise board for the fiscal year ended October 31, 1908 (S. Doc. No. 755)—to the Committee on the District of Columbia and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. LANDIS, from the Committee on Printing, to which was referred the bill of the House (H. R. 28247) to codify, revise, and amend the laws relating to the public printing and binding and the distribution of public documents, reported the same with amendment, accompanied by a report (No. 2308), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. COLE, from the Committee on Territories, to which was referred the bill of the Senate (S. 8058) authorizing the Attorney-General to appoint as special peace officers such employees of the Alaska school service as may be named by the Secretary of the Interior, reported the same with amendment, accompanied by a report (No. 2310), which said bill and report were referred to the Committee of the Whole House.

ADVERSE REPORTS.

Under clause 2 of Rule XIII, adverse reports were delivered to the Clerk and laid on the table, as follows:

Mr. MILLER, from the Committee on Claims, to which was referred the bill of the Senate (S. 5252) to provide for the payment of certain moneys advanced by the States of Virginia and Maryland to the United States Government to be applied toward erecting public buildings for the Federal Government in the District of Columbia, reported the same adversely, accompanied by a report (No. 2318), which said bill and report were laid on the table.

Mr. MUDD, from the Committee on Expenditures in the Department of Justice, to which was referred the resolution of the House (H. Res. 430) requesting the Attorney-General to inform the House relative to the fees received by officers, clerks, attorneys, and special counsel in the Department of Justice beyond the salaries fixed by law, reported the same adversely, accompanied by a report (No. 2309), which said resolution and report were laid on the table.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. RODENBERG: A bill (H. R. 28436) conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in claims of the Sac and Fox Indians of the Mississippi in Oklahoma against the United States—to the Committee on Indian Affairs.

By Mr. HITCHCOCK: A bill (H. R. 28439) to increase the revenues—to the Committee on Ways and Means.

By Mr. McDERMOTT: Resolution (H. Res. 608) requesting the Secretary of Commerce and Labor to investigate concerning moving-picture machines, etc.—to the Committee on the Judiciary.

By the SPEAKER: Memorial of the legislature of South Dakota, praying for a reduction of the duty on wool—to the Committee on Ways and Means.

Also, memorial of the legislature of Wisconsin, praying for certain improvements in Shiloh Military Park—to the Committee on Military Affairs.

Also, memorial of the legislature of Kansas, praying for the retention of the pension agency at Topeka, Kans.—to the Committee on Appropriations.

Also, memorial of the legislature of Oregon, praying for the establishment of forest reserves in the eastern Appalachian Mountains—to the Committee on Agriculture.

Also, memorial of the legislature of Oregon, praying for legislation for the conservation of the national resources—to the Committee on Agriculture.

Also, memorial of the legislature of Oregon, praying for appropriations to provide for the instruction in forestry in agricultural colleges—to the Committee on Agriculture.

Also, memorial of the legislature of Oregon, praying for legislation regulating the shipment of intoxicating liquors between the States and Territories—to the Committee on the Judiciary.

Also, memorial of the legislature of Oregon, praying for the removal of the duty on burlap—to the Committee on Ways and Means.

By Mr. ESCH: Memorial of the legislature of Wisconsin, asking for the enactment of a law creating a volunteer retired list—to the Committee on Military Affairs.

By Mr. WEISSE: Memorial of the legislature of Wyoming, relating to creating forest reserves—to the Committee on the Public Lands.

Also, memorial of the legislature of Wyoming, relating to homestead laws—to the Committee on the Public Lands.

By Mr. CARY (by request): Memorial of the legislature of Wisconsin, concerning the enactment of a law creating a volunteer retired list—to the Committee on Military Affairs.

By Mr. SULLOWAY: Memorial of the legislature of New Hampshire, favoring passage of bill for the establishment of national forest reserves in the White Mountain region—to the Committee on Agriculture.

By Mr. HUMPHREY of Washington: Memorial of the legislature of Washington, concerning the creation of a national park in the Olympic Forest Reserve—to the Committee on the Public Lands.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. LANGLEY: A bill (H. R. 28437) granting a pension to James Crum—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28438) granting a pension to Frank Risner—to the Committee on Pensions.

Also, a bill (H. R. 28440) granting an increase of pension to George F. Gose—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER: Memorials of the child-labor committee of Los Angeles, Cal.; the Gurley Memorial Presbyterian Church, of Washington, D. C.; Mary A. Goodman and 9 others, of Hartford, Conn.; Joseph W. Malone and 20 others, of Brooklyn, N. Y.; R. G. Oliver and 19 others, of Hartford, Conn.; and Clarkson N. Fowler and 32 other citizens of Connecticut, praying for legislation to mitigate the evils of child labor—to the Committee on the Judiciary.

Also, memorial of Waldron (Ark.) Council, Order United American Mechanics, praying for legislation to exclude Asiatics from the United States—to the Committee on Foreign Affairs.

Also, memorial of the Illinois Daughters of the American Revolution, praying for legislation to provide for retaining the wall at Fort Massac—to the Committee on Appropriations.

Also, petition of T. L. Cleveland and 10 other members of Union Grange, of Winnebago County, Ill., praying for federal aid in the construction of national highways—to the Committee on Agriculture.

Also, memorial of Danville (Ill.) Lodge, Benevolent and Protective Order of Elks, praying for the establishment of a reservation in Wyoming for the care and maintenance of the American elk—to the Committee on the Public Lands.

Also, memorial of Honolulu Harbor, No. 54, of Honolulu, Hawaii, praying for the passage of the so-called "Hayes bill," in relation to the merchant marine—to the Committee on the Merchant Marine and Fisheries.

Also, memorial of the Cairo Commercial Club, praying for legislation to improve the inland waterways—to the Committee on Rivers and Harbors.

Also, memorial of the Raymond Shingle Weavers' Union, of Raymond, Wash., protesting against the sentence of Samuel Gompers and others by the federal courts—to the Committee on the Judiciary.

Also, memorial of the Federated Trades Council of Waukesha, Wis., protesting against the sentence by the federal court of Samuel Gompers, John Mitchell, and others—to the Committee on the Judiciary.

Also, memorial of the W. A. Jordan Company, of Galesburg, Ill., and other firms, corporations, and individuals in the United States, praying for the reduction of the duty on raw and refined sugars—to the Committee on Ways and Means.

Also, petition of George M. Cohan, Samuel H. Harris, and Victor Moore, members of "The Talk of New York" dramatic company, asking removal of duty on costumes—to the Committee on Ways and Means.

By Mr. ASHBROOK: Petition of Western Engineers' Society of Western Pennsylvania, for appropriation for geological testing station at Pittsburg—to the Committee on Appropriations.

Also, petition of J. T. Miller & Sons, of Millersburg, Ohio, for a maximum and minimum tariff on flour, the minimum 25 per cent at least below the present duty—to the Committee on Ways and Means.

Also, petition of Perry Peck and others, of Licking County, Ohio, against reduction of tariff on wool—to the Committee on Ways and Means.

By Mr. BARTLETT of Georgia: Petition of wholesale grocers of Macon, Ga., asking reduction of tariff on sugar—to the Committee on Ways and Means.

By Mr. BURLEIGH: Petition of Maurice L. Adams, of Clinton, Me., favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. BURNETT: Petitions of the Presbyterian Church of Guntersville, the Methodist Episcopal Church of Union Springs, the Baptist Church of Union Springs, and the Methodist Episcopal Church of Collinsville, all in the State of Alabama, favoring legislation against shipments of intoxicants into prohibition States—to the Committee on the Judiciary.

By Mr. BURTON of Delaware: Petition of the Benevolent and Protective Order of Elks, requesting passage of bill for establishment of a reserve in Wyoming—to the Committee on the Public Lands.

By Mr. BUTLER: Petition of Edwin D. Solenberger, chairman of a mass meeting in borough hall, Lansdowne, Pa., favoring H. R. 24148, for federal bureau for children—to the Committee on Expenditures in the Interior Department.

By Mr. DRAPER: Petition of the American Institute of Architects, asking the creation of a bureau of arts and public buildings—to the Committee on Public Buildings and Grounds.

By Mr. FORNES: Petition of the American Institute of Architects, of New York City, favoring a bureau of arts and public buildings—to the Committee on Public Buildings and Grounds.

By Mr. FRENCH: Petition of citizens of Nampa, Parma, Weiser, and Meriden, Idaho, favoring an interstate liquor law subjecting liquor to control of laws of the State into which it is shipped—to the Committee on Interstate and Foreign Commerce.

Also, petition of citizens of Potlatch, Idaho, against the removal of the duty on lumber—to the Committee on Ways and Means.

By Mr. FULLER: Petition of American Protective Tariff League, favoring a permanent tariff commission—to the Committee on Ways and Means.

Also, petition of United Confederate Veterans of New Orleans, for amendment of the Hepburn law, for free transportation for members of the Grand Army of the Republic and the United Confederate Veterans—to the Committee on Interstate and Foreign Commerce.

Also, petition of the Providence (R. I.) Public Library, to place imported books and papers on the free list—to the Committee on Ways and Means.

Also, petition of E. A. Smith, president of Cairo Commercial Club, favoring the passage of a liberal river and harbor bill—to the Committee on Rivers and Harbors.

Also, petition of Public Library of the District of Columbia, favoring the Tacoma Park branch library bill (H. R. 11758)—to the Committee on the District of Columbia.

Also, petition of the National Pocahontas Memorial Association of New York City, against S. 4453, for a Pocahontas monument—to the Committee on the Library.

By Mr. GARDNER of Michigan: Petition of the Benevolent and Protective Order of Elks, creating a reserve for care of American elks in Wyoming—to the Committee on the Public Lands.

By Mr. GOEBEL: Petition of Phœnix Council, No. 85, Junior Order United American Mechanics, of Cincinnati, Ohio, favoring enactment of an effective Asiatic exclusion law—to the Committee on Immigration and Naturalization.

By Mr. GOULDEN: Petition of the American Institute of Architects, of New York City, favoring a bureau of arts and public buildings—to the Committee on Public Buildings and Grounds.

By Mr. HAMILTON of Michigan: Petition of Grange No 338, of Allegan County, Mich., favoring parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. HINSHAW: Petition of citizens of Geneva, Nebr., favoring a national highways commission—to the Committee on Agriculture.

By Mr. HOUSTON: Paper to accompany bill for relief of Burkett F. Starnes (H. R. 24539)—to the Committee on Invalid Pensions.

Also, papers to accompany H. R. 28390, granting an increase of pension to William Davis—to the Committee on Invalid Pensions.

By Mr. HOWELL of New Jersey: Petition of the National Consumers' League, urging that the work of Doctor Wiley may not be hampered—to the Committee on Interstate and Foreign Commerce.

By Mr. HUBBARD of West Virginia: Petition of George M. Snook & Co., of Wheeling, W. Va., for reduction of duty on gloves—to the Committee on Ways and Means.

By Mr. KNAPP: Petition of citizens of Woodville, N. Y., favoring the enactment of a parcels-post law—to the Committee on the Post-Office and Post-Roads.

Also, petition of citizens of Ellisburg, N. Y., against enactment of Sunday-rest legislation—to the Committee on the District of Columbia.

By Mr. LOUD: Petition of citizens of Arenac County, Mich., against passage of Senate bill 3940—to the Committee on the District of Columbia.

By Mr. McKINNEY: Petition of residents of the Fourteenth Congressional District of Illinois—to the Committee on Ways and Means.

By Mr. MANN: Petition of the Woman's Republican Club of New York City, indorsing work of Dr. Harvey Wiley—to the Committee on Interstate and Foreign Commerce.

Also, petition of Chicago (Ill.) Lodge, No. 4, Benevolent and Protective Order of Elks, for reservation for the care of the American elk—to the Committee on the Public Lands.

Also, petition of the Cairo Commercial Club, for legislation to improve inland waterways—to the Committee on Rivers and Harbors.

Also, petition of the American Protective Tariff League, against a permanent nonpartisan tariff commission—to the Committee on Ways and Means.

By Mr. NORRIS: Petition of residents of McCook, Nebr., against parcels-post and postal savings bank bills—to the Committee on the Post-Office and Post-Roads.

By Mr. PEARRE: Petition of Frostburg (Md.) Lodge, No. 470, Benevolent and Protective Order of Elks, favoring a reservation for the American elk and appropriation of $30,000 therefor (H. R. 21980)—to the Committee on the Public Lands.

By Mr. STURGISS: Petition of the Elkins Produce and Grocery Company, of Elkins; Grant Rinehart, of Lehigh; and E. J. Moran, of Tucker County, all in the State of West Virginia, favoring reduction of duty on raw and refined sugars—to the Committee on Ways and Means.

Also, petition of C. W. Thomian, of West Virginia, favoring reduction of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. SULZER: Petition of the New York Chapter of the American Institute of Architects, favoring the creation of a bureau of arts and public buildings—to the Committee on Public Buildings and Grounds.

By Mr. WILSON of Pennsylvania: Petition of Williamsport (Pa.) Lodges Nos. 193 and 173, Benevolent and Protective Order of Elks, for creation of American elk reservation in the State of Wyoming (H. R. 21980)—to the Committee on the Public Lands.

By Mr. WOOD: Petition of the King Confectionery Company, of Trenton, N. J., favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

SENATE.

[Legislative day of Wednesday, March 3, 1909.]

The Senate met at 9.30 o'clock a. m., Thursday, March 4, 1909, on the expiration of the recess.

The PRESIDING OFFICER [Mr. GALLINGER in the chair]. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the amendment of the Senate to the joint resolution (H. J. Res. 235) concerning and relating to the treaty between the United States and Russia.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to bill (H. R. 28245) making appropriations for the sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes.

The message further announced that the House had passed the joint resolution (S. R. 140) to create a joint committee to consider the revision and codification of the laws of the United States.

The message also announced that the House had passed the bill (S. 7785) relative to outward alien manifests on certain vessels, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 6183. An act granting to the Siletz Power and Manufacturing Company a right of way for a water ditch or canal through the Siletz Indian Reservation, in Oregon; and

H. R. 19607. An act to authorize the Secretary of Commerce and Labor to cooperate, through the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries, with the fish commissioner of the State of North Carolina in making surveys of the waters of North Carolina where fishing is prohibited by law.

RECESS.

Mr. HALE. The House will not be in session until 10 o'clock. I move that the Senate take a recess until half past 10 o'clock.

Mr. SMITH of Michigan. I ask the Senator to modify his motion, so that the Senate may meet at 10.

Mr. HALE. I will modify it, and move that the Senate take a recess until 10 o'clock.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Maine—that the Senate take a recess until 10 o'clock.

The motion was agreed to; and at the expiration of the recess (at 10 o'clock a. m.) the Senate reassembled.

ALIEN MANIFESTS ON VESSELS.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 7785) relative to outward alien manifests on certain vessels, which was, in line 4, to strike out "twenty-seventh" and insert "twentieth."

Mr. KEAN. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. KEAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened.

WHITE MOUNTAIN FOREST RESERVE.

The PRESIDING OFFICER [Mr. GALLINGER] presented a concurrent resolution of the legislature of New Hampshire, which was referred to the Committee on Forest Reservations and the Protection of Game and ordered to be printed in the RECORD, as follows:

Whereas the legislature of 1903–1905 recommended and supported legislation toward the establishment of national forest reserves; and

Whereas the Weeks bill now pending in Congress provides for the purchase of forest lands of any watershed in the United States, to be paid for by money received from existing national forest lands at the rate of $1,000,000 for the next fiscal year and $2,000,000 yearly thereafter for nine years; and

Whereas the said Weeks bill provides for federal aid to those States which have an effective forest fire service:

Resolved by the senate (the house of representatives concurring), That the legislature of the State of New Hampshire hereby approves of all provisions tending to the establishment of national forest reserves in the White Mountain region and federal aid for an effective forest fire service;

That the State will cooperate with the Federal Government in the accomplishment of the purposes proposed by said bill now pending in Congress and favors its early enactment;

That our Senators and Representatives in Congress be urged to favor said proposed legislation and use all honorable action thereon; and

That a copy hereof be sent to the Speaker of the House of Representatives and to each member of the New Hampshire congressional delegation.

A true copy. Attest:

M. W. FITZPATRICK, *Clerk.*

OLYMPIC FOREST RESERVE.

Mr. PILES presented a joint memorial of the legislature of Washington, which was referred to the Committee on Forest Reservations and the Protection of Game and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF WASHINGTON,
OFFICE OF THE SECRETARY OF STATE.

I, Sam H. Nichols, secretary of state of the State of Washington, do hereby certify that I have carefully compared the annexed copy of house joint memorial No. 5, passed at the eleventh regular session of the legislature of the State of Washington, relative to the establishment of a national park in the Olympic Forest Reserve, with the original enrolled copy of said memorial now on file in this office and find the same to be a full, true, and correct copy of said original, and of the whole thereof, together with all official indorsements thereon.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Washington. Done at the capitol, at Olympia, this 26th day of February, A. D. 1909.

[SEAL.]

SAM H. NICHOLS,
Secretary of State.

House joint memorial 5.

To the honorable Senate and House of Representatives of the United States:

Your memorialists, the members of the eleventh legislative session, assembled in the State of Washington, respectfully present that Quinault Lake is one of the most beautiful and attractive in the State of Washington and in the entire Northwest; that it is within easily accessible distance of the future metropolis which civic energy and natural advantages are rapidly creating on the shores of Grays Harbor; that the shores of said lake are all included in the Olympic Forest Reserve and the Quinault Indian Reservation.

Wherefore, and in order that this lake and a portion of its shores, together with the adjacent forest and landscape, may forever remain in their virgin beauty and grandeur, a resort of pleasure and pride to posterity, and a memorial to those resolute pioneers who have pushed the western frontier to the shores of the Pacific, your memorialists do respectfully petition that that portion of the Olympic Forest Reserve indicated in the accompanying map, which is herewith made a part of this memorial, be created a national park under whatever name shall seem to your honorable bodies most fitting, said proposed park being more particularly described as follows:

That portion of the Olympic Forest Reserve which comprises sections 19, 20, 29, and 30, T. 23 N., R. 9 W., Chehalis County, Wash., containing 1,322.55 acres, more or less.

The secretary of state is hereby directed to immediately transmit a certified copy of this memorial to His Excellency the President of the United States of America and to each of the Senators and Representatives in Congress from the State of Washington.

Passed by the house January 27, 1909.

Passed by the senate February 5, 1909.

SILETZ INDIAN RESERVATION.

The PRESIDING OFFICER. The Chair lays before the Senate a bill from the House of Representatives.

The bill (H. R. 6183) granting to the Siletz Power and Manufacturing Company a right of way for a water ditch or canal through the Siletz Indian Reservation, in Oregon, was read the first time by its title.

Mr. FULTON. That is a local bill. I ask unanimous consent for its present consideration.

The PRESIDING OFFICER. The bill will be read for the information of the Senate.

The bill was read the second time at length, as follows:

Be it enacted, etc., That the right of way is hereby granted, as hereinafter set forth, to the Siletz Power and Manufacturing Company, a corporation organized and existing under the laws of the State of Oregon, and its successors and assigns, for the construction, operation, and maintenance of a water ditch or canal through the lands of the United States in the Siletz Indian Reservation, in Oregon, beginning at a point on the right bank of the Siletz River, in lot 13 of section 9, township 10 south, range 10 west of Willamette meridian; running thence in a northeasterly direction through said section and terminating at a point on the right bank of the Siletz River, in lot 30 of section 4, township 10 south, range 10 west of Willamette meridian: *Provided*, That no rights hereunder shall attach until the Secretary of the Interior shall have determined to his satisfaction that the interests of the Indians and the public will be promoted thereby.

SEC. 2. That the right of way hereby granted shall be 50 feet in width on each side of the central line of such water ditch or canal.

SEC. 3. That before the grant of such right of way shall become effective, a map showing the definite location of such water ditch or canal must be filed with and approved by the Secretary of the Interior, and the company shall make payment to the Secretary of the Interior for the benefit of the allottees of full compensation for such right of way through their allotments, including all damage to their improvements and lands, and for damage to lands reserved for agency purposes, which compensation shall be determined and paid under the direction of the Secretary of the Interior in such manner as he may prescribe: *Provided further*, That the Siletz Power and Manufacturing Company, its successors or assigns, where not otherwise provided, shall, at its own expense, construct and maintain sufficient and suitable bridges across the water ditch or canal the right of way for which is hereby granted at the crossing of public roads, and be designated by the county court of the county in which they may be, failing in which the rights herein granted shall be forfeited.

SEC. 4. That the rights herein granted shall be forfeited by said corporation unless the water ditch or canal shall be constructed through the said lands within three years from the passage of this act.

SEC. 5. It is hereby expressly provided that Congress may at any time alter, amend, or repeal this act.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SURVEYS OF NORTH CAROLINA WATERS.

The bill (H. R. 19607) to authorize the Secretary of Commerce and Labor to cooperate, through the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries, with the fish commissioner of the State of North Carolina in making surveys of the waters of North Carolina where fishing is prohibited by law was read the first time by its title.

Mr. OVERMAN. I ask unanimous consent that the bill be put on its passage. It is recommended by the Secretary of Commerce and Labor and it is recommended by the Fish Commission here.

Mr. KEAN. Is it not rather dangerous legislation?

Mr. OVERMAN. It is simply to authorize the Government here to cooperate with the fish commissioner of the State of North Carolina in making some surveys of waters in that State. The bill has passed the House.

Mr. KEAN. I should like to hear the report read.

Mr. OVERMAN. Here is the report. I will hand it to the Senator.

The PRESIDING OFFICER. The bill will be read for the information of the Senate.

The bill was read the second time at length, as follows:

Be it enacted, etc., That the Secretary of Commerce and Labor be, and he is hereby, authorized and directed, upon the request of the governor of the State of North Carolina, to designate such officers, experts, and employees of the Bureau of the Coast and Geodetic Survey and of the Bureau of Fisheries as may be necessary to cooperate with the North Carolina state fish commissioner in making a survey of and marking in a prominent manner all those areas of the waters of the sounds and their tributaries of the State in which the use of any or all fishing appliances are prohibited by law; and the Secretary of Commerce and Labor is hereby authorized and directed to furnish to the officers, experts, and employees of said bureaus so detailed as aforesaid such instruments, appliances, and steam launches as may be necessary to make the survey aforesaid; and the Secretary of Commerce and Labor is hereby authorized to have made in the Bureau of the Coast and Geodetic Survey all the plats necessary to show the results of the aforesaid survey, and to furnish to the fish commissioner of the State of North Carolina such copies as may be necessary for his use, and for this purpose to employ in the District of Columbia and elsewhere such technically qualified persons as may be necessary to carry out the purposes of this act.

SEC. 2. That the Secretary of Commerce and Labor is hereby further authorized to have erected or constructed by the officers so detailed as aforesaid, while making said survey, such structures as may be necessary to mark in a prominent and satisfactory manner the points of triangulation so that the same may be used for such future work of the Coast and Geodetic Survey as the said bureau may be hereafter required to perform in prosecuting the government coast survey of the navigable waters of the United States located within the State of North Carolina.

SEC. 3. That this act shall take effect from the date of its passage.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MARTHA E. WEST.

Mr. CLAPP. I am directed by the Committee on Claims, to whom was referred the bill (H. R. 3674) for the relief of Mrs. M. E. West, to report it favorably without amendment. I ask unanimous consent for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to refer to the Court of Claims the claim of $1,500 of Martha E. West, for lumber composing a sawmill and taken in 1865 by United States troops in the Sioux Indian war in Minnesota and used for the construction of a stable, for adjudication on principles upon which claims were paid by the commission under the act of Congress of February 16, 1863.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RECESS.

Mr. HALE. I move that the Senate take a recess until 11 o'clock.

The motion was agreed to; and (at 10 o'clock and 12 minutes a. m.) the Senate took a recess until 11 o'clock a. m., when it reassembled.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had receded from its disagreement to the amendments of the Senate to the bill (H. R. 26203) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1910, and for other purposes.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and resolutions, and they were thereupon signed by the Vice-President:

S. 671. An act to construct a road along the south bank of Anacostia River;

S. 2544. An act for the relief of William Martinson;

S. 3164. An act to correct the military record of Paul Sinock;

S. 3810. An act for the relief of Howard B. Carpenter;

S. 4426. An act for the relief of Thomas C. Clark;

S. 5905. An act for the relief of the executors of the estate of Harold Brown, deceased;

S. 6055. An act to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia;

S. 7859. An act for the relief of Parsey O. Burrough;

S. 8379. An act for the relief of the owners of the British steamship *Maroa;*

S. 8822. An act providing for the relinquishment by the United States of certain lands to the county of Kootenai, in the State of Idaho;

S. 9402. An act for the relief of John H. Layne;

S. 1163. An act to correct the naval record of Peter H. Brodie, alias Patrick Torbett;

S. 1752. An act to reimburse Garrett R. Bradley, late postmaster at Tonopah, Nev., for money expended for clerical assistance;

S. 2489. An act for the relief of Harry G. Rupp;

S. 3452. An act for the relief of Joseph Schrembs;

S. 3526. An act to amend section 876 of the Revised Statutes;

S. 3952. An act to restore to the active list of the United States Marine Corps the name of Robert Morgan Gilson;

S. 4035. An act to provide for the payment of certain claims against the District of Columbia in accordance with the act of Congress approved January 26, 1897, and as amended July 19, 1897;

S. 4103. An act authorizing the Secretary of the Interior to ascertain the amount due O bah baum, and pay the same out of the fund known as "For the relief and civilization of the Chippewa Indians;"

S. 5349. An act for the relief of Madison County, Ky.;

S. 5510. An act for the relief of the owners of the tug *Juno;*

S. 6373. An act waiving the statute of limitations as to the claim of the Nestler Brewing Company, and authorizing the Commissioner of Internal Revenue to adjudicate the same;

S. 6852. An act for the relief of Walter F. Rogers, executor of the estate of Sarah Edwards, late owner of lot No. 116, square No. 628, Washington, D. C., with regard to assessment and payment of damages on account of changes of grade due to construction of the Union Station, District of Columbia;

S. 7782. An act for the relief of James H. Owen;

S. 7785. An act relative to outward alien manifests on certain vessels;

S. 7861. An act for the relief of B. D. Crocker;

S. 8429. An act to refund certain tonnage taxes and light dues levied on the steamship *Montara* without register;

S. 8518. An act empowering the juvenile court of the District of Columbia to issue execution on forfeited recognizances;

S. 8555. An act to relinquish the interest of the United States in and to certain land in Dade County, Fla., to John M. Bryan, jr.;

S. 8588. An act to amend an act entitled "An act for the relief of Dewitt Eastman," approved January 8, 1909;

S. 8839. An act for the removal of restrictions from the third selection or allotment of lands selected by William J. Scott, a minor member of the Osage tribe of Indians, and for other purposes;

S. 8929. An act withdrawing from entry and sale and granting unto the city of Los Angeles, in the State of California, certain lands therein described;

H. R. 1549. An act granting a pension to Lela L. Ellis;

H. R. 2950. An act for the relief of certain officers of the United States Signal Corps;

H. R. 3622. An act for the relief of John D. McLain;

H. R. 4168. An act to carry out the findings of the Court of Claims in the case of James A. Paulk;

H. R. 12512. An act for the relief of persons who sustained damage by explosion near Frankford Arsenal, Philadelphia;

H. R. 12712. An act for the relief of the estate of Samuel J. Rogers;

H. R. 15603. An act for the relief of John W. Wood;

H. R. 16696. An act for the relief of the estate of Peter McEnery, deceased;

H. R. 23973. An act for the relief of pensioners of the Metropolitan police fund;

H. R. 1072. An act for the relief of the legal representatives of Sewell Coulson, deceased;

H. R. 23464. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 23468. An act to amend sections 11 and 12 of an act entitled "An act to provide for eliminating certain grade crossings on the line of the Baltimore and Potomac Railway Company in the city of Washington, D. C., and requiring said company to depress and elevate its tracks and to enable it to relocate parts of its railroad therein, and for other purposes," approved February 12, 1901;

H. R. 25980. An act for the relief of Sarah J. Fowler;

H. R. 28192. An act to amend and consolidate the acts respecting copyright;

H. R. 28245. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 28376. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes;

H. R. 3674. An act for the relief of Mrs. M. E. West;

H. R. 26203. An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 6183. An act granting to the Siletz Power and Manufacturing Company a right of way for a water ditch or canal through the Siletz Indian Reservation, in Oregon;

H. R. 19607. An act to authorize the Secretary of Commerce and Labor to cooperate, through the bureau of the Coast and Geodetic Survey and the Bureau of Fisheries, with the fish commissioner of the State of North Carolina in making surveys of the waters of North Carolina where fishing is prohibited by law;

H. R. 24864. An act to provide for the distribution of the CONGRESSIONAL RECORD and public bills, documents, etc., to the governor-general of the Philippine Islands at Manila, P. I.;

S. R. 105. Joint resolution for the purpose of more fully carrying into effect the convention concluded at Brussels on March 15, 1886, in reference to the exchange of official journals, etc.;

S. R. 119. Joint resolution authorizing the Secretary of War to award gold medals to Orville Wright and Wilbur Wright;

S. R. 140. Joint resolution to create a joint committee to consider the revision and codification of the laws of the United States; and

H. J. Res. 235. Joint resolution concerning and relating to the treaty between the United States and Russia.

STATEMENT OF RECEIPTS AND EXPENDITURES.

Mr. CULBERSON. Mr. President, I desire to submit a statement of receipts and expenditures of the Government for the past seven years. I do not intend under the circumstances to read this statement, or to ask that it be read at the desk, nor do I intend to make any lengthy comment upon it. I will say, however, generally that the expenditures as estimated by the Secretary of the Treasury for 1910 are exceptionally large, and that the increase each year has seemed to me to be abnormal.

As illustrating that, I will state that the expenditures estimated for 1910 exceed those of 1903, the first year for the expenditures of which the present administration is responsible, by more than $328,000,000, or an increase of about 51 per cent. The estimated expenditures for 1910, as made by the Secretary of the Treasury, exceed those of 1902, the last year for which the McKinley administration was fully responsible for expenditures, more than $375,000,000, or an increase of about 63 per cent in eight years.

With this general statement, Mr. President, I ask that the statement which I send to the desk may be printed in the RECORD.

The VICE-PRESIDENT. Without objection, it is so ordered.

The statement referred to is as follows:

Total revenues and expenditures for the years named, as shown by the reports of the Secretary of the Treasury.

1903.

Revenues	$694,621,117.64
Expenditures	640,323,450.28
Surplus	54,297,667.36

1904.

Revenues	684,214,373.74
Expenditures	725,984,945.65
Deficit	41,770,571.91

The sum of $50,164,500 was paid this year on the Panama Canal. Aside from this amount expenditures increased for the year more than $35,000,000 over the previous year.

1905.

Revenues	$697,101,269.95
Expenditures	720,105,498.55
Deficit	23,004,228.60

Three million nine hundred and eighteen thousand eight hundred and nineteen dollars and eighty-three cents was paid this year on the Panama Canal. It will be observed that, omitting the Panama Canal expenditures for 1904 and 1905, all other expenditures for 1905 exceeded those of 1904 more than $40,000,000 and those of 1903 more than $75,000,000.

1906.

Revenues	$762,386,904.62
Expenditures	736,717,582.01
Surplus	25,669,322.61

The sum of $19,379,373.71 was paid this year on the Panama Canal. Omitting all expenditures for the canal, it will be seen that expenditures for all other purposes for 1906 were $1,151,529.58 greater than for 1905, and about $77,000,000 greater than for 1903. Including the canal expenditures, it is found that the total expenditures for 1906 are more than $16,000,000 greater than for 1905, about $9,000,000 greater than for 1904, the year when the extraordinary expenditure of $50,000,000 was made for the canal, and more than $96,000,000 larger than in 1903.

1907.

Revenues	$846,725,339.62
Expenditures	762,488,753.32
Surplus	84,236,586.30

Twenty-seven million one hundred and ninety-eight thousand six hundred and eighteen dollars and seventy-one cents was spent this year on the Panama Canal. Omitting the canal expenditures, it is found that total expenditures for all other purposes for 1907 were $17,951,926.31 greater than for 1906 and $94,966,684.33 more than for 1903. Including the canal expenditures, the total for 1907 was $25,771,171.31 more than for 1906, $42,383,254.77 more than for 1905, $36,503,807.67 more than for 1904, and $122,165,303.04 more than for 1903, or an aggregate increase of total expenditures for the four years over 1903 of $226,823,536.79, and, omitting total canal expenditures of $100,661,312.25, an aggregate increase of $126,162,224.54 over 1903.

1908.

Revenues	$792,604,781.94
Expenditures	850,674,983.09
Deficit	58,070,201.15

In this year Panama Canal expenditures were $38,093,425.29. Omitting such expenditures for both years, the total expenditures for all other purposes were $77,291,423.19 larger in 1908 than in 1907, and $172,258,107.52 more than for 1903. Including disbursements for the canal, the expenditures for 1908 were $88,186,227.77 more than for 1907 and $210,351,530.81 more than for 1903.

1909 (estimated).

Revenues	$788,796,956.00
Expenditures	902,796,956.00
Deficit	114,000,000.00

This is $52,121,972.91 more than the expenditures for 1908 and $262,473,503.72 more than for 1903.

1910 (estimated).

Revenues	$825,340,712.00
Expenditures	968,387,508.01
Deficit	143,046,796.01

This expenditure is $65,590,552.01 greater than the estimated total expenditure for 1909 and $328,064,055.73 more than the total expenditure for 1903, or an increase in governmental expenditures in seven years of more than 51 per cent.

The total receipts and expenditures for 1902, the last full year of the administration of President McKinley, were as follows:

Receipts	$684,326,280.47
Expenditures	593,038,904.90
Surplus	91,287,375.57

It will thus be seen that the expenditures of the last year of the administration of President Roosevelt exceed those of the last year of President McKinley $375,348,603.11, or an increase of more than 63 per cent.

Mr. CULBERSON. At the suggestion of the Senator from Georgia [Mr. CLAY] I ask that the additional statement which I send to the desk be also printed in connection with the statement with reference to expenditures.

The VICE-PRESIDENT. Without objection, it is so ordered.

The statement referred to is as follows:

Title.	Appropriations 1898.	Appropriations 1909.	Appropriations 1910, as passed Senate.
Agricultural	$3,182,902.00	$11,672,106.00	$13,075,716.00
Army	23,129,344.30	95,382,247.61	102,636,050.34
Diplomatic and consular	1,695,308.76	3,538,852.72	3,646,586.67
District of Columbia	6,186,991.06	10,001,888.85	12,089,872.16
Fortifications	9,517,141.00	9,316,745.00	8,320,111.00
Indian	7,674,120.89	9,253,347.87	11,439,128.00
Legislative	21,690,766.90	32,832,913.50	32,326,984.00
Military Academy	479,572.83	845,634.87	2,541,421.33
Naval	33,003,234.19	122,663,885.47	137,035,199.05
Pension	141,263,880.00	163,053,000.00	160,908,000.00
Post-office	53,611,783.38	111,958,088.23	138,744,564.93
Sundry civil	95,665,338.75	222,970,892.00	234,453,370.00
River and harbor			9,435,750.00
Total	397,100,384.06	793,489,602.12	866,974,628.48
Deficiencies	10,557,417.34	56,702,309.06	20,933,493.27
Miscellaneous	999,057.90	4,011,337.26	2,000,000.00
Total	408,656,859.30	854,203,248.44	899,918,121.75
Permanent, specific, and indefinite appropriations	120,078,220.00	154,194,295.12	160,096,082.52
Grand total	528,735,079.30	1,008,397,543.56	1,060,014,204.27

NATIONAL WATERWAYS COMMISSION.

The VICE-PRESIDENT. The Chair announces the appointment of the following Senators as members of the commission created by the act for the improvement of rivers and harbors: The Senator from New Hampshire, Mr. GALLINGER; the Senator from Washington, Mr. PILES; the Senator from Michigan, Mr. SMITH; the Senator from North Carolina, Mr. SIMMONS; and the Senator from Arkansas, Mr. CLARKE.

JOINT COMMITTEE ON THE REVISION OF THE LAWS.

The VICE-PRESIDENT appointed Mr. HEYBURN, Mr. SUTHERLAND, Mr. PILES, Mr. TELLER, and Mr. OWEN members on the part of the Senate of the Joint Committee on the Revision of the Laws.

INAUGURAL CEREMONIES.

Mr. KNOX submitted the following resolution (S. Res. 323), which was considered by unanimous consent and agreed to.

Resolved, That the inaugural ceremonies of the President and Vice-President take place in the Senate Chamber immediately after the organization of the Senate, instead of at the east portico as heretofore ordered.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. M. C. Latta, one of his secretaries, announced that the President had approved and signed the following acts:

On March 2, 1909:

S. 9422. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors;

S. 9242. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to the widows and dependent and helpless relatives of such soldiers and sailors;

S. 9454. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors;

S. 9067. An act to grant pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and dependent relatives of said soldiers;

S. 8654. An act for the relief of certain occupants of unsurveyed public lands in Craighead County, Ark.; and

S. 6074. An act to provide for holding sessions of the United States circuit and district courts at Springfield, Mass.

On March 3, 1909:

S. 8554. An act authorizing the Secretary of the Interior to sell part or all of the surplus lands of members of the Kaw or Kansas and Osage tribes of Indians in Oklahoma, and for other purposes;

S. 9373. An act to provide for the sale of isolated tracts of public land in Imperial County, Cal.;

S. 9006. An act to amend an act authorizing the Washington, Spa Springs and Gretta Railroad Company of Maryland to enter the District of Columbia, approved February 18, 1907;

S. 5729. An act to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D of the Twenty-fifth U. S. Infantry who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof;

S. 8058. An act authorizing the Attorney-General to appoint as special peace officers such employees of the Alaska school service as may be named by the Secretary of the Interior;

S. 8187. An act to change the name of the Washington Hospital for Foundlings;

S. 8520. An act requiring reports of the Hospital for Foundlings to be made to the Commissioners of the District of Columbia;

S. 8899. An act granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war and to certain widows and dependent relatives of such soldiers and sailors;

S. 9278. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors; and

S. 9421. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors. such soldiers and sailors.

On March 4, 1909:

S. 7640. An act to extend the time for the completion of a bridge across the Missouri River at Yankton, S. Dak., by the Yankton, Norfolk and Southern Railway Company.

SENATE BILLS AND JOINT RESOLUTIONS RECEIVED AND APPROVED AT THE CAPITOL THE MORNING OF MARCH 4, 1909.

S. 671. An act to construct a road along the south bank of the Anacostia River;

S. 1163. An act to correct the naval record of Peter H. Brodie, alias Patrick Torbett;

S. 1752. An act to reimburse Garrett R. Bradley, late postmaster at Tonopah, Nev., for money expended for clerical assistance;

S. 2489. An act for the relief of Harry G. Rupp;

S. 2982. An act to codify, revise, and amend the penal laws of the United States;

S. 3452. An act for the relief of Joseph Schrembs;

S. 3810. An act for the relief of Howard B. Carpenter;

S. 3952. An act to restore to the active list of the United States Marine Corps the name of Robert Morgan Gilson;

S. 4035. An act to provide for the payment of certain claims against the District of Columbia in accordance with the act of Congress approved January 26, 1897, and as amended July 19, 1897;

S. 4103. An act authorizing the Secretary of the Interior to ascertain the amount due O bah baum, and pay the same out of the fund known as "For the relief and civilization of the Chippewa Indians;"

S. 5349. An act for the relief of Madison County, Ky.;

S. 5510. An act for the relief of the owners of the tug *Juno;*

S. 5905. An act for the relief of the executors of the estate of Harold Brown, deceased;

S. 6055. An act to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia;

S. 6373. An act waiving the statute of limitations as to the claim of the Nestler Brewing Company, and authorizing the Commissioner of Internal Revenue to adjudicate the same;

S. 7782. An act for the relief of James H. Owen;

S. 7785. An act relative to outward alien manifests on certain vessels;

S. 7861. An act for the relief of B. D. Crocker;

S. 8379. An act for the relief of the owners of the British steamship *Maroa;*

S. 8518. An act empowering the juvenile court of the District of Columbia to issue execution on forfeited recognizances;

S. 8555. An act to relinquish the interest of the United States in and to certain land in Dade County, Fla., to John M. Bryan, jr.;

S. 8822. An act providing for the relinquishment by the United States of certain lands to the county of Kootenai, in the State of Idaho;

S. 8929. An act withdrawing from entry and sale and granting unto the city of Los Angeles, in the State of California, certain lands therein described;

S. R. 105. Joint resolution for the purpose of more fully carrying into effect the convention concluded at Brussels on March 15, 1886, in reference to the exchange of official journals, etc.;

S. R. 119. Joint resolution authorizing the Secretary of War to award gold medals to Orville Wright and Wilbur Wright; and

S. R. 140. Joint resolution to create a joint committee to consider the revision and codification of the laws of the United States.

NOTIFICATION TO THE PRESIDENT.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the Speaker of the House had appointed Mr. TOWNSEND, Mr. SCOTT, and Mr. CLARK of Missouri, members of the committee on the part of the House to join a similar committee on the part of the Senate to wait upon the President of the United States and inform him that the two Houses have completed the business of the present session and are ready to adjourn.

Mr. CULLOM submitted the following resolution (S. Res. 324), which was considered by unanimous consent and agreed to.

Resolved, That a committee of two Senators be appointed by the Vice-President to join a similar committee appointed by the House of Representatives to wait upon the President of the United States and inform him that the two Houses, having completed the business of the present session, are ready to adjourn unless the President has some other communication to make to them.

The VICE-PRESIDENT appointed Mr. CULLOM and Mr. TELLER members of the committee on the part of the Senate.

Subsequently Mr. CULLOM and Mr. TELLER, the committee appointed on the part of the Senate to wait upon the President of the United States, appeared, and

Mr. CULLOM said: Mr. President, the committee appointed on the part of the Senate to wait upon the President in conjunction with a similar committee of the House have performed that duty, and the President stated to the committee that he had no further communication to make.

THANKS TO THE VICE-PRESIDENT.

Mr. CULBERSON. Mr. President, I submit a resolution and ask unanimous consent for its present consideration.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The Senator from Texas submits a resolution, which will be read.

The resolution (S. Res. 325) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the thanks of the Senate are hereby tendered to Hon. CHARLES W. FAIRBANKS, Vice-President of the United States and President of the Senate, for the dignified, impartial, and courteous manner in which he has presided over its deliberations during the present session.

GUESTS OF THE SENATE.

At 11 o'clock and 43 minutes a. m. the ambassadors of and ministers plenipotentiary from foreign countries were announced and occupied the seats provided for them. They were soon followed by the Chief Justice and associate justices and officers of the Supreme Court.

The Members of the House of Representatives, preceded by the Speaker, Clerk, and Sergeant-at-Arms, entered the Senate Chamber. The Speaker was given a seat on the right of the Vice-President, the Clerk occupied a seat at the Secretary's desk, the Sergeant-at-Arms near him, and the Members of the House took the seats on the floor assigned them.

The Vice-President-elect (JAMES S. SHERMAN, of New York) was announced, and was escorted by Mr. LODGE to a seat on the right of the Vice-President.

The President, Theodore Roosevelt, of New York, and the President-elect, William H. Taft, of Ohio, were announced and escorted by Mr. KNOX and Mr. LODGE, of the Joint Committee of Arrangements, to seats in the space in front of the Secretary's desk, the members of the joint committee of the two Houses occupying seats on either side of them.

The heads of the executive departments, the Chief of Staff of the Army and his aid, the Admiral of the Navy and his aid, and the other invited guests of the Senate occupied seats on the floor of the Senate.

ADMINISTRATION OF OATH TO VICE-PRESIDENT-ELECT.

The VICE-PRESIDENT administered the oath of office prescribed by law to the Vice-President-elect.

ADDRESS OF VICE-PRESIDENT FAIRBANKS.

The hour of 12 o'clock meridian having arrived, Vice-President FAIRBANKS said:

Senators: Again a new administration succeeds to the control of national affairs in conformity with the will of the people, expressed in their sovereign capacity, under the orderly processes of the law. We witness the impressive transference of national power in accordance with their will deliberately recorded, with increased respect for our institutions. We indulge the fervent hope that the administration which assumes authority under such agreeable auspices will meet in full measure our national needs; that we may continue in happy accord with the powers of the world; that peace, contentment, and progress may prevail throughout our borders, and that our country may grow in material strength; and more than that and better than that, that education, morality, justice, and patriotism, which are our chief sources of pride, may continue to increase among our people.

It now becomes my duty to take final leave of you; and in doing so I beg to return to you my profoundest thanks for the resolution which you have just adopted, personal to myself. To receive a vote of your approval without division is an honor which I shall carry with me to the end of my days and transmit to my children as a priceless legacy.

In these latter days much severe criticism is heard of the Senate of the United States, but it has always been so since the time of our fathers, and that it will continue I have no doubt. The record of the Senate, to which its present membership has contributed, is made and is beyond recall. I know of none better made by any legislative assembly anywhere. In my judgment it will stand comparison with the record of the Senate in its elder days. It has been written by men learned in the science of government, inspired by as patriotic purposes as actuated their illustrious predecessors.

The Senate of the United States must remain an important part of a thoroughly independent, coordinate branch of the Government, neither arrogating to itself functions not devolved upon it under the Constitution, nor, upon the other hand, subtracting from its legitimate powers. Its legislative duties are vast, while its duties with respect to treaties and appointments to the public service are of very great moment. A servile Senate was not contemplated by its founders. The Senate is to-day as jealous as ever of its proper dignities and its just powers and as worthy as ever of the popular respect and confidence.

It requires no gift of prophecy to foretell that many varied and complex questions will come here for solution in the not very distant future—questions which will have a potential bearing upon the very structure of republican government and an important influence upon our social and industrial systems. To you who shall remain, and to your successors, the country will look, and I believe it will look with confidence, for a solution which will be in harmony with the genius of American institutions and which will comport with our best national interest.

The Senate, it is sometimes said, is not always responsive to the popular will. Such assumption is erroneous, judging by the record of legislation accomplished. The will of the people finds utterance in the public law in due course; not that will which is the unreasoning passionate expression of the moment, but that will which is the fruit of deliberate, intelligent reflection.

The Senate of the United States was designed by our fathers to be a deliberative chamber in the fullest and best sense—a chamber where the passions of the hour might be arrested and where the better judgment of the people would find ultimate expression. Those who in their unreflecting moments would sweep it away would overturn one of the strongest safeguards of our political fabric.

I can not sever the personal ties which have been formed here without deep emotion. I am your grateful debtor for countless courtesies and kindnesses, and to your generous assistance and thoughtful forbearance I am indebted for whatever success may have attended my efforts as President of the Senate.

It gives me pleasure to acknowledge the very great assistance which the Chair has always received from the officers of the Senate and from these efficient, faithful gentlemen at the desk.

For the able and distinguished citizen who has been chosen by the people to succeed me I bespeak that considerate and effective support which you have given to me.

I wish for you each many years of strength and devotion to the interests of our common country, whose welfare and whose honor you have sought to safeguard and advance with ceaseless vigilance and unvarying fidelity.

Under the operation of law we have reached the close of the Sixtieth Congress, and it becomes the duty of the Chair to declare the Senate adjourned without day.

HOUSE OF REPRESENTATIVES.

THURSDAY, *March 4, 1909.*

[*Continuation of legislative day of Tuesday, February 23, 1909.*]

The recess having expired, the House (at 10 o'clock a. m.) resumed its session and was called to order by the Speaker.

GRANTING CERTAIN LANDS TO LOS ANGELES, CAL.

Mr. McLACHLAN of California. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8929) withdrawing from entry and sale and granting unto the city of Los Angeles, in the State of California, certain lands therein described.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, empowered and directed to cause to be issued to the city of Los Angeles, in Los Angeles County, State of California, a patent to all of the land designated "Dry Salt Lake," embraced within the meandered lines thereof and lying within the exterior lines surrounding sections 28, 29, and 33, in township 32 south, range 34 east, Mount Diablo base and meridian containing 251.11 acres, as designated on the plat of survey of said township made in the year 1855 and approved by the surveyor-general of California on May 14, 1856, situate in Kern County, in said State, upon payment by said city to the United States therefor of the sum of $2.50 per acre, which lands have heretofore been withdrawn from entry and sale for the benefit of said city, and which withdrawal shall remain intact pending the entry of the land by said city: *Provided*, That said city shall first procure from all claimants or persons who have filed or made valid claims, locations, or entries on or to said lands, or any part thereof, proper relinquishments of all their claims thereto, and cause the same to be filed in the proper land office: *And provided further*, That said patent shall also contain the provision that all right, title, and interest of the United States in and to any lands in said sections 28, 29, and 33 not heretofore disposed of or conveyed are hereby granted, released, and relinquished to said city.

The SPEAKER. Is there objection?

Mr. SLAYDEN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from California for some explanation of this.

Mr. McLACHLAN of California. The bill in brief is this: The city of Los Angeles is building waterworks; they take the water from about 220 miles north of the city of Los Angeles, and in order to get cement to build the aqueduct it built its own cement works and bought a ranch of about 3,000 acres up in the mountains for that purpose. They supposed that they owned the whole area included in this ranch, but when they came to investigate the title they found that no patent had ever been issued to what is called "Dry Lake," in the center of this tract of land. The bill provides that they shall pay $2.50 an acre for the land contained in this dry lake.

Mr. GOULDEN. What is the real value of it?

Mr. McLACHLAN of California. I do not know that anybody knows.

Mr. GOULDEN. Is it mineral land?

Mr. McLACHLAN of California. There is a cement deposit in the bottom of the lake; that is what they are using it for. The city of Los Angeles has constructed a plant of its own, costing three or four hundred thousand dollars, to manufacture its own cement to be used in the construction of its waterworks.

Mr. SLAYDEN. I do not doubt the enterprise of the people of Los Angeles, and I commend them for it, but what I want to know is whether we are letting them have land at $2.50 an acre that may be worth $250 an acre.

Mr. McLACHLAN of California. It is worth nothing, because it is a dry lake. The city of Los Angeles owns all the territory around it, and it is a grave question whether they do not own that too.

Mr. SLAYDEN. The dry land where the borax deposit is would be utterly worthless except for the borax.

Mr. McLACHLAN of California. There is a question whether or not the city, by virtue of its owning all the land around it, does not own this too. The Interior Department questions whether the city does not own it, but in order to clear up any doubt about it we introduced this bill.

Mr. GOULDEN. How many acres are there in the tract?

Mr. SMITH of California. One hundred and fifty acres.

Mr. GOULDEN. How much in the total?

Mr. McLACHLAN of California. There are about 3,000 acres in the whole ranch that the city purchased.

Mr. SLAYDEN. Does the city of Los Angeles expect to hold this in perpetuity and for the public benefit?

Mr. McLACHLAN of California. I suppose so. It was purchased for that purpose.

Mr. BARTLETT of Georgia. Is there anything in the bill that prevents its sale to private people by the city?

Mr. McLACHLAN of California. I think not.

Mr. SABATH. What you desire is to vest the title in the city?

Mr. McLACHLAN of California. Yes.

Mr. OLLIE M. JAMES. I would like to ask the gentleman a question. Does the Secretary of the Interior approve of this bill?

Mr. McLACHLAN of California. He does.

Mr. MACON. Is it the unanimous report of the committee?

Mr. McLACHLAN of California. Yes; it was passed by the Senate, and is the unanimous report from the Committee on Public Lands.

Mr. SLAYDEN. I withdraw objection.

The bill was ordered to be read the third time, was read the third time, and passed.

On motion of Mr. McLACHLAN of California, a motion to reconsider the last vote was laid on the table.

THE BOLL WEEVIL.

Mr. RANSDELL of Louisiana. Mr. Speaker, I ask unanimous consent to print in the RECORD a letter from Dr. S. A. Knapp in regard to the boll weevil, accompanied by some maps and explanatory remarks.

The SPEAKER. The gentleman from Louisiana asks unanimous consent to extend in the RECORD the matter referred to. Is there objection?

There was no objection.

Mr. RANSDELL of Louisiana. Mr. Speaker, I have received from Dr. S. A. Knapp, director of the Farmers' Cooperative Demonstration Work of the Department of Agriculture, a very interesting letter about the effect of the rainfall upon the boll weevil in Louisiana and Mississippi, accompanied by explanatory charts prepared by the United States Weather Bureau. The information contained in this letter, which seems to be borne out by the charts, is very encouraging to the cotton growers of the valley States. We have been told that our greater rainfall would make cotton raising more difficult than in Texas, but Doctor Knapp shows that, while we have more rain than Texas, a greater percentage of it falls in the winter, when it is very injurious to the weevil, rather than helpful, and that our spring and summer rains and sunshine are about the same as in eastern Texas, where cotton is raised successfully in spite of the boll weevil.

The letter, with accompanying charts, which are self-explanatory, are attached and will repay careful perusal.

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF PLANT INDUSTRY,
Washington, D. C., February 27, 1909.

Hon. JOS. E. RANSDELL, M. C.,
Washington, D. C.

DEAR SIR: At our conference day before yesterday you called my attention to the general alarm in Louisiana in regard to the future production of cotton, owing to the boll weevil, and I stated to you frankly my view of the subject. These alarming reports have been based upon one argument, and that is that there is a greater rainfall in Louisiana than in Texas and less sunshine, and this would greatly promote the multiplication of the weevils and decrease the probability of making a successful crop.

With this view I totally disagree and beg to state that it is not sustained by facts. It is true that the winter precipitation in Louisiana and Mississippi is greater than that in Texas, excepting a very small portion, perhaps not larger than one or two counties in east Texas. But winter precipitation has been proven to be deleterious to the survival of the weevil. It will be recalled that in the winter of 1904 and 1905 the boll weevil was practically exterminated in Cameron Parish, and the reason assigned by the crop-pest commission of Louisiana was the great precipitation in that parish. It is also a well-known fact that after wet, cold winters there is very little trouble with the weevil the following year. This also accords with good common sense. If the cotton lands are plowed in the fall or early winter, it is not believable that the boll weevil can lie in water during the winter for three months and then survive to pester the farmer during the following year. And further, it should be recalled that the cotton section of the valleys of Louisiana and Mississippi are mainly free from timber, while the timbered portions are the back lands, where the weevil would find its hibernating place under water a good share of the winter.

Another point should be made that if the history of cotton production in Louisiana be examined for the last fifty years it will be found that just as great variations existed prior to the advent of the weevil as since, but in those former years the smaller crops were charged to other causes, such as the weather, the overflow, the boll worm, caterpillar, etc. Now, for some reasons, every decline in the crop is charged to the boll weevil.

Furthermore, the opinion held by some that cotton can not be made successfully in Louisiana and Mississippi under boll-weevil conditions on account of the greater annual precipitation is not based on good evidence, for the Weather Bureau shows that this greater precipitation is mainly in the winter, and in the crucial months for the crop—April, May, and June—the rainfall in a large portion of the cotton-producing territory of Texas, say from a line about Dallas and the Brazos River on the west, and in Louisiana, and extending to the Atlantic Ocean, is equal, generally ranging from 12 to 15 inches for the three months. Different sections may vary in different years, but in an average of twenty-six years it was practically the same. The Weather Bureau further shows that in the same period of time the rainfall for July, August, and September in almost the entire cotton belt, excepting the Atlantic coast region and the extreme southern portion of Alabama and Georgia, is practically the same.

Another factor in the weevil problem is the amount of sunshine. The same authority quoted shows that for a period of twenty-six years the annual sunshine in the entire cotton-producing territory of the South is practically the same, though it may vary from year to year, but on the average of twenty-six years it is equal. Inasmuch as Louisiana and Mississippi have more rainfall in the winter than Texas, it would appear that it has less sunshine during the winter months, and consequently must have more sunshine in the months of April, May, June, July, August, and September. As far as we have looked over the Weather Bureau statistics this contention seems to be correct, and we are having maps made up to prove or disprove this claim.

It would therefore appear, from all the evidence at our command, that it will be fully as easy to produce a profitable crop of cotton in average years in Louisiana and Mississippi as in Texas. The greatest impediment in the way of future production is the alarm, the withdrawal of capital, and the exodus of labor. Every effort should be put forth by our people to allay this excitement and hold the labor to the lands which they have cultivated.

It is not intended here to minimize in any way the real injury done by the weevil, but I doubt whether it is a more serious pest in average years than others that have attacked the cotton plant in the past. It is, however, more constant.

Respectfully, yours,

S. A. KNAPP,
Special Agent in Charge.

DESCRIPTION OF CHARTS.

CHART 1.—*Showing normal precipitation (inches) for first quarter, January, February, and March, covering the period from 1871 to 1895, inclusive.*

	Inches.
* Zone 1	Over 15
Zone 2	12 to 15
Zone 3	9 to 12
Zone 4	6 to 9
Zone 5	3 to 6

* By zone is meant that the precipitation during the period named is practically the same on an average during the twenty-five years in the zone, but there may be an excess in any location for a given year, or the reverse.

CHART 2.—*Showing normal precipitation (inches) for second quarter, April, May, and June, covering a period from 1871 to 1895, inclusive.*

	Inches.
* Zone 1	Over 15
Zone 2	12 to 15
Zone 3	9 to 12
Zone 4	6 to 9
Zone 5	3 to 6

* By zone is meant that the precipitation during the period named is practically the same on an average during the twenty-five years in the zone, but there may be an excess in any location for a given year, or the reverse.

CHART 3.—*Showing normal precipitation (inches) for third quarter, July, August, and September, covering the period from 1871 to 1895, inclusive.*

	Inches.
* Zone 1	Over 15
Zone 2	12 to 15
Zone 3	9 to 12
Zone 4	6 to 9

* By zone is meant that the precipitation during the period named is practically the same on an average during the twenty-five years in the zone, but there may be an excess in any location for a given year, or the reverse.

CHART 4.—*Showing normal annual sunshine, covering the period from 1871 to 1894, inclusive.*

	Per cent.
* Zone 1	50 to 40
Zone 2	60 to 50
Zone 3	70 to 60

* By zone is meant that the sunshine during the period named is practically the same on an average during the twenty-four years in the zone, but there may be an excess in any location for a given year, or the reverse.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed without amendment bills of the following titles:

H. R. 19607. An act to authorize the Secretary of Commerce and Labor to cooperate through the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries with the fish commissioner of the State of North Carolina in making surveys of the waters of North Carolina where fishing is prohibited by law;

H. R. 3674. An act for the relief of Mrs. M. E. West; and

H. R. 6183. An act granting to the Siletz Power and Manufacturing Company a right of way for a water ditch or canal through the Siletz Indian Reservation in Oregon.

LEAVE TO PRINT.

By unanimous consent leave was granted—

To Mr. OLLIE M. JAMES, to extend remarks in the RECORD upon the interstate and foreign commerce law.

To Mr. GRAHAM, on the ship-subsidy bill.

PENSION APPROPRIATION BILL.

Mr. KEIFER. Mr. Speaker, I submit a conference report on the pension appropriation bill (H. R. 26203).

The Clerk read as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26203) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have been unable to agree.

J. WARREN KEIFER,
WASHINGTON GARDNER,
E. J. BOWERS,
Managers on the part of the House.

HENRY E. BURNHAM,
CHARLES CURTIS,
ROBT. L. TAYLOR,
Managers on the part of the Senate.

Mr. KEIFER. Mr. Speaker, it is due to the House, and perhaps due to the conferees on the part of the House, to say that this conclusion of the conferees seemed to be all that could be agreed upon. There was no substantial difference in the conference committee as to two or three amendments. Some of the amendments put on the bill by the Senate are increases of appropriations amounting to about $200,000 over the amount carried in the original House bill, and they are incident to the matter of continuing all the 18 existing pension agencies, and if they are to be continued, those amendments are not objectionable, and there may be a deficiency at the end of the next fiscal year.

There is a small amendment that is of no great importance. It is amendment No. 1, which provides for the continuance of the payment of pensions to widows who have had pensions allowed them on account of helpless children. That does not involve very much, and the conferees agreed to that, so far as it was concerned.

But the main question was upon the matter of appropriating for the continuance of the pension agents. The House bill, as it was reported from the Committee on Appropriations, and as it passed the House, appropriated for but one pension agent's salary, and appropriated in other respects in view of the fact that the agencies would be reduced.

It will be remembered that in February, 1907, Congress authorized the Secretary of the Interior to make an investigation and report to Congress on the subject of the continuance of the agencies as they then existed. There were then 18; there are still 18.

That report was made in favor of discontinuing all of the agencies except one. In the last session we had this controversy. Some of us believed then and believe now that it is inequitable to continue agencies, some of which cost 77 to 80 cents a pensioner, to pay the pensions, whereas in some others the expense of payment is less than 40 cents a pensioner. An investigation shows that if there was a consolidation into large agencies or into one agency the probabilities are that we would save from $350,000 to $500,000 per annum in the matter of paying pensions. This is not a time for useless and unnecessary expenditures, if there is such a time.

Your conferees, representing the vote of the House in the last session and this, adhered to that proposition, but they were willing to accept a proposition that the President should be authorized to make investigations and, wherever it was found to be in the interest of economy, to discontinue an agency. They were willing that should be done.

I will not go into what was said in conference, but it was claimed on the part of the Senate conferees that we ought at least to report a bill that would require the President to discontinue one of the two agencies in the State of Pennsylvania and one of the two agencies in the State of New York.

The conferees on the part of this House thought that was illogical and not reasonable, because each of the agencies that would be discontinued pay about three times as much money out per annum to pensioners and about three times as many pensioners as some other agencies that were not to be touched. Your conferees thought this proposition was unfair and discriminating. So we could not agree upon that.

We did the best we could and failed at the last, after frequent and long conferences by day and by night, and we are compelled to bring the matter up to the House.

The House should understand that these agencies are not, in the opinion of some of us, established with reference to the convenience of pensioners, because there are 31 States in this Union neither of which has a pension agency in it.

The Knoxville agency pays the pensioners of ten States. The Topeka agency pays the pensioners of the States of Colorado, Kansas, Missouri, and Oklahoma and the Territory of New Mexico. The San Francisco agency pays the pensioners of eight States, California, Oregon, and Washington (the Pacific States), and Wyoming, Idaho, Nevada, Montana, Utah, and the Territories of Arizona and Hawaii, the Philippines, Guam, and the Samoan Islands.

So it is not a question of convenience of the pensioner in each of some of the smallest States where small agencies now exist. I wish only to say that upon inquiry we find no complaint in that vast region of the West where the pensioners of many States are paid from one agency and where they live remotely from their paying agencies.

There is no complaint that pensioners are not paid promptly in the States of Wyoming, Montana, and Idaho, and others located 1,500 or 2,000 miles from San Francisco, from which agency they are paid, and as promptly as they are paid in the State of New Hampshire or in the State of Maine, or in San Francisco.

So, not being able to reach any satisfactory conclusion, we come back to the House to let the House act upon the question as it may seem best, and take the responsibility. The conferees of the House have regarded themselves instructed by its previous votes on the agency question involved. I do not think we should assume to defeat the bill.

Mr. MANN. Will the gentleman yield for a question?

Mr. KEIFER. Certainly I will.

Mr. MANN. Are any of the Senate amendments especially objectionable, leaving out of consideration for the moment the consolidation of the pension agencies?

Mr. KEIFER. I think not, if we are to appropriate for all the agencies. If we do not, the amendments appropriate too much money.

Mr. MANN. If we should recede and concur to the Senate amendment as to the agencies, would it be perfectly proper to concur to the other Senate amendments?

Mr. KEIFER. I think so. I think that is right.

Mr. MANN. The gentleman and the conferees have done all the service that can be done in reference to the abolishment of the pension agencies. Is there anything left under the usage of the two bodies except for the House to recede from its proposition to change the law?

Mr. KEIFER. The only other thing that is left is to defeat this bill and allow the matter to come up in the next session—the Sixty-first Congress, soon to assemble.

Mr. MANN. Does the gentleman think that the attitude of the Senate would be any different at the special session than it is at the present time?

Mr. KEIFER. I think so, but at the same time I am not going to urge my objection. I only wanted to state this much in justification of the action of the conferees who were instructed, as we understood by the votes of the House, to stand where they did; but we were willing to concede that there should be no reduction of agencies and to appropriate all the money these amendments proposed, provided the President was authorized—and that was the proposition we had before us and agreed on at one time—to investigate and determine whether it was in the interest of economy to continue these agencies and to abolish such as were found unnecessary and such as, in the interest of economy, should be required to be discontinued.

Mr. MANN. Will the gentleman yield for a suggestion?

Mr. KEIFER. Certainly.

Mr. MANN. I think, Mr. Speaker, the conferees are entitled to the thanks of the House for the work they have done. I have always voted with the gentleman to abolish the agencies, and I think it is time now to pass this pension bill.

Mr. SCOTT. Mr. Speaker——

Mr. KEIFER. Mr. Speaker, I yield to the gentleman from Kansas for the purpose only of allowing him to offer a motion, and then I desire to yield to my colleagues on the conference committee.

Mr. SCOTT. Mr. Speaker, I move to recede and concur in the Senate amendments.

The SPEAKER. The gentleman from Kansas moves that the House do recede from its disagreement to the Senate amendments and concur in the same.

Mr. GARDNER of Michigan. Mr. Speaker, I desire to offer the following amendment, which I send to the desk.

Mr. KEIFER. Mr. Speaker, I do not believe it is proper to offer an amendment at this time with the other motion pending.

The SPEAKER. Does the gentleman from Kansas or the gentleman from Ohio yield? The effect of this amendment of the gentleman from Michigan [Mr. GARDNER], if it is agreed to, would be to send the bill back to the Senate at this hour—a quarter before 11 o'clock.

Mr. SCOTT. Mr. Speaker, I did not yield any of my parliamentary rights in the matter.

Mr. KEIFER. Mr. Speaker, I think the gentleman from Michigan will withdraw his amendment. I yield to him now for five minutes.

The SPEAKER. Does the gentleman insist upon his amendment?

Mr. GARDNER of Michigan. I withdraw the amendment for the present. Mr. Speaker, I think it is due to the House to say that for three years we have gone to the Senate with substantially the same proposition. We have met the members of the conference committees at every point, and they have never successfully met our contentions in the matter. They have said, in substance, "We do not want to and we will not concede anything; we care nothing for economy." They say, "We want these agencies, and we want them all." Now, that is the ultimatum, and I might just as well be plain about it. We have fought the ground over and over and over again with different conferees in three different sessions, and have come back to the House with that ultimatum every time—"We want the agencies and we are going to have them, and you can not help yourselves." That is the situation. To recede and concur means an absolute backdown on what the House has three different times said is the right position to take. The committee, Mr. Speaker, leaves it with the House.

Mr. KEIFER. Mr. Speaker, I think it is proper that the gentleman from Mississippi [Mr. BOWERS] should have an opportunity to say a word, and I yield to him for one minute.

Mr. BOWERS. Mr. Speaker, I merely desire to add my voice and sanction to what has just been said by the gentleman from Michigan [Mr. GARDNER]. The House has put itself on record three times in favor of this proposition. I can not believe that in view of all the circumstances attending this legislation any failure or delay with reference to this bill could be properly chargeable to this end of the legislative body, and I believe that if the House ever expects to impress its will with reference to this particular matter on the statute books of this country it has to be done by standing out, and standing out now. The right, reason, and justice of the case is with us, as all concede, and to these no gentleman on the other side of the conference has even attempted to reply.

The SPEAKER. The question is on the motion of the gentleman from Kansas that the House do recede and concur in the Senate amendment.

The question was taken, and the motion was agreed to.

MATE WILLIAM JENNEY, U. S. NAVY, RETIRED, AND OTHERS.

Mr. BURTON of Delaware. Mr. Speaker, I ask unanimous consent to print in the RECORD some remarks on the bill H. R. 17059.

The SPEAKER. The gentleman from Delaware asks unanimous consent to extend his remarks on the bill suggested. Is there objection? [After a pause.] The Chair hears none.

REPRINTING REPORT ON COPYRIGHT BILL.

Mr. CURRIER. Mr. Speaker, I ask unanimous consent to print as a House document 1,500 copies of House report 2222 on the copyright bill.

The SPEAKER. How many pages are there in the report?

Mr. CURRIER. There are 23 pages in the report.

The SPEAKER. Is it now printed? Why, the report is printed.

Mr. CURRIER. Yes; but the supply is almost exhausted now, and there will certainly be a demand for it.

The SPEAKER. The gentleman from New Hampshire asks unanimous consent to print additional copies of the report of the committee. Is that it?

Mr. MANN. Mr. Speaker, reserving the right to object, how many does the gentleman desire to print?

Mr. CURRIER. Fifteen hundred, I stated.

Mr. MANN. The gentleman might ask unanimous consent to have a reprint.

Mr. CURRIER. That might answer—the 900 that would give.

Mr. MANN. That would be within the precedents.

Mr. CURRIER. Very well; I will modify my request.

Mr. SULZER. Mr. Speaker, this is a very important matter, and I trust the request of the gentleman from New Hampshire will be granted.

The SPEAKER. The gentleman from New Hampshire asks unanimous consent for a reprint of the report on the bill indicated. Is there objection?

Mr. SHACKLEFORD. Mr. Speaker, I think this is an unnecessary expense and I shall object—Mr. Speaker, I misunderstood what it was; I withdraw my objection.

The SPEAKER. The gentleman from Missouri withdraws his objection, and it is so ordered.

WITHDRAWAL OF PAPERS.

Mr. HULL of Iowa. Mr. Speaker, I ask unanimous consent of the House to withdraw certain letters and petitions relating to the so-called "volunteer officers' bill" (H. R. 27313 and H. R. 28048), no action having been taken on them by the House.

Mr. MANN. For what purpose is this desired?

Mr. HULL of Iowa. It is at the request of the committee representing the officers.

Mr. MANN. For what purpose do they wish to withdraw them; what is the reason?

Mr. HULL of Iowa. The reason given to me is that they want to keep them. That is the only reason I know of. I can not see any value in them either to the House or to them.

Mr. MADDEN. Has the gentleman copies of them?

Mr. HULL of Iowa. No; there are no copies, but there are quite a number of them that can be given back.

Mr. MANN. I do not see any objection.

Mr. SULZER. Mr. Speaker, I hope the request of the gentleman will be granted.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

REMARKS ON THE LATE HON. DANIEL L. D. GRANGER.

Mr. CHANEY. Mr. Speaker, I desire to submit some remarks on the life of Hon. DANIEL L. D. GRANGER, recently a Member of this House from Rhode Island. I understand the privilege was requested by Mr. CAPRON, of Rhode Island, for Members to submit their remarks upon the life and death to be printed in the RECORD, but in order that I may be sure of it I ask permission to submit my remarks.

The SPEAKER. The Chair is informed permission has already been given.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolution of the following titles, when the Speaker signed the same:

H. R. 24864. An act to provide for the distribution of the CONGRESSIONAL RECORD and public bills, documents, etc., to the governor-general of the Philippine Islands at Manila, P. I.;

H. R. 1072. An act for the relief of the legal representatives of Sewell Coulson, deceased;

H. R. 28192. An act to amend and consolidate the acts respecting copyright;

H. R. 28245. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 28376. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes;

H. R. 23464. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 25980. An act for the relief of Sarah J. Fowler;

H. R. 23468. An act to amend sections 11 and 12 of an act entitled "An act to provide for eliminating certain grade crossings on the line of the Baltimore and Potomac Railway Company in the city of Washington, D. C., and requiring said company to depress and elevate its tracks and to enable it to re-

locate parts of its railroad therein, and for other purposes," approved February 12, 1901;

H. R. 19607. An act to authorize the Secretary of Commerce and Labor to cooperate, through the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries, with the fish commissioner of the State of North Carolina in making surveys of the waters of North Carolina where fishing is prohibited by law;

H. R. 6183. An act granting to the Siletz Power and Manufacturing Company a right of way for a water ditch or canal through the Siletz Indian Reservation, in Oregon;

H. R. 26203. An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 3674. An act for the relief of Mrs. M. E. West; and

H. J. Res. 235. Joint resolution concerning and relating to the treaty between the United States and Russia.

The SPEAKER announced his signature to enrolled bills and joint resolutions of the following titles:

S. 6373. An act waiving the statute of limitations as to the claim of the Nestler Brewing Company and authorizing the Commissioner of Internal Revenue to adjudicate the same;

S. 8929. An act withdrawing from entry and sale and granting unto the city of Los Angeles, in the State of California, certain lands therein described;

S. 1752. An act to reimburse Garrett R. Bradley, late postmaster at Tonopah, Nev., for money expended for clerical assistance;

S. 8839. An act for the removal of restrictions from the third selection or allotment of lands selected by William J. Scott, a minor member of the Osage tribe of Indians, and for other purposes;

S. 7785. An act relative to outward alien manifests on certain vessels;

S. 8555. An act to relinquish the interest of the United States in and to certain land in Dade County, Fla., to John M. Bryan, jr.;

S. 8518. An act empowering the juvenile court of the District of Columbia to issue execution on forfeited recognizances;

S. 8588. An act to amend an act entitled "An act for the relief of Dewitt Eastman," approved January 8, 1909;

S. 8429. An act to refund certain tonnage taxes and light dues levied on the steamship *Montara* without register;

S. 7861. An act for the relief of B. D. Crocker;

S. 7782. An act for the relief of James H. Owen;

S. 6852. An act for the relief of Walter F. Rogers, executor of the estate of Sarah Edwards, late owner of lot No. 116, square No. 628, Washington, D. C., with regard to assessment and payment of damages on account of changes of grade due to construction of the Union Station, District of Columbia;

S. 4035. An act to provide for the payment of certain claims against the District of Columbia in accordance with the act of Congress approved January 26, 1897, and as amended July 19, 1897;

S. 4103. An act authorizing the Secretary of the Interior to ascertain the amount due O bah baum, and pay the same out of the fund known as "For the relief and civilization of the Chippewa Indians;"

S. 2489. An act for the relief of Harry G. Rupp;

S. 1163. An act to correct the naval record of Peter H. Brodie, alias Patrick Torbett;

S. 3952. An act to restore to the active list of the United States Marine Corps the name of Robert Morgan Gilson;

S. 3526. An act to amend section 876 of the Revised Statutes;

S. 3452. An act for the relief of Joseph Schrembs;

S. 5349. An act for the relief of Madison County, Ky.;

S. 5510. An act for the relief of the owners of the tug *Juno;* and

S. R. 140. Joint resolution to create a joint committee to consider the revision and codification of the laws of the United States;

S. R. 119. Joint resolution authorizing the Secretary of War to award gold medals to Orville Wright and Wilbur Wright;

S. R. 105. Joint resolution for the purpose of more fully carrying into effect the convention concluded at Brussels on March 15, 1886, in reference to the exchange of official journals, etc.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills and joint resolutions:

H. R. 28376. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes;

H. R. 28245. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910; and for other purposes;

H. R. 1072. An act for the relief of the legal representatives of Sewell Coulson, deceased;

H. R. 24864. An act to provide for the distribution of the CONGRESSIONAL RECORD and public bills, documents, etc., to the governor-general of the Philippine Islands, at Manila, P. I.;

H. R. 23468. An act to amend sections 11 and 12 of an act entitled "An act to provide for eliminating certain grade crossings on the line of the Baltimore and Potomac Railway Company in the city of Washington, D. C., and requiring said company to depress and elevate its tracks and to enable it to relocate parts of its railroad therein, and for other purposes," approved February 12, 1901;

H. R. 25980. An act for the relief of Sarah J. Fowler;

H. R. 28192. An act to amend and consolidate the acts respecting copyright;

H. R. 23464. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 28411. An act to grant two cannons to Ohio Northern University, at Ada, Ohio;

H. R. 28304. An act granting certain obsolete ordnance for ornamental purposes;

H. R. 28059. An act making appropriations for the support of the Military Academy for the fiscal ending June 30, 1910, and for other purposes;

H. R. 21029. An act for the relief of James W. Sears;

H. R. 3622. An act for the relief of John D. McLain;

H. R. 6183. An act granting to the Siletz Power and Manufacturing Company a right of way for a water ditch or canal through the Siletz Indian Reservation, in Oregon;

H. R. 16696. An act for the relief of the estate of Peter McEnery, deceased;

H. R. 1549. An act granting a pension to Lela L. Ellis;

H. R. 2950. An act for the relief of certain officers of the United States Signal Corps;

H. R. 3674. An act for the relief of Mrs. M. E. West;

H. R. 4168. An act to carry out the finding of the Court of Claims in the case of James A. Paulk;

H. R. 12512. An act for the relief of persons who sustained damage by explosion near Frankford Arsenal, Philadelphia;

H. R. 12712. An act for the relief of the estate of Samuel J. Rogers;

H. R. 15603. An act for the relief of John W. Wood;

H. R. 19607. An act to authorize the Secretary of Commerce and Labor to cooperate, through the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries, with the fish commissioner of the State of North Carolina in making surveys of the waters of North Carolina where fishing is prohibited by law;

H. R. 23973. An act for the relief of pensioners of the Metropolitan police fund;

H. J. Res. 261. Joint resolution authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America in the year 1912;

H. J. Res. 225. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton memorial in Washington, D. C.; and

H. J. Res. 235. Joint resolution concerning and relating to the treaty between the United States and Russia.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President of the United States had approved and signed bills and joint resolutions of the following titles:

On March 2, 1909:

H. R. 27523. An act making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910;

H. R. 25823. An act to amend an act entitled "An act to extend the time for the completion of the Valdez, Marshall Pass and Northern Railroad, and for other purposes," approved February 21, 1907;

H. J. Res. 265. Joint resolution to rearrange and reconstruct the Hall of the House of Representatives, and for other purposes;

H. J. Res. 263. Joint resolution to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications;

H. R. 19655. An act providing for an additional judge for the southern district of New York, and for other purposes;

H. R. 15939. An act authorizing the Secretary of Commerce and Labor to exchange property;

H. R. 28175. An act to amend section 4434 of the Revised Statutes of the United States, and for other purposes;

H. R. 27061. An act to provide for the appointment of one additional district judge in and for the western district of Washington, and one additional district judge in and for the district of Oregon; and

H. R. 28305. An act to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State, and to detach it from the Fort Worth division of said court.

On March 3, 1909:

H. R. 8558. An act for the relief of R. J. B. Newcombe;

H. R. 21896. An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes;

H. R. 28243. An act to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes;

H. J. Res. 262. Joint resolution extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes;

H. R. 8661. An act for the relief of Richmond Light Infantry Blues, of Virginia;

H. R. 28055. An act to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa.;

H. R. 24835. An act authorizing the necessary resurvey of public lands;

H. R. 8947. An act for the relief of the Herman Andrae Electrical Company, of Milwaukee, Wis.;

H. R. 24834. An act for the protection of surface rights of entrymen;

H. R. 26916. An act making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1910;

H. R. 16743. An act for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes;

H. R. 5728. An act for the relief of James H. De Coster;

H. R. 25392. An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 26915. An act making appropriation for the support of the army for the fiscal year ending June 30, 1910;

H. R. 8545. An act for the relief of Jackson Pryor;

H. R. 24995. An act for the relief of Nathaniel Huntley;

H. R. 14290. An act for the relief of Ellis W. Joy;

H. R. 28193. An act to authorize the city of Shreveport to construct a bridge across Red River;

H. R. 27054. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes;

H. R. 9755. An act for the relief of Charles Lennig & Co.;

H. R. 21571. An act for the relief of John T. Freeman;

H. R. 7048. An act for the relief of Henry A. Tolbert;

H. R. 2911. An act for the relief of F. S. Jette & Son, of Savannah, Chatham County, Ga., for damage done to their wharf by U. S. dredge *Cumberland;*

H. R. 1622. An act for the relief of the estate of William J. Cussen;

H. R. 26394. An act making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 27926. An act to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River, in the State of Indiana;

H. R. 24327. An act to make Corry, Pa., a port of delivery in the district of Erie, Pa., and extending to it the privileges of section 7 of the act of June 10, 1880;

H. R. 27249. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors;

H. R. 27049. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 21492. An act to authorize the sale of certain public lands;

H. R. 23717. An act to extend the time for construction and beginning construction of the Alaska Short Line Railroad in Alaska;

H. R. 15755. An act for the relief of J. C. Haggard, of White County, Tenn.;

H. R. 28285. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 28046. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27974. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27469. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 28047. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors; and

H. R. 4286. An act for the relief of John Shull.

On March 4, 1909:

H. R. 23464. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 26203. An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 28059. An act making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 28245. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 28376. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes;

H. R. 1549. An act granting a pension to Lela L. Ellis;

H. R. 2950. An act for the relief of certain officers of the United States Signal Corps;

H. R. 3622. An act for the relief of John D. McLain;

H. R. 3674. An act for the relief of Mrs. M. E. West;

H. R. 4168. An act to carry out the findings of the Court of Claims in the case of James A. Paulk;

H. R. 12512. An act for the relief of persons who sustained damage by explosion near Frankford Arsenal, Philadelphia;

H. R. 15603. An act for the relief of John W. Wood;

H. R. 19607. An act to authorize the Secretary of Commerce and Labor to cooperate through the Bureau of the Coast and Geodetic Survey and the Bureau of Fisheries with the fish commissioner of the State of North Carolina in making surveys of the waters of North Carolina where fishing is prohibited by law;

H. R. 23468. An act to amend sections 11 and 12 of an act entitled "An act to provide for eliminating certain grade crossings on the line of the Baltimore and Potomac Railway Company in the city of Washington, D. C., and requiring said company to depress and elevate its tracks and to enable it to relocate parts of its railroad therein, and for other purposes," approved February 12, 1901;

H. R. 12712. An act for the relief of the estate of Samuel J. Rogers;

H. R. 21029. An act for the relief of James W. Sears;

H. R. 23973. An act for the relief of pensioners of the Metropolitan police fund;

H. R. 24864. An act to provide for the distribution of the CONGRESSIONAL RECORD and public bills, documents, etc., to the governor-general of the Philippine Islands at Manila, P. I.;

H. R. 25980. An act for the relief of Sarah J. Fowler;

H. R. 28192. An act to amend and consolidate the acts respecting copyrights;

H. R. 28304. An act granting certain obsolete ordnance for ornamental purposes;

H. R. 28411. An act to grant two cannons to Ohio Northern University, at Ada, Ohio;

H. R. 15681. An act for the relief of the Compañía de los Ferrocarriles de Puerto Rico;

H. R. 28167. An act to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public building acts, and for other purposes;

H. R. 27053. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910;

H. R. 21003. An act fixing the compensation of certain officials in the customs service, and for other purposes;

H. J. Res. 225. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton memorial in Washington, D. C.;

H. J. Res. 235. Joint resolution concerning and relating to the treaty between the United States and Russia; and

H. J. Res. 261. Joint resolution authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America in the year 1912.

STATEMENT OF APPROPRIATIONS.

Mr. TAWNEY. Mr. Speaker, I ask unanimous consent to make a brief statement to the House concerning the work of this session of Congress with respect to appropriations, and I also ask that my colleague on the committee, Mr. LIVINGSTON, may also have the same privilege.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. TAWNEY. Mr. Speaker, no legislative duty surpasses in importance or responsibility the duty of appropriating the revenues derived from taxes collected from the people to meet governmental expenditures. Never has the discharge of this duty been attended in the Congress of the United States with greater difficulties or more embarrassments than during the past few years. None has felt more keenly or perhaps suffered more, politically, because of the things that occasioned these difficulties and embarrassment in the matter of appropriations than the members of the committees of this House charged with the duty of determining in the first instance the actual money requirements of the public service. Notwithstanding this fact and the opposition of powerful executive and popular influences, these committees have conscientiously endeavored to discharge this most important legislative duty in the interest of the people, and to avoid, if possible, recommending to the House appropriations in excess of the normal revenues of the Government. If they have not at all times succeeded, their failure has not been due to any lack of desire or effort on their part to keep these appropriations within the estimated revenues and within the actual necessities of the public service.

In no period except in time of war have the expenditures of our National Government increased so rapidly, both in the aggregate and per capita, as these expenditures have increased during the past eight years. This fact may well prompt our people not only to pause and consider the cause of this very large increase in the annual expenditures of the Government, but also to consider the necessity of checking this growing tendency toward excess and of aiding their Representatives, who are charged with the duty of imposing no greater burdens of taxation to meet such expenditures than are necessary in order to carry on the legitimate functions of their Federal Government.

Appropriations for public expenditures are made upon estimates submitted by the executive departments of the Government at the beginning of each session of Congress. The aggregate amount of these estimates for appropriations during the past eight years, including the fiscal year 1910, equals the enormous sum of $7,291,341,806.29. Upon these estimates Congress has appropriated during that period the sum of $7,007,839,183.46, being $283,502,622.83 less than the amount estimated. The rapidity with which our national expenditures have been increasing during the period referred to is shown by the total appropriations for the fiscal year 1903, which were $796,633,864.79, and the total appropriations at this session for the fiscal year 1910, $1,044,014,298.23; the difference between the amount required for the public service eight years ago and the amount required now being $247,380,433.44.

The increase in national expenditures may be attributed to several causes, but the two primary causes leading to this result have been, first, the popular and executive demands upon Congress for appropriations from the Federal Treasury for the exercise of rights and functions belonging exclusively to the States, and, second, the abnormal and unnecessary war expenditures in time of peace. This I shall endeavor to prove later on in my remarks.

The fact that the estimates submitted by the executive departments of the Government for appropriations would, if allowed, largely exceed the revenues during this Congress and the preceding Congress was kept constantly before the respective Houses and before the country, but with no appreciable effect.

At the beginning of the first session of this Congress I called attention to the fact that the estimates for appropriations submitted at that session for the fiscal year 1909 exceeded the estimated revenues by $118,000,000, and that unless the House exercised the utmost care in considering the estimates and making appropriations for the public service and in authorizing new appropriations the deficit at the end of the fiscal year 1909 would equal $150,000,000. Notwithstanding the effort on the part of some of the Members of the House and Senate during that session—which effort was unsupported here and received no support from the executive branch of the Government or from the press of this country—the appropriations authorized and the new legislation enacted, necessitating appropriations beyond the amount originally estimated for, far exceed what was then foreseen or admitted by their advocates, and the result is that at the end of this fiscal year we shall have a deficit in the neighborhood of $150,000,000, or just about the amount which we then predicted.

The appropriations made at the last session of Congress were larger than those made in any previous session, and the appropriations carried in the several appropriation bills passed at this session of Congress are very considerably in excess of what they were at the last session. Yet in both sessions of Congress they are far below the amount estimated by the executive departments for public expenditures during both fiscal years.

The responsibility for this can not be charged to the Congress of the United States. If the estimates submitted during the past two or eight years had been appropriated for, and if the amounts proposed in bills introduced and demanded by public sentiment had passed, which amounts carried in bills now pending before this House exceed a half billion dollars, the deficit, instead of being in the neighborhood of $150,000,000, would exceed $500,000,000. Had it not been for the Congress and the conservative element in that body, we would have long since been meeting these enormously increased expenditures from the proceeds of the sale of bonds. That the people have thus far been saved from that unfortunate situation is not due to any effort or recommendation of the executive branch of the Government, but to the Congress of the United States.

The appropriations made at this session amount in all to $1,044,014,298.23. This sum includes $30,000,000 for redemption of national-bank notes out of deposits by banks for that purpose; $60,000,000 that may be applied to the sinking fund out of the Treasury surplus; and $20,262,829.69 deficiencies in appropriations for the current and prior years, expendable before the beginning of the next fiscal year. Deducting these three amounts from the whole sum of appropriations leaves $933,751,468.54 to be considered as a proposed charge against revenues of the ensuing fiscal year 1910.

The estimated requirements of the Government recommended by the executive departments on which the appropriations of this session are based amounted to $1,103,387,508.01, or the sum of $59,373,209.78 more than the appropriations.

As passed by the House the regular annual supply bills were increased by the Senate only $11,786,905.01, a sum considerably less than the increases proposed by that body at any session within ten years past, a fact more surely indicative of the unfavorable conditions of the Treasury than any other sign of the times. Of this total increase proposed by the Senate, the House secured a reduction by discussion in conference of $5,319,242.46.

Compared with the appropriations made at the last session for the current fiscal year, the following results are shown as to each of the regular appropriation acts passed this session:

The agricultural act is increased $1,322,930. Of this sum, $72,000 is for increased service in the Bureau of Animal Industry; $204,060 in the Bureau of Plant Industry; and $750,000 for the Forest Service.

The army act is increased $5,815,222.73, which is chiefly on account of the law enacted a year ago increasing the pay of the officers and enlisted men and because the enlisted strength of the army is more nearly up to its maximum than it has been before in several years.

The diplomatic and consular act shows an inconsiderable increase of only $78,611.16.

The District of Columbia act is increased by $677,256.64, the larger part of which is for the public schools of the capital.

The fortifications act is reduced $1,146,634—a gratfying result—made possible by the fact that the system of modern seacoast defenses of continental United States is practically completed, so that the greater part of the expenditures being made are in the island possessions, including the Philippines and Hawaii.

The naval act is increased by the considerable sum of $14,271,313.58, which is chiefly on account of construction and armament of new battle ships and other vessels and the increase in the pay of officers and enlisted men of the naval service authorized at the last session.

The Indian act is increased $1,381,580.13. The act carries more than $2,000,000 for the industrial education and training

of Indian children. We have the encouraging assurance, as a result of this policy of training, that the Indian problem is rapidly approaching a satisfactory solution, and we are led to look for a considerable reduction in expenditures in the near future.

The legislative, executive, and judicial act, which provides for the great body of salaried officials and employees in the public service at Washington, shows a reduction of $854,429.50.

The Military Academy act is increased $1,685,886.46, which is rendered necessary in order to meet contract obligations for construction of buildings now in progress at West Point.

The pension act is reduced $2,145,000. This act carries the necessary money to meet the Nation's obligations to the veteran surviving soldiers of the Republic and to their widows and dependents, as prescribed by the liberal and just pension laws enacted by Congress, and it includes all that is estimated by the Pension Bureau to be required.

The post-office act carries the large increase of $11,991,478. The total sum carried in this act includes $37,360,000 for the Rural Free-Delivery Service, an increase of $1,787,000 over the service for the current year.

A river and harbor act carrying $9,435,750 has been passed. None was enacted at the last session of Congress. The one passed at the last session of the previous Congress appropriated $37,108,083, or $27,672,333 more than is carried in the act passed this session.

The sundry civil act is increased $25,651,818.70, the largest increase shown by any of the regular appropriation measures. This act provides, in great or less degree, for practically every branch of the public service, and particularly for public works in progress and authorized by law. It appropriates, among other considerable sums, $18,673,646.20 for the construction of post-office and other public buildings in cities and towns throughout the country; $19,754,514 for construction of works on harbors and rivers that have been authorized in previous river and harbor acts; and $33,638,000 for continuing work on the Panama Canal.

The annual appropriation bills prepared by the Committee on Appropriations, as reported to the House at this session, show reductions in the regular and supplemental estimates as follows:

District of Columbia	$6,214,937.00
Fortifications	9,343,140.00
Legislative, executive, and judicial	816,259.75
Pension	149,000.00
Sundry civil	7,937,241.65
Total	24,460,578.40

The reductions or increases in the regular estimates made in the other seven annual appropriation bills, prepared and reported by six other committees of the House, were as follows:

	Reduction.	Increase.
Agriculture	$1,729,700.00	
Army	5,657,158.71	
Diplomatic and consular	287,355.79	
Indian		$120,322.39
Military Academy	74,907.00	
Navy		1,270,821.54
Post-office		555,810.00
Total	7,749,121.50	1,946,953.93
	1,946,953.93	
Net reduction	5,802,167.57	

It should be stated further in behalf of the work of the Committee on Appropriations that the regular annual estimates referred to them at the beginning were augmented during the session by official supplemental estimates on the sundry civil bill alone to the extent of $5,399,300. This sum, added to the amount of the reductions made in the regular estimates for all of the bills, brings the total reductions made by the committee in its work of the session on five annual bills to a total of $29,859,878.40, as against $5,802,167.57 made in the other seven annual bills by six other committees of the House.

Reverting again to the practice indulged in by all administrations, allow me to remark that estimates for appropriations submitted to Congress and recommended with more or less vigor by the executive departments for the conduct of the Government always greatly exceed the amounts actually appropriated. The evil of this practice is manifest. It entails upon Congress the burden, with little, if any, aid from the Executive, of thrashing out the good from the bad, of differentiating between the indispensable, the necessary, and the desirable expenditures that should be provided for. It encourages, if it has not in fact begotten, a disposition in many of the departments to send in estimates for all manner of expenditures that may be pressed upon their attention, without reference to their merit or to the fact that by so doing the sum total of drafts upon the Treasury thus made through Congress enormously exceeds the annual revenues.

As a measure for preventing in the future a continuance of this evil practice with reference to submission of estimates, a provision of law prepared and offered by my colleague on the Committee on Appropriations, Hon. WALTER I. SMITH, of Iowa, has been enacted as a section of the sundry civil appropriation bill, which hereafter will put upon the Executive the onus, when the annual estimates exceed the total of estimated revenues, of either pointing out where the estimates could with least injury to the public service be reduced so as to bring them within the revenues or else, if in his judgment such estimates can not be reduced without undue injury to the public service, to recommend to Congress such loans or new taxes as may be necessary to cover the resulting deficiency.

Another step in this direction of intelligently applying estimates to expenditures, in order that the latter may not exceed resources, is a new rule of the House, that I earnestly hope may be adopted at an early day, requiring every committee of the House to keep a record on its calendar of bills of the amount, actual or estimated, as nearly as may be, of the charge against the Treasury carried by every bill referred to it, and also to convey explicitly the same information in their report on every bill favorably considered and reported to the House.

If the present system, both in the House and the Senate, is to continue, of having many committees charged with the duty of preparing and presenting the annual appropriation bills, then it is absolutely necessary to take these and all other reasonable steps toward constantly keeping the Congress and the public advised as to the relation of total proposed expenditures, as fixed by executive estimates, as well as by measures pending before and reported by committees, to the actual and possible revenues.

The gratifying operation of the so-called "antideficiency law" is again emphasized in the appropriations of this session. Of the whole sum carried in the urgent and regular deficiency acts, $20,262,829.69, there is the amount of $13,704,779.39 that is not deficiency, but rather an additional appropriation, such as $5,299,935.65 for the military establishment, chiefly growing out of legislation enacted at the close of the last session increasing the pay of officers and enlisted men and to meet expenses growing out of the late intervention in Cuba; $2,196,843.74 for the navy, most of which is for the increased pay of officers and enlisted men, also authorized at the last session, some of it representing the expenses incident to our fleet abroad and to complete a dry dock where the contractors had failed; $5,458,000 to continue work on the Panama Canal; and about $750,000 to pay judgments and audited accounts certified as due and unpaid. The remaining sum, $6,558,050.30, is small indeed compared with our total of appropriations of more than a billion dollars, or contrasted with the large deficiencies that were annually forced upon Congress before the passage of the law. The old practice indulged in by so many department officials of conducting the public service on the basis of estimates submitted, instead of according to appropriations made by Congress, is gone forever. The common procedure of spending as they pleased and then regarding it as sufficient argument in behalf of a deficiency to say, "We estimated for so much, and are conducting the service on that basis, and unless you give us now the full measure of our original estimate the service will be crippled or entirely suspended for a portion of the year," has yielded to the wholesome fear of a term in prison. What were then aptly denominated "coercive appropriations" are no longer extorted from Congress.

It is true, as I have endeavored to demonstrate heretofore, that by far the greater part of our national expenditures are for the military side of our Government, on account of wars that have occurred or in preparing for wars that may come. Considering the subject from the standpoint of appropriations made at this session, from which expenditures are to be made, we find that five great annual supply bills are devoted solely to these expenses, as follows:

Army	$101,197,470.34
Fortifications	8,170,111.00
Military Academy	2,531,521.33
Navy	136,935,199.05
Pension	160,908,000.00

In addition, the sundry civil, the legislative, executive, and judicial, and even the District of Columbia bills carry considerable sums chargeable to military expenditures, and under the chapter of "Permanent appropriations" there are also large amounts directly chargeable to war, or the results of war, including interest and sinking-fund charges on account of our civil war debt. These sums, together with the amount for the

army and navy in the general deficiency act, all amounting to about $116,000,000, added to the amount carried by the five bills I have mentioned, bring the total of these appropriations that are chargeable to this session of Congress up to the enormous amount of $525,742,301.72, which, deducted from $1,044,014,298.23, the whole apparent sum of appropriations for the session, leaves only about 50 per cent of our total proposed expenditures to be devoted to civil government.

The growth of appropriations for military purposes, including only those for the military and naval establishments carried in the army and navy acts, and without reference to the large sums for pensions, fortifications, and other incidents of war to which I have referred, for the eight-year period prior to the Spanish war, contrasted with the eight-year period ending with the fiscal year 1910, affords a startling exhibit, and one that I commend to the thoughtful consideration of my countrymen.

Army appropriations.

1891–1898.

1891	$24,206,471.79
1892	24,613,529.19
1893	24,308,499.82
1894	24,225,639.78
1895	23,592,884.68
1896	23,252,608.09
1897	23,278,402.73
1898	23,129,344.30
Total	190,607,380.38

Average annual appropriations, $23,825,922.54.

1903–1910.

1903	$91,730,136.41
1904	77,888,752.83
1905	77,070,300.88
1906	70,396,631.64
1907	71,817,165.08
1908	78,634,582.75
1909	95,382,247.61
1910	101,197,470.34
Total	664,117,287.54

Average annual appropriations, $83,014,660.84.

Naval appropriations.

1891–1898.

1891	$24,136,035.53
1892	32,541,654.78
1893	23,543,385.00
1894	22,104,061.38
1895	25,327,126.72
1896	29,416,245.31
1897	30,562,660.95
1898	33,003,234.19
Total	220,634,403.86

Average annual appropriations, $27,579,300.48.

1903–1910.

1903	$78,856,363.13
1904	81,876,791.43
1905	97,505,140.94
1906	100,336,679.94
1907	102,091,670.27
1908	98,958,507.50
1909	122,663,885.47
1910	136,935,199.05
Total	819,224,237.73

Average annual appropriations, $102,403,029.71.

It will be seen from these figures that the average annual appropriations for the army have leaped from less than $24,000,000 per annum for the eight-year period immediately preceding the Spanish war to an average of more than $83,000,000 for the eight-year period ending with the appropriations made by this Congress, and that during the same periods the annual average for naval appropriations has increased from a little more than $27,500,000 to more than $102,400,000.

The increase in appropriations for the army for the periods named exceeds $473,000,000, a sum sufficient to cover the whole cost of constructing the Panama Canal, on the basis of the latest estimates for that gigantic work, and with nearly $150,000,000 to spare.

The increase in the sums Congress has voted for the navy for these same periods amounts to $598,589,333.87, a sum greatly in excess of the total appropriations for the support of the whole Government for any fiscal year prior to that of 1898.

The combined excess for the army and navy, thus exhibited for the eight-year periods named, amounts to $1,072,099,741.03, a sum exceeding by more than $158,000,000 the total interest-bearing debt of the United States. So immense has this cost of militarism grown in these last eight years over the eight-year period ending scarce ten years ago that the sum of the excess is greater even than the stupendous sum of all of our appropriations made at this session of Congress.

Mr. Speaker, men may study and speculate as to the causes of our rapidly increasing national expenditures. They may attribute this increase to national development and the position which, as a nation, we occupy among the nations of the world. They may seek to justify it upon any ground; but an analysis of our expenditures during the past decade proves conclusively that the primary cause for this increase is the tendency upon the part of our people toward militarism and in favor of the exercise by the Federal Government of rights and functions belonging exclusively to the States.

Let us hope that the enormous excess of our present expenditures over our current revenues may cause our people to stop and reflect, first, upon the necessity for these rapidly increasing war expenditures; and second, the effect upon our dual system of government if the tendency in both directions is not speedily checked.

Let us hope, too, that the coordinate branches of the Federal Government will from this time on turn their attention to the dangers lying in our pathway and do all within their power not alone toward checking the tendency toward militarism, but also to preserving within the limits of our Federal Constitution the respective rights and powers of the State and National Governments and the exercise of these rights in accordance with the principles upon which our Government is founded. [Loud applause.]

For the information of the House I will print in the RECORD, in connection with my remarks, the history of the appropriation bills for the session just closing. It presents accurately the phases through which the great supply measures pass from their submission as estimates to their final enactment as laws.

The table follows:

History of appropriation bills, second session of the Sixtieth Congress; estimates and appropriations for the fiscal year 1909–10, and appropriations for the fiscal year 1908–9.

[Prepared by the clerks to the Committees on Appropriations of the Senate and House of Representatives.]

Title.	Estimates, 1910.	Reported to the House.	Passed the House.	Reported to the Senate.	Passed the Senate.	Law, 1909–10.	Law, 1908–9.
Agriculture	$14,610,626.00	$12,880,926.00	$12,883,826.00	$13,773,276.00	$13,075,716.00	$12,995,036.00	$11,672,103.00
Army	104,013,152.55	98,355,993.84	97,724,406.84	102,509,050.34	102,636,050.34	101,197,470.34	95,382,247.61

Navy	134,393,447.99	135,664,269.53	135,766,771.53	136,825,199.05	137,035,199.05	136,935,199.05	122,663,885.47
Pension	161,018,000.00	160,869,000.00	160,769,000.00	160,908,000.00	160,908,000.00	160,908,000.00	163,053,000.00
Post-office [b]	233,978,560.00	234,534,370.00	234,436,370.00	234,458,370.00	234,453,370.00	234,962,370.00	222,970,892.00
River and harbor	[c] 21,464,141.00	9,335,750.00	9,335,750.00	9,697,625.00	9,757,625.00	[d] 9,435,750.00	[e]
Sundry civil	[f] 144,959,312.58	137,022,070.93	136,789,845.93	138,210,064.93	138,744,564.93	[g] 137,609,906.93	[h] 111,958,088.23
Total	898,291,425.49	855,900,288.52	855,187,723.47	867,133,063.48	866,974,628.48	861,655,386.02	793,489,602.12

[a] One-half of the amounts for the District of Columbia payable by the United States, except amounts for the water department (estimated for 1910 at $131,360), which are payable from the revenues of the water department.

[b] Includes all expenses of the postal service payable from postal revenues and out of the Treasury.

[c] In addition to this amount the sum of $20,479,057 to meet contracts authorized by law for river and harbor improvements is included in the sundry civil estimates for 1910.

[d] In addition to this amount the sum of $19,754,514 to meet contracts for river and harbor improvements is included in the sundry civil act for 1910.

[e] No river and harbor bill passed for 1909, but the sum of $18,092,945 was appropriated in the sundry civil act to carry out contracts authorized by law for river and harbor improvements for 1909, including $125,000 for a dredge for the harbors on the coast of the Mississippi.

[f] This amount includes $20,479,057 to carry out contracts authorized by law for river and harbor improvements, and $35,886,190.58 for construction of the Isthmian Canal for 1910.

[g] This amount includes $19,754,514 to carry out contracts authorized by law for river and harbor improvements, and $33,638,000 for construction of the Isthmian Canal for 1910.

[h] This amount includes $18,092,945 to carry out contracts authorized by law for river and harbor improvements, including $125,000 for a dredge for the harbors on the coast of the Mississippi, and $29,187,000 for the construction of the Isthmian Canal for 1909.

History of appropriation bills, second session of the Sixtieth Congress; estimates and appropriations for the fiscal year 1909–1910, and appropriations for the fiscal year 1908–9—Continued.

Title.	Estimates, 1910.	Reported to the Senate.	Passed the Senate.	Reported to the Senate.	Passed the Senate.	Law, 1909-10.	Law, 1908-9.
Urgent deficiency, 1909 and prior years	[a] $23,000,000.00	$1,126,602.40	$1,126,602.40	$1,151,602.40	$657,102.40	$831,102.40	$56,702,309.06
Deficiency, 1909 and prior years		17,599,984.19	17,621,984.19	19,252,408.30	20,276,390.87	19,431,727.29	
Total	921,291,425.49	874,626,875.11	873,986,310.06	887,537,074.18	887,908,121.75	881,918,215.71	850,191,911.18
Miscellaneous	[a] 22,000,000.00					2,000,000.00	4,011,337.26
Total, regular annual appropriations	943,291,425.49					883,918,215.71	854,203,248.44
Permanent annual appropriations	[b] 160,096,082.52					[b] 160,096,082.52	154,194,295.12
Grand total, regular and permanent annual appropriations	1,103,387,508.01					[c] 1,044,014,298.23	[d] 1,008,397,543.56

Amount of estimated revenues for fiscal year 1910	$602,000,000.00
Amount of estimated postal revenues for fiscal year 1910	223,340,712.00
Total of estimated revenues for fiscal year 1910	825,340,712.00

[a] This amount is approximated.

[b] This is the amount submitted by the Secretary of the Treasury in the annual estimates for the fiscal year 1910, the exact amount appropriated not being ascertainable until two years after the close of the fiscal year. This amount includes estimated amount of $60,000,000 to meet sinking-fund obligations for 1910, and $30,000,000 estimated redemption of national-bank notes in 1910 out of deposits by banks for that purpose.

[c] In addition to this amount, contracts are authorized to be entered into, subject to future appropriations by Congress, as follows: By the District of Columbia act, $_____; by the naval act, $_____; by the sundry civil act, $_____.

[d] In addition to this amount contracts are authorized to be entered into, subject to future appropriations by Congress, as follows: By the District of Columbia act, $179,000; by the legislative, etc., act, $125,000; by the naval act, $25,700,000; by the sundry civil act, $2,650,000; by the public-buildings act, $20,789,750; in all, $49,443,750.

Mr. LIVINGSTON. Mr. Speaker, the appropriations made at this session of Congress reach the enormous sum of $1,044,014,298.23.

This stupendous amount exceeds the appropriations made last session by $35,616,754.67 and is greater than the appropriations of any two sessions of Congress made prior to 1898.

It is all but inconceivable that the national expenditures should be thus doubled within the comparatively brief period of a decade.

Even after deducting for the requirements of the sinking fund $60,000,000, for the redemption of national-bank notes $30,000,000, and $20,262,829.69 for deficiencies that are provided for, the remaining sum of this session's enormous drafts upon the Treasury is $933,751,468.54, an amount exceeding the total estimated revenues of the next fiscal year by $108,410,756.54.

Four years ago I sought to sound a note of warning with reference to what I then conceived to be the near approach of the time when our rapidly increasing expenditures would overtake and exceed the revenues of the country; when the buckle of expenditures and the tongue of revenues would be so wide asunder that it would strain beyond endurance the possibilities of the ingenuity and devices of the Republican party, with the aid of their unjust and discriminating high protective tariff, to bring them together. That condition is upon us, and it remains to be seen by what devious ways the dominant party will, during the approaching session of Congress, compel further exactions from a patient and overburdened people, in order to afford a pretext for continuing the high protective tariff system of revenue that is demanded by the great monopolistic interests of the country as a price of their long-continued support of the Republican party.

Congress ought not alone be held responsible for these excessive expenditures. On the contrary, it should be commended for the millions it has refused to appropriate, notwithstanding the pressure brought to bear by the Executive and the badgering of innumerable interests on all sides clamoring to get their hands into the Treasury. Had the executive departments prevailed in their efforts at this session, as manifested by the official estimates submitted to Congress, the appropriations would have been swollen beyond the gigantic figures attained by more than $59,000,000.

It should also be borne in mind that we have been living under a new era, introduced into our system of public expenditures by the retiring administration, an era that has established that the public moneys may be expended not alone under authority of law, but also by "executive choice," as illustrated by innumerable commissions, councils, and boards appointed solely by the President. The existence and activities of these bodies have made no inconsiderable drain upon funds appropriated for specific and legitimate functions of government by misapplying the same to expenses of junketing about the country and in diverting the services of department employees from their proper and lawful occupations.

The appropriation made for well-defined contingent objects of expenditure in the mint at Philadelphia was in part illegally used to pay an extravagant sum, without knowledge or consent of Congress, for new designs of gold coins, which act created a deficiency, to meet which and to pay obligations previously incurred by contract we have had to appropriate at this session.

A good and serviceable building has been torn down in Washintgon because its location and design jarred upon the artistic sensibilities of persons in high official station, and now public funds provided for other purposes will doubtless be used to embellish the vacant spot and make it pleasing to the eye, and the Government will continue to pay $500,000 annually for rent of buildings in Washington for office and storage purposes. The well-defined duties of the executive department, legislative department, and the reserved rights of the States, as well as the duties and obligations of the States, have all been evaded and stupendous sums of money spent as the result of such violations of constitutional restrictions and limitations. To such an extent have these abuses been practiced that to-day Congress is being beseiged to spend millions of dollars that is clearly not within the restrictions placed by the Constitution upon the powers of Congress; all of which is fast building up a great centralized government and, of course, minimizing the rights and duties of the States.

I am going to submit, to be inserted in the RECORD, a statement giving the amount of each of the appropriation acts passed at this session and their aggregate, and I want to have it printed in the RECORD in the largest type permissible, in order that the House and the country may have thus graphically set before them the enormous sums of money represented by each of these appropriation acts and in their sum total. Also, for the information of the country, I will print as a part of my remarks a comparative statement showing the appropriations by Congress for the quadrennial period representing the fiscal years 1893 to 1897, which period marks the last Cleveland administration, and in a parallel column the appropriations for the fiscal years 1907 to 1910, which period marks the last four years of Mr. Roosevelt's administration.

Mr. Speaker, I most emphatically concur with the chairman of the committee that not in the history of appropriations by Congress has it been so difficult to hold down the appropriations to the revenues of the Government. I say, without fear of successful contradiction, that your committee has faithfully endeavored to do so. No chairman or Committee on Appropriations has been more faithful or industrious in the discharge of his or their duties, and the chairman of that committee deserves the thanks of this House and the country for his earnest and energetic efforts to discharge his duty as the chairman of that committee.

Statement of appropriations, by acts, for the fiscal year 1910.

NOTIFICATION OF THE PRESIDENT.

Mr. TOWNSEND. Mr. Speaker, I move the adoption of the following resolution, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, That a committee of three Members be appointed by the Speaker, to join a similar committee appointed by the Senate, to wait upon the President of the United States and inform him that the two Houses, having completed the business of the present session, are ready to adjourn unless the President has some other communication to make to them.

The resolution was agreed to.

The Chair announced the following committee:

Mr. TOWNSEND, Mr. SCOTT, and Mr. CLARK of Missouri.

NATIONAL WATERWAYS COMMISSION.

The SPEAKER. The Chair would ask the gentleman from New York [Mr. ALEXANDER] what is the official title of the commission that was authorized on the river and harbor bill?

Mr. ALEXANDER of New York. The National Waterways Commission.

The SPEAKER announced the following members of the commission:

Mr. BURTON of Ohio, Mr. ALEXANDER of New York, Mr. LORIMER, Mr. STEVENS of Minnesota, Mr. WANGER, Mr. SPARKMAN, and Mr. MOON of Tennessee.

COMMISSION ON CODIFICATION OF THE LAWS.

Pursuant to Senate joint resolution No. 140, the Chair announced the following commission on the codification of the laws:

Mr. MOON of Pennsylvania, Mr. PARSONS, Mr. DENBY, Mr. SHERLEY, and Mr. HOUSTON.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed the following resolution:

Resolved, That a committee of two Senators be appointed by the Vice-President to join a similar committee appointed by the House of Representatives to wait upon the President of the United States and inform him that the two Houses, having completed the business of the present session, are ready to adjourn, unless the President has some other communication to make to them.

And that in compliance with the foregoing the Vice-President had appointed as said committee Mr. CULLOM and Mr. TELLER.

COMMITTEE ON ACCOUNTS.

The SPEAKER, under the provisions of the law, announced the temporary Committee on Accounts, as follows:

Mr. HUGHES of West Virginia, Mr. CURRIER, and Mr. BARTLETT of Georgia.

RESOLUTION OF THANKS TO THE SPEAKER.

Mr. PAYNE. Mr. Speaker, I offer the following resolution and move its adoption.

The SPEAKER pro tempore [Mr. DALZELL]. The Clerk will report the resolution.

The Clerk read as follows.

House resolution 609.

Resolved, That the thanks of this House are presented to Hon. JOSEPH G. CANNON, Speaker of the House of Representatives, for the able, impartial, and dignified manner in which he has presided over its deliberations and performed the arduous and important duties of the Chair during the present Congress.

[Applause.]

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The question was taken, and the resolution was unanimously agreed to.

[Applause.]

The SPEAKER again resumed the chair amid general applause.

The SPEAKER. With the consent of the House, as the committee just appointed to wait upon the President has not reported, and following the usual custom, the Chair will return its thanks to the House immediately before the expiration of the Sixtieth Congress. In the meantime, if there is nothing of other business, the Chair will await, if such is the sense of the House, motion for a recess, or for other business, if there is any to present.

RECESS.

Mr. PAYNE. Mr. Speaker, I move that the House take a recess until 11 o'clock and 45 minutes a. m.

The motion was agreed to.

Accordingly (at 11 o'clock and 33 minutes a. m.) the House was declared in recess until 11.45 a. m.

AFTER RECESS.

The recess having expired,

REPORT OF NOTIFICATION COMMITTEE.

Mr. TOWNSEND. Mr. Speaker, your committee reports that we have waited upon the President according to instructions, and he announces that he has no further communication to make to the Congress.

The SPEAKER. Members of the House of Representatives of the Sixtieth Congress, the time has almost arrived when this Congress, under the law, expires. During the period covered by the Sixtieth Congress and the two preceding Congresses I have had the honor of presiding over this body. At times I have had, without exception, the enthusiastic indorsement of each Member. But the pendulum swings back and forth in the affairs of men. During my service I have seen the House of Representatives, in the Fifty-first Congress, under the previous question, thank Mr. Speaker Reed—every Republican voting for, and every one of the minority voting against, thanking him. Later on I saw Mr. Speaker Reed move the resolution of thanks to Mr. Speaker Crisp, adopted unanimously, within two years of the other incident. After all is said and done in the affairs of parties and of men, what is needed in the public service is virile men—men who favor policies that they believe in and have the courage of their convictions [applause], whether it be the majority or the minority; and a minority, virile and patriotic, is as necessary as is a majority in a government of the people. [Loud applause.]

Strong men, in public life as well as in private life, strike above the belt and tell the truth. [Applause.] As one Member of this House, and under the tongue of good report and evil report, I have performed my duty as a Representative and Speaker to the best of my judgment, without regard to personal consequences to me. [Loud, general applause.] I thank the Members of the House for their cooperation, approval, or criticism, when approval or criticism is not fulsome on the one hand or captious on the other, for the mere purpose of praise or the mere purpose of condemnation. [Applause.] Now, at the close of the Congress, I desire to wish you health and prosperity individually. Some of you are not Members of the incoming Congress. You join the great body of citizenship in private life; you will perform your duties there as well, no doubt. You may return again. I can look in the faces of many of you who depart from public life, on both sides of the House, with sorrow and not joy at your departure. May peace, health, and prosperity attend your footsteps.

And now, at the hour of 12 high noon, under the law, I declare the Sixtieth Congress adjourned without day. [Loud, general applause.]

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER: Petition of lodges of the United Order of American Mechanics in Clifton and Bridgeport, Ohio, favoring exclusion of Asiatics—to the Committee on Foreign Affairs.

Also, petition of McLaw Brothers, of San Francisco, Cal., and other firms in the United States, favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. BURNETT: Petition of many business firms in Gadsden, Ala., favoring reduction of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. COCKS of New York: Petition of H. Van Valkenburgh and others, urging the passage of the Burkett-Foelker bill, prohibiting telegraphing of gambling bets—to the Committee on Interstate and Foreign Commerce.

By Mr. COOPER of Wisconsin: Petition of the Blodgett Milling Company, of Janesville, favoring a maximum and minimum tariff law—to the Committee on Ways and Means.

By Mr. CURRIER: Petitions of residents of the State of Washington and of Richmond (N. H.) Grange, against parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

Also, petitions of Bartlett Grange, of Salisbury, N. H.; Campton (N. H.) Grange; and Retail Merchants' Association, for a national highways commission and for federal aid in road construction (H. R. 15837)—to the Committee on Agriculture.

Also, petition of West Thornton Grange, favoring parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

Also, petition of citizens of Keene, N. H., against passage of the Johnston Sunday-rest bill (S. 3940)—to the Committee on the District of Columbia.

Also, petition of the Missouri Valley Horticultural Society, for legislation creating a national highways commission—to the Committee on Agriculture.

Also, petition of certain employees of the Isthmian Canal Commission at the Canal Zone, for six weeks' vacation with pay—to the Committee on Interstate and Foreign Commerce.

By Mr. ESCH: Petition of Eau Claire (Wis.) Lodge, No. 402, Benevolent and Protective Order of Elks, for creation of American elk reservation in the State of Wyoming (H. R. 21980)—to the Committee on Agriculture.

By Mr. HAYES: Petition of Shipowners' Association and several commercial bodies of the Pacific coast, asking that several revenue cutters be stationed on the Pacific coast—to the Committee on Naval Affairs.

APPENDIX

TO THE

CONGRESSIONAL RECORD.

Conspiracies Against Aliens—The Speaker's Right to Vote.

SPEECH

OF

HON. J. WARREN KEIFER,

OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, December 12, 1908,

On the bill (H. R. 11733) punishing conspiracy to injure or intimidate any person in the exercise of a right under the Constitution or laws of the United States.

Mr. KEIFER said:

Mr. SPEAKER: The question arising on the appeal of the gentleman from Missouri [Mr. DE ARMOND] from the exercise of the right of the Speaker to vote on the passage of a bill (H. R. 11739) called up by the direction of the Committee on the Judiciary by its chairman is an old one, and it is plainly settled by a rule of this House long in continuous existence and by a long line of uniform precedents.

The Speaker has already called attention to the rule of this House and to some of the precedents, but as the question is one of great importance and is now submitted to the House for its decision as a precedent it may not be time lost to briefly discuss the question anew in the light of our legislative history, our rules, the practice thereunder, and the precedents. It will be seen that the question of the right of the Speaker to vote has now arisen in its simplest form.

Briefly stated, the question arose thus: The yeas and nays were taken on the passage of the bill and the clerk reported to the Speaker the vote as tabulated by him. Some pairs were then announced and one Member sought to be recorded as present and another [Mr. HOBSON] sought to be allowed to vote, but was refused, whereupon the Speaker announced the vote so reported to him to be, yeas 100, nays 99, present 4, but he did not announce that the bill had passed, though the reported vote warranted such an announcement. At this stage in the proceedings a recapitulation of the vote was asked for by a Member and granted by the Speaker, the vote being close. Then followed a further fruitless attempt of the gentleman from Alabama to be allowed to vote. The recapitulation was then completed and the clerk reported the vote to the Speaker to be, yeas 100, nays 100, present 3, and thereupon he directed the clerk to call his name, and he then voted "aye."

The gentleman from Missouri made the point that the Speaker had no right to vote at that stage of the procedure and the Speaker, after some debate, overruled the point and voted "aye." From this decision of the Chair the appeal to the House was taken. It will be seen that his vote when thus cast was decisive of the result.

Rule I, paragraph 6, settles the question in precise terms:

He shall not be required to vote in ordinary legislative proceedings, except where his vote would be decisive, or where the House is engaged in voting by ballot; and in all cases of a tie vote the question shall be lost.

This rule required him to vote under the conditions of the vote as finally reported to him. His right to vote was perfect under the rule.

The claim that he should have voted on the regular call is untenable. His name was not on or under our rules required to be on the roll to be called, and it is only called on the Speaker's own direction, which is usually only given, as in the present instance, when the rule requires him to vote. The Speaker's name has never in the whole history of Congress been on the voting roll.

Originally, by a rule adopted April 7, 1789, he did not vote at all, though a Member of the House. A later rule of the House forbade his voting save in case of a vote by ballot or of a tie vote, but it is now settled that he may vote, if he so desires, on any question any other Member of the House is qualified to vote upon, this by virtue of his constitutional right as a Representative.

Speaker Trumbull, of Connecticut, March 16, 1792, and Speaker Macon, of North Carolina, December 9, 1803, each exercised his constitutional right to vote, although a rule of the House forbade it, and this practice has been followed by Speakers ever since.

On December 9, 1833, and again in 1837, Mr. Patton, of Virginia, proposed a rule providing that "in all cases the Speaker shall vote," and each time it was defeated, leaving the rule and practice to stand as now, namely, that his name shall not appear on the roll, but to be called if he so directs after the call ends.

On January 4, 1850, the language of the rule that hitherto existed was changed from "he shall not vote" to "he shall not be required to vote." This was done to take away the appearance of the House attempting to take from a Speaker his constitutional right to vote as a Member of the House. In substance, this language has been continuously kept in our rules up to the present, and the Speaker, regardless of party, has always voted at the end of the regular roll call whenever he desired to do so and on any question before the House.

In the case under consideration he not only had the constitutional right to vote when he did, but there being a tie vote reported to him on which the question would be lost, and his vote would be decisive, the rule already quoted absolutely required him to vote. This he did at the earliest moment the condition appeared, showing his duty under the rule was to vote. The recapitulation to verify the vote must be regarded as a proper part of the taking of the vote, with the right of a Member to change or withdraw his vote, or, in a proper case, to vote and have his vote counted, and of the Clerk to correct errors, and so forth.

But the settled practice does not stop there, however, as to the time the Speaker may exercise his right to vote. He may vote at any time it is discovered that the rule requires him to do so, even though other business has intervened, and even on a later legislative day.

On December 4, 1876, Mr. Hewitt, of New York, moved to suspend the rules and pass a resolution providing for a special committee to investigate the recent presidential elections in Louisiana, Florida, and South Carolina, which required a two-thirds vote to pass it. The vote reported thereon was 156 yeas to 78 nays, precisely enough yeas under suspension of the rules to pass the resolution. On the next day it was represented to the Speaker and to the House that a Member from Maine (Mr. Plaisted) had voted in the negative, and a Member from Indiana (Mr. Fuller) had voted in the affirmative, and the vote in neither case had been recorded or counted, and the Speaker held each was entitled to have his vote recorded and counted, which showed the resolution was lost, whereupon the Speaker (Mr. Randall) voted in the affirmative, producing the required two-thirds majority, and he thereupon declared the resolution adopted. The language used by Speaker Randall in asserting his right to vote after the result of the vote had been announced and on a later day will be found in Volume 5, Hinds Precedents, House of Representatives, page 515, section 5969.

He only followed Speaker Macon, of North Carolina, who (December 9, 1803), notwithstanding a then prohibition in the rules of the House against the right of the Speaker to vote at all, voted to make a two-thirds vote on a proposed amendment to the Constitution of the United States, though in that case a day had not intervened before he exercised his right to vote.

There are a number of decisions all concurring in the view that the Speaker has a right to vote at any time when it is disclosed that his vote would be decisive of the result, and that this right to vote may be exercised after the result of a vote has been announced by the Speaker, and this also where his vote changes the result of the vote previously announced.

Speaker Winthrop, of Massachusetts, on Monday, January 8, 1849, held he had the right to vote on the discovery of an error in the vote as announced on which he had declared on the Saturday before a bill to have passed the House. In disposing of the question he said:

The Chair takes the earliest opportunity to state to the House this morning that upon a reexamination of the yeas and nays the Clerk has ascertained that an error existed in the announcement of the vote on Saturday. The vote actually stood—ayes 89, noes 89. The correction will now accordingly be made on the Journal, and a case is immediately presented, agreeably to the twelfth rule of House, for the interposition of the Speaker's vote.

The vote as finally announced was—yeas 89, nays 90, and the bill was lost. There are other precedents of like effect, and they violate no sound principle of parliamentary procedure, and they are in consonance with each Representative's rights.

In the Forty-seventh Congress (July 19, 1882) the same question arose, in principle, in a contested-election case from South Carolina. A resolution was, by the Speaker, on a reported yea-and-nay vote, announced passed, declaring the sitting Member not entitled to retain his seat. The Democrats refused to vote on the resolution and sought to break a quorum and thereby defeat the resolution. This was before the practice of counting a quorum obtained. A quorum was then 146. Only 145 had actually voted, though 146 were reported to the Chair as voting. Immediately after the resolution was declared passed another one was presented and passed seating a Member instead of the one just unseated, and a motion followed to reconsider the last vote and to lay the last motion on the table, which was agreed to. It was then discovered that a quorum had not voted on the former resolution. The Speaker [Mr. KEIFER] announced to the House the discovery of this fact, and that instead of there being yeas 145 and nay 1, as announced, the correct vote was yeas 144, nay 1, which lacked 1 of a quorum. The Speaker thereupon exercised his right to vote and caused it to be recorded in the affirmative, which healed the error and confirmed the passage of the resolution and showed a quorum present voting. His right to do this was challenged by ex-Speaker Randall, by Mr. Blackburn, of Kentucky, and others, and some debate in the House ensued, during which the practice and precedents were generally cited and reviewed. The succeeding day a resolution was introduced challenging the action of the Speaker, but it was withdrawn after debate and his action was acquiesced in as being sound in principle and in line with the precedents, including the decision of Speaker Randall above referred to.

It was at a little earlier time (May 29, 1882) that the then occupant of the chair [Mr. KEIFER] held that dilatory motions were not in order to prevent the House from adopting rules for its procedure, and he then expressed a willingness to count a quorum where a quorum of Members was present and not voting, but as the Democratic Members then unitedly denied the Speaker enjoyed such right or could enforce it, in which Mr. Reed, of Maine, Mr. Robinson, of Massachusetts, and other Republicans of that (Forty-seventh) Congress concurred, the Speaker was not called on to count a quorum. Mr. Reed later recanted his speeches and opinion then and theretofore made and expressed (RECORD, Vol. XIII, Pt. V, p. 4313) in opposition to the Speaker's right to count a quorum if a quorum was present not voting, and he, as Speaker in the Fifty-first Congress, January 29, 1890, counted a quorum under such circumstances, which action has since been sustained by the Supreme Court of the United States (144 U. S., p. 1), and its wisdom is no longer questioned, but followed, and is now a rule of the House. (Pars. 3 and 4, Rule XV.)

The real question here for decision by the House on this appeal is a plain one under our existing rules, and the Speaker's right and duty to vote as and when he did is also in accordance with the practice and parliamentary precedents from almost the beginning of our constitutional government. I am glad the House has laid the appeal on the table by so decided a vote, which must be taken as constituting another affirmance of the uniform practice in like cases.

Naval Appropriation Bill.

SPEECH

OF

HON. LEMUEL P. PADGETT,

OF TENNESSEE,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, January 19, 1909.

The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes—

Mr. PADGETT said:

Mr. CHAIRMAN: I desire to submit for the consideration of the committee some observations upon the pending bill making appropriation for the maintenance of the naval establishment and the programme for the increase of the navy. I think this is a fortunate time and a happy occasion for the consideration, calmly and dispassionately, of the questions involved in this bill. Our fleet is homeward bound from a trip of peace and good fellowship around the world. We have been declaring with emphasis our love for all nations and our determination upon our part to maintain peace with all the world, and all the other nations of the world have in good faith accepted our declarations and professions of peace and good will and with like emphasis have assured us of their peaceful purposes and good intentions. And with all the formalities which a great nation can employ we have assured them that we accept in good faith their declarations and professions of peace and friendship. At a cost of many millions of dollars this voyage of the fleet around the world has been made and is now returning, assuring us of the splendor and magnificence of its receptions and the cordiality of the people of every country it visited. I think it indeed a felicitous occasion and happy environment that we can consider the naval appropriation bill and naval programme under such conditions. I am aware of the publication in the press of the Japanese threatened peril. This we have each year. Of course it is mere coincidence that every year just immediately preceding the consideration of the naval appropriation bill these publications of the Japanese danger and peril make their appearance and as regularly disappear as soon as the naval bill is disposed of. Summer follows winter and harvest follows seeding time, but not with more unfailing regularity and precision than the Japanese scare attends the consideration of the naval appropriation bill. To be sure, it is a mere coincidence. But the regularity and precision of the coincidence awakens our admiration. I remember a few years ago these coincidences, precisely of the same nature and character and threatened danger and peril were with Germany. But after being used for several years and the country becoming thoroughly conversant with them, so as to unerringly expect their coming at the time of the consideration of the naval bill and their unfailing disappearance without harm or disaster after the passage of the naval bill, these German coincidences failed longer to serve any useful purpose and were abandoned and were succeeded by the Japanese coincidences. I may be pardoned for suggesting that the country and the Congress are no longer frightened by them and fully realize that the coincidences of foreign peril, danger, and disaster always attending the consideration of the naval bill are manufactured for a purpose.

And we may be further pardoned for suggesting at this time that when the next naval appropriation bill is approaching consideration in the Congress there will again arise the danger and disaster and peril of the Japanese. We confess that it arouses our unstinted admiration that whether the naval bill is considered early in the session or late, with unfailing precision the Japanese scare makes its appearance just at the psychological moment. Notwithstanding all of which, I deem the present a fortunate time in which to call to the attention of the Congress and the country some important suggestions with reference to the navy.

The time has come and the conditions are such that I think it is the duty of Congress and of the country to call a halt in the extravagance of the naval programme. For the fiscal year ending June 30, 1908, the ordinary disbursements exceeded the ordinary receipts, making a deficit of $58,070,201.15. Since the 1st day of July last to the present time the excess of expenditures of the Government over receipts amount to $73,231,471.38; and the Secretary of the Treasury, in his last annual report to Congress, for the fiscal year ending June 30, 1909, estimates a deficit of revenue to meet the expenditures of the Govern-

ment of $114,000,000. And judging by the present condition of receipts and expenditures it will perhaps exceed this amount. And for the fiscal year ending June 30, 1910, under the present revenue laws, the Secretary of the Treasury states that the estimates of appropriations submitted by the several executive departments exceed the estimated revenues of the Government $143,046,796. These conditions, in my opinion, justify serious consideration and reflection. The total estimates of expenditures submitted by the several departments, exclusive of all postal receipts, aggregate the enormous sum of $824,408,948. Let me call to your attention some figures relating especially to the navy. In the last session of the Congress the naval appropriation bill, as reported by the House Committee on Naval Affairs and substantially as it passed the House, carried in round numbers $103,937,000. In the Senate there were many amendments and large additions, and when it became a law it carried $122,662,485.47. The present bill now before the House carries $135,662,888.25, over $31,000,000 more than the bill as it passed the House in the last session and $13,000,000 more than the bill in the last Congress as it became law. The permanent annual appropriation for the Navy Department, as submitted in the Book of Estimates, makes the additional sum of $2,280,000; and there will be considerable sums as deficiencies to be provided for in the deficiency bills, and if we allow an increase by way of Senate amendments of the same proportion as the bill last year the total appropriations for the naval establishment in the present session of Congress will aggregate the startling figures of not less than $160,000,000. When we remember that in the year 1883 the total expenditures of the Navy Department were less than $15,000,000 per annum, and that from 1883 to 1908, both inclusive, the total appropriations for the navy amounted to the fabulous sum of $1,374,624,001.89, and consider in connection therewith the enormous growth of naval expenditures provided for in the present bill, we believe we are justified in asking the Congress seriously to consider a halt in naval expenditures.

The present bill provides for the increase of the navy two battle ships, costing not less than $10,000,000 each, and various other auxiliaries, making a total cost of nearly $28,000,000. Personally, I preferred and thought sufficient an authorization of one battle ship, but a large majority of the committee were in favor of two, and I joined with them and stand with the committee in its present recommendation of two ships. But in so doing I would not have it understood that in the future I shall feel obligated to stand for so large a naval programme. My candid opinion is that our navy is sufficiently large for all ordinary purposes, and to maintain it in a high state of excellency at its present standard is all that is necessary, and to do so does not require so large a programme for the increase of the navy each year. Especially is this true of battle ships. Let me call to your attention some figures by way of comparison of the navies of the principal nations:

Relative strength of the principal naval powers in battle ships and armored cruisers.

BATTLE SHIPS AND ARMORED CRUISERS BUILT, BUILDING, AND PROVIDED FOR.

	Number.	Tonnage.		Number.	Tonnage.
Great Britain:			Japan:		
Battle ships	61	910,330	Battle ships	15	233,444
Armored cruisers	39	485,600	Armored cruisers	15	175,001
Total tonnage		1,395,930	Total tonnage		408,445
United States:			Russia:		
Battle ships	31	449,796	Battle ships	15	200,969
Armored cruisers	[a]12	[a]157,445	Armored cruisers	6	63,166
Total tonnage		607,241	Total tonnage		264,135
Germany:			Italy:		
Battle ships	31	414,486	Battle ships	15	212,846
Armored cruisers	11	133,768	Armored cruisers	10	78,513
Total tonnage		548,254	Total tonnage		291,359
France:			Austria:		
Battle ships	26	357,132	Battle ships	6	74,300
Armored cruisers	22	216,232	Armored cruisers	3	19,020
Total tonnage		573,364	Total tonnage		93,320

[a] If the *Charleston*, *Milwaukee*, and *St. Louis* are considered as armored cruisers, total tonnage of armored cruisers would be 186,545, and total tonnage of battle ships and armored cruisers, 636,341.

On the question of efficiency, considering age and gun strength, the following tables are collated from the Navy Yearbook, pages 631 to 636, inclusive.

Approximate average age of completed battle ships and armored cruisers of the principal navies of the world.

Countries.	Battle ships.			Armored cruisers.		
	Number.	Combined age.	Average years.	Number.	Combined age.	Average years.
Great Britain	54	444	8¼	35	129	3⅝
United States	25	117	4½	12	45	3¾
Germany	22	145	6½	8	31	4
France	18	174	9⅝	18	114	6⅓
Japan	11	72	6½	11	62	5½

Armament on battle ships.

	11-inch.	12-inch.	13-inch.	Grand total.
Great Britain:				
Built	0	161	40	
Building	0	70	0	
Total	0	232	40	272
United States:				
Built	0	68	32	
Building	0	56	0	
Total	0	124	32	156
Germany:				
Built	56	0	0

Total	88	60	0	148
France:				
Built	0	42	13	
Building	0	32	0	
Total	0	74	13	87
Japan:				
Built	0	36	0	
Building	0	32	0	
Total	0	68	0	68

Lord Brassey in his Naval Annual places United States second and Germany next to the United States, and Jane's Fighting Ships does the same.

In addition to the foregoing, let me remind you that the total tonnage, built and building, of Great Britain, the United States, France, Germany, and Japan is as follows:

	Tons.
Great Britain	1,669,005
United States	814,118
France	801,188
Germany	693,599
Japan	444,903

The two battle ships authorized in the present bill will add 52,000 tons to the battle-ship tonnage of the United States and make it very easily the second naval power in the world. And in my humble judgment there is no good reason why it should strive to be more, and I think there is sufficient reason why the ambition of the most strenuous advocate of a great navy should be abundantly satisfied. I think these figures clearly demonstrate that in the future under ordinary conditions there will be no necessity for so large an increase of our navy as is provided in the present bill. It should be remembered that every battle ship added to the navy causes an increase of officers and enlisted men to man her of about 900 men, adding about $1,000,000 each year as the cost for the maintenance of the ship. The construction of every battle ship demands the building of four torpedo boats and also additional cruisers and other auxiliary ships. At the present time we have six large battle ships building, and the two authorized in this bill will make eight. Last year I called attention to the fact that we were at that time, on a war basis, upon the complement of the ships built and building, short 22,701 men necessary to man the ships and were 1,846 officers short.

We are increasing our officers at the rate of about 150 a year. At the last session we authorized an increase of 6,000 enlisted men; and allowing for the two ships authorized in the present bill, we would still be more than 17,000 men short on a war basis and 14,000 short on a peace basis. In his last annual report, Admiral Pillsbury states that it takes, on an average, six years to train a man-of-war's man. With this large shortage of men and officers, both on a war and peace basis, to man our present ships built, building, and authorized, we can see what tremendous additional expenses are going to be imposed in the

near future, as soon as the ships now building are completed. I call the attention of the Congress to these matters at this time not for the purpose, intention, or desire to defeat the programme recommended in the pending bill, but for the purpose of attracting the attention of Members to the importance and necessity of arresting such extensive programmes of naval construction in the future. There is, in my opinion, no necessity for a larger navy than we now have, added to conservatively each year. There are many other demands pressing upon the attention of the Congress and demanded by the people calling for appropriations of large sums of money. The conservation of our natural resources, the preservation of our forests, the improvement of our rivers and waterways, meeting the just demands of our large agricultural interest, are important matters which should not be much longer neglected and which can not be given attention at the present time because of lack of money.

To meet these demands the cry is going up for the issuance of $500,000,000 of bonds. While not advocating a bond issue, I do claim there should be some spirit of economy shown toward the military side of our Government and some savings made, to be used to build up those phases and institutions of our national life and character which are the real and substantial evidences and manifestations of its manhood and civilization.

This Government is now and for several years past has been spending about 65 per cent of its total revenues on the military side of the Government. In my opinion, in a time of unexampled peace no Government can upon any reasonable basis justify such legislation. The revenues of the Government in a sense represent its active and productive energies; and legislation which devotes so large a share of the revenues to the military and so small a share to the civil institutions of the country fails properly to recognize and fully to appreciate the breadth and scope and magnitude of the opportunities offered and the duties resting upon the Government for the nobler and better purposes of the present-day government and humanity.

Eulogy on Hon. Llewellyn Powers.

REMARKS
OF
HON. GEORGE E. WALDO,
OF NEW YORK,
IN THE HOUSE OF REPRESENTATIVES,

Sunday, January 31, 1909,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. LLEWELLYN POWERS, late a Member of this House from the State of Maine.

"*Resolved*, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the House, at the conclusion of the memorial exercises of the day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. WALDO said:

Mr. SPEAKER: In the death of our friend LLEWELLYN POWERS this House has met with a distinct loss.

Governor POWERS was not one of the brilliant, showy Members. He seldom took part in debate, and was not himself one of the introducers of great measures. He was, however, one of the constant, laborious, unostentatious workers upon whom the real business of a legislative body rests; a man always present at the meetings of committees to which he belonged, nearly always in his seat at the opening of each daily session of the House, and an attentive listener to the discussions on the floor. During the four years that we sat together in the House Committee on Banking and Currency I came to know him well and to cherish for him a sincere friendship and regard.

He was frank and outspoken in his sentiments and did not hesitate to state strongly and vigorously his views upon measures and questions that came before that committee. His long and successful experience in business and in public life had naturally made him somewhat conservative in regard to measures for the reformation of our banking system. But when his experience and good judgment led him to believe a change in our present system was necessary and for the best interests of the banks and the people, he was strong and unwavering in his support of such change.

He was a man of great poise and self-control, and never let his support or opposition to measures in committee or on the floor of the House become a personal matter. Everyone felt that his support or opposition was only an expression of his honest views upon a public matter, which our colleague would not and did not allow to lessen his regard and esteem for other Members nor to interfere with their friendly relations.

He was a good man, a good friend, a valuable citizen and Member of Congress who will long be missed and his death sincerely regretted by his fellow-Members.

Eulogy on Hon. Llewellyn Powers.

REMARKS
OF
HON. JAMES T. LLOYD,
OF MISSOURI,
IN THE HOUSE OF REPRESENTATIVES,

Sunday, January 31, 1909.

The House having under consideration the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. LLEWELLYN POWERS, late a Member of this House from the State of Maine.

"*Resolved*, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the House, at the conclusion of the memorial exercises of the day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased"—

Mr. LLOYD said:

Mr. SPEAKER: Governor POWERS was an unusual man in many ways. He possessed a good intellect, a strong will power, and was of affable and courteous manner. He was always pleasant and attractive in conversation and forceful and practical in public speech.

He was decided in his convictions of right and wrong and determined to do right as he saw it. He was considerate of the views of others and recognized the right of another to differ from him. His long connection with public service and varied experiences in official position made him unusually helpful in legislation. Few men had a better grasp on current needs and practical remedies than he. He was a partisan in politics, but an independent thinker on all public questions. A man of wealth, but of the greatest simplicity in manner and dress. He was always approachable and could be reached by the humblest as well as those more fortunate. He gave attention to the details of business and had superior judgment in determining what course to pursue in a given instance.

Governor POWERS gave more attention to his official duties while in Congress than would be expected of one of his age and extensive possessions. He took quite an interest in everything that was assigned to his committee in Congress and passed on every question after careful investigation. Few young men were more painstaking in research than he was.

Governor POWERS was solicitous always of the welfare of his family and the education and the training of his children. He talked to me a number of times about them. He had definite plans for his children. He was methodical and thoughtful about everything pertaining to their future, as he was about the business, official or otherwise, that came to him.

He was a student of public questions and his opinions were worthy of the greatest consideration. While he was a Republican in politics and followed the leadership of his party, he had his own views and did that which in his judgment was best for his country. He said that he believed his party usually right, but if wrong in a given instance he would remonstrate; but unless conscience was involved he followed the final action of his party.

Last year during the consideration of the currency measures he openly announced his views in speeches on the floor and otherwise. He was so conscientious in his actions here that he asserted his differences as to a financial policy from his colleagues and refused to accept what he believed to be a scheme which would fail to bring relief to the people.

He was a man of good habits and lived an upright life. He had some decided views on religion. I remember of two conversations in which the questions of Bible lessons were involved and he expressed himself firmly in favor of the truth.

Governor POWERS has been missed more than most men here who leave us. He was especially helpful in counsel, but was a forceful and effective advocate on this floor as well. Death has claimed him as its victim. He has gone where his colleagues one by one must soon follow, into the beyond. Separa-

tions are sad, heartrending to family and friends; but what of the morn? Shall man survive the grave? Shall the hereafter bring the happy realization of the unity of the family circle?

It is not my purpose to philosophize as to the future, but to express in this presence my good fortune in having the acquaintance and in enjoying the friendship of so good a man as Governor POWERS. I regret his departure—it is a loss to me—but his life was helpful in its influence. Imperfections he may have had, but if so, bury them and rejoice in the good he did in public affairs and in private life. Cherish the good he did, emulate his righteous deeds, and remember always that a faithful public servant has passed away.

Agricultural Appropriation Bill.

SPEECH

OF

HON. EZEKIEL S. CANDLER, JR.,

OF MISSISSIPPI,

IN THE HOUSE OF REPRESENTATIVES,

Wednesday, February 3, 1909.

The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910—

Mr. CANDLER said:

Mr. CHAIRMAN: I desire to discuss this bill for a short time, because, as is well known, since I have had the honor to be a Representative upon the floor of this House, I have always taken a lively interest in the appropriations made for the Agricultural Department. I have felt this interest because of the fact that I have believed, as I have stated heretofore, that the money expended for this department has accomplished more for the material development of the country than any money spent for any other governmental means which is being used, and that this department has accomplished more for the people than any other department of this Government, although, as I have attempted to show heretofore, and I think we all now agree, that it receives less appropriations in proportion than any of the great departments of the Government.

I am glad to see from the report of the committee, which is unanimous, that this bill carries an appropriation of $12,880,926, and that this is an increase of $1,208,820 over the appropriation for last year. While it is a large sum of money when we consider the amount of $12,000,000 for any purpose, still, when compared with the marvelous benefits which flow from the expenditure of this money, it is a very small amount. Because of the most beneficial results derived from the work of this department, I have insisted each year upon a liberal increase of appropriations to continue its work in proportion to the development of the country, and to keep pace with the many new problems constantly arising and demanding solution. I have made several speeches on this floor urging this policy. When I came to Congress the appropriation for agricultural interests was $3,922,780.51. This bill carries $12,880,926, nearly four times as much. I do not claim all the credit for this, but I do claim I have done my part to bring about this result. [Applause.]

I am proud of my part in this work, because we find upon investigation that the agricultural interest of this country is the interest to which we are compelled to look at all times to take care of the welfare of the country and to bring the balance of trade to our shores. But for the exportation of the agricultural products of the land we would in the past few years have had an enormous balance of trade against us, but because of the agricultural products the balance of trade is in our favor by billions of dollars.

The crop of this past year amounts to the enormous sum of $7,778,000,000. Any industry and enterprise which produces this marvelous sum is certainly entitled to the highest consideration at the hands of the Government, and should command the intense interest and careful study of the Representatives of the people. [Applause.]

I am glad to say that year by year the productions of the country have increased in a marvelous proportion, and, when we take into consideration this great development in considering what appropriation shall be made, it seems to me we might go to any reasonable length in the appropriations—not to be wasteful or extravagant, of course—to furnish sufficient money to carry on the work in all the lines and avenues and departments of this great enterprise.

I am glad to find that the Secretary of Agriculture reports that he has collected the agricultural imports and exports since 1851 down to the present time in five-year periods. I call your attention to his remarkable statement on this subject, which is as follows:

A compilation of the foreign trade of the United States in agricultural products has just been completed as far back as the fiscal year 1851, and for the first time the general results are here made public. Annual averages by five-year periods are used for better understanding.

In 1851–1855 the exported agricultural products of domestic origin were value at $150,000,000, and in the five years just before the civil war at $229,000,000. After that war the amount steadily grew by five-year periods to the great value of $875,000,000 in 1901–1905 and afterwards to $1,054,000,000 in 1907, the highest year of all.

The exports of agricultural products of foreign origin increased from $8,000,000, the annual average for 1851–1855, to $12,000,000 in 1901–1905, an amount that was not equaled in subsequent years.

The value of the imports of agricultural products at the beginning of the period under review was $68,000,000, as the annual average for 1851–1855. The average was progressive, to the last period, with the exception of two five-year periods, and for the five years 1901–1905 it averaged $455,000,000. The highest amount ever reached was $627,000,000 in 1907.

Upon striking a balance of trade the evidence of the most remarkable power of the farmers of this country to produce a national surplus is brought out forcibly. For the first period, 1851–1855, the annual average balance in agricultural products in favor of this country was $89,000,000; the civil war diminished this, but the rise afterwards was fairly steady but firm until the period of 1896–1900, when there was a quick increase in the balance to $387,000,000, after which the amount has been always more than $400,000,000, except in 1905, and in 1901 it was $571,000,000, the highest amount in history.

During the entire period until 1898 the farmer provided this country with a balance of trade in his own products which offset a part or all of the unfavorable balance in the international exchange of commodities other than agricultural. After struggling with the load for a quarter of a century, he was able to overcome the adverse balance in commodities other than his own in 1876, when he began to produce a favorable balance of trade in the total of all commodities, steadily, year after year, with the exceptions of 1888, 1889, and 1893.

The per capita values of the exports of agricultural products expressed in annual averages by five years show that they have more than double during the half century under review. The per capita value during the period 1851–1855 was $5.84, and this average grew with several irregularities to $10.88 for 1901–1905 and to $12.29 for 1907, the highest amount of record.

On the other hand, the per capital value of the imports of agricultural products increased from $2.67 for 1851–1855 to $6.25 for 1871–1875, an amount that was not equaled by any subsequent five-year average. The amount for 1907 was $7.30, which was higher by $1.05 than the great annual average for 1871–1875.

During the last nineteen years the balance of trade has been in our favor by the sum of $7,166,000,000, and we owe this glorious result to the farmers of this country, because, taking out agricultural products, the balance of trade would have been against us by many millions. This year the balance of trade in our favor because of agricultural products is the enormous sum of $488,000,000, while during the same period the balance of trade other than farm products was only $178,000,000. This year the agricultural balance was exceptionally high, and has been equaled only in 1898 and 1901. In discussing this matter the Secretary says:

The magnificent figures of the farmers' contribution to the exports of this country and to the favorable balance of trade are maintained in spite of this country's immense growth in population and extraordinary immigration of nonagricultural peoples, and also in spite of the diminishing fraction of the population that is engaged in agriculture. No analysis could more strongly indicate the progressive efficiency of the farmer's labor and capital and the telling effects of the agricultural sciences.

Of course we know that the great product of this country, the one that amounts to most in the value of production, is corn. Heretofore, up to this year, the next largest in amount of production was hay, remarkable to say; but this year cotton has taken second place in the value of the product and stands next in value to the production of corn.

It is to cotton, largely, however, that we must look to bring to our shores that medium of exchange, gold, that we need as a basis for our currency. This year we have exported in cotton alone, which brought gold to this land, the amount of $438,000,000. This crop amounted to something like $675,000,000, taking it altogether, the cotton seed as well as the fiber itself. Hence it is a great force that helps bring the balance of trade to our shores, and it is the great product which brings from the coffers of the foreigner that precious metal we need to secure prosperity to our land, and has contributed to a greater extent to this end than any other product we produce, because it has brought more gold to us than any other one product.

Now, then, Mr. Chairman, in view of this marvelous development of the great agricultural interest, because it is doing so much for our country and accomplishing so much for the prosperity of the people, I say it deserves the highest consideration at our hands. In considering its future, we should not overlook the fact that everything upon the face of the earth which the farmers are compelled to buy for their use in order to produce these great results is burdened with taxation. They pay more and get less than any other class of our people, and against this I most solemnly and earnestly protest and appeal to the

sense of justice of this House to give them relief. I introduced a bill during the past session of Congress, which is now pending before the Ways and Means Committee, to relieve them from some of these burdens, and I desire to call attention to it for a moment. It is H. R. 18335, and is as follows:

A bill (H. R. 18335) for the relief of the farmers of the United States by repealing the tariff duty on certain articles and placing said articles on the free list.

Be it enacted, etc., That immediately after the passage of this act the following articles, when imported, shall become and continue to be exempt from duty:

First. All kinds of agricultural machines and parts thereof, such as cotton gins, steam plows, and other high-power agricultural machinery, agricultural drills and planters, farm rollers, cultivators, manure spreaders, mowers, reapers, harvesters, hay tedders, potato diggers, fanning mills, thrashing and separating machines, and the like, including those machines dutiable at 20 per cent ad valorem according to paragraph 460 of the present tariff act of July 24, 1897.

Second. All kinds of agricultural tools and implements, such as plows, harrows, rakes, horserakes, hoes, spades, shovels, axes, hatchets, forks, and scythes, including those tools and implements dutiable at 20 per cent ad valorem according to paragraph 460 of the present tariff act; handsaws, now dutiable at 30 per cent ad valorem according to paragraph 168 of the same act; pruning knives, now dutiable at 40 per cent ad valorem and upward according to paragraph 153 of the same act; grindstones, now dutiable at $1.75 per ton according to paragraph 119 of the same act, and crowbars, hammers, sledges, wedges, and the like, now dutiable at 1.5 of 1 per cent per pound according to paragraph 144 of the same act.

Third. Horseshoes, muleshoes, and oxshoes, spikes, nuts, and washers, and nails of all kinds, now dutiable at from six-tenths of 1 cent to 2¼ cents per pound according to paragraphs 160 to 163 of the same act.

Fourth. All kinds of vehicles peculiarly adapted to farm work, such as farm wagons, ox carts, lumber trucks, horse sleds and sledges, wheelbarrows, and the like; also all parts thereof, including axles, wheels, tires, chains, cart and wagon skeins, and the like.

Fifth. Hoop or band iron, or hoop or band steel, cut to lengths, or wholly or partly manufactured into hoops or ties, coated or not coated with paint or other preparation, with or without buckles or fastenings, for baling cotton or any other commodity, now dutiable at five-tenths of 1 per cent per pound according to paragraph 129 of the same act.

Sixth. Iron or steel wire rods for making rivets, screws, nails, and fencing, now dutiable at four-tenths of 1 cent per pound and upward according to paragraph 136 of the same act.

Seventh. Harness and parts of harness, suitable for animals engaged in farm work, now dutiable at 45 per cent ad valorem according to paragraph 447 of the same act.

Eighth. Bagging for cotton or for wheat or other grain, gunny cloths, and similar fabrics, suitable for covering cotton or grain, composed of single yarns, made of jute, jute butts, or hemp, not bleached, dyed, colored, stained, painted, or printed, not exceeding 16 threads to the square inch, counting the warp and filling, and weighing not less than 15 ounces per square yard, now dutiable at six-tenths of 1 cent per square yard according to paragraph 344 of the same act.

Ninth. Cloths, knit fabrics, flannels for underwear, and all other manufactures made wholly or in part of wool and valued at not more than 40 cents per pound, and ready-made clothing and wearing apparel of every description composed wholly or in part of wool and valued at less than $1.50 per pound, now dutiable at rates averaging 100 per cent ad valorem according to paragraphs 366, 367, and 370 of the same act.

SEC. 2. That all laws and parts of laws in conflict with the provisions of this act are hereby repealed.

This is a bill for the relief of the farmers of the United States and if passed would save them millions of dollars by repealing the tariff duties on the articles therein named. I feel that in justice to the farmers these agricultural implements that are used by them and with which they produce untold wealth should be placed on the free list, so that they might at least have the benefit of having the implements which they use to produce these benefits relieved from taxation in order that they may obtain them at the lowest possible price, and especially is this true when we find these very same implements are sold abroad to foreigners more cheaply than they are sold in our own country to our own people. This is one matter that I present, because I desire at this time it shall receive consideration in view of the fact that it is promised at the coming session of Congress, which will be a special session, to be called by the incoming President, that these schedules will be revised, and we will put upon the statute books a new tariff law that will fix schedules upon these as well as upon everything else upon which the taxes are levied. Therefore in view of the fact that the tariff bill is in course of preparation and will receive the attention of Congress at the coming special session, I desire to call attention especially to this bill at this time and earnestly urge its careful consideration, not only by the Ways and Means Committee but by the membership of the House.

Another question in which the farmers are vitally interested is the question of dealing in futures. I introduced a bill also upon this question. The farmers throughout the land are demanding the consideration of this question, and demand that some law shall be passed that will relieve them from the conditions that exist. This bill is as follows:

A bill (H. R. 14641) to prohibit the receipt, delivery, or transmission of interstate or foreign messages, or other information to be used in connection with, and to prohibit interstate and foreign transactions of every character and description that in any wise depend upon margins as a part thereof, and for other purposes.

Be it enacted, etc., That the term "depend upon margins as a part thereof" as used in this act shall include all transactions which in any wise depend upon or include margins as any part of the making, progress, or settlement thereof, or which do not, in good faith, in all transactions of sale and purchase, contemplate the actual delivery by the seller to the buyer of the thing or things represented or contracted to be sold, and the failure of the seller to make actual delivery to the buyer, or the failure of the buyer to, in good faith, make legal demand of the seller for the thing or things represented or contracted to be sold, shall be sufficient proof to establish the character of the transaction.

SEC. 2. That it shall be unlawful for any telegraph or telephone company, corporation, organization, or association, or any other company, corporation, organization, or association, or any person or persons within the jurisdiction of the United States of America, to receive, deliver, transmit, or convey any interstate or foreign message or other information of any character or description to be used in any manner connected with or in furtherance of any interstate or foreign transaction that depends upon margins as a part thereof. Any telegraph or telephone company, corporation, organization, or association, or any other company, corporation, organization, or association violating any of the provisions of this act shall be deemed guilty of a misdemeanor for each and every violation of the same, and upon conviction thereof shall pay the United States a penalty of not less than $10,000 for each offense, and any person violating any of the provisions of this act shall be deemed guilty of a felony for each and every violation thereof, and upon conviction shall be punished by a fine of not less than $10,000 and imprisonment in the penitentiary for some period of time not less than ten years.

SEC. 3. That interstate or foreign transactions of any kind whatsoever that depend upon margins as any part thereof is hereby declared to be unlawful, and whoever shall engage in or be a party to any transaction of the character herein forbidden, in the United States of America, shall be deemed guilty of a felony, and upon conviction shall be fined in any sum not less than $10,000 and imprisoned in the penitentiary some period of time not less than ten years.

SEC. 4. That no letter, postal card, circular, newspaper, pamphlet, or writing or publication of any other kind, containing money or other representative of value, or information of any character to be used in any manner connected with or in furtherance of any interstate or foreign transaction that depends upon margins as any part thereof, shall be carried in the mails or delivered at or through any post-office or branch thereof, or by any letter carrier or other postal agent or authority. Whoever shall knowingly deposit, or cause to be deposited, or who shall knowingly send, or cause to be sent, anything to be conveyed or delivered in violation of this section, or who shall knowingly deliver or cause to be delivered by mail anything herein forbidden to be carried by mail shall be deemed guilty of a felony, and upon conviction shall be punished by a fine of not less than $10,000 and be imprisoned in the penitentiary for some period of time not less than ten years.

SEC. 5. That the judges of the district courts of the United States are hereby directed to give this act in charge to the grand juries of their respective courts at each sitting of the court, and the evidence of either party to a transaction prohibited herein shall be deemed to be sufficient proof to warrant an indictment and sustain a conviction hereunder.

SEC. 6. That all laws in conflict with this act be, and they are hereby, repealed.

If passed, this bill would accomplish the result desired and grant one specific act of legislation demanded by the great agricultural interests of this country. It ought to pass. The farmers have a right to demand it, and I appeal to you to consider it. If you refuse to do so, then prepare to render an account to the great mass of the Americans, who are the "bone and sinew" of the land and who produce the wealth of the country on the farm.

Another matter in which the farmer is vitally interested is good roads. He is asking for national aid for this purpose. When he furnishes us a balance of trade in the past few years of $7,000,000,000, why not appropriate forty or fifty millions to begin this great work? Money could not be spent to a better purpose. Improve the roads, make means of communication pleasant in the country and you will stop the flow of population from country to town and city, you will bless humanity and prosper all the people. [Applause.]

Now, in conclusion, Mr. Chairman, let me say if we grant to the agricultural people of this country the relief to which they are entitled at our hands, and which they are demanding, we will bring prosperity not only to them, but to every class and every trade and every avocation and calling in this country [applause], because whenever you help the very foundation upon which everything else stands, whenever you help him who helps everybody else, then you help every other one engaged in every avocation and calling and trade and profession and business throughout this broad land, from one end of it to the other. [Applause.] Hence, when we furnish the prosperity to the farmer we scatter it like the sunshine of gladness from one end of the country to the other, because it goes into the homes, around the firesides, and into the lives and hearts of all the people of all classes and of all callings and professions. We should do this as a matter of duty to him. We owe it to him as his representative. We owe it to him, because of the fact, as shown by the statistics I have quoted, he does more for the prosperity of the country and for the welfare of the Nation than all the others. Whenever we respond to the demands or requests which will give to him these blessings, then we discharge a high duty not only to him but to ourselves, and we discharge a great duty which we owe to the great country in which we live, because through him we not only bless his home and his surroundings, his community and neighborhood, but we bless the whole country by bringing to all prosperity that makes gladness and joy and furnishes peace and happiness.

Mr. SIMS. I would like to ask the gentleman a question. Does the gentleman sympathize with the efforts of the uplift commission to help the farmer along?

Mr. CANDLER. Mr. Chairman, may I ask if the gentleman approves it?

Mr. SIMS. I am asking for information, as I regard the gentleman from Mississippi [Mr. CANDLER] our leader on this side of the House on all such matters.

Mr. CANDLER. I am in favor of anything that will uplift the agricultural interests of this country, and if that commission will do it, I favor it, though I do not, as a rule, favor commissions. The people's Representatives should directly attend to the business affecting the country's interests and render an account to those who send them here. I favor, however, anything on the face of the earth that will uplift the agricultural interests of the country and relieve it of the burdens under which it has labored so long, and I will gladly join hands with anything or anybody to bring about that great result. [Great applause.] To continue the great work of the Agricultural Department, I hope the Hon. James Wilson will remain in the Cabinet of President Taft as Secretary of Agriculture, because he is the farmer's friend, a statesman, and a patriot, a benefactor of the whole country, an American citizen of whom we are all proud. [Tremendous applause.]

Statehood Bill.

SPEECH

OF

HON. WILLIAM C. HOUSTON,

OF TENNESSEE,

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909,

On the bill (H. R. 27891) to enable the people of New Mexico to form a constitution and state government and be admitted into the Union on an equal footing with the original States; and to enable the people of Arizona to form a constitution and state government and be admitted into the Union on an equal footing with the original States.

Mr. HOUSTON said:

Mr. SPEAKER: As a member of the Committee on the Territories, I want to give expression to the strong sentiment that exists in my district in favor of the admission of these States into the Union. Many of the inhabitants of these Territories are the sons and daughters of my constituency, who have wished for and expected statehood for these Territories for years. I am glad that to-day there is no opposition made to this measure admitting New Mexico and Arizona as States in the Union and of adding these two stars to our flag. This long-delayed privilege of becoming States in this great Republic they are entitled to by every condition and right. They have the population, the wealth, and civilization to enter into this Union, strong-handed and able to add glory and strength to the United States.

It is unnecessary now to take up the time of this House or to dwell upon their resources, their strength and power, and their fitness. These have been presented to this House fully and repeatedly, and are admitted by all to-day. They have the will and the desire to come, and have cherished it long. This patriotic desire bespeaks a loyalty and assures a spirit that will make them worthy members of the Republic. They are bone, sinew, and blood Americans, and every patriot should welcome them.

Their right to statehood rises above partisan spirit or party consideration. It is simple justice to them and no more. Their desire to become States has been so long cherished, with a full knowledge of our institutions and the rights and privileges of statehood, that they are prepared for the step. Every true American must applaud this earnest desire and continued effort. And the diligence and patriotism that has inspired their Delegates on the floor of this House must challenge the admiration of the people of America. The distinguished Delegates from Arizona and New Mexico are entitled not only to the approval of their constituency, but the commendation of all who have seen their persistent and untiring efforts in this behalf. I know their constituency will appreciate to the full measure their efforts as do the Members of this House.

To those of us on this side of the House who hold such high esteem and sincere regard for the gentleman from Arizona, familiarly and affectionately called MARK SMITH, it is a matter of great joy that he to-day has the promise of success and reward to his long and industrious work to get Arizona admitted to statehood.

I rejoice, Mr. Speaker, to realize that if New Mexico and Arizona are not made full-fledged States of this Union before this Congress expires on the 4th of March next, it will not be the fault of this House.

Salary of the Secretary of State.

SPEECH

OF

HON. OLLIE M. JAMES,

OF KENTUCKY,

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909,

On the bill (S. 9295) in relation to the salary of the Secretary of State.

Mr. OLLIE M. JAMES said:

Mr. SPEAKER: I am opposed to the passage of this bill, because it is not only violative of the letter and the spirit of the Constitution, which we have taken an oath that we will uphold and support, but it is special legislation of the most pronounced character. When the Constitution of our Republic was formed by the fathers, they exhibited exceeding great wisdom in providing a constitutional bar against a Senator or Member of the House voting to create an office or to increase the pay of an office and then become a beneficiary of his own act. In other words, it is made impossible by this constitutional inhibition for a Member of Congress to vote the money of the people out of the Treasury indirectly into his own pocket, and therefore they were made ineligible to either hold office created during the term for which they were elected or to enjoy the increased salary of such office during the time for which they were chosen. The constitutional provision is as follows:

No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding office under the United States, shall be a Member of either House during his continuance in office.

This is the exact language of our organic law. It did not provide that if he voted for such an increase he should be ineligible, because the framers of that great instrument foresaw that it would be possible for a Member to exert his great influence to create the office or to raise the salary of the office, and after he had procured enough votes to pass it, to refrain from voting for it, or, indeed, to vote against it, in order to relieve himself of the fiercest criticism and yet become the beneficiary of his indirect act. So the Constitution provided that if an office shall have been created or the emoluments thereof increased while he was a Member, irrespective of how he voted, or whether he voted at all, he should be ineligible to hold it. Now, this bill, Mr. Speaker, stripped of all its subterfuge, unmasked of all deception, is a bill for the relief of Senator P. C. KNOX. It is to make him eligible, as the advocates of the bill contend, to hold the office of Secretary of State, which office all gentlemen upon the floor admit he is now ineligible to hold, because he was a Member of the Senate when the salary was increased. In other words, gentlemen are undertaking by this character of sleight of hand, of hocus-pocus, of "now you see it and now you don't," to remove by an act of Congress a constitutional obstacle. I maintain the position that the Constitution can not be amended by an act of Congress, that it can not be evaded by an act of Congress.

This bill, having for its purpose to make him eligible by reducing the salary to $8,000 while it leaves all the other members of the Cabinet drawing $12,000 per year, fixes the highest position in the Cabinet, that of Secretary of State, the first position in the Cabinet, at $8,000. This is so manifest upon its face that we all appreciate the frankness of the chief advocates of the bill when they boldly declare that it has but one purpose, and that is not to reduce the salary, but to put Mr. KNOX in the Cabinet. This is further shown by the fact that the bill is brought in under a parliamentary status where an amendment is out of order—that is, an amendment to reduce the salaries of all Cabinet officers to a like level of $8,000—but it leaves all these salaries at the amount to which they were increased and for which Senator KNOX voted, and merely for the purpose of trying to remove a constitutional obstacle this bill is presented.

The Constitution of our country speaks the same language to all men alike, the great and the small, the rich and the poor. It should fall, like the sunshine, upon all alike. When labor comes, with its sooty hands, begging legislation in its interest, the Constitution is held up to them as a mighty mountain that can not be removed. When the farmers, who labor from early morn till the shades of night, call for relief, that the burden they bear may be made lighter, the Constitution is held up to them as a law of the Medes and the Persians that can not be changed except by the voice of the people. Let this Congress not establish a rule that the Constitution is easily evaded by some and wholly immovable for others.

Let these great men, who are famed as constitutional lawyers, not seek to create distrust of this great instrument by legislation so questionable. Mr. Speaker, Mr. Taft has been elected President of the United States. I resisted to the uttermost his choice by the people, yet I would not throw one obstacle in the way of his selection of any man as a member of his official family. Indeed, this is my country, as well as his, and I hope the Government may be administered in justice and prosperity. Of course I regret that these eminent lawyers—Mr. Taft and Senator KNOX—had not thought of this constitutional objection when Mr. Taft announced the appointment of Senator KNOX as Secretary of State. Yet it would seem that this would have presented itself to such astute and profound gentlemen as they are, because Mr. Taft was a member of the Cabinet when the salary was raised and had been drawing the increase up to the time when he resigned. Yet it escaped him and Senator KNOX alike. But it is too much now to come and ask Congress to be a party in an undertaking to set aside the Constitution in the interest of any man. Certainly in the long line of illustrious men who advocated the election of Mr. Taft and who believed with him in the principles of the Republican party sufficient genius can be found to fill the place of Secretary of State aside from the choice he has made.

If Congress can by such manipulation as this tear down the bulwarks of the Constitution, then what is to be the final result? Offices can be created, innumerable salaries can be raised mountain high, Members of Congress can be appointed to them, and congressional legerdemain can relieve them temporarily from this constitutional objection. The Treasury can be looted; all this can be done when once you destroy the constitutional safeguards thrown around the people's Treasury. I should gladly vote to reduce the salaries of Cabinet officers to $8,000 if I had the opportunity, as I voted against their increase when it became a law; but, in my judgment, if this precedent is to be established, then the unwisdom of it will be many times established and regret for this action often expressed, and the Treasury will suffer in consequence. It is better to stay upon the beaten path the fathers trod, upon the broad highway of the Constitution. This, and this alone, is the way of safety, whether we are dealing with the humblest citizen or the greatest genius.

Salary of the Secretary of State.

SPEECH

OF

HON. WILLIAM G. BRANTLEY,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909,

On the bill (S. 9295) in relation to the salary of the Secretary of State.

Mr. BRANTLEY said:

Mr. SPEAKER: It is unquestionably true, as has been stated, that the pending bill, which simply reduces on and after March 4 next the salary of the Secretary of State, does not in and of itself raise any constitutional question, for the power of Congress to reduce this salary is not open to debate. Can any Member of this body, however, vote for this bill without taking into consideration its real purpose, which purpose does involve a constitutional question? It is necessary to bring into view this real purpose in order to find, not a justification, but an excuse for voting for it. The bill on its face proposes a discrimination and an injustice that needs to be defended. Its only declared purpose is to fix the salary of the Secretary of State, who is commonly known as the "premier of the Cabinet," at a less amount than is fixed by law for every other member of the official family who will sit around the Cabinet board with him. The bill not only thus singles out the high and honorable post of Secretary of State for this discrimination, but its effect carries this discrimination yet farther, for when it has become a law the Undersecretary of State, who will then have been created, will have an allowance for his compensation $2,000 a year greater than that provided by this bill for his chief. It is not claimed by anyone that there is any spirit of economy back of the proposed reduction, but on the contrary its real purpose is not only known, but has to be known in order to find any supporters for it. That purpose is to qualify for the office of Secretary of State a distinguished Senator who would otherwise admittedly be disqualified. The constitutional question that is therefore involved in this purpose of the bill is thus directly before the House for each Member to solve for himself.

I have no disposition to find fault with those who have elected to solve it in a manner different from that chosen by me. I am content to stand on my own judgment, leaving to others, uncriticised by me, to do the same thing for themselves. In 1 Ohio State Reports, 83, McCook's New Series, the court says:

> The legislature is of necessity in the first instance to be the judge of its own constitutional powers. Its members act under an oath to support the Constitution and in every way are under responsibilities as great as judicial officers. Their manifest duty is never to exercise a power of doubtful constitutionality. Doubt in their cases, as in that of the courts, should be conclusive against all affirmative action.

Under this rule, which, in my judgment, is the true rule to govern legislative action and is most admirably stated, I can not vote for this bill. I freely concede the great ability and the high character of the distinguished and honorable man for whose advantage the bill is proposed. I also concede the importance to the incoming administration, and as well to the country, to have him fill the office of Secretary of State, but important as these things may be and are, I conceive it to be more important to preserve the Constitution. I am in no sense responsible for the coming into power of the new administration, but I have too much respect for the President-elect and feel too kindly disposed toward the success of his administration to vote for this bill, for I believe that the protests heard here are but the beginning of the storm that will break upon the dawn of his administration should this bill become a law and its purpose be carried into effect.

The immediate and direct effect of this bill, in calling into office an able, courtly, and accomplished gentleman, will not be bad, but its effect in setting a precedent for the evasion of the plain language of the Constitution will be tremendously bad. When we consider only the practical purpose of the bill, it does not appear to be of very great importance, but it is impossible ever to measure the importance of a departure from the Constitution. If it is not important to adhere to the Constitution, then there is nothing under our system of government that is important.

The question presented to us, it seems to me, is a very simple one, and one that, with all due deference to the opinion of others, I do not see any room for differences of opinion upon. Paragraph 2, section 6, Article I of the Constitution reads:

> No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States, shall be a Member of either House during his continuance in office.

On February 26, 1907, there was approved an act which, among other things, increased the salary of the Secretary of State from $8,000 to $12,000. This act has been in force for nearly two years, and the increased salary provided for has been duly and regularly paid. At the time this act became a law the Senator in question was a Member of the Senate for a term not yet expired, and which will not expire until March 3, 1911. Applying the facts to the law declared in the Constitution, no one can say that Mr. KNOX is now eligible to become Secretary of State. The introduction of the pending bill is an admission of his ineligibility, and everyone, as I understand the situation, admits that he is now ineligible.

The question presented to us is, Will the pending bill remove the ineligibility? It is important to determine first what has caused the ineligibility; for if it be a mere act of Congress, Congress can repeal it, but if it be the Constitution Congress can furnish no relief. The act of February 26, 1907, is the only act that in any way relates to the subject, and that act has no word of disqualification or ineligibility in it, and if it be repealed there will be nothing about disqualification or ineligibility repealed, for the act does not deal with these subjects. The repeal of this act will not and can not repeal the fact that under it the salary of the Secretary of State was actually increased and paid.

The records of the Treasury Department will continue to show after the repeal of the act that for a period of two years, during the time for which Mr. KNOX was elected to serve as a Senator, the emoluments of the office of Secretary of State were increased. Is it this increase of emoluments that has brought about the disqualification? It would not be correct to answer this in the affirmative, for a mere increase of the emoluments, if no more appeared, would not disqualify. The increase of the emoluments, however, is the fact that brought into play the Constitution, and it is the Constitution and not the increase of emoluments that has accomplished the disqualification. Gentlemen on the other side give away their case completely when they admit, as they have to admit, that Mr. KNOX is now disqualified, for if he is disqualified at all he is disqualified for the full constitutional period, which is "during the time for which he was elected." If he is not now disqualified, there is no necessity for this bill, and if he is disqualified it is because the Constitution has disqualified him for a fixed and certain period that is beyond the power of Congress to change. Under the Constitu-

tion he must be disqualified "during the time for which he was elected," or else he is not disqualified at all. For my own part, I can see no escape from this conclusion. The section of the Constitution in question is plain and unambiguous. Chief Justice John Marshall said (9 Wheaton, 4):

> As men whose intentions require no concealment generally employ the words which most directly and aptly express the idea they intend to convey, the enlightened patriots who framed our Constitution and the people who adopted it must be understood to have employed words in their natural sense and to have intended what they said.

If we must, therefore, assume that the framers of the Constitution meant what they said, and I so assume without regard to their purpose, it necessarily follows that no Senator, during the time for which he was elected, can be appointed to any civil office under the authority of the United States the emoluments whereof shall have been increased during such time. It would have been a very simple matter for the framers of the Constitution to have added a proviso permitting a revocation of the increased emoluments and a consequent removal of the prohibition against appointment, but in their wisdom they did not see fit to do so, and neither this Congress nor any other Congress can supplement their work by doing it for them.

Mr. Chief Justice Marshall also said (4 Wheaton, 370):

> But, if in any case the plain meaning of a provision, not contradicted by any other provision in the same instrument, is to be disregarded because we believe the framers of that instrument could not intend what they say, it must be one in which the absurdity and injustice of applying the provision to the case would be so monstrous that all mankind would without hesitation unite in rejecting the application.

So, Mr. Speaker, those who would disregard the plain meaning of the Constitution in this case, because they can not believe the framers of the Constitution ever intended that Senator KNOX should be kept out of the office of Secretary of State for the short period of two years, simply because he was a Member of the Senate when the emoluments of that office were increased, must be prepared to demonstrate that the application of the constitutional prohibition against him will work an absurdity and injustice so monstrous that all mankind will protest against it. I do not suppose that any gentleman here believes that such a demonstration can be made, and yet it is required to be made under the rule of construction laid down by Judge Marshall in order to disregard the plain meaning of the language of the constitutional provision involved.

Gentlemen say, however, that when this bill is passed and the 4th of March comes around Senator KNOX will not then be disqualified, because at that time the increased salary will not be in operation, and he therefore can not profit by it, and that the time to judge of his qualification for the office is the time when he is appointed to it. They say that at that time the reason for the constitutional prohibition will have ceased and that with the elimination of the reason for it the constitutional prohibition itself will cease. The language of that part of the constitutional provision in question does not, I submit, authorize any such construction. The latter part of the provision does admit of such construction, and in fact no other construction could be placed upon it. This latter part reads:

> And no person holding any office under the United States shall be a Member of either House during his continuance in office.

Under this language a Cabinet officer can not be a Senator, but such Cabinet officer can resign his Cabinet position and ipso facto he is at once eligible for the senatorial toga. The prohibition against him is limited only "during his continuance in office" as a member of the Cabinet, and the moment he ceases to be a Cabinet officer that moment the prohibition ceases. This is the plain meaning of the latter part of the constitutional provision, but no such meaning can be given to the totally different language employed in the first part of it.

A reference to the debates in the Constitutional Convention and to every treatise on the Constitution that I have read shows that the purpose of the latter part of the provision was to prevent a man while under executive influence from being a lawmaker, and that the purpose of the first part of the provision was to prevent executive influence and improper influence of every kind being exerted on the mind of the lawmaker at the time of making laws. The language—

> No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States or the emoluments whereof shall have been increased during such time—

was not designed primarily to keep Senators and Representatives from holding certain civil offices, but was designed to keep Senators and Representatives from voting to create improper and unnecessary offices and from voting for improper and extravagant emoluments. It was designed to remove from them the temptation or the hope of personal profit by such improper votes. Clearly this could not be accomplished unless the prohibition immediately attached and became effective the moment the new office was created or the emoluments were increased. If there is to be any disqualification, therefore, it is a disqualification that begins immediately upon the happening of either of these things, and once it begins it must by the very letter of the Constitution continue "during the time" for which the Senator "was elected." That this is the true construction of the Constitution it seems to me is made plain by the following quotation from Rawle on the Constitution (chap. 19, p. 188):

> A Member of either House may be appointed to an office existing previously to his being elected if the emoluments of it have not been increased during the time for which he was elected. But if a new office has been created, or the emoluments of an old one increased during that time, the promise or the chance of receiving an appointment to it, may have an undue influence on his mind. Such an appointment is, therefore, forbidden by the Constitution, during the time for which he was elected, and it is only to be regretted that it was not forbidden altogether.

This construction was strikingly upheld in the case of Governor Kirkwood by Attorney-General Brewster. Governor Kirkwood had qualified as a Senator for a term that did not expire until March, 1883, but during his term had resigned to accept the office of Secretary of the Interior, and had subsequently, but within the period of the senatorial term to which he had been elected, resigned this office and retired to private life. After his retirement from the Senate and on May 15, 1882, there was approved an act creating the office of tariff commissioner, and the question submitted to the Attorney-General was as to his eligibility to be appointed to this office before the senatorial term to which he had been elected had expired. Attorney-General Brewster held that he was not eligible. He said:

> The rule is absolute as expressed in the terms of the Constitution, and behind that I can not go.

In this case it will be noted that Governor Kirkwood was not a Senator when the new office was created, and therefore was not and could not have been improperly influenced to create it, and gentlemen who talk about the reason for the constitutional prohibition will do well to inquire as to the "reason" for Governor Kirkwood's ineligibility. There was no "reason" other than the mandate of the Constitution, and, so far as I know and believe, there is no "reason" now for Senator KNOX's ineligibility other than this same mandate. If the rule is absolute when applied to the appointment to an office newly created, is it not just as absolute when applied to the appointment to an office the emoluments of which have been increased?

Attorney-General Brewster thought it was the Constitution that disqualified Governor Kirkwood, and behind that, he said, he could not go. Has Congress any more power to go behind the Constitution than he had? Gentlemen say, however, that Congress will not be going behind the Constitution to pass this bill. That is very true, directly speaking, but when Congress passes this bill, it will be an invitation extended by Congress to the President-elect to go behind it and an invitation coupled with the assurance of the Congress that to go behind the Constitution is an entirely proper and correct thing to do. I am not prepared to extend the invitation or to give the assurance.

The proposed legislation is objectionable aside from any constitutional question, for it seems to me to be unseemly and in violation of the proprieties and of good legislation in many ways.

It proceeds upon the theory that there is only one man in the United States competent and worthy to hold the position of Secretary of State. What a lamentable condition we have fallen into to adopt this theory! It proceeds upon the further theory that the man who occupies the post of Secretary of State must be a man of wealth, for whom salary has no charm. Why should the poorer man be ruled out from this office? The discrimination and inequality created by this bill may cause serious complications.

Suppose after it is passed Senator KNOX does not take advantage of it; then what? Again, is the reduction to be permanent? Nobody believes that. When the increase is made there will follow a new period of disqualification, and again it may become necessary to reduce the salary in order to let some other favored and chosen son occupy a desirable post. What a commentary upon the work of the fathers that Congress can take one of the mandatory provisions of the Constitution they framed and play hide and seek with it!

The travesty on constitutional law that is to-day being prepared for is clearly shown when we note that under this bill it is proposed that Mr. KNOX, while remaining for two years ineligible to every other cabinet office (the salaries of all having been increased at the same time), shall, on March 4 next, be

eligible for the office of Secretary of State. Think of a constitutional provision under which, on March 4 next, Mr. KNOX will be ineligible to hold the office of Attorney-General, an office that he has already ably and creditably filled, but will be eligible to hold the office of Secretary of State!

Mr. Speaker, if this bill becomes a law, which it probably will, and if the purpose of it is executed, which I pray it may not be, then the promise of constitutional government during the next four years will be dim and shadowy, and the hope that has been builded upon the incoming administration will be shattered and destroyed. This bill is the first step toward the establishment of a dangerous precedent, and I must decline to take it.

Salary of the Secretary of State.

SPEECH

OF

HON. WILLIAM P. KIMBALL,

OF KENTUCKY.

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909,

On the bill (S. 9295) in relation to the salary of the Secretary of State.

Mr. KIMBALL said:

Mr. SPEAKER: I desire to protest against the enactment of this legislation, the plain purpose of which is to nullify a provision of the Constitution, the wisdom of which has never before been called into question. In so doing I disclaim any partisan feeling or any hostility to the President-elect or to the Senator whom he desires to have serve as the premier of his administration.

Senator PHILANDER C. KNOX is a good lawyer, probably one of the ablest on the majority side of the Senate. William Howard Taft's long service on the bench ought to have thoroughly acquainted him with the principles of our jurisprudence. By all of the traditions of the profession both should be engaged in upholding and preserving the Constitution and the laws of the land instead of encouraging and supporting a measure devised for the purpose of evading a plain provision of the Constitution. How can the masses of the people be expected to respect the law and reverence the Constitution when the great leaders of the profession seem to regard our organic law as a mere village ordinance, to be altered or repealed at the whim or caprice of the village fathers?

Article I, section 6, of the Constitution provides:

No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased during such time.

It is admitted that during the present term of the junior Senator from Pennsylvania the salary of the Secretary of State was increased from $8,000 to $12,000 and that he voted for the increase.

The moment the law providing for such increase in salary became operative by executive approval the Senator became ineligible for appointment to the office of Secretary of State until the time for which he was elected had expired. When that ineligibility once attached to him, it could not be removed save by the removal of the prohibitory clause of the Constitution.

I suppose that no one will contend that Congress can repeal the Constitution or any part of it any more than it can enact a valid ex post facto law.

It has been stated here that the debates in the Constitutional Convention on the adoption of the section now sought to be nullified show that it was not the intention of the framers of the Constitution that it should apply to a case like this. I have not had the time to examine the debate, and am therefore unable to say what was spoken in regard to the purposes for which it was made a part of the organic law. But what the framers said on that occasion would have little bearing on the merits of the legal proposition here involved. It is an elementary principle of statutory construction that the expressions of the legislators at the time of the adoption of a statute are not at all conclusive of legislative intent. The intent is to be gathered from the language of the statute itself, the conditions prevailing at the time of its adoption, the evil to be corrected, the right to be protected, or the wrong to be prohibited, as the case might be. The utterances of those enacting the statute possess the least significance of all the factors to be considered in its construction.

I wish the incoming President a happy and successful administration of his great office. I trust that in the discharge of his duties he will substitute sane conservatism for hysteria and practical statesmanship for gallery playing. But for his own reputation, as well as that of the great Senator from Pennsylvania, I hope he will not begin that administration with a Secretary of State in office whose right to hold the office is, to express it in the mildest possible term, questionable.

Rutherford B. Hayes was a man of blameless life, so far as his personal character and manner of living were concerned. But yielding to party emergency he accepted the Presidency, an office to which he was not elected; and, as a result, his memory is only kept alive by that fact and the further fact that a great metropolitan newspaper printed his picture on the first page with the word "Fraud" in large black letters stamped on his forehead.

The passage of this bill and the assumption of the portfolio of state by Senator KNOX will mar his fame as long as his name is remembered among men.

Believing that a strict construction of the Constitution and a faithful observance of its provisions by those in authority under it is the only sure guaranty of the perpetuity of free republican institutions, I trust that the House of Representatives will not put itself on record as saying, in the language of the New York Congressman, "What is the Constitution between friends?"

Salary of the Secretary of State.

SPEECH

OF

HON. COURTNEY W. HAMLIN,

OF MISSOURI,

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909,

On the bill (S. 9295) in relation to the salary of the Secretary of State.

Mr. HAMLIN said:

Mr. SPEAKER: The attempt has been made by some of the proponents of this measure to conceal the real object in its passage by saying it is not an attempt to evade a provision of the Constitution, but simply a bill to reduce the salary of the Secretary of State from $12,000 to $8,000 per annum.

This excuse is entirely too thinly veiled to mislead any intelligent person. If it were only an attempt to reduce the salary, then it is my deliberate judgment that every man now advocating the passage of this bill would be opposing it. You Republicans have not made yourselves famous in the past for reducing salaries, but the exact opposite is true.

If the purpose is simply to reduce the salary, then why only cut down the salary of the chief officer of the Cabinet? Why not include the salaries of all the Cabinet officers?

I a few moments ago submitted a parliamentary inquiry to the Speaker, which was, "Is this bill subject to amendment?"

The Speaker ruled that it was not subject to amendment. If he had ruled otherwise, I had ready and was going to offer an amendment reducing the salaries of all the Cabinet officers from $12,000 to $8,000 per year, so as to make them all equal.

That the real purpose of the bill is not to simply reduce the salary is apparent when you consider the fact that there is now in conference a bill creating a new office, known as "Undersecretary of State," at a salary of $10,000 per year, and another bill pending, and will doubtless pass, increasing the salaries of the Speaker, Vice-President, President, and all the federal judges almost double. It looks to me like a poor way to economize.

Think of the anomaly of a subordinate in the office drawing $2,000 per year more salary than his chief.

No, Mr. Speaker, the real and only purpose of this bill is if possible to render Senator KNOX eligible to hold the office of Secretary of State in the Taft Cabinet. I have no objection to Senator KNOX holding that position; in fact, would like to see him have it if he were eligible; but if, in order for him to take it, the Constitution is to be ignored, evaded, yea, positively violated, then I do not want to see Mr. KNOX Secretary of State.

That his selection under the circumstances would be a violation of the Constitution I have no doubt.

The second subdivision of section 6 of Article I of the Constitution provides:

No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased during such time, etc.

Now, Mr. KNOX is a Senator, and his term as Senator will not expire by operation of law for two years yet. The "emolu-

ments" of the office of Secretary of State have been "increased" during the time Mr. KNOX has been Senator. The office to which Mr. Taft proposes to appoint him is a "civil office under the authority of the United States." These facts, all agree, clearly render Mr. KNOX ineligible to this appointment unless some way can be found to circumvent the plain provisions of the Constitution.

Mr. Speaker, the question is simply this: Can you evade this plain provision of the Constitution by simply repealing the statute increasing the salary of the Secretary of State? I think not. You will observe there are two things—just two things—under this provision of the Constitution which render every Senator and Representative ineligible to "be appointed to any civil office under the authority of the United States" during the term for which he is elected:

First. If the office was created during the time he was a Member of Congress.

Second. If the salary of the office was increased during the time he was a Member of Congress.

These two inhibitions stand exactly on the same footings. If you can evade one by legislation you can evade the other.

Instead of increasing the salary, suppose the office of Secretary of State had been created during the time Mr. KNOX was Senator? Then, according to your ideas and logic, the way to make him eligible to hold the office prior to the expiration of his term as a Senator would be to pass a law abolishing the office; then you would find yourselves in this ridiculous position of having a willing "Barkis" but no office for "Barkis" to fill. Yet this provision is no more a bar to his eligibility than is the other, but you propose getting around the other by simply reducing the salary to where it was before Mr. KNOX came to the Senate and to keep it there until the term for which he was elected a Senator shall have expired, and then put the salary back to $12,000 and perhaps more.

A shameless subterfuge—a reckless disregard of the fundamental law of the land.

This mode of procedure, it seems to me, would evoke some surprise and astonishment if advocated by the Roosevelt administration; a fortiori ought it to create surprise when advocated by Judge Taft and Senator KNOX, two of the foremost lawyers of the country and both of whom will take an oath to support the Constitution of the United States. Yet if this bill becomes a law and Senator KNOX accepts this appointment, the Taft administration will start off with an open violation of the Constitution, which, above all things else, ought to be held sacred and inviolable if our beloved country shall continue to exist and the liberties of our people shall be preserved.

Salary of the Secretary of State.

SPEECH

OF

HON. JOHN C. FLOYD,

OF ARKANSAS,

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909,

On the bill (S. 9295) in relation to the salary of the Secretary of State.

Mr. FLOYD said:

Mr. SPEAKER: I desire to present my views in opposition to the pending measure. I regard it as unfortunate for the country that at the outset of a new administration a contingency should have arisen which has led those in authority to demand legislation of such a questionable character. The bill under consideration relates wholly to the salary of the Secretary of State, and on its face is a simple proposition to reduce the salary of that officer to $8,000 per annum. That within itself could do no harm, but the real purpose of the bill is to remove the disqualifications of a Senator to hold the position of Secretary of State under the next administration, who, by reason of a former act of Congress passed during his term of office, increasing the emoluments of all Cabinet officers, is rendered ineligible thereto by the Constitution of the United States. In other words, it is an attempt on the part of Congress to annul or evade a plain provision of the Constitution by subsequent legislative enactment which on its face is discriminatory and unjust, and which I regard as a mere legislative subterfuge.

It is well known that Senator KNOX has been selected by President-elect Taft for the position of Secretary of State under his administration. By act of Congress approved February 26, 1907, less than two years ago, the salaries of the heads of the executive departments of the Government were increased from $8,000 to $12,000 per annum. Senator KNOX at the time of the passage of this act was a Senator and the term for which he was elected expires March 3, 1911.

Paragraph 2, section 6, Article I of the Constitution is as follows:

> No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States, shall be a Member of either House during his continuance in office.

By virtue of this provision of the Constitution, not only Senator KNOX but every other Senator and every Representative in Congress became ineligible during the time for which he was elected to hold any office named in the act of February 26, 1907, the emoluments whereof were increased thereby. This disqualification attached and became operative at the moment the act was approved.

The purpose of the bill under consideration, and the sole purpose of it, is to reduce the salary of the Secretary of State to $8,000 per annum, thereby restoring the original salary, to the end and with the view of evading this plain principle of the fundamental law—a definite provision of the Constitution itself. That such is the object of the bill is not denied; on the contrary, it is openly admitted and avowed. This proposal involves two important inquiries: First, when the constitutional disqualification has once attached and become operative by reason of the passage of a bill increasing the emoluments of an office, can eligibility be restored by a repeal of the act? Second, conceding that the constitutional provision can be thus evaded, what contingency can arise that would justify the policy or warrant the impropriety of such a proceeding?

Let us consider for a moment the first proposition. I have heard no one deny that, under the law as it now stands, Senator KNOX is disqualified from holding the position of Secretary of State. His ineligibility is universally conceded. Then when did he become disqualified, and how? By his own act or vote? Certainly not. It is wholly immaterial whether Senator KNOX was present in the Senate when the bill was passed through that body, and it is equally immaterial whether he voted for it or against it.

He is disqualified by reason of the fact that, having been elected a Senator for a certain term, Congress during the time for which he was elected passed an act which increased the emoluments of the office of the Secretary of State. If disqualified, this disqualification was brought about by the passage of the act increasing the salary of the Secretary of State and attached at the time that the act was approved by the President. From February 26, 1907, the date of the approval of the act, not only Senator KNOX but every other Senator and all the Members of the House have been disqualified from holding any Cabinet position or any other civil office under the United States the emoluments whereof shall have been increased during the time for which they were elected. The disqualification referred to is brought about by the happening of a contingency. The moment that contingency happens the constitutional inhibition applies in full force and vigor. It is therefore absurd to contend that the happening of an event which makes the constitutional provision operative can be repealed or that the effects of its operation can be annulled or evaded by subsequent legislative enactments. The bill, if passed, in my judgment, will be inoperative, null, and void in so far as it seeks to make eligible for office a Senator or Representative who is ineligible therefor.

Let us now consider the second proposition. For the sake of argument, let us concede that it is in the power of Congress to avoid the binding force of the constitutional provision referred to by repealing all or, as in this case, a portion of the law which rendered ineligible the appointment of Senators and Representatives to offices the emoluments whereof have been increased during the time for which they were elected; what about the wisdom or the propriety of so doing?

I fully appreciate the situation that has called for the introduction of this bill and that has enlisted such strong support in behalf of its passage. I have no criticism of the motives, patriotism, or devotion to principle of anyone who votes for it. A generous loyalty toward Mr. Taft, the President-elect, and a high regard for Senator KNOX, whose great abilities and statesmanship are recognized by all, and a desire to relieve the incoming administration from an embarrassing situation, which we all deplore, are no doubt the underlying causes which prompt so many Members to give their support to the passage of a bill which, to my mind, is a legislative absurdity and a monumental blunder. It is an error to suppose that the success of any administration must depend upon any one man. Appointive officers should be selected from the ranks of men who

are able, competent, and eligible to such appointments under the Constitution. Congress having passed a law which rendered its entire membership ineligible for appointment to Cabinet positions for a time should not repeal that law now for a special purpose or to remove the disqualifications of any one individual. The principle involved in the character of legislation proposed in this bill I regard as vicious and bad. The precedent we will establish by its passage I regard as mischievous and dangerous. Legislation should be general and not special or personal. This legislation is sought for a specific purpose, namely, to remove the disqualifications of a particular individual to hold a particular office. In order to do this it is proposed to reduce the salary of the Secretary of State, the highest Cabinet officer, to the sum of $8,000 per annum and leave upon the statute books a law fixing the salaries of all other Cabinet officers at $12,000 per annum. This, on the face of it, is discriminatory and unjust.

If the services of Senator KNOX are so important to the new administration, if he is the one man that even the Constitution must not be allowed to bar from the Cabinet, then Congress in common fairness should repeal the act providing for increased compensation for the heads of the departments and reduce all their salaries to the sum of $8,000 a year, and thus restore the old law. I am afraid we are about to make a bad precedent. This great legislative body should not indulge in favoritism or discrimination or enact laws that give rise to such. We should not do by indirection what we can not do directly. It has been well said in the course of this debate that by this bill we are asked to legislate in the interest of one man. Literally this is true, but in a broader sense we can not legislate in the interest of any one man alone. Whatever we do affects the whole people generally. We are about to inaugurate a new and dangerous innovation. We are about to furnish to the country and to the world an example of lawmakers showing a willingness to evade, or at least to avoid, the provisions of the Constitution, when an emergency arises which in their judgment warrants them in so doing. The legislation proposed is ill advised. Precedents repeated, establish customs. Customs long continued, acquire the binding force of law. Instead of seeking to find means of avoiding the letter or the spirit of the Federal Constitution it should be the aim and pride of all true Americans to uphold it in all its vigor and defend it if need be by our lives, our fortunes, and our sacred honor. Evade the Constitution and you will create in the public mind a disrespect for the Constitution. Evade the law and you will create in the public mind a contempt for the law. Believing that the object sought to be accomplished by this legislation is of questionable propriety and against the spirit and clear meaning of plain provision of the Constitution, I shall vote against the bill.

"What's the Constitution Among Friends?"

SPEECH

OF

HON. J. DAVIS BRODHEAD,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909,

On the bill (H. R. 28058) in relation to the salary of the Secretary of State.

Mr. BRODHEAD said:

Mr. CHAIRMAN: Upon the face of this bill its purpose is to reduce the salary of the Secretary of State from $12,000 to $8,000. The bill will probably pass, although the large majority of the Members of this House believe that $12,000 per annum is a very reasonable salary for the great office of Secretary of State of this Nation. Almost all of the Members on the other side, who are now about to vote to reduce this salary, voted to increase it in the second session of the Fifty-ninth Congress when they passed the bill, approved February 26, 1907, by which the salaries of the Cabinet officers were raised.

We are now about to witness the ridiculous exhibition of these same Members voting to reduce the salary of the premier of the Cabinet below that of all the other members, even below that of his own "undersecretary."

What is said in justification of such an apparently absurd action? This: That the learned jurist, the President-elect, some time since decided to appoint the distinguished Senator from Pennsylvania as Secretary of State, and that at the time of such selection neither the President nor the Senator recalled the fact that there was a constitutional prohibition against such appointment. And now they want to get around it the best way they can.

Mr. Chairman, I am proud of Pennsylvania. It is my native State—my home. I have now the honor of being a Representative in this honorable body from that Commonwealth, and my father was a predecessor of the distinguished Senator in question. I therefore would like to see Pennsylvania furnish to the incoming administration the head of the Cabinet in the person of the Secretary of State. But state pride should not lead one to consent to the circumventing of the Constitution.

The situation is this: The honored Senator was elected by the legislature of Pennsylvania in January, 1905, for the term expiring March 3, 1911. The honorable Senator voted for the act, approved February 26, 1907, increasing the salary of the Secretary of State from $8,000 to $12,000. Such are the facts. Now apply the high law of the Constitution to the admitted state of facts. Paragraph 2, section 6, Article I of the Constitution of the United States is as follows:

> No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States, shall be a Member of either House during his continuance in office.

It does not take much of a constitutional lawyer to conclude that as the facts and the Constitution now stand the honorable Senator can not be appointed Secretary of State. This may not be a question of "The Lady, or the Tiger?", but it is a question of "The man, or the Constitution?"

It is proposed by this bill to repeal so much of the act of February 26, 1907, as applies to the salary of the Secretary of State so as to reduce it back to $8,000; and it is claimed that by so doing the Senator will be eligible, and the fact that the emolument of the office to which he is about to be appointed had been increased during the time for which he had been elected Senator is to be wiped out.

I always thought the Congress of the United States was indeed an august body, but now I am awed at its incomprehensible power, for we are about to witness the changing of an historically established fact by the mere passage of a statute. The fact that during the time for which the Senator had been elected the emoluments of the civil office to which he is about to be appointed had been increased renders it constitutionally impossible to appoint the Senator to the civil office in question.

Now, the proposition is not to change the Constitution, but to change the fact. Wonderful, is it not? Strange that the learned gentlemen involved did not see the constitutional prohibition, or seeing it, insist on getting around it. The Tammany statesman who made the world laugh at his exclamation, "What's the Constitution among friends?" has to-day been vindicated as a constitutional solon. But, the Senator voted to increase the President's salary during the time for which the Senator had been elected, and assuming that this act, if passed, will change the fact as to the office of Secretary of State, what would be the situation if the office of President and Vice-President should become vacant during the next four years and the Senator, as Secretary of State, third in line of succession, should be called upon to assume the duties of the office of President, the emoluments whereof had been increased during the time for which he had been elected Senator? I have often heard of the individual danger of "monkeying" with a buzz saw; I am now convinced of the national danger of "monkeying" with the Constitution.

Mr. Chairman, the ostensible purpose of this bill is to reduce the salary of the Secretary of State below that of all the other members of the Cabinet, even below that of his assistant. To this I am opposed. The people of this mighty Nation do not object to attaching to the great office of Secretary of State a salary commensurate with its dignity and importance. Anyhow, it is but a temporary makeshift, for we all know that the salary will be put back to $12,000, or maybe more, as soon as possible. The declared purpose—declared upon this floor—is to make one certain man eligible for the office. If that be true, then I respectfully submit the following preamble:

> Whereas the President-elect seems limited in his selection of a Secretary of State to United States Senators who voted for the act approved February 26, 1907, increasing the salary of the Secretary of State from $8,000 to $12,000; and
>
> Whereas, under paragraph 2, section 6, Article I, of the Constitution of the United States, such action disqualified all such Senators from holding said office of Secretary of State during the time for which they were elected; Therefore, to get around the Constitution as gracefully as possible, be it enacted, etc.

Then let this proposed act follow. Would not the preamble, although reciting the facts, be ridiculous? Yes, ridiculous, but alas, true.

Wireless Telegraphy on Ocean Steamers.

SPEECH

OF

HON. ANDREW J. PETERS,

OF MASSACHUSETTS,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, February 16, 1909,

On the bill (H. R. 27672) to require radio-telegraphic installations and radio-telegraphers on certain ocean steamers.

Mr. PETERS said:

Mr. CHAIRMAN: The protection of the traveling public demands that wireless apparatus should be made a part of the equipment of our seagoing vessels. The bill which we are now considering is similar in its application to the bill introduced by myself (H. R. 27318), which the Committee on Interstate and Foreign Commerce has considered. This bill makes necessary the use of wireless apparatus on all ocean-going steamers certified to carry 50 or more passengers and plying between ports 200 or more miles apart by sea, and provides as a penalty for failure to comply with its provisions a fine of $3,000.

The necessity of having this legislation apply to coastwise as well as foreign vessels is obvious, not only on account of the coastwise trade, but also because the coastwise vessels from our Atlantic ports cross the courses of the ocean steamers, and so are a menace both to the trans-Atlantic steamers and to each other. The measure now includes the application of its provisions to coastwise vessels, and therefore I believe it should merit the support of the House.

The matter of wireless communication is now beyond the experimental stage. To-day this system is in actual, regular operation, and a tremendous disaster at sea was only recently averted by its use.

The natural desire to give their passengers the best service is bringing about the use of the wireless apparatus on the higher-class and better-equipped ships. That the mere self-interest of the steamship companies is not sufficient to rely upon to provide its general application must, I think, be admitted. Devices for safety appliances for car couplers and for lifeboats and life-preservers all depend on legislation to provide their equipment.

Last year, of the 244 foreign steamers entering Atlantic ports, 134 were without wireless equipment of any kind, and out of a total of 253 American ships affected by this law, 127 were not equipped. These are the latest figures obtainable, but a slight variance must be allowed for from the slow adoption of this necessary safeguard on steamers already in commission as well as installations on new boats.

The 134 foreign vessels which enter American ports regularly unequipped with wireless carry steerage passengers alone to the number of 128,730 per single voyage. The cabin capacity of the same vessels per single voyage is 60,155.

The cost of equipment amounts in passenger vessels to about $1,000. The contracts of most of the companies provide that the telegraph company shall pay the operator's salary and furnish free of charge to the vessel all messages relative to the running of the ship. The foreign vessels are almost exclusively supplied with the Marconi system, but on the American vessels there are four companies competing with each other—an active competition, which would seem to render the possibility of collusion and the raising of prices to the point of extortion at least remote.

The Boston Chamber of Commerce, the New York Produce Exchange, the Commercial Exchange of Philadelphia, and the Trades League of Philadelphia have all communicated with their Representatives in favor of some such measure. In regard to the cost, which is $1,000 for the apparatus, it should be borne in mind that the presence of the apparatus on ships renders the cost of insurance less, and it is estimated that, considering the decrease in the cost of insurance as credited to the cost of supplying the system, the wireless outfit will cost the companies only about one-half its yearly rental price.

The United States is itself in a particularly fortunate position to commence legislation of this nature, as the Government already has approximately 60 stations equipped and in operation in this country. It is possible that the higher class vessels would provide the apparatus voluntarily on account of the commercial return, but the necessity of this bill is especially to protect the lives of the passengers on the steerage vessels, and it can be seen that the steerage vessels are those not provided with the apparatus. The protection of all passengers, but particularly those traveling in the steerage, demands that the Government of the United States should take the forward step in passing legislation of this nature.

The vital importance of federal action at this time lies in accomplishing immediate and thorough results in the safeguarding of life and property on the high seas. In addition to its effectiveness upon all shipping flying our own flag, the bill has the value of enforcing compliance with its humane provision upon all foreign shipping entering our ports, a restriction to be associated with quarantine regulations, and to be no more resented than the latter.

If left merely to the commercial self-interest of the various steamship companies, the installation of wireless apparatus will gradually be accomplished, no doubt, but the process is certain to be sporadic, and may hang fire several years, according to the occurrence of disaster by sea and the effective force of an easily diverted public opinion. In the meantime the conditions attending the loss of the *Republic* are susceptible of daily or weekly recurrence.

Sundry Civil Appropriation Bill.

SPEECH

OF

HON. MICHAEL E. DRISCOLL,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Thursday, February 25, 1909,

On the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes.

Mr. DRISCOLL said:

Mr. CHAIRMAN: I trust this amendment providing for the continuation of the analyzing and testing of coals, lignites, and other fuel substances during the ensuing year will prevail. I am especially interested in it, so far as it relates to the peat deposits of the country, and the further investigation of the subject of drying and preparing this material for fuel, and so handling it that it may be an economical and commercial success. The people are wide awake now to the need of conserving our natural resources; of not wasting coal or wood, or consuming more than is reasonably necessary. Substitutes for lumber are sought for, and cement and other materials are being substituted for building purposes, and if a substitute for fuel for domestic use can be found the effect will be to save our ordinary wood lots and allow the smaller trees to grow and the forests to develop naturally. If the peat in those deposits throughout the country can be economically treated and used for making producer gas and for ordinary fuel, it will help solve the question of preserving our woods and coal deposits. Those peat bogs are scattered so generally throughout the country, sometimes large and sometimes small, and located so conveniently to the cities and towns where the transportation will be very light, that if the question of drying can be scientifically and economically solved, there is no question but what the handling of this fuel will become a commercial success.

I wish to place in the RECORD in connection with my remarks, a copy of a statement of the peat deposits of the State of New York, which is based on actual location of the various deposits, the measurement in acres of each deposit, and the depth determined by practical tests. This statement may not be exactly correct, but I believe it is approximately so, and shows that in this State peat deposits have already been examined and tested which amount to an equivalent of 182 square miles, of an average depth of about 8 feet, and of sufficient material to yield approximately 205,000,000 tons of fuel fit, if sufficiently dried, to burn.

I trust this information will be of interest to the people of our State, and especially those living in the rural district and in the vicinity of these particular peat deposits, and I hope that by continuing these fuel tests by not large appropriations the question of economically drying this material will be solved, so that those large deposits in our State and throughout the whole country may be converted into useful fuel. When that question is settled it will add immensely to the value of our land.

This statement is as follows:

Peat deposits of New York State.

Name of bog.	Location.	Approximate area.	Depth.	Estimated fuel content.
		Acres.	*Feet.*	*Tons.*
Cicero	1 mile east of Cicero, Onondaga County.	6,000	3-14	10,800,000

Montezuma	Along Seneca River	10,000	3- 7	10,000,000
AGRICULTURAL PEATY AREAS.				
Half-way	½ mile east of Half-way station, Onondaga County.	100	1- 3	60,000
Elbridge	½ mile east of Elbridge, Onondaga County.	500	1- 3	300,000
South Lima	Near South Lima	1,000	3- 7	1,250,000
Canastota	North of Canastota	20,000	1- 7	20,000,000
Walkill	Along Walkill River	40,000	3-10	52,000,000
Arkport	Near Arkport	1,000	3- 6	900,000

This area is equivalent to about 182 square miles and the average depth about 8 feet. This would yield approximately 205,000,000 tons of fuel, having a value of about $3 per ton in the vicinity of the places of production. This amount would be reduced by the 74,000,000 tons now under cultivation, if this is considered to be unavailable for fuel purposes, but must be increased by a very considerable amount not yet examined.

I also wish to insert in the RECORD an estimate of the peat resources of the United States, exclusive of Alaska, by Prof. Charles A. Davis, formerly of the University of Michigan, and now in the United States Geological Survey. This is a very thorough, scientific, and comprehensive estimate and statement on this subject, and will, I believe, be of great interest to the people of this country, and ultimately of practical benefit to them. The following is a copy of this estimate:

AN ESTIMATE OF THE PEAT RESOURCES OF THE UNITED STATES, EXCLUSIVE OF ALASKA.

[By Charles A. Davis.]

Peat as a source of fuel and power, as well as the raw material upon which may be based a number of industries, has but recently attracted general attention in this country. It has, however, long been used in northern Europe, where it is estimated in the neighborhood of 10,000,000 tons prepared in various ways are consumed as fuel annually, and smaller amounts are used as stable litter for sanitary purposes and in various trades and arts.

It has been assumed by engineers, economists, economic geologists, and others, because of the abundance and cheapness of good coal and wood in the United States, that peat could not be used profitably in competition with them, at least for a long time to come.

Recent developments in the utilization of low-grade fuels in producer gas engines, and the very considerable successful use of peat for the generation of fuel, illuminating, and producer gas in Sweden, Germany, Russia, and other countries of Europe, have made a marked impression on those in America who have followed the march of events in this direction and have aroused new interest in the possibility of using peat as an auxiliary fuel.

Already preliminary experiments have been made by the technologic branch of the United States Geological Survey with a large gas producer, which confirm the reports of foreign success in this direction and show that some peats of American origin are little inferior to many grades of bituminous coal now on the market, and superior to some in the quantity of producer gas to be derived from them, and in the calorific value of the gas.

Still more recent than this work is the report from Germany that by the investigations of Doctors Frank and Caro, it is possible to recover a large part of the combined nitrogen contained in peat while it is being converted into gas in the gas producer as ammonium sulphate; and that where the nitrogen is present in amounts slightly above 1 per cent of the dry matter of the peat the quantity of ammonium sulphate obtained pays the expenses of maintaining the plant, of gasifying the peat, and a profit besides, leaving the gas as an additional profit. As many American peats have more than 2 per cent of combined nitrogen and a considerable number of analyses show above 3 per cent, it is probable that in the near future peat beds will be profitably utilized for the production of power and ammonium salts in the United States.

This is the more likely when it is considered that the region of most abundant occurrence of peat in large deposits lies along the northern border of the country, and in the eastern coastal plain. There are also other limited areas where it is found, as in the western mountains and in the moister portions of the Pacific slope. The States containing the greatest amount of peat are the eastern Dakotas, Minnesota, Wisconsin, Michigan, northern Iowa, Illinois, Indiana, and Ohio, New York, the New England States, New Jersey, the coastal portions of Virginia, North and South Carolina, Georgia, and practically all of Florida. It is also assumed that there are workable peat beds in the swampy parts of the Gulf States and in those portions of the flood plain of the Mississippi remote from the stream.

It will be noted that these regions of frequent occurrence of peat are practically all outside of the coal fields, with the exception of Michigan, where, as is well known, the coal basin has not been found to be productive except in limited marginal areas, very small in comparison with that of the entire basin.

As a sign of the times it may be stated that work is about to begin in Florida on a plant for generating electric power by producer gas engines using air-dried peat as fuel, the power to be transmitted to Jacksonville. Aside from other phases of the question, it must be considered that peat can be mined and prepared for the gas producer by the simplest and most inexpensive equipment, and with a minimum of danger, since all of the workings are open cuts, made by the use of spades or of ordinary excavating or dredging machinery, so that none of the dangers of underground mining are encountered.

On the other hand, the great drawback in the preparation of peat for fuel, or other uses, has always been, and continues to be, the fact that it contains from 85 to 90 per cent of water as it comes from the beds, and that the greater part of this water can not be pressed out but must be removed by evaporation. Peat which is air dry contains from 15 to 25 per cent of water, and its theoretical efficiency is lowered thereby in nearly direct proportion to the amount of water present.

In gas producers of recent types, however, it is reported that peat with 40 per cent water has been used with success, and for this purpose the question of excess of water has apparently been solved by plowing or digging up the peat and allowing it to dry out by exposure to the wind and sun on the surface from which it is taken. In Florida, even in midwinter, peat taken from below the water level, ground in a pug mill, and afterwards spread over a drying ground in a layer 8 inches thick, dried to the air-dry state in about three weeks and would be ready for use in a gas producer in less time.

The question of artificially drying peat for fuel has received and is now engaging the attention of able engineers and inventors, and, in the opinion of many, the successful solution of this problem is necessary before any considerable increase in the use of peat for ordinary fuel can be expected.

Briefly stated, the matter rests upon the finding of a way to handle peat with about 90 per cent of water rapidly and cheaply enough so that the 25 pounds of salable material obtained from a ton of raw peat which will result when it has reached the air-dry state will pay, not only the cost of the processes of preparation, but also of management, amortization, and selling, and return a profit on the original investment. Attention should be called to the fact that if peat with 90 per cent water has its moisture content reduced to 80 per cent, it loses more than half of its weight of water, and that this amount is readily extracted by very simple and inexpensive processes.

In Europe peat is prepared for fuel in several ways, designed primarily to render it transportable and efficient as a source of energy.

As cut peat, it is used extensively for domestic purposes in the form of air-dried sods, or blocks, cut by hand with specially designed spades. A more compact and efficient fuel is made by more or less thoroughly macerating the peat and pressing it into molds, after which it is dried by spreading the blocks on the ground exposed to sun or wind, or by grinding it in a specially constructed pug mill similar to that used in grinding clay for making bricks. The peat is ground wet as it comes from the beds, and delivered from the mill in the form of wet bricks, which on exposure to the air and sun's heat for some time become dry, firm, tough, and nonabsorbent. This is machine peat, which is rated the most generally successful form of peat fuel for domestic and boiler use on the markets of Europe. As marketed, this product contains from 20 to 25 per cent of moisture, and has, theoretically, about 65 per cent of the fuel value of the same weight of good bituminous coal when burned in stoves or under boilers, but practically, the cause of the lack of waste of the peat, in the form of ash, smoke, clinker, and unconsumed portions, its real value is higher than is indicated by comparison of the possible heat units to be obtained.

As peat briquets, the material is more compact, burns more slowly and persistently, and stands transportation and handling well. To prepare it for the process of briquetting the peat is dried thoroughly, powdered and briquetted, either without or with a binder, or in mixture with coal or lignite.

An increasing amount of peat is manufactured into charcoal or peat coke, especially in Germany, where it is used somewhat extensively as a substitute for wood charcoal in smelting iron and in other metallurgical processes, including refining of copper, steel making, etc. Of the processes so far developed for the manufacture of peat coke, none have proved profitable on a commercial scale, except such as condense the distillates and recover a series of by-products similar to those obtained by the destructive distillation of wood, viz, gases, methyl-alcohol, ascetic acid, lime acetate, ammonium salts, tar and its derivatives. This involves large preliminary investment and the maintenance of costly plants, but where a good market can be found for the by-products this seems to be justified by unbiased and trustworthy reports from Europe. In preparation for coking the peat is treated exactly as if it were to be sold as machine-pressed peat, and is stored in open sheds until needed for the coking retorts.

An increasing amount of peat in the form of powder burned with blast burners is used abroad for firing under boilers, and in brick and cement burning; where properly prepared and firing rightly controlled it approaches theoretical efficiency when used in this way.

The production of gas from peat, as has been stated, has passed beyond the experimental stages, and peat gas is used for metallurgical purposes, boiler firing, making lime, and brick, and, to some extent, in making glass, while a rapidly growing number of producer gas engines for using peat are being installed for generating electric power for transmission directly from the larger peat deposits to centers of use.

In view of all of these considerations, the following estimates of the peat resources of the United States have been perpared with the view of at least directing attention to the very considerable source of wealth to the Nation, which is now lying entirely undeveloped in the swamps

and bogs of the country. It will also be noted in considering the possibilities of the peat deposits that they furnish potential substitutes for wood in various departments of industry and in some considerable degree in these directions may relieve the drain upon the vanishing forests.

In making the estimates given below it has been the aim of the writer to be conservative in every detail, and it is believed that in no case will it be found to be too optimistic.

The total swamp area of the United States, exclusive of Alaska, is estimated to be (60th Cong., 1st sess., S. Doc. 151) 139,855 square miles. Of this 8 per cent is assumed to have peat beds of good quality, or 11,188 square miles. The depth of peat in this area is assumed to average at least 9 feet, and to contain 300 tons of dry fuel per acre for each foot in depth, or a total of 12,888,500,000 tons. Value if converted into machine peat bricks at $3 per ton, $38,665,700,000.

Value if coked and the by-products of distillation saved.

	Product in tons.	Value.
Peat coke	3,608,800,000	[a] $26,005,300,000 [b] 9,924,200,000
Illuminating oils	257,800,000	4,474,200,000
Lubricating oils	90,200,000	
Paraffin wax	38,700,000	3,479,900,000
Phenol	167,500,000	66,345,100,000
Asphalt	25,800,000	824,900,000
Wood alcohol	43,800,000	7,844,000,000
Acetic acid	56,700,000	
Ammonium sulphate	39,900,000	2,777,400,000
Combustible gases	738,400,000	6,501,300,000

[a] Charcoal prices. [b] Coke prices.

The better grades of peat coke are nearly free from sulphur and phosphorus, and may be used wherever hard-wood charcoal is required. The quantity of wood required to make charcoal equivalent to the amount of the peat coke given in the estimate would be approximately 8,019,800,000 cords. The uncondensable gas given off from the retorts while the peat is being converted to coke has good fuel value, the maximum being about 300 British thermal units per cubic foot, and has been successfully used for heating the retorts and for other fuel purposes.

If converted into producer gas by the most recently developed processes, so that the combined nitrogen of the peat is converted into ammonia and fixed as ammonium sulphate, there would be possibly available 619,257,511,000,000 cubic feet of producer gas, with a calorific value of 145 b. t. u. per cubic foot. Assuming 1.5 per cent of nitrogen as an average content of the peat—which is low, since many analyses show more than 3 per cent—100 pounds of ammonium sulphate to the ton of peat treated in the gas producer could be obtained.

On this assumption, there is stored up nitrogen enough in the peat to supply at least 644,400,000 tons of ammonium sulphate, having a value of $36,732,400,000, in addition to the gas produced.

Recent tests reported from Europe show that from 2 to 2.5 pounds of peat will produce an effective horsepower per hour, if reduced to gas in a properly designed gas producer and used in the gas engine. Taking the larger amount, to be conservative, it is evident that there is stored up in the peat beds of the country, as estimated above, energy sufficient to develop 10,310,860,800,000 effective horsepower hours.

In Europe great quantities of the more fibrous types of peat are manufactured into stable litter for bedding live stock, and peat mull, or powder, for absorbent and sanitary uses. Of this class of material it is estimated that there are at least 2,578,000,000 tons available. This class of material is superior to straw and other substances now generally used for the purpose and would readily bring $10 per ton, or the whole amount has a prospective value of $25,780,000,000.

The only factory (located in Indiana) now making a product of this class in the United States sells its entire output of several hundred tons at about $12 per ton.

A single plant for making paper from peat is in operation in Michigan. Possibly 5 per cent of the total amount of the peat of the country is suitable for this purpose, or 644,400,000 tons. The use of this material would reduce the consumption of wood for the purpose of making coarse papers and pasteboard by whatever amount it displaced wood pulp in the manufacture of such materials.

In the United States peat is being somewhat extensively manufactured into fertilizer filler, material used in making various grades of artificial fertilizers in which slaughterhouse and other refuse animal matter rich in nitrogen are ingredients, or in which hygroscopic mineral compounds are used. Peat in the form of dry powder is especially adapted to this use, since it absorbs water and ammonia readily, is a deodorizer, and, to a considerable extent, prevents fermentation and decomposition. At the prices now obtained for peat suitable for this purpose, in the form of dry powder, and considering one-half of the total amount suitable for the purpose, its value is estimated to be $38,666,000,000, or about the same as the valuation of the whole for ordinary fuel.

Ethyl, or "grain" alcohol, has been made from the less thoroughly decomposed peats in Denmark and Sweden at a cost estimated at about 47 cents per gallon.

If 10 per cent of the entire body of peat in the country can be used in this way, about 70,900,000 tons of alcohol can be obtained from peat. It must be said in passing that this process is as yet hardly past the experimental phases.

Artificial wood, a fireproof or slow-burning composition, or 1,288,800,000 tons, the use of which would release an equivalent amount of sawed lumber for other uses or to be held in reserve against future need.

Fibrous peat, properly cleansed of the finer material associated with it, is finding a constantly growing use in Europe as packing material for fragile or perishable articles and for protecting and insulating water and other pipes subjected to the liability of freezing. The peat best adapted to this use is too light in weight and too loose in texture for fuel manufacture, and may be estimated to occur to the amount of 500,000,000 tons, with a market value of $3,000,000,000 displacing excelsior, hay, straw, paper, and other similar materials which are now used.

Fabrics of various qualities and kinds, mattresses for hospitals, fiber for surgical and other aseptic dressings, and as a substitute for silk in cloth weaving have been made from certain grades of peat, but the market is so well supplied with other products for the same purpose, which are of as good or better quality, that the use of the peat products has never reached any extensive commercial scale, and does not seem likely to do so in the near future.

It is clearly apparent, however, that in the peat beds of the United States there lies undeveloped, even entirely untouched, a vast amount of raw material from which may be derived by intelligent and conservative exploitation fuel, power, fertilizing material, and the raw material from which may be made a number of valuable products, all of which will serve to supplement other resources which are now known to be limited in quantity. By utilizing these resources also the wealth of the Nation will be possibly increased by the not inconsiderable sums which represent the potential cash value of the peat beds and their products, and an equivalent amount of other material will be rendered free for other purposes.

Government of the Canal Zone.

SPEECH

OF

HON. OLLIE M. JAMES,

OF KENTUCKY,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, February 9, 1909.

The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 27250) to provide for the government of the Canal Zone, the construction of the Panama Canal, and for other purposes—

Mr. OLLIE M. JAMES said:

Mr. CHAIRMAN: The object of this amendment is to give to any person who has been convicted in a court of the Canal Zone the right of appeal to the Supreme Court of the United States when the punishment is by imprisonment. Under another section of this bill, section 6, you deny the defendant the right of trial by jury, except where it is a felony. I introduced an amendment to this section providing that the defendant should have the right of trial by jury in every criminal case where the punishment is by imprisonment or where the fine exceeded $20. The language of section 6 of this bill is as follows:

That in all criminal prosecutions in the Canal Zone for felonies the accused shall enjoy the right of trial by an impartial jury.

Who knows what this official, this one man appointed by the President, who is not only a legislator with authority to make the law combining the legislative and executive functions in one, but is also the judge who executes the law which he himself has made, is going to say constitutes a felony? This is the first time in the history of our Government that any legislative body has undertaken to establish a precedent of this character. Think of what an anomalous situation this presents. One man appointed by the President proclaims what the law is; that is, he enacts the law, and then, as judge, he tries offenders for violation of the law he himself has enacted. He denies the right of trial by jury to all defendants except where it is a felony. But the mighty question arises, "What is a felony?"

He may provide that a felony only is an offense which is punishable by death, and he may try under this bill citizens of every State in this Union who have gone to Panama for offenses and deprive them of their liberty and deny them the right of a trial by jury and imprison them for an indeterminate time, and that citizen has no right of appeal to the Supreme Court of the United States unless his imprisonment is for life or the sentence is death. Now, in this country we elect our legislators, who make our laws; we elect our President, who approves them; our judges are appointed by the President, subject to the approval of the Senate, and they are always subject to impeachment by the House and trial by the Senate; and yet we give to the humblest citizen in this Republic the right of trial by jury in any case where he is charged with a crime. Why do you deny the right of trial by jury to those people down there, who neither have a voice in making the laws nor in selecting the officials to execute them, and then after having denied all these rights so dear to freemen you go further and deny them the right of appeal unless the punishment is death or life imprisonment? A single man under this bill may declare what a misdemeanor is, and may make its violation punishable by imprisonment for fifty years, or for any time short of life, try the defendant without a jury, imprison him, and close the doors of the dungeon upon him, and deny him the right of an appeal to the Supreme Court. This is so intensely un-American, so strangely undemocratic, so antirepublican that to characterize it as destructive of two of liberty's strongest bulwarks—the right of trial by jury and the right of an appeal—is to use the mildest term. [Applause.]

Mr. MANN. Will the gentleman yield for a question?

Mr. OLLIE M. JAMES. Certainly.

Mr. MANN. Will the gentleman inform us whether there is any appeal in a similar case from a federal court to the Supreme Court?

Mr. OLLIE M. JAMES. In a federal court here the right of trial by jury exists, but it does not exist in the Canal Zone, according to this bill.

Mr. MANN. We have given a broader privilege here than you give in the United States.

Mr. OLLIE M. JAMES. The right of trial by jury exists for "any crime" under our Constitution.

Mr. Chairman, I am anxious to see the canal constructed. I hope the day is not distant when our commerce will be enabled to pass through the canal. But let us not while we are building this destroy the rights for which armies have been marshaled and for which men have died in all ages of the world—the sacred right of trial by our peers. Let us not in our anxiety to aid commerce destroy the liberty of the citizen, deny rights without which commerce would be impossible.

This Republic rests upon the granite pillars of the right of life, liberty, and the pursuit of happiness, and it can only remain secure by preserving these palladiums to all our people—whether here or in Panama. Let us not inflict upon others that against which we would ourselves rebel. [Applause.]

Statehood Bill.

SPEECH

OF

HON. MARCUS A. SMITH,

OF ARIZONA,

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909.

The House having under consideration the bill (H. R. 27891) to enable the people of New Mexico to form a constitution and state government and be admitted into the Union on an equal footing with the original States; and to enable the people of Arizona to form a constitution and state government and be admitted into the Union on an equal footing with the original States—

Mr. SMITH of Arizona said:

Mr. SPEAKER: At the present end of a long service in this House this applause from both sides of the Chamber is particularly sweet and gratifying to me. I deem it a double compliment, as I feel that it is inspired by your kind affection, and also by your recognition of the constant fidelity with which I have served the interests of the people in Arizona.

Twenty-two years ago I first came into this House as Delegate from the Territory of Arizona, and have served, with the exception of a few terms, continuously since. What fidelity I have given to that service all the older Members of this body well know. Why Arizona and New Mexico should have been selected as the victims of the Republican party's injustice I am unable to conjecture. Why they have so long remained the objects of your fear or hate I am equally unable to explain. Since my advent here I have seen Washington, Montana, North Dakota, South Dakota, Wyoming, Idaho, Utah, and Oklahoma admitted to the Union, and every one save Oklahoma had at the time of its admission neither qualifications or resources superior to ours.

Nay, more! At the time of the admission of the majority of these States Arizona and New Mexico had every advantage enjoyed by these objects of your favor. At the time of the admission of Idaho and Wyoming Arizona exceeded either in population, wealth, and developed resources, while New Mexico's population was greater than the two combined; yet of the four grinding at the mill two were taken and two were left, and this without reason, justice, or common sense. The impetus given these new States by the right to control their own affairs has richly justified your action as to them. The delayed development of their naturally more prosperous sisters occasioned by your injustice is a shame against your brothers living there and a disgrace to this policy of delay.

The leaders of this House on the Republican side favored the admission of all the States recently admitted, as I find not one of their votes cast against either, while they have persistently fought the equal right of Arizona and the right of New Mexico, guaranteed to her by the solemn promise of the treaty made with Mexico when we acquired that territory. In honor you are estopped from questioning the character of the population. It is as good as when the treaty was made, and your persistent injustice to that Territory is simply shameful. But I am not here to speak for New Mexico, and reviewing our history it seems strange that anyone should need to speak for her at this late day. It can not be said that politics has kept her out of her very birthright.

Has she not constantly sent a Republican to this body for years and years? Has she not been obsequious enough to the Republican demands on her? Did she not, against her own interest, surrender all but honor, and seemed even willing, if need be, to give that, to the raging waters of the Ganges that she might appease the wrath of the vengeful gods sitting in judgment on her destiny here? Did she not swallow the awful dose of joint statehood at your request? Whatever you may now think of her judgment in that matter, you must admit that she gave full measure of obsequious obedience to your party's demand. Arizona, thank God, stood steadfast by her altars and her homes, and comes again making on you the just claim for what is due her—single, individual, immediate statehood.

You are in law and equity, and especially in the greater forum of honor, estopped from disputing her claim; nay, you are ordered to give her immediate statehood by the best plank in your national platform and by far the most direct and unequivocal. For the Republican national platform, on which everyone of you ran for office, and on which Mr. Taft was elected, and which he has fully indorsed, says (I read from the platform):

We favor the immediate admission of the Territories of New Mexico and Arizona as separate States in the Union.

This is the first time in national convention the Republican party has directly promised statehood to these two Territories. I never doubted once that it would keep this promise, and so declared in every speech made by me in the last campaign.

I said then, as I feel still, that the great party so audaciously dominating for good or ill the affairs of this country could not afford to lie to the whole country through its only legal mouthpiece, the national convention, and that the great men composing that party had no wish to lie about the matter. The present Executive in his first message to us called attention to that plank and advised favorable action on these two statehood bills. The incoming Executive, Mr. Taft, was elected on that platform, and if he had said nothing about statehood we know his adhesion to the proclaimed promises on which he received the votes of the people for the greatest office in the world. His high character for uprightness, justice, honesty, for fidelity to his word, should guarantee his hearty acquiescence in the passage of these bills at this session. Who is here on your side or on our side to cast a vote against this measure? How can you excuse such a vote? Can you say your party platform does not bind you? If that is your plea, your renunciation comes too late to be honest. Is your platform a lie? You will not say that without stultifying both yourself and your party. Granting, then, as I am sure you will not deny, that your platform spoke the truth and meant what it said, and that you accepted it and ran for office on it and did not deny then its binding effect on your political conscience, what is left for you to do now except to carry it out?

I will not use short, harsh words, but from my viewpoint the man who, under these circumstances, casts his vote against this measure is running a hot-footed race for a high seat in the Ananias Club. Does it not look that way to you? I know it will look that way to the people of Arizona. You can not even plead for delay, far away back in the good old summer time you officially, as a party, declared our fitness and promised immediate action. You yourselves have taken the question from the field of debate. There is nothing left but to act, and act now.

Both sides of this House and both sides of the Senate have had months to consider the question of statehood with a view to immediate action when Congress met.

You have too long delayed already. A suspicious mind would suspect that this long delay had a dire purpose at its back. Some folks will think that if this bill, getting out of this House at so late a day, dies in the Senate the purpose will stand revealed. This bill could have been passed before the 10th of January as easily as it can be passed now. The House has had ample time. If one-tenth the zeal had been used for this bill that was put forth in the joint state measure it would have been in the Senate before the Christmas holidays and would long since have passed that body.

I see no reason why these bills could not have been reported a month ago, and I know of no reason why the long-delayed report could not have been acted on the next day after it came into the House. The time of the House has been consumed in the delivery of speeches, able enough, on every conceivable question, and the promise of immediate statehood has been ignored. You got a rule easy enough, setting a day for the joint statehood bill, which nobody wanted except the powers that be, but under exactly similar conditions you could not get a day for the sepa-

rate statehood bill, which everybody wants except a few of the powers that be.

Mr. Speaker, if this delay shall, as I fear it will, prove fatal to these statehood bills at this session, then the purpose here will become manifest to the world and will again accentuate the necessity of less autocratic rule in this Chamber. I pray God my fears are unfounded, and that your party, sir, will keep in good faith the promise made to the people in the most solemn, binding way known to our politics. Hoping almost against hope that these Territories may be admitted at this session, and trusting, against some evidence, that no Member of either House or Senate may be justly accused of circumventing by deceit and fraud the promise on which our people have relied, I leave this feature of the case for further development. If the Senate, or any one Member of it, wants to defeat the bill, failure to act sooner here has afforded ample excuse for the success of such opposition.

That certain members of a coordinate branch of government do want to defeat the bill is as well known to the Speaker of this House and to the House itself as it is to me. I have attempted to make our defeat impossible. The Speaker, by refusing to allow consideration at an earlier day, has made our defeat very easy indeed. If this bill is to pass the House only to be defeated by postponement in the Senate, then it were far better and decenter to defeat it here in the first place and make no false pretense about it. I know, and every man in my hearing knows, that the politics of the proposed States cut no figure in this case, except in the minds of a very few so narrow that no appeal outside of party success can touch them. The opposition here and elsewhere to the admission of these States is not that they are Democratic or Republican, but solely and alone because they are western. Why should Rhode Island object to the admission of either of these Territories, except that Rhode Island, being small and eastern, objects to them because they are big and western? Why should any other Eastern State object when it knows that it had less population than ours when it was admitted and vastly less known resources?

I can not for the life of me understand why certain great men of the East have so constantly opposed the admission of Western States. We in the West have never been a menace to our country. On the contrary, we furnished the means that made resumption of specie payments possible. We furnished more than our quota of men and money to the East in every hour of its need.

Far removed from the maelstrom of your eastern frenzied finance, where honor, fortune, virtue, and even our country and all its interests would sometimes be readily bartered for a dirty dollar by the worshipers of Mammon, we have produced. We build; you too often tear down or destroy. We have made homes for patriotic, broad-minded, poor, but worthy men. We have built up the waste places. We have tied patriotism to the soil, and man for man, home for home, we of the West can furnish more men ready to give their lives for their country than any other people on the earth. And all this love they give in spite of all the wrong Congress has so long done them. Search history in vain for a parallel. What has the West ever done to forfeit your confidence or excite your fear? Have not the western representatives in Senate and House stood well abreast with the eastern contingent? I forbear to cite instances. History answers the question, and the West is not ashamed of that answer.

Do you all forget that we are bone of your bone, flesh of your flesh, impelled by every high motive that actuates you with just a little less fear than the East has in proclaiming those motives and in defending them? The West is made up of the best blood of the East. Those brave enough to break the tender apron strings that hold so close to home, and knowing that before them spread a life of danger and hardship, yet sought the West to do for their children more than they had received, and like Enoch Arden giving them "a better bringing up than he had had," are to-day the very best, bravest, truest men on whom our country can rely in any hour of peril.

Instead of your doubting them, you should take them to your breast as the very best product of your loins. We are no strangers, seeking a place to hide our cold hearts, and we resent as we should resent the self-assumed superiority of our eastern brothers who were too prudent or too timid to act with us in the mighty drama of the building of a State. The authentic history of all time reveals no heroes more worthy of renown than the pioneers, the state builders of the West. And among the unknown and unsung names of this valiant host, too many of whom have passed to silence, none deserve a greater tribute of our praise—none can claim a deeper sense of our obligation to their fortitude and courage and accomplishment—than the pioneers of Arizona.

Summon from the heroic ranks of all time your brightest ornaments, and I will place beside the white plume of every Henry of Navarre the equally white hair of an unsung hero of the western plains, who has no need to do obeisance even in the presence of the honor roll of history. With these early heroes of Arizona and with those who have followed them, patriotism is not a mere catchword. It is a living, pulsing, burning principle. They love their country as few others love it. They worship at Arizona's shrine with more than an eastern idolatry. The Almighty, in calling for man's devotion, said, "The earth is the Lord's, for He made it." We cry out to you with greater pathos, that Arizona is ours, for we made it; made it for us and for you; made it for our country and ourselves; made it for your children and ours; made it for all that might enjoy under it the common rights and benefits of a great State of our National Union. [Applause.]

In conclusion, Mr. Speaker, I can not repress the utterance of my great disappointment in the delay this bill has met in the House. I fear it means defeat in the Senate, and if it does meet defeat there—simply by inaction or otherwise—on some heads will rest a most awful responsibility. It not only means the violation of a public sacred promise, but visits injury, injustice, hardship, and humiliation on a people who have too long been forced to bear burdens never before imposed on any State or Territory since the Declaration of Independence, whose essence and sacred spirit you have violated daily in your dealings with us for the last long twenty years. I, in common with all the patriotic people of Arizona, have felt deeply this injustice and wrong. You are witnesses to the number of times I have cried out on this floor against it. You have witnessed the struggle I have made to secure the blessings of liberty to my people. From early manhood my life has been dedicated to this holy cause, and I find myself now in poverty, with hair as white as the snows on her mountain tops, still pleading the cause of Arizona.

The House will pass this bill. My fear is it will die in the Senate.

In my campaign at home it was urged that I, being a Democrat, could not get justice from a Republican Congress. It was reported generally, and the highest possible authority was given, that if a Republican was elected in my place we would get statehood at this session. It was alleged, yes, confidently stated, that the President and the Republican nominee for President were dead sure to use their influence to that end if Arizona would elect a Republican to Congress. I find now that such election, if it had any effect on statehood at all, was only to delay statehood. But these are dead issues now. It must be understood that I stand now, as I have always stood, ready to make any personal sacrifice, ready to forego any personal ambition, ready to bear the cross up any hill, if by this devotion I can be the means of securing the ends of a lifelong purpose—equality, justice, statehood for the Territory of Arizona.

Statehood Bill.

SPEECH
OF
HON. J. THOMAS HEFLIN,
OF ALABAMA,
IN THE HOUSE OF REPRESENTATIVES,

Monday, February 15, 1909,

On the bill (H. R. 27891) to enable the people of New Mexico to form a constitution and state government and be admitted into the Union on an equal footing with the original States; and to enable the people of Arizona to form a constitution and state government and be admitted into the Union on an equal footing with the original States.

Mr. HEFLIN said:

Mr. SPEAKER: I shall cheerfully vote to admit Arizona into the Union as a State.

In spite of the opposition to her admission, and all the efforts to befog the issue and to keep the truth from the country, MARK SMITH, the able and honored Delegate from the Territory of Arizona, has stood here earnestly and ably pleading the cause of his people, and he has convinced the Congress and the country that his beloved Arizona is justly entitled to a place in the household of sovereign States.

I rejoice, Mr. Speaker, that this big-hearted, able, and eloquent representative of the people of Arizona can now carry back to the Territory that he has so faithfully represented the declaration that the House, of which he is an honored Member, has granted statehood to the Territory of Arizona, and I now predict that when that Territory puts on the robes of sovereignty that she will do the preeminently proper thing and send MARK SMITH to the Senate. [Applause.]

Eulogy on the Late Hon. Asbury C. Latimer.

REMARKS

OF

HON. J. EDWIN ELLERBE,

OF SOUTH CAROLINA,

IN THE HOUSE OF REPRESENTATIVES,

Sunday, February 21, 1909,

On the following resolution:

"Resolved, That the House has heard with profound sorrow of the death of Hon. ASBURY CHURCHWELL LATIMER, late a Member of the Senate of the United States from the State of South Carolina, which occurred at Providence Hospital in the city of Washington February 20, 1908.

"Resolved, That the business of the House is now suspended that opportunity may be given to pay tribute to his memory.

"Resolved, That as a particular mark of respect to the deceased, and in recognition of his distinguished public services, the House at the conclusion of the memorial exercises of the day shall stand adjourned.

"Resolved, That the Clerk communicate these resolutions to the Senate.

"Resolved, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. ELLERBE said:

Mr. SPEAKER: To the soldier who, drunk with excitement and the lust of battle, goes forth to fight, and dies facing the foe, we give the name of hero.

Yet the narrow confines of the hospital ward is often the scene of far braver struggles than those of warfare. In February, 1908, at Providence Hospital in this city, Senator ASBURY LATIMER made a last heroic resistance to the great enemy—Death.

With no martial music to inspire him, with no cheering army to make him forget the danger, he fought for life steadfastly, silently, heroically, and when vanquished he died like a hero, with a smile for those who loved him.

And Senator LATIMER longed to live. Life had meant to him successful achievement of ambitions which had grown with his growth.

It is hardly possible that as a youth even imagination whispered to him of the honors he would win in the future, for ASBURY LATIMER as a boy had only one claim to fortune—he was an American!

That, and that alone, made possible his wonderful progress.

In another land even his indefatigable energy, his receptive mind, and his ready grasp of conditions could never have met with the acknowledgment that was given to them in this great Republic—this Government "of the people, by the people, and for the people."

Year by year, as one by one obstacles in his pathway were overcome, his ideals grew higher and another step was taken toward the honored position which he held at the time of his death.

It is not my purpose to review the life and work of Senator LATIMER. That has been already fully and ably done by my colleagues. I would simply add my tribute of admiration and respect for those qualities of heart and brain which made Senator ASBURY LATIMER a true and worthy Representative of the proud old State of South Carolina.

Sundry Civil Appropriation Bill.

SPEECH

OF

HON. GEORGE C. STURGISS,

OF WEST VIRGINIA,

IN THE HOUSE OF REPRESENTATIVES,

Friday, February 26, 1909,

On the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes.

Mr. STURGISS said:

Mr. CHAIRMAN: I am heartily in favor of the proposed amendment to increase the appropriation for continuing the investigations as to the causes of mine explosions, with a view to increasing safety in mining. The amount reported by the committee for this purpose is only $100,000, and the amendment will increase it to $150,000.

We are appropriating large sums of money for creating and caring for forest reserves, for irrigation and reclamation of arid lands, for extension of mail service, for fish hatcheries, for building battle ships and supporting the navy and the army, for fortifications, to support the diplomatic and consular service, for our agricultural colleges, and for promoting the prosperity of our farmers, all necessary and proper purposes for the exercises of government activity. Congresses and conventions to conserve our great natural resources in forests, mines, soils, water, and many other things are important, no doubt, but is it not high time to do something to conserve the richest asset the Nation possesses, the men whose lives are more valuable than all material resources and assets? They are the creators of all wealth. Machinery, labor-saving devices, and intellectual power can never dispense with manual labor in some form, which must supplement and keep in motion these artificial aids to human labor.

These expenditures just enumerated do not have for their object the saving of human life, but only the development of the material and physical resources of our country.

Health congresses to fight tuberculosis, the creation of hospitals and sanitaria, the employment of medical experts, and the myriad forms of help to assure the general health of our people to suppress contagious and infectious diseases are certainly just and proper forms of government aid for promoting the general welfare. In the midst of every great calamity our hearts are touched, our purse strings loosened, and we generously vie with each other to afford immediate relief to the sufferers. San Francisco, calling from her ashes and her desolation, was helped most lavishly. Ere Italy, stunned by the most appalling disaster of modern time, could voice her misery and her needs, millions of treasure and thousands of helping hands were tendered. When in December, 1907, four great explosions in the mines of three States brought sudden and horrible death to many hundred miners, made half a thousand widows and more than a thousand orphans, the hearts of all men and women were touched, and material aid was most abundantly tendered. But this could not bring to life the breadwinners in these homes, to care for the loved ones whose lives must henceforth be marked by harder toil, with greater self-denial, and with perpetual sadness over the tragic death of father, son, or brother. How much wiser and better to have prevented the loss of property, of wages, of human lives, and the consequent misery by precautionary and preventive measures.

It is folly to say that much of this fearful slaughter could not have been prevented. It is a reflection upon the intelligence and capacity and humanity of the people of the United States that the proportion of deaths and injuries in our mines to each 1,000 of men employed underground is much greater than in the deeper mines of England, or of France, Belgium, or Prussia; and it is the saddest part of the whole history of mining in this country that the percentage of deaths and injuries is steadily increasing.

We employ in the mines and quarries of this country over 1,000,000 persons, and the percentage of deaths is annually greater than among railway employees. In the last eighteen years over 25,000 lives have been sacrificed in the mines of this country. The percentage as compared with the principal mining countries of the Old World is as follows:

Number of men killed for each 1,000 employed—averages for five years.

France (1901–1905)	0.91
Belgium (1902–1906)	1
Great Britain (1902–1906)	1.28
Prussia (1900–1904)	2.06
United States (1902–1906)	3.39

Is it any wonder public sentiment has been greatly aroused to the absolute necessity of a thorough study of the causes that have produced these fearful losses of life, with a view of preventing their recurrence or greatly reducing their number and consequent losses?

Three principal measures have been proposed, each of which should be enacted into law, and all plainly within the scope of federal power.

First. The creation of a bureau of mines in the Department of the Interior. Many hearings have been held by the Senate and House committees on this subject and a mass of evidence taken showing the necessity of such a bureau. In this opinion miners, mine owners, and experts all concur. The House has passed a bill, now on the Senate calendar, which can and should be enacted before the close of this Congress.

It is as follows:

A bill (H. R. 20883) to establish in the Department of the Interior a bureau of mines.

Be it enacted, etc., That there is hereby established in the Department of the Interior a bureau, to be called the bureau of mines, and a commissioner of said bureau, who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall receive a salary of $6,000 per annum; and there shall also be in the said bureau such clerks, agents, experts, and other employees as may be necessary to carry out the provisions of this act.

SEC. 2. That it shall be the province and duty of said bureau and its commissioner, under the direction of the Secretary of said department,

to foster, promote, and develop the mining industries of the United States; to make diligent investigation of the methods of mining, the safety of miners, the possible improvement of conditions under which mining operations are carried on, the treatment of ores, the use of explosives and electricity, the prevention of accidents, the values of mineral products and markets for the same, and of other matters pertinent to said industries, and from time to time to make such public reports of the work, investigations, and information obtained as the Secretary of said department may direct, with the recommendations of such bureau.

SEC. 3. That the Secretary of the Interior shall provide the said bureau with furnished offices within the city of Washington, with such books, records, stationery, and appliances, and such assistants, clerks, stenographers, typewriters, and other employees as may be necessary for the proper discharge of the duties imposed by this act upon such bureau, fixing the compensation of such clerks and employees within appropriations made for that purpose.

Second. The establishing in each State of schools of mines and mining engineering, in which should be taught a scientific and practical knowledge of all that pertains to mining operations, with a study of the conditions peculiar to the mines of the State in which the school of mines and mining engineering is located, and with an exchange of bulletins and reports of all research and investigation work done in each year. These schools should furnish skilled miners, fire bosses, engineers, and superintendents, with a knowledge up to date as to explosives, gases, safety devices, ventilation, and all that tends to economy and conservation of products, safety and sanitary conditions as related to employees and rescue work.

Such a bill has passed the Senate, and a substitute for it practically along the same lines has been approved and recommended by the House Committee on Mines and Mining.

It is as follows:

That there shall be appropriated from the sale of public lands, not otherwise appropriated, the sum of $5,000 for the fiscal year beginning July 1, 1909; the sum of $10,000 for the fiscal year beginning July 1, 1910; the sum of $15,000 for the fiscal year beginning July 1, 1911; the sum of $20,000 for the fiscal year beginning July 1, 1912; the sum of $25,000 for the fiscal year beginning July 1, 1913; and $25,000 for each succeeding year thereafter, to each State and Territory in the United States, for the establishment and maintenance, under the control of the Secretary of the Interior of the United States, of a school or department of instruction in mines and mining.

SEC. 2. That if there be already established in any State or Territory a school of mines and mining under the control of said State or Territory, or a department of instruction in mining connected with any institution of learning controlled by said State or Territory, then the moneys appropriated in section 1 of this act shall go to said school or department of instruction already established.

That if there are two schools or departments of mines and mining in any State of Territory under the control of said State or Territory, then the money so appropriated shall be equally divided between such schools or departments.

That if there be no school or department of instruction in mines and mining already established in any State or Territory, the school or department of instruction in mines and mining herein provided for shall be established in connection with an agricultural college, if there be such, controlled by said State or Territory. In States and Territories having no school or department of instruction in mines and mining already established, or agricultural college, then the Secretary of the Interior shall designate some other institution of learning controlled by said State or Territory, in connection with which said school or department of instruction in mines and mining shall be established: *Provided*, That if any State or Territory have no school or department of instruction in mines and mining, or agricultural college, or other institution of learning controlled by said State or Territory, then the Secretary of the Interior shall designate some accessible and convenient place in said State or Territory where the school of mines and mining herein provided for shall be located.

SEC. 3. That the moneys appropriated in section 1 hereof shall be expended only for instruction, research, and experiment (including the employment of instructors and experts, the purchasing of apparatus, supplies, and books, and the equipping of laboratories) in mining, mining machinery (with the application of electricity thereto), mining engineering, ore treatment, metallurgy, assaying, and chemistry and geology, so far as these sciences relate to minerals and mining, with a view to teaching a practical and scientific knowledge of the best and safest methods of mining and carrying on the business of mining and of producing gold, silver, coal, and other minerals, oil, gas, and medicinal waters, and also the concentrating, smelting, refining, and other preparation of the same for marketing, so far as the same may be necessary and appropriate to the mineral resources of the State or Territory in which said school or department of instruction in mines and mining shall be located, and especially for the study and prevention of explosions, fires, and other dangers incident to the carrying on of mining and the mining industry, in order to secure the most intelligent conservation, use, and development of the mining and mineral resources of the country, to make the lives of miners more safe, property in mines more secure, and to promote the general welfare of miners and operators of mines.

SEC. 4. That the head of each school or department of instruction in mines and mining established according to this act shall report in writing annually, on or before the 1st day of July, to the governor of the State or Territory in which said school or department of instruction is located, the condition, progress, and work of the school or department of instruction during the year past, together with such recommendations as he may deem best for accomplishing the purposes of this act as set forth in section 3 hereof; and that a copy of said report shall be also sent to the Secretary of the Interior.

SEC. 5. That if at any time, in the discretion of the Secretary of the Interior, any school or department of instruction in mines and mining provided for in this act shall not be faithfully carrying out the purposes of said act as set forth in section 3 hereof, then all moneys herein appropriated for said school or department of instruction shall be withdrawn from said school or department of instruction until the same shall have produced evidence satisfactory to the Secretary of the Interior that said school or department of instruction is faithfully carrying out the provisions of section 3 of this act.

SEC. 6. That the sums hereby appropriated to the several States and Territories for the purpose herein specified shall be annually paid, on or before the 31st of July of each year, by the Secretary of the Treasury, upon the warrant of the Secretary of the Interior, out of the Treasury of the United States, to the state or territorial treasurer or to such officer of each State or Territory as shall be designated by law to receive the same, who shall, upon the order of the trustees or other board of control of said college or university or separate school of mines, immediately pay over said sum to the respective treasurers of such institutions or to such other officers as may be duly authorized by said trustees or board of control to receive the same.

Third. The investigations as to the causes of mine explosions, with a view to increasing safety in mining, being the item in the sundry civil appropriation bill now under consideration. This is the only one of the three measures for promoting a greater knowledge and safety in mining operations that has yet received congressional sanction, and it is but a beggarly concession to the demands of the public, the miner, and mine owner. The subject is too large, too diverse, the difficulties too great, and the want of exact knowledge such that no miners' organization, no mine owner, and no individual or group of individuals can successfully grapple with it and solve the difficulties. Hence the necessity of government aid.

The work of the testing and experiment station at Pittsburg, for which this appropriation is asked, may be briefly set forth as follows:

MINE-ACCIDENTS INVESTIGATIONS, UNITED STATES GEOLOGICAL SURVEY.

These investigations, conducted under an appropriation provided in the legislative, executive, and judicial appropriation bill, carried an appropriation for the fiscal year 1909 of $150,000. The act was approved May 22.

By the 1st of July, the beginning of the fiscal year, a location for the testing work had been secured by transfer of certain buildings under the direction of the Quartermaster-General of the Army at the old arsenal grounds, Pittsburg, Pa. As many as 50 detailed drawings had been made, specifications prepared, contracts entered into, and work started on the repair and rearrangement of these buildings to fit them for their new uses. An equal amount of designing and drafting, specification writing, and so forth, had been completed on the many special detailed instruments and appliances requisite to the work. By the end of August preliminary tests in the steel mine gallery and in the lamp gallery and the rescue apparatus were in progress.

The plan of the work included a *section of mine-accidents and mine-explosions investigations; a section of tests and analyses of explosives used in coal mining; and a section of mine-rescue and mine-lighting apparatus and appliances for the testing thereof.*

By midsummer civil-service examinations had been held and a corps of the most skilled mining and mechanical engineers procurable had been assembled. Mr. George S. Rice, having perhaps the largest experience in actual coal-mining operations and consultation regarding coal-mining methods, was procured as head of the field investigations into mine accidents and explosions. A number of mining engineers familiar with mining conditions in the various coal fields have been secured and have been at work in the field for months past investigating the methods of mining, visiting scenes of explosions and fires, and examining into the conditions which lead to these disasters, with a view to the procurement of information for their future amelioration. By turns these men have been stationed at Pittsburg, familiarizing themselves with testing explosives, testing safety lamps, and the use of mine-rescue apparatus and artificial respiratory helmets, etc.

These preliminary investigations having made good progress, and the training having been completed, arrangements are now being perfected for establishing substations as headquarters for mine-accident investigations and for instruction and assistance in mine-rescue operations. Arrangements have been perfected for the establishment of one such station at Urbana, Ill., in cooperation with the state geological survey of Illinois, under conditions whereby the State will furnsh the building and accessories and the United States will take charge of the technical work of training miners and others in the use of rescue apparatus and in the direction of rescue operations when called upon, in addition to conducting their field work from this central location. Negotiations are making good progress toward the establishment of similar stations in the other important coal-mining regions.

Mr. J. W. Paul, formerly chief of the department of mines of West Virginia, one of the most experienced mining engineers in the country in inspection of mines and in the investigation of explosions and disasters, is at the head of the section of mine rescue and mine lighting, with headquarters in Pittsburg, and assisted by a corps of mining engineers specially fitted for this work. Under Mr. Paul's direction, instruction is given the mine engineering force in the testing and use of this apparatus. A number of miners provided by the coal operators within

easy reach of Pittsburg have already been trained in the use of rescue apparatus at the expense of the mine owners, who have provided at their own expense all necessary instruments and appliances for use at their mines. Whenever a disaster occurs in this region, telegraphic information reaches the Pittsburg testing station, and Mr. Paul and his assistants proceed to the scene after wiring the miners they have trained to join them with their apparatus, and in this manner it is possible to rapidly assemble a large force of men who have had previous experience in mine-rescue work and who are familiar with improved methods of assisting in life saving under such circumstances. The rescue apparatus includes helmets for the protection of the head, and accessories whereby it is possible to artificially breathe air, even when in mines in which the quantity of deadly gas is so abundant that life could not be sustained more than a few minutes without this artificial respiratory arrangement. On a number of occasions, notably at the Hazel mine disaster, near Pittsburg; the Washington mine disaster; Marianna mine; Ziegler mines, Illinois, and so forth, this corps has rendered efficient service in rescuing persons, in removing bodies of the dead, and in directing operations necessary to clearing the mines and placing them in condition to resume operations, whereby those miners who would otherwise have been thrown out of employment for many weeks are enabled to resume work within a few days. Such assistance, however, can only be rendered within a limited radius, as exceedingly prompt arrival on the spot is essential to any successful results. It is for this reason that Mr. Paul and his force is training the mining engineers and force in the use of this apparatus and methods with a view to the establishment of substations locally accessible.

The section for testing and making analyses of explosives used in coal-mining operations is under the general direction of J. C. Roberts, an experienced mining engineer, with Clarence Hall, one of the best-qualified explosives experts in the country, in charge of physical tests, and W. O. Snelling, a skilled chemist, in charge of analyses of explosives.

At the request of the Illinois powder commission, composed of representative mine owners and mine operators, which samples all the powders being used in the mines in that State, complete analyses and grading of the sizes of powder grains have been finished. Routine analyses of the enormous purchases of explosives for use on the Isthmus of Panama, and by the Reclamation Service in blasting operations in which life is endangered owing to the frequent receipt of unsafe explosives, have been completed and 43 made, involving several hundred chemical determinations. Over 100 analyses of powders and dynamites in use in mining operations have been made, involving about 800 chemical determinations. These powders are undergoing various tests as to size of grain, durability, safety from spontaneous combusion, and so forth. At least two explosives on the market found to be dangerous have been quietly withdrawn by the manufacturers at the instance of the Geological Survey. Analyses of gases resulting from explosives to the number of 336, involving a thousand determinations, have been completed.

Over 700 physical tests have been made of the various explosives collected by the government mine engineering force and state mine inspectors, furnished by coal operators and miners, to determine their behavior under various conditions. For two months continuously the mine gallery has been in operation day and night with three eight-hour shifts, standardizing and calibrating instruments for this gallery, in order that official tests might be commenced at the earliest possible date relative to the behavior of various explosives in the presence of various mixtures of coal gas and coal dust. Many of these demonstrations have been public, and have been most beneficial already in directing attention of those engaged in mining operations to conditions under which use of explosives are dangerous. These standardizing tests have been completed, and the accompanying notification has been issued manufacturers of explosives inviting official tests of the same, which are in progress.

A large number of tests have been completed of the various safety lamps to determine conditions under which they may or may not remain lighted or cause explosions. Similar tests have been completed to determine the danger of denatured explosives by dropping or jarring them in handling and to determine the safety of electric lighting of various voltages, electric hauling or hoisting apparatus, and so forth, in the presence of dangerous mixtures of coal gas or coal dust.

What is wanted is not hysterical, crude, and ill-considered legislation to correct admitted evils, but whose origin and cause are as yet unknown or little understood, but a careful study by and through a bureau of mines, with its experts working and investigating everywhere, under all conditions, in all the mining regions of the country, and publishing the results of their studies and investigations; the continuation of the carefully conducted tests and experiments at the experiment and testing station at Pittsburg and elsewhere; and the creation and support of the schools of mines in the several States. All these, cooperating in harmony, should soon be able to gather much accurate knowledge and disseminate it and educate in the highest degree expert and practical students in all that pertains to the mining industry, who should find lucrative employment in manning and managing the second largest producing industry in the country.

Scarcely more than a year ago there was much diversity of opinion whether coal dust was explosive, or in what degree; and to what extent, mingled with mine gases, it was responsible for these explosions. New tests at the station at Pittsburg have demonstrated beyond all doubt that, mingled with a small per cent of the inflammable gases usually found in the bituminous mines, it becomes a force of terrible explosive power. Until greater and more exact knowledge has been accumulated, it will be impossible to legislate intelligently with the purpose of securing greater safety or immunity from danger.

Doctor Holmes, in charge of the technological branch of the United States Geological Survey, has officially expressed the opinion that, with all the investigations of this and other countries up to date, sufficient information had not yet been obtained to justify any changes in present mining methods, and that the causes of these disastrous explosions had not yet been sufficiently determined.

The coroner's jury investigating the mine explosion at Monongah, in my State, on January 15, 1908, stated:

There are many unsolved questions connected with coal-mine explosions. We recommend that Congress make an appropriation for the establishment of a bureau of investigation to aid in the study of the various conditions under which the explosions occurred and as to how they may be prevented.

I am just in receipt of the following telegram from Governor Dawson, of West Virginia:

CHARLESTON, W. VA., *February 24, 1909.*

Hon. GEORGE C. STURGISS,
Care of House of Representatives, Washington, D. C.:

Legislature has adopted joint resolution which has been approved by me urging you to aid in securing prompt passage of pending bill for establishment of national bureau of mines.

W. M. O. DAWSON, *Governor.*

Mining engineers, mine owners and operators, all the organized miners, United Mine Workers, the technical press, and the public press are practically unanimous and most urgent in declaring it the duty of Congress to create a bureau of mines, establish schools of mines and mining engineering in the land-grant colleges and universities, one at least in each State, and to carry on the work of the stations investigating the causes of mine explosions, with a view to increasing safety in mining.

Sentiments of humanity, public policy, increased efficiency, economy of production, and conservation of our mineral resources all demand immediate and affirmative action on all three of these measures. If I can be instrumental in bringing these to a successful issue, I shall regard that as honor enough for half a dozen terms in Congress.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. JOHN A. KELIHER,

OF MASSACHUSETTS,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"Resolved, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of the House from the State of Rhode Island.

"Resolved, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"Resolved, That the Clerk communicate these resolutions to the Senate.

"Resolved, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. KELIHER said:

Mr. SPEAKER: It was my good fortune upon entering Congress, six years ago, to draw a seat beside that of the late Member from Rhode Island, Hon. DANIEL L. D. GRANGER.

Sitting together upon this side of the House as Democrats from New England, we naturally formed an early acquaintance, for the company of New England Democrats in Congress has been discouragingly limited of late. This acquaintance gradually developed into an intimate friendship which I prized as

one of the most valuable of my life. Mr. GRANGER was magnificently fitted for service in Congress. He was gifted by nature with a fine mind, which was fully equipped by thorough education and extensive travel; possessed of a high sense of honor; and was in perfect sympathy with the highest traditions of our history. He approached the consideration of every public question with rare intelligence and courage. The public welfare was his sole guide in public life. With the demagogue he had neither sympathy nor patience, and when his conscience and political expediency did not harmonize, all thought of the political effect of his action vanished from his mind, and his vote answered the command of conscience. He was a model citizen, and the discerning people of his State appreciated the fact, for they chose him almost continuously to represent them in administrative capacities, and their confidence was repaid in the perfect character of his service.

His assignment to the Ways and Means Committee, the most important of the House of Representatives, indicated his high standing in this body. He was personally popular with the membership of the House, which recognized and respected in him a manly man and courtly gentleman as well as wise counsellor, whose sound advice was available to all who would but ask it. He approached very near to my ideal of statesmanship.

Mr. Speaker, the cause of good government in Rhode Island lost a stalwart champion in the demise of Representative GRANGER that it can ill-afford. Let us hope that the great record which he established in public life will attract to his methods the young men of that State entering public life.

Mr. Speaker, while in his death I lose a dear friend to whose sound advice I owe more than words at my present command will indicate, I am still the beneficiary of profitable precepts which came to me through years of association with the distinguished gentleman to whom I pay this modest and inadequate tribute—DANIEL L. D. GRANGER.

Ship Subsidy.

SPEECH

OF

HON. WILLIAM H. GRAHAM,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

Mr. GRAHAM said:

Mr. SPEAKER: This great question of merchant marine, the most important, in my estimation, that faces the Nation at present, is not a legal question for lawmakers, but purely a business proposition. For this reason I, as a business man, call upon you lawyers to consider it from a business standpoint.

There are 264 lawyers in this Sixtieth Congress. This includes the Speaker, of whom, however, it has been said that, like the Gentiles of old, "having not the law, he is a law unto himself." It ill becomes me, a plain business man, to split legal hairs with these bright lawyers, but when it comes to a question like this, involving the shipping industry of this country, the only industry, by the way, that has never been protected, I feel it my duty to at least say a word in favor of it.

I wonder if President Roosevelt, while he was reviewing our fleet last week upon its return from the round-the-world cruise, was reminded of the fact that this great country of ours had such an insignificant merchant marine that it was necessary for us to send the coal which was consumed by that fleet in foreign bottoms.

We are all proud of our navy, but of what use is it if we are dependent upon the merchant marine of foreign countries to transport and furnish it with the coal necessary to propel our war vessels and operate our turrets and our guns?

But what is of still more vital importance is our foreign trade, our trade with the Orient and with our South American neighbors especially. We believe in competition. We have been enacting laws against the trusts because they would not permit of competition, yet we paralyze our own shipping industry and force our merchants and manufacturers to submit to all sorts of boycotting at the hands of the owners of foreign ships because we refuse absolutely to encourage—or, I should say, substantially encourage—the building up of a merchant marine of our own. Our commercial competitors pay nearly $30,000,000 annually to their steamship lines. We employ our consular officers in all parts of the world to promote our business relations with the peoples of the various countries. For this alone we expended over $1,800,000 for the fiscal year ending June 30, 1908, and this amount is increasing every year. If we are willing to make these expenditures for the purpose of promoting our commercial relations, we certainly should make some provision by which we can assist in the promotion of a merchant marine for the transportation of our products.

We are pledged to "encourage the upbuilding of a merchant marine," and I hope the House will do so substantially by the passage of this bill.

Passports of Jewish Citizens.

SPEECH

OF

HON. GILBERT M. HITCHCOCK,

OF NEBRASKA,

IN THE HOUSE OF REPRESENTATIVES,

Monday, March 1, 1909,

On House joint resolution 235, requesting the President to renew negotiations with the Government of Russia to secure, by treaty or otherwise, uniformity of treatment and protection to American citizens holding passports duly issued by the authorities of the United States.

Mr. HITCHCOCK said:

Mr. SPEAKER: I am glad of the opportunity to say a few words in support of this resolution introduced by my friend, Judge GOLDFOGLE, of New York. The only regret I have is that the Committee on Foreign Affairs has not seen fit to report the resolution in stronger, clearer, and more emphatic terms. In its present form the resolution requests the President of the United States to renew negotiations with the Government of Russia to secure, by treaty or otherwise, uniformity of treatment and protection of American citizens holding passports issued by our authorities, so that Jewish-American citizens may receive the same protection and immunity in Russia which other Americans receive when carrying a passport and visiting that country.

Five years ago this House passed a similar resolution, requesting the President to renew negotiations with such governments as discriminated against Jewish Americans, and as that request and those negotiations have been of no effect so far in the case of Russia, it seems to me that the time is approaching when the House of Representatives and other departments of the Government might very properly adopt more effective measures and speak more emphatically. This is not a new question in America. For many years the matter has been agitated. Year after year and session after session Judge GOLDFOGLE, of New York, and others have demanded that Russia should accord to Jewish-American citizens the same privileges of travel in Russia that Russia accords to other American citizens and to other citizens of other countries. These privileges are no more than America accords to all the citizens of all countries. They are no more than all nations of the world except Russia accord to Jewish Americans. No argument is made, on this floor or elsewhere, so far as I know, which presents any substantial reason why Jewish-American citizens should not have the right to travel in Russia the same as other American citizens have. No argument is presented here or elsewhere, as far as I know, which indicates that there would be any possible danger which could come to the people of Russia or to the Government of Russia by reason of permitting Jewish-American citizens to travel there and to enjoy the protection of American passports.

Why, then, is this discrimination against the American Jew? It is a discrimination based wholly upon prejudice, a prejudice which either has its foundation in race hatred or religious intolerance. In either case the American people have the right to resent it. An American passport ought to be good in all countries of the world when in the possession of a law-abiding American citizen. This country can not afford to allow its dignity to be affronted by further indifference to this arbitrary stand taken by the Russian Government without reason and without apology.

Mr. Speaker, I commend my friend Judge GOLDFOGLE for the persistence and the ability with which he has pressed this issue upon the floor of the House of Representatives. I only wish that I might also extend my congratulations to our Department of State. It seems to me remarkable that while the United States of America, affording to the citizens of Russia all the privileges and immunities, all the friendship and the consideration which are due to the people of a friendly nation—I say it seems to me strange that in extending these privileges to Russia

this country has been willing to tolerate this unjust discrimination against a large number of our American citizens. It was an American who secured freedom of the press for the newspapers of Russia. America has furnished the example to inspire all the reform elements of Russia to attain self-government. America shielded Russia and assisted that broken empire to conclude an honorable peace with Japan, and further aided her after the war. Surely America ought to be able to secure from the Emperor of Russia recognition and honor for American passports in the hands of peaceful, law-abiding, and reputable American citizens, whether they be Jews or Gentiles.

Mr. Speaker, I have said that I regret that the resolutions now before the House are not stronger. I regret that they do not have much of the vigor and vitality which they had as originally drawn by Judge GOLDFOGLE. I regret that the Committee on Foreign Affairs has found it necessary to moderate these resolutions so much and to make them so mild and inoffensive. Nevertheless, as this seems to be the best that we can procure at the present session, I shall take pleasure in voting for the passage of these resolutions requesting the President to renew negotiations with Russia, and I trust the Department of State, under the direction of the President, will insist firmly, even though it be politely, upon the American demand that a passport from the United States shall be honored when presented by a Jew as well as when presented by a Gentile. If these negotiations fail, as other negotiations have heretofore failed, then I hope the House of Representatives will inspire the Department of State to take stronger measures to bring about justice to the Jews of the United States and honor to American passports.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS
OF
HON. AUGUSTUS P. GARDNER,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"Resolved, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"Resolved, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"Resolved, That the Clerk communicate these resolutions to the Senate.

"Resolved, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. GARDNER of Massachusetts said:

Mr. SPEAKER: Gentlemen may make merry in these days when claim is made as to the especial merit of the "stock of the Puritan." Gentlemen are welcome to their merriment so long as their acts continue to belie their mirth. So long as men choose the Puritan as their leader and their representative, so long as men show themselves willing to trust their Puritan leader's judgment and his decision, whether or not it coincides with their own, just so long will the world believe that the doctrine of austere honesty has proved its case.

GRANGER was a Puritan of Puritan beliefs, Puritan uprightness, Puritan singleness of purpose. Yes, of Puritan prejudice, if you will have it so. Sprung from my own people, from my own town of Ipswich, in Massachusetts, from my own kinsfolk, he inherited the virtues of his forefathers and he inherited their shortcomings. Yes, but their virtues were enhanced in his character, while their shortcomings were reduced to that minimum which nature exacts from all men.

To those of us who love the lime light of publicity, GRANGER'S successful career may serve as a notice that the buskin and the mask are not the only effective accessories in progress through the world. His part in the comedy or the tragedy of life, call it whichever you will, bore no relation to the applause of the emotional beings in front of the footlights. Of them he never sought the acclaim. He never received their applause; but from the thinking multitude who act but never applaud he wrested the appreciation due to him who had been faithful over a few things, and so had shown his capacity to be a ruler over many things.

To those of us who are struggling for the appreciation of our constituents, as well as for that of our fellow-Members of the House of Representatives, there are two guerdons of success which each one of us longs to wear as a medal on our breast. There are two committees in which membership invariably signifies one of two things.

If a Member of this House is selected for a place on the Committee on Appropriations or on the Committee on Ways and Means each one of us knows, even if the country does not know, that the Member selected is a man who stands above his fellows. GRANGER was a member of the Committee on Ways and Means. Are there many of you who would decline that great honor if it were offered you? I venture to say there is not a Member of this House who would not give much to attain that prize. Yet GRANGER did not attain it either by an unbecoming straining toward the glory of the journalistic headline nor by the unworthy ranting of the demagogue or the visionary. By the solid, substantial, unostentatious performance of his work he won his opportunity for greater work and greater influence. Let those of us who seek reward by the meretricious short cut of notoriety take heed from his example.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS
OF
HON. JOSEPH F. O'CONNELL,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"Resolved, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"Resolved, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"Resolved, That the Clerk communicate these resolutions to the Senate.

"Resolved, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. O'CONNELL said:

Mr. SPEAKER: As a New England Democrat, my position today, participating in these memorial exercises to the memory of my late colleague, has a doubly sad significance. It is painful to comment on the loss of one who has been a colleague, with whom relations have been most pleasant and cordial, but it is even more so when it is realized that his departure removes from Congress one of the small handful of Democrats who represent the great group of New England States.

In the political economy of this Nation it may, perhaps, be generally accepted that an uneven division of political responsibility is to be regretted. New England with her almost solid representation of Republicans, and the South with its even more solid Democratic representation, afford two striking examples of this policy. Many leaders of highest thought in New England have believed that this policy has injured the interests of New England in many instances in the last two decades. Rhode Island, however, was wise enough to dissent from her sister New England States and divided her representation, giving to Mr. GRANGER, as a Democrat, the honor of representing her for three successive terms in the National Halls of Congress, along with his colleague, Mr. CAPRON, of the opposite political faith.

This policy proved a happy one, and in the choice of Mr. GRANGER splendid discernment was shown and just recognition paid to meritorious and honorable service rendered by him in prior years, when, as reading clerk of the Rhode Island legislature and treasurer and mayor of Providence, he won the esteem and respect of all those who knew him of both political faiths. That the policy of the citizens of Rhode Island was not a mistaken one was clearly shown when Mr. GRANGER was elevated to the very important position of membership on the Ways and Means Committee, the most important committee in Congress. This place on the committee gave to the State of Rhode Island a position in the councils of the Nation which her very large industrial interests and her splendid traditions justly entitled her to and was an impressive vindication of the policy of her citizens in sending a Democratic Representative to Washington.

The Democracy of the Nation mourns the loss of Mr. GRANGER and to-day joins the citizens of the First Rhode Island District in paying due and merited respect to his memory.

It was, indeed, unfortunate that in the last year of his life his health was poor, but his patience, good nature, and courage

in fighting off the malady which finally proved fatal won for him the admiration and love of his friends, and his gallant fight will always be regarded with the warmest respect by all who knew him.

Mr. GRANGER was courteous, considerate, and polite, thus splendidly combining those elements which distinguish a gentleman and won for him the love and esteem of his fellow-men. As a university graduate, he carried into the vital affairs of this Nation those ideals which had come to him from a line of ancestors who believed in the undying principles of Jefferson and Jackson. He early recognized that this Government, in order to be a success, must continue along the lines of its founders, and a continuation along that line meant that it must be governed by one of the big parties. He believed the Democratic party better equipped in principle, as his fathers had before him. As a strict party man, Mr. GRANGER had the confidence of his party associates; as a Member of Congress, he had the respect of his political opponents because of his loyalty, fealty, and strict adherence to Democratic doctrine.

The most regrettable part of his career was the fact that the last six months found him physically unable to meet the demands imposed upon him as a Member of Congress from a district with large, varied, and important interests. His friends and close associates believe that had his health continued as it was in prior years he would unquestionably have been reelected. As it was, Mr. GRANGER felt that he had been reelected. With this thought firmly impressed in his soul, he was preparing to contest the seat of his opponent at the polls. Unquestionably this belief on his part was sincere. I know nothing about the merits of the case, nor do I care at this time to in any way discuss them, other than to say that, believing as he did, he certainly acted as a man in carrying the fight to the highest tribunal. To die fighting a just cause is glorious to men. DANIEL L. D. GRANGER died fighting for what he felt to be a just cause.

In his death Democracy loses a loyal, illustrious, and deservedly honored son; the Nation mourns the departure of a wise counselor; the State of Rhode Island, with reverence, places his name among those of her sons who, born on her soil and educated in her schools and university, continued through life to remember the ideals and the traditions which from the days of Roger Williams have placed Rhode Island high in the galaxy of States forming the American Union.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. JOSEPH A. GOULDEN,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909.

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. GOULDEN said:

Mr. SPEAKER: On Sunday, February 14, 1909, our colleague DANIEL L. D. GRANGER, of Rhode Island, departed this life. He died in Washington, at the post of duty, though unable to attend the sessions for some time prior to his death.

For two years he suffered with an incurable disease, which he bore with Christian fortitude and resignation. It was my good fortune to know our late colleague quite well, and the relations existing between us were always of the most friendly character.

To know him was to respect and love him. He was a man of deep feelings and great sympathy. It was his invariable custom to bid everyone a cheerful "Good morning!" and in a pleasant manner inquire about your health. His disposition was a jovial one, and he was fond of telling a good story. His companions loved to hear him, no matter what his subject might be.

As a Member of Congress he was faithful and earnest in the discharge of his duties. He rarely missed a committee meeting or a session of the House. In his action on important matters he was disposed to be independent and nonpartisan. He measured up to the full standard as a man and as a statesman. His life is an inspiration for the young men of the Nation. It shows what a poor boy can accomplish in this favored land. Beginning at the bottom of the ladder he worked his way up to the top, becoming one of the leading men, not alone of his State but of the Nation. His loss will be seriously felt by all who had the honor of his acquaintance.

Our consolation is that he did not live in vain—that his example is left us for the inspiration and conduct of those who follow him.

We mourn him dead, but "his deeds do live after him."

Now is the stately column broke,
The beacon light is quenched in smoke;
The trumpet's silver voice is still,
The warder silent on the hill.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. WILLIAM H. RYAN,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. RYAN said:

Mr. SPEAKER: My acquaintance with our late colleague, to commemorate whose memory we have met to-day, began when he entered the Fifty-eighth Congress. As time passed our acquaintance ripened into a warm friendship.

Mr. GRANGER having friends and business interests in Buffalo, my home city, he frequently visited there, and on those visits I often had the pleasure of his company. He was a typical New England gentleman. It was always a pleasure to meet him.

He was a lineal descendant of Launcelot Granger, who with his wife came from England and settled in Ipswich, Mass.

Capt. Abner Granger, a descendant of this common ancestor, served with distinction in the war of the Revolution and was with Washington at Valley Forge.

His grandfather, Erastus Granger, was a warm supporter of Thomas Jefferson. He and Gideon Granger, his brother, were residents of the State of Connecticut and were surveyors and civil engineers, and were engaged by many New Englanders who had invested in Virginia lands to go to Virginia and survey them.

During their stay in Virginia they visited Monticello and there met Thomas Jefferson and became very much attached to him. On their return to their home in Connecticut they were enthusiastic in their praise of Jefferson and the policies he advocated.

When Jefferson was a candidate for the Presidency of the United States those sturdy New Englanders traveled through their State advocating his election. Afterwards President Jefferson, in appreciation of the services rendered, appointed Gideon Granger Postmaster-General in his Cabinet and Erastus Granger was named as the first postmaster of the then village of Buffalo, N. Y.

Both rendered distinguished services to their country. Erastus Granger, representing the United States, after much negotiation with the famous Indian chief, Red Jacket, of the Iroquois or Six Nations of New York State Indians, succeeded in keeping that powerful tribe neutral during the war of 1812.

Mr. Erastus Granger was for years one of the leading citizens of Buffalo, and there are many landmarks to-day in that city that recall the family name.

DANIEL L. D. GRANGER'S father, Rev. James N. Granger, was a clergyman, and settled in Providence, R. I., where our late colleague was born in May, 1852. Mr. GRANGER gradu-

ated from Brown University in 1874; was admitted to the Rhode Island bar in 1877. He practiced his profession in his home city; was twice elected reading clerk of the Rhode Island House of Representatives; was for eleven years after 1890 city treasurer of Providence, and for two terms elected mayor of that city, and when death called him was completing his third term as a Member of this body. He was of the old school of New England Democracy.

To know Mr. GRANGER was to love him. He was a man of good habits, an exemplary citizen, and lived an upright life. He was a conscientious Representative and an able legislator.

His kind manner endeared him to all, and by his death this House has suffered a great loss.

It was my privilege to be one of the committee appointed by the Speaker to pay the last tribute of respect to our departed colleague. The services were held in St. John's Church, Providence, and that magnificent church was filled with mourners, including state and city officials and hundreds of sorrowing friends. The burial was at Swan Point Cemetery, where all that was earthly of DANIEL L. D. GRANGER is laid at rest.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. ADIN B. CAPRON,

OF RHODE ISLAND,

IN THE HOUSE OF REPRESENTATIVES,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. CAPRON said:

Mr. SPEAKER:

Who misses or who wins the prize
Go lose or conquer as ye can,
But if ye win or if ye lose,
Be each, pray God, a gentleman.

The actuating impulse of the life and the character of DANIEL LARNED DAVIS GRANGER, who recently passed from our midst to the great beyond, was in his instincts habitually of the quality of a gentleman in every relation in life. Born in the city of Providence May 30, 1852, and reared in the atmosphere of a religious home, his youth and young manhood promised the fruition which his later life fulfilled. He gave constant and consistent effort to the promotion of his high ideals of religious life and living. A graduate of Brown University, in 1874, he chose the law as his profession in his native city of Providence, and my personal acquaintance with him began with his acceptance of the position of clerk in the Rhode Island house of representatives. Soon thereafter he was chosen by his fellow-citizens to the responsible office of city treasurer of Providence. His incumbency of that position was characterized by a high degree of ability and probity, and resulted in the commendation of his people. His success in keeping the credit of his city upon a high and honorable financial plane was duly appreciated and commended. Continuing in the service of his city, the second in size in New England, he was called to the high office of chief executive thereof. His service as mayor was characterized by an able, honest, and progressive administration, and after serving two terms he voluntarily declined to accept renomination to the mayoralty. But he was not permitted to retire from public life, and was nominated and elected to represent his—the first district of Rhode Island—in the Congress of the United States. His quiet and unostentatious manner as a new Member of this body won him the friendship of the Members of the House in a conspicuous degree.

In the second Congress to which he had been again chosen, he was appointed to membership upon our most important Committee on Ways and Means. The insidious and often distressing and painful disease to which he at last succumbed had deprived him of the opportunity to devote himself to the important work of his committee to the extent which his ambition impelled, but he bravely fought back his increasing suffering and took part in the work of the House and committee when at times prudence might have counseled him to give first attention to his health.

From the human view point it seems hard that this life should be cut short while one is still in his prime with so much to attain which seems approaching fruition; yet who can measure the real value of human accomplishment and its limitations? A single act may justify a whole life, even from the earthly point of view. Only the Supreme Intelligence can correctly appraise the worth of any one of us in His great scheme of the true value of our existence. The full value of man's service to his fellowmen, and as measured by our Creator, is not for finite minds to know.

Our friend has gone from the place in our midst which knew him so well. His memory will long remain to cheer us in our efforts to carry out each his little part in the infinite plan of life. It seems a pity sometimes that "the kindly things said of us after we have passed to our reward could not have been said while the subject was still upon the active field of life to cheer and sustain us in our efforts to aid in the uplift of humanity."

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. ANDREW J. PETERS,

OF MASSACHUSETTS,

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. PETERS said:

Mr. SPEAKER: My duty as a colleague and my desire as a friend alike stimulate me to pay to Mr. DANIEL L. D. GRANGER, of Rhode Island, that respect which is his due and the utterance of which is to a friend a privilege.

Our Government exists by the will of its people, and the carrying out of that will is one of the highest duties of democracy. This duty the people of his city and State imposed on Mr. GRANGER, and that such trust was well placed no one with whom he came in contact ever questioned.

A public servant in many capacities, he for years served in the important office of treasurer and later as mayor of Providence, the second city of New England. To the public and to the country as a whole his most useful service, however, was rendered in the Congress of the United States. Respected and trusted, he received the support alike of those most truly interested in our country's welfare, and for three terms was sent by a constituency in which his party was in the minority to Congress. The confidence so placed in him was not misplaced, and his personality and talents earned for him a position on what is regarded generally as the most important committee of Congress—Ways and Means. That his labors are ended before the full measure of accomplishment of his life had come can bring but regret to all. That his life's work has in no small manner helped the welfare of his country and mankind does not need my statement.

Straightforward and upright, he stimulated by his example the best impulses of all with whom he came in contact. His unselfish and sympathetic nature drew naturally to him friends, and their loyalty and sorrow testify to-day more than words can tell to his memory.

Our country, to safely guard its treasures of liberty, needs the services of its citizens of the highest character. To-day we mourn one who has served his country in the noble work of peace with his highest effort, and as friends we will treasure always the memory of that man of character, simple and direct, and who gave of his best to our Republic—DANIEL L. D. GRANGER.

Treaty Between the United States and Russia.

SPEECH

OF

HON. HERBERT PARSONS,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Monday, March 1, 1909,

On the resolution (H. J. Res. 235) concerning and relating to the treaty between the United States and Russia.

Mr. PARSONS said:

Mr. SPEAKER: The passage of the resolution, with the object of which I am in hearty sympathy, is, however, entirely unnecessary, in view of the very determined attitude of the incoming President on this matter. In a speech made at the Thalia Theater, in New York City, on October 28, 1908, the Hon. William H. Taft said in regard to this subject:

Our fighting the Spanish war, our disposition of the Spanish dependencies, has given us a national prestige that our Nation never had before. The sending of the navy around the world has had an effect most useful when exercised by a government anxious for peace and determined to have it. But that national prestige must be used not only for the benefit of the world at large, but for the benefit of our own citizenship, and therefore as we gain in international prestige we ought to assert our insistence that our passports certifying our citizenship should secure to every man, without regard to creed or race, the same treatment, the same equality of opportunity, in every nation on the globe. Now, this is not a matter with respect to which promises of immediate accomplishment can be made, but of this you can be certain that if you commend the administration of Theodore Roosevelt by electing a Republican administration to succeed his, that administration will continue to press that question until the certificate contained in an American passport shall have the effect that it ought to have.

On October 26, 1908, at the Metropolitan Sänger Hall, in Brooklyn, N. Y., he had spoken to the same effect, saying:

It is a pleasure to be here, for nowhere in America is there a greater spirit of freedom and a greater appreciation of American institutions than right here among the people who owe so much to our immigration laws. * * * People have asked what is the use of a great navy or a great army or of establishing wide foreign relations. That has been the Roosevelt policy. After the Spanish-American war we established foreign relations on behalf of the dependencies, and Mr. Roosevelt has since been able to exercise a greater power for peace than any other President or monarch. It seems to me we ought to give the term "American citizen" the proud significance that "Roman citizen" gave in the days of Rome.

Therefore we should progress to the point where no matter in what part of the world an American citizen may be found his certificate of citizenship shall be all that is required to insure his respect and good treatment. Nothing, if I am elected President, will give me greater pleasure than to devise ways and means to make the American passport respected the world over. Do not misunderstand me. What I am promising is that every effort shall be made to this end.

Eulogy on Hon. Daniel L. D. Granger,

REMARKS

OF

HON. FRANCIS B. HARRISON,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved,* That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved,* That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved,* That the Clerk communicate these resolutions to the Senate.

"*Resolved,* That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. HARRISON said:

Mr. SPEAKER: It is my privilege to pay tribute to the memory of our friend and late colleague, DANIEL L. D. GRANGER.

In his death the State of Rhode Island has lost a representative worthy of her highest traditions and noblest memories, the House of Representatives is deprived of a figure of commanding influence and highest integrity, and we, his friends, have lost the treasure of his companionship. There has passed out of our lives the abiding presence of a character in which tenderness and strength were of equal balance, in which rare cultivation of mind and manner served but to emphasize the vigor and power of the man himself.

It is not possible to gauge the profound effect of such a character upon his associates. Each one of us has gained something from our acquaintance with him. When a man of the highest character and deep learning consents to leave the seclusion of home and study to venture into the rough turmoil of the public service his influence must always be for the betterment of his fellow-man. Especially so when he treads his way fearlessly and without hesitation, standing with sturdiness for what he feels to be the right and for the ultimate uplifting of his generation. Such a man was DANIEL L. D. GRANGER.

But, Mr. Speaker, the blow has fallen most heavily upon the many of us who were his personal friends. The charm of his manner and his personality were a source of daily pleasure to us all. He has left his mark graven deep upon our affections. Personally, I shall always treasure my friendship with him as one of the most precious recollections of my life in Congress.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. CHARLES G. WASHBURN,

OF MASSACHUSETTS,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved,* That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved,* That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved,* That the Clerk communicate these resolutions to the Senate.

"*Resolved,* That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. WASHBURN said:

Mr. SPEAKER: My personal acquaintance with Mr. GRANGER was confined to very pleasant relations with him during the last session of Congress. We had, however, many friends in common who had long known him, from whom I have learned much that is interesting. Others will speak of his work here. I shall confine myself to a side of his life perhaps little known here.

He had for many years been deeply interested in the Protestant Episcopal Church, with the practical work of which he had long been closely identified. He was superintendent of the Sunday school connected with St. John's Church, Providence, for twenty-five years, during which time he took a keen personal interest in the welfare of the boys and girls under his charge. His relation with them was more than perfunctory; he was their intimate and trusted friend. Whenever any member of the school was ill he was a constant visitor, and his ministrations were often those ordinarily performed by the clergy. He was always most solicitous for the spiritual and physical welfare of all the young people brought within the zone of his influence, and was always active in securing places for such of them as were obliged to earn their own living and in aiding them to secure an education. A friend who is intimately acquainted with this side of Mr. GRANGER'S life recently told me that he knew of three boys whom he had helped, one of whom is now a rector in the West, another a rector in the East, and another a physician in a village in Rhode Island, none of whom, it might truthfully be said, would have had an education had it not been for the personal interest which Mr. GRANGER had in them. His house was always open to those who needed his advice and assistance. I remember that in one of the last conversations I had with him he asked if I could aid him in securing a pardon for a young man in whom he was interested, then confined in the state's prison in Massachusetts. The young man upon the expiration of his term went directly from the prison to Mr. GRANGER'S house, where he was warmly received and hospitably entertained. I think I am safe in saying that the church stood first in Mr. GRANGER'S affection; and then, looking beyond his immediate family circle, the weak, the helpless, and the unfortunate whom he had been able to help in their advance to better things.

His ear was ever open to their cry; his time was always theirs; of him it may be truly said—

He has kept that committed to his trust. He has fought the good fight, and laid hold on eternal life.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. CHARLES G. EDWARDS,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved,* That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved,* That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved,* That the Clerk communicate these resolutions to the Senate.

"*Resolved,* That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. EDWARDS of Georgia said:

Mr. SPEAKER: I would feel that I had failed to perform a duty that I owe to the memory of my dead friend, Mr. DANIEL LARNED DAVIS GRANGER, were I not to add a respectful tribute to the many splendid eulogies that have already been offered on this memorial occasion.

My acquaintance with him began with the first session of this Congress. Both being Democrats, we were frequently thrown together upon matters of legislation, and the more I saw of Mr. GRANGER the better opinion I entertained of him. His manly qualities appealed to me and I appreciated him as a well fitted and able legislator.

By reference to the biographical sketch of his life, as found in the Congressional Directory, we will see that he was born in Providence, R. I., May 30, 1852; graduated from Brown University in 1874. He was admitted to the Rhode Island bar in 1877; practiced law in Providence; twice elected reading clerk of the house of representatives. In 1890 he was elected city treasurer of Providence, and for eleven years served in that capacity. He was twice elected mayor of that city. He was elected to the Fifty-eighth, Fifty-ninth, and Sixtieth Congresses, and was a Member of this Congress at the time of his death.

The many high positions of trust to which he was elected and in which he served his city, State, and Nation testify to the high esteem in which he was held by the people of his native city and State. At the time of his death he was a member of the Ways and Means Committee of the House of Representatives, showing that his merit was duly appreciated in Congress, and as a recognition of which he had been given this high committee place.

His death has removed one of our ablest and most popular Members of the House of Representatives, and in his death Congress and the Nation have sustained a great loss.

It fell to my sad lot to be one of the congressional funeral party. St. John's Episcopal Church, from which the funeral took place, was literally crowded beyond its capacity by his relatives and friends, who gathered to pay their last sad tribute of respect. The ceremonies were simple, beautiful, and impressive. The remains were taken from the church to Swan Point Cemetery, followed by a throng of sad hearts, where our departed friend was laid to rest under the sod of his native State. Nature, too, seemed to weep. The day was cold, and the rain drops that had fallen early in the morning were frozen as they hung to the limbs of the trees and bushes and to the blades of grass; and as the sun came out at midday, when the interment was being made, the frozen raindrops hanging from thousands of places glistened in the sunshine and scintillated the beauty of myriad gems that seemed to me melting into tears over the death of this distinguished and lovable man. There, in that surpassingly beautiful cemetery, under a perfect mound of floral offerings, tenderly placed on his grave by sorrowing relatives and friends, we left him to see him no more on this earth.

The thousands, from every walk of life, who turned out to attend his funeral attested the love that the people of the city of Providence and the State of Rhode Island had for this faithful servant, who had served them so long and in so many high places of trust and honor.

Death is always sad. In this case it left its full measure of sadness and sorrow, but also a very consoling hope, for he was a Christian. I talked with many who had known him intimately for years, and while he had held many high offices, and at his death was a member of the highest and greatest legislative body in the world, in speaking of him they stressed not the fact that he had held high offices, but that he was a Christian and a good man.

What greater tribute could man desire? Coming from the hearts and lips of those with whom he had been reared, with whom he had walked and lived, coming from those who knew him best, it was the greatest tribute that human tongue could pay to his memory, and gives a sweet hope of a meeting again in that beautiful and great beyond, if we can have the same said of us when we die.

The loss of such a man is of great consequence to this nation. We need Christian statesmen to-day more than ever in the history of our country. We need men who fear God and walk with Him, as our departed friend did. In this day of greed for gold, when men are in a mad rush for wealth, position, and power, I fear God is too often forgotten. I fear, too, that it is often the case that men who do not fear God are elevated to positions of honor and trust, to rule over and direct the policies and laws of our country. Such is a sad misfortune. This is a God-fearing country and a God-favored country. His blessings to us as a nation are countless, and in recognition of his numberless blessings we owe it to Him to see to it that His holy name is not profaned by the elevation to these positions of power and honor characters that are not builded upon a faith and belief in God.

History will record that the crowning glory of the life of the great President William McKinley was the fact that he was a Christian statesman. The same can be said of our departed friend for whom these memorial eulogies are offered. The crowning glory of his simple life, and the one to be prized most highly by his kindred and his friends, is that DANIEL LARNED DAVIS GRANGER was a Christian statesman.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. CHAMP CLARK,

OF MISSOURI,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved,* That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved,* That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved,* That the Clerk communicate these resolutions to the Senate.

"*Resolved,* That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. CLARK of Missouri said:

Mr. SPEAKER: Another Member of this House has gone to join the vast majority. When we consider the fact that most men are in good health and not past the prime of life when elected as Members of the House, the mortality is astonishingly large. When the membership was only 357, in one term since I have been here 17 died. Hard work and close confinement are largely responsible for this condition of affairs. Let us hope that the step which we took on Saturday looking toward a remodeling of the Hall of the House so as to let in the sunshine and air may tend to lengthen the lives of the Members.

The latest of our Congressional brethren to depart was DANIEL LARNED DAVIS GRANGER, a Representative from Rhode Island. In three Congresses he ably and faithfully represented the capital district of that ancient Commonwealth. Having graduated from Brown University—one of our finest institutions of learning—and having been in due time admitted to the bar, he practiced successfully his profession in his native city of Providence until circumstances led him to enter public life, where he had a long and honorable career. Twice he was elected reading clerk of the state house of representatives; elected city treasurer, which position he held eleven years; twice he was elected mayor of Providence, and twice to this House. His public record is above criticism. In every position to which the voice of his fellow-citizens called him he discharged his duties so well that at the first opportunity they promoted him. In every contest in which he engaged the poll proved that he was stronger than his party.

We all know that he was an honest, modest, straightforward, industrious, dependable man. Soon after he came to Congress he was placed upon the great Committee on Ways and Means—an unusual honor for a Member of so short service. Having served with him on that committee, I cheerfully bear testimony to the value of his services thereon. During two years of our joint service the fact that I was the ranking Democrat forced me to a closer communion and more intimate acquaintance with my party fellows on that committee than would otherwise have been the case. Thus I came to know our Brother GRANGER thoroughly, and I know that his every impulse was honorable and patriotic. He had very decided views—old-fashioned views—as to public policies, which he advocated with courage and to which he adhered with consistency. Though mild in manner, he was firm as a rock.

His fidelity to duty was signally illustrated in his last months. As soon as Hon. SERENO E. PAYNE, chairman of the Committee on Ways and Means, issued his call for a meeting of that committee in this city on November 10 to conduct the tariff hearings, Mr. GRANGER wrote me that he was sick, but that if we really needed his services he would come on anyway. I at once both wrote and telegraphed him to rest at home, recuperate, and get well, while we would do our best with the tariff hearings; but, nevertheless, after a few days, he did come to Washington with the seal of death upon his face and wanted to join us in conducting the hearings. I had some difficulty in dissuading him from essaying a task for which his physical power was inadequate.

Some years ago he induced me to journey to Providence for the purpose of making a speech. I was never more generously received or more bountifully entertained. Before I left Providence I made three speeches instead of the one I had intended to make. Rhode Island hospitality is a thing never to be forgotten when once experienced. I have visited many Representatives in Congress in their home towns and have witnessed divers manifestations of regard for them, but for none of them more than for Mr. GRANGER. He appeared to know everybody, and all of his constituents, without regard to political affiliations, appeared to entertain personal affection for him.

His closing days were peaceful as a summer's eve, and he sleeps the sleep of the faithful in the beloved city of his birth among those who loved him well and for whom he wrought with fidelity and success.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. HERBERT PARSONS,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. PARSONS said:

Mr. SPEAKER: The evidences of respect and sorrow that were manifest at the time of the death of DANIEL LARNED DAVIS GRANGER betokened the high and enviable position that he had in his community. He was an excellent type of American. He came from old New England stock. He was well trained in things fundamental in life and was well educated so far as schooling was concerned. Of the advantages that came to him by heredity and environment he made good use. His services in both public and private life were very considerable and proved him a worthy man and a fitting representative of his people. No doubt the inspiration that prompted him to service was that expressed in the poet's lines:

> Do noble things, not dream them, all day long;
> And so make life, death, and that vast forever
> One grand sweet song.

Man's allotted portion in life varies. To some it is given to do one kind of service; to another a different kind. Some are called upon for an active life; others "also serve who only stand and wait." To Representative GRANGER it was allotted to be active in service, and those who knew him know that in the performance of that high obligation he was faithful unto death.

His position in this House was a notable one. He had received high consideration as one of the representatives of his party on a great committee. Illness prevented him, to his bitter sorrow, from doing his share of the labor on that committee, but, though in that respect he was deprived of doing the thing that he would have regarded as counting, the will to do was there, and that was the real measure of the man.

His useful and faithful life is over. He rests from his labors. His record here is an honor to himself and to his people.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. JAMES L. SLAYDEN,

OF TEXAS,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. SLAYDEN said:

Mr. SPEAKER: With the name of England's great naval hero, Nelson, is forever associated the word "duty." With equal permanence it is allied to that of Robert Edward Lee, who said it was the sublimest word in our language. Now, by reason of the inherent elements of his nature and the remarkable appreciation of those qualities that were so eloquently voiced by Charles Francis Adams, of Massachusetts, in his wonderful centennial address, we can never think of Lee except as typical of character. That great son of Massachusetts admired the genius of the Virginian, but he admired his character more. While Lee was serving his country in a subordinate place on the frontier, or with unmatched skill conducting military campaigns against an enemy of superior force, he was building character, and perhaps Mr. Adams is right when he suggests that character in a man or a people is more to be esteemed than skill in war or statecraft. It was this quality in the early Americans that made the rock-bound coast of New England the seat of a high civilization; that gave us the glory of Lexington, Bunker Hill, Kings Mountain, and Yorktown, and planted on the continent of North America 46 great, independent, sovereign States, dedicated to the preservation of the liberties of the people.

Typical of the people who did those things was DANIEL LARNED DAVIS GRANGER. He was of their blood and bone.

I was first drawn to him by an appreciation of the fact that he was a twentieth-century edition of the men of the Revolutionary period. At that time I did not even know that he was sprung from the loins of men who had done service for the country on the field of battle as early as 1758, nor that his grandfather, Abner Granger, had served with Washington throughout the American Revolution. I can only say that after I knew him I accepted such ancestry as a matter of course. He had the same qualities; he only needed the same opportunities to manifest them.

Being fellow-partisans, and to some extent of like tastes, I was thrown into his company in an intimate way. I came to love him as a man as much as I had admired him as a faithful Representative of his people.

In his political views, as in his personal traits, he was a wonderful reflection of his heroic forbears. His grandfather, Erastus Granger, learned political wisdom at the feet of Thomas Jefferson. The grandson was grounded in the fundamentals of democracy, and until the day of his death never wavered in the faith.

Every sketch of his life that I have seen has referred to his active work for the public good as an officer of his city, his

State, or the Nation, or as a private citizen. In all these places he measured fully up to the expectations of his friends. Those who knew him best appreciated him most. He was as conspicuous in church work as in politics, and for more than twenty-five years was superintendent of the Sunday school at St. John's Episcopal Church, of Providence. Jealous for the truths of history, he was a working member of the Rhode Island Historical Society. Preferring reason to force, humanity to brutality, he earnestly supported the cause of international arbitration.

As learned as he was modest, he commanded the respect and received honors from the scholarly classes with whom he was associated. He received the honorary degree of master of arts from his alma mater in 1902. President Faunce presented the degree in the following terms:

A. M.—DANIEL LARNED DAVIS GRANGER, of 1874, for some time treasurer of the city of Providence, now its chief magistrator, in both offices showing sturdy honesty, unflinching courage, teaching us to love city more than party and righteousness more than all.

That beautiful tribute from his neighbor and friend, the distinguished head of a great university, leaves little to be said.

But because it shows the estimate of him that was held by men nearer the field of political contests and less influenced by the charitable perspective of the closet scholar, I shall quote from an editorial in the Bulletin, a newspaper published in Providence:

Congressman GRANGER, who died in Washington yesterday, was one of the most valuable citizens of Providence. The welfare of the public appealed to him as an end that he should seek, and he sought it as many men seek their own private interests. It seemed to be continually in his thoughts, and he worked for it earnestly and fearlessly, without counting the cost to himself, and apparently without caring how strong the opposition might be. The public came to understand the singleness of his purpose. They trusted him. This is the secret of that remarkable power to win votes that made Mr. GRANGER one of the most influential Democrats that have ever held office in Rhode Island.

He was at the same time a practical politician and an idealist, a reformer and a partisan.

As long as the people choose such men for their servants representative government is safe. He took his mission seriously. He sought no mere honors. He only wanted an opportunity to serve. I shall always think of him as one whose central idea was—

Not only to keep down the base in man,
But teach high thought and amiable words
And courtesy and love of truth,
And all that makes a man.

On his monument, in addition to the high praise of—

Well done, good and faithful servant,

May well be carved the words—

Here lies a man.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. JOHN S. WILLIAMS,

OF MISSISSIPPI,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. WILLIAMS said:

Mr. SPEAKER: I first knew Mr. GRANGER when he came on to Washington after his election to the Fifty-eighth Congress. I had heard of him before as mayor of Providence on account of his remarkable campaign, resulting in unexpected victory for him and for the Democracy and on account of the probity and excellence of his administration of that important office. The fact that he had been previously to his induction into the mayoralty for eleven years treasurer of his city had also gained him golden opinions and demonstrated his reliability and capacity.

I liked him immediately because of his strong traits as a man and the characteristics of courtesy, dignity, and poise, which marked him a gentleman at the same time.

Pope says, "An honest man is the noblest work of God." Not so—an honest man who is well bred, courteous, considerate, and tactful is the noblest work of God. Mr. GRANGER was all of these, and added to their possession an ability of a very high order. These virtues soon won him his way to men's hearts here and to the forefront in the House organization of the minority side.

He became a member of the Ways and Means Committee and did good, intelligent, and tactful services there, until his health became such that it was physically impossible.

He regretted his later inability to be much at his post with deep anguish and often expressed it.

His interest was not confined to national legislation. Social, sociological, and international questions claimed a large share of his earnest and intelligent consideration, especially the great question of peace among the great nations of the world. He was one of the most earnest students of that great problem, and while he did not push himself to the front, self-assertingly, as some do, he was to the highest degree useful in bearing his share of the work as a member of the American group of the Interparliamentary Union for the maintenance of the world's peace, and as a delegate more than once to represent that group in peace congresses. He was sympathetic in heart as well as in mind, with all movements looking to the uplift of humanity and the betterment physically and morally of the poor and the ignorant and the vicious, who are the morally poor.

For years a vestryman of that historic church of which Hooker and Taylor and Ridley and Farrar and Stanley were priests or bishops in England and George Washington and Robert E. Lee and Jefferson Davis were laymen in America, he taught its Sunday schools and added practical religion and its sweet lessons of goodness to his achievements as a man, a statesman, a student, and a gentleman.

He was a clean man—clean in person, heart, and thought. He was affectionate to his immediate family and kindly to all the world.

As a lawyer I never knew him, and leave others to speak of him in that capacity. His religion was neither cant nor emotionalism.

He so lived that when his summons came to join
The innumerable caravan which moves
To that mysterious realm where each shall take
His chamber in the silent halls of death,
He went not like the quarry slave at night,
Scourged to his dungeon, but sustained and soothed
By an unfaltering trust.

Man is the only animal, Mr. Speaker, that honors his dead by ceremonious observance. The more civilized men are, the more reasonable and optimistic and hopeful they are, the less fearsome and superstitious are these observances.

The reason is that as men progress in the understanding of nature and of themselves they come more and more to think of time and eternity as being a continuity of duration in which immortal souls dwell in what ought to be kindly fellowship, under the wise eye and friendly guardianship of a God who is not only powerful, but good, and who, in the words of Jefferson, "desires not only the happiness of man here and hereafter, but that he shall be free also." One whose "kingdom" is on earth as well as in heaven, and whose "will is done" throughout all duration as well as throughout all space.

But for death and the sight and consideration of it, what the poet wrote would be always true:

The world is too much with us: late and soon,
Getting and spending, we lay waste our power;
Little we see in nature that is ours;
We have given our hearts away,—a sordid boon!
This sea that bares her bosom to the moon,
The winds that will be howling at all hours,
And are up-gather'd now like sleeping flowers,—
For this, for every thing, we are out of tune:
It moves us not.

Religion and philosophy may each be defined to be a study or "contemplation of death" and of what flows as conclusions from that contemplation—the belief in a sentient, supreme rule by beneficent law; a knowledge concerning immortality, sin, and its problems; a faith in righteousness and charity and in their ultimate supremacy.

It is death and pain and sin that at times, crushing out the purely material and secondary things, bring us to the realization of the higher and ideal and primary things—the true, the beautiful, and the good. Then it is that it can no longer be said of the higher and sentimental life that "it moves us not." Then are we, with "broken and contrite hearts," at the beginning of both wisdom and righteousness, and the mad rivalry for money and place being temporarily extinguished we can each exclaim, with fervent thanks to God, in the full presence and realization of the "eternal verities," "I am captain of my soul."

Being with the verities, the verisimilitudes no longer deceive, nor mislead, nor overmaster.

Thomas Carlyle well said:

Kindle the inner life, and you have a flame that burns up all lower considerations.

How shriveled in the presence of death and pain, which "kindle the inner life," are they all—these "lower considerations," the appetites of the flesh and the world, the allurement of place, the striving for wealth; in short, all secondary things.

Through the portals opened to our vision by death, how God and eternity and our own immortality and our real selves loom up until they exclude from the sight all other things. How the new view and the new life tear the tawdry disguise from mere material pursuit and petty self, and how pitiable they seem in their loathsome nakedness.

It is death only that can make us realize what real life is.

An orator in a public address recently said:

In the presence of the helpless dignity of the dead shall we not gather some knowledge of the dignity of life, some courage to meet the problems of the day, some hope for the future?

Yes; we can learn to meet them worthily with self-realization.

Death is ever, or ever may be, in our survey of life, a point of new departure.

This is eminently true when a good man's death brings its lesson with its shock.

Of the subject of this sketch it may be said, without cant or affectation, that he was a good man—one of the few.

Ship Subsidy.

SPEECH

OF

HON. LINCOLN DIXON,

OF INDIANA,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

Mr. DIXON said:

Mr. SPEAKER: This bill, ostensibly for the purpose of promoting the ocean mail service, is in fact the granting of subsidies to certain shipowners engaged in carrying our mail.

A subsidy is defined by Webster's Dictionary as "A grant from the Government to a private person or corporation to assist in the establishment or support of an enterprise deemed advantageous to the public." This bill grants to American mail steamships of 16 knots or over, and of not less than 5,000 gross tons, $4 per statute mile for services performed now for $2 per statute mile, a grant of 100 per cent. This grant is to be made to a private person or corporation to be designated by the Postmaster-General, and the purpose of the same is alleged to be for the promotion of our ocean mail service. These provisions clearly place this bill within the definition of subsidy.

The carrying of our mails in our own ships and the providing of auxiliaries for our navy in case of war is proposed and advocated on the ground of patriotism, but behind this mask is the true motive—greed and monopoly. It is not commerce, but money, that is wanted. This bill requires the Government to take the money of the whole people and donate it to a favored few in order to make profitable the shipping business, to furnish a bounty to induce men to engage in an unprofitable occupation.

This bill does not seek to remedy the causes of the decline of our merchant marine. It simply recognizes the pitiable condition of our shipping industry and confesses the inability of Republican statesmanship to rehabilitate the same except by a clear gift of profit to those who can be induced to engage in the business. It is palliative and not remedial. In no way does it meet the great problem to be dealt with.

This bill can only benefit our merchant marine, if at all, to the extent of the ships directly subsidized. Can you expect the people, already overburdened by taxation, and the Treasury bankrupt by extravagant appropriations, to approve the payment of subsidies that promise to be indefinite, and when it is not even claimed that anything short of indefinite payment will be of benefit to our merchant marine as a whole? This policy must be continued and enlarged, and the ultimate expense no man can tell or imagine. This subsidy will be but a tempting bait to lure on the greedy interests that always follow in the wake of grants of money from the Public Treasury.

Our former experience in ocean mail subsidies did not result in benefit to our shipping business or to our country and was abandoned. No nation ever succeeded in building up a permanent marine by subsidizing. The two nations possessing by far the largest foreign trade have never granted general subsidies, and are unhampered by certain unnatural and artificial conditions created by party legislation, which now exist in this country. It is a curious and significant fact that the decline of our merchant marine has been almost exactly contemporaneous and coincident with the administration of the Republican party.

Under the leadership of Madison and Jefferson our shipping became our most prosperous industry. Under the Democratic policy our foreign commerce carried in American vessels increased to over 90 per cent. From the foundation of our Government until 1860 an average of over 75 per cent of our entire foreign commerce was carried in American vessels. In 1860 over 70 per cent was thus carried, and to-day only about 10 per cent February 24, 1909:

This decline is not due to the decrease of commerce, as our foreign trade is many times larger to-day than at that time. Between 1850 and 1860 was the greatest growth of American shipping. During that time the American shipping in foreign trade was able to compete both profitably and successfully with foreign shipping. Then our ships were better and more cheaply built than the foreign vessels. Their speed was greater and their management so skilled that insurance upon their cargoes was less than upon foreign vessels. The American flag was seen in those days in every port and upon every part of the ocean.

One cause of this decline has been the tariff upon materials used in the building of ships. Evidence before the Merchant Marine Commission shows that an English shipbuilder could buy American-made plates delivered in England for over $8 less per ton than they could be purchased here, where manufactured. Charles H. Cramp stated that in the construction of a large vessel this item alone made a handicap to the American builder of over $150,000. It will not do to say that under the Dingley tariff iron and steel materials bear no duty if they are to be used in the manufacture of ships for foreign trade, and that consequently these materials may be imported by American shipbuilders from abroad, where they are sold more cheaply, and the return freight paid and thus cost less than the same plates manufactured and sold here. Even this avenue is cut off, for the reason that under our laws a vessel made from materials imported from abroad can never engage in the coastwise trade. So important an element is the possibility of a vessel being used in the coastwise trade, in the commercial value of the vessel, that builders will not construct ships for foreign trade which are forever restricted from engaging in this profitable service, and this prohibition effectually prevents foreign materials being used in our vessels and operates to make the tariff exclusion absolutely complete.

Not only ship materials, but ships themselves should be free. No good reason can be given for refusing to allow Americans to buy their ships in the cheapest market for use in foreign trade. The shipping industry is not employed to any considerable extent in building American ships for foreign trade, and no benefit is thus taken from the shipbuilder if our people should buy their ships abroad. It is impossible for our shipbuilders to lose a trade which they do not have.

I contend that our registry law, which does not permit a foreign-made vessel, even if owned, manned, and officered by American officers, to fly the American flag, and thus engage in our foreign trade, should be repealed. Years ago the British navigation laws were restricted, as ours are to-day, but these laws were repealed and freedom was given her citizens to buy ships anywhere and have them registered under the British flag. From that time her flag was seen upon every sea and her commerce upon every ocean. Germany later followed her example, and to-day her merchant marine is second only to the English. This policy should be followed by our Government.

The party that initiates the policy of granting aid from the Public Treasury in the form recommended by this bill assumes a fearful responsibility. With the deficit in our Treasury growing by leaps and bounds by the extravagance of a Republican majority, with the inland waterways of our country calling for legitimate appropriations for needed improvements, is it wise to enter upon a policy which must ultimately involve the expenditures of millions upon millions? The inland waterways are peculiarly the field of American enterprise. No foreign competition will enter this field, and if you provide the proper navigation facilities for the Ohio and Mississippi rivers, you will not have to pay bounties to our steamboat companies to engage in transportation. The Republican party pretends to believe in a home market, but neglects the question of home transportation. If money is to be appropriated out of the Treasury, it should be devoted to the development of our internal transpor-

tation facilities rather than to our foreign merchant marine, which, if freed from the artificial trammels of a high tariff and barbarous registry laws, and left to the operation of natural laws, will fully take care of itself.

I append an editorial from the Indianapolis News of date February 24, 1909:

THE SIMPLE STORY OF SHIP SUBSIDY.

The ship subsidy bill, which has passed the Senate—its natural home and hotbed—is before the House, and, it is said, with prospects of passage. It will subsidize ships to Brazilian and oriental ports. This, however, is a detail. The purpose of a ship subsidy is to furnish a bounty to induce men to engage in an unprofitable business. American capitalists can make far more money doing other things than running steamship lines; so the Government says: "If you will engage in this unprofitable business we will furnish subsidy enough to make it pay you handsomely. We shall tax the people millions of dollars a year and make you a present of clear profits for engaging in this business." But why should the Government do this? Because American capitalists can not make money on a business basis in the steamship business and the Government wants what is called a merchant marine, which, in case of war, would aid our navy. But why can not American capitalists make money in the steamship business? Capitalists of other countries do; and certainly our reputation in the world of money-making is not that of being slow or stupid when going after a dollar is the object.

Here is the reason: We have a system of protection in this country which must be maintained as a principle at all hazards. Therefore everything that enters into shipbuilding is taxed by the tariff, which increases its price. Besides, in order to be entirely protective, we have a law forbidding an American to buy a ship and sail it under our flag; he must have it built in this country. With the price of materials enhanced by the tariff and wages high as they are, we can not build a ship so as to make the running of it pay, compared with ships of other countries; hence we do not build ships and have no merchant marine, making more money by hiring foreign ships to carry our goods. But if we so greatly desire a merchant marine, why do we not allow our citizens to buy ships and sail them as the people of all other countries do? Protection. It would be a breach of the "principle" that we shall not buy anything abroad—after the manner of China. This plain, unvarnished tale is fittingly illustrated by the Portland Oregonian in the following recital of facts:

"Among the 27 colliers and supply vessels (that attended the battleship fleet) is the British steamer *Agapanthus*, a 7,000-ton carrier in A1 condition. The world-wide depression in freights left the *Agapanthus* without any employment after she arrived on the Pacific coast with supplies for the fleet, and she has since been laid up at Victoria. Last week she was sold for the insignificant sum of $45,000—less than one-tenth the price paid for the steamer *Tremont*, a slightly larger and newer vessel flying the American flag.

"If this country should get into a strained position where it was necessary for it to have a fleet of vessels flying the American flag, a single call for offerings of tonnage would bring colliers of all sizes and descriptions—not 27, but 27 times 27, and then some.

"Why in the name of the Star-Spangled Banner should the British, the Germans, the Japanese, the Norwegians, and all other maritime people be privileged to buy such steamers as the *Agapanthus* for $45,000, while we are forced to pay $500,000 for one merely because she already flies the American flag? If the Government had purchased or permitted American citizens to purchase these 27 colliers, they would to-day be spending thousands in our shipyards for repairs, supplies, etc."

This is the state of affairs which makes the advocates of ship subsidy try to take millions of dollars from the taxpayers of this country to build $500,000 ships when as good ones could be bought so much cheaper. Is that businesslike? Is it fair? And when we consider that this is the only country in the world which thus forbids its citizens from buying ships where they will, is it not more than unbusinesslike and unfair?

Eulogy on Hon. Charles T. Dunwell.

REMARKS
OF
HON. JOSEPH A. GOULDEN,
OF NEW YORK,
IN THE HOUSE OF REPRESENTATIVES,

Sunday, January 24, 1909,

On the following resolutions:

"*Resolved*, That in pursuance of the special order heretofore adopted, the House proceed to pay tribute to the memory of Hon. CHARLES T. DUNWELL, late a Member of the House of Representatives from the State of New York.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, in recognition of his eminent abilities, and as a faithful and distinguished public servant, the House at the conclusion of the memorial proceedings of this day shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk be, and he is hereby, instructed to send a copy of these resolutions to the family of the deceased."

Mr. GOULDEN said:

Mr. SPEAKER: It was my privilege to have known the late CHARLES TAPPAN DUNWELL, of the third district, Brooklyn, N. Y., for twenty years.

Our relations were always of a pleasant character. We came to Congress at the same time, and were interested in legislation affecting the city of New York.

He was an untiring worker, always willing to help a friend.

In business, as in all his relations of life, he was courteous, kind, and considerate. He not only made friends readily, but what is better, retained them through life. To know him was to love, cherish, and respect him.

I recall a long, arduous fight on a bill in which a constituent of his was a beneficiary, that I had introduced. We succeeded in getting it through the House in the Fifty-eighth Congress, and after months of labor finally secured its passage in the Fifty-ninth Congress. It was his energy and tact that won the victory, and his modesty that led him to disclaim all credit for the result. This is but one instance of many others that fell to my notice.

He was especially happy in his family relations. A devoted wife and loving children made his home an earthly paradise. He often spoke of them in the kindest and most endearing terms.

When the malady that finally carried him off afflicted him, his one great sorrow, causing him the severest pain and anguish, was the thought of leaving his loved ones.

He has left us, but his kind, generous, lovable deeds remain to comfort and console his bereaved family and his many friends.

Of him it may well be said:

The weary sun hath made a golden set,
And, by the bright track of his fiery car,
Gives signal of a goodly day to-morrow.

Penal Code.

SPEECH
OF
HON. WILLIAM B. CRAIG,
OF ALABAMA,
IN THE HOUSE OF REPRESENTATIVES,

Wednesday, December 16, 1908.

The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 11701) to codify, revise, and amend the penal laws of the United States—

Mr. CRAIG said:

Mr. CHAIRMAN: We have heard a good deal about the New York end of this proposition, but I think it is time that we looked at the other end of it, to see what the effect is upon the producer. The question I asked about this amendment yesterday will, I think, probably bring out just what I propose to stand for. I asked whether or not a contract made by a spinner with the New York exchange to procure and deliver cotton in the future would be prohibited from being carried through the mail provided that contract was not contemplated to be carried out by both parties, and the author of the bill said he thought it would be prohibited. If that is so, I am for the amendment, because I know of instance after instance, down South, where a bill of goods is ordered from a spinner. The spinner does not go into the open market and buy that cotton, but he goes into the cotton exchange, or he wires to his broker in New York or New Orleans, and buys futures against that order. That takes that man out of the local market. It keeps the farmer from selling the cotton that he has on hand at that time, and pospones the sale of the actual cotton possibly for six months.

In other words, it takes purchasers out of the home market who ought to be in the market at the time the cotton is brought in by allowing them to purchase fictitious cotton in New York, while the owner of the actual cotton gets no chance to put his product on the market at a fair price. By its present operation, it does away with the law of supply and demand to a very great extent, and it puts the farmer at the mercy of the cotton exchange, in that it postpones any sales that he might be able to make. I think this amendment ought to be incorporated in this bill. I do not think we ought to hesitate because of the argument that this penal-code bill ought not to be amended. Why, the very purpose of bringing the bill into the House is to perfect it, to amend it if it needs perfecting and amendment. I think we should come up and do our duty in regard to this amendment, just the same as we have done our duty in regard to other amendments pertaining to other things. For if there is any one thing in which the producers are interested, it is this matter of stock and produce gambling; more in the produce gambling than in the stock gambling by far, because, as has been well said by my colleague [Mr. HEFLIN], you can not go on the stock exchange, as I understand it, and sell the stock of a corporation unless you have the stock there to sell, and if a broker wishes to sell the stock of a corporation he must borrow the shares if he happens not to have them; but they do go upon the cotton exchange and in the wheat pit and sell millions of bales of cotton and millions of bushels of wheat which they never saw and never expect to see and never expect to have to

deliver. They sell to people who would not know a bale of cotton if they saw it, and who would never think of buying if they had the slightest idea or intimation that they were actually purchasing a real commodity. One hundred million bales of phantom cotton have been sold in one year upon the New York exchange alone, nearly ten times the amount of the entire product of the world. It is a crying shame and an outrage upon the good name of our people that our laws are such as to allow these fictitious sales and force the producers of the country to compete, in the sale of their product, with a commodity which has its origin in the brain of speculating and gambling brokers, which has no existence in fact, and the volume of which is limited only by the desires and greed of the gambling public. [Applause.]

The price of cotton is fixed by the amount bid in exchanges for this make-believe commodity called "futures," and the man who has toiled by day and by night for a whole season to produce the staple which clothes the world and makes the balance of trade for the Nation, must sell his honest product for the price paid for the "futures" and fixed by the gamblers or he must leave it in the field to rot.

If this bill will go even a little way toward stopping such practices, it ought to pass. It is true that possibly not more than 1 per cent of this business is done through the mails. We all know that most of it is done over leased wire; but it will show the sentiment of this House as to whether or not we are for or against these illegal contracts. I say it is very important that, this measure being before us as it is, every man should come up and do his duty and say whether he is for the delivery in the future of the things that neither party possesses and neither party intends at the time the contract was made will ever be delivered. It is the rarest thing, Mr. Chairman, that the spinner ever takes from the Cotton Exchange in New York the cotton he buys. He takes there his profit or pockets his loss, and when the contract is out then he goes to the market and buys the product. The healthy competition which is the life of trade is thereby destroyed and the honest avocation of farming is made dependent, for the price of its product, upon exchanges which could not live thirty days if the support of the gambling public were withdrawn from them. Surely such contracts as contemplated by this amendment should not be allowed to be carried through the mails. We prohibit the carrying of lottery tickets; let us now prohibit the carrying of gambling contracts. [Applause.]

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. JOHN C. CHANEY,

OF INDIANA,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. CHANEY said:

Mr. SPEAKER: In this House we come to know each other best when we come in contact in committee work. With those who meet merely on the House floor we are not so intimate. I did not serve with Mr. GRANGER on any committee, and, therefore, in the House we knew each other at a distance. He faced me from the Democratic side, and being of a quiet nature, not given to bombast or display, attracted such attention only as required by his duties here.

It is not, however, by the man whose voice sounds oftenest in the House that legislation is framed and passed, but rather by the steady hand which works out the details, searches for the facts, and builds from the ground.

The architect of a building is rarely ever the orator who paints the picture in eloquence. He is always on hand, but his works speak for him.

On the trip to Panama to see the greatest of the enterprises of men, I became really acquainted with Mr. GRANGER. I found him to be a genial gentleman, entertaining in conversation, worthy in judgment.

From his biography it appears that he was possessed of a good education, having graduated from Brown University in 1874, and admitted to the bar in 1877. He was qualified, therefore, for the active duties of a statesman.

He was not limited by the routine of the college and the bar, however. He was reading clerk of the house of representatives of his State, and thereby made acquainted with the forms of law. He was acquainted with business also, having been treasurer of his home city for eleven years. He came to Congress, therefore, with fitness for his duties here. Although a Democrat and bound by party ties, he yet maintained an independence which made his influence felt in this House. He was not of the school of pessimism and class discontent. He was broad minded and patriotic.

He is missed in the councils of the Nation, and friends will long remember him for his many good qualities of head and heart.

I am glad to testify to the esteem in which he was held by his friends on this side of the Chamber, and to extend to his family that consolation which crowns a well-spent life.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. WILLIAM M. HOWARD,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. HOWARD said:

Mr. SPEAKER: DANIEL LARNED DAVIS GRANGER was born in the city of Providence, R. I., May 30, 1852, and was a son of Rev. Dr. James Nathaniel and Anna Brown (Davis) Granger.

His father was the pastor of the First Baptist Church in Providence, founded by Roger Williams, 1638–39.

He was a lineal descendant of Launcelot Granger, who settled in Ipswich, Mass., in 1648, coming from England.

Capt. Abner Granger, in the fourth generation, served in the Revolution and was with Washington at Valley Forge. He also served in the French and Indian wars. Erastus Granger, in the fifth generation, and grandfather of Mr. GRANGER, a resident of Connecticut, together with his cousin, Gideon Granger, were early adherents of Jeffersonian views of public and domestic affairs. Connecticut was a strong Federalist State, and these two young men stumped the State for Jefferson in 1800.

Gideon became Postmaster-General, while Erastus was sent to Buffalo, N. Y., then a hamlet and the frontier, as Indian agent for the Six Nations. He was the last full agent, as Sir William Johnson was the first.

Erastus Granger's most valuable service was his influence to keep the Six Nations neutral during the war of 1812.

News of the declaration of war reached Buffalo June 27, 1812. On July 6–8 he held counsel with representatives of the nations and entered into a treaty of neutrality. Circumstances forced the Indians to take up arms. He was commissioned a lieutenant-colonel, New York Volunteers, and commanded these Indians in several engagements.

Janus N. Granger, jr., brother of DANIEL, was a lieutenant, Second Rhode Island Volunteers, and served in the civil war.

On his mother's side he was descended from Roger Williams in the ninth generation. His great-grandfather, Daniel Larned, was a captain in the Revolution. His grandfather, Simon Davis, jr., was for many years postmaster of Thompson, Conn., and pension agent for Revolutionary soldiers and those of the war of 1812.

Mr. GRANGER prepared for college in the Providence schools, and was graduated from Brown University in the class of 1874 with the degree of A. B. He received the degree of master of arts from his alma mater in 1902.

President Faunce presented the degree in the following terms:

A. M., DANIEL LARNED DAVIS GRANGER, of 1874, for some time treasurer of the city of Providence, now its chief magistrate. In both offices showing sturdy honesty, unflinching courage, teaching us to love the city more than party, and righteousness more than all.

Mr. GRANGER studied law in the office of Brown & Van Slyck, of Providence, and spent two years at the Boston University Law School, graduating in 1877.

He was admitted to the Rhode Island bar in the same year, and later to the United States courts. He was twice clerk of the Rhode Island house of representatives. In 1889 he was elected city treasurer of Providence and held that office for eleven years. He was mayor of Providence, 1901 and 1902, two terms. He was a Member of the Fifty-eighth, Fifty-ninth, and Sixtieth Congresses, and during the last two terms was a member of the Ways and Means Committee.

Mr. GRANGER'S nonpolitical activities were wide. He was a member of the University Club, of Providence; the Manhattan Club, of New York; the Cosmos Club, of Washington; and of the Psi Upsilon Fraternity of Brown University.

He was a member of the Rhode Island Historical Society; a trustee of the Providence Public Library; for years a member of the managing board of the Young Men's Christian Association; former president of the Churchmen's Club of Providence; a member of the standing committee of the Episcopal diocese of Rhode Island; a delegate to the Episcopal triennial convention held in Richmond, Va., in 1907; a member of the vestry of St. John's Episcopal Church, Providence; twenty-five years the superintendent of the Sunday school; vice-president of the American group of the Interparliamentary Union for the Promotion of International Arbitration; and American vice-president of the union.

Mr. GRANGER died in Washington, D. C., at the Hotel Richmond, Sunday, February 14, 1908.

The funeral service was held at St. John's Episcopal Church, Providence, February 17; the burial in the family lot, Swan Point Cemetery, Providence.

Mr. GRANGER was unmarried. He is survived by Miss Grace Granger, a sister, with whom he lived, and a brother, Dr. William D. Granger, of Bronxville, N. Y.

Eulogy on the Late Hon. William B. Allison.

REMARKS

OF

HON. JOSEPH G. CANNON,

OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

Sunday, February 21, 1909.

The House having under consideration the following resolutions:

"*Resolved*, That the House has heard with profound sorrow of the death of Hon. WILLIAM B. ALLISON, late a Member of the United States Senate from the State of Iowa, which occurred at his home in the city of Dubuque, August 4, 1908.

"*Resolved*, That the business of the House be now suspended that opportunity may be given to pay tribute to his memory.

"*Resolved*, That as a particular mark of respect to the deceased and in recognition of his distinguished public service the House, at the conclusion of the memorial exercises of the day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased"—

Mr. CANNON said:

Mr. SPEAKER: In the hurry and press of business incident to the closing hours of the short session of Congress I have had no opportunity to prepare, as I should like to have done, a fitting eulogy on the life, work, and character of Senator ALLISON; and yet I can not allow the occasion to pass without paying some tribute, however feeble and inadequate it may be, to his memory.

I became a Member of the House of Representatives about the time when Senator ALLISON was transferred from service in the House to the Senate of the United States. Before I had the honor of serving in the House I knew him by reputation, as the people generally in the Republic knew him. It was eight years after the commencement of my service in the House before I came in contact with him in the consideration of the details of legislation. That contact came in the conference room, in the process of settling disagreements between the House and the Senate in connection with the enactment of the great appropriation bills, as well as legislation of a general character. Thus for twenty-eight years, I may say, during every session of Congress I met him and grew to be very well acquainted with him.

During a period of service somewhat more extended than the usual length of service of a Member of the House of Representatives, I have found no man better equipped as a legislator than Senator ALLISON, and few so well equipped. He brought to the discharge of the duties of his high office the best kind of sense—great common sense.

We hear a great deal about common sense. Sometimes out in Missouri and Illinois we use the term "horse sense" when we mean common sense. Then we talk about men of extraordinary ability—geniuses. The man of uncommon sense is very uncommon, and we all know that men of uncommon sense sometimes have not much of common sense. The common sense with which Senator ALLISON was endowed might well be called "uncommon common sense," an attribute which, in my judgment, is better than genius.

A man of good, sound judgment, and possessing a well-balanced mind, I think Senator ALLISON rendered to the Republic more valuable service than perhaps any other man who served in either House or Senate during his long career.

Most people are born and live and die without making themselves amenable to the penal code. A great many men are called honest because they do not go outside the letter of the law, because they are not grafters, because they do not use their positions in public or private life for getting something without rendering an equivalent. But there is a higher grade of honesty than mere material honesty, and that is intellectual honesty, and when you say that a man is intellectually honest, in my judgment, you give him the highest possible praise. Senator ALLISON not only had integrity in the ordinary sense of the word, but he was intellectually honest.

Men in public life who do valuable work in many instances do not receive credit for it. I have known many cases where men as members of commissions and committees have spent days, weeks, and months working with great industry and with rare ripe judgment for the public weal, contributing from their knowledge and experience toward correct legislation, without 1 in 10,000 of the people of the great Republic knowing or appreciating their labors.

Perchance some man with far less equipment for the public service, without knowledge as to what he is talking about, may by accident or design coin a catchy phrase; it goes into the RECORD, gets a headline in the daily press, and lo and behold, for the day that man attracts attention; whereas the men who are, in fact, responsible for legislation and the shaping of policies destined to affect every hearthstone in the country frequently are never heard of.

Senator ALLISON, of course, was heard of and was well known; but I have no hesitation in saying that the full value of the service he contributed to the Republic, compared with that which brought him into public notice, is not known by 1 per cent of the people.

After all, I do not complain that such is often the case. He, if living, would not complain of it. You recollect that the Master, when calling for disciples said unto a certain man, "Follow me," who replied, "Lord, suffer me first to go and bury my father." But Jesus said unto him, "Follow me, and let the dead bury their dead." So it has been through the history of the race.

Now and then a man, perhaps a great warrior, sometimes a great statesman, attracts the attention of the historian, and may dwell in history according to his real or supposed merit for a generation or two generations or possibly a hundred years; whereas hundreds of his colaborers may be forgotten long before one generation has passed by. I do not complain of this. History can not record the acts of every citizen who performs service for the Republic. There would be no place to store the books that would have to be written to make such a record. Therefore, in my judgment, the men who in private life or in public life, by industry and fidelity and the exercise of good judgment in the public service, have made their contributions to the welfare of the Nation and the civilization must understand that, save in the rarely exceptional cases, when they cross over, they will be forgotten. So be it. Such men have the gratification of their own approval and that of their immediate friends, and the gratification of knowing that they have labored to bring

about better conditions; and they must be content with the consciousness that they have wrought to the best of their ability, and made their contributions to the present and the future good.

To this class of men belonged Senator ALLISON. In a long association with him in the conference room and elsewhere, I have never known him to try to play to the galleries. I have known him when there had been conference after conference over contested points and disagreement after disagreement quietly to smooth away the differences and effect a compromise.

He rarely wore the lion's skin; and yet upon occasions he demonstrated that he had red corpuscles in his blood, and could fight if necessary. With the lion's skin ready to be donned, as it rarely was with him, for he was not the type of man to employ brute strength, he would use the arts of diplomacy to work out results.

Several times the State of Senator ALLISON presented his name to the national conventions of his party for President. All the efforts made by his friends to that end failed; but I doubt if their success would have contributed anything to Senator ALLISON's reputation as a statesman.

One of his friends years ago complained that ALLISON did not help himself in his ambition by a show of fight by some dramatic episode that would have appealed to the hero-worshipping instinct in humanity. He said:

If ALLISON had only knocked some man down and kicked him sometime, he would have been President.

Perhaps that is so, but I am glad such an incident was never recorded. It would not have been in harmony with ALLISON's character. He was not that kind of a man. He did not suffer his passion to get the better of his judgment. He was ever master of himself, and in that way became the leader of men of judgment and character, and it requires a great man to lead by judgment rather than by appeals to the imagination. His strength was not in passion, nor even in the semblance of passion. He was not an actor, and had no histrionic power. He was a quiet worker, a counselor, and he was ever ready to aid and put forward others for the dramatic work, while he remained in the background, giving the quiet influence that aided the actors to make the best appearance on the stage.

As President, ALLISON would have been wise, and his administration would have represented the best spirit of the times; but he could not, even in that great place, have accomplished so much for the country as he did in the Senate, where he worked quietly and effectively to shape legislation to the best interests of the whole people.

He had little of that pride of opinion which make men insistent upon their own way of doing things and fearful of what is called "inconsistency." He came into public life called a "free trader," but for many years was one of the stanch defenders of protection. He was a gold-standard man, and yet introduced the Bland-Allison silver-purchase bill. He was opposed to expansion, and yet was one of the ablest defenders of the Philippine policy of President McKinley and President Roosevelt. He saw his first duty as a patriotic servant of the people and accepted the will of the majority as the voice of command, and he was ever ready to do the most patriotic service of the time of action, regardless as to whether it fitted into his preconceived ideas on the particular phase of a great question. He was not an opportunist, seeking to ride the waves of public opinion; but when conditions were created, he was ready to do the most patriotic service required to bring about results.

Senator ALLISON did not compromise; he harmonized. He did not surrender principles. He looked at both sides of a question to find the best part of both contentions. He did not care for technicalities or names, but held to great principles with tenacity and a discriminating intelligence rare in political debate, where great questions are so often discussed in passion rather than with sober judgment. He never took the position that he alone could be right and all his associates wrong; that is the attribute of the barbarian.

ALLISON represented the highest type of civilization, the harmonizing of differences among men to make possible a government where the will of the majority is the highest law of the land.

He has crossed over, and another whom I have in mind has crossed over, and therefore there can be nothing improper in what I am about to relate: On one occasion, after he had struggled in bringing his brother Senators to assent to a certain important provision which the House was insisting on, one of his colleagues on the conference committee said:

Senator, do you believe that so-and-so will obstruct an agreement on this conference report? It is now the last night of the session, and he has the power to defeat it.

Oh, no—

Said Senator ALLISON, in his quiet way—

I have already fixed that; I have yielded to his request, and he is to have time to show the wisdom of the compromise.

The compromise was made and the legislation was had.

I have already spoken longer than I anticipated, though there is much more I could say. He gave the best that was in him to the perpetuation of sound policies for the welfare of the Nation, and devotedly and faithfully represented his State. Iowa is fortunate to-day in the Representatives she has in Congress, as the gentleman from Missouri has well said, and she will be indeed fortunate if, in the future, she can be as well represented in both House and Senate as she has been in the past and is to-day.

Sundry Civil Appropriation Bill—Enforcement of the Anti-trust Laws Against the "Steel Trust."

SPEECH

OF

HON. CHARLES L. BARTLETT,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

Friday, February 26, 1909.

The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes—

When an amendment was offered, as follows:

"Page 181, line 23, after the word 'purposes,' insert:

"'*Provided*, That not more than $50,000 of said additional $100,000 herein appropriated shall be used for prosecutions under the antitrust laws other than the prosecution of the United States Steel Company and its officers for the violation of said laws by the purchase of the stock of the Tennessee Coal and Iron Company.'"

Mr. BARTLETT of Georgia said:

Mr. CHAIRMAN: Whilst this amendment is in effect the same as the one offered by myself, its present form, presented in the shape of a mere limitation, has enabled the House to vote upon the question, and we must take the responsibility of either approving or disapproving this violation of the law.

Mr. Chairman, I did not expect this amendment to be brought up in this shape, but under the ruling of the Chair, to which I am bound to submit as correct, it is the only opportunity at which the question can be voted on.

Of all the associations and corporations known as "great monopolies" and "trusts," we know that the most oppressive and powerful existing in the United States is the steel trust, known as "the United States Steel Corporation." Therefore, when it was known that by some means they were authorized to absorb the most powerful rival they had in the business in which they were engaged in the United States, viz, the Tennessee Coal and Iron Company, the country was concerned, and it has become so much concerned that it has been given an investigation in the Senate of the United States.

Now, it is well known and understood that the excuse or pretext given for that act is that the President of the United States, by direction to the Attorney-General, or to the Bureau of Corporations, or to the Department of Commerce and Labor, exercising in this instance the supreme power of Congress, of the courts, and of the Executive, has directed that this combination should be permitted to be made.

Now, the reason given for that by the Executive was that he was appealed to by certain officials of the United States Steel Company, who said that unless something of this kind was done to permit them to absorb the Tennessee Coal and Iron Company there would be a panic in the land; that certain brokers in Wall street were so loaded up with the Tennessee Coal and Iron Company stock that it would create a panic. I have no doubt that they said this to the President of the United States. I do not doubt but that the President of the United States believed it; but the development of the facts tends strongly to show that the President of the United States himself was imposed upon and deceived by those who procured his assent; and the evidence given before the committee investigating the matter, which appears in the newspapers of the day, and which I apprehend is correct, shows that no such panic would have followed, and that no such dire results would have happened.

It has been shown to Congress and to the people that this open violation of the law has been committed, even though under a void sanction of the Executive, and it is proper that Congress should provide means and direct the Attorney-General to prosecute them.

Now, we have seen something in the last day or two of the result of this campaign. There is being played on Wall street a freeze-out game—to freeze out of business every competitor of the steel trust; and they have put prices down to such an extent that another panic in Wall street a day or two ago was almost caused by reason of the action of the steel trust, which we are now proposing to have the law enforced against. Therefore, Mr. Chairman, I felt called upon to present the amendment I did, and if it had not been objected to and ruled out on a point of order made by that side it would have meant something. In order to get before the country this proposition, we have been compelled to submit this amendment. It is all we can do under the rules of the House, and we challenge the other side to vote it down, and thus align themselves with the friends of this great monopoly.

Thus it is that the only great and powerful rival of the steel trust has been absorbed, and that, too, by the consent and approval of the President, who has written and spoken so much in recent years against combinations and trusts.

To show somewhat the extent of the properties and their great value, I call attention to the following facts quoted from the hearings:

The New York Press of November 7, 1907, said: "The Tennessee is one of the two steel companies in the United States which manufactures open-hearth rails, now so greatly in favor with the railroads. When Harriman bought 160,000 tons of rails of the Tennessee company a few months ago, it brought the steel company to a realization that it had a strong competitor in the steel-rail field."

The New York Sun of November 7, 1907, said: "The acquisition of the (Tennessee) company is particularly advantageous to the Steel Corporation, because of the iron ore and coal properties that go with it. With the Great Northern and Northern Pacific ore lands acquired last year, together with the previous holdings, the Steel Corporation now has iron-ore deposits estimated at approximately 2,400,000,000 tons, of which approximately 700,000,000 tons come with T. C. & I."

John Moody, in an article in Moody's Magazine for January, 1909, said:

"But the most fortunate business stroke of the Steel Corporation, from the view point of its owners, since its organization in 1901, was the acquisition last year of the Tennessee Coal, Iron and Railroad property. The acquisition of this organization has added great potential value to the steel organization and has increased the tangible equity of its common-stock issue to a far greater extent than is commonly realized. The Tennessee Coal and Iron properties embrace, besides important manufacturing plants, nearly 450,000 acres of mineral lands in the Birmingham section of Alabama. As shown in the report of the Tennessee company in 1904, when an appraisal was made by outside parties, these lands contain approximately 400,000,000 tons of first-class low-grade ore, and more than 1,200,000,000 tons of coal, of which about one-half is coking coal. This estimate indicates that the deposits embraced are even in excess of those of the great Lake Superior properties controlled by the corporation, including the Great Northern ore bodies. This entire property was acquired, as is well known, on very favorable terms for the Steel Corporation, and of course puts it in a position where now it need have no concern regarding a possible future shortage of supply of either iron ore, coal, or coke. Added to this is the fact that the deposits are more favorably located than those of the Lake Superior district and will enable the company to carry on in the years to come a vast economic development of production and manufacture in this section of the country. The Tennessee ore is of a grade which is better for the making of ordinary pig iron than that of any other known deposits in this country."

The same writer, in The Public, October 16, 1908, said (p. 10):

"This Tennessee Coal and Iron property embraces not only about 450,000 acres of mineral lands, but includes 41 developed and active iron-ore and coal mines, 16 large blast furnaces, the ownership of several land companies holding extensive tracts of land adjoining the several developed properties of the company, and also the Birmingham Southern Railroad Company, a terminal property of great value connecting the various mines and plants in the Birmingham district with all the diverging trunk lines.

"The capacity of the company's blast furnaces a year ago was about 850,000 tons per annum, and that of the developed coal and ore mines, about 20,000 tons per day. If we compare this capacity with that of the actual production of all the other properties owned by the Steel Corporation, outside of the Tennessee Coal and Iron Company, for the year 1907, we will get the following results: 'Blast-furnace products, 10,819,968 tons; ore and coal mined and limestone quarried, 39,576,161 tons.' In other words, the capacity of the new properties acquired, according to the figures above, is about 15 per cent of the total production of mining products of the entire corporation for last year, and about 8 per cent of the blast-furnace products.

"Based on those figures alone, therefore, the purchase was an exceedingly advantageous one for the Steel Corporation, as the purchase price was only about 3 per cent of the entire present capitalization of the Steel Corporation; or, if we regard all the common stock of the Steel Corporation as water, it was but 4½ per cent of the balance of capitalization.

"But that would be only a superficial comparison.

"The possibilities of the Tennessee property and the value of its raw materials are so gigantic that even if it were producing nothing at the present time it would have been the best bargain at $45,000,000 that the Steel Corporation or any other concern or individual ever made in the purchase of a piece of property.

"The Steel Corporation, fifteen months ago, entered into a lease with the Great Northern Railway interests whereby it has the right to mine at so much per ton the vast ore deposits of the Great Northern properties. The Steel Corporation agreed to pay to the Great Northern people $1.65 per ton for this ore, and transport a portion of the ore over the Great Northern tracks at a specified rate. The Great Northern ore bodies are estimated to contain about 500,000,000 tons of good ore, which, if all mined and taken by the Steel Corporation at $1.65 per ton, would make an ultimate cost to the Steel Corporation of about $850,000,000, without considering cost of transportation, etc. As stated in the Steel Corporation report for the year 1906, this contract was looked upon as a good one from the standpoint of the Steel Corporation.

"The object in giving the foregoing details is to bring out a vivid comparison of this Great Northern deal with that made last winter in the acquisition of the Tennessee Coal and Iron Company. The Great Northern properties, containing probably 500,000,000 tons of ore, will ultimately cost the Steel Corporation about $850,000,000; but the Tennessee Coal and Iron properties, which are of far more value than the Great Northern properties probably ever can be, cost the Steel Corporation only $45,000,000.

"To demonstrate the foregoing statements, let reference be had to the following from the annual report of the Tennessee Coal and Iron Company for the year ending December 31, 1904. In that report Mr. Bacon, the chairman of the board, said:

"'Early in the summer of 1904 a committee of appraisers was appointed, representing the Sloss-Sheffield Steel and Iron Company, the Republic Iron and Steel Company, and this company, to estimate the amount and quality of the coal and iron ore owned by each company. An examination covering several months was conducted, as the result of which a report signed by every member of the committee was submitted, showing that this company owns in fee over 395,000,000 tons of red ore, of which 381,000,000 tons are graded as first class, 10,177,000 tons of brown ore, and over 1,623,000,000 tons of coal, of which 809,112,000 tons are coking coal. In the coking coal is included 300,000,000 tons of Cahaba coal, which is unexcelled in the South for steam and domestic purposes, and commands the highest market price of any grade of coal in the district. The men in charge of our iron mines estimate the holdings of iron ore of the company to be still larger, viz, of first-class red ore, over 450,000,000 tons; of second-class red ore, over 95,000,000 tons; and of brown ore, 16,900,000 tons.'

"From the above it will be seen, figuring the first-class ore at as low an amount as $1 per ton, that the valuation for that alone is $395,000,000. If we disregard the aggregate estimate of coal, and simply take the estimate for coking coal at as low a figure as 50 cents per ton, we get a valuation of $400,000,000 more. A very conservative estimate of the values of the ore and coal deposits of the Tennessee Coal and Iron Company at the present time is hardly less, in all probability, than $1,000,000,000.

"Now, as far back as 1901, Mr. Schwab made the statement that the coking-coal deposits of the Steel Corporation were of vast value, because of the fact that coking coal of the kind needed for blast furnaces was rapidly growing scarce, and that in a few years there would probably be no more. He disregarded the Tennessee properties undoubtedly, but by this great acquisition the Steel Corporation has been put in a position where it need have no concern for the future as far as coking coal is concerned. In fact, the acquisition of the Tennessee Coal and Iron Company, aside from being a business stroke of enormous direct profit, has had the effect of rounding out and completing the control by the corporation of the ore and coking-coal supplies of the country.

"That acquisition is of more value to the steel trust, and will be in the future in many ways, than its holdings of Lake Superior ores, both because of location and because of general character and quality of the deposits.

"It is known that the Tennessee iron-ore deposits are the best in the world for making pig iron; and the cost of production and manufacture of iron products in that section is considerably less than is the case in the Great Northern ore bodies. Therefore, it can be easily demonstrated that the acquisition of this property for $45,000,000 added an almost unheard-of value to the equity back of the Steel Corporation stocks.

"Many people have wondered and are still wondering why, in the face of temporarily poor earnings and in the face of tariff agitation, the Steel Corporation stocks, both common and preferred, have been steadily rising since last December, and are now almost at the highest figures of their history. The foregoing demonstration certainly accounts for it.

"If it were not for the danger involved in tariff agitation, the Steel Corporation common stock would probably be selling to-day at nearly double its present value. In other words, instead of having a market price of $45 per share, a total market value of about $220,000,000, it would be selling in the neighborhood of $90 per share, with a total market value of $450,000,000. It could easily reach this point in spite of the fact that the corporation may not pay any larger dividends for several years to come.

"The appraised value in 1904 of the Tennessee company's properties, as quoted above, was that of a thoroughly impartial and unanimous board. This appraisal must have been known to Mr. Morgan and the rest of his party when the property was taken over by the steel trust at the absurdly low price they paid. If they checked the panic by this transaction, they did it by taking a few dollars out of one pocket and putting millions into another."

Frank A. Munsey, in an article in Munsey's Magazine for June, 1908, who stated that the inventory was compiled through the courtesy and with the assistance of the Steel Corporation, said:

"The Tennessee Coal and Iron Company is entered as a separate item in this inventory. Its ore and coal and mills and furnaces and other properties are not included in the other classifications. This company is put in at an estimated value of $50,000,000, which is somewhat more than the Steel Corporation paid for it, but probably a much smaller sum than it is worth to the Steel Corporation. Its chief value lies in its coal and ore properties. Its ore is estimated at 700,000,000 tons. It is not as high-grade ore as the northern ores; but assuming that it is worth 15 cents per ton, it alone would amount to $105,000,000. Its coal is estimated at about a billion tons, which at 10 cents a ton would be $100,000,000. From the fact that the known supply of ore in the country is limited, it may be worth two or three times this price. There is no way of telling just what it is worth. But as a guide to the value of ores we may take the price fixed upon for the Great Northern ores between James J. Hill and the Steel Corporation. The Great Northern Railroad and the Northern Pacific had vast holdings of iron ore in the Messabe Range, and after many months of negotiation the Steel Corporation entered into a contract a year ago to take all this ore at a certain price per ton, the price to be advanced each year over the preceding year 3.4 cents. The first year's price, which covered the year 1907, was 85 cents a ton. This year it is 88.4 cents a ton. On this basis the price will soon be over a dollar a ton, and the average cost for the entire supply will be considerably in excess of that figure. And this ore is supposed to be of a lower grade, as a whole, than the ore owned by the United States Steel Corporation, which in this inventory has been conservatively—ultraconservatively—figured at 60 cents a ton. If the Hill ore is worth over a dollar a ton, the ore of the Steel Corporation is worth quite as much, and even more, as it is of a better grade. And these prices of this Northern Pacific ore have an important bearing on the ore

properties of the Tennessee Coal and Iron Company. I should think that Mr. Charles M. Schwab is as good an authority as there is in the world on the value of iron ore. He said to me two or three days ago that the ore holdings of the Steel Corporation were easily worth a dollar a ton; and, in fact, might safely and conservatively be regarded as worth still more, for the reason that they can not be duplicated."

Judge E. H. Gary, of the Steel Corporation, in his testimony before the Ways and Means Committee of the House of Representatives in 1908, thus referred to this Munsey article:

"This is the result of an independent examination by Mr. Munsey concerning the value of our properties. He gives the properties in detail and his valuation; and if anything, I would say that it is a little too high, but it is not very much too high, and certainly properties could not be reproduced for anything like that; in fact, it would be impossible to reproduce them at any price, perhaps, some of them." (Tariff Hearings, p. 5496.)

But the Steel Corporation, in its corporate capacity, is on record as to this property. In the Sixth Annual Report of the United States Steel Corporation, for the year ending December 31, 1907, the holdings of the Tennessee company which were acquired are given as follows (pp. 26, 27):

"Surface and mineral rights acreage of iron ore, coal, and limestone property, owned in fee, 447,423, distributed as follows: In Alabama, 340,263 acres; in Tennessee, 105,740 acres; in Georgia, 1,420 acres. Upon this property there were in operation in the State of Alabama, near Birmingham, 13 active iron-ore mines, with 2 under construction, and at Greeley 3 active iron-ore mines. In Georgia there were 2 active iron-ore mines in operation.

"In Alabama there were in operation 22 active coal mines and 2,800 coke ovens; in Tennessee, 1 coal mine and 174 coke ovens.

"There were 2 active quarries, 1 inactive, and 1 in course of development, all in Alabama.

"There were 14 active blast furnaces in Alabama; 2 in Tennessee.

"All mills, foundries, machine shops, etc., were located at Ensley and Bessemer, Ala., near Birmingham.

"The Tennessee company owned the capital stock of the Birmingham Southern Railway Company, a terminal railroad connecting the various mines and plants of the company in the Birmingham district, consisting of 31.16 miles of main and branch lines, 1 mile second track, 67.78 miles yard and siding tracks, 35 locomotives, and 725 cars of all descriptions.

"The Tennessee company owned the entire issued capital stock of the Tennessee Land Company, the Booker Land Company, and a controlling interest in the stock of the Ensley Land Company—these companies owning various tracts of land adjoining the several properties of the Tennessee company.

"The net profits of the Tennessee company for the year 1907, after charging off $437,666.84 for depreciation and extraordinary replacements, and $885,552.31 for net interest charge on bonded and floating debt, were $1,426,684.58 (a little more than 4½ per cent on the capital stock).

"The company spent during 1907, for extensions, additions, and betterments, the sum of $6,589,116.99."

At page 29 of this report the following is found:

"In November, 1907, the corporation acquired a majority of the common stock of the Tennessee Coal, Iron and Railroad Company, as is set forth in detail on page 25 of this report. The purchase was made during the financial panic of October, 1907. The parties owning or controlling a majority of the Tennessee company's stock offered the same to the corporation on terms which were satisfactory, both as to price and manner of payment. The purchase of the property promises benefit to the corporation and also aided promptly and materially in relieving the financial stress at the time existing. The Tennessee property is very valuable. Its mineral resources are large. The location of the iron-ore and coal deposits in the immediate proximity of the manufacturing plants enables the production of iron at reasonable cost. It is believed the lines of business of the Tennessee company can be materially extended. During the last two years about $6,250,000 were expended in rehabilitating, modernizing, and enlarging the furnaces and steel plant. Additional expenditures of considerable magnitude in 1908 are contemplated to complete the plans for improvements which were under way when the corporation acquired the property. It is believed that when these improvements and extensions shall have been completed and the operating management perfected the business of the company will be profitable."

Improvement of Our Waterways.

SPEECH

OF

HON. JOSEPH E. RANSDELL,

OF LOUISIANA,

IN THE HOUSE OF REPRESENTATIVES,

Monday, March 1, 1909,

On the bill (S. 4825) for acquiring national forests in the Southern Appalachian Mountains and White Mountains.

Mr. RANSDELL of Louisiana said:

Mr. SPEAKER AND GENTLEMEN OF THE COMMITTEE: I propose to discuss this afternoon the question of a bond issue for the improvement of our waterways. At a convention of the National Rivers and Harbors Congress held in this city on December 9, 10, and 11, 1908, a resolution was adopted that—

The Congress of the United States should at its present session authorize the issuance of bonds of the Government to an amount of *$500,000,000, to be sold from time to time in such quantities as may be necessary*, the proceeds of same to be used in payment exclusively of such river and harbor work as shall be authorized by Congress, the provisions for the issuance of said bonds to be similar to those authorizing the bonds for the construction of the Panama Canal.

In accordance with authority delegated by that convention, and to carry out the aforesaid resolution, a committee composed of Representatives J. HAMPTON MOORE, of Pennsylvania; SWAGAR SHERLEY, of Kentucky; RICHARD BARTHOLDT, of Missouri; and myself introduced H. R. 27151, a bill which authorizes the Secretary of the Treasury—

To borrow on the credit of the United States from time to time as the proceeds may be required to defray expenditures hereafter to be authorized by Congress for waterway improvements in the United States and Territories (such proceeds when received to be used only for the purpose of meeting such expenditures) the sum of $500,000,000, or so much thereof as may be necessary, *and not to exceed $50,000,000 in any one fiscal year*—

And so forth.

It will be seen from a perusal of this resolution and bill that the National Rivers and Harbors Congress and its friends do not contemplate an immediate issue of $500,000,000 of waterway-improvement bonds, but that same shall be emitted from time to time, as work on waterway projects progresses, *and not to exceed $50,000,000 in any one year.*

I wish this matter to be clearly understood, because some of our prominent papers seem to have had a mild attack of nightmare at the danger of our country being flooded with $500,000,000 of waterway bonds. We have never contemplated any such step as that, but all of our aims and endeavors have been to improve the waterways of the Nation in a comprehensive, businesslike manner, carefully and deliberately; and to provide funds therefor we came to the conclusion that it was necessary to issue bonds to the extent of $50,000,000 a year for the next ten years, aggregating a total of $500,000,000.

It has been contended that we should first adopt a general plan of waterway improvement before providing money to carry it out, and that it is unnecessary and unwise to authorize a bond issue in advance of the adoption of the plan.

This argument is plausible, but it is not borne out by the facts. While that broad, far-reaching plan for improving all the Nation's waterways for which the National Rivers and Harbors Congress has labored so faithfully during the past four years has not yet been adopted, we have before us now a number of waterway projects which have been carefully surveyed by the army engineers and favorably reported upon, and which will fit into and become a part of any general plan; and, pending its adoption, there is no reason why work should not begin and be prosecuted on a number of these projects, which, as stated, will form a part of the general plan when adopted. There has been so much delay in improving our waterways that we are anxious to have the work go forward as rapidly as possible on those portions which have been surveyed and are now ready. It would require between $200,000,000 and $300,000,000 to complete the projects of river and harbor work which are already under construction or now ready for adoption after final surveys, and it is to carry these forward to prompt completion that we urge a bond issue of $50,000,000 a year.

We have been insisting for several years that a comprehensive plan for all the waterways be adopted and the work be carried on at the rate of at least $50,000,000 a year, but no legislative step has been taken to secure that end until the present session, when a commission was created by the river and harbor bill now pending which has for its object the working out of such a plan and securing its adoption by Congress. I sincerely hope it may succeed, and I earnestly trust that in the meantime Congress will not delay the prosecution of those great waterway projects which have already been studied, which are understood in all their details, and which will prove of the highest benefit to our citizens.

When we legislated for the construction of the Panama Canal we did not leave financial provision for that colossal work to succeeding Congresses, but empowered the Secretary of the Treasury to issue bonds to the amount of $130,000,000 for the prosecution thereof, and authorized the President to carry it forward in the most expeditious manner. And now, as this sum is about exhausted and the canal still far from completion, we expect to provide an additional bond issue of nearly $200,000,000, making a total for the Panama Canal, when completed, of over $300,000,000 of bonds, in addition to large sums paid out of current revenues.

When the people of New York wished to enlarge and deepen the great Erie Canal they did not rely upon uncertain appropriations from their legislature, but voted a bond issue of $101,000,000 to complete it and placed the work at once upon a sane, safe basis, on which it is now progressing steadily and is sure to result in success.

Why not imitate in the improvement of our waterways the wise example pursued by us toward the Panama Canal and by the Empire State in regard to the Erie Canal? In both instances the large bond issues were approved by a vast majority of the people, because there was no better or more feasible method; and the friends of waterways now advocate a bond

issue because, in their judgment, there is no other method which is likely to produce quick and good results.

If any other means can be devised for carrying out the comprehensive waterway plan we advocate, it will have our cheerful support; and we certainly would not ask for bonds if current revenues sufficed. We stand for bonds because we are firmly convinced that without them no great advance can be expected over present methods, and the mighty interests at stake should no longer be permitted to suffer.

The friends of waterways are neither theorists nor visionaries. They have watched for many years the unsatisfactory, unbusinesslike, and desultory manner in which appropriations for most of our rivers have been made, and how slowly the work has progressed thereon; they have seen that in the majority of cases the money appropriated was so inadequate and scattered through such long intervals of time that the results were bad in the extreme and in many instances large sums were practically wasted; they have seen river and harbor bills passed every three years while the other great appropriation bills were passed annually; they have seen river and harbor bills forced to wait until everything else was provided for and then receive only the crumbs from the national table; and they have become fully convinced that the only way to bring about definite, final, and really beneficial results is to have a comprehensive plan for all our waterways and full provision made in advance for carrying it out without danger from lack of funds or otherwise in subsequent sessions of the National Legislature.

In determining the question of issuing bonds to improve our waterways we must decide: First, whether they need improvement and what will be the cost thereof; second, are they worth improving and what benefits would be derived therefrom; and third, is there any other or better way than by a bond issue?

It is admitted by all, and for the purpose of this argument it may be taken as granted, that many of our most valuable rivers, such as the Columbia, the Missouri, the upper Mississippi, the Ohio, the Red, and the Tennessee, are practically worthless during several months of each year because of shallow water, which impedes and often prevents navigation thereon. The same is true of nearly every river in the country and also of the intercoastal waters along both oceans and the Gulf, which must be connected by artificial canals. We can not give the exact cost of improving all these waters, including our harbors, as surveys and estimates are incomplete in several important instances, but from the reports of the United States army engineers, who have charge of all such work, and a number of careful estimates in other cases, we are safe in assuming that it will be about $500,000,000 for the projects now being urged before Congress.

The total cost of all expenditures by the National Government for waterways during our history, including all our canals and rivers, as well as the lakes and ocean harbors, and excluding the Panama Canal, is about $600,000,000, and a careful examination of the benefits derived therefrom will give us some idea of the results to be expected from a like additional expenditure.

It is impossible to say just how much commerce is carried by our waterways, as no accurate statistics are kept, except as to that portion passing through the "Soo" Ste. Marie Canal between Lakes Huron and Superior. We are enabled, however, to form a fairly correct estimate from the reports of the United States Engineers, and after a careful examination thereof, I have reached the conclusion that the commerce on our internal waters, including the Great Lakes and excluding all coastwise business, was about one-third as great as the total commerce of all the railroads of the country in 1907. In arriving at this amount I take for my unit a ton of freight carried 1 mile, as that is the unit of the Interstate Commerce Commission in making its estimates of the amounts of freight carried by rail.

The commerce through the Sault Ste. Marie Canal during the season of 1907, according to accurate statistics of the United States Engineers in charge, was 58,217,214 tons, which was carried an average distance of 828.3 miles, at a freight charge of 0.80 of 1 mill per ton per mile, equal to $38,457,345.

The commerce through the Detroit River is given as 71,226,895 tons, but the freight charge is not stated, and no figures are given for other parts of the Great Lakes where there is also a heavy traffic.

In order to get some idea of this lake-water rate of 0.80 of 1 mill, let us compare it with the average rail rate of the entire Union for the fiscal year ending June 30, 1907, which, according to the Interstate Commerce Commission, was 7.59 mills per ton per mile—just 9.48 times the water rate—say, 9½ times as much by rail as by water. Bear in mind, too, that these are official figures. If this immense commerce of 58,217,214 tons carried 828 miles through the "Soo" in 1907 for $38,457,545 had been conveyed the same distance at the average rail rate of 7.59 mills, it would have cost $364,844,832, which is $325,387,487 more than was actually paid; hence, this waterway saved the Nation in 1907 the princely sum of over three hundred and twenty-five millions.

According to the report of the board of engineers recently appointed to survey the Ohio River, the commerce on that stream in 1905 was about 13,000,000 tons. Its exact cost of carriage was not stated, but one of the members of the board, Maj. William L. Sibert, a very accomplished engineer, now a member of the Panama Canal Commission, estimated that the cost of conveying coal on the Ohio between Pittsburg and Louisville, in the very unsatisfactory condition of the river that year (1905), was 0.76 of 1 mill per ton per mile, and from Louisville to New Orleans, 0.67 of 1 mill, which were, respectively, one-tenth and one-eleventh of the average rail rate.

I have no means of arriving at the cost of conveying ordinary freights on our rivers, and for the purpose of this computation have assumed that the average charge thereon is about three times as high as for general freight on the Lakes, and four times as much as for coal on the Ohio and Mississippi; say about 2.5 mills per ton per mile, or about one-third of the average railroad rate.

A striking instance of water transportation is furnished by the great coal fleets on the Mississippi. Mr. J. A. Ockerson, member of the Mississippi River Commission, in a speech at St. Louis last February (1908), cited the case of the steamer *Sprague*, which recently carried in one tow 67,000 tons of coal. He said that a late report of the Frisco road gave 16.9 tons as an average carload for the year 1907, and 224.4 tons as an average train load, on which basis it would require 3,965 cars, or 298 trains to carry this cargo. Even if you compare this great steamer's load with the giant trains of our western prairies, it will be seen that 67 trains of 1,000 tons each are required to move it.

From a careful study of this subject, I am convinced that water transportation in the United States costs about one-sixth the average rate by rail.

The Report of the Interstate Commerce Commission for 1908 shows that for the year ended June 30, 1907, the number of tons of freight carried 1 mile by rail were 236,601,390,103, and the revenue per ton mile was 7.59 mills. This gives a total freight charge of $1,795,804,550.88.

The commerce through the Sault Ste. Marie Canal during the season of 1907, as shown above, was 58,217,214 tons, carried an average of 828.3 miles, at eighty one-hundredths of 1 mill per ton per mile. Let us reduce this to tons carried 1 mile for the purpose of comparison with rail and we have: Tons of freight carried during 1907 1 mile through the Lakes and the Sault Ste. Marie Canal, 48,221,318,356; total freight charge, $38,457,345.

As above stated, we have no accurate statistics as to commerce on our internal waters other than that passing through the Sault Ste. Marie and the Detroit River, but from the best information obtainable I make the approximate estimate that on other portions of the Great Lakes, exclusive of the Sault Ste. Marie Canal, and on all our other lakes, rivers, and canals, excluding all coastwise business, the amount of freight carried 1 mile by water during 1907 was about 25,000,000,000 tons. The freight charge is even more difficult to obtain than the amount of freight carried, but it is certainly not more than twice as much as that on the Ste. Marie Canal. I have shown that the charge on the large coal traffic on the Ohio and the Mississippi rivers was about one-tenth to one-eleventh of the rail rate, according to Major Sibert, and that general freight by water was about 2½ mills. Hence, I adopt 1.60 mills, or double the Sault Ste. Marie rate, as my unit of cost on this 25,000,000,000 tons, and it gives a total freight charge of $40,000,000. Therefore we have a total *water carriage* in 1907 of 48,221,318,356, plus 25,000,000,000, equal *73,221,318,356* tons, at a cost of $38,457,345, plus $40,000,000, equal *$78,457,345*.

Compare this with 236,601,390,103 tons by rail at a cost of $1,795,804,550.88 and the figures are very striking. The traffic carried by water was nearly one-third as much as that by rail, *and the freight cost, instead of being about one-third to place it on a par with rail, was about one twenty-third of that by rail.* Had this 73,221,318,356 tons of water-borne freight been carried at the average rail rate, 7.59 mills, the charge thereon would have been $555,749,810.22, or an excess of $477,292,471 above the rate actually paid. Hence by the use of the waters this vast sum of $477,000,000 was saved in 1907 to the American people.

Moreover, our coastwise and across-sea commerce is much larger than that borne on our internal waters. Costly improvements made in our ocean harbors and in the mouths of great rivers like the Columbia and the Mississippi have reduced ocean rates from 200 per cent to 300 per cent as compared with

the rates of thirty years ago, when vessels drew 22 to 24 feet and carried 2,500 to 4,000 tons; whereas they now draw 28 to 35 feet and carry 8,000 to 15,000 tons. The saving in reduced rates on this vast ocean commerce resulting from improving and deepening harbors and their inlets is probably as great every year as that on the internal waters; certainly it is a very large sum.

For a further evidence of the cheapness of water transportation let us cross the Atlantic for a moment. In England a waterway policy similar to ours has been pursued. Many canals have fallen into disuse and rivers are neglected. But in spite of this, Mr. E. R. Conder, an English authority, recently stated that rail rates in England cost about three and one-half times as much as those by canal, and he includes in his estimate interest on the cost of the canal.

In Germany, France, Holland, and Belgium a totally different policy has been pursued. Rivers and harbors have been widened and deepened and connected by many transverse canals, so there is complete connection by water between every part of those countries. Paris, the capital of France, is connected with Antwerp, the great seaport of Belgium, by seven water routes; and Berlin, the famed metropolis of Prussia, though an inland city, has excellent connection by water with the sea and is joined to every part of Germany by a perfect network of canals.

Mr. O. Eltsbacher, in a recent work called "Modern Germany," gives the freight cost on the Oder at about 3⅛ mills per ton per mile, on the Elbe about 2½ mills, and on the Rhine about 1.8 mills; hence, as the commerce on the Rhine is much the largest, the average is about 2¼ mills. This is much higher than with us, but the rail rate is also higher, being 11.7 mills for Germany in 1905, as compared with 7.6 mills here. *It would appear, therefore, that in Germany the rate by rail is about five times as high as by water.*

And Prof. J. Paul Goode, of the University of Chicago, in his very able report of November 10, 1908, to the Chicago Port Commission, says, in speaking of the German waterways:

> That so much of the traffic of the country is done by water is not surprising when we learn how freight rates compare between rail and water. From Hamburg to Berlin is 158 miles. It costs 1.38 marks to send 100 kilos (220 pounds) of grain this distance by rail, and but 0.3 mark by water, or about five times as much by rail as by water. On general merchandise by rail the rate is 2.96 marks per 100 kilos, and by water 0.45 mark, or about six times as much by rail as by boat. Coal, ore, and lumber do not go up these valleys by rail at all, the rate by water being comparable to that of grain.
>
> From Hamburg to Dresden is 250 miles in a direct line. On grain the rate by rail is 2.2 marks per 100 kilos, by water 0.37, or about seven times as high by rail. On general merchandise the water rate is 0.4 mark per 100 kilos, the rail rate is 4.38 marks, or almost eleven times as much by rail as by water.

These facts from home and foreign lands demonstrate that waterway improvements heretofore made have been very profitable, and it is reasonable to assume that we will get similar benefits from continuing such improvements.

Shall we do this work in a broad, comprehensive way, taking up great projects, such as the Ohio River or the Lakes-to-the-Gulf deep waterway, for example, and finish them within a definite period of eight or ten years, or shall we proceed in the unbusinesslike manner that has been followed in regard to most of these improvements? Work on the Ohio began thirty-two years ago on a plan to secure a minimum depth of 6 feet at all stages, and only about one-tenth of the project is now completed. If past methods continue, it will require over one hundred years to finish the present project of 9 feet. I mention this river simply as an illustration of the very many cases like it. If we intend to improve our waterways, we should at once adopt a definite plan and provide at least $50,000,000 a year for that purpose, so that the work may be commenced and prosecuted to completion on all such projects as are admitted worthy without unreasonable delays or change of plans. In order to accomplish this, I believe it necessary to authorize a bond issue of fifty millions a year for the next ten years, or so much thereof as may be necessary, in addition to appropriations for maintenance out of the current revenues, and I fail to see any reasonable objection to such a bond issue.

Are not railways built by bonds? Do not state, county, and municipal authorities issue bonds for permanent improvements of every character? The Panama Canal is being built by bonds. Why should not our harbors and inland waterways be built for this and coming generations by bonds?

There is a vast difference between incurring debt for current expenses and for permanent investments, and most of our proposed waterway improvements would become investments that would pay a large annual dividend on their cost in reduced freight rates. If the annual saving on past improvements be adopted as a guide, this dividend would amount to over 100 per cent per annum; but even if we go to the other extreme and say that the saving would only be one-tenth as much, or 10 per cent, it would certainly pay for the Government to borrow money at 2 or 3 per cent and invest it at an annual profit of 10 per cent.

I wish it understood that in my judgment every dollar wisely invested in permanent waterway improvements, under the plans of the United States Engineers, would return an annual profit of fully 100 per cent in lessened freights; and I am fully convinced that the profits arising every year from past expenditures are largely more than 100 per cent.

It seems unreasonable to suppose that we can expect $50,000,000 to $60,000,000 a year for waterways out of ordinary revenues of Government, unless there be a speedy change in our fiscal policy, for the deficit last year was $58,070,202.50, and the estimated expenditures for the current year in excess of the estimated revenues are $114,000,000. Moreover, the estimated excess of expenses over revenues for the fiscal year ending June, 1910, is $143,000,000.

It would seem that if any class of expenditures can be provided for by a bond issue it should be those which result in something permanent and beneficial, such as public buildings and waterway improvements, which pay a large annual interest on their cost in benefits to the present and succeeding generations. Posterity is to reap the reward quite as much as ourselves and should bear its share of the burden.

We have three great transportation agencies—highways, railways, and waterways. Vast sums have been expended by local communities, counties, and States to improve highways, and in many instances the amounts necessary were raised by an issue of bonds. The State of New York is authorized to raise $50,000,000 by bond issue to build good roads, and each local community receiving state aid for its roads must contribute a similar amount; hence, in New York the people not only have to pay a hundred and one millions of Erie Canal bonds, but nearly as much additional for highways, and yet the New Yorkers are the most prosperous and progressive citizens of the Republic. Moreover, in many other States there have been large bond issues for good roads.

Whenever a railroad is to be constructed the nearly universal practice is to provide for its cost by issuing bonds secured by mortgage on the road, and I doubt if there be an instance in the Union where a railroad of much importance was ever built without a bonded indebtedness. I have endeavored in vain to ascertain the total cost or valuation of the 227,678 miles of steam railroads of the United States. Mr. James J. Hill, in a recent speech at Chicago, estimated their cost at over $14,000,000,000. Bulletin 21 of the Census Bureau says:

> The commercial value of railway operating property in the United States, computed for the year 1904, was $11,244,852,000.

The capital stock and debt of these roads at the close of the fiscal year, June 30, 1907, as reported by the Interstate Commerce Commission, was:

Total railway capital		$16,082,146,683
Stock, common	$5,932,948,772	
Stock, preferred	1,423,912,919	
		7,356,861,691
Funded debt, bonds	6,472,839,323	
Miscellaneous obligations	1,616,427,904	
Income bonds	306,244,476	
Equipment trust obligations	329,773,289	
		8,725,284,992

Some interesting facts in this connection are that the interest-bearing indebtedness of the railroads in 1896 was $30,126 per mile of line and amounted to a total of $5,340,338,502. In 1906 the interest-bearing indebtedness was $36,213 per mile of line and amounted to a total of $7,766,661,385, an increase in the interest-bearing obligations of the railroads during the decade of $2,426,322,883, or nearly five times the amount proposed for the expenditures for waterways. In 1902, the latest date for which figures are available, the total public debt of all the States of the Union was $234,908,873; the total public debt of all the counties, cities, and towns in the United States was $1,630,069,610, which, added to the state debt above noted, makes the total public debt of all the people of the United States, exclusive of the national debt, $1,864,978,483, only about 75 per cent of the increase in the interest-bearing debt of the railroads during the last decade.

And the people of the Union pay interest on all this railway stock and debt—upward of $16,000,000,000—a sum so large it baffles imagination and is almost inconceivable.

Mr. Hill also said it will require over $5,000,000,000 to make the necessary additions and terminals now required by our railroad systems, and his statement is corroborated by Mr. Brown, president of the New York Central lines. Hence we must expect a further bonded indebtedness of five billions within the next decade.

Most of these colossal expenditures for railroads were wise and beneficial. Without them our mighty Republic could never

NORTHWEST MISSOURI STATE UNIVERSITY LIBRARY MARYVILLE, MISSOURI 64468

have reached its present magnificent proportions. I hope and believe that our financiers will advance the required sums to extend this system, as suggested by Messrs. Hill and Brown, for I believe it to be necessary in working out our great industrial destiny.

Striking instances of incurring debt for waterways are the recent issue by the State of New York of bonds aggregating $101,000,000 to enlarge and deepen the Erie Canal; by the State of Illinois of $20,000,000 for the Lakes-to-the-Gulf deep waterway; and by the National Government of $130,000,000 for the Panama Canal, to be increased hereafter by nearly $200,000,000 additional, as before stated.

But if bonds are necessary for highways and railways—and not small sums, such as the proposed issue of $50,000,000 a year for the next ten years for waterways; $500,000,000 in all—but more than seventeen times that amount of actual outstanding railway bonds, and ten times as much of proposed new railway bonds, and over three-fifths as much for a single waterway, the Panama Canal—then what is the objection to issuing bonds for the improvement of our waterways if there be no current revenues out of which to improve them?

If the people of New York by a large majority approved the big bond issue for the Erie Canal, as did the people of Illinois for their project also, and the people of the Union with complete unanimity approved the Panama bond issue, and will undoubtedly approve a much larger additional issue for the same purpose, there is no doubt they would sanction and welcome a wise, carefully guarded bond issue for improving our waterways on comprehensive lines, according to a well-conceived plan just to every portion of the country.

Since I became interested in this subject a few years ago, the first important utterance in favor of a bond issue brought to my attention was made by Hon. Charles S. Fairchild, of New York, late Secretary of the Treasury in President Cleveland's Cabinet, when arguing for the improvement of the Mississippi River before the Rivers and Harbors Committee February 2, 1904. He said:

Mr. Chairman, as you have been talking it has seemed to me that questions of this nature we make a great mistake in not treating as a whole; we make a mistake in treating them as merely annual affairs.

Now, you are going to build this canal—Panama—and you are going to issue bonds to provide for the whole enterprise. Here is a thing which is not like others that you have suggested, but which will last for all time in its importance. It is not like the question of keeping a harbor clear, of dredging the annual accretion of deposits in a harbor, but is doing something such as the building of a canal, such as we are doing in the State of New York in making the barge canal through that State, which is for all time, as that is there.

Now, it seems to me that wise statesmanship would take that in view, and if need be issue bonds, do that which does the work most effectively and economically and expeditiously. It seems to me that the time has come when these great questions, and particularly a question like this—the improvement of the Mississippi River—which is of such vast importance to us and of such a permanent nature, ought to be considered in some such way, and not made to fit into the annual revenue of the Government.

The CHAIRMAN. Then do I understand you that you would advocate the issue of bonds for this purpose?

Mr. FAIRCHILD. I would.

The CHAIRMAN. For river and harbor improvements?

Mr. FAIRCHILD. I would, where they are of this permanent nature, like the building of a canal, like the doing of that sort of thing. I think economy and wise finance would treat the subject in that way and provide for the funds as they can be wisely expended, irrespective of annual revenue. That is the way I would do it if I was an individual doing it, and if I was the United States and had these things on hand I would do it in that way.

A number of the most prominent men of the Republic have spoken within the past twelve months in favor of a bond issue, notably our colleague, Mr. DAVIDSON of Wisconsin, Senator KNOX, Mr. Andrew Carnegie, Vice-President Fairbanks, President-elect Taft, and President Roosevelt.

Mr. Andrew Carnegie, in the course of his address at the great National Rivers and Harbors Congress at Washington, December 9–11, said:

I was delighted to hear the President of the United States say yesterday, in which the President-elect concurred, and I am delighted to have heard this morning a man occupying the proud position that Mr. Fairbanks does in this country indorse this policy, that we should issue bonds. It is right for this reason: It has been proved, and it needs no more proof, no more contest; we are as certain as that the sun shall shine to-morrow that the improvement of our waterways will give back to this country tenfold the expenditure.

Mr. DAVIDSON, chairman of the Committee on Railways and Canals, speaking before the same convention, said:

Shall appropriations for waterways continue to be made at irregular intervals or annually, as other appropriations are made? Shall the work be done by piecemeal, haphazard, or under some well-defined system?

That current revenues will not permit of extensive appropriations for the improvement of waterways is plainly apparent, especially if large appropriations for other purposes are to be given first consideration. Much has been said at this convention concerning the advisability of a bond issue. There is much merit in the suggestion that, as future generations are to benefit from these expenditures, the long-time obligation to pay for the same might properly be authorized.

On February 12, 1908, Senator KNOX, soon to be the Secretary of State, in an address delivered before the Chamber of Commerce of Pittsburg on the "Natural highways of the Nation—its rivers, lakes, and harbors," advocated that the work of developing these resources be done comprehensively from the proceeds of bonds. He mentioned figures as high as $750,000,000 for this purpose and justified the expenditure of so vast a sum both from the standpoint of national necessity and the ease with which, considering increase in population and wealth, an additional debt of this size could be carried.

Vice-President Fairbanks also, in his address before the recent rivers and harbors convention in this city, favored the issuance of bonds, and spoke in part as follows:

It is good policy for the Government to be liberal in meeting the cost of permanent work, such as public buildings and the ordinary improvements to rivers and harbors, out of its current income, but the present accumulated needs of commerce and the necessities which may reasonably be anticipated to arise in the immediate future require an unusual expenditure. Such increased outlay may well be provided for by an issue of bonds so measured as to volume and date of maturity as justly and equitably to distribute the burden among the beneficiaries of the expenditure.

President-elect Taft has, in repeated utterances, advocated the issue of bonds for the improvement of waterways. In his address before the convention of the Lakes-to-the-Gulf Deep Waterway Association, October 21, 1908, he said:

My own judgment is that every improvement like that of the Lakes to the Gulf, like that of the Ohio River, like that of the Missouri River, like the Atlantic seaboard inland waterways, should be treated by itself as one great enterprise, just as we have treated the Panama Canal, and that provision should be made by bonds or otherwise for the setting aside of a fund sufficient to complete it as rapidly as possible.

To leave progress in these matters to the fitful and partisan consideration of appropriation committees in Congress, influenced by a desire to reduce the appearance of total expenditures each year as much as possible, is to impair the necessary financial support of every one of these great enterprises, and to drag them along from year to year, and greatly delay their ultimate completion.

At the governors' conference, Washington, D. C., December 8, on the subject of bonds, the President-elect said:

I have no compunctions on the subject of issuing bonds if the debt to be contracted ought to be met by bonds. I think that men sometimes overdo the business of meeting what ought to be distributed expenses out of current income. I think there is good reason for issuing bonds for these improvements that are to be permanent, and not to spend current income for them. Sometimes it takes as much courage and involves as much real public interest to issue bonds for a purpose for which bonds ought to be used as it is to pay as we go. In other words, it is a mere question of economic policy, and the mere fear of criticism because an administration has issued bonds should not prevent us from doing justice to ourselves and posterity.

President Roosevelt in his annual message, on the subject of inland waterways, says, in part:

Until the work of river improvement is undertaken in a modern way, it can not have the results that will meet the needs of this modern Nation.

These needs should be met without further dillydallying or delay.

Funds should be provided from current revenues if it is deemed wise, otherwise from the sale of bonds. The essential thing is that the work should go forward under the best possible plan and with the least possible delay. The time for playing with our waterways is past. The country demands results.

Moreover, the National City Bank of New York, the most powerful financial institution in the Union, in its circular of January 1, 1908, seems to regard a bond issue for public improvements with much favor. It says:

In any discussion of the possibilities even of further large issues of Government bonds during, say, the next ten years, it is of interest to note that the high point of the national interest-bearing debt was reached in August, 1865, when it stood at roundly $2,800,000,000 and the population was 34,000,000. To-day it is $910,000,000 and the population 87,000,000.

During the period 1880 to 1890 the interest-bearing public debt was reduced one thousand millions, a reduction by voluntary taxation in a single decade, as declared by the authorities in charge of the census of 1890, without parallel in the world's history. It is the opinion of those now living who have had most to do with government issues since the civil war that this country could support with ease a public debt of five thousand millions. It is also believed that in view of the limited use which banks in the future will be able to make of government bonds—and they are the only market for the 2 per cent issues, because of the advantage which the latter possess as security for national-bank circulation—the people of the country, the investing public, must be looked to as the purchasers to any great extent of government bonds. This being true, it may fairly be predicted that the government bond of the future, if any general plan of providing funds for permanent undertakings is adopted, must be treated on an investment basis and must bear a rate of interest not less than 3 per cent per annum.

And let me again repeat that while the friends of waterways are advocating an authorized bond issue of $500,000,000 they do not ask the immediate issuance of these bonds, but specifically state that they should be sold from time to time, in such quantities as may be necessary, and they suggest that $50,000,000 a year is as much as could be wisely expended at the present time.

So many comparisons between railroads and waterways have been made in this speech that I deem it proper before closing to offer some general suggestions on the subject of transportation.

In my judgment, there should be no rivalry or animosity between water and rail. The three systems—highways, railways, and waterways—should be complements and helpers each of the other. The more perfect a country's highways the denser becomes its population, the greater its general prosperity, the cheaper its transportation charges, the larger its volume of internal and foreign commerce, and consequently the better business for steam cars and steamboats. In like manner, where waterways are well improved and much used to carry the heavy low-class, bulky articles, such as ore, coal, steel, iron, stone, brick, agricultural products, logs, and lumber, the more prosperous are the adjacent railroads.

These articles are too low priced to stand a heavy freight charge, and in many cases they are hauled by the railroads without profit and to the serious detriment of high-class freight on which there is a good profit. This is well illustrated by the roads paralleling Long Island Sound, the Hudson River and Erie Canal, and the Great Lakes. On these water courses there is an enormous commerce, and yet the adjacent railroads do a large and very profitable business, being among the very best roads in the Union. Railroads often haul crude material without profit, and sometimes at a loss, in order to get the return haul of manufactured articles. Waterways can handle the raw material at a good profit, and the result is a benefit to both. I believe that the proper improvement of any river or water course in the Union, while it will greatly cheapen the carriage of low-class freights in its vicinity, will result in such an increase of population and general business as to benefit rather than injure the railroad; and, in my judgment, it would be a shortsighted policy for railroads to oppose the improvement of our waterways.

I do not know what position is taken on this subject by average railroad men, but some of their most progressive and enlightened thinkers, among whom I may mention Messrs. Shonts, Stevens, Yoakum, Finley, and Hill, have within the past year in public utterances declared themselves in favor of a liberal, comprehensive waterway policy, especially for the improvement of great trunk lines, such as would be provided if the Mississippi River and its principal tributaries were made to do their full duty and the Lakes were connected with the Gulf.

I strongly advocate active cooperation instead of unfriendly competition between railways and waterways. Let them work earnestly together for the complete and thorough development of our country along the broadest, most unselfish lines, and the result is bound to be very beneficial to both. In my judgment, any other policy on the part of the railroads will be fraught with disaster to them and danger to the Republic. They are mighty forces, and some of their friends regard them as irresistible, but I wish to remind these enthusiasts that nothing can stem the torrent of aroused public opinion. For several years loud mutterings have been heard throughout the land, and in some States antirail legislation has become so repressive as to make railroad investments unattractive, to say the least.

If most traffic is driven from the waters by railroad rates so low at river points as to involve loss to the boats and also to the railroads, which the latter recoup by heavy charges at interior points away from the water, and if practically all the terminal facilities along our water courses are acquired and operated by the railroads in their own selfish interest and against that of the waterways, as is said to be true of very many places, who can foretell what the future will bring forth. In Germany, which is thought by some to be the wisest nation on the globe, most railroads are owned by the Government, and discriminating rates against river traffic are prohibited. I would regret to see such a state of things in our great free Republic. I am a strong believer in a fair field and no special favors. I believe firmly in reasonable, necessary regulation and control of all transportation agencies, water as well as rail, but I deprecate unwarranted interference with either, and sincerely hope that the day is yet far distant when our Government will assume either actual or practical ownership of our railroads.

In my judgment, the strongest weapon of defense against this undesirable situation is the best possible transportation system for the entire Union of combined, corelated, interdependent, and friendly highways, railways, and waterways; and again I urge the friends of these three great agencies to unite their forces and secure in the near future this end, so devoutly wished by every citizen of the Republic.

Ocean Mail.

SPEECH

OF

HON. EDMUND H. HINSHAW,

OF NEBRASKA,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

Mr. HINSHAW said:

Mr. SPEAKER: This measure which we have before us to-day is the latest of a series of unsuccessful efforts at appropriating from the Treasury sums of money to be donated to certain lines of steamships with a view to encouraging shipping under the American flag. Let the contentions of the advocates of this legislation be granted; let it be admitted that our merchant marine has fallen into a decline; that, outside of our coastwise trade, the American flag is but seldom seen upon the waters of the world, and still we can find no logical reason why this particular remedy should be devised. If, after all the thought and effort that has been spent upon this subject, no remedy other than a direct gift of the public money to a private business can be found, then indeed are we in a bad way.

There were years when our shipping went into far places and the natives of alien lands looked upon our flag, floating from many masts. Those were small days, when capital was not concentrated into great accumulations and only a moderate return was expected from its investment. They were the days of the wooden ship and hand labor. Individual initiative and personal effort were large factors in the equation. Our unexhausted forests stretched over uncounted miles of virgin land, affording a cheap material of construction, and the virile strength and indefatigable ingenuity of the American made the most of the opportunity that then offered. Then the age of steel and steam came, and the trade of seafaring required a constantly decreasing degree of personal skill. The personal ingenuity of the Yankee became less necessary and the cheaply bought muscle of the Italian took its place. Machinery played a larger part in the manufacture of ships than before and such labor as was necessary was to be had at a lower price in Europe than America. Europe became able to build ships cheaper than America.

Still, the operation of American-built ships was not unprofitable, but a great era of industrial development came over the country. Railroads were threaded across the continent and the results from the investment of capital ascended from comparative to superlative. To supply the wants of a growing people factories came into being all over the land, and their success was tremendous, both through the proper returns of industry and through the less commendable realizations of stock inflation and manipulation. Shipping was unprofitable only in a comparative degree, and capital sought the region of greatest return. Shipping declined, while other lines of industry advanced to a degree before unequaled. Those who still remained in the shipping business, dissatisfied with their moderate profits, esteemed that the National Treasury afforded an easy relief from a situation which had been forced upon them by economic conditions. So they came before the National Congress, holding out begging hands, asking for alms.

I do not believe in paying the public money out for the idle pleasure of having alien peoples gaze upon our flag as it flies from tramp steamers or ocean liners. I do not believe in foisting upon our posterity industrial invalids that will require their constant maintenance and care. I do not believe that we can look into the past and stay the operation of industrial laws by act of Congress. I do not believe in giving away the public money to private individuals in order that they may embark in an unprofitable business. I believe in each man fighting his own battle and each industry doing the same. I believe that when the exploitation of our undeveloped resources is completed, and no new fields await idle capital, it will revert to the moderate and safe return that international shipping affords.

They have said that our flag is vanishing from the seas, and it is true. But that flag does not honor the breeze in which it floats when it must be paid to appear there. The flag should be carried for honor and not for hire.

They have said that the splendid fleet that we saw steam into Hampton Roads the other day from its tour around the world was supplied with coal from colliers carrying foreign standards, and sentimentalists have lifed eyes to heaven, wept

pious tears, and held out hands supplicating for dole. But no one denies that our Treasury is the more prosperous because of it and our prestige abroad increased in spite of it.

To-day the demands upon the public funds are appalling. We have passed the time of the billion-dollar Congress and reached that of the billion-dollar session. In the session just ending we have expended more than one thousand millions for public purposes, and it has taken heroic self-restraint to keep from spending more. The pressure upon us from all quarters is constant and increasing. The public revenues are falling behind the expenditures and a deficit faces us. We must reduce rather than increase our expenditures. But where can we do it? Can we cut down the millions that we have spent this year for the Panama Canal when its construction is demanded by the united voice of our people? Can we eliminate the $101,000,000 that we have spent this year for the army and the $136,000,000 for the navy and leave ourselves and our possessions at the mercy of raider nations? Or cripple or abolish the postal service by saving the $235,000,000 that have been spent for its maintenance? Or shall we keep in the Treasury the $161,000,000 that we have appropriated for pensions and leave the brave defenders of our country to die in want? Or yet cripple the Indian, Public Land, and Forest services, or destroy the irrigation work in arid lands by decreasing expenditure?

Nor will anyone suggest that we abolish the Department of Justice and leave the criminal to go unintimidated. And who would be so lacking in discernment as to desire to limit the activity of the Department of Agriculture, upon which we have spent twelve millions, and have it cease its splendid work for the increased productivity of agricultural lands? Nor can we recall our ambassadors and consuls and restrain the work of our State Department without serious injury to our political and industrial standing. The demands upon us are so great and the activities of the Government are so many that this great expenditure can scarcely be avoided.

We have now pressing upon us the demand for the establishment of the great Appalachian forest reserve, which will require twenty millions in the course of a few years, and which, by reason of the great benefits to be derived from it, we would establish immediately were the money to be had. Also the inland waterways will require five hundred millions, and possibly much more, for which bonds are urged, to be brought to a proper state of operation. This would be a worthy work if the money could be spared. Where shall we go for more money? Our revenues are decreasing from internal revenue by reason of the spread of prohibition territory. We are about to revise and reduce the tariff schedules, which may further diminish the public income. We must seek new fields of revenue, such as inheritance and income taxes, and until these are established as constitutional and their degree of productivity shown projects such as these must wait.

The subsidizing of these particular vessels would not materially increase our merchant marine. It certainly would not induce other vessels not subsidized to run. It is a bad precedent and practice. It is but an entering wedge for larger appropriations, as its advocates admit. It has upon it the taint of fraud.

The hand is the hand of Esau, but the voice is the voice of Jacob.

In case of war, how could we get our navy from the Atlantic to the Pacific? Foreign ships could not in time of war carry coal for our battle-ship fleet. Sufficient American vessels for this purpose do not exist.

SPEECH

OF

HON. WILLIAM E. HUMPHREY,

OF WASHINGTON,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the bill (S. 28) to amend the act of March 3, 1891, entitled "An act to provide for ocean mail service between the United States and foreign ports and to promote commerce."

Mr. HUMPHREY of Washington said:

Mr. SPEAKER: In the short time I shall speak it is impossible for me to enter into a general discussion of this subject. I shall therefore discuss briefly two propositions:

1. Our condition on the Pacific Ocean in case of war.
2. The policy of free ships.

To-day not a single American vessel goes regularly to the Philippine Islands. Our mails, our supplies, our ammunition, and even our troops are now being sent to those islands in Japanese ships.

We have a naval station at Samoa. We can communicate with that station only by foreign vessels. Within three years the number of American vessels on the Pacific has decreased from 15 to 6.

A few days ago our fleet, after encircling the globe, once more reached the home port. That trip marks an epoch in our history. In many respects it has been a great achievement. It has demonstrated the fitness of our naval vessels, the efficiency of our crews, the ability of our officers. The American people welcomed it with enthusiasm and patriotic demonstrations. It is not my purpose to criticise or to play the part of the prophet of evil, but it seems to me that it is especially fitting at this time to call to the attention of the American people some facts and to ask them this question: Of what real value is this great navy, of which we are so proud and which has cost us so much? What would it accomplish in time of war? Behind and before and with this great battle-ship fleet on its trip around the world was a great squadron of merchant vessels furnishing it with its vital force—coal.

In this collection of vessels was seen the flag of every naval power upon earth, of every nation beneath the sun that pretends to be a first-class power except the one represented by the Stars and Stripes. Without the use of these foreign ships to carry the coal, the trip of our battle-ship fleet could never have been made. Yet every one of these vessels at the very moment of a declaration of hostilities must have left our fleet where it was. Then this mighty squadron could not have proceeded on its way nor returned home. We do not have sufficient American vessels that we could have sent to its relief.

We talk of this trip of our navy as showing our power. It only demonstrated our weakness. Instead of displaying our glory, it advertised our shame. There is not a naval official nor an American citizen who has given this matter attention but feels just a little easier that our fleet is once more within the shadow of our own shores. If it ever makes this trip again, as we trust it may, let us hope that Congress, by its criminal stupidity, will not place its safety in the keeping of other nations.

As one man from the Pacific coast, I do not believe that we are threatened with war from Japan. [Applause.] Not 10 per cent of the people of the Pacific coast approve of the actions of some of the members of the legislatures of California and Nevada. Most of this agitation is the sensational mouthing of irresponsible demagogues. Everyone on the Pacific coast recognizes the fact that the coming of Japanese into this country must be regulated, controlled, and restricted. Japan herself recognizes this fact. She says she is attempting to restrict their coming into this country. We believe that she is acting in good faith. We believe that the number of Japanese in this country is less than it was a year ago. I see no cause for war. I see every reason for peace. I believe and hope that the friendship that has existed between this country and Japan from the time she first entered upon her wonderful career as a nation will endure. While I can see no indication of war, yet if, unhappily, it should come, then I want my country to be prepared. [Applause.] Those who think that Japan would not declare war if she received what she considered sufficient provocation or who think she has not the financial ability to carry on a war, have read the history of that marvelous nation to little purpose.

In what condition would we be to-day in case of war on the Pacific, with our battle-ship fleet on the Atlantic? If that war was with Japan, she could within thirty days place 250,000 troops in the Philippines, 100,000 in Hawaii. In that time we could not get 10,000 troops ready to be embarked on the Pacific coast. If we had the troops, we have no transports to carry them. If we had the transports to carry them, we would not dare attempt to take them to our island possessions, having nothing but cruisers to meet the battle ships of the Japanese. Japan has 560 vessels fit for transports. We have only 6 merchant vessels running on the Pacific and 4 or 5 old, antiquated government transports. Japan has under construction more than 50 ocean-going vessels. In all the United States there is not one, and has not been for more than six years. Japan can easily carry 200,000 troops at one time. On the Pacific we could not carry more than 10,000. We could not place 50,000 troops in the Philippines in two years. After seizing the Philippines and Hawaii, Japan could strike the Pacific coast. She could convoy with her entire squadron of battle ships a fleet of transports carrying soldiers and supplies to the very wharves of Bellingham without coming within 15 miles of one of our guns. She could then seize the great transcontinental railway lines, the cities of Bellingham, Everett, Seattle, Tacoma, and Portland. She would then possess the entire Northwest, an empire in extent and one of the most productive portions of the

earth upon which to live. We are told with great assurance that Japan would never come to the Pacific coast, but no reason for such statement has ever been discovered outside of the imaginations of those giving it.

After doing all this Japan would still have at least two months in which to ravage the Pacific coast and to prepare to meet our battle-ship fleet from the Atlantic before it could arrive. That our army would be utterly useless in such a conflict is admitted by all, except possibly to repel an attack on our Pacific coast. In such a war our only hope would be our navy now on the Atlantic. Could this squadron of battle ships come to our relief? If so, how? In time of peace it had to employ foreign ships to carry the coal before it could come from the Atlantic. In time of war this could not be done. We could not secure foreign ships for this purpose—international law and the rules of war do not permit it. A sufficient number of American ships do not exist. How is our fleet to be supplied with coal?

So I ask again this question: Of what real value is the magnificent navy except for show and parade? If war was declared to-day on the Pacific, of what real value would our navy be? How could it leave the port where a few days ago it received the homage of the American people? If you think this a sensational statement, talk with the Secretary of the Navy, talk with Admiral Dewey, talk with our naval officers, talk with those who know the facts. Yet, it would not cost annually half the sum sufficient to build a modern battle ship to supply us with an efficient auxiliary for our navy. How can we, the representatives of the American people, explain to the country our stupidity, our criminal negligence, in this matter? Ask those gentlemen who are willing to spend more than $130,000,000 annually for a navy and yet refuse to give anything for an auxiliary, the lack of which renders our magnificent navy utterly useless.

Russia and the United States are the only nations on the earth that have committed the colossal folly of building a great navy without at the same time building a merchant marine as an auxiliary from which colliers could be had and crews for the naval vessels furnished. The sunken and captured vessels of Russia tell in graphic story her irretrievable mistake. Shall it take the terrible experience of war to teach us the same lesson?

FREE SHIPS.

Every time the question of doing something to assist our merchant marine comes up for consideration in Congress some one, either through ignorance of existing conditions or in order to help foreign shipping interests, advocates what is known as "free ships." I make this statement advisedly, for no friend of American shipping who knows the facts as they exist now believes that free ships would have any tendency to build up our merchant marine. This policy of free ships, I repeat, is to-day urged only by the enemies of American shipping or by those who have not studied the question and acquainted themselves with the facts. From this conclusion there can be no escape, because the whole free-ship argument, as favored by its advocates themselves, is that if you will permit American citizens they will buy foreign-built ships and run them under the American flag in the foreign trade. Nothing can be farther from the truth. Recent events have most forcibly demonstrated this. On the Pacific Ocean the three great vessels of the Oceanic Line, although receiving a small subsidy from the Government, were discontinued. They were losing money every day. The Boston Tow Boat Company vessels were compelled to stop running. The vessels of the Boston Steamship Company were driven out of business a few weeks ago, and have been sold to the Government. Within the last few days the *Kroonland* and the *Finland*, on the Atlantic Ocean, have pulled down the Stars and Stripes and taken the flag of Belgium. Do you suppose that any of these vessels would have stopped running if it had been profitable for them to continue? Does anyone suppose that it was other than necessity that caused the *Kroonland* and *Finland* to take down the flag of a great country like ours and adopt the flag of a third-class power like Belgium? All these American vessels that have just recently been driven out of business were on regular lines. They had established business. That there was business to be done by these lines is demonstrated by the fact that each of them has been replaced by foreign lines.

Now, if the American shipowners could not run these ships which they already had, which they already owned on established lines with established business, would they buy foreign ships if given the opportunity and attempt to run them? It seems to me beyond comprehension how even the most stupid can contend that any American citizen would purchase a ship abroad, whatever the price might be, and run it at a profit, when he can not run the vessel which he already owns. If ships were given to the American owner, he could not run them. The advocates of free ships can not give the name of a single responsible man, of a single responsible firm in America that will agree to purchase a foreign ship and run it in the foreign trade under the American flag if given the opportunity; not one. No man can name a single American who owns or who has an interest in a foreign ship that if given the opportunity would place that ship under the American flag and run it in the deep-sea trade; not one. This challenge has been made publicly in every important port of the United States repeatedly during the last five years, and no man has dared deny it and no man will contradict it to-day. On the contrary, practically every shipping firm of importance in America has been asked this direct question by the Merchant Marine Commission, of which I had the honor of being a member: "If given the opportunity, would you purchase a foreign ship and run it in the foreign trade under the American flag?" And every one of them has answered "No." In view of these indisputable facts it is hard to treat with patience the attempt to revive the old theory of free ships. It can have but one effect, and that is a tendency to defeat any legislation of real advantage to our merchant marine. The theory of free ships was fathered by the foreign steamship lobby in this country, and foreign steamship interests have spent millions to promulgate it throughout this Nation. They have been so anxious to impress upon Congress this theory that they have their agents here in the Capitol advocating it to-day. This theory is so dear to foreign interests that their representatives have repeatedly had the insulting audacity to appear before the committees of Congress to urge its adoption.

Remember this, that no American shipowners and no man representing American shipping interests has ever appeared before Congress or before any of its committees and advocated free ships—not one. And no American shipowner, and no man interested in American shipping, and no man who has gven this question even superficial study that is a friend of American shipping interests to-day advocates free ships as a remedy for our present condition. This may sound like a strong statement, but it is absolutely true and is said advisedly after a careful study of this question for more than five years. If those who really believe that a free-ship policy would have any effect to change present conditions would look at the action of Congress within the last year they would be undeceived. We have practically "free ships" in this country to-day. Any reputable citizen can, without cost and without price and without difficulty, get the American flag to-day to place on any ship, wherever built, to run in the foreign trade. Every man in America interested in shipping knows this to be true. Last year a friend of mine desired to get the flag for this purpose. I introduced a bill giving it to him. It was reported unanimously by the committee, passed the House unanimously, passed the Senate unanimously, and is now a law. It was H. R. 25437, Fifty-ninth Congress, second session, and is now act 231 of that Congress. I repeat, we have practically "free ships" in this country now, as any man can get the flag for a foreign-built ship now without difficulty and without expense to run in the foreign trade. If he will not do it now, upon what theory can it be urged that he would take advantage of a free-ship law? The gentleman from Ohio [Mr. BURTON] a few minutes ago spoke in favor of the free-ship policy and advocated a change of our navigation laws. The difficulty with many who talk free ships is that they are not entirely frank. What they mean is not "free ships," but "free labor." What they mean is that they want the right to employ the cheap pauper labor of Europe and Asia in the running of our ships. The cost of the ship is but one handicap, and not by any means the greatest, under which the American ship labors. The greatest disadvantage of the American ship is the cost of operating it. This cost is from 25 to 75 per cent more than that of the foreign ship, and this additional cost is almost exactly measured by the difference in the wage scale and the bill of fare on the American ship and the foreign ship.

Do the free-ship advocates who talk so clamorously of changing our navigation laws wish to reduce the wages of the American sailor? Do they want him to have poorer food? If not, do they want his quarters reduced? If not, then, do they want American ships officered by foreigners? These changes, and these alone, are the only ones that would remedy what the free-ship advocates call our "antiquated navigation laws." But instead of coming out in the open and admitting these facts, the free-ship advocates simply devote themselves to a general denunciation of our navigation laws. Their denunciation "is full of sound and fury, signifying nothing" The other handicap of American ships, besides first cost and the cost of operation, is the subsidies paid by other nations. Even a free-ship advocate would hardly argue that this handicap can be remedied by an adoption of their theory.

But suppose by removing the restrictions now imposed by our navigation law we could place upon the ocean a great fleet of ships flying the American flag, of what benefit would it be? It would not build up a single shipyard. It would not give employment to a single American. It would not give a dollar to American labor. Being bought abroad, these vessels would of course be repaired abroad. They would employ in all things foreign cheap labor. They would be officered by foreigners trained in foreign countries; manned by half-fed sailors born in foreign lands. We would have a ship American in nothing but the gold that represented its first cost. In time of war we could not use such ships, and the men and officers we had paid and trained would probably be with the enemy. Of what use would such a fleet of vessels be? Here is a picture to arouse the enthusiasm, to appeal to American pride and patriotism. It would be just as useful to the country, and much cheaper and more creditable to us as a country, to hire foreign ships to display the American flag as a paid advertisement in the different ports of the world, in order that the people of the earth might know that it existed. But if foreign-built ships would answer every purpose for carrying our trade in peace and protecting us in war, the purchase of them would be most objectionable. The labor of America should do America's work. It is one of the highest purposes of the Government to give its work and its wages to its own. Our ships should be built in American yards by American labor and paid American wages. They should be commanded by American officers and manned by American seamen.

A few days ago my distinguished friend from Wisconsin [Mr. KÜSTERMANN] gave utterance to a remarkable misstatement of facts which he has labeled "A speech for free ships." The falsity of the arguments made in his speech is only equaled by the serene assurance with which they were uttered. He repeated them again to-day. The most astonishing thing about the gentleman's performance was that he actually seemed to believe his own statements. He said a few moments ago that he had given this question much study. With all due deference to the gentleman, one would never suspect it from reading his speech. His speech has caused an exclamation of delight from every foreign shipowner in America. Foreign shipping interests are striving to give wide publicity to the fact that a Congressman has favored "free ships," but they show a wise precaution about quoting his figures and statements. For an utter disregard for facts, for misstatements of history, for the lack of knowledge of our navigation laws, this speech certainly was a masterpiece. If any evidence was needed to convince this House or the country that my "fresh-water" friend, or rather, to be more accurate, my "no-water" friend, from the State of Wisconsin was upon unfamiliar "ground," when he talks about any matter relating to water, this speech has demonstrated it. In fact, my friend from Wisconsin would not have been more at a loss, or less familiar with the facts, or more reckless in his statements, or more absurd in his conclusions if he had made an attempt to speak in favor of prohibition. Let me advise my friend that he should be as cautious about taking to water as he is in taking water. It is hard to answer a joke, especially when it is perpetrated seriously as a sermon. A few samples of the real funny things in this speech, however, might be worthy of remembrance. For instance, he names a number of companies that he believes would place their vessels under the American flag if they could get an American register and run them in the foreign trade. It may interest the gentleman to know that these identical firms which he named had already been asked by the Merchant Marine Commission this very question, and each one of them has stated that they would not take the American flag if offered to them and place it upon their vessels and continue to run them in the deep-sea trade. This is the answer of the men who know, who own the ships, against the man who does not know. The answer of these men to this identical question can be found in the published hearings of the Merchant Marine Commission, which is easily accessible to anyone.

Again, he says that from the time of the adoption by Great Britain of the free-ship policy dates the restoration of the British flag to the command of the seas. Yet at the date Great Britain adopted the free-ship policy she commanded the seas more thoroughly than she does to-day. In years prior to that time, when America was her dangerous rival, she refused to permit her subjects to buy an American ship. When England adopted the free-ship policy she stood first in tonnage of all the nations of the world, and we stood second. She then had 5,710,000 tons, practically all in foreign trade. We had only 1,585,000 tons in the deep-sea trade. This shows how the free-ship policy placed the British flag on the seas. Britain was at the time of its adoption three times stronger than any other nation. She no longer desired to buy ships; she could afford to adopt the free-ship policy. She desired to be consistent in appearance; she had ships to sell, and not until then did she adopt the policy. The statement of the gentleman from Wisconsin as to the effect of the free-ship policy of Germany is equally erroneous. It seems to me that the gentleman should have made no mistake, especially in stating the history of Germany. Subsidies adopted under the direction of the great Bismarck are what have built up the merchant marine of Germany. Under the free-ship policy the German merchant marine increased in the eight years immediately prior to the adoption of the subsidy plan only 145,000 tons. Her shipbuilding during that period was practically dead. Under the system of subsidies as advocated and established by Bismarck her merchant marine has grown from less than 1,250,000 tons to more than 4,000,000 tons, while her shipyards are in a most prosperous condition.

Again, the gentleman says that the French merchant marine under a heavy system of subsidy is every year losing ground. This is a most amazing piece of history that will certainly astonish the people of that Republic. According to official figures, the merchant marine of France has doubled within the last twenty-five years. In 1881 France had 914,000 tons. To-day she has 1,952,000 tons. This shows her increase under subsidy. Under a free-ship policy her tonnage for the eleven years immediately prior to the adoption of the subsidy system decreased 158,000 tons. This illustrates how subsidy has destroyed and free ships built up the French merchant marine. You would have thought that the gentleman would at least occasionally have hit the facts, but not so. In not a single illustration that he gives do figures or history bear out his assertions.

Take one more case. He says that Italy under a system of subsidy is finding great trouble to hold her own even on her own ground—the Mediterranean. Here again he must have consulted the same source of information that he did in regard to England, to Germany, and to France. The merchant marine of Italy is increasing with rapid strides. It now has a tonnage of 1,340,000 tons. Not only is Italy holding her own on the Mediterranean, but recently she has established lines across the North Atlantic to this country. Italy, like every other nation on earth that has ever tried it, made a costly failure under the free-ship policy.

Just one more misstatement, for if I contradict them all I would have to contradict every material fact in his entire speech. He says that—

> Not one dollar extra, however, is paid to the British ships to and from South America. Therefore, American ships wishing to engage in commerce with the South American countries are at no disadvantage, for there are no British ships enjoying subsidies to compete with.

It is hard to find excuse for this statement. It is hard to believe that it was not intentionally misleading. It is well known to-day that our mails in order to reach South America must first go to Europe; from Europe to South American destinations; that the American merchant to-day who wishes to send an article to South America, if he wishes prompt delivery, must send it twice across the Atlantic Ocean in the same way in a foreign ship. It is also within the knowledge of everyone who has cared to inform himself that the two principal British lines to South America receive a heavy subsidy, as do all other mail subsidies under the British flag. Every British mail line is now and always has been subsidized. A little inquiry at the office of the Commissioner of Navigation would have shown the gentleman from Wisconsin how utterly without foundation are all these many statements which he has made.

Such perversion of the facts, however, are absolutely necessary to sustain an argument in favor of free ships. Of course I will not undertake to say where the gentleman from Wisconsin got his vast fund of misinformation, but his statements have a most familiar sound. They are the same that the foreign steamship combines have made in this country for many years. I have heard them repeatedly made many times before my committee and before the Merchant Marine Commission by agents of foreign steamship companies. Herr Ballin, the director-general of the Hamburg-American Company, and the head of the great combine of vessels upon the Atlantic Ocean that is preying upon our commerce between this country and Europe and between this country and South America, could not have been better pleased with the statement of the gentleman from Wisconsin [Mr. KÜSTERMANN] if he had written his speech for him. As I have stated, I have heard the statements of the gentleman from Wisconsin given many times by men representing foreign ships, but to him belongs the distinction of being the only American citizen, so far as my knowledge goes, that has ever made them.

In order to show in detail the errors, the misstatements, the total disregard of the facts, and the absurdity of his conclusion, I will insert in the RECORD an answer to the speech of the gentleman from Wisconsin [Mr. KÜSTERMANN], written by Mr. W. L. Marvin, who was the secretary of the Merchant Marine Commission, and who has as wide and as accurate information upon this question as any man in America. I will also insert an editorial from the Chicago Inter Ocean. The facts are that every nation in the world to-day that has a merchant marine worthy of the name has built it up by a system of subsidies. No nation has ever tried the free-ship policy but what it has failed. If the United States is to build up its merchant marine, she must do it in the way that every other nation has done it. She must adopt the method that every other nation has used to achieve success. We are the greatest Nation in the world; we have the greatest commerce in the world. We are the wealthiest Nation in the world. We can afford to pay the greatest subsidy of any nation of the world. It is certainly worth as much to this Nation to keep our flag upon the ocean as it is to other nations to keep it off of the ocean. And I know that I voice the sentiment of the vast majority of the American people when I say that they are willing to pay a subsidy, however great it may be, sufficient to once more place our flag upon the ocean.

The American people are willing to pay a subsidy, however great, sufficient to furnish us with a naval auxiliary and to build American ships in American yards, by American labor, to carry American commerce. [Applause.]

Mr. Marvin's statement is as follows:

On January 26 last the gentleman from Wisconsin [Mr. KÜSTERMANN] spoke in the House in advocacy of what is known as the "free-ship bill," introduced by him in the previous month and referred to the Committee on the Merchant Marine and Fisheries. The main provision of this bill was an offer of free registry under the American flag to foreign-built ships owned to a proportion of at least 60 per cent by American citizens and employed in the foreign trade of the United States.

This bill involves a departure from an old and prudent American policy, a departure which, though often advocated, has never yet been approved by Congress. It may be said in all truth and without discourtesy that for several years past when a free-ship policy has been advocated it has usually been by a gentleman from the far interior of the country and new to the business of the House.

The gentleman from Wisconsin, in advocating his bill, appealed to the example of Great Britain and Germany, saying:

"Fifty years ago the British navigation laws were as restricted as those of the United States to-day. A few years later the laws were repealed and freedom was given her citizens to buy ships anywhere and have them registered under the British flag. From that time dates the restoration of the British flag to the command of the seas.

"Some thirty years ago Germany followed the example of Great Britain and gave her citizens the right to buy ships anywhere in the world and place them under the German flag, and this continues to be Germany's policy to-day.

"It has resulted in Germany having the second largest merchant marine in the world."

Now, the gentleman from Wisconsin is very seriously and fundamentally mistaken in both of these historical statements. Great Britain owes nothing and Germany relatively little to the policy of free ships.

All through the years of the first half of the last century, when American wooden-ship building under the influence of the protection of our discriminating and tonnage taxes was at its highest fame, Great Britain refused to allow her subjects to buy the celebrated American ships. She insisted upon building her ships at home even under many disadvantages, but she did protect and encourage her ocean-carrying trade by elaborate and rigid laws, some of them dating back to the days of Cromwell.

In 1839 the British Government, despairing of success in wooden-ship building and sail-ship building as against America, resolved to create a steam merchant fleet, and sent the first subsidized steamship of the Cunard Line across the Atlantic Ocean. At that time every packet line in the Atlantic service flew the American flag. The original British Cunard subsidy of $425,000 was gradually increased to $850,000 a year, and step by step the subsidized British steamships—subsidized for carrying the mails—began to drive the American packets and clippers from the Atlantic Ocean.

Seeing her success, Great Britain granted other subsidies. She gave the Royal Mail Company $1,350,000 a year for a regular service to the West Indies and South America. She created another South American line, the Pacific Steam Navigation Company, to the west coast by the grant of another subsidy. She gave $1,200,000 a year to the Peninsular and Oriental for a line to the Far East. She granted even more subsidies and extended her steamship lines in all directions. At this period nearly every ocean steamship under the British flag was receiving the mail pay or bounty of the Government.

Steamship-building yards, engine-building yards, iron-ship building yards, under the stimulus of these lavish subsidies, were rising up all around the coasts of the United Kingdom. These subsidies, amounting to $300,000,000 in fifty or sixty years, gave Great Britain a long lead in steamship building and iron-ship building over all of her competitors. These subsidies practically killed ocean-ship building on the continent of Europe.

It was under these conditions, with the steamship coming forward, the iron ship coming forward, that the British Government in 1849 repealed that navigation law that forbade British subjects to own foreign-built vessels. It was a perfectly safe procedure, because British yards, under the fostering of subsidies, were then constructing the steamships and iron ships that everybody knew were destined to be the ocean shipping of the future. But, as a matter of fact, the powerful British insurance monopoly of Lloyds nullified this free-ship act of Parliament and did not allow it to take effect until 1854.

By that time the British mastery of steamship building and of iron-ship building was even more complete than in 1849. And in 1849 Great Britain was quite as distinctively as she is now the undisputed mistress of the ocean. The gentleman from Wisconsin apparently believes that when this British free-ship law was passed the British mercantile marine held an inferior position, for he declares that "from that time dates the restoration of the British flag to the command of the seas." The gentleman is absolutely mistaken. In 1850 there were 5,710,000 tons of shipping beneath the British flag, nearly all of it engaged in foreign commerce, while in that same year the United States, which held second place, had only 1,585,000 tons registered for foreign trade and a tonnage of 1,899,000 in the coastwise service. That is, in ocean shipping, in over-seas shipping, in 1850 Great Britain, instead of being inferior to us, exceeded us by more than 3 to 1.

The growth of British ocean shipping did not begin under a free-ship law in 1849 or in 1854, as the gentleman from Wisconsin declares. He is apparently unfamiliar with the main facts of maritime history. The growth of British shipping began centuries before under the Cromwellian navigation act, the most vigorous and merciless kind of protective enactment. When Great Britain in 1849 passed her free-ship law, she had been for two hundred years the empress of the ocean in trade as well as war, and this belated free-ship law had no more to do with that fact than the recent old-age pension acts of the British Parliament. Neither in 1849 nor afterwards did British merchants buy any considerable amount of ocean shipping abroad, except in the four years of our civil war, when many American-built ships were transferred to British colors for protection against the British-built and British-manned cruisers of the southern confederacy. At no time since 1849 has foreign competition seriously menaced British shipbuilding, fostered and developed as that has been by $300,000,000 of British mail subsidies and the enormous construction of the British navy.

From 1849 for thirty or forty years afterwards, British shipyards were so supreme in Europe, thanks to the subsidies that originally created them, that the continental governments were compelled to come to Great Britain even for their men-of-war. This was the condition of Germany in 1870, when the German Empire was founded. Then, and for a number of years afterwards, the German armor clads were British built, and even their repairs had to be made in British shipyards. Germany in those years followed a free-ship policy, not because she wished to but because she had to. Her people had to go to Great Britain for their ocean vessels, because they had no facilities for building these vessels or their own men-of-war at home. The gentleman from Wisconsin apparently regards this as an admirable policy, but it is significant that the German Government tried something else just as quickly as it could.

In 1881 Bismarck, greatest of German statesmen, came out in an eloquent declaration for a policy of subsidies and other forms of national aid to German shipping. At that time Germany had given full and faithful trial to the free-ship policy of the gentleman from Wisconsin. Under this free-ship policy German merchant tonnage had miserably languished, showing only a nominal increase from 1,098,000 in 1873 to 1,243,000 in 1881, and German shipbuilding was practically dead. Bismarck sounded a vigorous note of self-reliance. He urged that Germans should learn to build their own ships and should be encouraged to build them, and that the whole power of the Empire be exerted to increase the German mercantile marine. A great subsidy of more than a million dollars was promptly granted by the Reichstag to create the North German Lloyd Line to the East Indies. Other subsidies were given to establish German lines elsewhere. Above all, the Reichstag required that the mail-carrying ships of these new lines should be built in German yards, as far as possible of German materials. It was thus by sheer subsidy that Bismarck and his Government created the German shipyards that have built the *Deutschland* and other famous German Atlantic flyers, and are constructing the monster *Dreadnoughts* for the imperial navy. The whole power of the Imperial Government has been and is exerted in every possible way to favor and expand the great German steamship companies. The German state railways haul at nominal rates all material for German shipyards—a virtual bounty on shipbuilding—and these same state railways grant favoring rates on goods exported in German ships. Under a free-ship policy the German merchant marine, as has been said, increased only from 1,098,000 tons in 1873 to 1,243,000 tons in 1881. But under the present imperial policy of subsidy to some lines, bounty and assistance to shipyards, discriminating rail rates on exports by German ships and imperial aid in many other ways too numerous and complex to be noted here, the German mercantile marine, one of the most elaborately protected industries in the world, has grown to a tonnage of upward of 4,000,000. For many years the North German Lloyd has built no ships abroad, and a few months ago it was announced that the other great German company, the Hamburg-American, was no longer dependent upon foreign shipyards. To hold up Germany as an example of the benefits of a free-ship policy is a good deal like exalting America as an example in foreign commerce of the ancient Democratic policy of free trade.

German statesmen know far better than the gentleman from Wisconsin what maritime policy is wisest and most effective. Just about the time that the gentleman was delivering his free-ship speech in the American Congress the Reichstag was granting still another large subsidy, given exclusively to German-built ships, to extend the trade and influence of the Empire among the islands of the Pacific Ocean, where American ships and American trade were once supreme.

Manifestly, the gentleman from Wisconsin has been very seriously misled by those on whom he has depended for his information in regard to the maritime policies of Europe. He is fundamentally wrong, not only as to Great Britain and Germany, but as to France and Italy, for he says:

"The only two European countries that pay a subvention to their mail ships far in excess of a fair remuneration for services rendered are France and Italy.

"The French merchant marine, in spite of its subsidies, is losing ground every year, and the subsidized Italian lines find great difficulty in even holding their own on the Mediterranean, their own ground, in competition with nonsubsidized German ships."

The gentleman from Wisconsin has been grievously imposed on by his informant. What he is made to say here is the very reverse of the actual facts. Instead of "losing ground every year," the French merchant marine is rapidly advancing. Its tonnage has increased from 914,000 tons in 1881 to 1,952,000 in 1908, or more than doubled. At the same time the merchant marine of Italy has been making enormous strides, reaching last year a tonnage of 1,340,000. Not only do Italian ships hold their own and more in the Mediterranean, but within two years two new and excellent Italian steamship services have been established across the north Atlantic to the port of New York.

Both France and Italy, like Germany, long depended on a free-ship policy—the policy advocated for the United States by the gentleman from Wisconsin. What was the result? The French merchant marine under free ships alone actually fell off from 1,072,000 in 1870 to 914,000 tons in 1881, when the present French subsidy system was adopted. Italy had the same experience, her merchant tonnage stand-

ing at only 860,000 in 1894. Free ships practically killed merchant-ship building in both France and Italy, and at the same time smothered the natural increase of the merchant marine. These are facts of historical record, set forth year by year in the annual reports of the United States Commissioner of Navigation and in the reports of every government of Europe. It is difficult to understand how facts like these have been kept from the knowledge of the gentleman from Wisconsin.

The policy of free ships which he is advocating is a policy that, tried by itself alone, has everywhere failed, while everywhere that it has been tried the policy of subsidy or subvention has succeeded. Take, for example, the experience of Japan. She tried free ships persistently, with the result that as late as 1894 she had only 200,000 tons of ocean shipping, and was practically unable to build any vessels more ambitious than an ancient junk. Then Japan, disheartened by the free-ship policy, began to give subsidies to her ocean ships and bounties to develop native shipyards, with the result that Japan has now created a magnificent merchant marine of 1,242,000 tons, the largest and best ships of which are of Japanese construction. In advocating the antiquated and delusive policy of free ships the gentleman from Wisconsin is facing backward toward the night and not forward toward the morning.

The gentleman is very seriously wrong in his declaration that "the American shipbuilding industry would not suffer by allowing American registry of ships in the foreign trade built or purchased in foreign countries." American shipbuilding would suffer, and would presently be destroyed, so that we should be without facilities to construct in this country the battle ships needed to defend our flag against foreign aggression. Does the gentleman from Wisconsin know that all but one of the present first-class battle ships of the United States were built in the private shipyards of America, only one of our naval stations having the machinery to undertake this work? The relatively small demands of the coastwise service will not keep alive the great and costly shipyards requisite for the construction of *Dreadnoughts;* and of these great ships we are authorizing only two a year, not enough in themselves to give the shipyards adequate employment. Our American shipyards have constructed not only the best battle ships in the world, but the best mail liners and naval auxiliaries, running on the route to Europe, to the West Indies, and Mexico under the ocean mail law of 1891, of which the pending ocean mail bill is an amendment. Under our law as it now stands these mail liners, these naval auxiliaries, one and all must be American built. Under the policy proposed by the gentleman from Wisconsin every one of them would be built in Europe or Japan, and built there not because materials are costlier here, for all materials for such ships for foreign trade are on our free list, but simply because a skilled mechanic is compelled to work in Great Britain or Germany for about one-half and in Japan for about one-third of the wages of an American mechanic. A free-ship policy like that championed by the gentleman from Wisconsin would strike a terrible blow at American labor; and worse than that, by destroying our greatest ocean shipyards, would rob our Nation of the essential resources of defense. The free-ship policy of the gentleman from Wisconsin goes much further in the direction of free trade than any policy that has even been tried by the German Empire, further even than the policy of free-trade England herself.

"Our American law requires rightfully that American mail ships of our national line, built under the inspection of our Navy Department for auxiliary naval use in war, shall be built in American shipyards by American mechanics. That also is the law of Germany in regard to the mail ships of her imperial subsidized lines, resembling the lines which the ocean mail bill now pending before this House would establish from our ports to South America and across the Pacific Ocean. This is also the policy of the British Government, which has stipulated in its recent mail contracts that mail-carrying British ships shall be 'built in the United Kingdom.' Here is another fact of large significance which is apparently unknown to the gentleman from Wisconsin.

"It is difficult to understand his attitude; difficult to understand his assertion that the mail ships of this country are already overpaid by the United States. He cites the fact that the ships of the fast American line to Europe receive $1.60 per pound for carrying the mails, while our Government pays the German steamers 44 cents. But does not the gentleman know that neither the German Government nor the British Government will pay our fast American mail ships a single penny if it can be prevented, and that our American ships in trans-Atlantic commerce are virtually without any revenue whatever from the European mails? The gentleman from Wisconsin goes a very long way, a very long way indeed, to make out a case against the ships of his own flag, the ships of his own country. In nearly every specific statement of his speech he is most surprisingly wrong. He declares, for instance:

"Not one dollar extra, however, is paid to the British ships to and from South America. Therefore American ships wishing to engage in commerce with the South American countries are at no disadvantage, for there are no British ships enjoying subsidies to compete with."

The fact is that the 2 principal British mail lines to South America, like the rest of the 30 British mail lines to all parts of the world, are and always have been generously subsidized. The Royal Mail Company, as has been stated, was created in 1840 with a subsidy of $1,350,000 a year. This subsidy has of recent years been reduced as the line became firmly established in its service, exactly as our American protective duty on steel rails has been reduced from $28 to less than $8 a ton as the industry became firmly established in this country. But the British mail lines to South America, with which American lines will have to compete, are still adequately supported out of the imperial treasury and backed by all the powers of influence of the British Government. But these British mail lines run direct to South America from British ports. No ships comparable with them under the British or any other flag run from our ports to South America. The purpose of the present ocean mail bill is to carry the United States mails on routes where no adequate facilities exist and where no first-class steamship service can be maintained without sufficient mail compensation from the Government. This bill applies to the long and costly routes, more than 4,000 miles in length, to South America and the great countries beyond the Pacific Ocean. The conditions are exactly similar to those which confronted Germany when Bismarck, in 1881, advocated and secured a great subsidy, now $1,340,000 a year, to enable the North German Lloyd to create an imperial German mail steamship service to the East Indies and Australia. Cost and all other conditions considered, these German ships receive a higher rate of mail pay than the maximum of $4 per mile proposed for 16-knot vessels in the pending bill. The gentleman from Wisconsin insists that the German mail rates are no more than adequate—and in the same speech he contends that American proposed rates of less than the German rates are excessive. Is the gentleman for his own country or against it?

And what is true of our proposed American mail lines to South America is true of the proposed lines across the Pacific Ocean. The rates of compensation in the pending bill are slightly more than the rates paid to British trans-Pacific steamers by their Government, but considerably less than the rates paid by the Government of Japan to the Japanese steamship lines, whose avowed purpose is to make the American flag a stranger on the Pacific Ocean.

Finally, there is another point in which the gentleman from Wisconsin has manifestly spoken without sufficient information. He presents a list of foreign-built steamships in which American citizens have a partial ownership, apparently believing that if his free-ship plan were adopted these foreign-built vessels would be brought under the American flag. The gentleman apparently does not know that a very few years ago a commission of Congress, the Merchant Marine Commission, made up of five Senators and five Representatives, members of both political parties, conducted a long and patient investigation into the condition of American shipping in the foreign trade. This commission put the question squarely to the very companies and firms named by the gentleman from Wisconsin as owning foreign-built ships whether they would bring their foreign-built ships beneath our flag if a free-ship law were recommended to and passed by Congress.

Of all these concerns only one in its response to the inquiry of the commission expressed even a qualified willingness to put its foreign ships under the American flag. Mr. John A. Donald, of New York, described in the list of the gentleman from Wisconsin as operating three small steamers under Norwegian colors, said in specific answer to the inquiry of the commission, "Whether you would, if so authorized by Congress, transfer your foreign-built ships to American registry to engage exclusively in the foreign trade, but to remain without subsidy, differential duty, or any other government encouragement?"

"I beg to state on my own behalf as official president of this company, without consulting my directors, that I would not feel inclined to transfer our foreign-built ships to American registry without some inducement for doing so."

Mr. Donald added in his letter that he thought that a free-ship policy might be of some help in developing the merchant marine, but it is significant that he answered "No" to the specific question.

The same reply was returned by every other firm or company, without exception. Thus the gentleman from Wisconsin names in his list of American ownership under foreign flags the Leyland, Red Star, and International Navigation companies. The American vice-president of these companies, now combined in the International Mercantile Marine, Mr. P. A. S. Franklin, of New York City, declared, in answering the commission:

"We could not afford to transfer any of our foreign-built ships to American register, as the increased cost of operating steamers under the American flag compared with the ships under foreign flags in the same trade would be too great to warrant the transfer."

The Leyland Line owns 44 British steamers, of 277,379 tons, and the Red Star and International companies 15 Belgian and British steamers, of 100,219 tons.

The Atlantic Transport Line is named by the gentleman from Wisconsin in his list as operating under British colors 17 steamers, of 123,593 tons. Mr. B. N. Baker, of Baltimore, to the inquiry of the Merchant Marine Commission whether he would put these ships under the American flag if a free-ship law was passed, answered with a simple and emphatic "No."

The Standard Oil Company is mentioned as owning 14 steamers, of 50,296 tons, under British and German flags. Mr. Philip Ruprecht, agent of this company (its shipholding company is the Anglo-American Oil), replied, like Mr. Baker, with an unqualified "No" to the inquiry of the commission.

Another American concern included in the list of the gentleman from Wisconsin is the North Atlantic Steamship Company, represented by C. & J. Hogan, of New York, operating under British colors 11 steamers, of 41,441 tons. This firm also answered in the negative, as did William R. Grace & Co., of New York, operating 9 British steamships, of 20,758 tons, and the Chesapeake and Ohio Steamship Company, operating 6 British steamers, of 20,277 tons. No formal reply was received from the United Fruit Company, of Boston, operating 5 foreign steamers, of 5,913 tons; but an informal answer was given verbally by the company's officers that they would not dream for a moment of transferring their foreign-built steamers to the American flag for the foreign trade, and that a free-ship law would be entirely ineffective so far as they were concerned.

The facts in the case will be found set forth on pages 70 to 73 of the report of the Merchant Marine Commission in 1905.

As foreign ships these vessels enjoy the low rates of foreign wages, the low cost of foreign maintenance, the protection of powerful foreign navies, and in some cases the advantage of foreign subsidies besides. For these reasons the owners find it profitable to keep their foreign-built ships under foreign flags, and they would keep them there if Congress adopted to the letter the free-ship suggestion of the gentleman from Wisconsin. He is following a will-o'-the-wisp in following a free-ship policy for the upbuilding of the American merchant marine.

A signal proof of this has just developed in the transfer from American to Belgian registry of two of the largest of American-built trans-Atlantic steamships, the *Finland* and *Kroonland* of the Red Star Line, plying between Antwerp and New York. These are not mail-carrying vessels; they are not operated under the law of 1891; they receive no subsidy from our Government. They are not compelled to carry American crews, except only their leading officers; but they are bound by act of Congress to provide a reasonable food scale for their officers and men and to have roomy and comfortable forecastles. These requirements are not made of competing ships under foreign flags, and for that reason the International Mercantile Marine Company, owning these two ships, has quietly transferred them to foreign colors, thereby saving some money in salaries of the officers and in the feeding and housing of the crews. This episode is sharp proof of the utter futility of the free-ship policy advocated by the gentleman from Wisconsin. If the few American ships we have are being transferred to foreign flags, what possible inducement would a free-ship law give to foreign ships to hoist the American flag, unless, indeed, they were eligible to carry our mails or engage in our protected coastwise service?

[From Chicago Inter Ocean, February 15, 1909.]

SUBSIDIES AND OUR MERCHANT FLEET.

"I have, after careful study," says the Hon. GUSTAV KÜSTERMANN, of Wisconsin, in a recent speech in the Lower House of Congress, "thought up a plan that will build up our merchant marine and eventually give us American ships in which to carry our mail to foreign countries."

After reading this naive admission that he has solved one of our most difficult national problems, one turns over the leaves of Mr. KÜSTERMANN'S speech in feverish haste to find how he did it. It is needless to describe one's disappointment on discovering merely the old proposal to repeal the navigation laws which forbid American registry to foreign-built ships.

According to the Hon. GUSTAV KÜSTERMANN, this is the way all merchant marines have become great—by repealing navigation restrictions. He says, for instance:

"Fifty years ago the British navigation laws were as restrictive as those of the United States to-day. A few years later the laws were repealed and freedom was given her citizens to buy ships anywhere and have them registered under the British flag. From that time dates the restoration of the British flag to the command of the seas."

It is true that Great Britain did repeal her navigation laws, as stated. But it is equally true that the permission to Britishers to buy their ships anywhere meant absolutely nothing; it was simply the removal of a superfluous statute. The age of steel ships had come, and Great Britain had the facilities for producing them better and cheaper than any other country. These facilities, supplemented by subsidies, caused the British merchant marine to outstrip the world. The gracious permission to the Britisher to buy ships anywhere else, when he could get them more cheaply at home, could hardly have stimulated its growth.

The Wisconsin statesman further remarks:

"Some thirty years ago Germany followed the example of Great Britain and gave her citizens the right to buy ships anywhere in the world and place them under the German flag, and this continues to be Germany's policy to-day. It has resulted in Germany having the second largest merchant marine in the world."

Thirty years ago the German steel industry was in its infancy, and if Germany wanted a merchant marine of steel ships in a hurry she naturally had to make some concessions. But now that her steel is rivaling England, the repeal of old restrictions is without significance. The German merchant marine is still encouraged by the policy which created it—the policy of granting government subsidies.

The assumption that permission to Americans to buy foreign ships and fly over them the American flag would settle the entire question naturally causes the Wisconsin Representative to attack the idea of subsidies. He denies that they are of much aid to steamship lines after all. Here is a sample of his argument:

"That the subsidies paid by the German Government * * * do not particularly add to the success of the steamship lines is seen from the fact that the North German Lloyd, which, on account of its line to the Far East, enjoys the greatest subsidy, declared in 1907 to their stockholders a dividend of only 4 per cent, while the Hamburg-American Line, which practically receives no subsidies, paid 7 per cent during the same period."

To an unprejudiced mind it would seem that if the North German Lloyd with the largest subsidy was able to pay only 4 per cent, the subsidy, in all probability, meant the difference between the failure and success of the line. The fact that another "practically" unsubsidized line paid 7 per cent does not alter the situation in the least. It simply illustrates the fact that subsidies may not be uniform, but must be determined with reference to all the business conditions surrounding each enterprise.

He attempts to prove his argument by saying that "the French merchant marine, in spite of its subsidies, is losing ground every year." To which the answer is that subsidies are not everything; there must be aptness and efficiency in the management and execution of the enterprise also. The French merchant marine, like the French navy, has never had the sure foundation of a national disposition toward sea adventure. Morevore, the export trade of France deals largely in objects of luxury, is comparatively small in bulk, and probably unremunerative as freight. This is a distinct handicap.

All of which leaves us with the old and well-understood fact staring us in the face—though the Hon. GUSTAV KÜSTERMANN declines to see it—that the problem of an American merchant marine is to be solved only by dealing with at least three factors of expense instead of one—the added cost of production of ships built in America, the added cost of labor to man the ships, and the amount of money required to counterbalance the subsidies which great European nations still give their important lines.

The first could be treated, as Mr. KÜSTERMANN suggests, by permitting Americans to buy ships elsewhere and register them under the American flag; but this would sound the death knell of any revival of shipbuilding in this country. The second could be treated by granting permission to employ entirely foreign crews; but this would not only banish the hope of training American sailors in foreign trade for the Nation's needs, but it would actualy result in presenting foreign nations, our possible enemies in war, with a valuable corps of men.

The third could only be treated by the Government's furnishing a sum of money at least equal to that given by foreign nations to lines likely to compete with our own. So, when all is said, we find a subsidy of some sort is necessary. Even if we are willing to sacrifice the future of American shipbuilding and the hope of American sailors in foreign seas, we must have subsidies.

The country will eventually come around to this point. We should not be surprised if even the Hon. GUSTAV KÜSTERMANN, after some more "careful study," should find himself persuaded that this is about the only way in which the country can rehabilitate the American merchant marine.

Mate William Jenney.

SPEECH

OF

HON. HIRAM R. BURTON,

OF DELAWARE,

IN THE HOUSE OF REPRESENTATIVES,

Wednesday, March 3, 1909.

On the bill (H. R. 17059) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement.

Mr. BURTON of Delaware said:

Mr. SPEAKER: On February 13, 1908, I introduced a bill (H. R. 17059) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other mates who had been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement.

Said bill reads as follows:

A bill (H. R. 17059) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement.

Be it enacted, etc., That Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list of the navy with the rank and pay of one grade above that actually held by them at the time of retirement by reason of their creditable civil war service under the provisions of the acts of Congress approved March 3, 1899, and June 29, 1906, shall be credited with all their prior actual service either as officers or enlisted men in the Army, Navy, and Marine Corps, in computing their pay on the retired list from the date of their advancement under the provisions of said acts.

The necessity for this bill grew out of the attitude of the Bureau of Navigation, Navy Department, as set forth in a letter dated January 9, 1907, and addressed to Mate Thomas W. Bonsall, U. S. Navy, retired, in which the bureau stated as follows:

The bureau regrets that those mates on the retired list who served as such during the civil war are not entitled to the benefits of the act of Congress approved June 29, 1906.

And to the position of the Navy Department, as stated in a letter, dated July 10, 1907, and addressed to Hon. THOMAS S. BUTLER, in which the department said:

The department concurs with the Bureau of Navigation in its conclusion that it is without power to advance mates to a higher grade under the provisions of the statutes cited.

These mates had employed a prominent law firm in Washington, experienced in naval matters, concerning their claim for increase in rank and pay on the retired list.

But this law firm, after fully considering the matter, informed Mate Jenney and his fellow-officers that it did not believe they were entitled to increased rank and pay under any act of Congress.

The matter rested in this shape until it was brought to the attention of Mr. Clarence W. DeKnight, a lawyer of this city, who advised Mate Jenney and others that, in his opinion, they were entitled.

Accordingly these mates employed Mr. DeKnight in support of their contention. He took the matter up with the Navy Department, which again adhered to its position that these mates were not entitled. Furthermore, the department refused to refer the matter to the Attorney-General for opinion, on the ground that the department entertained no doubt that it was correct in its position, and that it was only where the department entertained a doubt that it felt called upon to request the Attorney-General for an opinion. The act in regard to requesting opinions of the Attorney-General is as follows:

The head of an executive department may require the opinion of the Attorney-General on any questions of law arising in the administration of his department. (Sec. 356, Rev. Stats.)

After considerable effort on the part of Mr. DeKnight, the Secretary of the Navy, acting on the request of Hon. THOMAS S. BUTLER, contained in a letter dated June 12, 1907, was induced to entertain a doubt as to the position of the department in relation to the status of these mates, and the matter was on October 1, 1908, referred to the Attorney-General, with request for an opinion.

When it reached the Attorney-General's office, Mr. DeKnight made an extended argument in the matter, with the result that the Attorney-General sustained Mr. DeKnight's position and rendered an opinoin on October 15, 1907 (26 Op., 434), which appears later on in my remarks.

In accordance with this opinion, Mates William W. Beck, William Boyd, John Griffin, Joseph Hill, Silas T. C. Smith, Frank Holler, and Robert Robinson were nominated to and confirmed by the Senate as mates on the retired list with the rank and pay of the lowest grade of warrant officers. (See CONGRESSIONAL RECORD, 60th Cong., 1st sess., pp. 256, 354, 1031.)

It was not necessary that Mate William Jenney should be nominated and confirmed, for the reason that he was given the rank and pay of the next higher grade under the provisions of section 11 of the act of March 3, 1899 (30 Stat., 1007).

But notwithstanding this advancement, the comptroller held that these mates were not entitled to the pay of the next higher grade, evidently intended by the act. Hence, at the request of Mr. DeKnight, I introduced the bill already quoted.

The nomination and confirmation of these mates is the first in history where an officer not holding a commission in the navy was nominated by the President and confirmed by the Senate to have the rank and pay of an officer in the navy not holding a commission and whose appointment to such grade is not required to be confirmed by the Senate.

However, it was clearly shown in the brief of Mr. DeKnight, as submitted to the Attorney-General, that the words "by and with the advice and consent of the Senate," as contained in the act of June 29, 1906, did not preclude these mates.

On this subject Mr. DeKnight contended as follows:

The words "by and with the advice and consent of the Senate" can not be construed as barring these mates. These words are copied into the act of June 29, 1906, from the Constitution of the United States, which requires that a person appointed to an office, within the meaning of the Constitution, or an officer receiving a promotion to a higher grade shall receive the same only "by and with the advice and consent of the Senate." No officer takes a new grade under the act of June 29, 1906, and it was therefore entirely unnecessary that he should be nominated to the Senate and be confirmed by that body to meet any constitutional requirement. Hence it follows that this requirement is merely statutory and arbitrary. The name of this officer, a mate, is to be sent to the Senate merely as a statutory and not as a constitutional requirement; that is to say, under the requirement of this act of June 29, 1906, merely because Congress had seen fit to so enact.

This is an arbitrary requirement, but it is in keeping with other such arbitrary requirements on the part of Congress.

By way of illustration: Congress has arbitrarily required that the mere increase in pay of an officer on the retired list from furlough pay to half pay, shall be "by and with the advice and consent of the Senate," when it could have been accomplished by giving authority to the President, or the Secretary of the Navy, in his discretion, to grant such increase.

Section 1594, Revised Statutes, reads:

"The President, by and with the advice and consent of the Senate, may transfer any officer on the retired list from the furlough to the retired pay list."

The increase contemplated by the section does not constitute a new grade or office, and the consent of the Senate was merely statutory and arbitrary.

Under the provisions of section 1594, Revised Statutes, supra, Assistant Engineer Henry E. Rhodes, U. S. Navy, retired, was on April 25, 1879, transferred by the President to the retired-pay list "by and with the advice and consent of the Senate," while by the act approved June 26, 1906, he was transferred from the half-pay list to the 75-per cent list of retired officers not by the President, not "by and with the advice and consent of the Senate," but merely by the Secretary of the Navy. The act for his transfer reads as follows:

"Be it enacted, etc., That the Secretary of the Navy is hereby authorized and directed to transfer Assistant Engineer Henry E. Rhodes upon the retired list of the United States Navy, from the half-pay list to the 75-per cent-pay list of retired officers under section 1589 of the Revised Statutes of the United States, to take effect from the date of his retirement."

The foregoing shows conclusively that it is not a departure from the arbitrary requirements of Congress to require that the name of officers shall be sent to the Senate when unnecessary as a constitutional requirement.

This bill which I introduced was referred to the Committee on Naval Affairs, and on March 6, 1908, was reported favorably from that committee by Mr. ELLIS of Oregon, the report being as follows:

[House Report No. 1178, Sixtieth Congress first session.]

WILLIAM JENNEY AND EIGHT OTHER RETIRED MATES OF NAVY.

Mr. ELLIS of Oregon, from the Committee on Naval Affairs, submitted the following report, to accompany H. R. 17059:

The Committee on Naval Affairs, to whom was referred the bill (H. R. 17059) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement, submit the following report:

It appears from the Official Register of the Navy that William Jenney was a mate in the navy March 19, 1861; acting ensign, November 27, 1863; honorably discharged January 11, 1866; appointed a mate in the navy December 6, 1869, and retired on account of reaching the age of 62 years on September 26, 1899, under section 1444 of the Revised Statutes.

Mate Jenney was one of the 28 mates in the navy August 1, 1894, to whom the act approved on that date (28 Stat. L., 212) applies.

Section 11 of the act of March 3, 1899 (30 Stat. L., 1007), provides:

"That any officer of the navy with a creditable record who served during civil war shall, when retired, be retired with the rank and three-fourths the sea pay of the next higher grade."

On September 14, 1899, Mate Jenney was notified of his retirement by the Secretary of the Navy in accordance with the provisions of section 1444 of the Revised Statutes of the United States. The act of June 29, 1906 (34 Stat. L., 554), gave a similar advancement for like reasons.

The Comptroller of the Treasury in his construction of these statutes held that the mates in question are entitled only to the lowest pay of warrant officers and not to the pay of warrant officers with the same length of service; and while it was the undoubted intention of the acts referred to to advance the retired pay of these officers, they will under this holding, as a matter of fact, get no greater pay than they previously received.

Your committee is of the opinion that the passage of this bill is necessary if these officers are to receive the relief it was intended to give them in previous legislation.

In support of this view the following letter from the Secretary of the Navy is submitted herewith and made a part of this report:

NAVY DEPARTMENT,
Washington, February 21, 1908.

SIR: I have the honor to acknowledge receipt of your letter of the 14th instant, requesting the department's views with reference to a bill (H. R. 17059) "For the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement."

Inasmuch as the Comptroller of the Treasury has held that the mates in question are entitled only to the lowest pay of warrant officers and not to the pay of warrant officers with the same length of service, the effect of the advancement provided for by the acts of March 3, 1899, and June 29, 1906, will be to give these officers no greater pay than that they previously received.

Favorable consideration of the bill (H. R. 17059) is therefore recommended, for the purpose of extending to these mates the benefits of increased compensation on advance in rank, as was obviously intended by the acts of March 3, 1899, and June 29, 1906.

Very respectfully,

V. H. METCALF, *Secretary.*

Hon. GEORGE EDMUND FOSS,
Chairman Committee on Naval Affairs,
House of Representatives.

In view of the foregoing, your committee is of the opinion that H. R. 17059 should pass. We therefore submit it with a favorable recommendation.

The bill was reached on the calendar of the House on March 7, 1908, when it was discussed and went over because of the objection of Mr. MANN.

The debate which occurred at that time is as follows:

MATE WILLIAM JENNEY, U. S. NAVY, AND OTHERS, RETIRED.

The next business was the bill (H. R. 17059) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement.

The bill was read, as follows:

"Be it enacted, etc., That Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list of the navy with the rank and pay of one grade above that actually held by them at the time of retirement by reason of their creditable civil war service under the provisions of the acts of Congress approved March 3, 1899, and June 29, 1906, shall be credited with all their prior actual service either as officers or enlisted men in the Army, Navy, and Marine Corps in computing their pay on the retired list from the date of their advancement under the provisions of said acts."

Mr. MANN. Mr. Speaker, reserving the right to object, I think there ought to be a pretty full explanation of this bill from the Naval Committee.

Mr. BURTON of Delaware. Mr. Speaker, it seems that this legislation is necessary in order to set aside an arbitrary decision of the Comptroller of the Treasury that really seems to be contrary to the act of March 3, 1899. That act provides that any officer of the navy with a creditable record who served during the civil war shall, when retired, be retired with the rank and three-fourths of the sea pay of the next higher grade. That seems to me to be mandatory. Yet the Comptroller of the Treasury decided that they were to receive only the smallest pay.

Mr. MANN. Is the gentleman able to say how many men have been retired in the navy and the army who are subject to the same ruling of the comptroller?

Mr. BURTON of Delaware. In this service there were twenty-eight originally——

Mr. MANN. Does the gentleman mean in this service or in this class?

Mr. BURTON of Delaware. The others have all got it, except eight men.

Mr. MANN. No one has got it under the original law, under this decision of the comptroller. Mates are not the only men on the retired list of the navy, as I understand it, under this law, and this decision of the comptroller was not made as to this mate or these particular mates. It was a general ruling. Now, is the gentleman able to tell us how many men on the retired list of the navy and the army are affected by the same decision of the comptroller?

Mr. BURTON of Delaware. I am not able to answer that question, but the passage of this act will grant relief to the eight men who are now living.

Mr. MANN. Or nine, to be more accurate; one and eight others make nine, I believe, if my arithmetic is correct. But the gentleman proposes to take a decision of the comptroller and wipe it out as to nine men. My opinion is that it more likely applies to 900.

Mr. BURTON of Delaware. I do not think so. Has the gentleman's attention been called to a letter of the Secretary of the Navy on this subject?

Mr. MANN. I have read the report.

Mr. BURTON of Delaware. You will find that in the report, which I ask the Clerk to read.

Mr. HOLLIDAY. Pending that, I should like to ask the gentleman what is the purpose of this bill?

Mr. BURTON of Delaware. The report will give the gentleman the purpose.

The Clerk read as follows:

"The Committee on Naval Affairs, to whom was referred the bill (H. R. 17059) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement, submit the following report:

"It appears from the Official Register of the Navy that William Jenney was a mate in the navy March 19, 1861; acting ensign, November 27, 1863; honorably discharged January 11, 1866; appointed a mate in the navy December 6, 1869; and retired on account of reaching the age of 62 years on September 26, 1899, under section 1444 of the Revised Statutes.

"Mate Jenney was one of the 28 mates in the navy August 1, 1894, to whom the act approved on that date (28 Stat. L., 212) applies.

"Section 11 of the act of March 3, 1899 (30 Stat. L., 1007), provides:

"'That any officer of the navy, with a creditable record, who served during the civil war shall, when retired, be retired with the rank and three-fourths the sea pay of the next higher grade.'

"On September 14, 1899, Mate Jenney was notified of his retirement by the Secretary of the Navy in accordance with the provisions of section 1444 of the Revised Statutes of the United States. The act of June 29, 1906 (34 Stat. L., 554), gave a similar advancement for like reasons.

"The Comptroller of the Treasury, in his construction of these statutes, held that the mates in question are entitled only to the lowest pay of warrant officers and not to the pay of warrant officers with the same length of service; and while it was the undoubted intention of the acts referred to to advance the retired pay of these officers, they will under this holding, as a matter of fact, get no greater pay than they previously received.

"Your committee is of the opinion that the passage of this bill is necessary if these officers are to receive the relief it was intended to give them in previous legislation.

"In support of this view the following letter from the Secretary of the Navy is submitted herewith and made a part of this report:

NAVY DEPARTMENT,
Washington, February 21, 1908.

SIR: I have the honor to acknowledge receipt of your letter of the 14th instant, requesting the department's view with reference to a bill (H. R. 17059) "for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement."

Inasmuch as the Comptroller of the Treasury has held that the mates in question are entitled only to the lowest pay of warrant officers and not to the pay of warrant officers with the same length of service, the effect of the advancement provided for by the acts of March 3, 1899, and June 29, 1906, will be to give these officers no greater pay than that they previously received.

Favorable consideration of the bill (H. R. 17059) is therefore recommended, for the purpose of extending to these mates the benefits of increased compensation on advance in rank, as was obviously intended by the acts of March 3, 1899, and June 29, 1906.

V. H. METCALF, *Secretary.*

Hon. GEORGE EDMUND FOSS,
Chairman Committee on Naval Affairs,
House of Representatives.

"In view of the foregoing, your committee is of the opinion that H. R. 17059 should pass. We therefore submit it with a favorable recommendation."

Mr. HOLLIDAY. Mr. Speaker, I take it the purpose of this bill is to increase the pay that these men get on the retired list. Does the gentleman know how much they are getting now?

Mr. BURTON of Delaware. Nine hundred dollars.

Mr. HOLLIDAY. Nine hundred a year?

Mr. BURTON of Delaware. Yes.

Mr. HOLLIDAY. Are they officers or enlisted men?

Mr. BURTON of Delaware. I understand they were all officers, and one of them is as much as 80 years old.

Mr. HOLLIDAY. How much will their retired pay be increased if the bill passes?

Mr. BURTON of Delaware. As I understand, their pay will be three-fourths of $1,800 a year. That was their sea pay for the length of service rendered, and, as I understand this act, it would give them three-fourths of their sea pay.

Mr. BUTLER. It is just to equalize it as to the officers of the army and the navy.

Mr. BURTON of Delaware. Yes; that is the object of the bill.

Mr. HOLLIDAY. They served in the navy until they came to their retirement?

Mr. BURTON of Delaware. Yes.

Mr. HOLLIDAY. And this simply puts them on a par with other officers who had similar service?

Mr. BURTON of Delaware. That is all.

Mr. ELLIS of Oregon. Mr. Speaker, this bill, as I understand it, is to correct what was obviously intended to be done by statute. The statute of 1899 is mandatory in character and says that this shall be done.

A subsequent statute, passed in 1905, had the same end in view, but by a holding of the comptroller when this matter came up for consideration these nine men were excluded from the provisions of those acts; they were old soldiers who had served through the war, and by virtue of their retirement coming at a particular time the comptroller held that they were excluded, and they are not receiving the benefit that others of their class are receiving. I think there are only nine—this man and eight others. They served with distinction through the war, and the statute intended to give them the benefit that it gave the other officers of like character. They gave them the advance in rank, but no corresponding advance in pay, as was intended by the act, for the reason that the comptroller held that they did not come within the act. The committee, after investigating it and examining the report of the comptroller, reached the conclusion that such a holding worked a great injustice. The report is unanimous, and is backed by a letter from the Secretary of the Navy, who says that the legislation referred to was obviously intended to benefit these men, but under the ruling they are excluded, and we only desire to correct that oversight or inequality existing under that ruling and to put these men in a position to receive what it was intended they should have.

Mr. MANN. Will the gentleman yield?

Mr. ELLIS of Oregon. I am speaking in the time of the gentleman from Delaware.

Mr. BURTON of Delaware. I will yield to the gentleman.

Mr. MANN. Just what will be accomplished by this bill?

Mr. ELLIS of Oregon. Under the statute at the present time these men are getting three-fourths of the pay which the comptroller held they should receive—that is, three-fourths of $1,200. Under the bill, if it becomes a law, they will get three-quarters of the pay of the rank which they retired on, which would be three-fourths of $1,800.

Mr. MANN. They were mates; they were retired with the rank and pay of what grade, warrant officers?

Mr. ELLIS of Oregon. Yes.

Mr. MANN. What is the pay of warrant officers?

Mr. ELLIS of Oregon. Eighteen hundred dollars.

Mr. MANN. Is that the lowest pay of a warrant officer?

Mr. ELLIS of Oregon. The lowest pay of the class in which they were placed.

Mr. MANN. What is the class in which they were placed? What is the lowest pay of a warrant officer? The gentleman says $1,800.

Mr. ELLIS of Oregon. Twelve hundred dollars is the lowest.

Mr. MANN. That is what I thought. That is what the law provides for, and that is what they are getting.

Mr. ELLIS of Oregon. Their rank was above that.

Mr. MANN. What does the gentleman mean by saying that "their rank was above that?" Does the gentleman mean that their rank would have been above that if they had served as warrant officers twenty or thirty years? This bill apparently proposes to give to these officers the rank and retired pay of a warrant officer if they had served as warrant officers for a great many years, which they never served at all.

Mr. BURTON of Delaware. But they did.

Mr. MANN. I beg the gentleman's pardon, they were never warrant officers. They never had the rank or pay of warrant officers until retired.

Mr. BURTON of Delaware. The act clearly says "shall when retired be retired with the rank and three-quarters pay of the next higher grade."

Mr. MANN. They were retired with that rank, but never served with that rank.

Mr. ELLIS of Oregon. Because they reached the retiring age.

Mr. MANN. They were mates; that is what the bill shows. They reached the age of retirement, and thereupon they were retired with the rank of warrant officers, but they had never served as warrant officers. Now, the proposition is not only to give them that advantage, but to give them the additional advantage of having served as warrant officers for many years. The same case arises in the army. We have had the same proposition in other committees of the House.

Mr. BURTON of Delaware. I want the gentleman to understand that I have no special interest in this bill. This is simply a matter of justice to the men.

Mr. MANN. I understand that.

Mr. BURTON of Delaware. I believe these men have done good service, and they are entitled to more than three-quarters of $1,200 pay.

Mr. MANN. They are now getting $75 a month, which would be considered an extremely large pension to any enlisted man in the army or in the navy.

Mr. HOLLIDAY. I would like to ask the gentleman another question. How long did these men serve after they went into the navy?

Mr. BURTON of Delaware. In the case of Mr. Jenney, this report shows that he was enlisted March 19, 1861, and was given notice of his retirement on September 14, 1899. Now, he was discharged in 1866, and then reenlisted, and was retired in 1899. That shows a long service.

Mr. HOLLIDAY. I am not inclined to be captious about that, but the Committee on Military Affairs is fairly flooded with applications to increase the pay of men on the retired list—that is, to give them a higher rating—and it is sometimes complained to us that the Naval Committee is much more liberal than the Committee on Military Affairs. I shall not object, however.

Mr. ELLIS of Oregon. Mr. Speaker, it will be found by reference to this act of March 3, 1899, known as the "personnel act," which is mandatory, that any officer of the navy with a creditable record shall, when retired, be retired with the rank and three-quarters of the sea pay of the next higher grade. On September 14, 1899, the same year this act was passed, Mr. Jenney was retired by the Secretary of the Navy in accordance with the provisions of law, but under the holding of the comptroller he could not have this pay which the personnel act, in express terms, said he should have. He was not retired until after the passage of that act giving him the right to that pay, and then under that ruling he could not receive the pay.

Mr. MANN. I do not understand the gentleman is correct in his statement of the facts. I understand these officers had received and have received from the date of their retirement three-quarters of the sea pay of the next higher grade than mates. They were mates, and they have received three-quarters of the sea pay of a warrant officer, which is $100 a month. Now, the gentleman proposes not only to give them an increase of pay more than is provided by the act, but to date that back to 1899. There has not been such a bill reported into this House from any other committee of the House. The Committee on Military Affairs has constantly, as I am informed, turned down these bills. The committee of which I have the honor to be one of the members has refused to recommend the passage of such a bill, and I do not believe that it receives, in the hurry of making up an appropriation bill, that due consideration which the Committee on Naval Affairs usually gives to everything which comes before it.

Mr. BURTON of Delaware. Does not the gentleman understand that these officers were getting $900 before the passage of this act?

Mr. MANN. Oh, I presume very likely. I presume they were getting $1,200.

Mr. WEEKS. I would like to ask the gentleman from Oregon a question: Are there not certain retired rear-admirals who bear the same relation to other admirals retired since the personnel act that these mates do to other mates retired since the personnel act, and is there not a bill pending in the Naval Committee for their relief at this time?

Mr. ELLIS of Oregon. I am not certain, but I think there is. I did not quite catch the question of the gentleman.

Mr. WEEKS. Are there not certain retired rear-admirals who were retired before the passage of the personnel act who bear the same relation to those retired since the personnel act that these mates do to mates who have been retired since the personnel act?

Mr. BUTLER. Yes; and, if I recollect correctly, I believe that bill was ordered yesterday to be reported favorably.

Mr. WEEKS. The case is exactly the same, is it not?

Mr. BUTLER. Yes. There are a few of these mates that have not been provided for under the personnel act of 1899, and the reason for that is stated in this report from the department. The bill referred to by the gentleman, I believe, was ordered yesterday to be reported favorably.

Mr. WEEKS. The fact is that any mate retired since the personnel act is receiving three-quarters of $1,800.

Mr. BUTLER. Yes.

Mr. WEEKS. And these mates who were retired before the passage of the act are receiving three-quarters of $1,200, and their civil-war service was the same.

Mr. BUTLER. Their civil-war service was the same, and the personnel act of 1899, section 11, directs that they shall receive three-quarters of the sea pay of one grade above that at which they were retired.

Mr. BURTON of Delaware. Mr. Speaker, I believe this to be a just and fair measure. These mates are entitled to the advance asked for, and I hope the gentleman from Illinois [Mr. MANN] will not object.

Mr. LAWRENCE. As I understand it, the law provides that an officer going upon the retired list shall be retired at three-quarters pay of the rank above that which he holds at the time of the retirement where he had civil-war service.

Mr. BURTON of Delaware. Yes.

Mr. LAWRENCE. These parties for whose relief this bill is proposed were not, as a matter of fact, retired at the next grade above that which they held at the time of the retirement.

Mr. BURTON of Delaware. No; they were not.

Mr. LAWRENCE. And so you seek simply to place them upon a par with mates who would to-day be retired?

Mr. BURTON of Delaware. Yes.

Mr. LAWRENCE. And who would receive three-quarters of $1,800?

Mr. BURTON of Delaware. To $1,800.

Mr. LAWRENCE. So all you seek to do for these nine men is to place them on a par with other men of equal grade.

Mr. MANN. Is it the intent of the committee, of which the gentleman is a distinguished member, to bring into the House from time to time bills to equalize the pay of all officers and enlisted men who were placed on the retired list, every time an advance in pay is made; that the officers already on the retired list shall have the benefit of the increase of pay so as to equalize their salaries?

Mr. BURTON of Delaware. This only applies to civil-war veterans.

Mr. MANN. Oh, but the gentleman talks about equalizing pay and putting men on the same plane. Now, we passed an item for the increased pay of the enlisted men of the army the other day. If I remember rightly, the Military Affairs Committee, in reporting that proposition, were very careful that the increase in pay should not apply to men already on the retired list, taking the position that when a man is lucky enough to get on the retired list of the army or navy, and he is luckier than anyone else who serves the Government, that he ought to be satisfied with what he gets and not make him up into part of a lobby to constantly urge an increase of any salaries, he probably having nothing else to do.

Mr. BURTON of Delaware. Well, Mr. Speaker, I think that that is hardly applicable to this case. We only ask to have these men placed on the same plane they would have if they were retired to-day, veterans of the civil war.

Mr. BUTLER. Mr. Speaker, I will reply to the gentleman if he will listen. I will not, as a member of the Committee on Naval Affairs or as a Member of this House, vote to increase the pay of any man upon the retired list unless he served creditably and well in the civil war. We reported this bill that the pay of these eight or nine old sailors might be the same upon the retired list which their brothers who served in the civil war are now receiving. If they had not served in the civil war, I would not ask my friend to vote for their relief.

Mr. MANN. I supposed the gentleman was in favor of that proposition, possibly to put men on retired pay, but upon a much higher salary than he would have otherwise received, because he served two or three days in a clerk's office or something corresponding to that in the civil war.

Mr. BUTLER. No.

Mr. MANN. Such a man is now on the retired list, and it is a shame and disgrace to this Government that it ever put him there for that reason——

Mr. BUTLER. I do not know to whom the gentleman refers, but I am sorry to have assisted in the passage of such a measure if I did so. This man, William Jenney, was honorably discharged from the service in 1866. He enlisted March 19, 1861. He had a long and faithful as well as honorable war service, and for that reason, I assure my friend, we reported this bill favorably. We think he and the other men here provided for should have the same pay that other mates have who were more fortunate to be retired a short time after the passage of the personnel act of 1899.

Mr. MANN. Can the gentleman inform me what this means in this bill:

"Shall be credited with all their prior actual service, either as officers or enlisted men in the Army, Navy, or Marine Corps, in computing their pay on the retired list from the date of their advancement under the provisions of said act."

What does that mean?

Mr. BUTLER. Mr. Speaker, I can not answer the question. I know it is the intention of the Committee on Naval Affairs that they shall not receive what is commonly known as "back pay," and inasmuch as there seems to me—I am not authorized; the gentleman from Delaware introduced the bill and the gentleman from Oregon [Mr. ELLIS] reported it, after having passed the committee unanimously—but with the consent of the two gentlemen I will ask that the bill be laid aside until the Private Calendar is reached in regular order.

The SPEAKER. The bill is under consideration now, as the Chair understands. Is there objection?

Mr. MANN. Mr. Speaker, I object.

The opinion of the Attorney-General referred to in the report on the bill and in the debate is as follows:

DEPARTMENT OF JUSTICE,
October 15, 1907.

SIR: I have the honor to acknowledge the receipt of your letter of October 1, 1907, in which you ask my opinion as to whether certain mates, whose names are borne on the retired list of officers of the navy, having been placed there in accordance with the statute approved August 1, 1894 (28 Stat., 212), are entitled to advancement in accordance with the provisions of the act of June 29, 1906 (34 Stat., 554); and if so, to what grade they should be advanced. Sections 1408, 1409, and 1410 of the Revised Statutes are as follows:

"SEC. 1408. Mates may be rated, under authority of the Secretary of the Navy, from seamen and ordinary seamen who have enlisted in the naval service for not less than two years.

"SEC. 1409. The rating of an enlisted man as a mate, or his appointment as a warrant officer, shall not discharge him from his enlistment.

"SEC. 1410. All officers not holding commissions or warrants, or who are not entitled to them, except such as are temporarily appointed to the duties of a commissioned or warrant officer, and except secretaries and clerks, shall be deemed petty officers, and shall be entitled to obedience, in the execution of their offices, from persons of inferior ratings."

In the case of The United States *v.* Fuller (160 U. S., 593, 595) the court says:

"The personnel of the navy is divided generally into commissioned officers, noncommissioned or warrant officers, petty officers, and seamen of various grades and denominations."

After review of the foregoing and certain other provisions of the Revised Statutes, the court further says (p. 596):

"From this summary of the Revised Statutes it appears reasonably clear:

"1. That boatswains, gunners, sailmakers, and carpenters are warrant officers to be appointed by the President, and that they are the only ones specifically mentioned as such.

"2. That mates and officers not holding commissions or warrants and not entitled to them, but are petty officers promoted by the Secretary of the Navy from seamen of inferior grades who have enlisted for not less than two years, and that they are distinguished from other petty officers only in the fact that their pay is fixed by statute instead of by the President."

The act of August 1, 1894, mentioned in your letter, contains the language which follows:

"That the law regulating the retirement of warrant officers in the navy shall be construed to apply to the 28 officers now serving as mates in the navy."

It seems, therefore, to be clear (1) that the mates in question are officers of the navy; (2) that they are neither commissioned nor warrant officers, but, with respect to the law regulating retirements, they are placed, by special statute, upon the same footing as warrant officers. I understand from your letter that they have the other qualifications required by the act approved June 29, 1906, for advancement in grade. That act provided—

"That any officer of the navy not above the grade of captain who served with credit as an officer or as an enlisted man in the regular or volunteer forces during the civil war prior to April 9, 1865, otherwise than as a cadet, and whose name is borne on the Official Register of the Navy, and who has heretofore been or may hereafter be retired, * * * may, in the discretion of the President, * * * be placed on the retired list of the navy with the rank and retired pay of one grade above that actually held by him at the time of retirement."

The only question appears to be whether they are officers in the sense contemplated by that act. From your letter and the accompanying papers I further understand that doubts are entertained as to whether they are such officers, because (1), as stated in the indorsement of the Bureau of Navigation, "mates have always been considered as enlisted men," and (2) in an opinion rendered July 22, 1907, I held, in the case of Mate Richard J. Keating, that he was an enlisted man for the purpose of being permitted to reenlist with the benefit of continuous service under article 839 of the Navy Regulations.

There is no doubt, I think, in view of the provisions of sections 1409 and 1410 of the Revised Statutes, that a person can be at the same time an officer of the navy and an enlisted man. The distinction in this respect is between commissioned officers and the enlisted force. Not only is it expressly provided in section 1409 that when an enlisted man becomes a mate his duties and rights as an enlisted man remain unaffected, but the same provision is made with respect to warrant officers; and, if the fact of enlistment should be held a bar to securing the benefits of the act of 1906 in the case of mates, this might be equally true with respect to warrant officers as well. By Article II, section 2, clause 2, of the Constitution "officers of the United States" can be appointed legally (1) by the President, by and with the advice and consent of the Senate; (2) by the President alone; (3) by the courts of law; or (4) by the heads of departments. Commissioned officers of the navy are appointed in accordance with the first method, warrant officers in accordance with the second, and mates in accordance with the fourth. All are alike officers of the United States, and, in accordance with the provisions of the acts of 1894 and 1906, above quoted, all are alike entitled to the benefits of the advancement provided for in the last-mentioned act whenever otherwise qualified. The suggestion that there is no higher grade to which mates can be advanced appears to arise from some misunderstanding as to the purpose of the law. The act of 1906 does not say that the officers in question shall be advanced to another grade, but that they shall be placed on the retired list with the rank and retired pay of one grade above that actually held at the time of retirement. On April 8, 1899, Attorney-General Griggs gave an opinion (22 Op., 433) to your predecessor with regard to the construction of section 11 of the act approved March 3, 1899, and generally known as the "personnel act." In this opinion he held that, while officers of the Medical or Pay Corps could not be given a higher position in the service than that of medical director or pay director, respectively, they might have conferred upon them a higher rank and higher pay than those of the officers bearing such titles. In his words (p. 436):

"The highest officer in the Medical Corps is a 'medical director,' having the 'relative rank of captain.' It would not be possible to promote a medical director to a higher place in the Medical Corps, but it would be possible to confer upon him a higher rank than that of captain. And in my opinion that is what section 11 is intended to do. The two officers whose cases are now under discussion will be retired, respectively, as medical director and pay director, but with a higher relative rank on the retired list than that which they are entitled to in the active service—namely, rear-admiral. I see no difficulty in giving to section 11 such a construction, nor do I see any inconsistency or embarrassment that will arise in its operation."

I see no reason why this ruling should not cover the case under consideration. The mates in question will not obtain the grade of warrant officers, but they will have the rank and retired pay appurtenant to the lowest grade of such officers.

I therefore advise you that, in my opinion, the mates mentioned in your letter are entitled, in the discretion of the President, by and with the advice and consent of the Senate, to the benefit of the advancement provided in the case of retired officers under the circumstances enumerated in the act approved June 29, 1906; and, secondly, that, while the effect of such advancement may not be to place them in a different grade from that which they now hold, they will obtain the rank and retired pay belonging to the next higher grade in the service—namely, that of the lowest grade of warrant officers.

I remain, very respectfully, CHARLES J. BONAPARTE.

The SECRETARY OF THE NAVY.

The decision of the comptroller, based upon the foregoing opinion of the Attorney-General, and which necessitated the introduction of the bill, is as follows:

Mates: Retired; advanced on retired list, pay.

A mate with civil-war service was retired for age on September 26, 1899; following the reasoning of the Attorney-General in his opinion of October 15, 1907, all of which applies with equal force to section 11 of the personnel act as to the act of June 29, 1906, he is entitled, under said section 11, to "three-fourths the sea pay of the next higher grade," viz, that of the lowest grade of warrant officers, three-fourths of $1,200, the sea pay of a warrant officer during the first three years.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE TREASURY,
Washington, January 29, 1908.

CECIL S. BAKER,
Paymaster, U. S. Navy, U. S. Navy-Yard, Boston, Mass.

SIR: I have received your letter of the 13th ultimo requesting a decision, as follows:

"In consideration of the decision of the Attorney-General of the United States of October 15, 1907, that mates retired in accordance with the statute approved August 1, 1894, and enjoying the benefits of the act approved June 29, 1906, are entitled to the rank and retired pay belonging to the next higher grade, namely, that of the lowest grade of warrant officers, I have the honor to request that a decision be rendered on the following question, viz: To what rate of pay is William Jenney,

mate, United States Navy, retired and transferred to the retired list September 14, 1899, entitled under the Attorney-General's decision and the provisions of the following letter:

"'NAVY DEPARTMENT,
"'*Washington, D. C., November 26, 1907.*

"'SIR: The Department's order to you, dated September 14, 1899, notifying you that you would be transferred to the retired list of officers of the navy from the 26th day of September, 1899, in accordance with the provisions of section 1444 of the Revised Statutes, is so far modified that you will be regarded as having been retired from that date with the rank and three-fourths of the sea pay of the lowest grade of warrant officers, in accordance with the provisions of section 11 of the act of Congress approved March 3, 1899.'"

It appears from the Official Register of the Navy that William Jenney was a mate in the navy March 19, 1861; acting ensign November 27, 1863; honorably discharged January 11, 1866; appointed a mate in the navy December 6, 1869, and retired on account of reaching the age of 62 years on September 26, 1899, under section 1444 of the Revised Statutes.

Mate Jenney was one of the 28 mates in the navy August 1, 1894, to whom the act approved on that date (28 Stat., 212) applies. It is as follows:

"That the law regulating the retirement of warrant officers in the navy shall be construed to apply to the 28 officers now serving as mates in the navy, and the said mates shall be entitled to receive annual pay at the rates following: When at sea, $1,200; on shore duty, $900; on leave or waiting orders, $700: *Provided*, That nothing herein contained shall be construed to authorize any increase of pay for any time prior to the passage of this act."

Section 11 of the act of March 3, 1899 (30 Stat., 1007), provides:

"That any officer of the navy, with a creditable record, who served during the civil war, shall, when retired, be retired with the rank and three-fourths the sea pay of the next higher grade."

Mr. Jenney was notified of his retirement by the Secretary of the Navy by letter of September 14, 1899, as follows:

"Sir: On September 26, 1899, you will regard yourself transferred to the retired list of officers of the United States Navy, in accordance with the provisions of section 1444 of the Revised Statutes of the United States."

If Jenney is entitled to the benefit of the provisions of section 11 of the act of March, 1899, supra, for advanced rank and pay, he became so entitled upon his retirement, as no selection or discretion as to the matter is reposed by this statute in any person, unlike, in that respect, a provision in the act of June 29, 1906 (34 Stat., 554), giving a similar advancement for like reasons, as follows:

"That any officer of the navy not above the grade of captain who served with credit as an officer or as an enlisted man in the regular or volunteer forces during the civil war prior to April 9, 1865, otherwise than as a cadet, and whose name is borne on the Official Register of the Navy, and who has heretofore been, or may hereafter be, retired * * * may, in the discretion of the President, * * * be placed on the retired list of the navy with the rank and retired pay of one grade above that actually held by him at the time of retirement."

The Attorney-General rendered an opinion October 15, 1907, upon a request of the Secretary of the Navy to be advised as to whether mates who were among the 28 in the navy at the passage of the act of August 1, 1894, supra, are entitled to advancement under the last quoted law. (34 Stat., 554.) In his opinion the Attorney-General says, among other things:

"The act of August 1, 1894, mentioned in your letter, contains the language which follows:

"'That the law regulating the retirement of warrant officers in the navy shall be construed to apply to the 28 officers now serving as mates in the navy.'

"It seems, therefore, to be clear (1) that the mates in question are officers of the navy; (2) that they are neither commissioned nor warrant officers, but, with respect to the law regulating retirements, they are placed, by special statute, upon the same footing as warrant officers. * * *

"There is no doubt, I think, in view of the provisions of sections 1409 and 1410 of the United States Revised Statutes, that a person can be, at the same time, an officer of the navy and an enlisted man. * * * By article 2, section 2, clause 2, of the Constitution, 'officers of the United States' can be appointed legally (1) by the President, by and with the advice and consent of the Senate; (2) by the President alone; (3) by the courts of law; or (4) by the heads of departments. Commissioned officers of the navy are appointed in the first method, warrant officers in accordance with the second, and mates in accordance with the fourth. All are alike officers of the United States, and, in accordance with the provisions of the acts of 1894 and 1906 above quoted, all are alike entitled to the benefits of the advancement provided for in the last mentioned act whenever otherwise qualified. * * *

"* * * While the effect of such advancement may not be to place them in a different grade from that which they now hold, they will obtain the rank and retired pay belonging to the next higher grade in the service, namely, that of the lowest grade of warrant officers."

Following the reasoning of the Attorney-General in this opinion, all of which applies with equal force to section 11 of the personnel act, supra, as to the act of June 29, 1906, I am of opinion that Mate Jenney, if qualified with a creditable record (he had civil-war service), is entitled under the said section 11 to "three-fourths the sea pay of the next higher grade," viz, that of the lowest grade of warrant officers.

Five grades of sea pay are provided by section 1556 of the Revised Statutes for warrant officers, as follows:

"* * * during the first three years after date of appointment, when at sea, $1,200; * * * during the second three years after such date, when at sea, $1,300; * * * during the third three years after such date, when at sea, $1,400; * * * during the fourth three years after such date, when at sea, $1,600; * * * after twelve years from such date, when at sea, $1,800 * * *."

Mate Jenney is therefore entitled to three-fourths of $1,200, the sea pay of a warrant officer during the first three years after the date of his commission, that being the retired pay of a warrant officer of the lowest pay grade. See Rutherford *v.* United States. (18 Ct. Cl., 339.)

Respectfully,

L. P. MITCHELL,
Assistant Comptroller.

It appears that a bill (S. 5337) of like purport as H. R. 17059 was introduced in the Senate by Mr. HEYBURN on February 14, 1908, and was favorably reported from the Committee on Naval Affairs, March 30, 1908, by Mr. DICK, with amendments. Said bill and report are as follows:

A bill (S. 5337) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement.

Be it enacted, etc., That Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list of the navy with the rank and pay of one grade above that actually held by them at the time of retirement by reason of their creditable civil-war service, under the provisions of the acts of Congress approved March 3, 1899, and June 29, 1906, shall be credited with all their prior actual service, either as officers or enlisted men, in the Army, Navy, and Marine Corps, in computing their pay on the retired list from the date of their advancement under the provisions of said acts.

[Senate Report No. 434, Sixtieth Congress, first session.]

WILLIAM JENNEY AND EIGHT OTHER RETIRED MATES OF NAVY.

Mr. DICK, from the Committee on Naval Affairs, submitted the following report, to accompany S. 5337:

The Committee on Naval Affairs, to whom was referred the bill (S. 5337) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement, having considered the same, report thereon with a recommendation that it pass with the following amendments:

In line 3 of the bill strike out the word "mate" and insert the word "mates;" in line 3, after the word "Jenney," insert the following: "William W. Beck, Thomas W. Bonsall, William Boyd, John Griffin, James Hill, Frank Holler, Robert Robinson, and Silas T. C. Smith;" and in line 4 strike out the words "and the eight other retired mates."

The bill has the approval of the Navy Department, as will appear by a report from the Secretary of the Navy to the chairman of the House Committee on Naval Affairs on a like bill introduced in the House, which is herewith appended.

The statement of one of the proposed beneficiaries is also made a part of this report.

NAVY DEPARTMENT,
Washington, February 21, 1908.

SIR: I have the honor to acknowledge receipt of your letter of the 14th instant, requesting the department's views with reference to a bill (H. R. 17059) "For the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement."

Inasmuch as the Comptroller of the Treasury has held that the mates in question are entitled only to the lowest pay of warrant officers and not to the pay of warrant officers with the same length of service, the effect of the advancement provided for by the acts of March 3, 1899, and June 29, 1906, will be to give these officers no greater pay than that they previously received.

Favorable consideration of the bill H. R. 17059 is therefore recommended, for the purpose of extending to these mates the benefits of increased compensation on advance in rank, as was obviously intended by the acts of March 3, 1899, and June 29, 1906.

Very respectfully,

V. H. METCALF, *Secretary.*

Hon. GEORGE EDMUND FOSS,
Chairman Committee on Naval Affairs,
House of Representatives.

NAVY DEPARTMENT,
Washington, March 27, 1908.

SIR: The receipt is acknowledged of your letter of the 25th instant, inclosing a bill (S. 5337) for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates, etc., and requesting, for the Committee on Naval Affairs, the names of the other retired mates who are now living be sent you.

They are the following: William W. Beck, Thomas W. Bonsall, William Boyd, John Griffin, James Hill, Frank Holler, Robert Robinson, Silas T. C. Smith.

Very respectfully,

V. H. METCALF,
Secretary.

The CHAIRMAN COMMITTEE ON NAVAL AFFAIRS,
United States Senate.

---

196 SHURTLEFF STREET,
Chelsea, Mass., February 28, 1908.

DEAR SIR: I beg to request that you will kindly cause to be reported and passed immediately Senate bill 5337, for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement.

I was nominated and confirmed this session of Congress to be a mate on the retired list with the rank and pay of the next higher grade, but the comptroller rules that I do not get any higher pay, although everyone else benefited under the act of June 29, 1906, receives increased rank and pay by reason of civil-war service, and it was the intention of the law that I and my associates should likewise receive this increase.

I entered the service in 1856, at the breaking out of the rebellion, and was appointed master's mate; and in 1864 was appointed an acting ensign; served as such until October, 1868, when I received my honorable discharge. I reentered the service in 1870 as a mate. I also served in the Mexican war in 1847.

Most of these mates are about 80 years of age, and unless this law goes through immediately we will be dead before it can do us any good.

The bill has the recommendation of the Navy Department.

Trusting that this letter will appeal to you, I am,

Very truly, yours,

WM. W. BECK,
Mate, United States Navy, retired.

Hon. EUGENE HALE,
United States Senate, Washington, D. C.

The bill (S. 5337) passed the Senate on March 31, 1908, and was referred to the Committee on Claims and later to the Committee on Naval Affairs of the House, but was not reported because of the fact that the bill which I had introduced was already on the calendar of the House.

When H. R. 17059 went over on the objection of Mr. MANN, on March 7, 1908, I notified Mr. Clarence W. DeKnight. As already explained, he was the attorney for these mates, and had been successful in securing the opinion of the Attorney-General to the effect that they were officers and thereby entitled to the rank and pay of the next higher grade. At the suggestion of Mr. DeKnight I requested the Navy Department to refer the matter back to the Attorney-General for explanation of the words "lowest grade of warrant officers," which the Navy Department finally consented to do. The correspondence between the department and myself on this subject is as follows:

MARCH 17, 1908.

Hon. VICTOR HOWARD METCALF,
Secretary of the Navy, Washington, D. C.

DEAR MR. SECRETARY: Referring to the department's letter of March 11, 1908, to me, in the case of Mate William Jenney and others, I beg to suggest that a letter be written by the department to the Attorney-General, requesting to be informed if, in his opinion, in the case of the mates where he uses the words "lowest grade of warrant officers," he means the "lowest pay grade."

To quote from your letter:

"As a matter of fact, there is but one grade of warrant officers, and not two, as is the case in the grade of lieutenant or rear-admiral; so the comptroller decided that they should only receive three-quarters of the sea pay of the lowest pay grade of warrant officers who, it happens, receive exactly the same rate of pay as did the mates under consideration. The action of the comptroller therefore practically nullified the intent of the law which was beneficial in character."

It is reasonable to suppose that the Attorney-General did not mean to infer the lowest pay grade in his decision, and, if he should so state, it would probably put the comptroller in position to reverse his decision, which, from the department's letter, it appears is unjust and practically nullifies the intent of the law.

I make this suggestion because of the further fact that further on in your letter to me you state:

"The department believes that it was intended by the act to give the persons affected by it some benefit, and if these mates received three-quarters of the sea pay of a warrant officer of corresponding length of service the object would be accomplished. But in view of the comptroller's decision the act is rendered nugatory as far as these mates are concerned."

I think that these facts, if expressed to the Attorney-General, would bring the matter clearly to his attention.

Very truly, yours,

HIRAM R. BURTON.

NAVY DEPARTMENT,
Washington, March 26, 1908.

MY DEAR MR. BURTON: The receipt is acknowledged of your letter of the 17th instant, suggesting that information be requested of the Attorney-General concerning the construction to be placed upon the expression used in his opinion of October 15, 1907, namely, "the lowest grade of warrant officers."

A reference to Twenty-fifth Opinions of the Attorney-General, pages 302, 303, 304, indicates that in requesting an opinion the concurrent action of the comptroller should be secured, under the circumstances surrounding the present case. Accordingly, and agreeably to your request, a letter has been addressed to the comptroller, together with a memorandum on the subject, embodying the department's views, requesting his concurrence in the action proposed.

Very respectfully,

V. H. METCALF, *Secretary.*

Hon. H. R. BURTON,
House of Representatives.

When the matter was again before the Attorney-General, Mr. DeKnight made further argument, with the result that on April 18, 1908, the Attorney-General rendered an opinion again sustaining Mr. DeKnight's position. Said opinion (26 op., 600) is as follows:

DEPARTMENT OF JUSTICE,
April 18, 1908.

SIR: In your letter of April 1, 1908, with its inclosures, you informed me that a portion of the opinion of this department dated October 15, 1907 (ante, p. 433), is construed in a way which, perhaps, may do injustice to certain officers of the navy, there referred to, and you ask my opinion upon the following questions:

"1. Whether the expression 'the lowest grade of warrant officers' should be restricted to the lowest-pay grade?

"2. Whether a retired mate in the navy belonging to the category referred to in the Attorney-General's opinion of October 15, 1907, may be credited with his prior service in the navy at the date of his retirement in determining his classification for pay?

"3. When did Mate William Jenney, U. S. Navy, retired, become entitled to advancement, whether at the date of his retirement, September 26, 1899, or from the date of the department's notification to him of November 26, 1907?"

Your first question is answered in the negative. It was not the intention, in that opinion, to define any particular rate of pay which mates should receive on retirement, or to say more than that they were entitled, under the provision referred to, to the rank and retired pay of the next higher grade. The question of the particular rate of pay to which they were entitled was not before me and was not considered. There was nothing to inform me then how many grades there were of warrant officers, or whether more than one; but, following the uniform rule for the promotion of the lower officers of the navy, that is, by a single step from the lower to the next higher grade, I used the expression referred to in the opinion. And if, as appears to be the case, there is but one grade of warrant officers, the expression used refers to that, as being both the lowest and highest grade.

The questions now submitted are different, in that they inquire as to this rate of pay, and my views on this subject are expressed in the following answer to your second and third questions. Referring to these questions, section 11 of the navy personnel act of March 3, 1899 (30 Stat., 1007), provides for the retirement of certain officers with the rank and three-fourths the sea pay of the next higher grade. As Mate Jenney comes within the description of the officers there referred to, and was retired September 26, 1899, he should have been retired under that section, as of that date, with three-fourths the sea pay of a warrant officer, the next higher grade.

But, what is the sea pay of a warrant officer? By reference to section 1556, Revised Statutes, we find that this is a variable quantity, ranging by varying sums from $1,200 to $1,800 per annum by three-year periods of service; and that for the first three years a warrant officer gets $1,200; and after twelve years' service, $1,800 per annum, with other rates for intermediate three-year periods. Either one of these may, in one sense, be said to be the sea pay of a warrant officer; but neither one alone can, in any proper sense, be said to be the sea pay of that grade.

It is impossible to give to these mates, on retirement, three-fourths the sea pay of warrant officers, unless we give them just that amount, and upon the same terms and conditions affecting the amount as those affecting the pay of warrant officers; that is, if the amount of a warrant officer's pay depends upon certain terms or conditions, we can not give a mate three-fourths of the same pay, unless upon the same terms and conditions. If it is not increased by the same facts or if it is charged with greater burdens, it is not the same pay. If a warrant officer's pay is increased by length of service, instead of being fixed and stable, it is impossible to give mates three-fourths of the same pay unless that also is affected by corresponding length of service. The purpose of this section, when applied to this class of officers, was not to retire these mates with three-fourths of the lowest sea pay given to a warrant officer, and it was not so said, but was to give them three-fourths the varying sea pay of warrant officers upon the same conditions. The purpose of the section was to give to the retiring officer, broadly and generally, three-fourths of the compensation which, in the higher grade, is given for service at sea. If that is fixed and stable, so is that of the retiring officer. If it varies according to length of previous service, so also does the three-fourths thereof given to the latter officer, and from the same cause; so that the retiring officer receives three-fourths of the same pay that is given in the higher grade for sea service by one having the same length of previous service.

If Congress had intended either one of these particular rates of pay as the basis of this retired pay, it is certain that it would have said so. As it is not so said, it must be taken that it was not so intended. And this is made substantially certain, also, by the language of this section. It provides that the officers referred to shall be retired "with the rank and three-fourths the sea pay of the next higher grade." In this instance the sea pay of the "next higher grade" varies with three-year periods of service.

But it is this same varying rate of pay "of the next higher grade," and not any particular one of them, which is made the basis of the retired pay there referred to. The way to give these mates three-fourths of this varying sea pay of the next higher grade is, of course, plain. If one of them has had three years' service he gets three-fourths the pay of a warrant officer who has had that length of service. If he has had twelve years' service—and Mate Jenney has had much more than that—he get three-fourths the pay of a warrant officer with the same service. In short, the mate, being entitled to the rank and three-fourths the sea pay of warrant officers, should receive three-fourths of the same pay which they would receive if they were warrant officers, instead of mates, all other circumstances connected with them remaining the same. I know of no other way by which to give to retired mates three-fourths of the sea pay of the next higher grade.

It follows that Mate Jenney should have retired September 26, 1899, with three-fourths the sea pay of a warrant officer with twelve years of service, and that his advancement should be at and from that date and not from the date of the department's letter to him, November 26, 1907, referred to in your question.

But your questions refer more specifically to retirements under the act of June 29, 1906 (34 Stat., 554); and as this act refers as well to officers who had then been retired as to subsequent retirements, it is quite possible that Mate Jenney and others retired under section 11 of the personnel act may be retired under the act of 1906, if for any reason that is thought desirable.

As far as concerns any question here, the only difference in the pertinent provisions of the two acts is the substitution in the later act of the words "retired pay" for "three-fourths the sea pay" of the next higher grade. This would give to mates on retirement the retired pay of warrant officers, the next higher grade.

The act of March 3, 1873 (17 Stat., 547), provides, in substance, that the retired warrant officers, with other retired officers, shall receive "75 per cent of the present sea pay of the grade or rank which they held at the time of retirement."

This sea pay of warrant officers is fixed as above shown, varying from $1,200 to $1,800 per annum. So that if Mate Jenney, after being retired under section 11 of the personnel act, were now retired under the act of June 29, 1906, this would make no difference in the amount of his retired pay, for under the former act he would receive three-fourths the sea pay of a warrant officer and under the other he would receive the whole of the retired pay of warrant officers, which is three-fourths the sea pay of such officer.

And, with the changes made necessary by the changed language of the later act, what is said above as to the length of previous service in determining the rate of pay of warrant officers and, therefore, the retired pay of mates under section 11, referred to, is equally applicable in the cases of mates retired under the act of 1906. And they receive the retired pay of the next higher grade—that is, the retired pay of a warrant officer with the same length of previous service.

This, it is believed, covers the ground embraced in your second and third questions. Specifically, your second question is answered in the affirmative. And as to the third, I have to advise you that Mate Jenney, under the facts stated, was entitled to advancement from his retirement, September 26, 1899, and not from the date of the department's letter to him of November 26, 1907.

Respectfully,

CHARLES J. BONAPARTE.

The SECRETARY OF THE NAVY.

As the result of the foregoing opinion the comptroller reversed his decision of January 29, 1908. His second decision (14 Comp., 717) is as follows:

APRIL 28, 1908.

By your reference of February 12, 1908, of a communication from the Paymaster-General of the Navy you requested reconsideration of my decision of January 29, 1908, in the case of Mate William Jenney, U. S. Navy, retired, one of the 28 mates in the navy August 1, 1894, and entitled, by authority of an act of that date (28 Stat., 212), to

retirement under the laws regulating the retirement of warrant officers. In this decision it was held that the said Mate Jenney, having been retired under section 11 of the navy personnel act (act of March 3, 1899, 30 Stat., 1007), was entitled to three-fourths the sea pay of the next higher grade; that the pay of the next higher grade was that of a warrant officer in the first three years after date of appointment, and that he became so entitled on the date of his retirement.

You were informed by my letter of March 7, 1908, that a bill was before Congress providing that Mate Jenney and the other mates in a similar status shall be allowed credit for their previous service in computing their retired pay, and that it was contrary to the rule of this office to consider claims which were at the time pending before Congress.

By your letter of March 26, 1908, you suggested that the question as to the right of these retired mates to credit for longevity service be submitted to the Attorney-General, and invited my concurrence in the proposed submission. In my reply of March 28, 1908, I concurred in your request to the Attorney-General for his opinion and suggested an enlargement of the question by asking his opinion as to when Mate Jenney became entitled to advancement—whether at the date of his retirement, September 14, 1899, or the date of the department's notification to him, November 26, 1907.

In response to your request, the Attorney-General has rendered an opinion, dated April 18, 1908, and has held that the retired mates who receive the retired pay of warrant officers are entitled, in computing that pay, to be credited with their length of service. He says:

"The way to give these mates three-fourths of this varying sea pay of the next higher grade is, of course, plain. If one of them has had three years' service, he gets three-fourths the pay of a warrant officer who has had that length of service. If he has had twelve years' service—and Mate Jenney has had much more than that—he gets three-fourths the pay of a warrant officer with the same service. In short, the mates, being entitled to the rank and three-fourths the sea pay of warrant officers, should receive three-fourths of the same pay which they would receive if they were warrant officers instead of mates, all other circumstances connected with them remaining the same. I know of no other way by which to give to retired mates three-fourths of the sea pay of the next higher grade.

"It follows that Mate Jenney should have been retired September 26, 1899, with three-fourths the sea pay of a warrant officer with twelve years' service, and that his advancement should be at and from that date and not from the date of the department's letter to him, November 26, 1907, referred to in your question."

The opinion of the Attorney-General will be followed by this office, and Mate William Jenney is therefore entitled to retired pay at the rate of $1,350 per annum, that being three-fourths of the sea pay of a warrant officer after twelve years' service, the highest pay of a warrant officer, Jenney having had thirty years' service at the time of his retirement, and that he became entitled to that pay on the date of his actual retirement.

To the SECRETARY OF THE NAVY.

The effect of this decision was to give to the mates for whom I had introduced the bill that to which they were entitled and made it unnecessary for the bill to become a law. Hence, when the bill was reached at this session, it was passed over, and on February 5, 1908, when it was reached again, the bill was laid upon the table, on motion of Mr. ELLIS of Oregon, who made the following explanation:

[Extract from CONGRESSIONAL RECORD, vol. 43, pp. 1946-1947, February 5, 1909.]

MATE WILLIAM JENNEY.

The Clerk reported the bill (H: R. 17059) for the relief of Mate William Jenney, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement.

Mr. ELLIS of Oregon. Mr. Speaker, I ask unanimous consent that this bill may lie on the table. A recent ruling of the department has given all that can be given under the bill, and hence there is no necessity for its passage.

The SPEAKER. Is there objection to the request of the gentleman from Oregon that the bill do lie on the table? [After a pause.] The Chair hears none, and it is so ordered.

I am very glad indeed that these mates have been accorded the consideration to which they were entitled, as, in my opinion, they are among the most deserving officers on the retired list of the navy.

But only Mates Beck, Bonsall, Boyd, Griffin, Hill, Holler, Robinson, and S. T. C. Smith were accorded by the Navy Department the rank and pay of the next higher grade, under the opinions of the Attorney-General and decisions of the comptroller heretofore cited.

The following letter of the Navy Department affected the above-mentioned mates only:

NAVY DEPARTMENT,
Washington, November 5, 1907.

SIR: Referring further to your letter of July 12, 1907, relative to the right of certain mates on the retired list of the navy to advancement under the provisions of the act of June 29, 1906, I have to advise you that the Attorney-General, in an opinion rendered October 15, 1907, held that mates retired in accordance with the statute approved August 1, 1894 (28 Stat., 212), are entitled, in the discretion of the President, by and with the advice and consent of the Senate, to the benefit of advancement provided by the act approved June 29, 1906, under the circumstances enumerated in that act, and that the effect of such advancement will be to give them the rank and retired pay appurtenant to the lowest grade of warrant officers.

Appropriate instructions were issued to the Bureau of Navigation on the 16th ultimo, in accordance with the Attorney-General's opinion.

Very respectfully,

V. H. METCALF, *Secretary.*

Hon. THOMAS S. BUTLER,
House of Representatives, Washington, D. C.

In order to secure increased rank and pay for Mate Jenney it was necessary for Mr. DeKnight to prepare and submit an additional brief, as follows:

NOVEMBER 11, 1907.

To the honorable SECRETARY OF THE NAVY.

SIR: On behalf of Mate William Jenney, U. S. Navy, retired, I beg to submit that when he was retired, on September 26, 1899, he should have been retired with a higher rank and pay than that of mate.

It appears from the Naval Register that Mate Jenney was retired on attaining the age of 62 years, under the act of December 21, 1861, and amendments, section 1444, Revised Statutes. Said act reads as follows:

"When any officer below the rank of vice-admiral is 62 years old, he shall, except in the case provided in the next section, be retired by the President from active service."

Under the further provision of law, to wit, the act of March 3, 1899, Mate Jenney should, when retired, have been retired with the rank and three-fourths of the sea pay of the next higher grade. The act of March 3, 1899, reads as follows:

"That any officer of the navy with a creditable record, who served during the civil war, shall, when retired, be retired with the rank and three-fourths the sea pay of the next higher grade."

It appears from an indorsement, under date of October 1, 1907, put upon the papers of Mate Griffin, retired, in referring his case to the Attorney-General for an opinion, that the Bureau of Navigation stated it had always regarded mates as enlisted men. But it further appears that the Attorney General, in his opinion of October 15, 1907, in Mate Griffin's case, holds that—

"By Article II, section 2, clause 2 of the Constitution 'officers of the United States' can be appointed legally (1) by the President, by and with the advice and consent of the Senate; (2) by the President alone; (3) by the courts of law; or (4) by the heads of departments. Commissioned officers in the navy are appointed in the first method, warrant officers in accordance with the second, and mates in accordance with the fourth. All are alike officers of the United States."

Continuing, the Attorney-General says:

"On April 8, 1899, Attorney-General Griggs gave an opinion to your predecessor with regard to the construction of section 11 of the act approved March 3, 1899, and generally known as the 'personnel act.' In this opinion he held that, while officers of the Medical or Pay corps could not be given a higher position in the service than that of medical director or pay director, respectively, they might have conferred upon them a higher rank and higher pay than those of the officers bearing such titles."

In his words—

"The highest officer in the Medical Corps is a medical director, having relative rank of a captain. It would not be possible to promote a medical director to a higher place in the Medical Corps, but it would be possible to confer upon him a higher rank than that of captain. And, in my opinion, that is what section 11 is intended to do. The two officers whose cases are now under discussion will be retired, respectively, as medical director and pay director, but with a higher relative rank on the retired list than that which they are entitled to in the active service—namely, rear-admiral. I see no difficulty in giving to section 11 such a construction, nor do I see any inconsistency or embarrassment that will arise in its operation."

In view of Mate Jenney's civil-war record, it is respectfully submitted that the only reason why the department did not, when retiring Mate Jenney, retire him with the rank and three-fourths the sea pay of the next higher grade, was (1) because it did not regard him as an officer, and (2) because it believed that a mate could not be placed on the retired list with the rank and pay of one grade above that actually held at the time of retirement, for the reason that on the active list he could not promote to a higher place. The opinion of the Attorney-General, dated October 15, 1907, shows conclusively (1) that a mate is an officer; and (2) that, as in the case of a medical or pay director, who likewise could not promote to a higher place on the active list, a mate is entitled to be placed on the retired list with the rank and pay of the grade next above that held by him at the time of retirement.

The case of Mate Jenney is unlike that of the other mates on the retired list. He is the only mate retired for age since March 3, 1899, and therefore the only one who comes within the provisions of the act of that date. Possessing a creditable civil-war record, this act entitles him to be placed upon the retired list with increased rank and pay from the date of his retirement, to wit, September 26, 1899.

The Attorney-General, in his opinion of October 15, 1907, holds that the grade next above that of mate is that of the lowest grade of warrant officers.

Under the provisions of the act of June 29, 1906, mates with civil-war record who were retired prior to March 3, 1899, are entitled to be placed on the retired list with the rank and pay next above that held by them at the time of retirement, but then only in the discretion of the President, by and with the advice and consent of the Senate.

Mate Jenney is entitled under the provisions of the act of March 3, 1899, which reads as follows:

"That any officer of the navy, with a creditable record, who served during the civil war, shall, when retired, be retired with the rank and three-fourths the sea pay of the next higher grade."

It will be observed that this act is mandatory.

It is respectfully requested that the record of retirement of Mate Jenney be corrected, and that his name be entered upon the Naval Register as retired September 26, 1899, with the rank and three-fourths the sea pay of the next higher grade, that of the lowest grade of warrant officer.

Very respectfully,

CLARENCE W. DEKNIGHT,
Attorney for Mate William Jenney.

DECEMBER 3, 1907.

To the honorable SECRETARY OF THE NAVY.

SIR: On November 11 I addressed a communication to you on behalf of Mate William Jenney, U. S. Navy, retired, setting forth the reasons why he should have been retired with a higher rank and pay than that of mate.

Kindly inform me what action, if any, has been taken in this matter.

Very truly, yours,

CLARENCE W. DEKNIGHT,
Attorney for Mate William Jenney.

NAVY DEPARTMENT,
Washington, December 9, 1907.

SIR: Replying to your letter of the 3d instant, asking what action, if any, has been taken with respect to the claim of Mate William Jenney, U. S. Navy, retired, that his record should be corrected so as to show his retirement with the rank and three-fourths the sea pay of the next higher grade, you are advised that the papers were sent to the Bureau of Navigation, on the 22d ultimo, with the following indorsement:

"Returned to the Bureau of Navigation.

"It appears that Mate William Jenney 'served during the civil war,' and that he was placed on the retired list of officers of the navy September 26, 1899, under authority of the act of August 1, 1894 (28 Stat., 212). The Attorney-General has held (opinion of October 15, 1907) that mates so retired are officers of the navy and, in that respect, eligible to advancement on the retired list under the provisions of the act of June 29, 1906 (34 Stat., 554).

"Under these circumstances it would appear that if Mate Jenney's record was 'creditable' at the date of his retirement he should have been 'retired with the rank and three-fourths the sea pay of the next higher grade,' in pursuance of section 11 of the 'personnel act' (act of March 3, 1899, 30 Stat., 1007).

"The bureau will take appropriate action in the premises."

Very respectfully,

V. H. METCALF, *Secretary.*

Mr. CLARENCE W. DEKNIGHT,
Attorney at Law, Hibbs Building, Washington, D. C.

Mr. DeKnight then turned his attention to demonstrating that Mates Callander, Fuller, Neilsen, and Vennard had been erroneously retired under section 17 of the navy personnel act.

This section reads as follows:

That when an enlisted man or appointed petty officer has served as such thirty years in the United States Navy, either as an enlisted man or petty officer, or both, he shall, by making application to the President, be placed on the retired list hereby created, with the rank held by him at the date of retirement; and he shall thereafter receive 75 per cent of the pay and allowances of the rank or rating upon which he was retired: *Provided*, That if said enlisted man or appointed petty officer had active service in the Navy or in the Army or Marine Corps, either as volunteer or regular, during the civil or Spanish-American wars, such war service shall be computed as double time in computing the thirty years necessary to entitle him to be retired: *And provided further*, That applicants for retirement under this section shall, unless physically disqualified for service, be at least 50 years of age.

Mr. DeKnight contended that they should have been retired under section 1444, Revised Statutes, and section 11 of the navy personnel act.

His efforts were opposed by the Navy Department, as may be seen by the following communications:

NAVY DEPARTMENT,
Washington, February 7, 1908.

SIR: Referring to your communication of December 28, 1907, on behalf of Mate Harold Neilsen, U. S. Navy, retired, and to the department's letter of the 4th instant, I have to inform you that the Bureau of Navigation has been advised that the provisions of section 11 of the personnel act, so called, are not considered to apply to the case of Mate Neilson.

Very respectfully,

V. H. METCALF, *Secretary.*

Mr. CLARENCE DEKNIGHT,
Hibbs Building, Washington, D. C.

DEPARTMENT OF THE NAVY, BUREAU OF NAVIGATION,
Washington, D. C., December 10, 1907.

SIR: In reply to your letter of the 6th instant, requesting that the name of the late Mate Henry C. Fuller, U. S. Navy, retired, be submitted to the Senate for an advancement of one grade in accordance with the provisions of an act of Congress approved June 29, 1906, you are advised that for an officer to be eligible for advancement under the provisions of the law referred to he must have been transferred to the retired list on account of one of the following reasons: (1) "On account of wounds or disability incident to the service," (2) "on account of age," (3) "or after forty years' service."

Mate Fuller was transferred to the retired list after the completion of thirty years' service, in accordance with the provisions of section 17 of the navy personnel act, approved March 3, 1899. As he did not retire on account of one of the reasons above given, he is not entitled to advancement under the provisions of the act of June 29, 1906, which reads as follows:

"That any officer of the navy not above the grade of captain who served with credit as an officer or as an enlisted man in the regular or volunteer forces during the civil war prior to April 9, 1865, otherwise than as a cadet, and whose name is borne on the Official Register of the Navy, and who has heretofore been or may hereafter be retired on account of wounds or disability incident to the service, or on account of age, or after forty years' service, may, in the discretion of the President, by and with the advice and consent of the Senate, be placed on the retired list of the navy with the rank and retired pay of one grade above that actually held by him at the time of retirement: *Provided*, That this act shall not apply to any officer who received an advance of grade at or since the date of his retirement or who has been restored to the navy and placed on the retired list by virtue of the provisions of a special act of Congress."

Very respectfully,

C. McR. WINSLOW,
Assistant to Bureau.

CLARENCE W. DEKNIGHT,
Attorney at Law, Hibbs Building, Washington, D. C.

Again I assisted in getting the Secretary of the Navy to refer the matter to the Attorney-General for opinion, as may be seen by the following correspondence:

HOUSE OF REPRESENTATIVES,
Washington, May 7, 1908.

Hon. TRUMAN H. NEWBERRY,
Acting Secretary of the Navy, Washington, D. C.

DEAR MR. SECRETARY: Just before leaving for my home in Delaware on May 1, I signed, and am under the impression that I mailed to you, a letter requesting that you refer the cases of Mates Fuller, Neilsen, Vennard, and Callander to the Attorney-General for an opinion as to their status under section 11 of the navy personnel act. Inasmuch as I have not received any acknowledgment, I believe now that I probably did not mail the letter.

It seems that the Attorney-General, on April 18, 1908, rendered an opinion explanatory of his opinion of October 15, 1907, relative to certain retired mates, and as a result the comptroller has reversed himself, and in computing their pay has given them credit for their prior service. It appears also that the cases of Mates Fuller, deceased, Neilsen, Vennard, and Callander were not before the Attorney-General for opinion, and I therefore request that you will kindly cause their cases to be sent to him for opinion, so that his opinion may be rendered in time for the auditor to act upon their cases in season to certify any amount that may be found due them to Congress for appropriation before adjournment.

I believe it only an act of justice that these mates should have their status passed upon by the Attorney-General the same as in the case of the other mates.

These officers were retired under section 17 of the personnel act, and it would seem, following the opinion of the Attorney-General, that they are entitled to be retired under section 11 of that act, which provides:

"That any officer of the navy, with a creditable record, who served during the civil war, shall, when retired, be retired with the rank and three-fourths the sea pay of the next higher grade."

The act of August 1, 1894, provided "that the law regulating the retirement of warrant officers of the navy shall be construed to apply to the 28 officers now serving as mates in the navy," and these mates were among the number. In the absence of any specific provision repealing this law with reference to these mates, it would seem that it was in effect at the time of their retirement.

The Attorney-General having held in his opinion of October 15, 1907, that a mate could be both an officer and enlisted man, it would seem only fair to apply both beneficial acts to these mates, especially in view of the fact that nowhere does it appear that there was any intention to repeal the act of August 1, 1894, as to them, and it is probable that under existing law they are entitled to the rank and pay of the next higher grade.

These mates having served honestly and faithfully during the civil war, and so far as known have a creditable record, it is probable that Congress intended that they should receive the benefits for such service during the war of the rebellion.

Thanking you in advance for your prompt attention to this matter, early presentation of which has been delayed by reason of my absence from the city, I am,

Very truly, yours,

H. R. BURTON.

NAVY DEPARTMENT, *Washington, May 12, 1908.*

SIR: The receipt is acknowledged of your letter of the 7th instant, with an inclosed brief, relative to the cases of Mates Fuller, Nielsen, Vennard, and Callander. This is the first letter that has reached the department concerning these individuals.

In reply I send herewith a copy of a memorandum covering the question as applicable to Mate Harold Nielsen, which was sent to the Bureau of Navigation on February 6, 1908. While the department desires to do whatever is possible in any case that appears to be doubtful, it does not seem that this matter comes within that category, and it is not believed that any other conclusion can properly be arrived at other than the one set forth in the accompanying memorandum. No objection, however, would be raised to appropriate legislative action having in view the application of the beneficial statutes of March 3, 1899, or of June 29, 1906, to the four mates above mentioned.

Very respectfully,

TRUMAN H. NEWBERRY,
Acting Secretary.

Hon. H. R. BURTON,
House of Representatives.

MAY 13, 1908.

Hon. TRUMAN H. NEWBERRY,
Acting Secretary of the Navy.

DEAR MR. SECRETARY: I am in receipt of your letter of the 12th instant relative to the case of Mates Fuller, Nielsen, Vennard, and Callander. I have carefully considered the accompanying memorandum, and it seems to me that there is very grave doubt concerning the question involved, so much so that I would be glad if you could see your way clear to ask the opinion of the Attorney-General in this matter.

I gather that these mates were retired in conformity with the ruling of the department; that they were only entitled to be retired under section 17 of the personnel act, the same as enlisted men of the navy, although since the Attorney-General has held they are officers, I do not think that their case should be prejudiced by their accepting the views of the department at the time and going on the retired list under said section. I think that they should have the benefit of section 11, and it is my opinion, after considering the matter very carefully, that they would seem to be entitled to it.

It will be impossible to pass a bill for their relief at this session of Congress, and it is a matter of delay for a year at least before they can receive any benefits. Meanwhile, if the Attorney-General should hold that the department was in error, why, they could have their cases corrected and receive the benefits to which, in my opinion, they would seem to be entitled, and I would be spared the necessity of burdening Congress with the passage of additional legislation for the navy, of which it seems there has been a great deal in the last few years.

It will be remembered that in the case of Mate Jenney and the eight other mates the department held that they were not entitled to the benefits of section 11 or of the act of June 29, 1906, and it was only after persistent effort that the department was induced to call upon the Attorney-General for opinion, with the result that he decided that they were entitled. Furthermore, that the comptroller refused to put a proper construction upon the opinion of the Attorney-General, and when the matter was again referred to him he decided that the comptroller was in error. In both cases, therefore, where the Attorney-General was called upon he expressed the opinion that these departments had been in error. It is not improbable, therefore, that error may exist with reference to these four mates, and it would seem to be

only fair that the Attorney-General should be asked to pass upon their status, so that further legislation may be avoided if possible; or, if legislation is found to be required the opinion of the Attorney-General in these specific cases may be cited and we may not again be put in the position of proceeding with legislation concerning which, if the Attorney-General had first been called upon to express an opinion, it would have been found unnecessary.

I think you will agree with me that no harm can be done in referring the matter to the Attorney-General for opinion, while much good may come therefrom.

Trusting that you will therefore reconsider this matter, I am,

Very truly, yours,

HIRAM R. BURTON.

NAVY DEPARTMENT,
Washington, May 15, 1908.

MY DEAR MR. BURTON: The receipt is acknowledged of your letter of the 13th instant, in which you ask that the cases of Mates Fuller, Neilsen, Vennard, and Callandar be referred to the Attorney-General for his opinion as to whether they are entitled to the benefits of the provisions of section 11 of the act of March 3, 1899, or those of the act of June 29, 1906, as in the case of Mate Jenney and others.

In reply I have to inform you that the opinion of the Attorney-General will be requested, as you suggest.

Very respectfully,

TRUMAN H. NEWBERRY,
Acting Secretary.

The Hon. H. R. BURTON,
House of Representatives.

On the matter reaching the Attorney-General's office, Mr. De Knight made an extended argument, and on June 5, 1908 (26 Op., 615), the Attorney-General rendered an opinion again sustaining Mr. DeKnight's position, said opinion being as follows:

DEPARTMENT OF JUSTICE,
June 5, 1908.

SIR: I have the honor to respond to the request contained in your note of May 26, 1908, for an opinion upon the case there stated, in substance as follows:

Mate Neilsen, retired, served as an enlisted man in the navy from January 22, 1862, to February 9, 1865, and from February 20, 1866, to October 4, 1869, and as a mate from March 29, 1870, until retired. He was retired March 31, 1899, under section 17 of the personnel act of March 3, 1899, upon his own application, after thirty years' service. And the question which you submit is "Whether * * * Mate Neilsen is not entitled to advancement to the next higher grade under the provisions of section 11 of the personnel act or the act of June 29, 1906; and if so, as to the date from which he is entitled to such advancement."

It is assumed that by the above expression, "the next higher grade," is meant the rank and pay of the next higher grade, as such officers are not advanced in grade on their retirement.

Much of what is here involved is covered by the two opinions of this department upon a similar subject, under dates of October 15, 1907, and April 18, 1908.

Following the ruling in The United States *v.* Fuller (160 U. S., 593, 595), it was held in those opinions that mates in the navy were officers within the meaning of section 11 of the navy personnel act and of the act of June 29, 1906 (34 Stat., 554).

As Mate Neilsen was retired March 31, 1899, he should have been retired under the former section, with the rank and three-fourths the sea pay of the next higher grade.

The Navy Department then held that Mate Neilsen could not be retired under section 11 of that act, but was entitled to be retired as an enlisted man under section 17 of that act, he having had more than thirty years of service in the navy, and he was thus retired upon his own application and with the rank he then held and three-fourths of the pay he was receiving at retirement.

The question to be determined is as to the effect of this retirement upon the right of Mate Neilsen to be now retired, as of some date, under section 11 of the personnel act or the act of June 29, 1906.

That act provides that "any officer of the navy not above the grade of captain who served with credit * * * during the civil war * * * and who has heretofore been, or may hereafter be, retired * * * may, in the discretion of the President * * * be placed on the retired list of the navy with the rank and retired pay of one grade above that actually held by him at the time of retirement."

The higher grade thus referred to is that of warrant officer, and the retired pay of that grade was 75 per cent of the sea pay of the grade, varying in amounts by three-year periods of service. (Act of March 3, 1873, 17 Stat., 547; and opinion of April 18, 1908, 26 op., 600.) Since the above act of June 29, 1906, embraces both officers who were then retired and those thereafter retired, Mate Neilsen, if otherwise entitled, may be retired under that act notwithstanding his former retirement.

I do not think that the retirement of Mate Nielsen under section 17 of the personnel act, upon his own application, is, under the circumstances, a bar to his retirement as an officer under section 11 of that act or under the act of 1906.

The Government having held that he could not be retired as an officer under section 11, but might be, under section 17, upon his own application, I do not think that by accepting this erroneous decision and acting upon it he waived or forfeited any legal right which he had to be retired otherwise.

I am of opinion that as Mate Nielsen was entitled to be retired under section 11 of the act referred to, his retirement of March 31, 1899, should be so corrected as to make it show such a retirement, and, following the above opinion of April 18, 1908, with the rank and retired pay of a warrant officer with twelve years of service and from said original retirement. This is giving to this officer, although at a later date, that to which, in law, he was then entitled.

In any event Mate Nielsen would be now, under the above opinion, entitled to be retired under the act of 1896 with the rank and retired pay of a warrant officer having twelve years' service. But since the advancement in such case would be from the date of retirement, this would deprive him during the intervening years of the increased pay to which he became entitled at and from his retirement, March 31, 1899.

As you informed me that there are on the retired list some other mates whose cases are essentially similar to this one, what is here said will apply to others also.

Respectfully,

CHARLES J. BONAPARTE,
Attorney-General.

The honorable SECRETARY OF THE NAVY.

When this opinion reached the Navy Department, it was returned to the office of the Attorney-General on June 23, 1908, with a request for an explanation of a certain passage of the above opinion, said passage reading as follows:

I am of opinion that, as Mate Neilsen was entitled to be retired under section eleven of the act referred to (the personnel act), his retirement of March 31, 1899, should be so corrected as to make it show such a retirement, and following the above opinion of April 18, 1908, with the rank and three-fourths retired pay of a warrant officer with twelve years of service, and from said original retirement. This is giving to this officer, although at a later date, that to which, in law, he was then entitled.

The questions which the Navy Department raised were of such nature as to require a reconsideration of this opinion by the Attorney-General.

Meanwhile Mr. DeKnight had gone abroad, but on being cabled by his office immediately returned solely on this business and made a further argument and a reargument in support of his contention on behalf of these mates, with the result that on August 29, 1908, the Attorney-General again sustained Mr. DeKnight's position by rendering the following opinion:

DEPARTMENT OF JUSTICE,
August 29, 1908.

SIR: I have the honor to acknowledge the receipt of your letter of June 23, 1908, in which you request an explanation of a certain passage in my opinion of June 5, 1908 (26 Op., 615), in the case of Mate Harold Neilsen, U. S. Navy, retired. The passage to which you call my attention is as follows:

"I am of the opinion that, as Mate Neilsen was entitled to be retired under section 11 of the act referred to (the personnel act), his retirement of March 31, 1899, should be so corrected as to make it show such a retirement, and following the above opinion of April 18, 1908, with the rank and retired pay of a warrant officer with twelve years of service, and from said original retirement. This is giving to this officer, although at a later date, that to which, in law, he was then entitled."

It appears that this has been construed as meaning that Mate Neilsen was entitled to be retired under section 11 of the personnel act at the time when he was, in fact (although irregularly), retired under section 17 of the same act, and you point out that data contained in certain memoranda accompanying your letter of May 26, 1908, show that Mate Neilsen, at the time above mentioned, had neither served forty years nor attained the age of 62 years, and therefore he would not have been entitled to retirement had he then held the rank of a warrant officer. The passage in question is not, perhaps, as carefully expressed as it should have been, but it does not say, nor was it my intention to express the opinion, that Mate Neilsen was entitled to retirement under section 11 of the personnel act at the date of his irregular retirement above mentioned. In the two paragraphs immediately preceding the one to which you refer, I said:

"I do not think that the retirement of Mate Neilsen under section 17 of the personnel act, upon his own application, is, under the circumstances, a bar to his retirement as an officer under section 11 of that act or under the act of 1906.

"The Government having held that he could not be retired as an officer under section 11, but might be under section 17, upon his own application, I do not think that, by accepting this erroneous decision and acting upon it, he waived or forfeited any legal right which he had to be retired otherwise."

In other words, the material point, in my opinion, was that Mate Neilsen, having accepted a construction of his status and consequent rights which had been adopted by the Government itself, but which was subsequently held, upon appropriate consideration, to be erroneous, ought not to be deprived of any substantial benefit resulting from the change in the authoritative construction of the law by reason of his action taken while the error of construction was acted upon by his superiors. He was held not to be entitled to retirement as an officer; he therefore accepted retirement as an enlisted man. In point of fact, he should have been regarded, and should have regarded himself, as entitled to retirement as an officer, and, under the circumstances of this case, he ought not to suffer by reason of the consequences of a mistake for which he was not responsible. From the facts stated in your letter, and which were shown by the memoranda accompanying your previous letter, of May 26, it seems to be quite clear that Mate Neilsen would not have been entitled to retirement under section 11 of the personnel act until April 16, 1902, when he should have attained the age of 62 years. When that date came, however, he was assumed by the department, and also by himself, to be already upon the retired list by reason of his irregular retirement of March 31, 1899. But for this action of the Government Mate Neilsen would have been, as your letter states, undoubtedly retired on April 16, 1902, and when I say, in the passage you have quoted, "his retirement of March 31, 1899, should be so corrected as to make it show such retirement * * * with the rank and retired pay of a warrant officer with twelve years' service, and from said original retirement," this must be understood as meaning a retirement from the period at which he would have been eligible for retirement under section 11 of the personnel act, namely, April 16, 1902. With this modification—or, rather, explanation—the opinion of June 5, 1908, correctly expresses my views of the law as applied to the case of Mate Neilsen.

I remain, sir,

Yours, very respectfully,

CHARLES J. BONAPARTE,
Attorney-General.

The SECRETARY OF THE NAVY.

Both these opinions of the Attorney-General were then promulgated by the Navy Department, and the mates in question, Callander, Fuller, Neilsen, and Vennard, were, by the department, retired as officers, under the provisions of section 1444 of the Revised Statutes; and under section 11 of the act of Congress, approved March 3, 1899, were accorded the rank and pay of warrant officers, from the date on which they had each at-

tained the age of 62 years. The correspondence on this subject is as follows:

NAVY DEPARTMENT,
Washington, September 24, 1908.

SIR: In accordance with an opinion of the Attorney-General, dated June 5, 1908, the department's letter to you, dated March 31, 1899, transferring you to the retired list of officers of the navy from that date, in accordance with the provisions of section 17 of the act of Congress approved March 3, 1899, is so far modified that you will be regarded as a mate on the retired list of the navy, holding the rank of the lowest grade of warrant officers, from the date upon which you attained the age of sixty-two (62) years, April 16, 1902, upon which date you would have been eligible to retire under the provisions of section 1444 of the Revised Statutes, and with the rank of the next higher grade in accordance with the provisions of section 11 of the act of March 3, 1899.

Very respectfully, V. H. METCALF, *Secretary.*

Mate HAROLD NEILSEN, U. S. Navy, Retired,
2646 Atlantic Avenue, Brooklyn, N. Y.

NAVY DEPARTMENT,
Washington, September 24, 1908.

SIR: In accordance with an opinion of the Attorney-General, dated June 5, 1908, the department's letter to you, dated June 9, 1899, transferring you to the retired list of officers of the navy from that date, in accordance with the provisions of section 17 of the act of Congress approved March 3, 1899, is so far modified that you will be regarded as a mate on the retired list of the navy, holding the rank of the lowest grade of warrant officers, from the date upon which you attained the age of 62 years, September 22, 1900, upon which date you would have been eligible to retire under the provisions of section 1444 of the Revised Statutes, and with the rank of next higher grade, in accordance with the provisions of section 11 of the act of March 3, 1899.

Very respectfully, V. H. METCALF, *Secretary.*

Mate JOHN L. VENNARD, U. S. Navy, Retired,
United States Navy-Yard, Portsmouth, N. H. (Commandant).

NAVY DEPARTMENT,
Washington, October 23, 1908.

SIR: In accordance with an opinion of the Attorney-General, dated June 5, 1908, the department's letter to you, dated May 22, 1899, transferring you to the retired list of officers of the navy from that date, in accordance with the provisions of section 17 of the act of Congress approved March 3, 1899, is so far modified that you will be regarded as a mate on the retired list of the navy, holding the rank of the lowest grade of warrant officers, from the date upon which you attained the age of 62 years, April 16, 1908, upon which date you would have been eligible to retire under the provisions of section 1444 of the Revised Statutes, and with the rank of the next higher grade, in accordance with the provisions of section 11 of the act of Congress approved March 3, 1899.

Very respectfully, V. H. METCALF, *Secretary.*

Mate ALBERT F. CALLANDER, U. S. Navy, Retired,
349 Bergen street, Brooklyn, N. Y.

The increased pay which these and the other mates heretofore mentioned receive by reason of their being regarded as mates on the retired list of the navy holding the rank of the lowest grade of warrant officer is $450 per year, and this rate of pay in each instance dated back to the time when they should have been properly retired.

In the case of Jenney, he received about $4,000 as back pay, as may be seen by reference to the letter of the Auditor for the Navy Department, as follows:

TREASURY DEPARTMENT,
Washington, May 5, 1908.

C. W. DE KNIGHT,
Attorney, Washington, D. C.

SIR: The claim of your client, William Jenney, mate, U. S. Navy, retired, for the difference between pay at $900 and at $1,350 per annum from September 26, 1899, to December 31, 1907, has been settled, and $3,718.75 found due.

As there are no funds available for the payment of the sum that accrued before July 1, 1904 ($2,143.75), it will be reported to Congress for appropriation. A warrant for that sum will be issued in his favor and sent to him when this has been made, which will probably be about the close of the present session.

A warrant for the remainder ($1,575) will be issued and mailed to him probably within ten days.

Respectfully, R. W. TYLER, *Auditor.*

While efforts were in progress one of these mates, Neilsen, died, while Mate Fuller had died previously, so that only two of these four officers, who had been erroneously retired as enlisted men, lived to enjoy the actual benefit of the efforts of their attorney in their behalf.

As before explained, the bill which I introduced, now on the table, it is unnecessary to pass, for the reason that, through the skill of their attorney, Mr. DeKnight, sufficient justification was found in law to give these mates that to which they were entitled.

In reviewing the history of the service of these mates in the navy and the little they have secured by way of recognition, and then only after strenuous efforts, I feel that too high a tribute can not be paid to the persistence and skill of their attorney, who worked unremittingly in their behalf, who brought the matter to my attention, who convinced me of the justice of their contention, and thus caused me to attempt to assist these deserving officers on the floor of this House.

In closing my career in Congress, I desire to pay tribute to the memory of these mates by calling attention to their worth, as shown by the report and debate on the bill which became the act of 1894, then pending in this House.

The following is an extract from pages 6965 to 6967 of the CONGRESSIONAL RECORD of June 28, 1894, Fifty-third Congress, second session:

PAY AND RETIREMENT OF MATES IN THE NAVY.

Mr. CUMMINGS. I now call up the bill (H. R. 38) relating to the pay and retirement of mates in the United States Navy.

The bill was read as follows:

"*Be it enacted, etc.*, That the law regulating the retirement of warrant officers in the navy shall be construed to apply to the 28 officers now serving as mates in the navy, and the said mates shall be entitled to receive annual pay at the rates following: When at sea, $1,200; on shore duty, $900; on leave or waiting orders, $700: *Provided, however,* That nothing herein contained shall be so construed as to authorize any increase of pay for any time prior to the passage of this act."

Mr. CUMMINGS. I ask unanimous consent, Mr. Speaker, that the bill be considered in the House as in Committee of the Whole.

Mr. DOCKERY. I think that the bill had better be considered in Committee of the Whole.

Mr. CUMMINGS. I move that the House resolve itself in Committee of the Whole House for the purpose of considering this bill.

The motion was agreed to.

The House accordingly resolved itself into Committee of the Whole, Mr. LESTER in the chair.

The CHAIRMAN. The House is in Committee of the Whole for the consideration of the bill, the title of which the Clerk will report.

The title was again reported.

Mr. HOLMAN. I hope the report will be read in the first instance.

Mr. CUMMINGS. If the gentleman will allow me, I will read nearly all the report in explaining the bill.

Mr. HOLMAN. Very well.

Mr. CUMMINGS. Mr. Chairman, by the act of July 15, 1870, the further appointment of acting masters' mates or mates in the United States Navy was stopped. It left the mates already in the navy on duty, and those mates, or what there are left of them, are carried on the Navy Register to-day. Death has laid its hand upon them. There are only 27 left. They were appointed under the act of July 24, 1861. Section 2 of the act of March 3, 1865, provided that acting masters' mates should be styled mates, and authorized the increase of their pay to a sum not exceeding $60 a month.

The act of July 2, 1864, designated boatswains, engineers, carpenters, and sailmakers as warrant officers; and under sections 1448 and 1455 of the Revised Statutes these warrant officers are retired the same as commissioned officers; but you will notice that the act left out the mates in the navy.

Mr. HOLMAN. That is the real point.

Mr. CUMMINGS. They were neither warrant nor commissioned officers. The omission was undoubtedly an inadvertence at the time, because everybody upon the floor of this House must know that a mate is a superior officer to a boatswain or a carpenter. They were thus deprived of the benefits of a law passed for the retirement of commissioned and warrant officers.

Mr. DOCKERY. Then, as I understand my friend, the effect of this bill under consideration is to increase the retired list to the extent of 27 mates.

Mr. CUMMINGS. The effect is to increase the retired list to the extent of 27 noncommissioned officers who ought to be on the list, or the retired list itself be abolished.

Mr. HOLMAN. Which is the proper thing?

Mr. CUMMINGS. One or the other.

Mr. HOLMAN. Which is the proper thing?

Mr. CUMMINGS. Are you going to legislate in favor of commissioned officers and against old tars? The injustice here, it seems to me, is perfectly apparent.

Mr. DOCKERY. What would be the cost?

Mr. CUMMINGS. I will come to that in a minute. I want to say that there are 27 of these old men in the service. They have served from twenty-five to forty-five years in the navy as acting masters' mates or mates. And in the face of all this service you discriminate against them. They are getting old and have families to support. Why, sir, some of these very men are to-day practically commanding vessels in the United States Navy.

This House will surely take into account the fact that boatswains and carpenters are on the retired list, while these gallant old tars, some of whom served in the Mexican war, and all of whom served in the last war, are to be left stranded through an inadvertence at the time the law was passed placing warrant officers on the retired list.

Now, I want to say that Secretary Chandler, Secretary Whitney, Secretary Tracy, and Secretary Herbert have all earnestly favored the passage of this bill. They have acknowledged its justice. It has repeatedly been favorably reported, both in the House and in the Senate, in different Congresses. Until to-day nobody has championed the rights of these old salts, but in almost every Congress you find men willing to champion the aspirations of commodores and admirals on the retired list who are seeking an increase of pay.

Now, Mr. Chairman, it is not necessary for me to expatiate further. The fact that these old jack tars have suffered from this injustice ever since 1864 ought to commend to you their demand for justice now.

I quote the following letter here, written on behalf of these mates. It reflects credit on the admirals, commodores, and commanders who have signed it:

WASHINGTON, D. C., *July 1, 1886.*

To the Naval Committees of the Senate and House of Representatives.

HONORABLE SIRS: The mates of the navy are efficient officers, having performed the duties of commanding, executive, and deck officers for many years, some having served upward of forty years as enlisted men and officers.

Nearly all served in the United States Navy during the late war, and some were in the service during the Mexican war.

They have the same uniform, mess bill, and other expenses that warrant officers have, and in line of duty take precedence of warrant officers.

They are the only ones who do not receive longevity pay, and should receive the same as warrant officers, and also the benefits of the retired list as now allowed to all other officers.

David D. Porter, Admiral; S. C. Rowan, Vice-Admiral; Thornton A. Jenkins, rear-admiral; John L. Worden, rear-admiral; C. R. P. Rodgers, rear-admiral; E. T. Nichols, rear-admiral; T. H. Patterson, rear-admiral; Henry Walke, rear-admiral; J. M. B. Clitz, rear-admiral; Wm. E. Leroy, rear-admiral; A. C. Rhind, rear-admiral; D. B. Harmony, commodore; W. W. Queen, commodore; L. A. Kimberly, commodore; Ralph Chandler, commodore; D. L. Braine, commodore; W. T. Truxton, commodore; Montgomery Sicard, captain; R. R. Wallace, captain; Geo. C. Remey, captain; J. Fyffe, captain; Albert Kautz, captain; R. L. Law, captain; Geo. Brown, captain; J. N. Miller, captain; M. Haxton, captain; A. P. Cook, captain; S. Casey, commander; A. H. McCormick, commander; J. H. Sands, commander; A. G. Kellogg, commander; M. L. Johnson, commander; H. B. Selly, commander; Theodore F. Kane, commander; J. C. Watson, commander; H. B. Robeson, commander; Wm. Whitehead, commander; Geo. W. Coffin, commander; P. F. Harrington, commander; C. M. Schoonmaker, commander; C. S. Cotton, commander; C. McGregor, commander; John McGowan, lieutenant-commander; Geo. M. Book, lieutenant-commander; Geo. N. Totten, lieutenant-commander; C. A. Schetky, lieutenant-commander; Jas. M. Forsyth, lieutenant-commander; O. W. Farenholt, lieutenant-commander.

I concur in the representation made in this communication.

WM. E. CHANDLER.

Mr. Chairman, I do not think it necessary to climb the heights of eloquence on behalf of these veteran and patriotic sea dogs of the American Navy. They were warrant officers, even if they did not receive their warrants. They ought to have received the courtesy at least that a corporal in the army gets from his colonel. You will find them acting as executive officers on men-of-war to-day, and in some instances even acting as commanders of vessels. The *Fishhawk*, used by the Fish Commission, has been under command of one of these mates. Still he was not even granted the courtesy of a warrant; he had no commission at all except his forty years' term of service.

Mr. Chairman, if no gentleman desires to oppose this bill, I would like to get a vote upon it. Let us give these old tars justice while we have the opportunity.

Mr. DOCKERY. Mr. Chairman, I wish to be heard on this question very briefly. The proposition presented by this bill is an extension of the retired list of the navy. So far as I know, Members of this House on both sides have been indisposed in recent years to extend the retired list, either of the army or of the navy.

This bill proposes to make eligible for retirement on the naval list 27 mates, who, as I see by the report, were not included in the provisions of the act of July, 1864, which permitted certain naval officers to be retired at certain ages.

Now, Mr. Chairman, I am not familiar with the laws relating to retirement of officers, either of the navy or of the army; but I am conversant with the general opposition which the people have expressed through their Representatives on this floor against the further extension of special retiring privileges, either to officers of the army or officers of the navy. Mr. Chairman, in times like these, when thousands, yea, hundreds of thousands, of men in this country are out of employment, with nothing to do, tramping the country, when manufactories are closed and general industrial paralysis extends over the country, is it wise for us as the Representatives of the people to add this burden to the taxpayers of the United States?

Mr. CUMMINGS. I suggest to the gentleman that it is wise to do justice to the defenders of this Union at any time. [Applause.]

Mr. DOCKERY. Then why was not this measure of justice meted out by the act of July 2, 1864, if this class of men were entitled to special recognition? The gentleman from New York says that it was doubtless an inadvertent omission, but——

Mr. CUMMINGS. And Secretary Chandler says so, too.

Mr. DOCKERY. But there is nothing shown in the report which I have hastily glanced over which indicates that such was the case. It seems, Mr. Chairman, to have been a deliberate purpose on the part of Congress at that time to make this omission. If not, I hope it will be the deliberate voice of this House, expressed in disapproval of this bill, that we will not, at least at this moment of industrial paralysis, add this burden to the people whom we have the honor to represent.

Mr. CUMMINGS. Mr. Chairman, there seems to be an impression in the House that by the retirement of these 27 mates somebody will be promoted to their positions. There is not the shadow of truth in such an insinuation. There are no mates in the United States Navy to-day except these men. The rank has been abolished, and it is a rank. These are the only mates left. In discriminating against them by retaining them in service in their old age you are practically punishing them for doing their duty toward the country.

Mr. HALL of Missouri. Will the gentleman allow me to ask him a question?

Mr. CUMMINGS. I will.

Mr. HALL of Missouri. My colleague [Mr. Dockery] makes the point that this bill will increase the burdens of taxation. I want to know whether, when anyone is retired from active service in the army or navy, he does not go on the retired list with less pay than he received when on active duty?

Mr. CUMMINGS. Certainly. It is cheaper to put these men on the retired list than to retain them in active service.

Mr. HALL of Missouri. Then, by passing this bill we shall decrease taxation instead of increasing it.

Mr. CUMMINGS. Practically so.

Mr. DOCKERY. Will the gentleman from New York [Mr. CUMMINGS] give us the figures showing a decrease of taxation? I should be glad to have that shown. If this is a measure to decrease taxation, I should like to know just how it accomplishes the result.

Mr. HALL of Missouri. Will the gentleman from New York allow me one other question in order to clear this matter up?

Mr. CUMMINGS. Mates receive, when on sea pay, $900; on shore-duty pay, $700; and on leave or waiting-order pay, $500.

Mr. HALL of Missouri. And if they go on this list they receive less?

Mr. CUMMINGS. If they go on the retired list they get three-quarters pay.

Mr. DOCKERY. But you give them pay for doing nothing when they are put on the retired list.

Mr. CUMMINGS. Does not an admiral get pay for doing nothing when he goes on the retired list? Is there not just as much justice and right in putting these men on the retired list when they are incapacitated by old age from active service?

Mr. COX. Let me ask the gentleman from New York a question.

Mr. CUMMINGS. Certainly.

Mr. COX. The proposition is to retire these men at a rate of compensation less than what the Government is now paying them?

Mr. CUMMINGS. Exactly.

Mr. COX. Now, when you retire them and put them on a less compensation than they are receiving now, do I understand it is stated correctly that there are none others to take the places of these men, and that the office is abolished?

Mr. CUMMINGS. There are none others to take their places. The rank is abolished.

Mr. COX. Then is it not a reduction of expenses to the Government?

Mr. CUMMINGS. Certainly; that is the practical effect.

Mr. BYNUM. Why is it a benefit to these men to reduce their salaries, then?

Mr. CUMMINGS. Because they are old and want to go home to their wives and families, the same as you do when it gets too hot in this House. [Laughter.]

Mr. BAILEY. Mr. Chairman, I always differ very reluctantly with my distinguished friend from New York [Mr. CUMMINGS], for I know that in most cases he is right. I may even go so far as to agree with him in his statement that if there is anybody on the retired list who ought to be there, these men ought to go on it. If there is any sense or any justice in putting men on the retired list who, when in active service, received a salary of $5,000 a year, there is greater sense and far more justice in putting a man on that list who in active service received only $900 a year.

But while agreeing with my friend from New York to that extent, my opposition to all bills of this kind is based upon the belief that no living man has a right, without working for it himself, to eat the bread that other people earn by their labor. If these men have suffered in the service of their country, there is a pension roll which is accessible to them, a roll that is maintained now and has been maintained by this Government every hour since the first Congress assembled under the Republic; and if they have won for themselves a right, by their services to their country, to be cared for by their countrymen, I will vote to put them upon it.

Mr. CUMMINGS. Does not that pension roll apply to admirals and commodores and other officers as well?

Mr. BAILEY. Certainly it does, but the gentleman from New York does not contradict me and can not make me appear inconsistent by that suggestion, because I have never supported a proposition to put an admiral on the retired list, and I never will.

Now, the truth is, and we had just as well understand it, that the aversion to men going on the pension roll instead of the retired list is this: If they go on the pension list, they continue to draw for twenty years, if they live that long, exactly what they got on the first day they were placed upon it; but, on the other hand, if they are placed on the retired list, they draw not only what they first began to draw, but for every five years they remain upon the list there is an increase of compensation of 10 per cent for each five years until the original compensation may be increased 40 per cent.

Now, we have the remarkable anomaly under this system that an officer of the army, who in active service gets $1, when he retires and does nothing, if he remains on the retired list long enough, he will get $1.15. In other words, he gets $1 when he works and $1.15 when he plays.

Mr. WHEELER of Alabama. One dollar and five cents.

Mr. BAILEY. No; he can get 40 per cent as longevity pay.

Mr. WHEELER of Alabama. And it amounts to $1.05, under the gentleman's statement.

Mr. BAILEY. The gentleman's arithmetic is bad. Forty per cent added to 75 makes 115 per cent.

Mr. COOMBS. But this would come to $1.05.

Mr. BAILEY. Well, Mr. Chairman, here is another gentleman whose arithmetic is worse than his politics, if that is possible. Both the gentleman from Alabama [Mr. Wheeler] and the gentleman from New York [Mr. Coombs] are mistaken.

The 10 per cent allowed for each five years, it is true, is computed on the retirement pay; but this 10 per cent can be allowed for each five years until it equals, in the language of the law, "40 per cent on the yearly pay of the grade" held by the officer when he retired. He retires on 75 per cent of his original salary, and he may be allowed longevity pay equal to 40 per cent—not of his retired pay, but 40 per cent of his original pay—and certainly gentlemen will not dispute that 40 added to 75 makes 115. I therefore repeat my statement that when he works he gets $1 and when he plays he gets $1.15, and this is the reason why gentlemen prefer the retired list to the pension roll.

Mr. Chairman, I believe this bill ought not to pass.

Mr. DOCKERY. Do I understand the gentleman from New York to state that this office is abolished?

Mr. CUMMINGS. It is abolished.

Mr. DOCKERY. What are these 27 men doing now?

Mr. CUMMINGS. They were left there by the law, which provided that no further mates should be appointed.

Mr. DOCKERY. What officers succeed them?

Mr. CUMMINGS. I do not know that any officers succeed them.

Mr. DOCKERY. Some one must be performing the duties heretofore performed by them.

Mr. CUMMINGS. Not necessarily. The change in the style of ships, and in the method of managing them, has brought about a change in the duties necessary to be performed. Ships do not depend upon wind any longer, as Congress seems to do at times. [Laughter.] Ships depend upon steam, and the mates of the old men-of-war are no longer required. Mr. Chairman, I move that the committee rise and report the bill to the House with a favorable recommendation.

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. DOCKERY. Division!

The committee divided; and there were—ayes 111, noes 33.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. Lester, Chairman of the Committee of the Whole House on the state of the Union, reported that the committee had had under consideration the bill (H. R. 38) relating to the payment and retirement of mates in the United States Navy, and had instructed him to report it to the House with the recommendation that it do pass.

Mr. CUMMINGS. I demand the previous question.

The previous question was ordered, and under the operation thereof the bill was ordered to be engrossed for a third reading, and was accordingly read a third time.

The question was taken on the passage of the bill, and the Speaker announced that the ayes seemed to have it.

Mr. DOCKERY. Mr. Speaker, I ask for a division on the passage of a bill that increases the retired list.

The House divided; and there were—ayes 103, nays 32.

So the bill was passed.

On motion of Mr. Cummings, a motion to reconsider the vote by which the bill was passed was laid on the table.

[House Report No. 851, Fifty-third Congress, second session.]

PAY AND RETIREMENT OF MATES IN THE UNITED STATES NAVY.

Mr. Cummings, from the Committee on Naval Affairs, submitted the following report to accompany H. R. 38:

The Committee on Naval Affairs, to whom was referred the bill (H. R. 38) relating to the pay and retirement of mates in the navy, having duly considered the same, submit the following report:

The passage of the act of July 15, 1870, stopped the further appointment of acting masters' mates or mates in the United States Navy. It left the mates already in the navy on duty, and they are carried on the Navy Register to-day. They were appointed under the act of July 24, 1861. Section 2 of the act of March 3, 1865, provided that acting maters' mates should be styled mates, and authorized an increase of their pay to a sum not exceeding $60 per month. The naval appropriation bill of July 15, 1870, section 3, fixed the pay of mates as follows:

	Per annum.
Sea pay	$900
Shore-duty pay	700
Leave or waiting-orders pay	500

The act of July 2, 1864, designated boatswains, engineers, carpenters, and sailmakers as warrant officers, and under sections 1448 and 1455, Revised Statutes, they are retired the same as commissioned officers. Under existing law mates who were left in the service are not classed as either commissioned or warrant officers, and therefore can not receive the benefits of the laws providing for the retirement of officers of the navy. There are now 27 of these old mates in the naval service. They have served from twenty-five to over forty years in the navy as acting masters, acting ensigns, and mates. They are all getting old and have families to support. Their ages are from 50 to 65 years. The best days of their lives have been spent in the navy. They ask only for the benefit of the retired list the same as all other officers and enlisted men. Secretaries Chandler, Whitney, Tracy, and Herbert have all favored the passage of the bill, and it has been repeatedly reported favorably in both the House and Senate.

The following is a list of the mates now in the navy, with their ages and total length of service in the Navy, Army, and Marine Corps as acting ensigns, mates, and in other ratings to March, 1894:

No.	Name.	Age.	Years of service as shown in Navy Register.	Years of service not credited in Navy Register.	Total years service.
1	James W. Baxter	54	45	----------	45
2	W. W. Beck	66	32	----------	32
3	Thomas W. Bonsall	58	29	----------	29
4	William Boyd	58	27	----------	27
5	A. F. Callander	48	24	3	27
6	C. H. Cleaveland	52	30	----------	30
7	J. M. Creighton	47	27	----------	27
8	H. C. Fuller	55	30	----------	30
9	L. B. Gallagher	48	24	6	30
10	Samuel Gee	56	24	12	36
11	John Griffin	60	33	----------	33
12	James Hill	55	24	6	30
13	Frank Holler	61	27	6	33
14	William Jenney	58	30	----------	30
15	Hugh Kuhl	58	33	----------	33
16	L. M. Melchor	45	26	3	29
17	C. J. Murphy	52	29	4	33
18	Harold Neilsen	54	23	10	33
19	Benjamin G. Perry	70	28	9	37
20	Robert Robinson	54	32	4	36
21	J. A. Smith	54	32	----------	32
22	S. T. C. Smith	49	28	----------	28
23	William G. Smith	55	36	----------	36

Twenty-seven years' service	3
Twenty-seven to thirty-two years' service	12
Thirty-two to thirty-seven years' service	11
Forty-five years' service	1
	27

These mates have always taken precedence of warrant officers, who, under the law, are entitled to be placed on the retired list. There is no reason why this distinction should be made.

The following is an extract from the report of the Committee on Naval Affairs of the Fifty-first Congress, submitted by Mr. Boutelle:

"By the act of July 24, 1861 (12 Stat. L., 272), certain appointments for the temporary increase of the navy, including those of masters' mates, were authorized and ratified. Section 2 of the act of March 3, 1865 (13 Stat. L., 539), 'to increase the pay of midshipmen and others,' provided that acting masters' mates should be styled 'mates,' and authorized an increase of their pay to a sum not exceeding $60 per month.

"The naval appropriation bill of July 15, 1870 (16 Stat. L., 330), section 3, fixed the pay of mates as follows: Sea pay, $900; shore-duty pay, $700; leave or waiting-order pay, $500. This provision is now embodied in section 1556, Revised Statutes. The same act having repealed, except as to assistant surgeons, the authority for the appointment of temporary or acting officers in the navy, there have been, since the passage of the act of July 15, 1870, no further appointments of acting masters' mates, or mates, nor has there been since then any change in the status or pay of mates in the navy.

"The act of July 2, 1864, now section 1406, Revised Statutes, designates boatswains, gunners, carpenters, and sailmakers as 'warrant officers,' and under sections 1448–1455, Revised Statutes, they may be retired the same as commissioned officers.

"Under existing law, however, mates are not classed as commissioned or as warrant officers, and therefore can not receive the benefit of the laws providing for the retirement of officers of the navy.

"Section 1408, Revised Statutes, authorizes the Secretary of the Navy, should the exigencies of the service so require, to cause seamen and ordinary seamen who have enlisted for not less than two years to be rated as mates, with the pay now provided by law for that grade; but that provision would not be affected by this bill, the operation of which is confined to the mates now in the service.

"By section 1556, Revised Statutes, the pay of 'warrant officers,' i. e., boatswains, gunners, carpenters, and sailmakers, is fixed as follows:

Term of service.	At sea.	On shore duty.	On leave or waiting orders.
First three years after date of appointment	$1,000	$900	$700
Second three years after date of appointment	1,300	1,000	800
Third three years after date of appointment	1,400	1,300	900
Fourth three years after date of appointment	1,600	1,300	1,000
After twelve years from date of appointment	1,800	1,600	1,200

"As all the mates now in the service have served more than twelve years since the date of their appointment, their pay will be increased by this bill to $1,800 sea pay, $1,600 shore duty, $1,200 leave or waiting orders.

"It will be borne in mind that although the mates take precedence of warrant officers in line of duty their pay has always been much less, and they have been entirely deprived of the increase of pay for longevity of service which is given to all other officers.

"The committee find that some of these mates have been in the service upward of forty years as enlisted men or officers; that nearly all of them were appointed and served in the navy during the late war, while some were in the service in the Mexican war, and that many of them have performed the duties of commanding, executive, and deck officers, intrusted with the responsibilities that would be imposed upon ensigns and lieutenants. Their efficiency and usefulness is attested most cordially in memorials presented to the committee bearing the signatures of Admiral Porter, Vice-Admiral Rowan, Rear-Admirals Jenkins, Worden, Rodgers, Nichols, Patterson, Walke, Clitz, Leroy, and Rhind, Commodore Harmony, and many other of the foremost officers of the navy, who earnestly favor the placing of the mates on the same footing as the warrant officers, as do the last and the present Secretary of the Navy.

"In view of the long, faithful, and valuable service of these men, some of whom are now on the leave or waiting-orders pay of $500 per year, the committee believe that it will be but simple justice to grant them the benefits of longevity pay and of the retired list now enjoyed by warrant officers, and therefore recommend that bill H. R. 3301 do pass, with the following amendments:

"As one of the mates has died since this bill was introduced, amend by striking out the word 'four,' in line 5, and insert the word 'three,' so that it will read 'thirty-three officers,' etc. Also amend by striking out all of section 2 and insert as an addition to section 1 the following proviso:

"'*Provided, however,* That nothing herein contained shall be so construed as to authorize any increase of pay for any time prior to the passage of this act.'"

The case is very clearly stated in Senate Report No. 548 made to the Fifty-second Congress, first session, by Senator Chandler, formerly Secretary of the Navy. It says:

"Bills providing for the retirement of mates in the navy, and the regulation of their pay, have been favorably reported in the Fiftieth and Fifty-first Congresses, and justice to this small but efficient corps demands that action should be no longer delayed. When the first bill was reported the number of mates was only 33, and that number has dwindled down to 28. Of these 1 has served forty-three years, 14 over thirty years, and 13 over twenty years each. Most of them are well advanced in years and have families dependent upon them. Nearly all served during the late war, and some during the Mexican war.

"The pay of mates while on sea duty is $900 per year, on shore duty $700, and on leave or waiting orders $500. Of the 28 mates 22 are on shore duty, 1 is on waiting orders, and only 5 are on sea service. They take precedence of warrant officers in line of duty, and yet the warrant officers are paid for the first three years' service $1,200 per year while on sea duty and $900 while on shore duty, and those amounts are increased every three years until after twelve years' service, when they receive $1,800 for sea and $1,600 for shore duty. With equal duties, equal mess expenses, and equal responsibilities, and with over twenty years' service every mate should now be receiving the highest amount paid to any warrant officer—$1,800 per year for sea duty, $1,600 for shore duty, and $1,200 while waiting orders. The bill which this report accompanies provides for paying them only $1,200 for sea and $900 for shore duty, and $700 while waiting orders. This proposition is far from being an extravagant one, especially when it is considered that these veteran mates, who have suffered from injustice for years, are constantly diminishing in numbers and in a short time will all be gone. The final amendatory clause of the bill as reported authorizes the Secretary of the Navy in his discretion to place any of the mates upon the retired list, and it is probable that most of them will at an early day be so disposed of.

"As to the propriety of allowing these officers longevity pay, there can be but one opinion. They are morally as much entitled to it as any other officers of the navy. It should have been given to them in the act of 1870, by which it was granted to all naval officers except

them. The reason for the neglect was probably that, being a small and inadequately paid corps, they did not assert themselves as forcibly as they might, while the understanding that no more appointments were to be made caused less attention to be paid to them than otherwise would have been the case. But whatever the reason, they were overlooked, and it remains for Congress to repair the mistake and to give these mates the benefit of a retired list as allowed to other naval officers."

The feeling in the navy concerning the bill is shown in the following letter:

WASHINGTON, D. C., *July 1, 1886.*

To the Naval Committees of the Senate and House of Representatives.

HONORABLE SIRS: The mates of the navy are efficient officers, having performed the duties of commanding, executive, and deck officers for many years, some having served upward of forty years as enlisted men and officers.

Nearly all served in the United States Navy during the late war, and some were in the service during the Mexican war.

They have the same uniform, mess bill, and other expenses that warrant officers have, and in line of duty take precedence of warrant officers.

They are the only ones who do not receive longevity pay, and should receive the same as warrant officers, and also the benefits of the retired list as now allowed to all other officers.

David D. Porter, Admiral; S. C. Rowan, Vice-Admiral; Thornton A. Jenkins, rear-admiral; John L. Worden, rear-admiral; C. R. P. Rodgers, rear-admiral; E. T. Nichols, rear-admiral; T. H. Patterson, rear-admiral; Henry Walke, rear-admiral; J. M. B. Clitz, rear-admiral; Wm. E. Leroy, rear-admiral; A. C. Rhind, rear-admiral; D. B. Harmony, commodore; W. W. Queen, commodore; L. A. Kimberly, commodore; Ralph Chandler, commodore; D. L. Braine, commodore; W. T. Truxton, commodore; Montgomery Sicard, captain; R. R. Wallace, captain; Geo. C. Remey, captain; J. Fyffe, captain; Albert Kautz, captain; R. L. Law, captain; Geo. Brown, captain; J. N. Miller, captain; M. Haxton, captain; A. P. Cook, captain; S. Casey, commander; A. H. McCormick, commander; J. H. Sands, commander; A. G. Kellogg, commander; M. L. Johnson, commander; H. B. Selly, commander; Theodore F. Kane, commander; J. C. Watson, commander; H. B. Robeson, commander; Wm. Whitehead, commander; Geo. W. Coffin, commander; P. F. Harrington, commander; C. M. Schoonmaker, commander; C. S. Cotton, commander; C. McGregor, commander; John McGowan, lieutenant-commander; Geo. M. Book, lieutenant-commander; Geo. N. Totten, lieutenant-commander; C. A. Schetky, lieutenant-commander; Jas. M. Forsyth, lieutenant-commander; O. W. Farenholt, lieutenant-commander.

I concur in the representation made in this communication.

WM. E. CHANDLER.

Confident that the Government owes this act of justice to these veterans in the service, your committee respectfully recommend the passage of this bill.

I wish to state that when the bill (S. 5337) for the relief of Mate William Jenney and others (said bill being identical in purport with H. R. 17059, introduced by myself) was reported favorably to the Senate, the report thereon (S. 434) called attention to a letter from Mate Beck.

Said letter is as follows:

196 SHURTLEFF STREET,
Chelsea, Mass., February 28, 1908.

DEAR SIR: I beg to request that you will kindly cause to be reported and passed immediately Senate bill 5337, for the relief of Mate William Jenney, U. S. Navy, retired, and the eight other retired mates who have been placed on the retired list with the rank and pay of one grade above that actually held by them at the time of retirement.

I was nominated and confirmed this session of Congress to be a mate on the retired list with the rank and pay of the next higher grade, but the comptroller rules that I do not get any higher pay, although everyone else benefited under the act of June 29, 1906, receives increased rank and pay by reason of civil-war service, and it was the intention of the law that I and my associates should likewise receive this increase.

I entered the service in 1856, at the breaking out of the rebellion, and was appointed master's mate and in 1864 was appointed an acting ensign; served as such until October, 1868, when I received my honorable discharge. I reentered the service in 1870 as a mate. I also served in the Mexican war in 1847.

Most of these mates are about 80 years of age, and unless this law goes through immediately we will be dead before it can do us any good.

The bill has the recommendation of the Navy Department.

Trusting that this letter will appeal to you, I am,

Very truly, yours,

WM. W. BECK,
Mate, United States Navy, Retired.

Hon. EUGENE HALE,
United States Senate, Washington, D. C.

Since the writing of that letter Mate Beck has died, his death occurring February 1, 1909, so that he did not long enjoy the benefits of the higher rank and pay accorded him for civil-war service.

Mate William Boyd, another of the beneficiaries, passed away on November 1, 1908.

Mate W. G. Smith was entitled to the rank and pay of the next higher grade under the act of June 29, 1906, from that date, but died June 9, 1907, before receiving the increased rank and pay to which he was entitled.

During the present session of Congress his name was sent to the Senate and he was confirmed on December 17, 1908. (See CONGRESSIONAL RECORD, p. 381.) In other words, he was nominated and confirmed about one year and a half after his death. His widow, Lydia Smith, has received $423.75, the difference in pay to which he was entitled.

By way of parenthesis I will say that another of the mates who has died since is Mate Samuel Gee. He served in the navy prior to the civil war, but during that event was a civilian employee in the navy-yard at Washington, D. C. He reentered the service in 1869. During the civil war Mr. Gee rendered quasi military service and was under the command of the commandant of the navy-yard at Washington. The commandant required the civilian employees of the navy-yard to perform military duty in the defense of the city of Washington. Furthermore, during the war Mr. Gee was sent on expeditions up and down the Potomac River and as far as Old Point Comfort and Jamestown, and, it is claimed, was under fire, but Mr. Gee did not receive the benefits of section 11 of the personnel act or of the act of June 29, 1906, though morally entitled thereto, because at the time he was not actually in the naval service. On May 4, 1908, a private bill (H. R. 21569) was introduced for Mr. Gee's relief, but had not been acted upon up to the time of his death, January 17, 1909.

Mate Henry C. Fuller was entitled to the rank and pay of the next higher grade, under the act of March 3, 1899, from July 25, 1901, but he died on June 25, 1907, before receiving this increased rank and pay. Subsequently his record was corrected, and his sister, Mrs. C. C. Fryer, has received $2,177.35, the difference in pay to which he was entitled.

Mate Neilsen should have received the rank and pay of the next higher grade under the act of March 3, 1899, from April 16, 1902, but died June 25, 1908, before receiving this additional rank and pay. Subsequently his naval record was corrected, and his widow, Virginia Neilsen, has received $3,028.98, the difference in pay to which he was entitled.

As already shown, the back pay which Mate Jenney received amounted to about $4,000.

The back pay of Mates Vennard and Callender dated from September 22, 1900, and April 16, 1908, respectively.

Mates Beck, Bonsall, Boyd, Griffin, Hill, Holler, Robinson, and S. T. C. Smith received difference in pay at the rate of $450 per year from June 29, 1906, and all of the mates heretofore mentioned, still living, are receiving this rate of increase.

In reciting these facts I do not wish to be understood as criticising the Navy Department or the accounting officers of the Treasury Department, as I feel that they have always attempted, so far as the law would permit, to give to these mates everything to which they were entitled.

In conclusion, I can only again say I am glad that it has been within my power to assist in seeing this belated justice done these old mates. From a review of their contention, now that they have won, it seems strange, indeed, that it was necessary to secure two decisions of the Comptroller of the Treasury and four opinions of the Attorney-General in order to obtain for them that recognition to which they were entitled. It seems strange, indeed, that it has taken over forty years to correct an inadvertent error made by our predecessors in not recognizing them as officers, entitled under the Revised Statutes to be retired as such. It seems still more incredible that such unremitting work was necessary to correct this mistake, even after Congress had, in 1894, passed a special act for their retirement, especially in view of the fact that they had seen service in the civil war and many during the Mexican war, and had performed the duties of commanding, executive, and deck officers for many years, and to whose efficiency and faithfulness of service Admiral Porter, Vice-Admiral Rowan, Secretary Chandler, Secretary Whitney, Secretary Tracy, and Secretary Herbert, and a host of other naval officials, had all testified. And yet, strange as it may seem, a study of the documents which appear in my remarks will show that such unceasing work was necessary before these old mates, veterans of two or three wars, were recognized as officers and given the full privileges of such recognition on retirement.

I have only one regret, and that is that so many of these old officers passed away without realizing that their country, though often tardy, is nevertheless always willing and anxious to do justice and give full recognition to those who have given the better part of their lives to its service and in its defense.

The long, faithful, patriotic, and efficient service of these old mates has proved a credit to our navy and will ever obtain for them a deserving place of honor in American history.

Consolidation of Pension Agencies.

SPEECH

OF

HON. JOHN A. M. ADAIR,

OF INDIANA,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, January 19, 1909,

On the bill (H. R. 26203) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1910, and for other purposes.

Mr. ADAIR said:

Mr. CHAIRMAN: The question before the House is one of vast importance and deserves careful consideration. It not only affects the interest and welfare of the soldiers and their widows, but it also affects the Treasury of the United States. To begin with, let me say that I am in hearty sympathy with the report of the Committee on Pensions and am strenuously opposed to the amendment offered by the gentleman from Ohio. The committee proposes to consolidate the 18 pension agencies as they now exist into one agency and place the payment of all pensions under the Commissioner of Pensions, through a disbursing officer at Washington.

I am strongly in favor of this plan because of the great saving made possible by such a change. There would be an immediate saving of $68,000 annually on salaries of pension agents, $4,500 on account of rent of offices for the New York agency, $1,500 for the examination and inspection of agencies, and from $150,000 to $200,000 on clerk hire. In fact, when the new system is once established I believe there will be a saving in the expense of paying pensions of at least $400,000 annually. I feel confident that such consolidation will result in the economical execution of the pension laws, the prompt and efficient payment of all pensions, that the work incident to the payment of pensions will be expedited, and that no delay or inconvenience will be experienced. The Secretary of the Interior and the Commissioner of Pensions, who have made a careful study of this question of consolidation, are in favor of it. They believe it would do away with what at present is a serious duplication of work. The various agencies report to the central office at Washington, and much of the clerical work is done over again, which makes the employment of numerous clerks necessary. By the concentration and the centralization of the handling of the work in Washington, with the present organization in the Pension Office and with the introduction of certain mechanical devices for the handling of these hundreds of thousands of vouchers and certificates, they could, without interfering in the least with the expedition with which the pensioners receive their claims, transact all of that business in Washington and mail the checks to the pensioners in various parts of the country just as quickly as it is now done under the separate agencies, and with a great deal less expense.

The Commissioner of Pensions, in a letter upon the subject, makes the following statement:

> All pension checks must now be printed in this city and forwarded through the mails to the various pension agencies throughout the country. All vouchers to be executed by the pensioners are printed here in this city by the Government Printing Office and are forwarded through the mails to the various pension agencies to be prepared and forwarded to the pensioners. More than 100 different forms of vouchers are now required for the 18 pension agencies. As an illustration: Fifty-four different forms of vouchers are now required for pensioners under the act of February 6, 1907, 3 forms for each different agent, 1 at the $12 rate, 1 at the $15 rate, and 1 at the $20 rate. If all the pensions were paid by one disbursing officer, only 3 forms of vouchers would be required under this act instead of 54. All certificates issued by the bureau must first be forwarded to the pension agency, there to be reentered upon a different set of books and mailed to the pensioner from the agency. If all pensioners were paid from this city, the certificates would be issued by the bureau and mailed to the pensioners upon the same date they are now mailed to the pension agency. The pensioners would therefore receive the new certificates much more promptly than they do now. All vouchers, after being paid by the pension agent, must be again mailed to this city, to the Treasury Department, where the accounts are audited. This bureau can not furnish the latest post-office address of a pensioner or the State where the pensioner was last paid without first securing a report from the pension agent upon whose rolls the pensioner's name is inscribed. If all pensioners were paid from this city, all such information would be immediately available, which would greatly assist in the prompt dispatch of the correspondence of this bureau. All pension claims, as you are aware, are adjudicated here in this bureau; and if all payments were made here, a complete history of each case would be readily available and the bureau enabled to make prompt response to all inquiries.

I am sure, Mr. Chairman, there is an abundant supply of substantial reasons why these agencies should be consolidated. Both economy and the interests of pensioners demand it. What we want is the best service at the least cost, and if I believed it would be impaired or the interest of the soldier compromised by such consolidation, I would oppose it, no matter how great the saving might be.

But, Mr. Chairman, I believe too much money is being needlessly and unnecessarily expended in the continuing of these agencies, and that the $400,000 that could be saved annually by consolidation should be paid to the defenders of our country in the way of increased pensions. Ever since I became a Member of Congress I have been struggling for more liberal pensions for soldiers of the civil war and their widows. If I had my way about it I would do away with all unnecessary expense of agencies, special examiners, and boards of examiners and distribute the vast sum of money spent in this way by increasing the pensions of those who went out in the dark days of '61 to '65 and endured hardships and privations that you and I might enjoy this united country.

Why not give this money to the old soldier instead of spending it for officers and clerks, which the Secretary of the Interior, the Commissioner of Pensions, and everybody else knows are not needed? If anything more is to be done for the old soldier it must be done quickly. One by one they are dropping off, and it will soon be too late to pay the debt we owe to them for their valuable service.

I have introduced two bills, now pending before the Committee on Invalid Pensions, one to increase the pensions of private soldiers and the other to amend the "widows' pension law," passed April 19, 1908, striking out the date of June 27, 1890, and making it apply to all widows married up to the time of the passage of the bill.

There was no sense or justice in fixing this arbitrary date, and no one can assign a single reason why a widow who married a soldier subsequent to June 27, 1890, and nursed and cared for him for ten or fifteen years prior to his death should not be pensioned as well as the widow who happened to marry a few days or a few years sooner. I would like to see both of these bills reported out of the committee and passed during this session, but when I undertake to press them I am met with the argument that we must economize; that the revenues of the Government are now running short of paying expenses from $11,000,000 to $12,000,000 per month, and as long as this condition continues we must limit appropriations.

Let me say now, I am in favor of economy. I am in favor of cutting appropriations, but I do not want to do so at the expense of the soldier and the widow. I know our appropriations have grown to enormous proportions, the Fifty-ninth Congress having appropriated nearly $2,000,000,000. I agree that it is time to call a halt. The taxpayers are already groaning under the burdens imposed upon them, but the trouble lies in the fact that thousands are needlessly and uselessly expended in payment of salaries of unnecessary officers and clerks kept on the pay roll at the expense of the people. I know great pressure is brought to bear on those Representatives who have agencies in their districts by the employees of such agencies insisting that they be continued in order that they may remain on the pay roll. But we must remember the people are to be considered first and the beneficiaries of the agencies afterwards. This is a Government by and for the people, and not a Government for officeholders.

I am for the consolidation of these agencies, because it means both economy and better service. Not only should we economize in this way, but I am in favor of cutting out unnecessary expenditures all along the line. I believe in retrenchment and reform. Why, Mr. Chairman, it is now proposed to increase the annual appropriation, which is now $25,000, to $37,000 for the use of the President in maintaining horses, carriages, and automobiles. Not only that, but I learn that the Senate has just passed a bill increasing the salary of the President from $50,000 to $100,000 per year. Plenty of money to spend that the President may ride in carriages and automobiles at the expense of $37,000 per year, and in addition draw an annual salary of $100,000, but no money to appropriate when a decent and deserving pension is asked for the old soldier, whose service made the greatness and grandeur of this country possible.

Mr. Chairman, so far as I am concerned, I shall stand by both the President and the soldier, but I believe the present salary of the President is ample and sufficient, and under no consideration will I vote to increase it to the extent proposed. Neither will I support the proposition to appropriate $37,000 annually, in lieu of $25,000, for the maintenance of horses, carriages, and automobiles for the use of the President-elect. All of our Presidents up to this time have been able to get along

on $25,000 annually for this purpose, and I am sure our incoming President, Judge Taft, who I hope and believe will make one of our greatest and best Presidents, can do likewise. So long as I am a Member of this House I shall oppose all extravagant expenditure of the people's money, no matter by whom expended; but I shall always vote for and insist upon liberal appropriations for the payment of pensions.

I hope the amendment of the gentleman from Ohio will be defeated, and that the 18 pension agencies will be consolidated, thereby saving at least $400,000 annually, and that this amount so saved will be used in the payment of increased pensions to soldiers of the civil war.

Eulogy on Hon. Daniel L. D. Granger.

REMARKS

OF

HON. W. BOURKE COCKRAN,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tribute to the memory of the Hon. DANIEL L. D. GRANGER, late a Member of this House from the State of Rhode Island.

"*Resolved*, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. COCKRAN said:

Mr. SPEAKER: On the 14th day of February, 1909, Members of Congress approaching the Capitol saw the flag at half-mast and thus for the first time were apprised of a great loss that had befallen the public service. DANIEL L. D. GRANGER, a Representative in Congress from Rhode Island, died during the previous night. His last illness had been long and tedious, but he had persisted with such firmness in attempting to continue the performance of his duties that few realized the desperate state of his health when he appeared in the Committee on Ways and Means during the public hearings lately held on the tariff. This iron determination to remain at his post under conditions so painful that a man of less rugged fiber would have considered himself justified in employing all his time and thought in efforts to alleviate his physical suffering illustrates strikingly the scrupulous fidelity to duty which was the dominant feature of his character and which explains his long career of self-renunciation, of usefulness, and of honor.

It would be profitless to repeat here the account of his life and of his public services, already given in complete and loving detail by others among the colleagues who served with him and the friends who revere his memory.

There is, however, one aspect of his career which, I think, deserves special mention for the light it sheds upon the political system of which he was an important feature and on the quality of the citizenship which he adorned.

When we recall the length of his public service, the various offices he filled in his own State, as well as in the Nation, and the success he achieved in each, the fact that his death has been followed by no evil consequences to the body politic establishes conspicuously the excellence of our political system. In any other country the death of such a valuable public servant must have left a palpable void in the machinery of government. His sudden removal from the popular representative body, and from its most important committee, must have been followed by some impairment of its efficiency, if not by serious disturbance of its operations. The fact that notwithstanding his sudden abrupt removal the efficiency of the House remains unimpaired, the current of legislation uninterrupted, the stability of government unaffected prove conclusively that to the perfection of our political system no one life is absolutely essential.

While, however, no man is indispensable to the efficiency of our Government, it is nevertheless by the virtues and patriotic activities of all men subject to its authority that its functions must be performed, its vigor maintained, its excellence advanced. Effective maintenance of such a system is possible only where civic virtue of the highest order is a common possession of its citizens. To have become distinguished in such a citizenship establishes higher merit than to have become indispensable in a community composed of baser elements. The extent to which our late colleague achieved this distinction can be judged by the spontaneous expressions of regret which his death has provoked. The highest praise which a public servant under our system can deserve is that which the unanimous voice of his fellows bestows on DANIEL L. D. GRANGER. He took a foremost place in the foremost representative body of the foremost Nation of the world, and he proved himself worthy of it. To have merited this universal acknowledgment is the noblest crown that can reward a useful life of unwearied, unselfish public service.

That he has merited it fully and completely is shown by the profound respect in which all his associates, in common with the whole body of the American people, hold the character he established, the high value they place on the virtues he possessed, the deep gratitude with which they appreciate the services he rendered, the pride and affection with which they treasure the memory he has left.

Insufficiency of Appropriation Made for the Building of Colored Schools in the District of Columbia.

SPEECH

OF

HON. J. VAN VECHTEN OLCOTT,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909,

On the bill (H. R. 25392) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes.

Mr. OLCOTT said:

Mr. SPEAKER: I feel it my duty to call attention to an error and oversight in H. R. 25392—

An act making appropriations to provide for the expenses of the District of Columbia for the fiscal year ending June 30, 1910, and for other purposes.

The error and oversight are in respect to the appropriations in the item of buildings and grounds for the colored public schools of the District of Columbia. H. R. 25392 contains items for colored public schools as follows:

(*a*) For erection of a four-room addition to Lovejoy School building, $32,000.

(*b*) For purchase of additional grounds adjacent to Garfield School, approximately 85,000 square feet, $3,000.

(*c*) That the appropriation of $26,000 made in the District of Columbia appropriation act for the fiscal year 1902, for 1 four-room building and site, Brookland (colored), seventh division, is hereby made available for the purchase of site and construction of a 2-room school building at such a point in or near Brookland as may be selected by the Commissioners of the District of Columbia.

The third of these items (*c*) is not a new appropriation, but a provision whereby an appropriation made eight years ago may now be applied to the building of a two-room schoolhouse in Brookland in place of the Bunker Hill Road School, instead of a four-room schoolhouse as originally provided. The second item (*b*) is not a new appropriation, but only a continuation and completion of a former appropriation for the Garfield School. The first item (*a*) is the only new appropriation included in H. R. 25392 for buildings and grounds of colored public schools in the District of Columbia. In a word, the aggregate appropriation for buildings and grounds for colored schools provided by the act is only $32,000.

On the other hand, it is a fact in the colored schools (1) that in the elementary grades over 11 classes above the second grade are now being taught upon a half-day basis in unavoidable violation of the law, because there are neither permanent nor portable buildings enough to accommodate these children; (2) that the colored elementary schools have not one adequately equipped manual-training center, in spite of the great need for hand as well as head training; (3) that the Armstrong Manual Training School—a high school—and the M Street High School are very greatly overcrowded, to the great injury of their instruction and training, and that this congestion grows worse each year; (4) that the normal school, which trains all the teachers in the colored elementary schools and consequently all the teachers of the vast majority of the colored children of Washington, is at present ludicrously housed in parts of two elementary school buildings to the grave embarrassment of its important work; (5) that some of the schoolhouses are unfit for use; for example, the dilapidated wooden structures at Fort Slocum, Chain Bridge road, Ivy City, Benning road, and Birney annex.

The most casual and superficial inspection of the facts make it clear that the colored public schools of the District of Columbia are in great need of appropriations for buildings and grounds.

In the management of the public schools and their expenditures it is recognized that the negro population and the negro pupils of the public schools comprise one-third of the whole enrollment. The supreme court of the District of Columbia has appointed three colored members of the board of education out of a membership of nine.

It is recognized by the board of education and the Board of Commissioners of the District of Columbia and by the committees of Congress that the appropriations for colored schools and white schools should be in this ratio. The board of education and the Commissioners of the District of Columbia accordingly joined in recommending to Congress new appropriations in the sum of $327,000 for the buildings and grounds of the colored public schools of the District of Columbia.

But H. R. 25392, as passed by the House of Representatives and by the Senate prior to conference, provides for new appropriations in the item of buildings and grounds for white schools aggregating $993,000, as against $32,000 for colored schools. This astonishing disproportion is a very serious matter. It seems to me to be contrary to the demands of justice and the public welfare when one-third of the whole enrollment of pupils in the public schools at the capital of the Nation receives in the item of buildings and grounds, as provided in the bill, only 3 per cent of the aggregate appropriation.

It is not necessary at this time to argue in regard to the necessity for making proper provision for the education of all children in the city of Washington, both white and black. In such education rests the safety of the community, and no expenditure of the Government can possibly be made more important than the proper housing of children who are educated at public schools. It does not seem possible that the appropriation in the expenditures for schools for the colored children and the white children could have been specifically brought to the attention of the subcommittee on appropriations that had charge of the bill for the appropriation for the District of Columbia. Provision must be made for all children in the District, both white and black, and such provision must include the erection of proper fireproof structures, and, even at a time when a deficit in the Treasury stares Congress in the face, it will be the falsest kind of economy not to provide suitable buildings for the education of children in the District.

I hope, when the Committee on Appropriations takes up the question of making provision for the care of the schools in the District at the next session of Congress, they will see that a proper sum is appropriated for the colored schools as well as the white schools, and I shall so use my best endeavors at the proper time to urge the committee to make such provision.

Ocean Mail.

SPEECH

OF

HON. CHARLES B. LANDIS,

OF INDIANA,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, March 2, 1909.

The House having under consideration the bill S. 28, having for its object the betterment of mail facilities between the United States and China, Japan, the Philippines, Australasia, and South America—

Mr. LANDIS said:

Mr. SPEAKER: I shall vote for this bill. I would vote for it if it were broader and more generous in its provisions. I sincerely trust it may prove a start toward such a rehabilitation of the American merchant marine as will restore our flag to the relative position it occupied in commerce and trade on the high seas many, many years ago. The only fear I have is that the inducements offered will not prove sufficiently attractive to American investors to lead them to take advantage of its provisions.

On a former occasion I voted against a bill similar to this. I cast that vote blindly. I was not informed. I was also influenced by prejudice. I contend that no man can fairly study and investigate this question without coming to the conclusion that it is vital to the Republic to at once take such steps as will lead to our participation in ocean commerce. If this bill passes, we will have made a modest start.

The application of this bill is limited to Australasia, Japan, China, the Philippines, and South America. Our tonnage on the Pacific has been cut in two within the past two years. Our ships have been unable to compete with the ships of Japan and other nations. The Pacific Mail would have gone out of business or taken a foreign flag ere this but for the fact that it was so intimately associated with the Hill system of railroads as to guarantee its life. The Chicago, Milwaukee and St. Paul will soon be built through to the coast. That road has, I understand, made arrangements with a Japanese steamship company to transport its shipments to the Orient. American vessels on the Pacific have been going out of business rapidly. They can not afford to remain in the business. They are being driven out by the cheap wages, the cheap food, and the cheap sleeping quarters, which are acceptable to sailors under foreign flags. The situation is embarrassing; it is humiliating. I contend that it is little less than a national menace.

That American vessels flying the American flag and carrying American products should go to China, to Japan, to the Philippines, and to Australasia can not, I submit, admit of dispute. But it is that provision of this bill which reaches out toward South America that is most attractive to me—toward all Latin America, the most inviting field for business conquests on the entire globe. I believe if this bill becomes a law, if this line is started to South America, it will prove a great trunk line for all Latin America, for Mexico, Central America, the West Indies, as well as for South America.

By the republics of Latin America I mean Mexico, and the republics of Central America—the republics of the West Indies and of South America—twenty of them in all. I mean those republics which joined with the United States last year in laying the corner stone of that building in this city which is to be the home of the International Bureau of the American Republics. Over that temple 21 flags, each representing a separate and distinct national sovereignty, will have a right to fly. No such a consummation in international society has ever before been reached, and I doubt if in the future it will ever have a parallel.

A century hence the historian will marvel at the apparent lack of interest this Republic has shown in those countries and in those people in this hemisphere, who, from every point of our national interest, should have been the objects of our keenest solicitude. Like ourselves they occupy territory far removed from the scene of Old World politics, and like ourselves, through stress and turmoil, they have been working out the problem of independent self-government.

It would seem that there would have been a kinship in mutual hope and ambition which, from the very start, would have cemented social and business bonds, resulting by this time in a hemispherical compactness that would forever forestall any or all European nations from gaining a primacy in the commercial affairs and general interests of the people to the south of us. But it has not worked out in this way. We find that the people of the United States have been too busy with their own affairs to give any particular attention to the affairs of their southern neighbors. Through the years there has been more or less trade between the United States and Latin America, but it has not been the result of negotiation nor cultivation nor neighborly exchange. What they have bought of us, or what we have bought of them has had upon it the absolute and unmistakable brand of advantage. It has never known the flavor of the neighborhood; it has never carried with it a touch of sentiment. I will not say it has been the fault of Latin America. It is a matter of record that on several occasions, in years long past, the strongest of those nations made overtures to us which, if accepted in the spirit offered, would have worked wonders through the years that followed. But there seemed to be an assumed loftiness on our part, a superlativeness that chilled and drove away those who should have been our most intimate neighbors and our most confidential friends.

Blaine saw the mistake and took the first great step to rectify it. His effort was followed in a way, but not with any great enthusiasm, by Harrison, Cleveland, and McKinley. It remained for the present occupant of the White House and his splendid Secretary of State, Mr. Root, to approach and surround and invest and inspire the situation so as to lift the Pan-American idea up, high up, so high up that the whole world is to-day eagerly watching whatever move we may make to regain lost ground and to effect an entrance into territory which we have not only neglected, but toward which we seem to have displayed a studied indifference.

Within the next four years the Panama Canal will be completed. The currents of ocean commerce in this Western Hemisphere are going to be changed. There will be one "crossroads" at which the world will meet. All at once, without having fully appreciated until recently what the completion of that gigantic undertaking would mean to them, Mexico, Central America, South America, and the islands of the West Indies are to find themselves lifted from the way station to headquarters. Never, never in all time has anything been done by the hand of man that means so much, directly, to so many peo-

ple as this canal means to them. And, unless we wake up, it will be proportionately detrimental to us. Our only hope of winning by this improvement rests in our taking steps, immediate steps, to share in the coming progress and prosperity of Latin America—to get into that broad and inviting market with energy and courage. [Applause.]

In my judgment, the time has come for the people of the United States to make a specialty of Latin America. We want to make up our minds to get better acquainted. There is every evidence that such a determination on our part would be heartily reciprocated by the people of those 20 republics. We not only want to get better acquainted with Latin America, but Latin America wants to get better acquainted with us. We have been doing a little visiting on both sides. We should do more. We have been doing a little trading on both sides. We should do more. More of us want to learn to speak the languages spoken in those countries, and we want more of them to learn to speak our language. Not 5 per cent of the people of the United States who go to Latin America speak their language. It is estimated that 90 per cent of the Europeans who go there speak the language of the country. It is no exaggeration to say that Latin America to-day offers richer opportunity for honorable ambition, for skill and genius, for intellectual and industrial triumphs and victories than any other part of the world. [Applause.]

Some one has referred to Latin America as the world's neutral market. By that I presume is meant a market open to the cultivation of all nations on equal terms. It is well applied to Latin America. But the application of that term robs no nation of natural advantage with reference to this neutral market. And that is what we have had. And that is what we have neglected. And that is what we will have to turn our attention to now, with the completion of the Panama Canal, or drop so far in the rear as to never be able to regain the advantage we have thus far all but sacrificed.

Some people are inclined to sneer when the statement is made that the trade of Latin America is worth cultivating—is worth going after with American ships. Such people do not know that those 20 republics are carrying on one-third of the foreign trade of the Western Hemisphere. Listen to these figures: During the year 1907 Latin America had a foreign trade of over $2,000,000,000. The balance in her favor was more than $228,000,000. Of that two billions of trade we got one-fourth, or five hundred millions. We should have had three-fourths. We should have had one billion five hundred millions.

If we take South America separate and distinct from the other Latin territory on this hemisphere, we find that we have fallen woefully behind. She had a foreign trade during the year 1907 of $1,500,000,000. Of that we got two hundred and thirty-three millions—barely one-seventh. The balance in her favor on this small trade was about seventy millions. Of the amount South America bought abroad in 1907 we furnished about one-eighth. We should have furnished seven-eighths.

Why have we lost out in Latin America? There are a number of reasons. In the first place, until comparatively recently we have been cultivating domestic and not foreign trade, and naturally what foreign trade we have had has been along the lines of latitude and not along the lines of longitude.

In the second place, they speak Spanish and French and Portuguese. We speak English. This has been a barrier that has greatly hindered.

In the third place, we have exaggerated notions of their tendency to revolution, and have failed to differentiate between the few republics that were unsettled and the many that were stable.

In the fourth place, we have been under the impression that epidemics that have scourged us in days gone by have come to us in infected ships from those ports, and the fear of pestilence is all but an insurmountable barrier to commerce.

But during recent years these hindrances have all but vanished. Being able to more than take care of our domestic trade, we are going after foreign trade. In the last ten years we have more than doubled our foreign trade, notwithstanding the fact that we have had no ships of our own worth mentioning on the sea. And we are taking up the language proposition. Since the Spanish-American war and our acquisition of the Philippines and Porto Rico and our new relation to Cuba hundreds of colleges and many high schools have inaugurated the teaching of Spanish. Our boys and girls are getting ready for their work. The boys and girls of the United States have not only kept abreast of the American Congress, but they have gone ahead of us. They are preparing to enter those inviting fields equipped to speak the language of the people with whom they come in contact. [Applause.]

I would say, too, Mr. Speaker, that the days of revolution in Latin America are, in my judgment, practically over. In recent years the threat and menace that come with political disturbances has been confined largely to a republic in the West Indies and to Venezuela. But our people are slow to differentiate, and all Latin America has been compelled to rest, more or less, under the stigma.

As a matter of fact, the other republics have been as free as our own in reflecting these unstable conditions. The republic in the West Indies to which I allude has calmed down and Venezuela seems, at least, to be at rest. Castro has gone. Thank God, Castro has gone! The flight of this man, who for many years has disturbed and distressed capital and conditions in Venezuela generally, was worth untold millions to the republics of Latin America. Well could they have afforded to send him abroad in a ship whose hull was made of silver and whose machinery and smokestacks and other trimmings were made of gold, for he was not only a continuous menace to the welfare, the development, the progress, and prosperity of his own country, but to the welfare, development, progress, and prosperity of Mexico and Central America and South America and the islands of the West Indies. I have said that we were slow to differentiate with reference to Latin America. We have been too prone to reason that in view of the fact that Venezuela is Latin and in view of the fact that the Republic of Venezuela has been disturbed by continuous revolution, therefore all the Latin republics are disturbed by revolution. There has been too much of a disposition to associate exaction, confiscation, assassination, the sword, and torch, and everything else that horrifies conservative society and alarms investment with all Latin America. This has been unfair to the great majority of those republics and is a reflection on our intelligence. Five-sixths of Latin America has been as free from revolution during the last quarter of a century as has the United States. And now Castro has gone. An orderly régime has succeeded him, and the people of Venezuela welcome the succession. With this disturber across the sea, with agreements pledging the settlement of disputes between that country or its people with other countries and other peoples to courts of law or arbitration fairly constituted, the last glaring, flaring, ever-present reproach to Latin America has disappeared, and, in my judgment, from this day on those 20 republics, with their 20 flags, will challenge the prosperity of the world, and in their ambition to lift themselves to the high plane occupied by those nations north of the equator will win the admiration of all Christendom. [Applause.]

In this connection I would also say, too, Mr. Speaker, that the epidemic proposition has been solved. Sanitation has been reduced to a science. We no longer fear a visitation of Asiatic cholera; we no longer fear yellow fever. We have conquered both germs. We not only rescued Cuba from outrage and oppression, but we rescued her from pestilence and disease. We taught her how she might live and fight the scourge. And the lessons we taught Cuba have been learned at Panama and along the miasmatic east coast of Central America and at Guayaquil on the west coast of South America, localities which ten years ago were synonymous with infection and contagion and death.

The whole situation with reference to Latin America has changed during the past decade, and that citizen of the United States who does not appreciate it is deaf and dumb and blind. Barriers which hindered those Republics, which reflected discreditably upon those Republics, which tended to erect around and about them the sign, "Dangerous, keep away," have vanished, and we find nearly all of them at the goal of independent, conservative, established self-government, equipped and ready from that base to struggle for other goals to be found in the arts, sciences, in commerce, and in trade in the great, broad, open field of civilized society. [Applause.] And these Republics are represented here in Washington by as dignified and brilliant diplomats as come from any other part of the globe. [Applause.]

Let us look at these republics. Let us see why we should have ships of our own in which to visit them. First, there comes Mexico, incalculably rich Mexico. Former Ambassador Creel told me recently that $800,000,000 of American capital had, during the last decade, been invested in Mexico. Soon she will have three transcontinental railroads. There should be nothing Mexico desires that we should not be prepared to furnish. There should be nothing she offers that we should not be ready to take. She has become so gridironed with railroads closely interwoven with our systems that there is really no reason why commercially we should not be one. We can now travel in a Pullman car from New York City to the northern boundary of Guatemala.

Beyond Mexico lies Central America, with her mountains and her lowlands, with her great forests and rich mines and splen-

did agricultural areas. There we find Guatemala, Nicaragua, Costa Rica, Honduras, and Salvador. The continental domain of every one of them, except Salvador, is washed by the waters of two great oceans, midway between the Orient and the Occident. Until 1821 all five of them constituted a Spanish kingdom. From then until 1847 they were known as the "Republic of Guatemala." Then they divided up into five independent republics, and there have been years of strife and bloodshed; but they worked their problem out. In this city one year ago, with the friendly assistance and advice of Mexico and the United States, they ratified a convention that puts the effort at The Hague to shame. That convention provides for a permanent court of arbitration, to which all disputes are referred and settled, and from which court there is no appeal. The ready and cheerful acquiescence of the interested nations in a decision recently made by this court, in a question that has been the subject of contention for nearly half a century, indicates that the republics of Central America have reached, at one splendid stride, that peaceful ground to attain which other nations have hoped and struggled in vain.

Mr. Speaker, you need not be surprised if the court of arbitration of Central America becomes recognized as the court of arbitration of the Western Hemisphere. It already has the sanction of the United States and Mexico and the confidence of the republics of the West Indies and South America. [Applause.]

These Central American States are building railroads. Each will soon have a transcontinental railroad. Thousands and tens of thousands of acres of the lowlands known as the "Mosquito Coast" have been reclaimed and planted in bananas. They are in close touch with Galveston and New Orleans and Mobile and New York. Those States have resources, wealth, and people. Salvador is more thickly populated than New Hampshire. With the advantage that will accrue to Central America with the construction of the Panama Canal, no prophet can be charged with being unduly enthusiastic, it matters not what picture he might paint of the future of those five republics.

Going on down we find Colombia and Panama, the latter the youngest child in the family. It was feared that the revolution that resulted in her separation from Colombia might have bred contention and animosity that could never be dissolved. But not so. Colombia and Panama have settled their disputes. They settled them peacefully and, with Venezuela, now demand the world's recognition and confidence. Panama, Colombia, and Venezuela, with their rich plateaus and valleys, with their mighty rivers, with mineral deposits that have barely been touched, offer one continuous invitation and temptation to the wit and ingenuity of man. [Applause.]

Mr. Speaker, $200,000,000 of American capital has gone into the republics of the West Indies during the last few years. If conservatism in government prevails, who can tell the story of their growth in wealth and glory during the next decade?

I am sure there is a lamentable lack of specific information in the United States relative to South America. A minister from one of those republics told me recently that there were more things published in one week in European newspapers about matters in South America than were published in the newspapers of the United States in an entire year. I believe there should be a campaign of education here in the United States with reference to South America. I believe it should receive every inspiration and encouragement from this floor. I believe that the greatness and promise of that continent should be proclaimed in the industrial centers, in our schools and colleges. I believe it should be impressed upon capital and labor, for there is not anywhere a more inviting market for the products of either. It should be impressed upon the minds of young men looking for fields of effort where genius can find wide scope and where intellectual and material victories can be won.

How many of our people know the extent to which the Amazon River country is being opened up to the world? That river flows three times as much water as is discharged by the Mississippi. It is true it is under the equator; but by reason of the plateaus that lift high up from its banks there are represented in that equatorial region the climates of both the Torrid and Temperate zones. One thousand miles up that stream is a modern city, the center of a rapidly developing territory.

How many people here in the United States know anything specific about Brazil? How many Members on this floor know that Brazil is larger than the United States—that we could place all continental United States within her area and have enough left over to accommodate the German Empire? How many people in the United States know anything specific about Rio de Janeiro—know that it is a city of almost a million people, and that it has spent more money for public improvements during the past year than any city in the United States except New York? How many people in the United States know that it is one of the most interesting national centers of civilization, industry, art, literature, and education in all the world? How many people know that Brazil in 1907 sold to the United States coffee and other products worth nearly one hundred millions, but bought our exports to the extent of but $15,000,000? How many people know the extent to which that splendid country is building railroads, improving her rivers, establishing systems of public schools, garnishing her cities, and by every known method lifting herself to the high standard of modern national comfort and equipment? Think of the millions upon millions of acres of land now inviting the immigration of the world! And the United States, proud United States, boastful United States, has no fast mail or express steamship going to and from Brazil! And there are men on this floor opposed to this modest start to establish a line! It would seem unthinkable. [Applause.]

How high a grade would the average citizen of the United States expect to make if compelled to pass a civil-service examination on Uruguay and Paraguay? How many of them know that Montevideo, a city of more than 300,000, is now spending $10,000,000 on her harbor? But the people of Europe know that Uruguay and Paraguay are coming to the front. The people of Europe are going to Uruguay and Paraguay in ships of their own. These two countries are anxious to get in touch with the world, and there is now being projected from Asuncion, the capital of Paraguay, an improvement of the river Parana, and a railroad system, that will bind her trade and commerce, her interests and ambitions, with Uruguay and Argentina on the one hand, and Brazil on the other.

These countries are offering every conceivable inducement for immigration, and they are getting it.

How ignorant our people are on the real status of Argentina among the nations of the world! The farmers in the West and Northwest know, in sort of an indefinite way, that Argentina raises enough wheat to in some way affect the Liverpool market, but they have never gone into particulars about Argentina. Every nation on earth except the United States knows that, as a matter of fact, Argentina is a marvel among nations. She has been described as "a wonderland of material progress." She might still be described as "wonderland of material promise." In former years, when I have seen Argentina on the map and spoken indefinitely of her, I have estimated her as about the size of the splendid Commonwealth of Illinois. I submitted the query, as to the extent of her geographical dimensions, to a coterie of intelligent fellow-citizens in the cloakroom here recently, and the most extravagant of them ventured the suggestion that Argentina was almost as large as Texas. That is true—Argentina is larger than Texas. Argentina is larger than New England and all the Atlantic States and all the Southern States combined. Aye, more, Argentina is as large as all that portion of the United States east of the Mississippi River, with the first chain of States to the west of that river added. We are looking toward China and Japan for foreign trade, and we do well, for China has a population of 300,000,000 and Japan has a population of 40,000,000. Argentine, however, with a population of only 6,000,000, has a greater foreign commerce than either China or Japan. [Applause.] Argentina has a larger foreign commerce than any nation in proportion to her population. Her foreign trade last year was $600,000,000, or $100 per capita. Buenos Aires, her capital, has 1,250,000 people, and is growing more rapidly than any city in the United States, except New York and Chicago. It is the largest city in the world south of the equator.

Paris is the only Latin city that outranks her in population. Among municipalities Buenos Aires is considered one of the wonders of the world. She has the finest system of docks and wharves in the world. She recently spent $40,000,000 in improving them. She is now getting ready to build an intricate system of underground railroads. Buenos Aires has the best equipped and most expensively housed newspaper on earth. She has an opera house that cost $10,000,000.

Argentina! Such is Argentina! She has been building railroads. The trip can be made by rail, with the exception of a small gap over the summit of the Andes, from Buenos Aires to Valparaiso, Chile, in forty-eight hours, and one can travel in a Pullman car from the borders of Bolivia, on the north, to the borders of Patagonia, on the south. It is not a matter of common information in the United States that Chile and Argentina are now being connected by the construction of the longest tunnel in the world. Three hundred and fifty thousand immigrants from Spain, Italy, England, and Germany passed into that country last year. They are getting people in South America. They are getting Germans, they are getting English, they are getting Swedes and Danes and Norwegians and

Belgians and Frenchmen and Italians. They are repeating down there what has been going on up here, and it is going to result in a blood, in a manhood and womanhood that will vie with us in the progress of the century. [Applause.]

The west coast of South America! Who knows anything specific about the west coast of South America? The Europeans. And so does Japan. And so does China. Last year that west-coast trade amounted to $300,000,000. We got fifty millions of it, which is one-sixth; we should have had five-sixths.

There are 12,000,000 people on that west coast. They are getting ready to spend $60,000,000 on their harbors within the next ten years. They have already contracted for $20,000,000 worth of harbor improvements at Valparaiso, the contractors being Frenchmen. The government gurantees them 5 per cent on their investment, and the material for that colossal improvement will be bought in France. They have coal in those mountains, and they have iron, but these deposits are practically inaccessible. They consume textiles and breadstuffs down there, but they get the greater part of them from countries other than the United States. Chile bought last year twice as much coal as she mined. She bought it from Australia and England. She should have bought it from the United States. Near the coast coal sells at from $15 to $18 per ton. In the inter-Andean regions it is $40 per ton. Up there the price of coal is so high that they fire engines with mountain moss. But we are permitting Japan and China, on the one side, and Great Britain, Germany, France, Italy, Belgium, and Austria, on the other, to crowd right in under the shadow of our coast lines and gain a commercial primacy, a foothold, that will put to the severest test the best genius of our captains of trade. Japan, far across the Pacific, has a subsidized steamship line between Yokohama and Chile, and has made an arrangement with the Chilean Government for a special system of money-order exchange to go into effect between the two nations. China also has a subsidized steamship line between Hongkong and the west coast of South America. China and Japan and European nations are cultivating South America. They know that that is the most promising field for the future. They know of the wealth of those mines. They know of the fertility of that soil. They know of the splendid possibilities of the incomparable water power stored up in the streams in those hills and mountains. Aye, more, they know that stable government is the rule and revolution the exception in South America. [Applause.]

They know that long ago nearly all of those countries got down to business; that they have small national debts and strengthened public credit; that the progress they have made has been second only to the progress that has been made here in the United States of America. They not only know this themselves, but they do not want us to know it, and they are working like beavers during these precious years to thoroughly establish themselves in that splendid territory with all its magnificent possibilities. Mr. Speaker, I contend the time has come to challenge the right of other nations to a practical monopoly of that market. [Applause.] I saw a statement, made by a prominent labor leader recently, that there were hundreds of thousands of idle workingmen in this country. Let us lay plans now to put them to work—put them to work on iron and steel and coal and foodstuffs for South America. [Applause.]

Far down toward the jumping-off place in South America is Chile, with her two great cities, Valparaiso and Santiago. Valparaiso is the largest city on the west coast of the Western Hemisphere excepting alone San Francisco. Chile is opening up her mountains and valleys to the world, which means in this instance, practically, to Europe, for we have no ships carrying our flag and products going there. We are apt to think that Chile is a small country, a little slice of the hemispherical watermelon lying snugly between the Andes and the Pacific. That is the impression we carry from the old geography, and we have learned little since to change that impression. But the extent of that country is greater than some of us imagine. Its average width is that of California, and if you were to take the country up and place its southern extremity at San Diego the northern line would be located in the middle of Alaska. That is Chile. Her capital city has 400,000 people.

The Chilean Congress has authorized the expenditure of $37,000,000 for a longitudinal railroad 800 miles long. She has obligated herself by treaty, to construct a line from Arica to La Paz, Bolivia, a distance of 320 miles. Chile and Peru are both getting ready for the completion of the Panama Canal. Each nation has taken steps to subsidize steamship lines between their countries and the canal. Peru is now constructing a floating dock that will cost half a million dollars. If we pursue the course that has characterized this Nation in the past, these subsidized lines will meet European products carried in European ships flying European flags at the west end of that canal and convey them to markets that by every rule of trade belong to us.

A little farther up the coast we find Bolivia and Peru and Ecuador. You could place Texas in Bolivia twice, and have enough room left for Kansas and Nebraska. You could place all the Atlantic States, from Maine to Georgia, in Ecuador with chances of having land left over. Without being specific with reference to these countries, I want to say that the prospect is not only alluring from the standpoint of trade, but it is enticing. There is a widening field down there for the products of American farms and the output of American factories. There is not a city in any of those countries that is not taking on new life, awakening to the possibilities of the future. These cities must be supplied with water power, with waterworks, with electric lights, with street cars, with sewerage systems. A well-known financial paper published in Berlin stated recently that within the next ten years $2,000,000,000 of European money would go into the railroads in South America. A prominent New York house recently floated a loan of several millions for Bolivia. Those republics down there are not only willing, but they are anxious for outsiders to come in with their brains and with their capital. Bolivia is offering a bounty to industries operated by steam and electricity. Those republics have given concessions for the establishment of wireless-telegraph stations all through the interior.

Bolivia, Peru, and Ecuador are extending telegraph and telephone lines toward the Amazon, bringing remote places into touch. They are now building a railroad from La Paz, Bolivia, through the Yungas region to the navigable waters of the Beni River, and on the entire line electricity will be used as the propelling force. The street cars of Lima, the capital of Peru, are now propelled by electricity brought 30 miles, from the River Chosita. The great mountains down there, with their splendid streams, coupled with the scarcity of coal, naturally mark that country, with its vast mineral and agricultural wealth, as the one place above all others where the many possibilities of electricity as the servant of man shall reach its highest development. Those republics are abreast of the times. Ecuador and Peru have the gold standard. Bolivia is now arranging to go to a gold basis, and Chile will join the procession next year. We know little about them, because we have not been visiting and trading with them, except to a limited extent. And the object of this bill is to change our policy. It is a start toward regaining what we have lost through neglect that seems little less than commercially criminal.

We are ignorant of Latin America from every standpoint. We are ignorant not only of the length and breadth of its nations and their material wealth, but we are ignorant of the history of these nations. We have never studied it. We have seemed to care nothing about it. We have blanketed it all under the broad and indefinite but all enveloping terms "revolutionary," "unstable," "unsettled," "unsafe," and let it go at that, failing to realize that against terrible odds, greater than we have faced, they were working out the same general problem of politics and civilization that confronted us. We know the names of few of their great heroes, warriors, statesmen, writers, and scholars; and yet at Lima, Peru, and Cordoba, in Argentina, are universities that antedate Yale and Harvard. Grouped in the capitals of their countries are the figures of scientists and philosophers who have made all time their debtor, whose names are familiar to the scholars of the Old World, and of heroes whose deeds of patriotism and valor have stirred the blood and implanted in the youthful breast the divine spark that oftentimes flames into great sacrifice for country. I shall never forget how, when a college boy, I was thrilled by the stories that came to us in the daily press and magazines of the naval engagements between Peru and Chile. That war between Chile, on the one hand, and Peru and Bolivia, on the other, was necessarily largely a naval war; and while the countries were small and the navies weak, as compared with the great navies, yet they were about evenly matched and afforded splendid opportunity for the display of skill and courage and daring. Both Chile and Peru lost the heads of their navies in battle, but each nation gained a name to be emblazoned on the wall of glory and heroism forever.

I recall the engagement between the Peruvian ship *Cochrane* and the Chilean ship *Esmeraldo*, the latter finally driven to bay and rammed by the enemy. Admiral Pratt, in command of the *Esmeraldo*, when the impact came, shouted, "Now, children, on board of her," and leaped to the deck of the victorious ship and to death. At the next impact, a lieutenant, with a handful of marines, followed, all to be slaughtered. Helplessly the *Esmeraldo* stood in the sea; her magazine was flooded; she had no more ammunition; her rudder had been shattered; her sur-

geon had been killed. The ship was motionless and helpless, but to the demand for surrender she returned no signal except that of defiance. The *Cochrane* delivered a last terrible ram and the boat went down with all on board, but when the waves closed in they found the Chilean band playing the national air.

Later the Peruvian *Huascar* found itself surrounded by two ironclads and a gunboat. Admiral Grau, who commanded, recognizing his desperate situation, signaled the officers of several smaller boats that were with him, which he deemed helpless in such a fight:

Save your ships. I will remain here fulfilling my duty.

The engagement that followed was indescribable in its ferocity and daring. As the battle hotly raged the Admiral, partly exposed in a conning tower, was in an instant swept out of existence by one of the 9-inch shells of the enemy. Three successive commanding officers of the *Huascar* were taken out of the conning tower dead. Three crews of the two guns in the turret were killed almost to a man. The dead bodies were pushed aside and fresh men replaced them. There was but one ending possible. The *Huascar*, disabled and a shambles of slaughtered men, surrendered. "Peru lost that day her best ship, but she gained what they now prize far more—a hero." From that day forward it has been and always will be the touching custom, when on dress parade in the Peruvian army and navy, when the roll is called, to call Admiral Grau's name first of all. An officer steps forward, salutes, and answers:

Admiral Grau not present, but accounted for. He is with the heroes.

Incidents like these remind us of Paul Jones, and Decatur, and Lawrence, and Perry, and others, who have made fame and history their everlasting debtor, and I am proud to claim those who did the deeds of daring and glory as Americans.

There was a time when Latin America was suspicious of the United States. Many of her people—some of them high in authority in government—gave ear to the continuous whisperings of other nations, jealous of that splendid market, that our ultimate aim was their absorption, bringing them under our dominion and our flag. We had done nothing to give cause for this insidiously whispered accusation, neither did we make any particular effort to dissipate it. We simply went our way, our cold and chilly way as far as paying any attention to the way Latin America viewed it, leaving our defense and vindication to time. The defense came and the vindication was complete. Not since the Spanish-American war has any nation or individual, in Europe or Latin America, had the audacity to intimate that this Nation is ambitious to extend its territory. The manner in which we entered upon that contest, the direct object of which was the rescue of the Cuban people from cruelty and oppression; the manner in which we assumed the burdens and responsibilities that came with that contest, unforeseen and unexpected; our treatment of the Filipinos, the plan contemplating as it does the gradual elevation of those people by education and participation in government until they are capable of taking care of themselves; our treatment of Porto Rico, broad, generous, and philanthropic; our attitude toward Cuba, establishing a republican form of government, going to her rescue when her flag was threatened by revolution, remaining with our army to protect from the professional political marauders the fair ideal for which her heroes and heroines had sacrificed for three hundred years, guarding and protecting her as a father would guard and protect a child—these, all these, plain, simple, and unaffected, carrying out the heart desire of the American people and fulfilling the pledge of William McKinley—have killed the innuendoes of the world, and not only calmed the fears, but won the admiration and affection of Latin America. [Applause.]

Latin America knows that what we desire for them is peace. Latin America knows that what we desire for them is better politics. Latin America knows that what we desire for them is better health. Latin America knows that what we desire for them is better homes. That conference two years ago at Rio de Janeiro meant something. That sanitary conference just adjourned at Santiago meant something. That conference of Central American States that resulted in the establishment of that permanent court of arbitration from which there is no appeal, which is now settling disputes among those nations, and which promises to become a court of arbitration for Pan-America—that means something. [Applause.]

Mr. Speaker, had we read the columns and columns of description and comment in European newspapers on the visit of our Secretary of State to South America in the summer of 1907 we would have been satisfied that over there they felt that that visit meant something.

In the years of our childhood our interest was awakened and our imagination excited by the picture printed in the old geography of Commodore Perry and his fleet in one of the harbors of Japan on the mission of opening up that country to the trade of the world. Fifty years from now the schoolbooks of this Republic will carry the picture of the reception in the harbor of Rio de Janeiro or Buenos Aires of the battle ship carrying our Secretary of State, Elihu Root, dispatched, not on a mission of war, but peace; not to demand indemnity for real or imaginary wrong, but with a message of friendship from the people of the United States.

There have been some eloquent words uttered upon supreme occasions in our history—words that will ring through the years. When opportunity demands, the right man says the right thing and in the right way. I doubt, sir, if any man has ever been more felicitous in his utterance, more timely and genuinely tactful than was Mr. Root in his formal address at the Rio de Janeiro conference, when he said:

These beneficent results the Government and people of the United States of America greatly desire. We wish for no victories but those of peace; for no territory except our own; for no sovereignty except the sovereignty over ourselves. We deem the independence and equal rights of the smallest and weakest member of the family of nations entitled to as much respect as those of the greatest empire, and we deem the observance of that respect the chief guaranty of the weak against the oppression of the strong. We neither claim nor desire any rights or privileges or powers that we do not freely concede to every American republic. We wish to increase our prosperity, to expand our trade, to grow in wealth, in wisdom, and in spirit; but our conception of the true way to accomplish this is not to pull down others and profit by their ruin, but to help all others to a common prosperity and a common wealth in order that we may all become greater and stronger together.

We have rarely had anything more lofty, more sublimely beautiful and inspiring in our language than that. That utterance answered years of innuendo and insinuation from the other side of the water. It constitutes a dignified disclaimer against the sinister charge lodged effectively by jealous contestants for cargoes and profits against this Nation of ours. That utterance constitutes genuine promise and is an utterance of awakened heart interest and neighborly sympathy and friendship on the part of eighty millions of people given by authorized proclamation. And if we follow up the advantage recently gained by getting into communication with those republics with our own ships, there will result a political hemispherical amalgamation, a Pan-Americanization that will, in my judgment, be not only an absolute shield against war between any of the nations in either North or South America, but go far toward forming an absolute guaranty of international peace.

There are two Americans whose names, in addition to that of Elihu Root, will always be associated with Colombia, Panama, and Venezuela, and the settlement of their troubles. I refer to John Barrett and William I. Buchanan. Mr. Barrett is now and has been for three years Director of the International Bureau of the American Republics. As minister to Siam, when little past his majority, he won his laurels. His record there commended him to the President when the Panama Republic was born.

He had been minister to Colombia. He knew her public men. He knew Panama, and the bloodless settlement of all disputes on the Isthmus is largely due to his diplomacy, to his tact, and skill, and genius. Indeed, in Latin America to-day the splendid personality of John Barrett has an admitted potentiality. He has navigated those rivers; he has explored those mountains; he has visited those homes; he has counseled with the public men in the capitals of all those republics. He has the affectionate confidence of the republics to the south of us, and some day the records in the State Department will give his countrymen the story of his real work. He has by his enthusiasm and energy and industry been sowing seed, the harvest of which will, if we but cooperate, amaze the people of the United States.

The other name is that of William I. Buchanan. In the little town in which I live is a frame blacksmith shop, which will some day be an object of more than local interest. It has the regulation forge and anvil and workbench, and displayed about the walls and overhead are shoes for horses' hoofs. Few people would take that blacksmith shop for a school of diplomacy, but it was there William I. Buchanan hammered iron. There is was he shod horses. Doubtless it was there he learned horse sense, which is the chief requisite in American diplomacy. Not far distant is the site of the little church in which he led the village choir. Buchanan, the Indiana blacksmith! Buchanan, leader of the village choir! His name it was the telegraph called—the query sent out by the State Department the night word came that Castro had left Venezuela and that a man was needed for the crisis. He was found in an inland city, whirled to the seashore by special train, placed on board a battle ship, a bundle of papers and telegrams crammed into his hands, and he was off for Venezuela. He has done his work and done it well. He is known in South America as the "Pacificator." As an arbitrator he settled the boundary dispute between Chile and Argentina.

I am told that the method he adopted was as unique as it was successful. He settled it in sections and made his an-

nouncements at the completion of each settlement. The settlement of the first section was a concession to the contention of Chile. Chile rejoiced and Argentina frothed. The settlement of the second contention was a concession to Argentina and Argentina rejoiced while Chile frothed. And thus alternately he gave each a thrill of joy and disappointment along the entire line, but when the final finding was recorded each one felt it had been vindicated in enough of its contentions to justify it in heartily indorsing the award. We have heard of "shirt-sleeve diplomacy," as applied to the American effort. I would suggest that the success we have had in South America would justify us in calling it "blacksmith diplomacy," in compliment and not in reproach.

I am reminded, Mr. Speaker, by this line of thought of a visit I paid to the little town of Salem, in southern Indiana, two years ago. I went there to worship at a shrine. I was led up an abandoned side street and halted before a little brick house covered with ivy. It was the birthplace of John Hay. His father was a poorly paid preacher, but that poor boy became the greatest diplomat of his day. You will pardon me if I say that Indiana takes pride in her contributions to American diplomacy. Indiana is proud of John Hay and William I. Buchanan, and in this connection I would suggest that all knowledge in the real school of diplomacy is not gleaned from the leaves of printed books. But I have digressed and I ask pardon for it.

Mr. Speaker, I marvel that we have any trade with the countries of South America. We have not only neglected them, treated them with indifference, but other nations have so combined the shipping with the industrial, mining, agricultural, and banking interests down there as to practically place us at their mercy. The men who own the steamships—the English, the German, the French, and the Belgian capitalists—also own the mines and the irrigation enterprises and the railroads and the sugar and coffee plantations and the banks. The European policy has been one of amalgamation of every imaginable commercial interest. There is not a citizen of the United States with a bank in all South America. Other nations have dotted that continent with banks. The tourist and business travel from South America is to Europe, not to North America. There are more people who leave Rio de Janeiro for Europe in one week than come to the United States in twelve months. More people bent on business or pleasure go from Buenos Aires in a single ship than come to the United States in a year on all ships. They go to Europe for business and pleasure and education. There is not a single fast passenger mail and express steamer plying regularly between this country and South America. There are some sailing vessels, but people traveling on business or pleasure rarely travel on a local freight, either on land or sea. Indeed, foreign nations, having control of the sea, seem to have established swift communication everywhere except between the United States and South America. The reason is apparent. They want that market for themselves—they want a monopoly of it. The flag of the United States is a stranger in South America, as it is in all other parts of the world, unless it flies from the masthead of a battle ship. A friend who recently traveled around South America wrote me as follows:

I left Colon, on the Caribbean side of the Isthmus, traveled east and south along the coast of Colombia; Venezuela; British, French, and Dutch Guiana; Brazil; Uruguay; and Argentina; and then came through the Straits of Magellan and went up the coast of Chile, Bolivia, Peru, and Ecuador to Panama, on the Pacific side of the Isthmus, a distance of 14,000 miles. During this trip, in stopping at some 50 ports, including such great ones as Rio de Janeiro, Montevideo, Buenos Aires, Valparaiso, Callao, and Guayaquil, I did not see the American flag flying over a single merchant steamship, although in all ports, ranging from nearly 100 merchant vessels in Buenos Aires down to 2 or 3 at Pernambuco, I saw everywhere, flying in abundance, the flags of foreign nations, including that of Japan. When we left Colon there was a vessel of the Panama Steamship Company in port flying the American flag. When we arrived at Panama, after a 14,000-mile journey, I saw other merchant vessels belonging to the Panama Steamship Company flying the American flag. The only steamships in the course of my long journey which were American were several men-of-war and 1 private yacht.

I repeat it, Mr. Speaker, I marvel that we have any trade with South America. With the Germans, English, French, Belgians, and Austrians controlling the shipping, and amalgamating their shipping interests with railroads, mines, banks, docks, and plantations, the dividend of the one depending on the prosperity of the other, how can we, without ships, without fast mail and express facilities of any kind, without banks, without traveling men speaking the language of those people, with our business intrusted to wholesale houses whose proprietors owe allegiance to other flags, commercially unfriendly and prejudiced, expect to do anything? And yet in 1907 we sold South America one-eighth of what she bought! Having done this under unpropitious conditions, what might we have done under propitious conditions, with our own ships, with our own banks, with our own wholesale houses, with our own traveling men speaking the Spanish, French, and Portuguese languages?

Trade follows the flag. We could not have fallen behind in this race for the markets of South America if we had our flag on the sea. I am in favor of putting it on the sea, and I would start it between North and South America. [Applause.] In the year ending June 30, 1905, there entered the port of Rio de Janeiro steamers and sailing vessels flying the flag of Austria-Hungary 120, of Norway 142, of Italy 165, of Argentina 264, of France 349, of Germany 657, of Great Britain 1,785, of the United States no steamers and 7 sailing vessels, 2 of which were in distress.

I have been a Member of this House for twelve years. During that time many questions upon which men and parties differed have come before this body. I have never cast but one vote that I can recall that I would change were it in my power to do so. That was the vote I cast against the bill that had for its object the bettering of mail facilities between this country and South America. [Applause.] I yielded my personal view to that of my constituency. Since then I have been serving on the Pan-American Committee, and I have learned something. That clamor that came from my State was the offspring of prejudice, unjustified prejudice. It was the same brand of prejudice organized long ago against the doctrine of protection, which, had not our fathers taken it by the throat, would have made us hewers of wood and drawers of water for Europe—an easy-going peasantry. It was the same prejudice, awakened in 1896, against the gold standard, which, had not the Republican party taken it by the throat, would have made us the most pitiable objects of chagrin and humiliation in all the world. It is this prejudice that has taken our flag from the sea—that has made it a stranger to every ship except the man-of-war. We are going to put it back on the sea. The manufacturers are going to help us put it back on the sea. The merchants are going to help us put it back on the sea. The farmers, east and west, and north and south, who have been misled, and who have more at stake than any other class of our people, they will learn the facts, prejudice will be dethroned, and they will help us put the American flag back upon the sea. [Applause.]

The plain truth is, the people of the United States have been so busy with transportation among themselves that they have given little attention to sea-carrying between and among other nations. I believe they are ready to take up that proposition now. They will be amazed when they learn the truth.

They will be amazed when they learn that our tonnage now is 200,000 less than it was one hundred years ago.

The people of the United States will be amazed to learn that we now carry less than 8 per cent of our foreign commerce. In 1861 we carried 65 per cent.

The people of the United States will be amazed to learn that American capitalists have invested $200,000,000 in the subsidized ships of other nations flying other flags.

The people of the United States will be amazed to know that when our American delegates went to the Pan-American Conference at Rio de Janeiro two years ago, they had to go under a foreign flag to England, or Germany, and thence under a foreign flag to the place of destination.

The people of the United States will be amazed to learn that of the 292 merchant steamships that passed through the Suez Canal last January, 173 were British, 42 were German, 14 were French, and 1 floated the flag of the United States.

The people of the United States will be amazed when they learn that we are paying approximately $500,000 a day to foreign ships for carrying our commerce.

The people of the United States will be amazed to learn that the six leading maritime nations have been paying for several years about $28,000,000 to their mail ships and merchantmen in the way of subsidies or subventions. We have paid practically nothing.

The people of the United States will be amazed to learn that when our battle-ship fleet started around the world it was accompanied by 27 transports carrying coal, all of these transports carrying foreign flags, and that if we had become involved in war during that cruise every one of them would have been compelled to abandon the fleet, thus leaving it as helpless as a traveler in the desert of Sahara without food or drink.

The people of the United States will be amazed to learn that Japan has to-day over 500 vessels she could convert into transports on a moment's notice. We are woefully deficient.

Gentlemen on the other side say, "Let down the bars on shipbuilding material. Let it in free, and that will give us American ships flying the American flag."

We have that to-day. The Dingley law provides for that.

Gentlemen say, "Give American register to foreign-built vessels on condition that they fly the American flag." Those two vessels we bought recently to ply between New York and Panama, they had that. And they had to go out of business, and we bought them at a 40 per cent discount. The *Kroonland* and the *Finland*, plying between New York and Europe, had that, and last week they surrendered, gave up the American flag, and now fly the Belgian flag.

Mr. Speaker, the people of the United States will soon realize that this proposition is as broad as all the sea and all the land. They know we have the largest coast of any nation. They know we have the great harbors. They know that we have the most and greatest navigable rivers and railroads connecting seaports with the interior. They know we have the most timber, the most ore, the most coal, the most agricultural products, and they will arise and break this monopoly that foreign ships have formed against us—foreign ships that carry our products where they please, when they please, and at whatever price they please.

The present situation is nothing more nor less than a conspiracy against the United States to restrain our trade on the high seas. We will soon have completed the Panama Canal. It will be the realization of the dream of generations. That canal is for the world—for the world's commerce and trade. I say to you that unless we awaken to the importance of the Central and South American and West Indian opportunity and the importance of rehabilitating our merchant marine, the construction of that canal will mean more to Europe and Asia than to the United States. It will not only rob us of hundreds of millions of dollars of transcontinental carriage, but it will enable our competitors to get in on both sides of us with their product at ballast prices. If we are alive to the opportunities offered and the advantages we enjoy, with the completion of the Panama Canal, I see the beginning of a new epoch—a mighty epoch for this hemisphere. It will be an epoch ushered in by the combined hope and ambition of 21 republics and 21 flags, all inspired by one splendid faith and promise—faith in the ability of the individual to secure his rights through processes of organized society, bedrocked upon the Golden Rule, and promise that the example given will be emulated by all nations and be an inspiration to all peoples. These 21 republics, connected by swift ships, by cable, by telegraph, by telephone, by a railroad extending from New York to Patagonia and Chile, with a court of arbitration to settle all disputes among themselves, would drive international hate into hiding and put war to shame. I can see how the Western Hemisphere can, within two decades, force disarmament in all the world and become the acknowledged and accepted umpire of this century. [Long and continuous applause.]

Companies B, C, and D of the Twenty-fifth U. S. Infantry.

SPEECH

OF

HON. CHARLES L. BARTLETT,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, February 27, 1909.

The House having under consideration the bill (S. 5729) to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D of the Twenty-fifth U. S. Infantry, who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof—

Mr. BARTLETT of Georgia said:

Mr. SPEAKER: I oppose this bill and its passage because the investigations made by the President and because the evidence taken in every investigation showed that these men who have been discharged, and whom you seek here in this extraordinary manner to reenlist, with full back pay and emoluments, do not deserve to again wear the uniform of the United States or to be intrusted with the honor of its flag, both of which they have so flagrantly dishonored. The President of the United States, in the first message that he sent to the Senate upon this subject, after having declared that he had carefully investigated all the facts in the case, said that he demanded and challenged the approval and support of every citizen of this country, whatever his color, "provided he has only in him the spirit of genuine and farsighted patriotism."

The President again, in 1907, sent a message to the Senate, in which he not only reiterated his message of December, 1906, but after further investigation declared he was still convinced of the guilt of these soldiers, and that the new testimony had strengthened his first conviction of their guilt. Not until March 11, 1908, was any suggestion made with reference to making the change in the status of these discharged negro soldiers by act of Congress, and that happened to be the time when the campaign for the nomination and election of President of the United States had begun and the vote of the colored citizen was needed both in the selection of delegates and at the polls in November.

To show what the state of mind of President Roosevelt was on the subject, I quote from his messages to the Senate on this subject.

In the message of December 19, 1906, he uses the following language:

> Precisely the same action would have been taken had the troops been white—indeed, the discharge would probably have been made in more summary fashion. General Garlington is a native of South Carolina; Lieutenant-Colonel Lovering is a native of New Hampshire; Major Blocksom is a native of Ohio. As it happens, the disclosure of the guilt of the troops was made in the report of the officer who comes from Ohio, and the efforts of the officer who comes from South Carolina were confined to the endeavor to shield the innocent men of the companies in question, if any such there were, by securing information which would enable us adequately to punish the guilty. But I wish it distinctly understood that the fact of the birthplace of either officer is one which I absolutely refuse to consider. The standard of professional honor and of loyalty to the flag and the service is the same for all officers and all enlisted men of the United States Army, and I resent with the keenest indignation any effort to draw any line among them based upon birthplace, creed, or any other consideration of the kind. I should put the same entire faith in these reports if it had happened that they were all made by men coming from some one State, whether in the South or the North, the East or the West, as I now do, when, as it happens, they were made by officers born in different States.
>
> Major Blocksom's report is most careful, is based upon the testimony of scores of eyewitnesses—testimony which conflicted only in nonessentials and which established the essential facts beyond chance of successful contradiction. Not only has no successful effort been made to traverse his findings in any essential particular, but, as a matter of fact, every trustworthy report from outsiders amply corroborates them.

And again he says:

> A blacker never stained the annals of our army. It has been supplemented by another, only less black, in the shape of a successful conspiracy of silence for the purpose of shielding those who took part in the original conspiracy of murder. These soldiers were not schoolboys on a frolic. They were full-grown men, in the uniform of the United States Army, armed with deadly weapons, sworn to uphold the laws of the United States, and under every obligation of oath and honor not merely to refrain from criminality, but with the sturdiest rigor to hunt down criminality; and the crime they committed or connived at was murder. They perverted the power put into their hands to sustain the law into the most deadly violation of the law. The noncommissioned officers are primarily responsible for the discipline and good conduct of the men; they are appointed to their positions for the very purpose of preserving this discipline and good conduct, and of detecting and securing the punishment of every enlisted man who does what is wrong. They fill, with reference to the discipline, a part that the commissioned officers are of course unable to fill, although the ultimate responsibility for the discipline can never be shifted from the shoulders of the latter. Under any ordinary circumstances the first duty of the noncommissioned officers, as of the commissioned officers, is to train the private in the ranks so that he may be an efficient fighting man against a foreign foe. But there is an even higher duty, so obvious that it is not under ordinary circumstances necessary so much as to allude to it—the duty of training the soldier so that he shall be a protection and not a menace to his peaceful fellow-citizens, and above all to the women and children of the Nation. Unless this duty is well performed, the army becomes a mere dangerous mob; and if conduct such as that of the murderers in question is not, where possible, punished, and, where this is not possible, unless the chance of its repetition is guarded against in the most thoroughgoing fashion, it would be better that the entire army should be disbanded. It is vital for the army to be imbued with the spirit which will make every man in it, and, above all, the officers and noncommissioned officers, feel it a matter of highest obligation to discover and punish, and not to shield, the criminal in uniform.
>
> Yet some of the noncommissioned officers and many of the men of the three companies in question have banded together in a conspiracy to protect the assassins and would-be assassins who have disgraced their uniform by the conduct above related. Many of these noncommissioned officers and men must have known, and all of them may have known, circumstances which would have led to the conviction of those engaged in the murderous assault. They have stolidly and as one man broken their oaths of enlistment and refused to help discover the criminals. * * *
>
> I have condemned in unstinted terms the crime of lynching perpetrated by white men, and I should take instant advantage of any opportunity whereby I could bring to justice a mob of lynchers. In precisely the same spirit I have now acted with reference to these colored men who have been guilty of a black and dastardly crime. In one policy, as in the other, I do not claim as a favor, but I challenge as a right, the support of every citizen of this country, whatever his color, provided only he has in him the spirit of genuine and farsighted patriotism.

In the message of January 14, 1907, the President says, in transmitting additional evidence concerning the Brownsville affair:

> The evidence, as will be seen, shows beyond any possibility of honest question that some individuals among the colored troops whom I have dismissed committed the outrages mentioned; and that some or all of the other individuals whom I dismissed had knowledge of the deed and shielded from the law those who committed it.
>
> The additional evidence thus taken renders it in my opinion impossible to question the conclusions upon which my order was based. I have gone most carefully over every issue of law and fact that has been raised. I am now satisfied that the effect of my order dismissing these men without honor was not to bar them from all civil employment under the Government, and therefore that the part of the order which consisted of a declaration to this effect was lacking in validity, and I have

directed that such portion be revoked. As to the rest of the order, dismissing the individuals in question without honor, and declaring the effect of such discharge under the law and regulations to be a bar to their future reenlistment either in the army or the navy, there is no doubt of my constitutional and legal power. The order was within my discretion, under the Constitution and the laws, and can not be reviewed or reversed save by another executive order. The facts did not merely warrant the action I took—they rendered such action imperative unless I was to prove false to my sworn duty.

On March 11, 1908, the President sent the following message to the Senate:

To the Senate:

On December 12, 1906, the Secretary of War by my direction issued the following order:

"Applications to reenlist from former members of Companies B, C, and D, Twenty-fifth Infantry, who were discharged under the provisions of Special Orders, No. 266, War Department, November 9, 1906, must be made in writing and be accompanied by such evidence, also in writing, as the applicant may desire to submit to show that he was neither implicated in the raid on Brownsville, Tex., on the night of August 13, 1906, nor withheld any evidence that might lead to the discovery of the perpetrators thereof."

Proceedings were begun under this order; but shortly thereafter an investigation was directed by the Senate, and the proceedings under the order were stopped. The Senate committee intrusted with the work has now completed its investigation, and finds that the facts upon which my order of discharge of November 9, 1906, was based are substantiated by the evidence. The testimony secured by the committee is therefore now available, and I desire to revive the order of December 12, 1906, and to have it carried out in whatever shape may be necessary to achieve the purpose therein set forth, any additional evidence being taken which may be of aid in the ascertainment of the truth. The time limit during which it was possible to reinstate any individual soldier in accordance with the terms of this order has, however, expired. I therefore recommend the passage of a law extending this time limit, so far as the soldiers concerned are affected, until a year after the passage of the law, and permitting the reinstatement by direction of the President of any man who in his judgment shall appear not to be within the class whose discharge was deemed necessary in order to maintain the discipline and morale of the army.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *March 11, 1908.*

It will be observed that the President in this last message recommended that these soldiers be reinstated who could show that—

He was neither implicated in the raid on Brownsville, Tex., nor withheld any evidence that might lead to the perpetrators thereof.

Yet the bill which is now to be passed, and which will be doubtless approved by the President, contains no such condition, but permits such soldiers of these companies to become eligible for enlistment whom the officers appointed shall find and report qualified for reenlistment. Nor does this bill make the fact that one of these soldiers participated in this or not or concealed the guilty a bar to his reenlistment. In fact, the passage of this bill is a complete surrender by both the President and the Congress to the demands of the political exigencies of the last presidential campaign.

The guilt of these negro soldiers of the outrage for which they were discharged has been as thoroughly and as frequently investigated, and by different people and different tribunals—probably more so—than any other event of like character that has occurred in the history of this country. From the beginning of the session of Congress in December, 1906, it has assumed the proportions of a national affair. Seven separate and distinct investigations have been made by individuals of high character, by courts, both civil and military, and by committees in Congress, and in every such investigation the conclusion has been reached that these negro soldiers were guilty.

The affray was first investigated immediately after it occurred by Major Penrose, the commanding officer of the post, in connection with a committee of the citizens of Brownsville. That committee was headed by Captain Kelly, an ex-federal soldier and a Republican, and its other members included citizens of the highest standing and respectability in the city of Brownsville. The events were fresh in the minds of the witnesses who testified before them, and the committee and Major Penrose were on the ground and were doubtless moved by an earnest desire to reach the truth. Both found and reported that the assault was made by soldiers of the Twenty-fifth Infantry.

The citizens' committee embodied its findings in a telegram to the President, of date August 15–16, 1906, a portion of which I quote:

The undersigned, a committee of citizens appointed at and by a mass meeting of the people of Brownsville, held in the federal court-house in this city on Tuesday, the 14th instant, to investigate the attack made on the city by negro troops stationed at Fort Brown, find as follows: That a few minutes before midnight on Monday, the 13th, a body of United States soldiers of the Twenty-fifth Infantry (colored), numbering between 20 and 30 men, emerged from the garrison inclosure, carrying their rifles and an abundant supply of ammunition, and also began firing in town and directly into dwellings, offices, stores, and at police and citizens. During the firing one citizen, Frank Natus, was killed in his yard, and the lieutenant of police, who rode toward the firing, had his horse killed under him and was shot through the right arm, which has since been amputated at the elbow. After firing about 200 shots, soldiers retired to their quarters. After the most diligent inquiry we find that no shots were fired from the town into or toward the garrison, nor any provocation given for the attack.

Major Penrose reported to the War Department of date August 15, 1906, in which he said, among other things:

The mayor again called upon me about 10 a. m. (August 14) and informed me that a few empty cartridge cases and used clips for our Springfield rifle had been found in the streets, and later in the morning he told me there had been picked up between 75 and 100 empty cases and used clips, as well as a few cartridges that had not been fired. Some of these I examined, and there is no doubt they are those manufactured by our Ordnance Department and issued to the troops.

Were it not for the evidence of the empty shells and used clips I should be of the firm belief that none of my men was in any way connected with the crime, but with this fact so painfully before me, I am not only convinced it was perpetrated by men of this command, but that it was carefully planned beforehand.

Major Blocksom, an inspector-general of the army, was sent to Brownsville immediately after the affray, and after a thorough and exhaustive examination and investigation reported to the same effect—that the shooting was done by the negro soldiers. The grand jury of Cameron County, Tex., in which Brownsville is located, after a careful investigation, reported that the negro soldiers made the raid and did the shooting, but they properly found no indictment, because the proof failed to identify the individuals guilty of the crime. No indictment will lie against a battalion of men.

Mr. Purdy, an Assistant Attorney-General of the United States—a man of judicial temperament; a northern man and a Republican—after a searching investigation, reached the same conclusion of guilt on the part of the soldiers.

The Penrose court-martial, composed of eight officers of the highest character and standing, and certainly not prejudiced against the soldiers, after a hearing lasting four months, likewise found that the shooting was done by the enlisted men of the Twenty-fifth Infantry stationed at Brownsville.

It may be said that in the trial of Major Penrose the question of the guilt of these men did not properly arise, and hence that finding was gratuitous. But an examination of the specifications filed against Major Penrose shows that it was one of the questions raised. In fact, the chief contention raged about it, for if it could have been established that the soldiers did not commit the outrages of the night of August 13–14, then no blame could attach to Major Penrose, and he must go free.

And, finally, Mr. Speaker, the Military Committee of the Senate, after an investigation lasting for more than a year and of the most searching and exhaustive character, has found and reported to the Senate, by a majority of 9 to 4—

That in the opinion of this committee the shooting in the affray at Brownsville on the night of August 13–14, 1906, was done by some of the colored soldiers belonging to the Twenty-fifth U. S. Infantry, then stationed at Fort Brown, Tex.

So the verdict rendered and the conclusion reached in every investigation made has been that these negro soldiers are guilty. The purpose of this bill is to restore to them the right again to enter our army, to again wear its uniform, and to receive back pay and allowances; and in all probability to again dishonor and disgrace the uniform and the flag and to become heroes in the eyes of their own race, because they not only have escaped punishment for this outrageous crime and concealed the perpetrators, but have been made the especial objects of care and protection by the Congress of the United States. The country will be fortunate indeed if in the future the Brownsville affair is not again repeated by these same soldiers on the citizens of some other community. [Applause.]

Sundry Civil Appropriation Bill.

SPEECH

OF

HON. MOSES P. KINKAID,

OF NEBRASKA,

IN THE HOUSE OF REPRESENTATIVES,

Monday, February 22, 1909.

The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes—

Mr. KINKAID said:

Mr. CHAIRMAN: I rise for the purpose of addressing myself to the subject-matter of a bill not yet introduced, but which will be introduced very early in the approaching extra session of the Congress to be called for about March 15.

I refer to the bill which will be introduced for the revision of the tariff, which I am pleased to anticipate will be known and become celebrated as the "Payne bill." It may occur to some, Mr. Chairman, that discussion at this time of the bill to be introduced in the next Congess is premature; not so, not so, if

the course of the Ways and Means Committee may be taken as a criterion, and certainly the action of that committee is peculiarly a proper criterion for what may pertain to tariff revision. The fact is, it can justly be said to the credit of the membership of the Ways and Means Committee, that they have been very diligent and almost constantly devoting their attention to the work of revision during this entire session. In fact, this committee commenced giving hearings in the interest of revision some time last session. For my part, I regard it as highly laudable that the different members of the committee have done so much gratuitously, as it were, in this, the Sixtieth Congress, for the work, as it has been resolved and pledged, for the Sixty-first Congress. During my service in Congress, which covers only six years, I have not observed or learned of any committee having performed more diligent and arduous service for the work, even of pending business of the session, let alone of a future Congress, than has this committee been doing in anticipation of the work of the next Congress.

I have not learned of any committee which has worked so many hours per day or so many days of the week as has this committee. From my own observation it has appeared to me that the committee must have worked as much as sixteen hours per day some of the time; at any rate some of the members, I think, must have worked fully sixteen hours per day. I have been very much impressed, too, Mr. Chairman, with the painstaking way the committee has pursued to gather the information necessary to qualify its membership to draft a revision bill, and whatever differences may arise, of which there are sure to be many, with so many schedules to be gone over affecting so many interests, so many localities, and so many individual interests, directly and indirectly, I feel confident that the bill which will be introduced will, after the most extended discussion, carry the conviction that its provisions have been the result of the most careful and painstaking investigation, coupled with the purpose to conserve the best interests and greatest good of the progressive people and great Republic whom we have the honor to represent.

But, Mr. Chairman, now that the platforms of the two great parties pledge revision and that this was done in response and obedience to the prevailing sentiment, and that the President-elect very laudably has been taking steps, as far as his yet incomplete title to the office of Chief Executive may permit of it, to call an extra session of the Congress for an early date for the express purpose of revision, and as it has been therefore virtually decreed that a revision of the tariff shall be made as early as it may be practicable by the Sixty-first Congress, it therefore devolves upon the Congress in the interests of the country, in the interests of every business institution, in the interests of every individual, in the interests of the general prosperity of the country, that such revision shall be promoted without any unnecessary delay and the speedier and the quicker the better as far as haste may be consistent with the doing of justice to the many interests and the welfare involved; the speedier the better as far as rapidity may permit of arriving at correct conclusions. The decree for a revision has thus been rendered, and it is now up to the Congress to execute the decree.

Mr. Chairman, more or less sacrifice must be experienced and suffered by business interests and by everybody by a readjustment of the tariff schedules. Unavoidably there must be more or less of a pause in business undertakings, a slackening of the pace of current business, and especially must there result a suspension of the launching of new enterprises on account of the possibility or probability or even certainty that such changes in values may be affected by revision as may have much to do with particular undertakings which may be in contemplation. More or less loss must be experienced in the loss of business, in the loss of time, and perhaps in the loss of values, temporarily it is to be hoped may be the case, so that what the country must experience in tariff revision is not unreasonably comparable to that of an individual who must undergo a surgical operation. He must anticipate it, prepare for it, and even be chloroformed in order to make the operation feasible, and assuming the operation to be successful, he must have a short time in which to regain his normal vitality. Mr. Chairman, it should be the aim in the process of the present revision to limit the suspension of business and the time of apprehension and uncertainty as to what is going to be done and as to what the result will be to the shortest time which may be practicable, and this makes it pertinent to add that the action of the President-elect and of the Ways and Means Committee and of the Congress in preparing so far in advance and in preparing to the fullest extent practicable during the present Congress for the revision to be made in the next Congress should be regarded as highly laudable indeed.

Mr. Chairman, favoring tariff revision—which I do favor—I am not thereby renouncing my fealty to the policy of protection, not in the least degree. I am just as devout a protectionist as I have ever been, and I early espoused the doctrine. Our country, our people, are greatly indebted to the policy of protection for its achievements in the general amelioration of the conditions of the people and our national upbuilding.

Mr. Chairman, a table which I hold and shall ask to have made a part of my remarks shows a comparison of the conditions of the people of this country in 1860 and in 1905, during a period when the policy of protection prevailed. This table shows results most gratifying to protectionists. I regret I could not find it practicable to carry the comparison to 1907, as it would have been yet more favorable to the policy of protection.

The table shows the development of the country between 1860 and 1905. The comparison ends with 1905, because an industrial census was taken that year, and we can not make a complete comparison for a later year.

	1860.	1905.	Per cent increase.
Population	13,443,321	83,143,000	618
Wealth	$16,159,616,000	$107,104,211,917	563
Wealth per capita	$513.93	$1,310.11	155
Money circulation	$435,407,252	$2,587,882,653	494
Circulation per capita	$13.85	$31.08	124
Imports of merchandise	$353,616,119	$1,117,513,071	216
Exports of merchandise	$333,576,057	$1,518,561,666	355
Imports of gold and silver	$8,550,135	$81,133,826	849
Exports of gold and silver	$66,546,239	$141,442,836	113
Value of farms and farm property	$7,980,493,060	$20,514,001,838	157
Value of farm products	$1,958,030,927	$3,764,177,706	92
Manufacturing:			
Wage-earners	1,311,246	5,470,321	317
Wages	$378,879,966	$2,611,540,532	589
Value of product	$1,885,861,676	$14,802,147,087	685
Miles of railway	30,626	217,341	610

Mr. Chairman, several facts are brought out by this comparison which are deserving of special notice. The gain in things which contribute to securing the comforts of life is much greater even than the gain in population, which was certainly very great. The average individual we find to have been two and one-half times richer in the world's goods, or all of his possessions, both in property and money, in 1905 than in 1860. In money he had about two and one-fourth times as much in 1905 as in 1860, for the per capita circulation in 1860 was $13.85 and in 1905 $31.08, and at this time the per capita is a little over $35. I do not have the table here with me, but I hope I may be permitted to correct my remarks to include a table covering consecutively the years commencing with the last year of the Harrison administration, including the succeeding administration of Mr. Cleveland, and then the succeeding administrations of William McKinley and Theodore Roosevelt, the latter two under the operation of the Dingley bill, which presents a very instructive contrast, as it were, of "before taking and after taking" both the protection and tariff-for-revenue prescriptions. Under the Harrison administration our per capita increased; under the Cleveland administration our per capita decreased at a rate which, had such a policy been continued with the same continuous effect until this time, our per capita would have been reduced to about $12. However, after four years the country was rescued from the tariff-for-revenue policy, and tariff for protection was reinstated in the form of the Dingley bill. Since this, step by step, we have been climbing higher and higher in the rung of the ladder of prosperity until now our per capita circulation is over $35; and the increase of the wealth of individuals, of the people in general, has kept pace with this per capita increase of our currency.

As to the balance of trade, Mr. Chairman, in 1860 it was on the wrong side and the American people had to reach down into their pockets and dig out $20,000,000 in gold for goods imported, in addition to the value of all goods exported, while in 1905 we sold enough to foreign countries to pay for all we bought of them and put into our own pockets a balance of four hundred millions. Manufacturers gave employment to three times as many wage-earners in 1905 as in 1860 and paid them about six times as much money for the labor performed. In 1860 the average earnings of a wage-earner was $288.95, as against $470.44 in 1905. Here was a gain for labor of 65 per cent. Railway mileage had increased, due to the stimulus of the protective policy and due to the increase of business, and consequent increase of earnings; transportation rates had decreased four-fifths. Meanwhile, the attractions to wage-earners in foreign countries was so great that six times as many foreigners were attracted to our shores as had been added to our population in the whole of our previous history. No stronger testi-

monial, Mr. Chairman, in vindication of the beneficent results of the operation of an economic policy than we find in this table, which does but meager justice, in support of the policy of protection can be found in the records of the industries and commerce of any country. Contemplating this record of the policy of protection, I have been impelled to the conclusion that if it had never been inaugurated and that if we had adhered to the policy of tariff for revenue only or free-trade principles, always barren of results beneficial other than for revenue merely, that the population of our country would not have been, taking a very liberal view of it, more than one-third of what it is to-day and our wealth proportionately smaller, speaking with moderation. Mr. Chairman, it is not that I would now renounce the policy of protection, it is rather that I would preserve and conserve the policy that I favor a revision. There is a limit, and it has always been contemplated by protectionists, that there should and would be a limit to the time during which industries, or the most of them, would be accorded a protective duty.

One purpose of the policy has been to build up and develop infant industries, and while it has been expected that the people would suffer some sacrifices in the payment of higher prices for a time during such growth, it has always been promised that as a result of the development of the protected industry and the increased competition thereby resulting in that line, that lower prices would follow, and thus that a tenfold or hundredfold compensation would be reaped by the realization of such lower prices to the consumer, or the amount of goods greatly multiplied over what was before produced at the start, and that when such a condition was attained the infant industry, then grown to adultship, should be weaned of the fostering policy of protection. This promise, this pledge, made for the virtue of the policy of protection, has been fulfilled as to many industries, and in recognition of this fact and in fulfillment of promises made by protectionists the tariff was lowered as to some of these industries, and some of them were even put upon the free list when the very excellent McKinley bill was formulated. This same policy was observed in the making up of the Dingley bill, notwithstanding it supplanted the Wilson-Gorman bill of the Cleveland administration.

Such, Mr. Chairman, has been the Republican policy since 1860, though naturally not always adhered to with the strictest accuracy.

Mr. Chairman, conditions have changed since the enactment of the Dingley bill, and it is on account of these changed conditions, occurring in a great variety of ways, that a revision has come to be deemed expedient. Some of the protected industries are no longer of the infant class. By the fostering effects of protection, with other reasons added, some of them have grown to adultship; yes, to mature years. In my judgment, to longer continue protection as to some of these for the sake of protection merely would be equivalent to enacting an old-age protective-tariff law and continuing them indefinitely upon the protected list as beneficiaries, upon the theory that the time has passed when they may stand alone without the support of protection.

Mr. Chairman, it is my judgment that lumber belongs to this class.

Mr. Chairman, how shall we revise; upward or downward? In my judgment, we should revise both ways; that is, a reduction should be made as to some things—perhaps many things—and the duty taken off entirely as to others, and as to some or a few things the existing duty should be raised, and as to some entirely new resources or industries a protective duty should be imposed for the first time. In my judgment, it depends altogether upon the circumstances of each case—the existing conditions as to each individual item—as to what should be done with it. Each resource, business, or industry should receive individual attention, and each case should be decided upon its merits, standing alone. Revision downward or upward should be based upon good reason found to exist therefor. However, the same general policy as to tariff or duty or reduction should be applied throughout. I do not regard it as tenable that merely because one industry is to be accorded protection that some other industry shall be included in the protected list, yet the equivalent of this has been contended for in the hearings had by the Ways and Means Committee. Any duty imposed or maintained should be for its immediate or ultimate beneficial effects upon the interests or prosperity of the people in general.

Mr. Chairman, I am going to advocate the placing of lumber upon the free list, and first I desire to call attention to the duties now imposed on importations.

When the timber is sawed into boards, planks, or deals, or into joists or scantlings, a tariff of $2 per thousand feet board measure is imposed on lumber. To this duty there are exceptions. Lumber of whitewood, sycamore, and basswood bears a duty of $1 per thousand feet board measure; while sawed boards, planks, deals, and all forms of sawed cedar, lignum-vitæ, lance wood, ebony, box, grandilla, mahogany, rosewood, satinwood, and all other cabinet woods, not further manufactured than sawed, pay a duty of 15 per cent ad valorem, and veneers of wood and wood manufactured, not specifically provided for, must pay a duty of 20 per cent ad valorem.

For the present let us ignore the exceptional duties and go back to the duty of $2 per thousand feet on lumber not otherwise specified, the kind the most commonly in demand. When it is planed, an additional duty of 50 cents per thousand feet is imposed for each side so planed; and if it is tongued and grooved an additional 50 cents is imposed as duty. Thus planks for floorings would be taxed $3 per thousand feet, weather boarding $2.50 per thousand feet.

Mr. Chairman, the manufacture of lumber is no longer an infant industry. If the lumbering business in the United States has not been sufficiently developed, it never will be, because hundreds of mills have been shutting down for the want of more timber to saw—shut down because timber in the regions where they have been operating has been exhausted. The manufacture of lumber, Mr. Chairman, has become overdeveloped, because, as I contend, that when the consumption of any product is much greater than its production it is essentially overdeveloped as far as a resource to be continually drawn upon is concerned. We now consume three times as much as we produce, with the adverse conditions constantly increasing. We want lumber now; we have wanted lumber from the beginning; we want lumber more and more as our country develops and as our people progress. The demand for lumber as our country has developed and as our people have progressed has been increasing more and more in proportion to our population. The uses of lumber have been increased, many times increased, and the percentage of the consumption per capita has been increased, greatly increased, and continues to increase. For instance, it has been reliably ascertained that the lumber cut in 1880 was 18,000,000,000 feet; in 1890, 24,000,000,000 feet; and in 1900, 35,000,000,000 feet, while in 1907 the best judgment is that the cut was from 40,000,000,000 to 50,000,000,000 feet. This means lumber in the ordinary sense, Mr. Chairman. It does not mean the consumption of wood. The annual consumption of wood or timber for all purposes now amounts to 100,000,000,000 feet, the most conservative estimate, or to 140,000,000,000 to 150,000,000 feet, which may be said to be the maximum estimate.

Mr. Chairman, rapid as has been the increase of our population, the increase of lumber per capita has been yet faster. The increase in population from 1880 to 1900 was 52 per cent, while the increase in the consumption of lumber was 94 per cent. The average United States citizen is now using 400 board feet of lumber per annum, while the average European uses but 60 board feet. Vast as were our timber resources, vast as were our timber areas at the commencement and as young as our country is, already more than one-half of our timber resources have been exhausted; and, as I have already shown, the demand per individual for lumber has constantly been increasing. Mr. Chairman, I would regard it as absurd for anyone to contend that a duty upon lumber could be any longer justified for the purpose of developing the industry of the manufacture of lumber in the United States; and I am talking now merely as to the industrial and commercial propositions, omitting for the present the all-important consideration, the conservation of our natural resources, including timber.

Mr. Chairman, do those who advocate a continuance of a duty on lumber ask it upon any other ground than for the purpose of maintaining present prices, if not even for the purpose of promoting higher prices? If they have any reason at all, it must be for the sake of maintaining the present prices or in behalf of yet higher prices. But the legitimate question, Mr. Chairman, is, Will the welfare of the American people in general be better conserved by higher-priced lumber? Mr. Chairman, prices have been soaring for the last decade, with the exception of a little more than the last year, and that depression due to a cause which is sure to be but temporary. For several years—at least, until the fall of 1907—prices had been unreasonably, if not intolerably, high; prices had been and yet remain prohibitive to many otherwise would-be consumers, and have been for some time prohibitive for many purposes to which, if lower prices had prevailed, lumber would have been devoted.

That the prices of lumber, Mr. Chairman, have been rising, I quote from one of the most reliable authorities this statement:

Yellow pine advanced from $8.48 per thousand in 1899 to $15.02 in 1906; rise, 77 per cent; cedar rose from $10.91 to $18.12; rise, 66 per cent; cyprus from $13.32 to $21.94, and redwood from $10.12 to $16.64; rise, 64 per cent in each case; Douglas fir increased from $8.67 to $14.20; rise, 64 per cent; and poplar from $14.03 to $24.21, or 73 per cent.

Very noticeable increases are also shown by hickory, oak, spruce, western pine, hemlock, and ash. But, Mr. Chairman, this is the increase in prices of lumber merely, and while these increases are very great the percentages of increase are small, indeed, as compared with the increases of the values and prices of timber.

While the increases just cited in no case amount to 100 per cent, the increases in the prices of timber and of timber land for the sake of the value of the timber have varied from nominal figures to a thousand or even two thousand per cent. The manufacturers of lumber excuse themselves generally from the higher prices at which they sell lumber on the ground of the increased price of stumpage, which they must buy from the owners of timber, while some of the lumbermen who appeared before the Ways and Means Committee charged that retail lumber dealers are to an extent responsible for the unnecessarily high prices. However this may be, it is perfectly clear that the benefit to be derived from the increased price of lumber must inure largely to the owners of timber, for the higher the price of lumber the higher the price of stumpage is sure to go.

Wholly regardless of the merits of the contention of the manufacturers of lumber, regardless of the merits of their case or of their contention that their profits are not unreasonably high, it can not be gainsaid that a great monopoly exists on the ownership of timber, a monopoly upon one of the great natural resources of our country; upon a product the consumption of which is universal, and of course it is a necessity. I say a monopoly exists on the ownership of timber in this country because individuals have already acquired title to four-fifths of our remaining forest areas and because a very few men are the owners of the greater portion of this, say, at least three-fourths of the private ownership. It is well known that there are a few large timber owners in the United States who, respectively, own areas of timber lands greater in extent than all of the timber area that is contained in each of several European countries. Thus a few men own all the timber from which must be produced the lumber to be consumed by 90,000,000 of people with that population rapidly increasing.

Mr. Chairman, I contend that any benefit to be derived by maintaining a duty upon lumber will be secured by the owners of timber, who are not entitled to it upon any principle known to the policy of protection, rather than to the manufacturers of lumber, to encourage whom a duty was in the first instance imposed; and I submit to the membership of this House, as proof of this proposition, that while the prices of lumber have been going higher and higher, the prices of timber and of timber lands have increased at several times as great a rate.

Mr. Chairman, prices have been very high upon their face. They have been comparatively high—or, I might say, had been comparatively very high—until the financial flurry in the fall of 1907; but I shall demonstrate by better evidence than this that the prices of lumber have been unnecessarily high, unjustly high, by showing that the profits made by lumbermen have been unnecessarily and unreasonably large. Taking as a criterion either the ordinary interest rates on money or the net profits of various other branches of business, the profits of the lumber business appear to be very large indeed. They have been so high, so great, that if their businesses were stocked or capitalized for the amount actually invested, it is no telling at what premium the stocks would sell. It would, in some instances, sell for several times the amount of money invested, because of the large profits to be realized. Take, for instance, Mr. Chairman, a statistical table from the census of manufactories of lumber for 1905. It is shown that the lumber and timber products in the least advanced steps of manufacture for that year were worth $580,022,690. This large amount represented the receipts of the industry. Let us deduct the expenses:

Value of product		$580,022,690
Salaries	$19,878,092	
Wages	183,021,519	
Materials	183,786,210	
Miscellaneous	83,136,280	
		469,817,101
Net profits		110,205,589

This shows net profits upon an investment of $580,022,690 to have been $110,205,589. It requires but little calculation to show that the average profits of those establishments was over 21 per cent. I say 21 per cent was the average profit, and if 21 per cent was the average profit, assuming, as experience warrants, that in many instances little or no profits at all were realized by the poorer or poorest managed businesses, how much must have been the profit of the better and best managed businesses? We have a right, Mr. Chairman, to base our calculations upon the profits of a business reasonably well managed, and if 21 per cent is the average of good, bad, and indifferently managed companies a business reasonably well managed at the time we are talking about must have made a profit of—well, we can only guess at it, say 50 per cent and maybe 100 per cent or more. Now, these profits were realized, Mr. Chairman, upon the kinds of lumber for which there is the greatest demand, for which there is the largest amount of consumption, the ordinary everyday demand of the people at large.

Mr. Chairman, let us take a higher grade of the manufactures of lumber. A calculation similar to the one just made in regard to the less finished forms of lumber will show that the manufactures, the planing-mill products, including sash, doors, and blinds, made in 1905, and made at profits though not so large as were made upon the kind of lumber about which we have just been talking. I ask to be made a part of my remarks at this place a statistical table of the manufactures of sash, doors, and blinds:

Value of product in 1905		$247,441,955
Salaries	$9,960,230	
Wages	50,713,607	
Materials	143,137,662	
Miscellaneous	13,654,313	
		217,465,812
Profit		29,976,143
Capital		177,145,734
Rate of profit per cent		17

The table shows that the average rate of profit upon this class of manufactured lumber was 17 per cent, and in this connection we had just as well ask to add to the table a statistical table which I now hold as to the manufacture of furniture:

Value of product in 1905		$170,446,825
Salaries	$9,131,357	
Wages	49,883,235	
Materials	73,619,914	
Miscellaneous	16,719,082	
		149,353,588
Profit		21,093,237
Capital		152,712,732
Rate of profit per cent		14

While we are at it, permit me to add a table as to one more class of manufactures. I mean the business of the manufacturing of barrels. Mr. Chairman, I shall ask that the statistical table that I now hold in my hand be made a part of my remarks at this place:

Value of product		$49,424,294
Salaries	$1,891,802	
Wages	9,485,455	
Materials	31,092,679	
Miscellaneous	2,385,236	
		44,355,172
Profit		5,069,222
Capital		29,582,614
Rate of profit per cent		17

The result of the calculation shows an average profit of 17 per cent for the manufacture of barrels. What other branch of business pays such large profits as the different kinds of manufactures of lumber and of wood?

Mr. Chairman, the rate of profits upon the manufactures of lumber and of wood is the legitimate, the just concern of the people at large, or the consumers of lumber. Who is it pays these profits? Essentially it is the consumer and nobody else who pays the profits. I am frank to admit that with free and unrestricted trade, with no corner or monopoly existing upon ownership whereby high prices are promoted and maintained, that the consumer might not have a right to gainsay the right to high profits; but when a tariff has been accorded and for a long period maintained, and when the manufacturers of lumber are taking issue with the people in their demand that lumber be placed upon the free list, then it becomes the privilege of every citizen in the United States to protest, and I earnestly protest against legislating to further uphold or maintain prices and profits so needlessly and so unjustly high.

But, Mr. Chairman, another proposition: Why is it the lumber business can not succeed without protection as to the business done in the United States? Why is it our domestic lumbermen can not successfully compete with the lumbermen of foreign countries, say of Canada, as to our home market, yet can compete very successfully in the markets of the world with Canada and all other countries.

Why is it, Mr. Chairman, that our domestic lumbermen can not compete for our home market without the protection of an import duty, especially as against Canadian lumbermen, when they can ship lumber to all parts of the world and successfully compete with Canadian lumbermen and the lumbermen of all the other countries, yet without any protection or advantage whatever? They successfully compete without statutory advantage in foreign markets, with the cost of transportation over the seas added to the cost of lumber in the United States, yet

the business must be fostered, indulged, by an import duty imposed upon Canadian lumber, for the sole and direct purpose of securing to them our home market. Upon the face of it the proposition seems so unreasonable as to be unworthy of serious consideration, yet several explanations are offered by American lumbermen themselves in justification of such demands, and I shall notice some of these propositions directly. But I had intended before this to say that I would ask that a table which I now hold in my hands showing exportations of domestic lumber should be made a part of my remarks, and I shall offer it right here:

Country.	Lumber.	Furniture.
United Kingdom	$7,152,709	$666,857
Belgium	1,400,894	25,840
France	705,388	84,960
Germany	1,981,112	173,411
Italy	723,422	72,048
Netherlands	2,759,094	59,633
Other Europe	841,759	124,452
British North America	4,871,808	817,685
Central America and Honduras	1,268,731	309,371
Mexico	2,282,640	944,169
Cuba	2,330,867	609,498
Other West Indies and Bermuda	732,609	122,378
Argentine	5,715,982	421,036
Brazil	1,220,089	75,182
Chile	1,232,697	79,736
Other South America	1,438,310	159,282
China	975,629	27,046
Hongkong	99,335	23,331
Japan	159,021	20,712
British Australasia	1,553,300	275,667
Philippine Islands	107,695	52,207
Other Asia and Oceania	71,862	19,639
British Africa	460,600	150,910
All other Africa	367,627	46,457
All other countries	824	260
Total	40,613,504	5,377,768

Mr. Chairman, this table shows that our lumbermen of the United States have been exporting lumber to the different countries in Europe, Asia, and Africa.

The table shows that in 1905 our domestic lumbermen shipped to foreign countries common lumber to the value of $40,613,504, and of furniture the value exported was $5,377,768.

Mr. Chairman, it has been reliably estimated that at this time our total exports of lumber and wood products or forest products exceed in value $126,000,000, and essentially this is in successful competition in foreign markets with Canadian lumbermen. It is successful competition, else the business would not be continued.

Mr. Chairman, we exported even to Canada within the last fiscal year $10,000,000 worth of manufactured lumber and the manufactures of wood, and at the same time we exported of the manufactures of lumber and wood to the Republic of Mexico of our product to the value of $3,632,717. Mr. Chairman, we are asked to guard our home market in behalf of our home lumbermen against Canadian lumbermen, and this in face of the fact that we have been exporting to Canada about one-half as much lumber, and this without any duty imposed by the Canadian government, about one-half as much lumber as Canada has imported into the United States.

The British Columbia manufacturers of lumber do sell somewhat in American markets on the Pacific coast, while the manufacturers of lumber in the State of Minnesota return the compliment by availing themselves of the market immediately north and northwest, in Canada, extending to the eastern slope of the Rocky Mountains, in Alberta. Mr. Chairman, if American lumbermen can sell a bill of lumber across the ocean, say, in England or Germany, for $1,000, they ought to sell the same bill here in the United States for $900, for the transportation across the Atlantic costs at least $100. Whether it be true or not that lumber is sold in foreign markets by our domestic lumbermen cheaper than they sell it at home, as charged by some, by reason of the indulgence accorded by a protective duty at home; whether this charge be true or not, it is perfectly clear that it ought to be sold at least 10 per cent cheaper at home than in foreign markets, because it costs at least 10 per cent of the value of the lumber to ship it across the seas. I am reliably informed that as a matter of fact the freight charges even to the nearest points across the ocean are more than $100 on $1,000 worth of lumber.

The Monthly Summary of Commerce and Finance for June, 1907, shows freight rates on lumber from New York to different European and other foreign ports per hundredweight, and, without taking time here or the space in the RECORD to prove my proposition, I assert that this reliable authority will show conclusively the correctness of my statement that the cost of freight from the United States to foreign points amounts to or approximates 10 per cent of the value of the lumber shipped; so that it is mathematically plain that lumber should be sold in the United States at a price at least 10 per cent lower than that for which American lumber is sold in trans-Atlantic points.

It follows that if our exports of lumber are not sold in European markets at prices 10 per cent higher than in the United States, that the process of "dumping" is being practiced to maintain high prices here. But I do not make the charge that "dumping" is being practiced, as I have not had time to inform myself sufficiently about it.

And what have the people in general gained by the exportation or foreign sales of lumber? One result unquestionably has been to raise prices of lumber higher at home by reason of a reduction of the supply for the home market in proportion to the amount shipped abroad. At the same time our domestic lumbermen, who are exporting large amounts of the best grade lumber to foreign countries, insist that the duty now required to be paid by Canadian lumbermen on their importation into the United States, must be continued, and this can result in no other way than in diminishing the supply for the American home market. Both of these conditions operate against the interests of American consumers of lumber, and by greatly reducing the supply for the home market the price to the American consumer is thereby increased. Thus, Mr. Chairman, it appears to me that lumbermen are enjoying the benefit of preventing competition for our American home market, and at the same time the benefit of free trade in foreign markets, or the benefit of the privilege of exporting lumber from the United States into foreign countries. They are certainly enjoying this privilege at the expense of the American consumer, by preventing the incoming of lumber by the imposition of a duty and permitting the outgoing without the payment of an export duty. The result has increased the selling price of lumber in the United States with the benefit going direct to the lumberman at the cost of the consumer.

Mr. Chairman, another untenable reason—I might say remarkable contention—for the maintenance of a duty upon lumber is the advantage which it is claimed is afforded Canadian lumbermen by the Georgian Bay water transportation route, extending from Canada far south into the United States, whereby Canadian lumber may be shipped from numerous rivers in Canadian territory to the Georgian Bay and its larger tributaries of lakes and rivers into Lake Huron in the United States, and thence west and south and east to various markets and points in the United States. It is contended that this excellent water route affording facilities for such very cheap transportation rates secures to the Canadian lumbermen, in the localities that may enjoy it, advantages so far superior to transportation facilities enjoyed by the American manufacturers that in order to enable American lumbermen to have any chance at all for successful competition with the Canadian manufacturers that the present duty must be maintained. Mr. Chairman, I think this is carrying the doctrine of protection beyond reasonable limits. I regard it as peculiarly untenable that just at this juncture, when demands are being made from all parts of the country upon Congress for great appropriations, for the enactment of laws authorizing the issuance of bonds for the improvement of waterways, projects good and bad, feasible and impracticable—I regard it as peculiarly untenable right at this juncture that the Congress should be asked to legislate this great waterway transportation road, of which there are none better or more useful in the world, out of business; legislate to render it impotent for the purposes of commercial intercourse with Canada.

And at whose expense? The expense of the American consumer, for the direct benefit of the American manufacturer—American lumberman—and yet the less direct benefit of the owners of American timber who now enjoy the greatest corner, the greatest monopoly that has ever been enjoyed by the control of any natural product. Manufacturers of lumber in British Columbia, upon or near the Pacific coast, also possess water transportation facilities, for they may ship by the Pacific Ocean south along the western borders of the States of Oregon, Washington, and California with the greater costs of transportation to them over what it may cost the American lumberman a negligible quantity. It would be just as reasonable to legislate to deprive the American consumer of any indirect benefit to him to be possibly enjoyed by this Pacific coast condition as to grant it a legitimate consideration that a duty should be imposed for the purpose of nullifying the benefits of the Georgian Bay, Lake Huron, and other American lakes route or routes.

Mr. Chairman, it seems to me to be palpably plain that these great natural resources and advantages, or advantages of

cheaper transportation afforded by these great waterway routes, are of much greater advantage to the people and to the consumer of lumber directly than any artificial advantage which may be created by the imposition of a tariff upon Canadian importations of lumber. If the people have any divine rights at all, the enjoyment of these great water routes given them by the Creator himself must be one of their divine rights. To impose a duty, to grant protection as against the benefits of cheaper transportation by these great waterways, to grant protection for such reasons I would regard as the height of absurdity and a perversion of the natural laws of trade and commerce.

Mr. Chairman, in the foreign markets our domestic lumbermen must necessarily compete with the foreign manufactures of lumber from all points in the world. They must compete, and compete successfully, or they can not do business in foreign markets. The fact that they can compete successfully in foreign markets without any protection whatever, without any favor whatever, without any artificial or legislative advantage whatever is conclusive that they can successfully compete for our home market without the advantage of a protective duty imposed upon importations from foreign countries.

Mr. Chairman, they compete when shipping to foreign countries, while paying freight rates equivalent to 10 per cent of the value of the lumber transported; then, why not, when they can save this 10 per cent when availing themselves of our home market, why not be able to successfully compete for the home market with these same world competitors who must pay more freight to reach our home market than does the home manufacturer. It is extremely unreasonable that it should be contended that protection is essential to successful competition for the home market and at the same time can be dispensed with in behalf of $126,000,000 worth of yearly business in foreign markets with no protection or advantage afforded.

The explanation is that competition invokes the best possible efforts, the very best business management, the practice of doing business in the most economical way and upon the most advantageous lines practicable. And this proposition, Mr. Chairman, leads to the conclusion that the result arrived at by business competition, the costs of manufacture, the cost of transportation, and all other expenses attendant upon the producing of any article or merchandise of value, that such costs and expenses thus ascertained while in competition, which are the result necessarily of reasonably good management, are the true basis of calculation as to the costs of the manufactures or products of the businesses concerned. One of the purposes of the policy of protection is to promote ultimately, if not immediately, competition, with the result of lower prices, which is to constitute compensation for any possible disadvantage previously endured on account of the protection afforded.

Whether or not the duty imposed upon foreign lumber shipped into the United States has prevented reasonable competition between the domestic purchasers of lumber, it is perfectly clear it has reduced the necessity, it is perfectly clear that it has lessened competition or rendered competition with Canadian producers less necessary. It has given the American producer as to the home market an advantage over the Canadian producer in proportion, at least, equal to the amount of the duty imposed.

Mr. Chairman, lumber manufacturers claim that the business stands second only in number of men employed, in the amount of farm produce consumed, and in the amount of business done. They claim that for this reason the existing duty should be continued upon lumber in order that the prosperity of the industry shall be continued. Everyone will grant it is highly desirable that the lumbering business shall prosper; it is desirable that every legitimate industry shall prosper; it is to the interest of the public that every business and every individual following a lawful vocation shall prosper, because there is a community of interest in the prosperity of every industry and, we may say, of every individual; there is an interdependency existing between industries and individuals in their mutual welfare and prosperity. Prosperity in one line of business diffuses itself and promotes in a greater or less degree the success or prosperity of other branches of business carried on in the same locality. But while it is highly desirable that the lumbering business shall prosper, is consideration to be given alone to the interests of lumbermen or the lumbering industry without regard for the interests of consumers and the public in general? Must it be made to prosper at the expense of the much greater number of consumers and of the people in general not interested therein? In their contention for a continuance of a duty on lumber to insure its prosperity, I fear the lumbermen are just as selfish as I myself or other persons or as the average individual, and when advocating their cause to the Congress, I fear they sometimes fall into the attitude of the English statesman, who, in conversation with Hume, I believe it was, the question was propounded by one to the other:

"What is the proper rule of legislation?" The other lord replied: "The greatest good to the greatest number." The question was then asked: "What is the greatest number?" The reply was: "Number one."

Mr. Chairman, it can not be reasonably expected that those who have come before the Ways and Means Committee in behalf of the industries they represent will keep in mind all the time or much of the time the interests of the public as well as their own interests. It can not be expected that they will be good business men, looking after business interests, and statesmen and publicists at the same time. And yet it is those who own and operate industries who have come before the committee rather than the consumers of the manufactures of these industries. The industries, or the owners of the industries themselves, are enough interested to prompt and justify them to go to the expense of coming to Washington and making the best showing or best case possible for the maintenance of a duty. On the other hand, each individual consumer is interested so little that he feels that it will not justify him, neither could he afford the expense of coming to Washington and presenting his views.

While the interests of the consumers, considered all together, are paramount to that of the industries, still the people do not become organized in behalf of their interests; and as to the question as to whether a duty shall be continued upon lumber, they have had but very little representation here in Washington by agents or delegations sent for that particular purpose. It therefore behooves Congressmen, the people's chosen representatives, to scrutinize closely the arguments made by those directly interested in the lumbering business in behalf of the continuance of a duty in order to make sure that the best interests of the public at large may be conserved.

In revising, the rule of "the greatest good to the greatest number" should be faithfully observed and applied. But, Mr. Chairman, as to the prosperity of the lumber business, without the imposition of a duty on importation from foreign countries, it seems to me from the condition of things that the lumbering business is sure to prosper provided the manufacturer of lumber, who is not himself the owner of timber, shall not pay the timber owner too high a price for stumpage. As to what prices the manufacturer shall pay the timber owner is a question to be determined by the contracting parties; if the manufacturer shall pay a price too high to permit of his selling the manufactured lumber to the consumer at a reasonable profit, he should suffer the disadvantage.

But, Mr. Chairman, with one-half of our original timbered area already consumed, exhausted, with a comparatively great population which has been increasing at a rapid rate and promises to continue to so increase, with the uses to which lumber and the manufactures of wood are devoted constantly on the increase, and added to this that the use of lumber per individual has been increasing at the rate of 10 per cent yearly, the prospects are that the prices of lumber, wihout being afforded any protection at all, must continue to go higher and higher until the annual growth of the reproduction of our forests shall be made to equal the yearly consumption, and I regret that the estimates of reliable experts fix this but forty years hence. The law of supply and demand for the next forty years, Mr. Chairman, with the present tendency of things, with the supply of timber remaining in proportion to our population and its rate of increase, will, I regret to believe, having in view the interests of the consumers and the public in general, operate to the advantage of home owners and lumbermen by a gradual rise of prices. They will need no duty, and they will soon find it out.

Mr. Chairman, our people have been already too prodigal of the abundant bestowment of nature upon our fair land. We have not only consummated, wasted, and destroyed our timber resources with improvidence, prodigality, and even recklessness. We have besides this, even as to legitimate consumption, consumed in an uneconomic way, and this Georgian Bay proposition which I have just been discussing emphasizes my proposition. No apprehension would exist in the minds of American lumbermen tributary to Lake Huron or the other adjoining lakes if the great forests bordering upon these lakes had been conserved during the last fifty years, but instead of having been conserved, the process of their consumption, waste, and destruction has been proceeding at a devouring rate so that they have become now almost exhausted. Even the very localities which used to be covered with timber of extra qualities and of high commercial values, have now become timberless, treeless, and these very localities are dependent upon other regions for their lumber supplies. If these great forests along these lakes had

been conserved as they would have been had our people been provident in their management and consumption, enough timber would yet remain to supply all the country tributary to the lakes and, as it is now, tributary to the Canadian market by reason of the facilities of transportation by the Georgian Bay route.

This lake region, unfortunately, constitutes no exception, however, to the uneconomic course of the consumption of timber in the United States. It has been the same as to other regions where the lumber industry became first developed. A difficulty has been that the regions first developed supplied not only the country adjacent thereto, but, as well, other regions of the United States remote therefrom where the lumber industry had not become developed—at least, not so far developed; and the manufacturers of lumber, where a start was already made, were too willing to enjoy a monopoly of the trade, which, while an immediate profit to them, was all the time proving detrimental to the future of our country. The consequence has been that, of our several great regions of timber, the one first developed in the lumbering business commenced furnishing and kept on furnishing, and thus gained and held a monopoly on the trade in other regions of the United States, without regard to whether it was from a natural or geographical or commercial or transportation standpoint, legitimate territory or not. The only question was whether it was profitable or not to the lumbermen enjoying the trade. Regions remote from the places of manufacture, whether these regions were timbered or not; and if not timbered, whether other timber regions yet undeveloped were nearer or not than the regions furnishing the lumber, the region first developing the manufacture of lumber has continued to furnish the lumber until practically all the timber of such regions has become exhausted.

Mr. Chairman, then in turn the next or the last remaining timber region to develop the lumbering business has in turn been furnishing lumber to the timber region, now timberless, which was first devastated. In this way the wasteful process of shipping things needlessly to and fro has been practiced, and transportation rates aggregating millions have as a penalty been paid by the consumers of lumber. And right now, Mr. Chairman, when it has been agreed on all sides that we are annually consuming three times as much lumber as we are reproducing, that our timber areas have while our country is yet young been more than one-half exhausted, and that at the rate we have been going in the consumption and destruction of timber and our rate of reproduction, that within twenty or thirty years our timber resources will have been practically exhausted. Right here, with a lumber famine staring us in the face, our Congress is asked to so legislate as to keep foreign lumber out of the United States and yet at the same time to permit domestic lumber to be exported and shipped to all parts of the earth. We are asked to so legislate, confronted by the appalling spectacle that within twenty or thirty years at the same rate of prodigality and folly our country will have become practically timberless. Besides shipping lumber to the countries of Europe, Asia, and Africa, and the South American States as well, we have been even shipping to Canada, the principal competitor. We have shipped into Canada from Minnesota and other parts of the United States lumber of our American manufacturers, about one-half as much lumber as Canada has exported into the United States. We have also been supplying markets in the Republic of Mexico, where timber is abundant, as well as in Canada.

Continuing in this practice of the exportation of lumber, the necessary result is that sooner or later all lumber that we consume must be shipped and imported from foreign countries. Now, it is very plain, Mr. Chairman, that to foster a proposition of this kind is to pervert the purpose of the policy of protection. One of the original purposes of the policy of protection was to bring markets and consumers nearer together; to bring manufacturers and consumers nearer together. As a result of the operation of this wise policy great manufacturing industries are now in operation in this country, which, without it, their equivalent would have been going on in European countries and the labor employed in them, and the consumers of such manufactures in a large measure would constitute the population of foreign countries instead of a part of the population of the United States. Thus the result of the policy has been to reduce the practice of useless transportation across the Atlantic necessarily carried on at the expense of the consumer to a minimum.

It should not be forgotten in this connection that in the early history of our country it was the carrying trade, meaning transportation business upon the seas, that antagonized the policy of protection, and some of the most distinguished opponents of the policy based their opposition wholly upon the ground that it was inimical to the carrying trade.

But the fallacy consists in the buying of products in foreign countries which may be produced with equal facility in our own country and by our own labor—our own consumers—and foreign countries, perhaps, buying of us what they themselves can as well produce; and thus by a useless exchange of these commodities, by means of the operation of transportation lines over the seas, a carrying trade is maintained. This is a fallacy just as much as the piling of chips first in one pile and then piling them in another, and it is to the credit of the policy of protection that its tendency has been to do away with so useless and yet very expensive a practice.

A wise policy would at the start have dictated that the five principal large timber regions of the United States should have been preserved and conserved by the policy which is now being so laudably inaugurated so as to make the annual growth or reproduction equal the annual consumption at least with a view to affording permanently an adequate supply to the country or regions which geographically should be supplied by the particular region. In this way, needless transportation from east to west, and in turn west to east, north to south, and in turn south to north, and so on, as to the different timber regions, needless transportation at the expense of the consumers would have been avoided, but, unfortunately, the very reverse has been the practice. Not only this; with these two great lessons staring us in the face, we are asked to perpetuate this same line of folly, as I contend must be the result if a duty shall be continued upon lumber.

Mr. Chairman, the demands being made for a continuance of the duty upon lumber seem to be so prejudicial, so detrimental, to the interests of our people—to our country—as hardly to be deserving of serious consideration.

But, Mr. Chairman, our American lumbermen contend that they can not compete with Canada manufacturers because the price of stumpage, especially that owned and sold by the Canadian government, is lower than the price of stumpage in the United States. They contend also as another reason that the price of oriental labor, employed to an extent in British Columbia, is lower than the price of American labor. Granting, for the sake of argument, that these statements be true, are they a proper criterion for tariff legislation in the United States? How long will these same conditions continue in Canada? May not the Canadian government raise the price of stumpage next year or next month or to-morrow? And how long will the oriental labor remain in British Columbia? May not these laborers emigrate out of the timbered country, out of the lumbering districts?

But, Mr. Chairman, as to this proposition as to oriental labor, there was a good deal of evidence adduced before the Ways and Means Committee tending to show that this oriental labor employed in the manufacture of lumber is no cheaper than white or American labor. It is true that the per diem is some smaller than that paid to white labor in Canada, and also in the United States; but it is considered that the value of oriental labor, especially when employed in the manufacture of lumber, is correspondingly less than that of white labor, and those who employ both white and oriental laborers are of the opinion that the oriental labor is more expensive in proportion to the amount of labor performed, and white labor is preferred at the higher prices paid therefor.

I submit, Mr. Chairman, that the fact that there are a few Mongolians employed in the manufacture of lumber in British Columbia is a consideration too trivial to be taken into account in the making up of a bill for the revision of the tariff schedules of this great Republic.

Pacific coast lumbermen urge they can not compete with the manufacturers of lumber in British Columbia and must be afforded protection by the imposition of a duty against Canadian lumber for that reason. They make this contention in face of the fact that British Columbia has but 150,000,000,000 feet board measure as compared with 700,000,000,000 feet board measure for the States of Oregon, Washington, California, and Idaho.

The statistics accord to British Columbia 150,000,000,000 feet; Oregon, 225,000,000,000 feet; Washington, 196,000,000,000 feet; California, 180,000,000,000 feet; and Idaho and Montana, 100,000,000,000 feet. But some of the Pacific Coast lumbermen contend that while they may get along without much or any duty imposed upon higher qualities of British Columbia lumber, that the Pacific coast American product must be protected as to its lower grades. They grant that they can compete both in our home market and in foreign markets in sales of the best grades, but contend that they can not at all compete and will be driven out of business as to the lower grades, if no duty be imposed upon Canadian lower grades. They contend that without a duty they can not ship the American lower grade even to our

home markets, let alone to foreign markets, and compete with the British Columbia low-grade product, notwithstanding costs of transportation to be paid by the British Columbia manufacturers to the United States. They contend that if no duty be exacted of the British Columbia manufacturer upon his low grade, that of the trees felled in the United States for manufacture, the part thereof which will only make low-grade lumber must be left in the forests, and that it will constitute an obstacle and hindrance to the regrowth and reproduction of timber.

They therefore insist that in behalf of the conservation and reforestation of their own private holdings that a duty should be imposed. In effect, they are in favor of the conservation of their own timber, but recommend that the consuming public defray the necessary expenses. Forestation is thus offered as an excuse for the demand for the continuance of the duty, yet without any pledge or any statutory obligation whatever to be imposed that performance will be made. The duty is to be granted without any obligation whatever to be imposed upon the owners of the timber. Mr. Chairman, why not be businesslike as to the proposition? If an incentive is to be offered, let it be put in business form and so as to make the arrangement a mutual one. If the public is to be made to pay for the conservation of private forests, let it be paid for in the form of a bounty paid upon the preservation and growing of timber. Let it be required that an account be taken in a proper way of the work done for conservation and the growth of the timber as a result thereof. Let this be done, Mr. Chairman, if the public is to pay for the protection and conservation of timber, of forests owned by individuals; and right here, Mr. Chairman, a bounty granted for the growing and production of timber in the United States, considering the present state of depletion of our timber areas, with a rapidly increasing population and the prospects for an ultimate very great population—say, eight or ten or twelve hundred millions—a bounty paid for the protection of timber would be much more reasonable, laudable, and statesmanlike than a duty imposed upon importations into the United States from foreign countries, which must have a tendency to further deplete our already greatly reduced timber areas. But, Mr. Chairman, neither a duty upon importations from foreign countries nor a bounty to be paid for the growth of timber is necessary in order that the lumbering business may prosper or that our forests may be restored. The lumber business will take care of itself without a duty and at a profit, and the demands for lumber are getting to be so great as to furnish an incentive for reforestation and reproduction at the expense of the owners themselves.

A provident and patriotic policy would dictate not only the placing of lumber upon the free list, but in the further interests of the people of the Republic and the future welfare of the country that a duty be imposed upon the exportation of lumber to foreign countries. An export duty will necessarily tend to lessen the shipments as well as sales of lumber to foreign countries, with the effect of increasing the amount of the product to be sold in American markets to American consumers, so that the competition between manufacturers would be thereby increased, naturally with the effect of lowering prices to consumers. I therefore recommend the placing of a duty upon the exportation of lumber equal to the import duty now provided by law.

Duties should be taken off of lumber because the industry does not need it; should be taken off because consumers stand in need of lower prices, which the profits of the lumbering business can stand; should be taken off to prevent high prices from going even higher; should be taken off to prevent too rapid consumption of our forests, with the menace of a lumber famine as a consequence and the placing of ourselves at the commercial mercy of foreign producers and foreign countries.

The duty should be taken off of lumber because it is essential to our industrial independence and our economic welfare as a Nation. It is important to the individual, community, State, and Nation that our timber resources be preserved; that the supply shall continue to equal the demand, and that lumber be kept available at living prices. It is especially improvident, uneconomic, and detrimental to present and future interests that the exportation of lumber be facilitated or even fostered when the annual reproduction is not equal to the consumption; when, in fact, the annual consumption is more than three times the yearly growth or reproduction.

Mr. Chairman, I contend that for the present and the future welfare and good of the country the existing duty should be abolished upon importations, and instead a duty imposed upon exportations of our domestic product.

Naval Appropriation Bill.

SPEECH
OF
HON. THEODORE E. BURTON,
OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

Friday, January 22, 1909.

The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes—

Mr. BURTON of Ohio said:

Mr. CHAIRMAN: In discussing this question it is well at the outset to call attention to the growth of our national expenditures. The amount carried in this bill—$135,000,000—is twice as great as the net expenditures of the Government for the fiscal year ending June 30, 1861, and yet at that time our country contained 35,000,000 of people. If we deduct the interest on the public debt, a legacy of the civil war, the amount of our net expenditures in 1878 was less than the amount carried in this single bill. Where will this increase of the burdens of taxation, of growing national expenditure stop? There is now in this country no opposition to this increasing expenditure which is at the same time aggressive and efficient. Party platforms declare against it. Speakers on the stump proclaim against the increase of our budgets, but individuals and parties alike must share the responsibility for the growing expenses of the Government. There is no task more thankless than that of him who takes a stand for economy in either branch of Congress or in the executive government. Yet there is no place where this growing expenditure can be checked so rationally as in this naval bill. Twenty years ago the cost of the navy was but a little over twenty millions per year; but at the present rate of increase an annual expenditure of two hundred millions—yes, of two hundred and fifty millions—is near at hand.

The amount of the naval budget hampers necessary increases of salary; it prevents the expenditure of money upon public works; it stands in the way of most desirable extensions of the public service; it requires additional and, no doubt, burdensome sources of revenue. I desire to especially emphasize the fact to-day that the building of these two battle ships is altogether unnecessary. We have now the second largest navy on the globe, notably in battle ships, and one which in efficiency is at the very forefront. What nation on earth is threatening us? This periodical war scare occurs whenever we have a naval bill up here for consideration. [Applause.] One time it is Germany, one time it is England; but they have all passed away like phantoms of the air. That which this Congress should do is to provide for the rational needs of the people, and not seek to guard against groundless fear or phantoms of the imagination. [Applause.] We may trust the traditional friendship of Japan, and we may also trust the fact that she is in no condition, from an economic standpoint, to wage war with a great nation. We may trust that she will not engage in aggressive movements which are unjustifiable against a powerful nation of the Caucasian race. I say this with the concession that in all candor I should call attention to a factor of growing importance among our people in the last ten or twenty years, and that is the increase of racial repulsion, an influence which must be taken into account and which should in every way be repressed both by the National Government and by the cooperation of individuals and state governments as well.

I usually agree with my friend from Iowa [Mr. HEPBURN], but I can not agree with his arguments to-day. He says we have had a war in each generation. The gentleman himself bore a noble part in one, for which he is entitled to all credit, but he adds we shall have another in each succeeding generation. That statement involves a careless reading of the history of the last one hundred years. The change from a condition, which a century ago or less was predominately one of war, to one now in which no nation can engage in conflict with another on light occasion, and in which the most serious differences are settled by peaceful means points to the morning dawn of peace and concord. An argument which he employs, it seems to me, may be used in support of this amendment providing for a lesser number of battle ships. He says we have entered each one of these wars unprepared. Did we not come out from each of them triumphantly? [Applause.] Yes, with honor; even with glory, and if we succeeded so well when we were unprepared, is it not certain that we would in the future succeed with that high degree of preparation which belongs to both the army

and navy? He states that our war for Cuba was one of sentiment. I can not agree with him in that. There was primarily trouble in that fertile island near at hand in which we had large commercial and other interests. Conditions there had become intolerable for us. Again, we could not sit idly by and see that island under the yoke of oppression and plunder, when we profess to the world that we are in the very vanguard of popular government and of the idea that the people must rule without oppression.

He states that any nation which attacks us must know their own peril in their assault. There is and always has been peril in assaulting the United States [applause], and that peril would be infinitely greater to-day than in any decade of our history; a peril due not only to a strong navy and a strong army, but to our unparalleled resources. Perhaps, I may say, a peril due more than all to the consideration of the future, to the conviction of statesmen that no one could idly or upon trifling occasion attack the United States, because it would mean a future which, if not of retaliation, would at least be of such diminished friendship and intercourse as to redound to the lasting injury of whatever country might attack us. Oh, but it is said, we must have a navy so that our contentions will be acquiesced in. What great contention in diplomacy which has made for the greatness of the American name was accomplished by a great navy? [Applause.] The Monroe doctrine was initiated and established and became a part of the settled policy of nations without the drawing of a sword or firing of a shot. It was initiated at a time when we were a weak, remote people, away from the great, powerful nations of the earth. The open door in China has been mentioned. What made our influence potent for securing that open door? Not the strength of our navy. If that were true, Great Britain and France and other powers, which have maintained powerful fleets in that locality for many years, would have secured it long ago. What did secure the open door? The confidence of the people of the great Flowery Kingdom in the justice and good intentions of the American people [applause], an influence which would have been diminished had we gone there with our battle ships and demanded anything of the kind.

In the brief time of this debate I can not go over ground which I have so frequently gone over before in this House; but I do wish to say that every nation, like an individual, has a work to do, a mission to perform. And no nobler mission could fall to the United States than to take a stand for peace. If we strike out this provision for the two battle ships, it will mean that we are at peace with all the world to-day and that we intend to be at peace with all the world in the future as well. [Applause.] It will mean to the struggling millions suffering from the tragedy of poverty or the pinching of want, to all those who desire enlarged opportunities and more of the comforts and conveniences of life, that we are aiding to lift the crushing weight of military expenses and duties from them. It will mean, even from the standpoint of enlargement of trade, that our prosperity will increase because their purchasing power will be increased. This problem is sure to be settled in the long run as an economic one. The nations of the earth can not go on in this mad rush for naval expansion. The burden, if not intolerable, will be intolerable in a very few years. Let us take the lead.

There were many notable events in that wondrous year of 1908, but that which will be longest recorded in history will be the appalling calamity in Italy. That will be remembered when many trivial and minor events shall have been forgotten in the dusty records of time. The most notable act, also, of this Congress will be the voting of $800,000 for the relief of suffering Italy. That measure passed here almost in silence, without a sound in opposition, and not a voice was needed in its support. The President had recommended it, and the sentiment of the American people demanded it. Our regard for humanity knew no distinction between republic and monarchy, no division by seas, but sent forth the declaration that bleeding, dying, suffering humanity awakened the sympathy and the affection of the American people. And so from our wealth, notwithstanding there might be constitutional questions, we gave from our abundance for the alleviation of the suffering of those people. Along that line, in measures which promote good will, which add to peace, which show that we are a part of the brotherhood of the nations and that humanity is one great whole, is our glory, and it will be not merely our glory but our very strength as a people. It will be remembered as an act of good will when naval bills making provision for battle ships are regarded as a reminiscence of the past and as due to useless rivalries and jealousies of nations, and when, in the larger view of humanity, in the great march of civilization, peace and good will prevail over all the earth. [Applause.]

Equal Treatment Abroad to All American Citizens—Catholic, Protestant, and Jew.

SPEECH

OF

HON. JOHN A. KELIHER,

OF MASSACHUSETTS,

IN THE HOUSE OF REPRESENTATIVES,

Monday, March 1, 1909,

On House joint resolution 235, concerning and relating to the treaty between the United States and Russia.

Mr. KELIHER said:

Mr. SPEAKER: It is to be hoped that the adoption of the pending resolution will have the effect of stimulating the incoming administration to early and vigorous action upon a subject which brings a blush of shame to the face of every virile American whose attention is called to it. That bona fide American citizens should be treated with deliberate disrespect while traveling within the borders of a friendly nation is hardly conceivable, but that a passport of the United States, presented by a citizen of that country, should be spurned by a power professing friendship, and its holder submitted to gross indignities, is a matter that demands immediate and, if necessary, forceful consideration upon the part of this great Nation.

Mr. Speaker, cases such as I have briefly pointed to are not by any means isolated ones. It is the fixed policy of Russia to make a distinction between American citizens when upon Russian soil; to respect such Americans as kneel at certain altars and to maltreat those who are embraced within the Jewish faith.

It has been demonstrated with cogency and force by the distinguished Member from New York [Mr. HARRISON], who has given considerable study to this question, that Russia willfully violates the provisions of the treaty of 1832, and it must be apparent to all that our submission to such action is nothing short of pusillanimous and manifestly repugnant to the American idea, that the world must respect the sons of Uncle Sam. Note the contrast, Mr. Speaker, between our manner of treating with these outrages which are being visited upon our citizens in Russia and Japan's attitude where the real or fancied rights of her citizens in this country are concerned.

We have just witnessed the spectacle of a sovereign State, through its legislature, disregarding the pronounced sentiment of its people by refraining from the enactment of laws that would unquestionably conduce to the welfare of its people, because, forsooth, the President of the United States held that such state laws would run counter to the provisions of a treaty between this Nation and Japan. Such solicitude as that displayed by President Roosevelt for the Japanese citizen in California would have challenged popular admiration and been hailed with applause if directed with equal vigor and perseverance toward protecting the clearly established right of the Jew of American birth or adoption to the treatment due from tottering Russia to all American citizens.

Mr. Speaker, we know no distinction in citizenship in our country, and thank God for it, and the policy which permits an effete nation like Russia, or would allow a powerful nation like Great Britain, to meet any citizen of the United States visiting within its jurisdiction in the spirit which Russia does law-abiding Jewish-American citizens gives a hollow sound to the claim that at last the world recognizes us as a world power. We have spent a stupendous sum of money in parading our great fleet upon the waters of every clime, ostensibly to display our friendship for all foreign powers, but in reality to flaunt our newly acquired naval prowess.

What does the expenditure of all these millions upon our navy avail us if the dignity and rights of American citizens are not respected by foreign governments? We are told by the advocates of a big navy that the most effective manner in which to command respect abroad is to develop our strength upon the seas. We have taken our place as a world power upon this theory, but almost every day we learn of the insulting and abusive treatment of citizens of influence in this country at the hands of the minions of the autocratic Czar, and no other reason is assigned than that the citizen so maltreated is a Jew.

Mr. Speaker, there is much in the national trait of the Japanese that does not appeal to me, but I must say that I admire the vigilance and protection which that nation exercises over its subjects, no matter where they may roam or be domiciled, and I believe that this country might well emulate that example of

Japan, particularly in Russia, with a view to guaranteeing equal protection and respect to the Jew of American birth or adoption that the Catholic and Protestant American enjoys while in Russia or elsewhere. Consequently, Mr. Speaker, I advocate the passage of this resolution and express the hope that it may arouse Mr. Taft, when he has assumed the duties of President, to the grave necessity of taking immediate steps toward terminating a condition of affairs at once unjust to a great element of our citizenship, unbecoming our dignity, and harmful to our national integrity.

Indian Appropriation Bill.

SPEECH

OF

HON. JOHN W. LANGLEY,

OF KENTUCKY,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, February 13, 1909.

The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 26916) making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1910—

Mr. LANGLEY said:

Mr. CHAIRMAN: I desire to repeat what I have had occasion to say heretofore on the floor of this House, that debate should always be confined to the general subject under consideration. It would tend to secure more thorough consideration of the subject and more intelligent action upon it, and would therefore aid in the expedition of the public business.

While we are engaged in the consideration of the bill providing means for continuing the administration of our Indian affairs I regard it as an opportune time to call attention to some things that have occurred in connection with that service. I desire to refer especially to the administration of the estate of the Choctaw and Chickasaw Indians. In the brief time allotted to me it will not be possible to go fully into the subject. I shall refer only to a few salient points, and I trust that I shall have the attention of the House, and particularly of the members of the Committee on Indian Affairs.

Mr. Chairman, I undertake to say that the administration of this Indian estate is little less than a national scandal. It has formed the most fruitful source of controversy and mismanagement of any Indian estate ever administered by our Government. The course of some government officers, charged by law with the duty of protecting the rights of individual claimants, has been characterized by mistakes and sometimes even by frauds so palpable that they can not fail to appeal to the conscience of any fair-minded man. I regret to make these statements, Mr. Chairman, because I do not like to indulge in this kind of criticism; but I make them upon my responsibility as a Member of this House and after the most painstaking investigation.

And one of the most startling facts of all is that these mistakes and frauds, which have resulted in denying to many legal claimants a share in this property, are now admitted by government officers themselves. Yet the Secretary of the Interior claims that he is powerless to afford these claimants any relief or protection under the present law. He has so informed the Senate of the United States. Notwithstanding that fact, Congress has failed thus far to enact legislation either to clothe the Secretary with power to correct these abuses or to confer jurisdiction upon the federal courts to do it. Various measures looking to these ends have been introduced in both Houses of Congress, but they are still pending in the hands of the committees to which referred. One of such bills was introduced by me at the last session. This bill provided that certain Indian descendants named in the bill should be admitted to enrollment. I became convinced that nothing could be accomplished by this method, and so the other day I introduced another bill, seeking to get at the matter by a different method. This bill, which has been referred to the Committee on Indian Affairs, where it is still pending, proposes to extend "to any person claiming any right in the common property of the Choctaw or Chickasaw Indians or tribes" the provisions of an act approved February 6, 1901, entitled:

An act amending the act of August 15, 1894, entitled "An act making appropriations for current and contingent expenses of the Indian Department and fulfilling treaties and stipulations with various Indian tribes, for the fiscal year ending June 30, 1895, and for other purposes."

Mr. Chairman, I ask unanimous consent to insert a copy of my bill at this point in my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky? [After a pause.] The Chair hears none.

The bill is as follows:

A bill (H. R. 26918) extending the provisions of an act approved February 6, 1901, entitled "An act amending the act of August 15, 1894, entitled 'An act making appropriations for current and contingent expenses of the Indian Department and fulfilling treaties and stipulations with various Indian tribes for the fiscal year ending June 30, 1895, and for other purposes,'" to any person claiming any right in the common property of the Choctaw or Chickasaw Indians or tribes.

Be it enacted, etc., That the provisions of an act approved February 6, 1901 (ch. 217, U. S. Stat. L., 56th Cong.), entitled "An act amending the act of August 15, 1894, entitled 'An act making appropriations for current and contingent expenses of the Indian Department and fulfilling treaties and stipulations with various Indian tribes for the fiscal year ending June 30, 1895, and for other purposes,'" be, and the same is hereby, extended to any person claiming any right in the common property of the Choctaw or Chickasaw Indians or tribes; and in order to make said act applicable to any person claiming any such right in said property said act is hereby amended to read as follows:

"SEC. 2. That all persons who are in whole or in part of Choctaw or Chickasaw blood or descent and who are entitled to share in the common property of the Choctaw or Chickasaw Indians under any treaty with said Indians or law of Congress, or who claim to be so entitled under any treaty, grant, agreement, or act of Congress, or who claim to have been unlawfully denied or excluded from participating in the common property of the Choctaws and Chickasaws to which they claim to be lawfully entitled by virtue of any treaty, grant, agreement, or act of Congress, may commence and prosecute or defend any action, suit, or proceeding in relation to their right thereto in the proper district or circuit court of the United States; and said district and circuit courts are hereby given jurisdiction to hear, try, and determine any action, suit, or proceeding arising within their respective jurisdiction and involving the right of any person, in whole or in part of Indian blood or descent, to share in the common property of said Choctaw or Chickasaw Indians under any treaty, grant, agreement, or law of Congress (and in said suit the parties thereto shall be the claimant as plaintiff, and the Choctaw and Chickasaw nations or tribes jointly as party defendant); and the judgment or decree of any such court in favor of any claimant to share in the common property of said tribes shall have the same effect, when properly certified to the Secretary of the Interior, as if such judgment or decree had been allowed and approved by him: *Provided*, That the right of appeal shall be allowed to either party as in other cases, and that no act of Congress or agreement limiting the time in which an application or assertion of right should be made shall operate to defeat the rights of any person entitled to share in the said common property under any treaty with or grant to said Indians.

"SEC. 3. That the plaintiff shall cause a copy of his petition, filed under the preceding section, to be served upon the district attorney of the United States in the district wherein suit is brought, and shall mail copies of same, by registered letters, to the principal chief or governor of the Choctaw and Chickasaw nations, respectively, and shall thereupon cause to be filed with the clerk of the court wherein suit is instituted an affidavit of such service and the mailing of such letters. It shall be the duty of the district attorney upon whom service of petition is made as aforesaid to appear and defend the interests of the Choctaw and Chickasaw nations in the suit, and within sixty days after the service of petition upon him, unless the time should be extended by order of the court made in the case, to file a plea, answer, or demurrer on the part of the Indian governments or tribes, and to file a notice of any counterclaim, set-off, claim for damages, or other demand or defense whatsoever in the premises: *Provided*, That should the district attorney neglect or refuse to file the plea, answer, demurrer, or defense, as required, the plaintiff may proceed with the case under such rules as the court may adopt in the premises; but the plaintiff shall not have judgment or decree for his claim, or any part thereof, unless he shall establish the same by proof satisfactory to the court.

"SEC. 4. That whenever it shall appear to the satisfaction of the court in which the proceeding has been instituted that there is in the possession of any department of the Government, or of any bureau, division, or commission thereof or thereunder, any record or records material to the proper determination of the issue being heard, or about to be heard, the head of the department in which such record is kept shall, upon request of the judge of said court, transmit a certified copy of the record or records on file in his department to the clerk of the court to be used at the trial of the case without any charge therefor: *And provided further*, That all records in the possession or custody of any government officer or department or division, bureau, or commission thereof or thereunder pertaining or appertaining to the rights of any such claimant shall, upon request of the claimant or his authorized attorney, be open to inspection: *Provided further*, That all suits brought under the provisions of this act shall be commenced within six months after the passage of this act, and the court, upon the request of either the plaintiff or defendant, shall advance any suit instituted under the provisions of this act on the dockets thereof to as early hearing as is consistent with the rights of the parties and the interests involved."

Mr. LANGLEY. Mr. Chairman, the effect of this bill would be simply to extend the provision of the general law, being the act of February 6, 1901 (ch. 217, U. S. Stat. L., 56th Cong.), so as to enable any Choctaw or Chickasaw claimant who claims to have been erroneously denied the right to share in the property of the tribe to go into the proper United States court and have his claim judicially determined. The records show that this law has enabled many claimants of the tribes to which it now applies to obtain their share of Indian tribal property after they had been denied recognition by the administrative officers of the Government. Can anyone give me a good reason why these tribes should be denied the protection of a statute that has proved so beneficial to members of other tribes who

would have lost their property rights had it not been for that statute? The necessity for giving the Choctaws and Chickasaws this access to the courts is far greater than it was for passing the law giving such access to all claimants where the title in fee was held by the Government—the Indian possessing only the right of occupancy—because the Choctaws and Chickasaws own the property absolutely, the title having passed from the United States by virtue of the patent issued by the President in 1842, and the Government having declared by act of Congress that it has no property interest therein. And an unanswerable reason, it seems to me, why this remedy in the courts should be given the Choctaws and Chickasaws is the admission of the Secretary of the Interior, to which I have already referred, that many of these claimants have been erroneously denied their rights and that he is powerless to remedy the wrong.

In his annual report for the fiscal year ending June 30, 1907, the Secretary says (p. 20):

> Requests have been presented, and doubtless efforts will be made, to reopen some if not all of these rolls, but it is to be hoped that such action will not be taken. Without doubt there are persons on the rolls who are not entitled to be there, and there are persons not on the rolls whose names should be there, but after the years of painstaking inquiry and determinations made by the citizenship court, by the commissioners to the Five Civilized Tribes, and finally by the Secretary of the Interior, it is believed that the cases of injustice or mistake are too few to justify an action that would surely result in thousands of claims being presented for readjudication.

Mr. Chairman, I respectfully dissent from this conclusion of the honorable Secretary. It being admitted that claimants have been erroneously denied by the Government their right to share in this property, I do not think that the Government is justified in refusing a remedy because of the amount of work or trouble that might be involved in giving it.

I shall not undertake, because I have not the time, to go into the history of all the legislation on this subject, including the creation of the Commission to the Five Civilized Tribes and the Choctaw-Chickasaw citizenship court, nor of the irregularities and errors that have characterized the administration of this estate, nor to show the departures from justice and from the law in adjudicating individual cases which are disclosed by the record.

The law required that every tribal roll should be taken into account in making up the final rolls.

Assistant Attorney-General Willis J. Van Devanter, in an opinion rendered for the guidance of the Secretary and the commission, under the act of June 28, 1898, under which the rolls were made, directed the enrollment of all persons whose names appeared upon any tribal roll and their descendants. The following is a complete list of the rolls which were in the custody and possession of the Commission to the Five Civilized Tribes and the Secretary, and were the only rolls used as a basis for the preparation of the so-called "final rolls," as will appear from an official report of the Secretary and printed as Senate Document No. 505, Sixtieth Congress, first session (p. 4 and 5):

> *Choctaw Nation.*—The 1885 census rolls; the 1893 census rolls; the 1896 census rolls; and memorandum rolls.
> *Chickasaw Nation.*—The 1893 pay rolls made by Maytubby; the 1896 Ieshatubby rolls; the 1896 census roll; and memorandum roll.

On page 3 of the same report the Secretary advises the Senate that none of these rolls are complete rolls of the Choctaw and Chickasaw Indians, and that most of the rolls omitted the names of persons included in entire counties and districts of the Choctaw and Chickasaw nations.

It is alleged that these rolls were made by Indian officials who were pecuniarily interested in the property. If so, this fact alone should, I think, have precluded their use at all, and certainly should have precluded their being used exclusively as the basis for the preparation of the so-called "final rolls." I think this observation is sustained by the language of the court in the case of New York Indians *v.* United States (40 Ct. Cls.), in which the court in deciding an identical question said:

> To accept as final the determination of such communities or societies on the question of a legal right to participate in the fund would be an evasion of judicial duty. It would be committing individual rights to the incompetent hands of those who have a direct pecuniary interest in the decision. Neither can the court accept the action of any community subsequent to the date of the treaty as being a legal determination on the question of communal membership; and where it appears that since the execution of the treaty a communal roll has been tampered with and persons who were not Indians have been admitted to communal membership from improper motives and by arbitrary methods, the court will not regard them as beneficiaries under the treaty or as persons entitled to participate in the fund. * * * In determining the persons who were termed "Indians" within the intent of the treaty, the court must resort to the actual communities then existing, so far as they can be ascertained, and must carry out the obvious intent of the treaty without being limited by Indian laws or customs which would defeat its chief purpose. * * * Consequently the court must adopt a rule of descent or participation which would embrace all persons whom it was the policy of the United States to remove, and this rule being ex necessitate rei, once established must continue. * * * This is not a question of Indian citizenship or tribal custom or communal ownership in Indian property, but simply a question of contract, of the subject-matter and purpose of contract, and of the intent of those who entered into it. * * * The court appreciates the work done by the direction of the Secretary of the Interior, and regrets that there should be a difference of opinion as to the distribution of the fund; but for the reasons hereinbefore given, the court can not regard this as simply a distribution of Indian property by Indian methods, according to Indian law, and at the dictation of Indian communities. The court, acting judicially, must be controlled by the purpose of the treaty and the terms of the jurisdictional act. It can not exclude from rolls Indians who were or whose ancestors were parties to the treaty of Buffalo Creek, and it can not admit as beneficiaries Indians who were not parties to the treaty of Buffalo Creek and whose ancestors were not. Neither can the court uphold the unsatisfactory, if not fictitious, rolls which some of the parties have framed, nor can the court allow Indian law or custom or decision to determine who shall participate in the distribution of this fund and in effect decide who were persons intended to be removed from New York and Wisconsin to the country west of the Mississippi.

LIST OF ROLLS NOT USED.

The following rolls prepared by government officers and agents, and which are authentic, reliable, and complete rolls, were in the possession and custody of the Secretary of the Interior and Secretary of the Treasury, but were never used or consulted by the commission or the department when the so-called "final rolls" were made. Upon these rolls appear the names of many persons who have been denied the right to share in this property or the names of their immediate ancestors (S. Doc. No. 505, 60th Cong., 1st sess.):

LIST OF ROLLS IN THE POSSESSION AND CUSTODY OF THE SECRETARY OF THE INTERIOR.

1. Register of Choctaw Indians claiming lands under the various provisions of the Choctaw treaty of 1830 and the supplement thereto, prepared by F. W. Armstrong in 1831.
2. In 1831, after the Choctaw lands had been surveyed, George W. Martin was sent to the ceded Choctaw country, in Mississippi, to make a record of those Choctaws who claimed land under the treaty and supplement, and of the description by government survey of the lands claimed. He was engaged in business until the year 1836, and his report is generally known as "Martin's Register."
3. Immediately after the ratification of the treaty of 1830 the Choctaw Indians began to complain that the agent had refused to make record of the desire of many of their number to remain east of the Mississippi and reap the benefits of the fourteenth article of that treaty. The proofs submitted to the War Department regarding the allegations of misconduct on the part of the agent were so convincing that Congress passed an act, approved March 3, 1837 (5 Stat. L., 180), providing for the appointment of commissioners to adjust the claims to land under the fourteenth article of the treaty.
4. The general emigration of the Choctaws under the treaty was begun in 1831 and ended early in 1833. The records of the Indians transported west by the Government during all these years are in the Indian Office.
5. Only half the scrip to which the Indians were entitled was delivered to them. Some of it was delivered west of the Mississippi and some east.
6. In 1855 Douglas H. Cooper, the agent of the Choctaws west, was directed to go to the Choctaw country in Mississippi, Louisiana, and Alabama and make a census of those members of the tribe still remaining in those States. Mr. Cooper visited the Choctaw country and made a roll.
7. In 1856 the tribal authorities of the Choctaw Nation presented schedules of claims made by individual citizens of the nation for the expense of self-emigration and for losses of property incident to the removal.

The rolls of the Chickasaws are as follows:

1. The emigration muster rolls compiled in 1837 by A. M. M. Upshaw.
2. The census roll made in 1839 by A. M. M. Upshaw.
3. Book No. 13, covering reservation claims of the heads of the Chickasaw families.

I am advised that there are other and additional rolls to those herein above enumerated, some of which were actually in the custody and possession of the Commission to the Five Civilized Tribes when the final rolls were made, and which additional rolls were never used or consulted by the commission in making up the so-called "final rolls" of citizenship of the Choctaws and Chickasaws, and which additional rolls were recently discovered by Assistant Attorney-General J. W. Howell during an investigation of this subject conducted in November, 1908, by direction of the department.

Mr. Chairman, on the rolls not consulted at all appear the names of many claimants, most of them known as the "Harper claimants," who live in my district, or the names of their ancestors. Their descent from Choctaw and Chickasaw ancestors is not questioned. They are just as much entitled, in equity and justice, to a share in this property as those who happened to pass the scrutiny of the final enrolling officials, and more so than some of them, because it is conceded that some of those who are enrolled were not entitled to enrollment. Many of these claimants are minor children, many widowed women, and nearly all of them are in need of the money that a just distribution of this property would bring to them.

The many complicated questions connected with this whole affair are of such a character that only a court should or can properly determine them. That is why I introduced the bill to which I referred in the outset, and I trust that the Committee on Indian Affairs will act upon it and act promptly. The estate is now practically intact, but the Secretary of the Interior says that inasmuch as he has no power under existing law to correct mistakes in the rolls that have been made up by officials of the department and approved by his predecessor, he must proceed to distribute the property according to that enrollment. If this is done, our Government will be responsible for diverting nearly half a billion dollars from the rightful owners, which it would

be in honor bound to make good. The way to avoid this is to give these claimants the right to a court review of their cases, and thus do even-handed justice to all concerned and put an end, once and for all, to this unfortunate controversy.

I have also introduced a bill extending the time for the Eastern Cherokee claimants to present their claims to share in the judgment of the Court of Claims, rendered on May 18, 1905, against the United States in the sum of $5,000,000, this being the amount found due the Eastern Cherokees under the treaty of 1838. There are a number of these claimants residing in my district who did not have actual notice of the limitation as to the date of filing their claims and others who did not understand their rights. Now that they do understand these matters and are seeking the privilege of filing their claims in order to establish their right, I do not think that Congress can afford, under the circumstances, to deny their request. I will insert here a copy of this bill:

A bill (H. R. 26213) extending the time in which the Court of Claims shall receive application of persons to share in the judgment of said court rendered May 18, 1905, in favor of the Cherokee Indians.

Be it enacted, etc., That the Court of Claims is hereby authorized and directed to receive for three months after the approval of this act the claim of any person to share in the moneys appropriated by the act approved June 30, 1906, entitled "An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1906, and for prior years, and for other purposes," which appropriation was in satisfaction of the judgment rendered by the Court of Claims on May 18, 1905, in the consolidated cause No. 23129, and entitled "The Cherokee Nation *v.* The United States," "Eastern Cherokees *v.* The United States," and "Emigrant Cherokees *v.* The United States;" and any claim filed within said time shall receive the same consideration as though it had been filed prior to August 31, 1907, the limitation of time fixed by said court.

Mr. Chairman, it is manifest already that no legislation on these subjects can be secured at the present session. The people of my district have honored me with a seat in the next Congress, and one of the pledges I made to them was that I would endeavor to secure legislation that would restore the rights, unjustly denied, of these Indian descendants. In obedience to that promise I have spent much time in the investigation of the subject and have made every honorable effort that I could in their behalf. In obedience to that promise I have made this statement of their case to-day, and in further obedience to it I give notice now that I shall introduce these bills again in the next Congress and shall earnestly press them for early consideration.

Addition to Rock Creek Park.

SPEECH

OF

HON. THEODORE E. BURTON,

OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

Wednesday, March 3, 1909.

The House having under consideration the bill (S. 4441) to acquire certain lands in the District of Columbia as an addition to Rock Creek Park—

Mr. BURTON of Ohio said:

Mr. SPEAKER: I do not know that I will require more than five minutes.

The bill adds to the parks of Washington approximately 100 acres of land. It extends Rock Creek Park across Connecticut avenue to Massachusetts avenue and includes an area excellently adapted for the purposes of a park. The proposed cost is $423,000, one half of which is to be paid by the District of Columbia and the other half by the United States. It involves a readjustment of boundary lines, but gives to Rock Creek Park a large front on Massachusetts avenue and makes it more readily accessible from other portions of the city. It also affords a place of resort and a playground in a very rapidly growing portion of the city of Washington. I am free to admit that I am not familiar with real-estate values in this city—that is, in any general or comprehensive sense—but I have made inquiry with reference to this property, and so far as my information extends it is a very reasonable price, because property is selling on all sides of it on a higher scale.

I am frank to admit a sentimental interest in the parks of the city of Washington, and especially in Rock Creek Park. In the Fifty-first Congress, twenty years ago, I was a member of the Committee on the District of Columbia. That committee was the first to make a recommendation for the establishment of Rock Creek Park which was crystallized into law. At that time there was strenuous opposition to the acquisition of the necessary lands for a park; and no one can make any remarks against this bill to-day without practically repeating what was said then. But Congress, and I think I may say the people of the country, were interested in the beautification and the adornment of this capital city. We are proud of it, and trust that it will become before many years, if it is not already, the most beautiful city in the world. Its attractiveness and beauty gained immensely by the acquisition of that park. I want to say that this addition is in the nature of essential growth and development, not merely of the parks, but of the city itself.

This bill is favorably reported by the Committee on Appropriations, where it was considered for a long time, and, I think I can say, comes to us with the general approval of citizens of Washington, if not their unanimous approval; and I hope the measure can pass.

Mr. SHERLEY. Before the gentleman takes his seat, will the gentleman yield to an inquiry or two?

Mr. BURTON of Ohio. Certainly.

Mr. SHERLEY. Does the gentleman know anything about the value of the land which is proposed to be given by the District for land to be given by certain property owners along the route?

Mr. BURTON of Ohio. There is a parcel of land, owned by private parties, fronting on Massachusetts avenue on the side toward the park, which is to be exchanged for property on the other side owned by the United States that is smaller in area.

Mr. SHERLEY. Does the gentleman know anything about the value of that exchange, and whether it is really a proper exchange or not?

Mr. BURTON of Ohio. I have not made any study of that subject, but my opinion is that the property outside which would be transferred to the private parties is less valuable than that which is acquired. This exchange is desirable for the private party because it is adjacent to other lands he has.

Mr. SHERLEY. If I understand the gentleman's position, it is desirable to add this tract to the parking system; but will he express his own opinion as to the value of the property to be bought?

Mr. BURTON of Ohio. As I said, I am not posted on real-estate values in the city of Washington. I have made considerable inquiry in regard to this, and the unanimous result, so far as these inquiries have extended, is that the price is extremely reasonable.

Mr. SHERLEY. But your proposition is the proposition that confronts the House. And I would thank the gentleman if he would give his personal opinion as to the value of that property.

Mr. BURTON of Ohio. As I have already said, I am not an expert on real-estate values in Washington.

Mr. SHERLEY. I want also to correct the impression given that the Committee on Appropriations as a whole favor this bill.

Mr. BURTON of Ohio. The report is here printed.

Mr. SHERLEY. I understand.

Mr. BURTON of Ohio (reading):

Mr. TAWNEY, from the Committee on Appropriations, submits the following report——

Mr. SHERLEY. And it is worth reading.

Mr. BURTON of Ohio (continuing):

from the Committee on Appropriations, to whom was referred Senate bill—

And so forth—

having considered the same, report it back with the recommendation for its passage.

If there was any minority report, I have not heard of it.

Mr. SHERLEY. There is not; but this is the fact in connection with that: The matter was reported out over a year ago and defeated by the House. Since then, so far as I know, there has been no formal reconsideration of the matter by the committee, and I know that I myself and some of my colleagues are opposed to the bill.

Mr. BURTON of Ohio. You have not filed any minority report, however.

Mr. SHERLEY. We have not. We considered the adverse action of the House on the matter sufficient.

Mr. STEPHENS of Texas. Will the gentleman allow me to ask him how the value placed on this land in the bill has been arrived at?

Mr. BURTON of Ohio. It is a proposition made by those who represent the owners. It is in the hands of trustees.

Mr. STEPHENS of Texas. And are we asked to pass the bill without any report as to the real value of the land?

Mr. BURTON of Ohio. As I understand it, the Committee on Appropriations were posted on the value of the property at that time.

Mr. STEPHENS of Texas. But how would it be possible for Members of the House to post themselves?

Mr. BURTON of Ohio. Why, from the information given by the committee. I will state that I myself have given it some degree of attention, though not so elaborate as I should have given it had there not been a prior investigation of the subject.

Mr. STEPHENS of Texas. I think we should have more time than is given us to investigate a matter of this importance. What is the amount of money carried in the bill?

Mr. BURTON of Ohio. Four hundred and twenty-three thousand dollars.

Mr. STEPHENS of Texas. How many acres of land are proposed to be added to the present park?

Mr. BURTON of Ohio. Approximately 100.

Mr. STEPHENS of Texas. For how much an acre—$400?

Mr. BURTON of Ohio. Oh, no; something over $4,000 an acre. One-half of that comes from the District of Columbia. The gentleman must bear in mind that this is in the territory between Massachusetts avenue and Connecticut avenue, in a locality where property is increasing in value as rapidly as anywhere in the city.

Mr. SHERLEY. Will the gentleman advise the House as to the topography of this land, and whether it has anything like the value for building purposes of other land which he has estimated the value of?

Mr. BURTON of Ohio. I will state that I have made some inquiry on that very subject, and sales have been made of all varieties of land about it, and again I repeat, after a careful examination, that it is equal to the average of land about it, and that it is here offered at a very materially less price than that at which sales have been made in the neighborhood.

* * * * * * *

Mr. Speaker, this bill has awakened most unexpected opposition, and has involved some unusual accusations. One Member of the House has taken the position of claiming that there is dishonesty in connection with it, and says there is a Member of this House who is personally interested in this sale.

Mr. Speaker, I am tired of these vague accusations on the floor of this House or anywhere else. [Applause.] If the gentleman knows aught against any man on this side, or on the other side, in reference to this transaction, let him not make his accusation unnamed, but let him stand up here on the floor of this House and let the Members of the House of Representatives and let the country know who in this body is actuated by personal interest in this matter.

Mr. SIMS. I would give the name if the man who told me would permit.

Mr. FITZGERALD. Will the gentleman from Ohio yield for a question?

Mr. BURTON of Ohio. Certainly.

Mr. FITZGERALD. Is the gentleman from Ohio able to state the names of the owners of this land?

Mr. BURTON of Ohio. Except as stated in this bill. As I understand, a large share belongs to the estate of Mr. Waggaman, and two or three others own the other part.

Mr. FITZGERALD. Certain persons are named as trustees, and I endeavored to ascertain, when the matter was before the Committee on Appropriations, who the owners were, and the only names I could get were those of the trustees.

Mr. BURTON of Ohio. I am satisfied that these accusations of dishonesty are carelessly uttered and have been made without one particle of foundation. I have no interest in this bill, nor do I believe any other Member of this House has an interest. I have advocated it on the suggestion of some who knew of my original interest in Rock Creek Park twenty years ago. I was interested then, and I listened to the same kind of opposition, though not so loud in accusations of dishonesty.

Mr. SIMS. I deny having said anything about dishonesty. I said interest.

Mr. BURTON of Ohio. In the natural growth of the parks in the city of Washington the extension will be over this ground, and I say to this House that at some day this property will be a part of the park system of Washington. The modern development of parks is in separate localities, connected by driveways and otherwise. This is in the natural line of connection and development between them. If I had time, I would refer to the remarks of the gentleman from New York [Mr. ANDRUS]. He says that this property is only assessed at $235,000. Does not the gentleman know that the taxable value of property everywhere is not its full value, that property is sometimes taxed at only one-third or one-quarter of its value? It is taxed here on a basis of 66 per cent of the valuation of the property, as I am informed by my friend from Illinois [Mr. MADDEN]. The time when we can most advantageously obtain this property, which will no doubt be an integral part of the park system, is now.

Repeal of the Bankruptcy Law.

SPEECH

OF

HON. CHARLES L. BARTLETT,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, February 6, 1909.

The House having under consideration the bill (H. R. 21929) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, as amended by an act approved February 5, 1903—

Mr. BARTLETT of Georgia said:

Mr. SPEAKER: Some of these amendments presented I am inclined to vote for; but rather than amend the law, I shall gladly vote for its repeal. I do not know that an opportunity will be given, but I wish the House had the opportunity to vote on the amendments separately. I apprehend, from indications that I have seen, that the House will not have that opportunity.

Mr. OLLIE M. JAMES. The Speaker ruled a moment ago that you could vote upon them separately.

Mr. BARTLETT of Georgia. The Speaker ruled that if we could avoid the previous question, which I have no doubt will be moved presently, we might get a chance to vote on them separately; but there will be no opportunity to vote after the motion for the previous question is called.

Mr. Speaker, I am one of those who voted for the repeal of this bill, and I was hoping that it would be repealed. If anyone will take the report of the Attorney-General and read what has been done in this country the last year and the preceding year, he will see that, so far as the creditor is concerned, it has been a most expensive administration to him.

In many jurisdictions, I may say in most jurisdictions, if this report is correct, and I am bound to take it as true, from Alabama to Wyoming—commencing alphabetically and going through the States—the creditor, out of the amount of the debts, gets from 10 to 12 per cent, and out of the assets realized there has been put upon it a charge of 15 to 35 per cent for the collection of these estates.

In my part of the country it is not the credit men, but the wholesale and retail merchants that are demanding its repeal, because it has been used as an engine and power to force the creditor to compromise with his dishonest debtor in many instances rather than seek the court, where the estate is paid out in expenses for collection to the officers and attorneys of the court.

Now, I do not confine that to my section of the country; but the report of the Attorney-General shows that it is generally characteristic all over the country. If you will take the amount of dividends, you will see that the creditors of the country have paid enormous sums in order to realize very small amounts upon their debts.

As to the tenth amendment proposed to the bankruptcy act, I have, so far as my State is concerned, a very strong opposition to it. We do not have in our State what is known as "judgment notes." Judgment can only be obtained after a suit in court and by the direction of the court. And yet by this amendment, if a man goes to court and sues upon a note overdue and obtains judgment—which by the law of my State is a lien from the day it is entered by the court—he knows it is a preference, and knows that the judgment will give him the money in preference to all others whose judgments are not older than his, and yet, by pursuing a simple remedy at law which my State permits you to pursue, bringing suit in court upon the note, aboveboard, and getting a judgment, that transaction is declared fraudulent, and against that amendment I want to enter my protest. The only remedy for the creditor, in my judgment, is to repeal the entire law, which already has remained too long on the statute book, because it has long since answered the purpose it was intended to serve.

O
